

## **Degree Audit (APEX)**

**Academic Program Evaluation and Exploration (APEX)** is a web-based degree audit reporting system designed to compare a student's course work, at any point in the academic career, with academic program requirements. Students and advisors can produce degree audits to determine progress toward completion of current academic program requirements. The system also provides the flexibility for students and advisors to run "what if" audits to explore potential programs.

APEX captures Campus Management information from two primary areas: Academic Work Overview and Equivalency Determination. Data from one or both of these areas is used to create a degree audit.

All admitted and currently enrolled students can access APEX with an Active Directory User ID and password.

College personnel can visit the [APEX web site](#) to learn about account creation and review detailed information on UK's degree audit system.

### **QUESTIONS?**

Advisors and others who have questions about APEX should contact:

[Mike Shanks](#), Director of APEX/Assistant Registrar, 257-6306
