

Moveable Modular High Tunnel Workshop

Saturday, March 30

Berea Urban Farm, 201 Adams Street

Construction Workshop

9am to 2pm, registration required, \$10 fee, light lunch provided

Open House

2pm to 3pm, free and open to the public

Each module of the Moveable Modular High Tunnel can be easily moved by four people, which greatly increases the flexibility and utility of the high tunnel for season extension and crop protection. Modules can be used separately or linked together, and are sized to cover four 30-inch beds.

Staff from Grow Appalachia will lead workshop participants in the construction of a module, while engaging in discussion of its use. The Open House welcomes anyone who wishes to see and ask questions about the finished module.

SPACE IN THE CONSTRUCTION WORKSHOP IS LIMITED.

Register at info@sustainablebera.org. Workshop fee can be paid at the event.
