Understanding PoS & CC4.1:

- Impacts student success because they are able to make connections
- Leads to purposeful curriculum and intentional instruction

PIMSER is offering training sessions for science teachers and resource teachers/collaborators for K-12 on the PoS/CC4.1. Two sessions are available. Session 2 may be selected without Session 1. The training will be provided at your school or district.

Session One will explore the question “Why use Big Ideas?” Research will be used to explain the importance of these Big Ideas. The developmental history and design of the Program of Studies will be discussed to validate its use along with implications for curriculum. Also, the purpose for Core Content and the design of the revised Core Content 4.1 will be explored.

Session Two will be tailored to meet a district’s needs and participation. If opting for session two only, the purpose for Core Content and the design of the revised Core Content 4.1 will be explored. A Depth of Knowledge explanation along with examples will be presented. The question “How can learning gaps be prevented?” will be addressed. Lastly, teachers will review and write assessment items with the end in mind.

Cost

Session 1: $400 + travel  3hrs
Session 2: $400 + travel  3hrs
Sessions 1 & 2: $600 + travel  6hrs
