Civil engineering emphasizes infrastructure—geotechnical, water resources, environmental, transportation, construction and structural engineering, as well as other related fields. Our program allows students to discover which area (or combination of areas) of civil engineering is right for them. We emphasize more than classroom learning. For example, the Kentucky Transportation Center, Kentucky Water Resources Research Institute and Environmental Research and Training Laboratories are housed within the Department of Civil Engineering, which also offers one of the nation’s few railroad engineering programs. Our graduates are properly equipped to meet the infrastructure challenges of today and tomorrow.
