

## FOR 100 Worksheet: Chapter 18 – Fire!

Circle T if the statement is true. Circle F if the statement is false.

1. T F Fire is a forest management tool that was used in North America prior to the arrival of European settlers.
2. T F Forest fires occurred in North America before humans arrived on this continent.
3. T F An area with frequent forest fires would tend to be dominated by early successional forest cover types.
4. T F Most forest fires in the U.S. are caused by campfires.
5. T F Forest fire behavior depends on fuel conditions, weather conditions, and topography.
6. T F If a fire is burning fuels below the forest floor, that fire would be classified as a ground fire.
7. T F Aerial attacks on a forest fire, using water bombers and/or helicopters, are usually **NOT** intended to extinguish the fire completely.
8. T F Like forestry personnel fighting wildfires, personnel dealing with prescribed fires must be aware of and responsive to factors that affect fire behavior.

**MULTIPLE CHOICE: Circle the ONE best response:**

9. Which of the following are removed by construction of a fire line when attacking a forest fire **indirectly**?
  - A. Heat
  - B. Oxygen
  - C. Fuel
  - D. All of the above
  - E. None of the above
10. Prescribed fires are used for
  - A. Reduction of wildfire hazard
  - B. Seedbed preparation
  - C. Wildlife habitat improvement
  - D. All of the above
  - E. None of the above
