

*When you're feeling inside out and insecure, and life keeps getting you down.
When all life's daily worries hurry through your head.
You don't want to even get up; you just lie around in bed.
When you feel you just can't take it anymore
And you wonder what on earth it is all for - your love life's like a war zone -
your TVs on the blink - its enough to drive a drinking man to stop and take a Think.*

Just remember that you standing on a planet that's evolving, revolving at 900
Miles an hour. It's orbiting at 19 miles a second, so its reckoned,
A sun that is the source of all our power.
The sun and you and me and all the stars that we can see
are moving at a million miles a day.
In an outer spiral orb, at 40,000 miles an hour, of the galaxy we call the Milky Way.

Our galaxy itself contains a hundred billion stars.
Its a 100,000 light years side to side.
It bulges in the middle 16,000 light years thick, but out by us its just 3,000 light years
wide.
Were 30,000 light years from galactic central point.
We go round every 200,000,000 years.
And our galaxy is only one of millions of billions in this amazing and expanding
universe.

Our universe itself keeps on expanding and expanding in all of the directions it can whiz.
As fast as it can go, the speed of light you know, 12,000,000 miles a minute,
And that's the fastest speed there is!
So, remember when you're feeling very small and insecure, how amazingly unlikely is
your birth.
And pray that there's intelligent life somewhere up in space,
cause I'm afraid that we've been cheated here on earth.
