

2001 Kentucky Forage Variety Testing Entry Form:
 Deadline for receipt of seed: *March 15*

Use this form to for all entries in The Forage Variety Testing Program tests outlined below. Use one form per variety for all tests. Copy this form as needed. Send completed application with the fee and 250 grams of seed per location to Robert Spitaleri, N222 Ag Science North, (UPS Address: 500 South Limestone), Lexington, Kentucky, 40546-0091. Seed of experimental varieties can come from the breeder. We participate with the central alfalfa distribution system conducted by Dan Undersander at the University of Wisconsin (608/263 5070). Where possible, we need to test the same generation of seed that will be planted by the farmer. Varieties entered as experimentals will be labeled as such and these entries will not be renamed in subsequent reports. Please make checks payable to the University of Kentucky.

Will entry be offered for sale in Kentucky during the testing period? Yes / No

If yes, please indicate the primary marketer(s) in Kentucky:

If applicable, please include the local source of seed from which seed for this entry can be obtained (we would like to get the seed from certified lots of seed where possible).

I certify that this seed is properly labeled as to treatments and is true to the commercial variety to be marketed.
