

CONDUCTIVITY READINGS

STANDARDS CHART FOR 20-10-20
ppm TDS (DiST 1 meters)

1. TAKE WATER SOURCE READING (PLAIN WATER)
 2. TAKE FERTILIZED WATER READING
 3. SUBTRACT WATER SOURCE FROM FERTILIZED
- EXAMPLE: IF PLAIN WATER = 400 & FERTILIZED WATER = 1041, $1041 - 400 = 641$, PPM N = 150
