Members, Board of Trustees:

**CAPITAL CONSTRUCTION REPORT**

**Recommendation:** that the capital construction report for the three months ending March 31, 2009 be accepted. This report refers only to projects that had activity within this quarter.

**Background:** Under House Bill 622 enacted in the 1982 session of the Kentucky General Assembly, the university is authorized to enter into architectural, engineering, and related consultant contracts for the purpose of accomplishing capital construction at the University of Kentucky.

**For the period January 1, 2009 thru March 31, 2009:**

**There were two new contracts this quarter.**

- Project 2297.1  Digital Village Building 2  
  JRA Architects, $1,409,934 (Design)
- Project 2299.1  Convert Hunt Morgan Space to Class Lab  
  Denham Blythe Inc., $1,679,638 (Construction)

**One contract was completed:**

- Project 2268.0  Expand Chemistry Physics Building  
  Denham Blythe Co., $3,288,160

**One amendment as follows:**

- Project 2235.0  Construct Biological Pharmaceutical Complex Building  
  - Additional design services required to provide for the fit-up of the fourth and fifth floors (+) $344,270

**Seventeen change orders greater than $25,000 were as follows:**

- Project 2235.0  Construct Biological Pharmaceutical Complex Building  
  - Provide steel columns needed to accommodate the elevator structural needs (+) $136,956  
  - Provide for removal and replacement of unsuitable soil at the site for the generator building expansion (+) $34,234  
  - Revise tile and carpeting to maintain design consistency and provide higher durability in high traffic areas (+) $65,826
- Provide cherry wood panels in lieu of metal panels at the sides of the media wall to provide a more uniform appearance and resolve difficult detail coordination (+) $32,071
- Provide for extension of gypsum board, on one or both sides of metal studs, to the deck above (+) $45,307

Project 2239.0 Construct Patient Care Facility
- Provide for additional cost required to bore under the existing gas line for the new 24” sanitary main (+) $39,957
- Provide for the removal of unsuitable soils and for the addition of backfill and compact to match existing slope (+) $51,550
- Provide for revision of the medium voltage cable spec to meet the UK standard (+) $27,389
- Provide for additional doors to the freight elevators allowing access to these elevators from the exterior (+) $25,547
- Provide for an increase to install 60 linear feet of 18” reinforced concrete pipe from the existing storm manhole to the new manhole (+) $29,111
- Provide for the upsizing and rerouting of the steam generators (+) $71,714
- Provide for miscellaneous electrical revisions to Bid Pack 5 electrical systems to include new distribution panel and critical bus duct plugs (+) $75,511
- Provide for an increase to booster pump capacity (+) $74,499
- Provide for installation of piping for dialysis systems on the fifth floor (+) $38,126
- Provide for the utilization of Densarmor exterior sheeting for the electric and data closets. This will allow for the installation of the materials prior to the roofing of the structure (+) $101,006

Project 2239.32 PCF – Hospital – CUP Expansion
- Provide for revisions to the civil site plan to provide greater security and improve the utilization of the grounds north of the new construction (+) $26,661

Project 2298.1 Expand/Renovate Outpatient Clinic in Kentucky Clinic
- Replace the existing (2) runs of double wall ductwork with new high velocity single wall ductwork (+) $27,734

Action taken:  ☑ Approved  ☐ Disapproved  ☐ Other __________________________
CAPITAL CONSTRUCTION CONTRACTS
QUARTERLY ACTIVITY REPORT

This report contains capital projects that have a dollar scope value of $600,000 and above. The projects are listed in alphabetical order and contain the project number, the dollar scope, a brief description of the project work and information pertaining to the primary consultant's contract and the primary contractor's contract. This information includes:

**Consultant:** This section contains the name of the consultant, the contract number, the original contract amount, the total number of amendments, the cumulative amendment amount, the revised contract amount, and a notes section. The notes section will describe, in bold face type, all amendments to the consultant's contract for the current quarter.

**Contractor:** This section contains the name of the contractor, the contract number, the original construction contract amount, the total number of change orders, the cumulative change order amount, the revised contract amount, information on the low, high and number of bids, the percent of the contract completed, and a section for notes. The notes section will describe, in bold face type, all change orders greater than $25,000 for the current quarter.
CAPITAL CONSTRUCTION QUARTERLY ACTIVITY REPORT

Glossary

Amendment: refers to modifications or changes to the Consultant’s contract with the University, usually the result of changes in the program or scope of a project caused by unforeseen conditions or at the request of the University.

Change Order: refers to modifications or changes to the Contractor’s contract with the University, usually the result of conditions not anticipated by the contract documents, plans and/or specifications for the work.

Consultant: the entity, usually an architectural or engineering firm, with whom the University contracts and who has primary responsibility for providing services to design and to administer the contract for construction of a construction project. The prime consultant frequently employs the services of one or more sub-consultants in fulfilling its contractual obligation.

Contract administration: refers to the activities of the consultant during the construction phase of the project in which they verify that construction is in compliance with the requirements of the contract between the University and the contractor.

General Contractor: the entity, usually a general contractor but occasionally a trade contractor, with whom the University contracts and who has primary responsibility for completion the construction of a project. This “prime” contractor usually employs the services of various subcontractors (trade contractors) and vendors in fulfilling its contractual obligations.

Feasibility Study: refers to investigation, usually commissioned through an outside consultant, to advise the University of the merits of an anticipated construction project, and to evaluate and comment on matters such as need, probably cost, preliminary program issues, and so forth.

Gross square feet: the total area of the project, generally measured from the outside of exterior walls for all floors of the project, including mechanical spaces.

H.B.C.: refers to the Commonwealth of Kentucky Department of Housing, Buildings and Construction, the state agency having responsibility for review and approval of University construction projects to assure compliance with applicable building codes.

Penthouse: refers generally to the enclosure around roof mounted mechanical spaces in a project. Not considered occupied (or net assignable) space.

Percent complete: as used in the report refers to the expenditure to date divided by the total amount of the construction contract for the work.
Net assignable square feet: the usable area of the project excluding corridors, rest rooms, storage areas, mechanical spaces, etc.

Phase: The various stages of design and construction of a capital project, including:
- Programming phase: refers to the initial planning phase of a project, during which the University (with or without participation by a consultant) defines in detail the needs and requirements of a project. This program becomes the basis for consultant selection, fee negotiation, and design of the project.
- Schematic design (S/D or Phase 1): refers to the first formal phase of design by the consultant, in which a general design solution to project programmatic requirements is developed.
- Design development (D/D or Phase 2): refers to the second formal phase of design by the consultant, during which the schematic design is expanded to identify solutions to design issues in broad terms, sufficient to insure the stated programmatic needs can be met.
- Construction document phase (C/D or Phase 3): refers to the final phase of the design process in which the details and specific project requirements are identified and incorporated in a final set of biddable construction documents.
- Bidding phase: refers to the stage of a project during which proposals for construction are solicited, culminating in the award of one or more contracts for construction.
- Construction phase (or Phase 5): refers to the actual construction of the project by contractors.

Scope: The total estimated value of a capital project on completion, including all design, construction and administrative costs as well as the cost of capitalized furnishings and equipment.

Substantial Completion: refers to the time during construction, certified by the consultant, when the work is sufficiently complete for the University to occupy the facility for its intended use without significant interruption. Upon certification of substantial completion, the University assumes operational and maintenance responsibility and insurance liability for the project and the warranty period begins for most elements of the construction. Some work generally remains, including correction of minor punchlist items, before the work is certified finally complete.

Trade Contractor: Sub-contractors, or individual bid package contractors, who practice a specific, trade (electrical, painting, structural steel, for example)
Construct Biological Pharmaceutical Complex Building

Project Description:
Phase I of the Biological Sciences/Pharmaceutical Complex, was authorized by the 2005 General Assembly and funded in 2006 at $40,000,000. Phase II was funded at $92,792,000 and together these phases will complete the 279,000 gross square foot facility that includes some “shell space” to allow for the growing research needs. This “shell space” will be fitted out for research laboratories at a later date as university funds and/or grant dollars become available. This new building will provide the college with a state-of-the-art facility that will also allow the college to expand enrollment to address the shortage of pharmacists in Kentucky. The College of Pharmacy will relocate to this new facility and vacate their existing space. In addition to the current Pharmacy Building, college faculty members are housed in 16 buildings on and off campus. Consolidation of the research and teaching expertise of the eight ranked College of Pharmacy in the U.S. will further strengthen the instruction of students and research collaboration among faculty. The vacated Pharmacy Building will be reassigned to the Department of Biology to provide needed expansion space for classrooms, research, and faculty to meet the needs of the growing student enrollment in UK’s largest department. The project is expected to be complete by December 2009.

Project Status:
Construction Manager continues to address building weather tightness. Installation of mechanical systems continues in the Penthouse and Vivarium. Installation of window frames and glass continues this month. Placing of the mechanical/electrical work continues on all floors. Painting has begun on the third floor. Rough-in work continues on the first and second floors. Work continues this month on the brick façade on the South Elevation. Limestone panels continue on the East and West Elevations. The project is on schedule to complete December 1, 2009 for first, second, and third floors. The basement Vivarium will complete mid February, 2010.

Construct Patient Care Facility

Project Description:
The Hospital’s present patient bed tower is over 40 years old. Although the space served patients well, the infrastructure is aging, and the facility can not accommodate rapidly developing technology. This project is providing the site location evaluation, building programming, planning, and design services for a new bed tower. The project design team is lead by GBBN with major sub consultants including AM Kinney, Ellerbe-Becket, Staggs and Fisher, Affiliated Engineers, THP Limited as well as a number of specialty consultants. This project will construct a new hospital addition to include patient beds, patient diagnostic and treatment areas, support areas, support facilities, medical equipment and infrastructure. The project also includes the replacement of the hospital parking garage and a connecting bridge to clear the site for the new hospital addition as well as land acquisition and utility relocation costs. The progress of all the components is listed below.

PCF – Building (BP #8 3B, 4, 5 & 6):

Project Description:
This project includes:
- (BP #3B) Early Site Work
- (BP #4) The demolition of the existing Parking Structure # 4. The work will involve the start of all deep foundations up to the grade of the excavation.
- (BP #5) The construction of the new 1,022,000 gross square feet building’s structural frame, fireproofing, exterior wall enclosure for all new building spaces, windows, exterior doors and roofs. Also included will be all exterior site improvements, civil design for roadways, drainage systems, landscaping, hardscape surfaces and walks.
- (BP #6) The interior fit-out partitions, interior finishes, doors and frames, ceilings, mechanical systems, electrical systems, technology systems, medical equipment and fire protection for approximately 490,000 occupiable square feet; and 532,000 square feet of shell space. The work also will include drawings and specifications for signage, interior furnishings and lighting.

Project Status:
- Mass Excavation, Early Site Work and Foundations (BP #3B & 4)
The contractor will continue to complete punch list thru May. The Mass Excavation and Foundations Package will achieve Substantial Completion during May.
- Core and Shell (BP #5)

The contractors will continue the shop drawing and BIM processes during May. On site work during April included installation of piping in the basement, installation of the podium concrete for levels four and five including associated steel, columns and elevated slabs to include placement of sleeves. During May major on site activities will include installation of mechanical piping and equipment, including air handlers and heat exchangers on the ground floor; installation of electrical equipment including, primary conduit and wiring, bus ducts and temporary lighting on the lower three levels of the structure; and installation of the podium concrete for level five including associated steel and slabs to include placement of sleeves on this level. In addition, off site production of duct work and exterior skin to include precast sections and window wall assemblies are continuing on schedule. The mock-up of the exterior structure of the building was successfully tested for water tightness in late April.

- Fit up (BP #6)

During the month of April, rebids were received for architectural woodworking, wall protection, casework, glass and glazing, painting and wall coverings. The newly received bids were within budget. Post bid interviews will be taking place within two weeks. Assuming the results of the interviews are satisfactory, contracts will be set into place during May. The majority of the contractors for this work are now under contract. These mechanical contractors, electrical contractors, sprinkler contractor and the pneumatic tube contractor will continue the shop drawing process and BIM processes during the month of May. On site work for this package during May will include laying masonry walls in the basement and on the ground floor, firestopping in all areas, layout and installation of metal studs in the basement and on the ground floor, installation of plumbing and fire protecting piping in the basement and on the ground floor, installation of ductwork on the lower three levels, and electrical rough in on the lower two levels.

**Convert Hunt Morgan Space to Class Lab**

**Project Description:**

This project will convert approximately 6,000 Net Square Feet of space on the ground floor of the Thomas Hunt Morgan Building into class lab teaching space. The project will include wet bench casework, flooring, ceilings, lighting, and Smart Classroom technology. The work will also include modifications to the plumbing, electrical and HVAC systems. Approximately 1800 Net Square Feet of space on the second floor will be renovated for two research faculty. There will be two research laboratories, each at 765 square feet and each with a 135 square foot office.

**Project Status:**

Densham-Blythe was awarded the construction contract in March. The excavation work has uncovered many hidden conditions, i.e. electrical main feeds, UK Communications ductbank, sanitary waste lines, etc., which has led to delays in completing the excavation and running new water and drain lines. Framing for new walls in the basement is approximately 75% complete, with 100% completion on the second floor. Pipe hangers are in place on both floors, with pipe installation approximately 20% complete. The contractor will be completing the installation of the pipe hangers, and will continue installing new pipe above ceilings.

**Digital Village Building 2**

**Project Description:**

This project consists of the design and construction of approximately 43,000 gross square feet of research space for the Center for Visualization and Virtual Environments as well as selected research activities in the Department of Computer Science and the Department of Electrical and Computer Engineering. The facility must be sufficiently flexible in design so that it can be easily adapted to support research into emerging areas of interest. The structure should provide flexible office space and support facilities. This project will pursue LEED Certification.

**Project Status:**

JRA Architects, along with RATIO Architects are the architectural designers for the project. Design meetings have been held on a regular basis with the future building occupants, along with other campus departments to clearly define and coordinate design goals and requirements. Stantec has provided site survey and geotechnical services. Congleton-Hacker has been contracted to provide Construction Administration services. Facility Commissioning Group has been selected to provide commissioning services. Phase 2, Design Development documents were submitted in April and review meetings were held. The project is currently on schedule and within budget.
Expand Ophthalmology Clinic - Hospital

Project Description:
This project consists of renovating approximately 12,500 square feet of space on the third floor of the Kentucky Clinic, some of which is currently occupied by Neurosurgery, in order to expand the existing Ophthalmology Clinic (also located on the third floor of the Kentucky Clinic) into the vacated space. It also includes refurbishing the existing Ophthalmology Clinic space. This project will necessitate phased construction activities to include expansion into the additional space as well as a full refurbishment of the existing Ophthalmology Clinic.

Project Status:
JRA Architects will provide architectural design services for this project. The design of this project will lag behind the project to renovate the outpatient clinic space in Kentucky Clinic (KNI). The Neurosurgery Department will move to the first floor after the renovation work is complete and will allow the space they currently occupy on the third floor to be renovated for Ophthalmology. The project continues to be on hold by the hospital; however, internal meetings for operational planning will be scheduled by the hospital Office of Facilities & Planning when the project is started back up. Design meetings will follow the internal operational meetings.

Expand & Upgrade Livestock Disease Diagnostic Lab

Project Description:
New space is needed for more than one veterinary pathologist to perform animal postmortem examinations in addition to renovation of current necropsy space. New space is also needed to add molecular biology/special procedures capabilities to the laboratory. New technology in the form of an alkaline hydrolysis digester is needed to replace an aging incinerator. The LDDC is an office and laboratory building with net assignable space of 3,860 square feet for offices and 28,100 square feet of laboratories and support space. It is proposed to add 6,300 and 1,200 square feet (net) of new laboratory and office space, respectively. An existing necropsy laboratory and support space will be renovated (2,000 square feet net). An aging incinerator is the present means of carcass disposal. An alkaline hydrolysis digester will be installed for carcass disposal after renovating 2,000 square feet (net) of space to contain the digester.

Project Status:
All but one Trade Package of Bid Package # 3 was awarded this month. Bid opening is scheduled for later this month for the re-bid of the High Performance coatings. Work on Bid Package # 2 regarding relocating existing site utilities continues this month. Permitting for Land Application is complete. The Title V Air permitting is complete. The 10,000# tissue digester is complete and ownership has been transferred to the University. The digester has been insured by the University and remains stored at the manufacturer.

Expand/Renovate Outpatient Clinic in Kentucky Clinic

Project Description:
This project consists of renovating approximately 13,300 square feet of existing space on the first floor of the Kentucky Clinic, which is to be vacated by the University Health Services (Student Health Facility) to create a new outpatient clinic for the Kentucky Neuroscience Institute (Neurology, Neurosurgery and Physical Medicine & Rehabilitation clinical services). This project includes renovation of part of the space and refurbishment of all of the space. After completion of the construction work associated with this renovation, KNI departments will move into this space.

Project Status:
Messer Construction is performing the renovation work. Gypsum board work has been completed and painting is nearing completion. Tile work has been completed in the toilet rooms. An above ceiling punch inspection was held on 4/16/09. Ceiling tiles have since been installed. HVAC, electrical, plumbing and communications infrastructure work is being finalized. Flooring is being laid. The contractor is projecting that the work (substantial completion) will be completed in mid-May. This is earlier than the official contract substantial completion date.

Renovate Central Vivarium

Project Description:
The project will involve the purchase of a new Primate Cage Wash unit to be installed in a renovated cage wash area within the existing DLAR facility.

Project Status:
Project is complete.
Renovate Koinonia House (aka Schmidt Vocal Art Center)

*Project Description:*
The project continues the renovation of the Vocal Arts Center, which houses the UK Opera Program. The facility was acquired by the University in 1991. At that time, some of the first floor was renovated, but the second floor of the building remained shelled space. The current project includes upgrades to the electrical and mechanical systems, installation of a sprinkler system, a new stairwell, and an elevator. The project also begins fitting out the second floor to address needs created by the recent growth of the Opera Program. The second floor will eventually include rehearsal rooms, teaching studios, classrooms, practice rooms, a dance studio, and office space for staff and graduate assistants.

*Project Status:*
The bid documents were delivered in March. The project is currently in the bidding phase.

Renovate Wildcat Lodge

*Project Description:*
Wildcat Lodge is an approximately 16,000 sf. facility used for student housing on the campus of the University of Kentucky. Its residents are primarily from the University's basketball team, thus the focus of the design is on displaying the rich history of UK basketball while providing a safe, up-to-date home for the students. In addition, there are some historically significant aspects to the building that will be maintained and highlighted. This renovation will consist of replacing flooring, wall materials, lighting, handrails and door hardware throughout the facility.

*Project Status:*
Construction was scheduled to begin on May 11, immediately following graduation however, the Athletic Association has recently begun reconsideration of pursuing this project and to what extent.

Replace Emergency Generators & Fire Pump - UK Good Samaritan Hospital

*Project Description:*
The scope of this project will consist of the replacement or upgrades of the following equipment at the Good Samaritan Hospital: emergency generator, transfer switches, air handling unit #25, constant pressure water pumps, deaerator tank, and a fire pump.

*Project Status:*
The Phase III Construction Documents were submitted in April and review meetings were held. Following review and receipt of Title V Permitting, the bid documents will be submitted to Purchasing.

Replace Steam and Condensate Pipe - Farm Road

*Project Description:*
Replace the existing, direct buried steam piping and vaults from the Kentucky Tobacco Research and Development Center to the Gluck Equine Research Center. The new pipe is to be routed south of Farm road and outside the ARS Agriculture Project (FAPRL) leased/construction area. The location of this future ARS connection will be coordinated with that project.

*Project Status:*
The project has been funded and is out for bid.

Upgrade Cancer Center Radiologic Facility

*Project Description:*
The University of Kentucky Hospital needs to significantly upgrade and improve the current clinical space in the Lower Level of University Hospital. This will include therapy rooms, clinic exam areas, infusion space, office, education, and support space for the clinical practice. Given that the clinic will need to continue operations during the project, it is anticipated that areas will be taken down, or phased, during the construction. Surge space to allow the phasing has been identified. The addition will be located along the west side of the Markey Cancer Center/Ben F. Roach Cancer Care Facility, while the renovation will occur in existing research space on the on the Lower Level of the same building. Development of Radiation Medicine clinical areas is essential to growth of cancer programs supportive of the strategic plans for UK HealthCare. Current facilities are split between the Lower Level of the hospital and the Roach Building. Several initial facility studies have been completed that identified expansion and renovation of the areas of the Lower Level of the Roach Building to respond to immediate needs and is consistent with the Ambulatory Master Plan.
**Project Status:**
Lower level is substantially complete, with treatment areas on the lower level scheduled to go clinical in early May. Exterior site work is ongoing and anticipated to be complete in May. First floor areas have all drywall partitions complete, and ceiling grid is being installed. This area will be complete by the end of May.

**ARS - Agriculture Project**
*Project Description:*
The Forage Animal Production Research Laboratory will serve the Forage Animal Production Research Unit for the USDA - ARS on the campus of the University of Kentucky. The mission of the FAPRU is to improve productivity, profitability, competitiveness and environmental sustainability of forage based enterprises within the transition zone of the Eastern and Midwestern United States. Multidisciplinary teams to work to identify, evaluate, and manipulate genetic and physiological factors, using for the enhancement of food animal and equine health and performance in forage based enterprises as well as to improve forage plant persistence, quality, and production. Three to four story building with approximately 65,000 gross square feet of research labs, equipment and support rooms, offices and conferences rooms. The program also includes approximately 12,000 gross square feet for greenhouses and head house.

*Project Status:*
A 100% Construction Documents review meeting is proposed for May 2009. Work on the University contract to build steam/condensate drainage manholes adjacent to existing steam line along Farm Road adjacent to the proposed lease area achieved substantial completion this month. Advertising for the steam line replacement is scheduled for later this month with all construction to be complete by the UK Fall heating season of October 2009. Discussions between ARS and the University have determined that ARS will relocate the existing steam line, and the separate University contract will not include any steam line within the ARS lease boundary. Coordination with the proposed service tunnel extending from the Plant Science Building to Farm Road remains an on-going item.

**Expand Coldstream Research Campus – Redundant Power Supply**
*Project Description:*
The main electrical service to Coldstream Research Campus is currently supplied by Kentucky Utilities through a combination of overhead supply and underground distribution systems. The main 12KV power supply is delivered by an overhead circuit from Kentucky Utilities' IBM station. Several existing and future projects require that Coldstream Research Campus have a redundant electrical power supply available. The immediate redundant power needs are for the first building in the Lexhold Technology Center (under construction), Exstream Software buildings (under construction), the LFUCG Emergency Operations Center (being designed) and the UK Data Center (in design). In order to successfully market the Coldstream Research Campus in the future, separate and redundant power feeds will be essential.

*Project Status:*
Project is currently being designed by Kentucky Utilities for commencement in Spring of 2009. Bonds were sold by the state in late February and funding is anticipated soon.
Construct Biological Pharmaceutical Complex Building

Project Number: 2235.00
Scope: $132,792,000

Project Description:
Phase I of the Biological Sciences/Pharmaceutical Complex was authorized by the 2005 General Assembly and funded in 2006 at $40,000,000. Phase II was funded at $92,792,000 and together these phases will complete the 279,000 gross square foot facility that includes some "shell space" to allow for the growing research needs. This "shell space" will be fitted out for research laboratories at a later date as university funds and/or grant dollars become available. This new building will provide the college with a state-of-the-art facility that will also allow the college to expand enrollment to address the shortage of pharmacists in Kentucky. The College of Pharmacy will relocate to this new facility and vacate their existing space. In addition to the current Pharmacy Building, college faculty members are housed in 10 buildings on and off campus. Consolidation of the research and teaching expertise of the eighth ranked College of Pharmacy in the U.S. will further strengthen the instruction of students and research collaboration among faculty. The vacated Pharmacy Building is currently scheduled to be reassigned to the Department of Biology to provide needed expansion space for classrooms, research, and faculty to meet the needs of the growing student enrollment in UK's largest department. The project is expected to be complete by December 2009.

Consultant: EOP Architects

Contract #: A061150/A071060
Total Amendments to Date: 3

Describe all amendments:

Amendment #1, 5/8/07, an increase of $220,700, was approved for additional design services to provide an additional research floor as well as a new utility tunnel. This amendment also provides for wind tunnel testing as well as a specialized lighting consultant. Amendment #2, an increase of $282,276, was approved for Structural engineers to redesign the foundation and sub-slab connections due to discovery of unforeseen solution channel to bedrock and to redesign the first floor from a steel frame to a concrete frame. Additionally the amendment was to design a Donor Recognition Program that will address the range of donor opportunities as outlined by the University, as well as a standard program of plaque recognition. Pinpoint Associates are to locate all underground utilities beginning with Parking Structure #2, traveling on Washington Avenue and ending at Limestone Avenue. This amendment also provides for an independent third party consultant to provide for all Special and Material Testing as required by the construction documents and 2007 KBC. Amendment 3, 1/13/09, an increase of $344,270 was approved for additional scope of work necessary to accommodate the fit-up of the fourth and fifth floors as a separate stand alone package. The amendment also provides for additional structural engineering services associated with the addition of an elevator machine room, reinforcement of chilled water pipe structure at the Utility Tunnel and expediting design and construction documents for Bid Package 4. Additional special inspection and testing services are also included as well as civil engineering services associated with the survey, plat and filing as necessary for the permanent closure of Leader Avenue.

Contractor: Messer Construction Co. (Construction Manager At-Risk) Note: This is a "CM-At-Risk" contract.
The amount will be increased as subcontracts are bid and added. *Messer's contract was awarded by RFP process. Contract % complete was calculated using the estimated $107 Million Construction Budget.

Contract #: 4500007696
Total Change Orders to Date: 128

Describe all change orders greater than $25,000.00:
Change Order #1, 9/4/07, was approved for an increase of $46,616 to provide additional excavation and a storm manhole. The design work for subsdrain perimeter drainage was completed after the excavation package was bid. Change Order #4, 10/3/07 and increase of $67,340 was approved to provide a 3 foot wide trench as part of Bid Package 1 instead of being included as scope of work in Bid Package 4. This will provide a possible cost savings due to the efficiency of the excavation contractor being on site. Change Order #10, 2/1/08, was approved for an increase of $29,633 to add compacted crushed stone fill across the basement floor area. The added stone will provide a work base for first floor slab construction scaffolding. Change Order #17, 2/1/08, was approved for an increase of $25,146 to provide depressed slabs at floors 3 and 5 for installation of Cold Rooms. This will allow for recessed floor at the cold room without a curb or ramp. Change Order #18, 5/27/08, was approved for $329,492 to provide additional canopy at the south side of the building. This was added to Bid Pack 3 instead of placed with Bid Pack 4 as originally planned. Keeping the steel with one trade contractor provided economy due to ease of coordination and additional mobilization
costs. **Change Order # 19**, 2/1/08, was approved for an increase of $121,994 to provide changes to the structural steel package due to design modifications in Bid Package 4. **Change Order # 26**, 5/29/08, was approved for $43,189 to provide structural columns at the north side of the penthouse. **Change Order # 29**, 3/31/08, was approved for an increase of $62,605 to provide re-bar revisions at locations of recessed base plates. **Change Order # 40**, 7/25/08, was approved for an increase of $118,200 to modify skin attachments and slab edges to remedy the conflict between existing structural steel and skin attachments. The conflict is due to the fast track nature of the bid packages. Modifications to skin attachments and slab edges are necessary to achieve the design intent. **Change Order # 43**, 8/22/08, was approved for $39,320.71 to increase one (1) penthouse distribution panel from 600A to 800A. This also increases the feeder to this panelboard and feeders to the modular chiller skid and dry cooler. **Change Order # 53**, 9/24/08, was approved for an increase of $36,064 for necessary steel required at the window jambs. As a result of the fast track nature of the bid packages the steel package was bought prior to the design of the window details. **Change Order # 55**, 9/24/08, was approved for an increase of $60,874 to provide revised openings at penthouse roof. This is a result of final coordination of the penthouse roof structure with the actual RTU/curbs provided. **Change Order # 57**, 10/14/08, was approved for an increase of $31,978 to repair the roadway cuts along Washington Avenue where Columbia Gas has installed their new gas line. The work was originally contracted with Columbia Gas but is being moved to the Construction Manager's scope to provide uniform restoration of Washington Avenue asphalt work. **Change Order # 58**, 10/16/08, was approved for an increase of $88,473 to provide for Washington Avenue communications manhole expansion due to concealed conditions regarding existing utilities. **Change Order # 62**, 11/11/08, was approved for an increase of $29,298 to provide for a change in selected wood finish in public spaces to cherry versus beech in lab, support and research spaces. **Change Order # 66**, 10/21/08, was approved for an increase of $27,627 to provide additional coordination between Bid Packs 2, 3 and 4. **Change Order # 74**, 12/11/08, was approved for a decrease of $36,500 to delete creation of the graphics programming on controls. The University will design its own graphic screens. **Change Order # 97**, 3/3/09, was approved for an increase of $136,955.83 to provide steel columns as required for the elevator structure. The contract documents did not adequately address all of the structural elements needed to accommodate the elevators. **Change Order # 103**, 3/4/09, was approved for an increase of $34,234.30 to provide replacement of unsuitable soil at the site for the generator building expansion due to a differing site condition. **Change Order # 106**, 3/4/09, was approved for an increase of $65,825.76 to revise tile and carpeting in order to maintain design consistency with the interior furnishings and finishes. This change also provides for a more durable floor in the higher traffic areas. **Change Order # 107**, 3/3/09, was approved for an increase of $32,071.07 to provide cherry wood panels in lieu of metal panels at the sides of the media wall. The wood panels will provide a more uniform appearance to the proposed media wall in the atrium. **Change Order # 117**, 3/9/09, was approved for an increase of $45,307 to provide for extension of gypsum board, on one or both sides of metal studs, to the deck above.
Project Description:

This project will construct a new hospital addition to include patient beds, patient diagnostic and treatment areas, support areas, support facilities, medical equipment and infrastructure. The project also includes the replacement of the hospital parking garage and a connecting bridge as well as land acquisition and utility costs. (Note: The project design scope at the present time is $532 Million as has been discussed with the BOT.)

Consultant: GBBN, Inc.

Contract # A061080  
Original Contract Amount: $30,400, 226
Total Amendments to Date: 3  
Cumulative Amendment Amount: $5,148,931
Described all Amendments:  
Revised Contract Amount: $35,549,157

Amendment # 1, 9/12/06, was approved for $299,044 for additional design services required to design two additional floors for the parking garage. This amendment also provides for additional survey services associated with the rerouting of the ductbank; the addition of 12 receptor sources to be studied as part of the existing wind study; and the need for additional storm water modeling to review the impact on the new Patient Care Facility during heavy rain storm events. Amendment # 2, 2/13/07, was approved for additional design services associated with increased scope including but not limited to increased renovation of areas in the existing hospital (all phases); development of early bid packages for infrastructure and site utility packages and temporary emergency department access; development of an additional bed wing (all phases); development of partial cafeteria (all phases); design of fitup for two additional floors (shell only - all phases); design of a redundant communications feed (all phases); additional design services associated with security systems; development of design of Phase 1B air handlers (thru DD’s) and additional design of costs associated with relocation and installation of above ground and underground fuel tanks (all phases). Also included is additional reimbursable services for added geotechnical rock investigation; additional site survey and added construction testing. Amendment # 3, 5/13/08, an increase of $868,849 was approved for additional design services to include completion of the PCF Auditorium and construct a mock up in the College of Nursing. It also provides for 3D images and graphic design services for fund raising efforts as well as additional costs associated with preparing early and separate supplemental bid packages. No amendments this quarter.

Contractor: Turner Construction Co.

Note: This is a 'CM-At-Risk' contract. The amount will be increased as sub-contracts are bid and added. *Turner's contract was awarded by RFP process. Contract % was complete was calculated using the estimated $300 Million Construction Budget

Total Change Orders to Date: 214  
Original Contract Amount: $306,215,701
Low Bid:  
Cumulative Change Order Amount: $6,847,297
High Bid:  
Revised Contract Amount: $313,062,998
Number of Bids:  
Contract % complete: 30.00%

Describe all change orders greater than $25,000.00:

Change Order # 1, 6/4/07, was approved for an increase of $91,344 to facilitate the procurement strategy and meet the project timeline. A portion of select infrastructure was transferred from Bid Pack 4A to the earlier Bid Pack 3B. Change Order # 2, 5/31/07, was approved for an increase of $65,296 to relocate the existing direct buried steam lines and pressurized drain found to be in conflict with the new tunnel. Since the lines must be moved they will be relocated into the new tunnel to make the lines accessible for maintenance. Change Order # 3, 7/11/07, was approved for an increase of $58,928 to relocate an existing sanitary sewer manhole and associated lines to sanitary sewer manhole and associated lines to resolve underground utility conflicts. Change Order # 5, 9/6/07, was approved for an increase of $49,439 to replace and relocate deteriorated and inaccessible 2 1/2” and 1 1/2” underground direct buried steam lines that were revealed upon excavation.

Change Order # 9, 10/3/07, was approved for $2,840,457 to convert the TC-01 Sitework (RAM Engineering) Rock Allowance to an unspecified status. Ram will be responsible to remove all the rock associated with their scope of work for BP 3B as well as by the Geotechnical Report. This is due to misinterpretation of site conditions. Actual rock removal quantities are greater than estimated quantities in the contract documents.

Change Order # 10, 10/1/07, was approved for an increase of $55,314 to convert the portion of the six existing sanitary and storm sewer lines that pass through the main tunnel to ductile iron to ensure that these lines don’t rupture. The increase also provided for re-routing the existing water lines to avoid conflict with the new tunnel. Change Order # 11, 10/4/07, was approved for an increase of $47,780 to replace and re-route the existing domestic water line as well as reroute the existing water main. Change Order # 13, 10/9/07, was approved for $40,755 to relocate approximately 150’ storm line and associated manhole due to conflict with teh new Cooling Plant # 3 utility tunnel. Change Order # 21, 11/21/07, was approved for an increase of $53,383 to convert the 7000KVA transformer from aluminum to copper windings, add an air switch to the transformer and add a medium voltage outdoor breaker with remote monitoring and control capability to all five electric substations. These changes were made to increase the efficiency of the system and to meet specifications of upcoming substation upgrades. Change Order # 23, 12/10/07, was approved for a decrease of $48,383 to alter the installation of the cold water and the cold water return piping system to avoid conflict with sensitive boiler equipment. Change Order # 27, 12/5/07, was approved for an increase of $144,844 to provide saw cutting of the pedestrian walkway and walkway roofed instead of traditional hammering. The saw cutting method will reduce noise and vibration impacts to the adjacent Critical Care Facility. Change Order # 32, 1/18/08, was approved for an increase of $33,072 to enlarge the existing emergency generator pads to support installation of new diesel generators due to changes in EPA regulations. Change Order # 34, 2/1/08, was approved for $388,426 to provide additional construction manager's staff and general conditions due to an additional two floors being added to the Patient Care Facility. Change Order # 42, 3/20/08, was approved for an increase of $128,502 to extend the limits of the blasting and excavation of rock in Bid Pack # 4 to accommodate the installation of sanitary line. The rock removal was originally intended for Bid Pack # 5, but will provide cost savings if moved to Bid Pack # 4. Early rock removal will also eliminate blasting after installation of foundation in Bid Pack # 4.
Construct Patient Care Facility Change Orders greater than $25,000 Cont.....

Change Order #43, 3/31/08, was approved for an increase of $229,016 to increase the rock allowance due to greater rock quantities than anticipated. Change Order #58, 4/23/08, a decrease of $60,522 was approved to utilize the existing ductbank for the new conductors. The existing ductbank was lower than expected and did not interfere with the new storm tunnel. Change Order #60, 4/23/08, was approved for $34,827 to increase the ductbank from six to twelve conduits to match the size of the existing ductbank. Change Order #66, 5/6/08, was approved for $42,700 to offset new 36” chilled water lines. A 2” foam glass board insulation was put in place between the chilled water and high pressure steam line due to unexpected elevation. Change Order #68, 6/4/08, was approved for $39,794 to perform rock removal while classes are in session using a rock trenching machine so as not to disturb teachers, students and staff in the Ag. Science Building. Change Order #71, 5/7/08, was approved for $47,571 to install four new handicap ramps and thermoplastic street marking to comply with ADA standards. Change Order #73, 6/8/08, was approved for $37,050 to remove and replace water meter vault that is in the CP #3 tunnel excavation footprint due to location of hidden chilled water lines. Change Order #85, 6/4/08, was approved for $28,092 to revise alignment and depth of electrical ductbank that runs from Scott Street toward Electric Substation #2, and revise the location of its associated manhole. This will insure proper cover for manhole and ductbank when future changes are made in this area. Change Order #90, 6/9/08, was approved for $42,604 to install new ductbank at a depth greater than planned due to concealed high voltage ductbank. Change Order #98, 7/3/08, was approved for an increase of $62,263 to modify the tower crane foundation. This was required due to unsatisfactory rock with mud seams and factures found in the west tower crane location. Change Order #102, 7/14/08, was approved for an increase of $50,183 to increase the size of both main electrical duct banks. Change Order #110, 7/30/08, was approved for an increase of $25,219 to remove an additional 240 linear feet of bad soil on Scott Street that is unsuitable for the new duct bank. Excavated material will be replaced with flowable fill concrete. Change Order #121, 8/25/08, was approved for an increase of $32,912 to provide additional excavation for fuel tanks to meet required depth. Change Order #127, 8/22/08, was approved for an increase of $43,493 to perform additional excavation at area “A” shear wall/grade beam due to unsuitable rock. Excavated material will be replaced with 4000 psi concrete. Change Order #128, 8/22/08, was approved for an increase of $30,655 to perform additional excavation at area “B” shear wall/grade beam due to unsuitable bearing. Excavated material will be replaced with 4000 psi concrete. Change Order #130, 9/9/08, was approved for an increase of $27,914 to provide control of the control valves with a selector switch and indicator lights. The switch will allow the operator to select which tank to pull oil from. Change Order #138, 9/22/08, was approved for $40,322 to provide a larger drilling rig needed to sleeve and bore larger holes due to the composition of the subgrade. Change Order #139, 9/22/08, was approved for $27,303 to sawcut the CCC tunnel footers and slab as required for the 16” sanitary pipe to pass thru the tunnel. The pipe will be sleeved to prevent shearing and concrete and resteel placed around the sleeve. This is due to the existing sanitary pipe being lower than expected. Change Order #143, 9/29/08, was approved for $33,766 to excavate 6’ to 7” below design elevation on the 12.3 line from Column Line D.1 to the southeast corner. Excavated material will be replaced with 4000 psi concrete and added resteel. This is due to found rock. Change Order #159, 11/3/08, was approved for an increase of $38,301 to offset the chilled water piping to avoid conflict with the communications tie-in to the cable tray. Change Order #164, 11/26/08, was approved for an increase of $34,881 to install a high pressure steam valve and a pump discharge valve in the main on the south side of the Gill Heart tap. This will reduce the outage to the Gill Heart building and the Critical Care to less than one day and will eliminate future outages. Change Order #165, 11/26/08, was approved for an increase of $73,079 to provide for additional removal of rock and soil and to provide additional concrete for the drilled piers .

Change Order #173, 1/20/09 was approved for and increase of $39,957 to provide for additional cost required to bore under existing gas line for the new 24” sanitary main. The original gas line was not relocated by Columbia Gas as originally planned due to access issues. Change Order #177, 3/2/09, was approved for an increase of $51,550 to remove existing unsuitable soil where fuel tanks were removed by the University. Backfill and compact will be added to grade to match existing slope.

BP #5 Change Orders

Change Order #2 BP #5, 6/30/08, was approved for $36,359 to provide and install 48” diameter sump pit and piping, for the existing subsurface groundwater. This addressed the field condition of ground water that has been observed in open excavations. Change Order #4 BP #5, 7/23/08, was approved for $26,723 to provide two mock-ups of the architectural precast panels. Change Order #7 BP #5, 9/15/08, was approved for an increase of $39,922 to provide concrete shear walls at Column Line 12/E-F and Column Line 12/L-M, ground level to underside of third level. Change Order #8 BP #5, 9/30/08, was approved for an increase of $26,540 to add one (1) gate valve and three (3) triple duty offset butterfly valves to high pressure steam lines. The original design did not allow for a partial cut-off of steam supply to the building. Change Order #20, BP #5, 12/2/08, was approved for an increase of $38,438 to provide concrete shear walls in accordance with the structural documents. The trade contractors scope descriptions failed to assign this task. Change Order #24, 2/6/09 was approved for an increase of $27,389 to revise the medium voltage cable spec to meet published UK standard. Change Order #26, BP #5, 1/20/09 was approved for an increase of $25,547 to provide additional doors to the freight elevators allowing access to these elevators from the exterior. Change Order #27, BP #5 1/20/09 was approved for an increase of $29,111 to install 60 linear feet of 18” reinforced concrete pipe from the existing storm manhole to the new 12’ diameter manhole. Change Order #32, BP #5, 2/10/09 was approved for an increase of $71,714 for the upsizing and rerouting of the steam generators. Change Order #41, BP #5, 3/26/09 was approved for an increase of $75,511 to provide miscellaneous electrical revisions to Bid Pack 5 electrical systems to include new distribution panel and critical bus duct plugs.

BP #6 Change Orders

Change Order #1, BP #6, 1/23/09 was approved for an increase of $74,499 to increase booster pump capacity. Change Order #2, BP #6, 3/3/09 was approved for an increase of $38,126 to allow for the installation of piping for dialysis systems on the 5th floor. Change Order #3, BP #6, 3/24/09 was approved for an increase of $101,006 to utilize Densarmor exterior sheeting for the electric and data closets. This will allow for the installation of the materials prior to the roofing of the structure. This will enhance the schedule and allow the project to remain on track for the substantial completion of the emergency department.
PCF- Hospital GMP#2 - Parking Garage
Project Number: 2239.20
Scope: $32,766,968

Project Description:
GMP #2. This is a portion of the larger Patient Care Facility Project (2239.0). This package will construct a seven level parking structure that will have an approximate 1,600 car capacity. The new garage will be located on the west side of Limestone Street, between Conn Terrace and Transcript Avenue. This structure will replace the existing Med. Center parking garage that must be demolished in order to tie the new Patient Care Facility to the existing Medical Center. A future pedestrian bridge will connect the new structure to the Patient Care Facility and the design has allowed for the future addition of approximately 15,000 square feet of retail space fronting Limestone.

Consultant: GBBN, Inc.

PCF- Hospital - CUP Expansion
Project Number: 2239.32

Scope: $13,150,000
This is a portion of the larger Patient Care Facility Project (2239.0). The project includes an 18,000 square foot addition to the existing Central Utilities Plant on Press Avenue. The expansion will include provisions for two new 125,000 lb./hr boilers and additional chillers. The structure will include an enlarged cold well and basement in the cooling section. The boilers and supporting equipment will be installed under this project. Chiller purchases are not contemplated at this time.

Consultant: GBBN Inc.

Contract #
Total Amendments to Date: 
Describe all amendments:

Contractor: Messer Construction Co.
Contract #: 4500008954
Total Change Orders to Date: 42
Low Bid: $9,474,000
High Bid: $10,400,000
Number of Bids: 2

Describe all change orders greater than $25,000.00:
Change Order # 4, 12/10/07, was approved for $37,518 to provide required additional rock and soil drilling. Change Order # 7, 2/21/08, was approved for an increase of $53,981 to provide temporary building heat until the new deaerator and surge tank are installed. Change Order # 14, 7/23/08, was approved for an increase of $28,219 to change the boiler water piping from ductile iron to schedule 80 black steel pipe. Change Order # 17, 7/10/08, was approved for an increase of $26,270 to install new platform in the northwest corner of the CUP addition to provide greater accessibility and safer access to valves and equipment. Change Order # 21, 7/23/08, was approved for an increase of $45,585 to provide for additional costs resulting from the late delivery of the boilers provided by the University and resulting complications which impacted items on the critical path. Liquidated damages collected from the boiler manufacturer will be applied to the compensation associated with this change order. Change Order # 30, 8/11/08, was approved for an increase of $28,249 to relocate the new condensate pump from the BBSRB tunnel to the College of Pharmacy tunnel. Provide valving to allow the pump to pump in either direction. This change allows for more versatile operation of the campus steam system. Change Order # 34, 10/30/08, was approved for an increase of $52,257 to provide and install pipe insulation for the new boiler feed water piping and the boiler blow-down piping. Change Order # 35, 11/3/08, was approved for an increase of $34,693 to provide and install two wye strainers and to install and connect the stack gas analyzers and Horiba panels. Because the boilers were a direct purchase by the University this scope of work was not originally included in the contract documents. Change Order # 37, 2/2/09 was approved for $26,661 to revise the Civil Site plan to provide greater security and improve the utilization of the grounds north of the new construction.
Convert Hunt Morgan Space to Class Lab
Project Number: 2299.10

Project Description:
This project will convert approximately 6,000 Net Square Feet of space on the ground floor of the Thomas Hunt Morgan Building into class lab teaching space. The project will include wet bench casework, flooring, ceilings, lighting, and Smart Classroom technology. The work will also include modifications to the plumbing, electrical and HVAC systems. Approximately 1800 Net Square Feet of space on the second floor will renovated for two research faculty. There will be two research laboratories, each at 765 square feet and each with a 135 square foot office. Omni Architects, HERA Lab Consultants and Biagi, Chance, Cummins, London and Titzer Engineers are designing to a $2,320,000 construction budget.

**Expand Chemistry Physics Building**

**Project Number:** 2268.00  
**Scope:** $3,752,612

**Project Description:**
To accommodate expanding enrollment, an additional organic chemistry teaching lab must be provided for fall 2008. This additional lab will be created via a major renovation of 6 adjoining rooms in the Chemistry Physics Building totaling approximately 2,300 net square feet. The dividing walls will be removed to create one large open room. All finishes will be replaced. New bench casework will be installed with 20 instructional fume hoods spaced along the benches; five additional hoods will be located on a side wall. Each student workstation will be provided with water, cup sink, certain lab gases, electrical power, and some storage space. Wall cabinets, safety stations, and high quality lighting will be installed. The building's ventilation capacity will be upgraded by installing a new AHU to accommodate this hood-intensive room, as well as additional future lab work planned.

CAPITAL CONSTRUCTION QUARTERLY ACTIVITY

Expand Ophthalmology Clinic - Hospital
Project Number: 2301.00

Scope: $4,185,000

Project Description:
This project consists of renovating approximately 12,500 square feet of space on the third floor of the Kentucky Clinic, some of which is currently occupied by Neurosurgery, in order to expand the existing Ophthalmology Clinic (also located on the third floor of the Kentucky Clinic) into the vacated space. It also includes refurbishing the existing Ophthalmology Clinic space. This project will necessitate phased construction activities to include expansion into the additional space as well as a full refurbishment of the existing Ophthalmology Clinic.

Describe all change orders greater than $25,000.00:
Project Description:
New space is needed for more than one veterinary pathologist to perform animal postmortem examinations in addition to renovation of current necropsy space. New space is also needed to add molecular biology/special procedures capabilities to the laboratory. New technology in the form of an alkaline hydrolysis digester is needed to replace an aging incinerator. The Livestock Disease Diagnostic Lab is an office and laboratory building with net assignable space of 3,860 square feet for offices and 28,100 square feet of laboratories and support space. It is proposed to add 6,300 and 1,200 square feet (net) of new laboratory and office space, respectively. An existing necropsy laboratory and support space will be renovated (2,000 square feet net).

Consultant: CMW, Inc.

Contract # A061100
Total Amendments to Date: 3

Describe all amendments:
Amendment # 1, 12/12/06, was approved for $90,000 to provide additional design services to accommodate a phased implementation consistent with the legislative budget action. Includes the additional design to study the new tissue digester effluent impact of the LFUCG Town Branch Wastewater Treatment Plant. Amendment # 2, 12/10/07, an increase of $131,000 was approved for additional schematic design services to include multiple methods of animal carcass disposal including rendering, incineration and digestion. Amendment # 3, 7/16/08, an increase of $1,625,800 to provide all of the architectural and engineering services required to complete Schematic Design, Design Development, Construction Documents and Construction Administration phases for an estimated $20,000,000 worth of construction at the existing UK Livestock Disease Diagnostic Center Facility. No amendments this quarter.

Expand/Renovate Kentucky Clinic - Outpatient Clinic
Project Number: 2298.10
Scope: $2,930,000

Project Description:
This project consists of renovating approximately 13,300 square feet of existing space on the first floor of the Kentucky Clinic, which is to be vacated by the University Health Services (Student Health Facility) to create a new outpatient clinic for the Kentucky Neuroscience Institute (Neurology, Neurosurgery and Physical Medicine & Rehabilitation clinical services). This project includes renovation of part of the space and refurbishment of all of the space. After completion of the construction work associated with this renovation, KNI departments will move into this space.

Describe all change orders greater than $25,000.00:
Change Order # 4, 1/9/09 was approved for $27,734 to replace the existing (2) runs of double wall ductwork with new high velocity single wall ductwork. Replacement of the ductwork is necessary due to a leak in the existing ductwork. This will provide for proper airflows and balancing.

Contractor: No construction contract awarded to date.

Digital Village Building 2
Project Number: 2297.10
Scope: $18,169,725

Project Description:
This project consists of the design and construction of approximately 43,000 gross square feet of research space for the Center for Visualization and Virtual Environments as well as selected research activities in the Department of Computer Science and the Department of Electrical and Computer Engineering. The facility must be sufficiently flexible in design so that it can be easily adapted to support research into emerging areas of interest. The structure should provide flexible office space and support facilities. This project will pursue LEED Certification.

Describe all change orders greater than $25,000.00:

Change Order # 14, 12/23/08, was approved for an increase of $35,643 to replace existing underground sanitary line to serve the new cage wash unit. The existing line was found to be deteriorated and unusable. No change orders greater than $25,000 this quarter.
Renovate Koinonia House (aka Schmidt Vocal Art Center)
Project Number: 2295.00
Scope: $1,000,000

Project Description:
The project continues the renovation of the Vocal Arts Center, which houses the UK Opera Program. The facility was acquired by the University in 1991. At that time, some of the first floor was renovated, but the second floor of the building remained shelled space. The current project includes upgrades to the electrical and mechanical systems, installation of a sprinkler system, a new stairwell, and an elevator. The project also begins fitting out the second floor to address needs created by the recent growth of the Opera Program. The second floor will eventually include rehearsal rooms, teaching studios, classrooms, practice rooms, a dance studio, and office space for staff and graduate assistants. Ross-Tarrant Architects and CMTA Engineers are designing to a $775,000 construction budget.

Renovate Wildcat Lodge
Project Number: 2291.10
Scope: $1,500,000

Project Description:
Wildcat Lodge is an approximately 16,000 sf. facility used for student housing on the campus of the University of Kentucky. Its residents are primarily from the University’s basketball team, thus the focus of the design is on displaying the rich history of UK basketball while providing a safe, up-to-date home for the students. In addition, there are some historically significant aspects to the building that will be maintained and highlighted. This renovation will consist of replacing flooring, wall materials, lighting, handrails and door hardware throughout the facility. Project is under reconsideration.

Renovate/Expand the Center For Applied Energy Research
Project Number: 2286.10
Scope: $2,000,000

Project Description:

The primary purpose of this project will be a multi-phased project incorporating the following components:

**Mineral Process Lab Building** - The initial phase of the project will require the construction of a 6,400 square foot support building. This new facility will permit the relocation of the existing mineral processing group currently housed in the center's main facility. The existing equipment will be relocated along with support space, offices and labs.

**Relocation of the Crushing Room** - The existing Crushing Room is to be relocated into an existing facility originally built for dry storage of coal.

**Biofuels High Bay Lab Fit-up and Improvements** - Renovated space, vacated by the Mineral Processes Lab above, will allow for the development of a biofuels laboratory for production, characterization, and testing of biomass derived fuels, with a focus on biodiesel, bio-oils, and biomass derived Fischer-Tropsch liquids. The principle objective of this project is the establishment of a laboratory dedicated to the development of improved processes for biomass utilization, with the goal of supporting the development of the biofuels industry in Kentucky.

**Combustion High Bay Hoods** - The existing Combustion/High Bay Lab will have a new bench top fume hood and a new walk-in hood installed with required ductwork and exhaust fans.

**Replace Steam and Condensate Pipe - Farm Road**

**Project Number:** 2248.10

**Scope:** $2,340,000

**Project Description:**
Replace the existing, direct buried steam piping and vaults from the Kentucky Tobacco Research and Development Center to the Gluck Equine Research Center. The new pipe is to be routed south of Farm road and outside the ARS Agriculture Project (FAPRL) leased/construction area. The location of this future ARS connection will be coordinated with that project.

Upgrade Cancer Center Radiologic Facility - Hospital
Project Number: 2252.00
Scope: $6,000,000

Project Description:
The University of Kentucky Hospital needs to significantly upgrade and improve the current clinical space in the Lower Level of University Hospital. This will include therapy rooms, clinic exam areas, infusion space, office, education, and support space for the clinical practice. Given that the clinic will need to continue operations during the project, it is anticipated that areas will be taken down, or phased, during the construction. Surge space to allow the phasing has been identified. The addition will be located along the west side of the Markey Cancer Center/Ben F. Roach Cancer Care Facility, while the renovation will occur in existing research space on the on the Lower Level of the same building. Development of Radiation Medicine clinical areas is essential to growth of cancer programs supportive of the strategic plans for UK HealthCare. Current facilities are split between the Lower Level of the hospital and the Roach Building. Several initial facility studies have been completed that identified expansion and renovation of the areas of the Lower Level of the Roach Building to respond to immediate needs and is consistent with the Ambulatory Master Plan.
