

**2010 Kentucky Forage Variety Testing Entry Form:**

Deadline for receipt of seed: *March 15*

Use this form to for all entries in The Forage Variety Testing Program tests outlined below. Use one form per variety for all tests. Copy this form as needed. Send completed application with the fee and **250 grams of seed** per location to **Gene Olson, N222 Ag Science North, Lexington, Kentucky, 40546-0091. FAX 859 323 1952;** email [glolso2@uky.edu](mailto:glolso2@uky.edu). Seed of experimental varieties can come from the breeder. We participate with the central alfalfa distribution system conducted by Dan Undersander at the University of Wisconsin (608/263 5070). We request the same generation of seed that will be planted by the farmer. Please make checks payable to the University of Kentucky.

Variety Information											
Please mark whether the variety is experimental and comment on significant morphological and physical traits (including maturity for grasses). Identify variety type for white clover and the ryegrasses. Alfalfa entries should have the fall dormancy and disease resistance ratings also.						Alfalfa Varieties Only
