

Top Turfgrass Varieties

UK's Spindletop Research Farm

A. J. Powell, Jr., Extension Turfgrass Specialist

Entries in each of the studies in the National Turfgrass Evaluation Program (NTEP) are evaluated once monthly during the growing season for overall turf quality. In addition, varieties are rated for disease resistance, winter hardiness, drought tolerance and other factors which would influence turf quality. From these ratings, several varieties from current and recently discontinued studies have been chosen as top performers at this location and are listed below. Specific data on all current NTEP tests can be found by viewing the [NTEP](http://www.ntep.org) web page at <http://www.ntep.org>. Cultivars are listed with highest performers at the top left, but the listed cultivars are all good performers and may not be statistically different from the others listed. Also, the newest NTEP tests may not include all of the top performers that are currently available.

Tall Fescue*

Best Varieties in Kentucky's NTEP trial. Data collected for 5 years.
(Newest varieties are only now appearing on the market)

Inferno	Avenger	Coyote II	2nd Millennium
Padre	Greenkeeper WAF	Solara	Biltmore
Justice	Titanium	Fidelity	Focus
Falcon IV	Dynamic	Rebel Execda	Corgi
Rebel IV	Raptor	DaVinci	

Best Varieties from Previous Tests
(Most are currently available in some markets)

Rembrandt	Kickoff	Scorpio	Chapel Hill
Masterpiece	Durana	Coyote	Gazelle
Millenium	Barrington	Watchdog	Tarheel
Plantation	Jaguar 3	Arid 3	Dominion
Barrera	Tracer	Shenandoah II	Rebel Sentry

* Most tall fescues are sold in 3- or 4-way blends. A quality blend should have two or more of these proven cultivars, and should NOT be mixed with other species such as perennial ryegrass and fine fescue.

Kentucky Bluegrass

**Best Varieties in Kentucky's NTEP trial. Data Collected for 3 years.
(Newest varieties are most difficult to find)**

Emblem	Blue Note	Barrister	Shiraz
