

[View this email in your browser](#)

Our customers get asked all the time, "Are those live or [artificial trees](#)"? Then they typically follow that question up by touching the product and they still question it. As you probably know, our products are built on natural wood stems or we have a team of artists on hand that can build larger single trunk hand-sculpted trees which you'll see an example below. Our artists and production team do a fantastic job in replicating the living tree, essentially bringing the outdoors indoors. If you have a current project that my team or I can help assist you on to bring one of our [quality](#) trees into your space, let us know.

Wondering what we have been up to here at Commercial Silk? We have recently moved locations after being in the same building for 35+ years. Our new building is state-of-the-art with a wonderful showroom. If you are ever in the area (Minneapolis, Minnesota) please stop on in! We have expanded our [PermaLeaf®](#) UV Outdoor brand of product to include more [PermaLeaf®](#) Plus options. To learn more about our [PermaLeaf®](#) brand please visit: www.permaleaf.com. We have introduced new [ThermaLeaf®](#) IFR (Inherently Fire Retardant) products as well. Contact me for more details on this.

Please let me know if you have any questions or need updated literature.

Best Regards,

Meghan

PermaLeaf® Outdoor Fabricated Ficus Tree

A customer of mine recently came to visit our facility as they own and operate many college campus apartments and condos throughout the United States. Their property in Oregon has a courtyard which is exposed

to the exterior elements, but they wanted a maintenance free tree. Our team of artists and our client worked up a design that fit both their vision and their budget. The [PermaLeaf® UV Outdoor rated Ficus Benjamina Tree](#) (as shown) measures 20' H x 15' W.

If [Ficus](#) doesn't interest you we have [other tree](#) varieties to choose from. Check out all of our products at www.commercialsilk.com.

ThermaLeaf® IFR Bamboo Grove

[Commercial Silk](#) will be attending [IAAPA](#) 2015 in November located in Orlando, Florida. One of our showcased items in our booth is our [Bamboo Groves](#). These groves are custom built to each clients specifications. They are built on natural [Bamboo stalks](#) or we custom hand fabricate Bamboo canes as well. The [Bamboo Groves](#) come with either [green](#), [black](#) or [natural](#) colored stems. We can build them [PermaLeaf®](#) UV outdoor rated or [ThermaLeaf®](#) IFR indoor rated. The [Bamboo canes](#) as shown in the image above measuring 18' to 22' in height. We build them from 2'+ in size.

This is a custom [Cherry Blossom](#) Tree measuring 10' H. It comes [ThermaLeaf®](#) IFR rated. We can customize the tree to your exact specifications.

This is a sampling of our [PermaLeaf®](#) UV Outdoor rated [succulents](#). They have been very popular in the southwestern states.

Check this tree out. Its our new Preserved Bottle Palm Tree. This tree is hand sculpted to your specifications. [ThermaLeaf®](#) or [PermaLeaf®](#) are both available.

[Boxwood Hedges](#), [Screens](#) and loose

Our client did a fantastic job using our various wall mats to create this indoor Green Wall. Using our [Azalea](#), [Juniper](#), [English Ivy](#), [Boxwood](#), [Pearl Grass](#) and other products. We have a wide selection of both [PermaLeaf®](#) and [ThermaLeaf®](#) wall mats to choose from for you to get creative on your next project.

[Boxwood Mat](#) tiles are our most popular green wall product that we offer. They have been used in thousands of locations throughout the world. Whether you need it to be [ThermaLeaf®](#) or [PermaLeaf®](#), we have what you need.

Have you been to one of the Fig and Olive Restaurants located throughout the United States? If so, chances are you have seen our quality replica [plants](#) and [trees](#). The ones shown are custom built [Mediterranean Olive Trees](#) for their Chicago location.
