Loading the zodiac for a day trip to Bartolomé Island - Galapagos.

The zodiac moves about 8 people at a time to the larger boat.

Off loading the zodiac to the larger craft that takes us to the Islands.

Everyone looks good in their life jackets.

No worries, Jamie is piloting the ship.

One of the attractions on Bartolomé Island is Pinnacle Rock.

Pinnacle Rock.

The boardwalk takes you up to the top of an extinct volcano.

Bartolomé Island has a barren volcanic landscape.

Spatter cone and lava flow tubes.

Checking out a lava cactus.

Lava cactus (Brachycereus nesioticus)

Gray matplant (Tiquilia nesiotica)

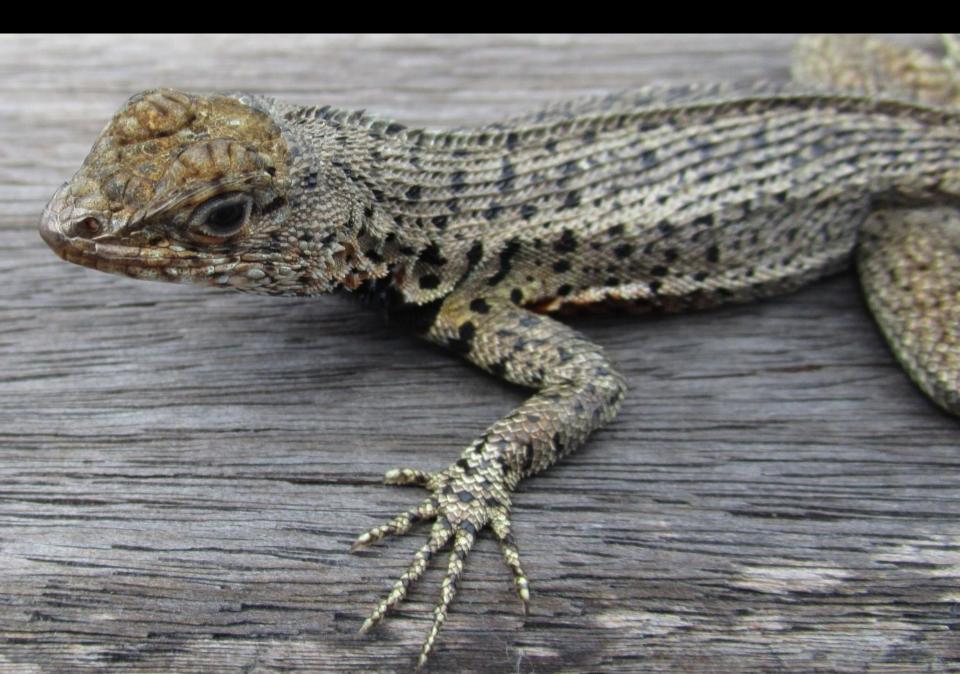

Olivia with a lava rock.

Lava lizard (Microlophus)

Mark and Delia at the vista view from the boardwalk.

Group photo.

Panorama views of Bartolomé Island - Galapagos.

Panorama views of Bartolomé Island - Galapagos.

Panorama views of Bartolomé Island - Galapagos.

After lunch, we left Bartolomé Island for snorkeling Sullivan bay on Santiago Island.

Before snorkeling we took a lava walk along Sullivan Bay.

This area is covered with a type of lava called Pahoehoe that has a rope-like appearance.

Pahoehoe forms from a slow moving lava flow.

The upper skin of the lava cools before the continuing lower lava to form twists of rope-like ribbons.

The under layers of Pahoehoe cool slower and continue to flow causing uplifted cracks and cavities.

Gearing-up for snorkeling.

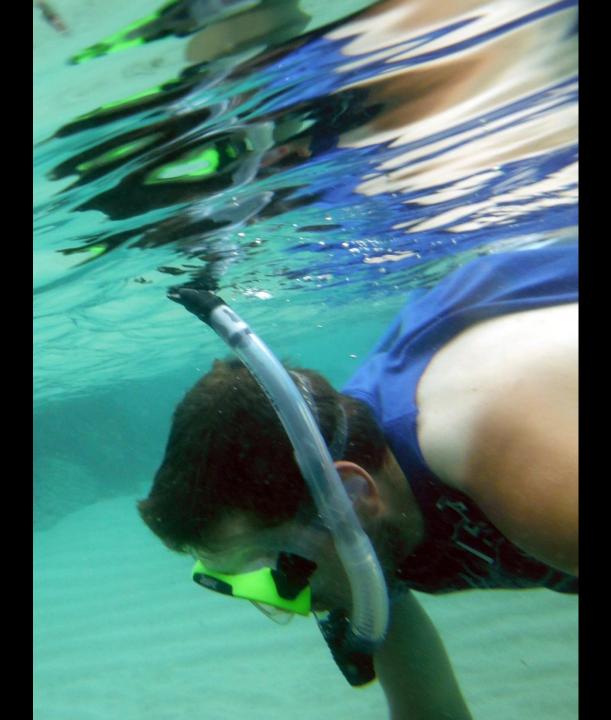

Pinnacle rock in the distance from Sullivan Bay.

Cody

Olivia finding stuff.

Swimming with the fishes.
