An advanced treatment of chemical equilibrium, sampling, and the evaluation of data obtained from chemically related measurements.  
Prereq: CHE 226 or 440G or 522 or equivalent

**COLLEGE OF ARCHITECTURE**

Historic Preservation Program:

New Course:

ARC 601      Introduction to Historic Preservation (3)  
ARC 601 is an introduction to the field of historic preservation, focusing on the policies and practice of preservation in the United States. It covers preservation legislation, public and private preservation organizations and the organization of preservation practice at local, state and National levels. It emphasizes preservation as a publicly supported endeavor, and presents information about the workings of standard preservation program areas. The National Register of Historic Places, a program marking a threshold for preservation decisions in the United States, receives special attention in this course . Students in the course will experience the process of evaluating the eligibility of a property for listing in the National Register of Historic Places as a class project.

**COLLEGE OF NURSING**

Nursing

New Course:

NUR 627      Issues in Rural Nursing and Health Care Delivery (4)  
This course will focus on the exploration of models for providing preventive, primary health care, acute care, and chronic health care services in rural areas, including nursing care delivery models. Model standards for implementing the national health objectives in rural communities will be the primary focus. Demographic characteristics and organization of the community will be considered in assessing appropriateness and effectiveness of models for improving access to service and reducing disparity among subpopulations.
