# Residency

Contact: Suzanne McGurk

A student's residency classification determines which tuition rate he or she will be assessed. Admissions officers make the initial determination of residency status. Students may apply for a change in residency status. The codes indicate whether the residency status is based on the initial determination by the admissions officer or after receipt of an application for change in residency status from the student. Most SIS users have only view access to residency fields. There are three screens that have residency fields in SIS.

## SCREEN 206 – Application

Field ① indicates the current residency status for the student. The code options follow:

NL	: Non-resident LCC Student	ND	: Non-resident Decision
NM	: Non-resident	RC	: Resident - Common Market
RD	: Resident - Residency Decision	RI	: Resident – Internat’l Exch. Student
RL	: Resident - LCC Student	RM	: Resident
RP	: Resident – Reciprocity	RX	: Residency - Unofficial for CEU and CC

## SCREEN 016 – Student AU Attributes

Screen 016 tracks residency. This screen is used for internal residency audits for re-applicants and for students who change degree levels. This screen can vary with the academic unit. The codes used in the “Residency” field, ❶, are the same ones used for other screens.

```

```

## SCREEN 111 – Student Term Attributes

This screen is term specific and academic unit specific. In addition to other academic information, 111 reflects the residency status for a particular term. The codes are consistent with the ones listed earlier. The residency code on screen 206 populates the Term Residency field on screen 111, ❸, when a student registers for courses.

```
