Chemistry - B.S.  
(Traditional Option)

The Department of Chemistry offers the Bachelor of Science degree for students who intend to become professional chemists or do graduate work in chemistry or a closely related discipline. There are two options in the B.S. program: a traditional version covering all the major areas of chemistry, and an option that emphasizes biochemistry. Both degree options are certified by the American Chemical Society.

123 hours (minimum)
Any student earning a Bachelor of Science (BS) degree must complete a minimum of 60 hours in natural, physical, mathematical, and computer science. For a complete description of College requirements for a Bachelor of Science degree, including a specific listing of courses applicable to the 60-hour requirement, see the Arts and Sciences section of the 2014-2015 UK Bulletin.

UK Core Requirements
See the UK Core section of the 2014-2015 Undergraduate Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

1. Intellectual Inquiry in Arts and Creativity
Choose one course from approved list .................................................. 3

2. Intellectual Inquiry in the Humanities
Choose one course from approved list .................................................. 3

3. Intellectual Inquiry in the Social Sciences
Choose one course from approved list .................................................. 3

4. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences
CHE 105 General College Chemistry I .................................................. 4
CHE 111 Laboratory to Accompany General Chemistry I ......................... 1

5. Composition and Communication I
CIS/WRD 110 Composition and Communication I .................................. 3

6. Composition and Communication II
CIS/WRD 111 Composition and Communication II .................................. 3

7. Quantitative Foundations
MA 113 Calculus I .................................................................................. 4

8. Statistical Inferential Reasoning
Choose one course from approved list .................................................. 3

9. Community, Culture and Citizenship in the USA
Choose one course from approved list .................................................. 3

10. Global Dynamics
Choose one course from approved list .................................................. 3

UK Core hours ................................................................. 33

Graduation Composition and Communication Requirement (GCCR)
CHE 372 Communication in Chemistry I ............................................... 1
CHE 472 Communication in Chemistry II ............................................... 1

Graduation Composition and Communication Requirement hours (GCCR) ............................................ 2

College Requirements
I. Foreign Language (placement exam recommended) ......................... 0-14

II. Disciplinary Requirements
   a. Natural Science (completed by Major Requirements) .................. 3
   b. Social Science ............................................................................. 3
   c. Humanities .................................................................................. 3

III. Laboratory or Field Work (completed by Premajor Requirement) .... 1

IV. Electives ....................................................................................... 6

College Requirement hours: ......................................................... 12-26

Premajor Requirements
*MA 113 Calculus I .............................................................................. 4
*MA 114 Calculus II ............................................................................. 4
*CHE 105 General College Chemistry I ................................................. 4
CHE 107 General College Chemistry II .................................................. 3
*CHE 111 Laboratory to Accompany General Chemistry I ................. 1
CHE 113 Laboratory to Accompany General Chemistry II ................. 2
Premajor hours: .............................................................................. 18

Major Requirements

Major Core Requirements
CHE 226 Analytical Chemistry ............................................................ 3
CHE 230 Organic Chemistry I ............................................................... 3
CHE 231 Organic Chemistry Laboratory I ............................................. 1
CHE 232 Organic Chemistry II ............................................................. 3
CHE 372 Communication in Chemistry I ............................................. 1
CHE 410G Inorganic Chemistry ........................................................... 1
CHE 410G Inorganic Chemistry Laboratory ......................................... 2
CHE 441G Physical Chemistry Laboratory .......................................... 2
CHE 442G Thermodynamics and Kinetics .......................................... 3
CHE 472 Communication in Chemistry II .......................................... 1
CHE 522 Instrumental Analysis ........................................................... 4
CHE 532 Spectrometric Identification of Organic Molecules .................. 2
CHE 533 Qualitative Organic Analysis Laboratory ............................... 2
CHE 547 Principles of Physical Chemistry I ........................................ 3
CHE 550 Biological Chemistry I ......................................................... 3
CHE 552 Biological Chemistry II ........................................................ 3

Major Core hours: ......................................................................... 35

--- CONTINUED ---
Chemistry (B.S.) – Traditional Option • 2

Other Course Work Required for the Major

From the Major Department:
Chemistry Major Field Options ................................................................. 6
Choose six hours from the following: up to six hours of CHE 395, any CHE 500-level course except for those required (CHE 522/532/533/550 or 552/572); BCH 401G.

From the Mathematics Department
MA 213 Calculus III ................................................................. 4
MA 322 Matrix Algebra and its Applications .................................................. 3

From the Physics Department
*PHY 231/232 General University Physics .................................................. 8
*PHY 241/242 General University Physics Laboratory .................................. 2

Other Major hours: .................................................................................... 23

Total Minimum hours 123

Required for Degree: .............................................................................. 123

*Any language may be used to satisfy the College Foreign Language requirements—German is recommended.

*Course used towards completion of a UK Core Requirement.

Curriculum for B.S. in Chemistry

Traditional Option

Sophomore Year

First Semester
CHE 226 Analytical Chemistry ................................................................. 3
CHE 230 Organic Chemistry I ................................................................. 3
MA 213 Calculus III ................................................................................ 4
PHY 231 General University Physics ....................................................... 4
PHY 241 General University Physics Laboratory ..................................... 1

Second Semester
CHE 231 Organic Chemistry Laboratory I ............................................... 1
CHE 232 Organic Chemistry II ................................................................. 3
MA 322 Matrix Algebra and Its Applications ............................................ 3
PHY 232 General University Physics ....................................................... 4
PHY 242 General University Physics Laboratory ..................................... 1

UK Core ......................................................................................................... 3

Certification Requirements
The B.S. degree is certified by the American Chemical Society.
