

Active Volunteers Needed!

Researchers at the University of Kentucky College of Health Sciences invite you to participate in a research study! We are trying to identify normal movement mechanics so that we can better evaluate performance in people with injuries. Your participation in the study would involve a one-time, 90 minute visit to the UK BioMotion Lab. You will be asked to perform a series of functional tasks including walking, running, and jumping.

You may be eligible to participate if you:

- Are 13 to 40 years old
- Regularly participate in: Competitive sports, strength training, or running
- Have no history of lower extremity injury in the last six months
- Have not had any previous surgeries or conditions that may affect physical performance

Benefits of participation:

- Detailed information on your muscle strength and performance
- \$30 and a BioMotion Lab shirt
