

Special Local Need Registrations

James R. Martin, Extension Weed Scientist

Special Local Need (SLN) registrations are unique in that they are implemented by individual states. The part of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) that describes this authority is Section 24 (c); consequently these registrations are often referred to as 24(c) registrations. Although there are instances of 24 (c) registered uses approved independently in several states, the label is still regarded as a state label and is regulated as such.

The Division of Environmental Services Pesticide Regulation is a part of the Kentucky Department of Agriculture that regulates pesticides and has the responsibility and authority for approving or denying 24(c) registrations. Once a 24 (c) registration has been approved by the Division, it is reviewed by the Federal EPA, which has the general oversight of 24(c) registrations.

Based on the current policy of the Division of Environmental Services Pesticide Regulation, 24 (c) registrations expire on December 31st of the third year from which they are approved. For example, if a registration is approved on June 21, 2004, it will expire December 31, 2006. SLN registrations are eligible for renewal if reviewed and approved according to the state's guidelines.

Listed below are 24(c) registrations approved specifically for Kentucky.

ACROBAT MZ

Registrant: BASF

Registered use: For controlling metalaxyl/mefanoxam-resistant blue mold in field-grown tobacco.

SLN registration no.: KY-030006

Expiration date: 12/31/2005

COMPOUND DRC 1339 CONCENTRATE

Registrant: US Department of Agriculture; Animal, Plant Health Inspection Service
Registered use: For bird control in feedlots.

SLN registration no.: KY-020003

Expiration date: 12/31/2004

COMPOUND DRC 1339 CONCENTRATE

Registrant: US Department of Agriculture; Animal, Plant Health Inspections Service.
Registered use: For bird control in staging areas.

SLN registration no.: KY-020002

Expiration date: 12/31/2004

DITHANE DF RAINSHIELD

Registrant: Dow AgroSciences

Registration use: For control of blue mold, anthracnose, & damping-off in seedling & field grown tobacco.

SLN Registration no.: KY-020001

Expiration date: 12/31/04

DUAL MAGNUM

Registrant: Syngenta

Registered use: For weed control in transplanted bell peppers.

SLN Registration no.: KY-030004

Expiration date: 12/31/2005

Note: End users are required to sign wavier of liability and indemnification form

via Kentucky Vegetable Growers Association (KVGA)

DUAL MAGNUM

Registrant: Syngenta

Registered use: For weed control in transplanted cabbage.

SLN Registration no.: KY-030003

Expiration date: 12/31/2005

Note: End users are required to sign wavier of liability and indemnification form via Kentucky Vegetable Growers Association (KVGA)

GRAMOXONE MAX

Registrant: Syngenta

Registered use: For burndown control of weeds & cover crops in no-till tobacco

SLN Registration no.: KY-020004

Expiration date: 12/31/04

POAST HERBICIDE

Registrants: BASF and Micro Flo

Registered use: For postemergence grass control in tobacco

SLN Registration no.: KY-030005 for BASF and KY-030007 for Micro Flo

Expiration date: 12/31/2005

STRONGARM

Registrant: Dow AgroSciences

Registered use: For broadleaf weed control in cottonwood planting.

SLN Registration no.: KY-040001

Expiration date: 12/31/06

TRACER

Registrant: Dow AgroSciences

Registered use: For control of tobacco budworm and tobacco hornworm in field grown tobacco.

SLN Registration no.: KY-030001

Expiration date: 12/31/2005

Educational programs of Kentucky Cooperative Extension serve all people regardless of race, color, age, sex, religion, disability, or national origin.
