

Troubleshooting Access to the New UK Jobs System

When attempting to access the Integrated Employment System page some users have experienced errors indicating the page does not exist or cannot be found. These errors occur when a link to the older, out-of-date Online Employment System information remains stored by your web browser.

Each time you access a file through your web browser, the browser caches (stores) it. By doing this, the browser doesn't have to newly retrieve files (including any images) from the remote web site each time you click Back or Forward. ***By clearing your computer's cache you should be able to eliminate the errors and successfully access UK Jobs.***
