Clinical Research Postdoctoral Fellowship
Interdisciplinary Research in Women’s Reproductive Health

The University of Texas Medical Branch in Galveston, TX is accepting applications for a postdoctoral fellowship position in women’s health research. This 2-year NIH funded fellowship provides formal and informal training in theory and methods as well as practical experience in conducting interdisciplinary clinical research. Program faculty include national experts in infectious disease, virology, epidemiology, statistics, and women’s health who can offer many opportunities to participate in research using primary and secondary data, manuscript preparation, and grant writing in a collaborative environment.

Applicants must have completed a PhD or equivalent degree in a research program, such as public health, statistics, medical sociology or epidemiology. The candidate must be self-motivated, productive, and able to work in a collaborative multi-disciplinary team. Must be US citizen, non-citizen national or permanent resident and be able to commit full time effort to the program for 2 years. Exemplary candidates may be eligible for salary supplements to the NIH stipend.

To apply, send 1) a cover letter with a brief description of proposed research; 2) a current CV; and 3) contact information for three references to Abbey Berenson, MD, PhD at: abberens@utmb.edu. For more information, please visit www.utmb.edu/CIRWH/.
