ELEMENTARY INTERVENTION STRATEGIES FOR CLOSING THE GAP!

This two-day training is a way to engage students in grades 2-4 who are struggling with foundational math skills by utilizing models and games as a different way to approach these foundational concepts.

TARGET AUDIENCE:

◊ Instructional Assistants
◊ Special Ed Teachers
◊ Interested Community Members (e.g., School Volunteers, tutors, parents …)

PLEASE NOTE: The ideal situation would be if each participating school would send all of their instructional assistants, special ed teachers and a lead math teacher who would then be able to provide a support system for the aides as they begin to work with the students.

DAY 1: Strategies for Addition and Subtraction

DAY 2: Strategies for Multiplication and Division

OUTCOME: Participants will leave with strategies and materials (listed below) necessary to assist students in grades 2-4 with developing the foundational knowledge and problem solving strategies to be successful in dealing with addition, subtraction, multiplication and division.

DATE: Monday, July 23, 2007 and Tuesday, July 24, 2007

LOCATION: North Laurel High School in London, KY

FACILITATOR: Terry Parkey
