

Data Warehouse Environment (DWE) Security

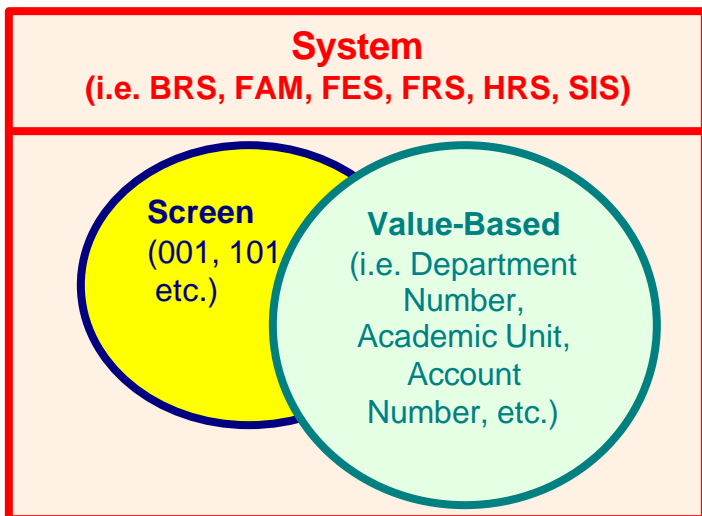

Recommendations

Security within the DWE for BRS and FAM should be at the system level. A user will either have access to all of the data in BRS and/or FAM, or none.

Security within the DWE for the following systems should be based on the value-based security in IDMS defined on the mainframe under the follow conditions:

- FES - department number.
- FRS - department number.
- HRS - department number.
- SIS – academic unit (Dentistry, Law, LCC, Medicine and all others.)
