- * To graduate you need to meet the following standards:
 - a) 128 credit hours with a 2.0 cumulative GPA or better
 - b) 48 hours of total credit hours must be from courses that are 300 level or above

ADVISEE (YOUR) RESPONSIBILITIES:

The advisee is an equal partner in the advising process. It is your education and your choices to be made. Advisees have the following responsibilities in the advising process:

1. Clarify your personal values, abilities, interests, and goals as related to a major, a career, and your education.
2. Contact and make an appointment with your advisor when required or when in need of assistance. You must see your advisor before registering for classes in order to have your hold lifted in N-6, but you are encouraged to make an appointment when making poor grades at mid-term or are dropping a course.
3. Be knowledgeable of requirements for your major as well as general education requirements (see other side)
4. Be prepared for your advising session by having a tentative schedule planned.
5. If taking classes during the summer from another institution, check in N-6 to see if your class credits will transfer.
6. If you cannot keep an appointment with an advisor, please notify them as soon as possible.
7. Accept final responsibility for all decisions made.

**Submit an approved copy of your Plan of Study by February 1 of your junior year to:
Associate Dean's Office, N-6 Ag. Science Center**
