Sociology is the study of human behaviors and the interaction between human groups and institutions. Sociologists take an in depth look at social inequalities (including race, gender, and class); the environment; cultural traditions; family relations; health care; globalization; politics and social movements; and crime and justice. At UK, sociology students encounter these topics in the academic classroom but are also encouraged to get involved in the field. We offer numerous opportunities for participation in internships, research, volunteering in the community, and study abroad.
