Use support information is based on the 2000 305(b) Report. See the appropriate watershed summary for further details on the use support status of individual stream segments within each watershed.

Status of TMDL (total maximum daily load program) reflects that of March 2002. See page 68 for a description of the program. See <http://water.nr.state.ky.us/dow/tmdl.htm> for updated information on the status of TMDLs.

NF signifies watersheds covered by DOW's approved North Fork "TMDL" document.
