

Earthquake Disaster Mitigation in China

The UK Confucius Institute Distinguished Speaker Series presents

Lanmin Wang, director and professor of the Key Lab of Loess Earthquake Engineering, China Earthquake Administration

Wednesday, Oct. 18, 6:30 p.m.
W. T. Young Library, UK Campus

China has experienced disastrous modern earthquakes, including the 2008 8.0-magnitude Wenchuan event, and 2017 Jiuzhaigou 7.0 earthquake

Lanmin Wang, whose research interests include public policies on earthquake disaster mitigation, will focus on several topics:

- **Preparing for and recovering from major earthquakes in China**
 - **Seismic safety for homes in the Chinese countryside**

Wang has a Ph.D. in geotechnical engineering, and has written 4 books and more than 100 papers. He was named a “National Outstanding Scientist in Earthquake Science and Technology” in 2007 and 2017.

Sponsored by:

Confucius Institute

Kentucky Geological Survey

**Dept. of Earth and Environmental
Sciences**

Free parking in the Rose Street garage, accessible from Hilltop Avenue, and in the Columbia Avenue lots next to the library. (Circled on map)
