Mining engineering requires a broad knowledge of sciences and other fields of engineering in its practice after graduation. The curriculum below meets the requirements for a Bachelor of Science in Mining Engineering, provided the student satisfies the graduation requirements of the College of Engineering.

Admission to the program is selective. Students should refer to the UK Bulletin for general information concerning admission and graduation requirements.

**Freshman Year**

**First Semester**
- CHE 105 General College Chemistry I ................................................. 3
- CS 221 First Course in Computer Science for Engineers ..................... 2
- ENG 104 Writing: An Accelerated Foundational Course ....................... 4
- MA 113 Calculus I ............................................................... 4
- MNG 101 Introduction to Mining Engineering .................................. 1
- University Studies* .................................................................. 3

**Second Semester**
- CHE 107 General College Chemistry II ........................................... 3
- MA 114 Calculus II ............................................................ 4
- MNG 264 Mining Methods ....................................................... 3
- PHY 231 General University Physics .............................................. 4
- PHY 241 General University Physics Laboratory ............................ 1

**Sophomore Year**

**First Semester**
- EM 221 Statics ........................................................................ 3
- GLY 220 Principles of Physical Geology ........................................... 4
- MA 213 Calculus III .................................................................. 4
- MNG 331 Explosives and Blasting ................................................. 2
- PHY 232 General University Physics .............................................. 4
- PHY 242 General University Physics Laboratory ............................ 1

**Second Semester**
- EM 302 Mechanics of Deformable Solids ........................................ 3
- MA 214 Calculus IV .................................................................. 3
- ME 220 Engineering Thermodynamics I .......................................... 3
- COM 199 Presentational Communication Skills ................................ 1
- MNG 291 Mineral Reserve Modeling ............................................. 2
- MNG 303 Deformable Solids Laboratory ........................................ 1
- MNG 332 Mine Plant Machinery .................................................. 3

**Junior Year**

**First Semester**
- MNG 211 Mine Surveying .......................................................... 2
- EE 305 Electrical Circuits and Electronics ........................................ 3
- GLY 230 Fundamentals of Geology I ............................................. 3
- ME 330 Fluid Mechanics ........................................................... 3
- MNG 301 Minerals Processing ..................................................... 3
- MNG 302 Minerals Processing Laboratory ..................................... 1
- MNG 371 Professional Development of Mining Engineers ............... 3

**Second Semester**
- ECO 201 Principles of Economics I ............................................. 3
- EM 313 Dynamics .................................................................... 3
- MNG 335 Introduction to Mine Systems Analysis ............................ 3
- MNG 463 Surface Mine Design and Environmental Issues ............... 3
- Minerals Processing Technical Elective** ........................................ 3
- University Studies/Graduation Writing Requirement*† .................. 3

**Senior Year**

**First Semester**
- MNG 341 Mine Ventilation .......................................................... 3
- MNG 431 Mines Systems Engineering and Valuation ....................... 4
- MNG 551 Rock Mechanics .......................................................... 4
- MNG 591 Mine Design Project I .................................................... 1
- University Studies* .................................................................. 3

**Second Semester**
- MNG 592 Mine Design Project II .................................................. 3
- Supportive Elective** ................................................................ 3
- Technical Electives†† ................................................................. 6
- University Studies* .................................................................. 3

*To be selected from University Studies areas in Social Sciences (6 credits), Humanities (6 credits), and Cross-Cultural (3 credits) in consultation with the academic advisor. Of these totals, 3 credits of Social Sciences are fulfilled by ECO 201. A minimum of 15 credits in the humanities and social sciences are required.

**The supportive elective is to be chosen from any University course outside the student’s major excluding more elementary versions of required courses such as precalculus mathematics.

**The Mineral Processing Technical Elective is to be chosen between MNG 575, Coal Preparation Design, and MNG 580, Mineral Processing Plant Design.

††Courses recommended as technical electives are listed below. These courses must be chosen with the approval of the student’s advisor to ensure that the curriculum includes sufficient engineering design content.

**Technical Electives:** Of the two technical electives in the undergraduate program, students are required to select at least one from departmental courses. The remaining course, chosen with the approval of the student’s advisor, can be used to fulfill specific educational goals.

- MNG 511 Mine Power System Design
- MNG 561 Mine Construction Engineering I
- MNG 563 Simulation of Industrial Production Systems
- MNG 572 Advanced Coal Preparation
- MNG 575 Coal Preparation Design
- MNG 580 Mineral Processing Plant Design
- MNG 581 Geostatistics
- MNG 599 Topic in Mining Engineering
- BAE 438G Fundamentals of Groundwater Hydrology
- CE 471G Soil Mechanics
- CE 541 Intermediate Fluid Mechanics
- GLY 450G Sedimentary Geology
- GLY 585 Hydrogeology
- PLS 501 Reclamation of Disturbed Land

2008-2009 Series
