The Epidemiology Branch is an intramural research program within the Division of Intramural Population Health Research at the NICHD. The Branch’s mission is to conduct original research focusing on human reproduction, pregnancy, and child health. Branch scientists are internationally recognized as leaders in these areas, and are recruiting multiple fellows particularly interested in fertility and reproduction, fetal growth and development, maternal chronic disease and pregnancy complications (e.g., gestational diabetes and preeclampsia), environmental factors that impact reproductive health, genetics, birth defects, nutrition, obesity, type 2 diabetes, developmental origins of disease, child health and epidemiological methods. Postdoctoral fellows have the opportunity to develop their own research initiatives within the mission of the Branch. Candidates legally approved to work in the USA with either an earned doctoral degree in epidemiology or a closely related field, or with a medical degree and advanced graduate training in epidemiology or biostatistics within the past five years are invited to apply. Preference will be given to candidates with demonstrated research interests in areas currently under investigation in the Branch and with superior analytic and communication skills. Salary is commensurate with training and relevant research experience. Multiple positions are available and will remain open until qualified applicants are found.

Applicants should send: 1) a curriculum vitae; 2) a statement of research interests to be pursued during training; 3) three letters of reference; and 4) transcripts for undergraduate and graduate degrees to below. (Note: official transcripts may be requested if selected for an interview.)

Dr. Cuilin Zhang
Epidemiology Branch
DIPHR/NICHD/NIH
6100 Executive Blvd., Rm 7B13F
Rockville, MD 20852-7510
zhangcu@mail.nih.gov
