[2]Kentucky Department for Public Health, Office of Vital Statistics, 2011. County of occurrence is defined as a geographic area where the birth occurred, regardless of place of residence. In order to protect confidentiality of birth cases, the Office of Vital Statistics suppresses counts less than 5; therefore, the percent for the areas with count less than 5 is not provided. For the counties that are not included in the table, the percent of women who smoked during pregnancy is zero.
