February 18, 2014

Dear Producer,

I hope everyone has been enjoying the wonderful Kentucky weather and gearing up for market season. One thing to get you started is renewing your KDA Farmers’ Market sampling certificate. All sampling certificates expired as of December 31, 2013. So don’t wait, apply today.

For your convenience, I have enclosed the sampling instructions, application and the Food Sampling Guidelines and Procedures from the new 2014-2015 KDA Farmers’ Market manual. Please complete the application and return to our office. Please remember that everyone offering samples at the market will need to complete a sampling application. Please make sure that your application is complete, including a signature, date and names of the farmers’ markets. Our office can only issue sampling certificates for the following locations:

- KDA Registered Farmers’ Market
- On-farm Market
- Certified Roadside Market registered with Kentucky Farm Bureau

Remember if you plan on offering samples at your Farmers’ Market, you must have an approved sampling certificate issued by our office and posted at your booth. Once the application is received by our office and approved, a new sampling certificate will be issued to you. If you add a market during the year and will be offering samples at that market, please contact our office immediately so your sampling certificate can be updated.

For a complete copy of the 2014-2015 KDA Farmers’ Market Manual, sampling applications or to view the 2014 Farmers’ Market directory, you may visit our website at www.kyagr.com.

Please mail the completed sampling form to the following address:

Kentucky Department of Agriculture
Attention: Sharon Spencer
100 Fair Oaks Lane, 5th Floor
Frankfort, Kentucky 40601

If you have any questions or need additional information, you may reach me at 502-564-4983 or email at sharon.spencer@ky.gov.

I look forward to working with you and I hope everyone has a successful market year!

Sincerely,

Sharon G. Spencer
Farmers’ Market Marketing Specialist
Kentucky Department of Agriculture
Food Sampling
Guidelines and Procedures

Farmers’ markets sell primarily on taste. Allowing a customer to try a new product prior to buying can be a tremendous marketing tool for producers. Care should always be taken to ensure each sample is of the highest quality and will be a positive experience for the consumer.

Adherence to food safety principles is of great importance when offering samples. Food borne illness resulting from improper sampling methods could create a negative image of the producer or the farmers’ market in general.

It’s important to note that the vendor offering samples assumes all liability and should look carefully at every step to make sure their samples are as safe as possible.

A sample is defined by the Department for Public Health as a food product promotion where only a bite-sized portion of a food or foods is offered free of charge to demonstrate its characteristics. A whole meal, individual hot dish or whole sandwich is not recognized as a sample. There are two broad categories of samples allowed: those that are cooked or processed, and those that are raw or unprocessed.

Cooked or Processed Sampling Certificate
In order for processed and cooked products to be sampled at the farmers market, a producer must:

✓ read through the sampling chapters in the Farmer’s Market Manual
✓ complete the KDA Farmers’ Market Sampling Application
✓ submit completed application to the KDA office

No formal classroom training is required. Once the Application has been reviewed and approved, the sampling certificate will be issued. This certificate must be on display at the markets when samples are being offered.

All Samples Certificate
If the producer wishes to offer samples of raw or uncooked products they must complete the Good Agricultural Practices (GAP) Training class and the KDA Farmers’ Market Sampling Application. The University of Kentucky County Extension Agents will be utilized as the instructors for the GAP Training classes. The instructors will be responsible for submitting a list of class participant’s full name and mailing address after the class has been completed. This should be sent to the KDA office immediately following the class. Once the required GAP training has been completed and the Sampling Application has been reviewed and approved, the All Samples Certificate will be issued by the KDA office. This certificate must be on display at the markets when samples are being offered.
Here are a few points about both types of sampling certificates:

- Sampling Certificates are valid for a two year period; this coincides with updating of the KDA Farmers’ Market Manual.
- The sampling certificates will only be issued for an individual. This means the person listed on the certificate will be the only person to offer samples. Employees, family members, etc. must complete their own Sampling Application and receive their own certificate if they intend to offer samples at the market.
- GAP Diplomas, however, are not required of employees, family members etc. so long as the farm operation has at least one GAP diploma on record. When sending in the Sampling Application for an All Samples Certificate (raw and uncooked products) you must write the name of the person who’s GAP Diploma you will be sampling under.
- If a producer moves or expands to another market they MUST contact KDA so the new changes are on file and a new sampling certificate can be issued. The sampling certificate must have the names of all the markets where samples will be offer.

**Preparation of Samples**
Some farmers choose to prepare their samples at home where the quality of water, cleanliness of surfaces and equipment and cleanliness of vegetables can be easily controlled. The samples may be washed, cut up and placed in disposable, individual cups with lids. These cups are available at any restaurant supply store or at large outlet stores.

Whether you prepare your samples at the market or at home you must provide equipment and maintain practices that ensure the following during sample preparation:

**Potable water**
All water that touches your product or your utensils **MUST be potable**. If the water is from a well, cistern or other non-municipal source it must then be tested and the records retained. Documented test results prove the water is potable, not previous use as drinking water.

**Clean produce**
All raw produce **MUST be washed thoroughly with running potable water**. The water has to be running to carry away any dirt or contaminants that may be on the outside of the product. For example, you cannot wash your tomatoes in a bucket of clean water.

Produce with rinds pose a special problem. Cantaloupes and muskmelons need a good scrubbing to remove all dirt and. This can be done at home to all the produce you plan to use for samples. Make sure the washed produce is then packed in clean bags or containers to keep them clean; and then store them separately from unwashed items until you arrive at the market.
Approved Ingredients
All products used in your samples must come from an approved source. This means all agricultural products that will be served without cooking must have been raised according to Good Agricultural Practices (GAP) and any value-added product must be commercially produced or produced under the Home-based Processing/Microprocessing program.

Clean hands
You must wash your hands properly before touching any part of your samples. Hand sanitizers do not substitute for proper hand washing. Gloves do not substitute for proper hand washing. Always wash your hands before putting on gloves and after taking them off. If gloves become torn, ripped or contaminated they should be changed. Never reuse gloves.

Though we have all washed our hands since childhood, the proper way for sanitation purposes includes the following:

- Wetting your hands
- Applying liquid soap
- Briskly rubbing your hands together -- including fingernails and backs of hands for a minimum of 20 seconds (a long time!)
- Rinsing your hands under free flowing water
- Drying your hands with a disposable paper towel

When should you wash your hands?

- After using the bathroom
- After handling money, unwashed produce, baskets, and anything not clean and sanitized
- Any time you leave your stand and return

A proper hand washing station includes:

- A container of potable water large enough to supply water for the entire sampling time. This container must have a free-flowing dispensing value. This is the type of spigot that does not require you to hold open the valve to keep the water flowing.
- The container should be raised off the ground to allow a catch basin under the spigot.
- Paper towels
- Liquid hand washing soap in a pump or squeeze bottle.
Depending on the market setup, providing for hand washing may mean each vendor must have their own station. If vendors feel they can share a station, it must be easily accessible with no physical impediments between the vendor and the station.

Clean utensils
All utensils that touch a sample in any way must be washed in a detergent, rinsed in clean potable water and soaked for 60 seconds in a sanitizing solution. If more than one or two different utensils are used, a cleaning, rinsing and sanitizing station is required. A simple, but effective sanitizing solution is 50 ppm household bleach/water solution. This is about one capful of bleach to one gallon of water. The sanitizing container should be of sufficient size to completely immerse the largest utensil in use.

Proper temperature
- If you bring cold products to the market for sampling, you must maintain them at 41°F or below. That means you should probably ice it above and below. And, if using ice, you need to make provisions for melted ice to drain away from the product. A small cooler can provide a great way to keep samples cool.
- Any product you warm at the market must be heated and kept above 140°F. You must have a way to maintain this temperature.
- A quality food thermometer is a good investment. Note the temperature readings in your records in case there is ever any doubt.
- For both safety and quality, samples should be monitored to ensure that none remain out for more than 30 minutes. Remember you want your samples to be perfect little bites of your product at its best!

If you are preparing your samples at the market
- If you are only using a few utensils, you may choose to bring a number of the utensils in a zip lock bag marked as “CLEAN” and bring with you another zip lock bag marked “DIRTY”. That way if you drop or soil a utensil a clean one is available and the dirty one can be easily distinguished and isolated.
- If using a knife then you must also have a proper cutting board. It must be handled like any other utensil – washed, rinsed, sanitized.
- Use only plastic (nonabsorbent) or approved hardwood cutting boards or disposable paper plates for cutting produce for sampling.
- If samples of both meat and vegetables are going to be cooked and offered, there should be 3 separate sets of utensils. The first is for raw meat, the second for cooked meat and the third for vegetables and fruits. These utensil sets must be kept separated from each other at all times to prevent cross-contamination.
- Allow all cleaned and sanitized utensils to air dry on a clean non-porous surface or dish rack. Do not dry with a towel.
- The “washing, rinsing and sanitizing station” and the “hand washing station” must be separated from each other and completely set up before preparing any samples.
Delivery of Samples

- You must deliver the samples to the customers in such a way to prevent anyone from touching any other sample. If you have prepared the samples at home, you can place the individual cups on a tray a few at a time. Then, there is no need to worry about any customer touching any samples other than their own.

- You must protect the samples from the elements and insects. Cover your samples with insect proof netting or plastic wrap (or lids if you use the individual cups).

- You must use disposable single use utensils for distribution of samples to customers- toothpicks, cups, etc. Or you can use tongs, if you control them. Customers should never reach in a plate or bowl of samples.

- You should make available a waste basket lined with a plastic bag for sampling preparation waste and sampling distribution waste disposal. It works best to have two cans – one behind the table for your waste and one out in front for the customers.

- All food shall be stored at least 6 inches off the ground.
HOW TO RECEIVE A KENTUCKY DEPARTMENT OF AGRICULTURE FARMERS’ MARKET SAMPLING CERTIFICATE

There are two categories of samples: those that are cooked or processed, and those that are raw or uncooked products. Depending on the product(s) you offer will determine which sampling certificate you need. Both will require the completion of the KDA Farmers’ Market Sampling Application.

Please see the requirements below for each certificate of sampling:

- Cooked or Processed Samples certificate
  ✔ Completion of the sampling application

- All Samples certificate
  ✔ Completion of the Good Agricultural Practices (GAP) training
    o If the individual requesting the “All Samples” certificate hasn’t completed the Good Agricultural Practices (GAP) training, they may fall under a representative from the same farm entity that has completed the training and holding a current Good Agricultural Practices (GAP) diploma on file with the KDA office.
  ✔ Completion of the sampling application

For information or details on the GAP program or training class, please refer to the 2014-2015 KDA Farmers’ Market manual or contact your local University of Kentucky Cooperative Extension Service. These requirements are without cost and provide the vendor with information on how to offer a safe sample to their customers.

The vendor retains all liability for the safety of the samples. Both the Kentucky Department of Agriculture and the Department for Public Health require vendors to follow the guidance in all instances, but the liability for the safety of the samples remains with the vendor. Markets are advised that they too may accept some added liability if samples are offered. They should provide for policing the offering of samples under the guidance provided and require such additional practices as may be required by the circumstances to meet basic food safety.

Sampling certificates are issued to an individual. Only the person listed on the certificate is able to offer samples. This means that family members, employees or volunteers must have their own sampling certificate. Sampling may only be conducted at the market(s) listed on the certificate. If you move to a new market please contact KDA so your sampling certificate can be updated.
IF YOU WANT TO OFFER SAMPLES OF YOUR HOME-BASED PROCESSED OR MICROPROCESSED GOODS, COMMERCIAL PREPARED PRODUCTS, AND/OR COOKED SAMPLES OF YOUR MEAT, VEGETABLES OR FRUIT:

- Answer the questions from the material in the chapter on the attached application.
- Sign and date the application before returning to our office.
- Return the completed application to the address on the form.
- If you have answered all questions correctly, you will be issued a Cooked or Processed Samples Certificate for offering cooked samples. Again, no sampling of raw products is allowed under this certificate.

IF YOU WANT TO OFFER SAMPLES OF RAW PRODUCTS WITHOUT COOKING THEM

- You must complete the application as described above.
- Then, you must also complete an approved GAP – Good Agricultural Practices Training class. This is due to the added risk of offering samples of raw or uncooked products. Your local UK Extension office can arrange for this class. It only takes 2 or 3 hours and covers the best practices for avoiding contamination of your produce from various food borne pathogens.
- KDA maintains all the records for the GAP education classes. When we have received verification you have completed the required GAP training class, the completed, correctly answered sampling application, you will be issued an All Samples Certificate.

For information or questions, please contact Sharon Spencer with the Department of Agriculture. Sharon can be reached at 502-564-4983 or by email sharon.spencer@ky.gov.

Please mail completed sampling applications to:

KENTUCKY DEPARTMENT OF AGRICULTURE
FARMERS’ MARKET SAMPLING APPLICATION

DATE: ____________________ COUNTY: ____________________

NAME: ____________________

BUSINESS OR FARM NAME: ____________________

ADDRESS: ____________________

CITY: ____________________ STATE: ____________________ ZIP CODE: ________

E-MAIL: ____________________

HOME PHONE NUMBER: ____________________ CELL PHONE: ________

Please check which sampling certificate you are requesting.

☐ Cooked and/or Processed Products – no additional training required
☐ Raw and/or Uncooked Products – GAP training required – see below

Have you received your GAP Diploma? ☐ Yes ☐ No
Name on GAP Diploma: ____________________
Completion Date for GAP training: ____________________

Good Agriculture Practices (GAP) training is required before a Raw or Uncooked Sampling Certificate can be issued. If you have not been GAP trained and work as an employee or family member of a business or farming operation you may operate under another member’s GAP diploma within that business or farming operation. Please submit their name and date of class below.

Please answer all questions below.

1. Name the two types of Sampling Permits.
   a. ____________________
   b. ____________________

2. What are the six essentials for safe, quality samples?
   a. ____________________
   b. ____________________
   c. ____________________
   d. ____________________
   e. ____________________
   f. ____________________
3. All water used to wash utensils or washing raw produce must be of what quality? _____________

4. Name two things that should prompt you to wash your hands.
   a. ________________
   b. ________________

5. List the six parts of a proper hand washing station. Write in shaded labels.

6. How long should you soak utensils in a sanitizing solution after you wash in detergent and rinse in clean potable water? ________________

7. What temperature should cold foods be stored for sampling? ________________

8. What temperature should warm foods be stored for sampling? ________________

9. Please list the product(s) that you will be offering samples to your customers.
   a. ________________
   b. ________________
   c. ________________
   d. ________________
   e. ________________
10. From the products listed in question 9. Please tell how you will handle your samples so customers do not touch any sample other than the one they will consume?

________________________________________________________________________

________________________________________________________________________

11. How will you protect your samples from the elements and insects?

________________________________________________________________________

________________________________________________________________________

12. Food must be stored at least six inches off the ground? □ True □ False

Please read, check all lines and sign the following statement.

□ I have read and understand the appropriate chapters in the 2014-2015 Kentucky Department of Agriculture Farmers’ Market Manual.

□ I understand that I am responsible for following all accepted food handling practices.

□ I understand that my sampling at any time is subject to inspection by the Department for Public Health.

□ I understand that my sampling certificate must be posted at my booth when offering samples.

□ I understand that I may offer samples only at the locations listed below, if approved by KDA.

Print Full Name: ____________________________________________________________

Signature: ____________________________________________________________ Date: ________________________

Please list all Farmers’ Market(s) that you will be participating with for the 2014 and 2015 market season. We need the full name of the market(s) and location(s). Remember, KDA can only issue a sampling certificate for the following locations: KDA Registered Farmers’ Markets, Certified Roadside Market with Kentucky Farm Bureau or the individual’s on-farm market.

________________________________________________________________________

________________________________________________________________________

Please remember you are only allowed to offer samples at the approved locations listed on your Sampling Certificate issued by KDA. All members of your farming or business operation are required to have a sampling certificate issued in their name if they will be offering samples at your booth. Should you change or add a market during the season, please contact KDA so your certificate can be updated.

Please mail the completed application to: Kentucky Department of Agriculture
