**Application for Offering a Course Using a
Distance Education Format**

1. Course Prefix and Number: **CIS 140**
Course Title: **JavaScript I: JavaScript and the Web**

Course Description: In this course, students will code and execute JavaScript programs. JavaScript can be used to create dynamic behavior in elements of a Web page. Programs involve controlling the behavior of forms, buttons, and text elements, and can be used to write special-purpose calculators or create forms whose fields have built-in error checking.
Prerequisites: Admission into the CIS program and CIS 150; or consent of instructor.

Course Objectives/Competencies:

Upon successful completion of this course, the student can:

Demonstrate basic JavaScript variable types.

- Demonstrate JavaScript assignment statements.
- Demonstrate the input and output processes in JavaScript.
- Demonstrate arithmetic, string, and logical operations.

Demonstrate JavaScript control structures.

Demonstrate JavaScript loop constructs.

- Demonstrate pattern matching using JavaScript.
- Demonstrate the relationship between JavaScript and Java.
- Demonstrate JavaScript objects.

Demonstrate the ability to write JavaScript applications scripts.

2. Effective date (semester and year): First Summer Session, 2004
3. Describe the type of distance learning delivery method to be used.

This course will be taught via the Internet.

4. Describe how the course will achieve, in new ways, the same learning outcomes as when the course is taught by traditional delivery methods.

4/16/2004 REV

This course will be taught as a web-based distance course, using an online course management system. Traditional features such as homework assignments and exams will be supplemented with online chats, threaded discussions, and web-based content delivery. Attendance at an orientation session and other “live” events may be required and will be listed in the course syllabus. Submission of assignments via email or a course management system drop box may also be required. If the course has a lab component, completion of lab assignments may require attendance onsite at LCC or other facilities.

- 5 Describe the availability of related services such as labs, library, research, and supplemental information.

Students have access to library research materials via the web, including Kentucky Virtual Library databases and other library databases. Students have access to traditional print research materials in local public libraries and via interlibrary loan.

6. For web courses: Describe how ADA compliance has been assessed to ensure accessibility of course content for students with disabilities.

The course will be screened for ADA compliance using the accessibility guidelines and/or tools at LCC’s Wider World Web site. Screening will take place before the course is listed in the printed or online schedule of classes.

7. Describe how appropriate levels of faculty-student and student-student interaction will be achieved.

Students may interact with the instructor via e-mail, telephone, fax, and student-faculty threaded discussions. Students may interact with each other via e-mail, telephone, fax, threaded discussions and web-based chat. Participation in threaded discussions may be required.

8. Describe any technical requirements for remote sites (ITV, computer hardware/software, and special equipment).

Technical requirements for web server space and the course management system are met. Specific technical requirements for students accessing the Kentucky Virtual University may be found at their web site. If needed, requirements for completion of lab assignments will be listed in the course syllabus.
