The Graduate Council met on October 17, 2002, and approved the following:

SCHOOL OF PUBLIC HEALTH

Public Health

Masters Degree Program in Public Health

All MPH students will take this 3 credit hour core course in Biostatistics instead of the 4 credit hour course STA 570. This change helps make the MPH core credit hour requirements more uniform among different core areas. It also offers flexibility in scheduling since the new 3-hour course can now be offered once per week. This will help meet the needs of the students, many of whom are part-time.
