

Instruction symbols and basic folds

Valley fold

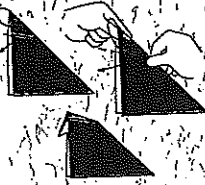

Valley fold line (when folded, the paper sides make a "valley")

Mountain fold

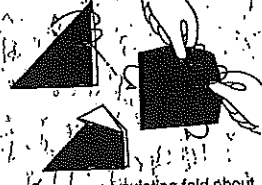

Mountain fold line (when folded, the paper sides make a "mountain range")

Inside reverse fold

Push open the tip, then fold down and in, leaving the tip exposed.

Outside reverse fold

Open up an existing fold about halfway, then swing part over and crease.

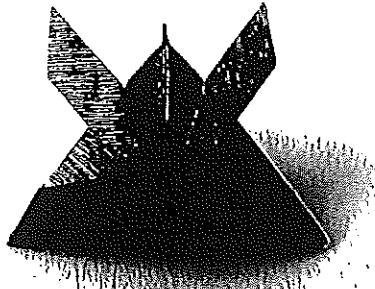

Turn over

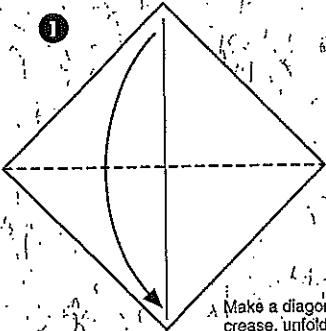

Next diagram shows the model enlarged.

Samurai helmet

Level of difficulty: ☆ (Beginner)

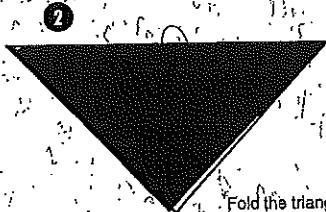

If you use a sheet of paper as big as newspaper to make the helmet, you can wear it and pretend to be a samurai.

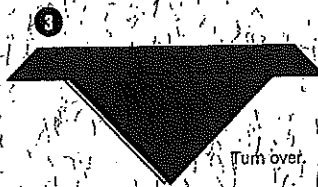

1

Make a diagonal crease, unfold, then fold to make a triangle the other way.

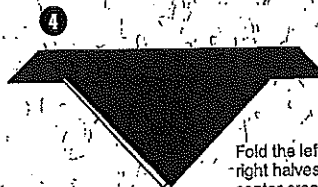

2

Fold the triangle base over and down a little.

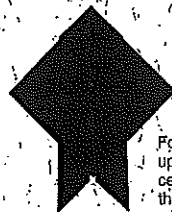

3

Turn over.

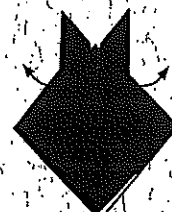

4

Fold the left and right halves to the center crease.

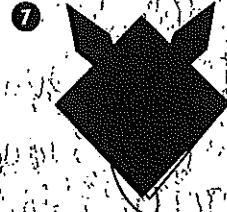

5

Fold the two flaps up to the horizontal center, aligning their outer sides with the upper sides of the model.

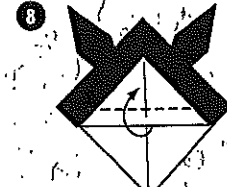

6

Fold the two points away from the center.

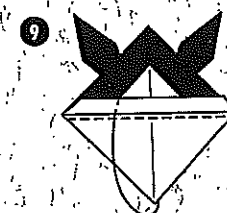

7

Take the triangle that points down (upper piece of paper), and fold it up, making the fold below the horizontal center.

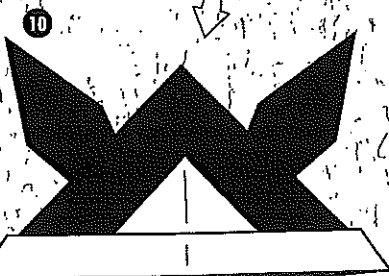

8

Fold up the base of the triangle made in Step 7, folding at the horizontal center.

9

Take the remaining triangle that points down, fold up to the horizontal center, then shove it inside the helmet.

10

Your finished helmet.
