The College of Health Sciences is one of the six health professions colleges which, with the University Hospital, constitute the health science campus of the University of Kentucky.

The College of Health Sciences is composed of the Department of Clinical Sciences and the Department of Rehabilitation Sciences.

Today health science professionals are assuming greatly expanded and increasingly complex duties and responsibilities as essential members of the health care team. They work in a variety of delivery settings and have key responsibilities for the care and health of patients, clients, and communities. The UK College of Health Sciences, established in 1966, was among the first colleges to offer programs for students interested in these rapidly developing health professions. The college strives continually to revise its offerings in keeping with society’s evolving expectations and health care needs.

### Undergraduate Programs in Health Sciences

The University of Kentucky grants the following degree in the College of Health Sciences:

- Bachelor of Health Sciences

Students pursuing the Bachelor of Health Sciences may select from these majors: clinical laboratory sciences, clinical leadership and management, communication disorders and physical therapy.

### ADMISSIONS PROCEDURES

#### Baccalaureate Programs

Baccalaureate programs in the College of Health Sciences are divided into preprofessional and professional programs. A preprofessional program is comprised of courses prerequisite to professional program content as well as University Studies requirements. Freshman and transfer students who have initially not completed prerequisites for entrance into a professional program complete only the first step of the application process – application to the University of Kentucky. Freshman applicants to the college will be admitted if they meet University entrance requirements.

A professional program is comprised of all courses and clinical experiences required for students who have applied for and have been accepted into professional programs. Consideration for admission to the college’s professional programs requires completion of prerequisite course work and completion of the professional application procedure.

Therefore, the admission procedures for all undergraduate programs within the College of Health Sciences is a two-step process. Applicants must first be accepted by the University of Kentucky and second must apply for admission to a professional program approximately two semesters prior to completing prerequisites.

This selection procedure is necessary because of the limited space in the professional years of the health sciences programs.

Requirements for the first several years (preprofessional program) may be completed at the University of Kentucky, a community college, or another fully accredited college or university.

At the time of application to the professional program, the student should have completed the prerequisites required for application to the program he or she plans to enter, and have plans to complete all prerequisites before actual enrollment in the professional program.

It is essential that complete, accurate information be furnished on the application. Individuals seeking entry into the professional programs or those admitted to the programs through falsified or misleading information may be dropped from consideration or dismissed from the programs.

Persons not enrolled at the University of Kentucky must complete applications to both the University of Kentucky and the professional program. Application materials are available from:

Graduate Programs

Students who want to earn advanced degrees in health sciences fields must be admitted to the University of Kentucky Graduate School. For complete information, students should refer to The Graduate School Bulletin or contact:

Graduate School Admissions
351 Patterson Office Tower
University of Kentucky
Lexington, KY 40506-0027
(859) 257-4613
fax: (859) 323-5986
www.research.uky.edu/gs/

The College of Health Sciences offers graduate programs in the following areas: athletic training, clinical nutrition, communication disorders, health physics, physical therapy, physician assistant studies, radiological medical physics, and rehabilitation sciences.

PROBATION AND SUSPENSION

The probation and suspension rules for professional students in the College of Health Sciences appear under Academic Requirements in the front section of this Bulletin.

NOTICE TO ALL APPLICANTS

Some courses will require a period of training off campus in community facilities outside of Lexington.

ACADEMIC ADVISING

Academic advising is available from the College of Health Sciences. Students should report to the Office of Student Affairs to be assigned an advisor. Detailed information on each program is detailed on each program’s Web site.

For academic advising, contact:
Deedie Goodwin Lutz
Academic Advisor
(859) 323-1100 ext. 8-0546
dglutz01@uky.edu

BACCALAUREATE PROGRAMS

College Graduation Requirements

To graduate with a Bachelor of Health Sciences degree from the College of Health Sciences, a student must (1) satisfy University Studies requirements and (2) complete a minimum of 120 semester hours, including required courses in both the preprofessional and professional programs.

DEPARTMENT OF CLINICAL SCIENCES

B.H.S. with a major in CLINICAL LABORATORY SCIENCES

The mission of the Division of Clinical Laboratory Sciences is to help the College of Health Sciences achieve its mission through creative leadership and productivity in clinical laboratory science education, research, and service.

The undergraduate Clinical Laboratory Sciences (CLS) program at the University of Kentucky prepares Clinical Laboratory Scientists who perform laboratory tests that aid in the prevention, diagnosis and treatment of disease. CLS graduates receive training in four major disciplines of the clinical laboratory: immunohematology (blood-banking), clinical chemistry, hematology, and microbiology. Additional course work includes phlebotomy, CLS education or clinical education, and laboratory management. CLS graduates are employed in a variety of health care settings including hospital and private laboratories, clinics, pharmaceutical companies, research institutions, the armed forces, public health centers, and veterinary clinics. In addition to performing clinical laboratory tests, CLS graduates also serve as consultants, managers, sales and technical representatives, and educators.

Admission

Admission into the Clinical Laboratory Sciences professional program requires:
• minimum cumulative grade-point average of 2.75 for all courses taken at institutions of higher education;
• three professional letters of recommendation;
• personal interview scores based on interviews with two CLS faculty members. The interview will focus on identifying the applicant’s strengths, commitment to, and knowledge of the profession;
• completion of the preprofessional requirements.

The application deadline for the 3 + 1 Program is April 1.

Preprofessional Requirements

The preprofessional program consists of (1) courses that fulfill the University Studies Program and (2) prerequisite courses required by the CLS professional program. The University Studies Program (USP) is a program of required subjects that all students enrolled at the University of Kentucky must complete in order to receive a baccalaureate degree. See “University Studies Program” on pages 75-79 for the complete University Studies requirements.

Prerequisite Course Requirements

2 semesters of general chemistry with laboratory
1 semester general microbiology with laboratory
1 semester of human physiology (or combined course in physiology and anatomy)
1 semester of statistical methods
1 semester of biochemistry (may take CLS 822 to fulfill this requirement)
1 semester of immunology (may take CLS 835 to fulfill this requirement)

Subtotal: Professional Course Hours .......... 46

3 + 1 Program

The 10-month CLS professional program is offered on the Lexington campus of the University of Kentucky and encompasses the fourth year of study in the baccalaureate degree program. The program provides sequential instruction in laboratory medicine for the student who has been well prepared in science and mathematics during the first three years of university study. Through lecture, laboratory, demonstrations and clinical practice, students are prepared for clinical practice in the modern, automated laboratory. Graduates are eligible to take national certification examinations as Clinical Laboratory Scientists/Medical Technologists.

The program begins in the summer prior to the final year of study. During the summer session, students are introduced to the structure and regulatory guidelines of the clinical laboratory, and practice basic level clinical laboratory techniques in student laboratories. Following summer courses, students complete intense courses in the principles and practices of basic hematology and clinical chem-
Advanced education and career enhancement

The Clinical Sciences graduate programs offer a unique multidisciplinary masters and doctorate programs that address the rapidly changing health care environment and selected evolving clinical science disciplines. This program of study provides the opportunity for advanced education and career enhancement for health professionals in the clinical sciences. The master’s degree provides a foundation in advanced clinical sciences. Students may specialize in two areas of concentration: Reproductive Laboratory Sciences and Hematology/Transplantation Science. The Doctor of Science degree provides further study in the emerging field of Hematology and Transplantation Science and advanced research training.

B.H.S. with a major in
CLINICAL LEADERSHIP
AND MANAGEMENT

Grades of the Clinical Leadership and Management program earn a Bachelor of Health Sciences (B.H.S.) degree. The purpose of the program is to provide health care professionals with formal academic education and skills training needed to prepare them for leadership and management roles and responsibilities. The program offers a career ladder for professional advancement in the health sciences. Program graduates will be prepared to assume greater responsibilities at their current jobs, be better qualified for job promotions, and be positioned for graduate studies.

This program is intended for health care professionals who have an associate degree in a health-related discipline and have at least one year of post-degree employment experience in a health care setting.

Historically, there have been limited educational options for associate degree trained health professionals who are interested in pursuing a baccalaureate degree in Kentucky. This degree completion program accommodates transfer students for many allied health disciplines including, but not limited to: radiological technology, respiratory therapy, dental hygiene, clinical laboratory technicians, and nursing. The program provides accessible course offerings for non-traditional students who may require evening and part-time classes. It is anticipated that graduates of the B.H.S. program in Clinical Leadership and Management will benefit from advanced knowledge and skills which will enhance their job/career, work environment and quality of life. Program graduates may also benefit their employers, health care facility, and patients.

For additional information, go to: www.mc.uky.edu/clm/.

Application Process and Requirements

The admissions process begins with an application to the University of Kentucky by December 1 for spring enrollment and August 1 for fall enrollment. Application must also be made directly to the CLM program. The CLM program uses rolling admissions once accepted by the University as a degree seeking student. Criteria for admission to the program includes: an Associate Degree, 2.0 GPA, and one year of work experience in a health related area. Academic advising and information about admissions is available from:

Office of Student Affairs
College of Health Sciences
University of Kentucky
111 Charles T. Wethington Building
Lexington, KY 40536-0200

For additional information, access the Web site above, email individual program faculty, or call the advisors in the Office of Student Affairs at (859) 323-1100 ext. 80473.
DEPARTMENT OF REHABILITATION SCIENCES

B.H.S. with a major in COMMUNICATION DISORDERS

In keeping with the standards of the American Speech-Language-Hearing Association, the undergraduate program in communication disorders is considered to be a preprofessional degree program. In order to meet Kentucky licensure and American Speech-Language-Hearing Association certification requirements, it is necessary to complete the master’s degree. Students pursuing this program should plan on six years to complete both the Bachelor of Health Science and Master of Science programs.

Admission to the Professional Program

The Communication Disorders program has selective admissions. Applicants must have completed a minimum of 42 credit hours at the time of application. Students are admitted to the professional program on a competitive basis. Admission is based on cumulative grade-point average, ACT or SAT scores, and relevant experiences. Applicants must submit a letter of application and three references. New students are admitted only for the fall semester of the junior year. The application deadline is February 1.

University Studies Requirements Hours
See “University Studies Program” on pages 75-79 for the complete University Studies requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill University Studies areas. Students should work closely with their advisor to complete the University Studies Program requirements.

CD 771 Dysphagia ...................................... 3

Total Credit Hours ........................................ 30

The M.S. in Communication Disorders consists of 30 didactic hours plus optional thesis or comprehensive examinations.

ASHA Certification

Applications wishing to meet American Speech-Language-Hearing Association certification requirements must also complete the following additional clinical orientation, clinical practicum and clinical rotation experiences plus 3 hours of graduate-level electives, and optional 1-6 hours in thesis or comprehensive exams:

CD 654 Clinical Orientation in Communication Disorders .................. 3
CD 657 Clinical Practicum in Speech-Language Pathology ............ 2-6
CD 659 Clinical Rotation in Speech-Language Pathology .................. 21-30

Students completing the thesis option also complete the following:
CD 748 Master’s Thesis Research .................. 0
CD 768 Residence Credit for the Master’s Degree .................. 1-6

Physical Therapy Program

The Division of Physical Therapy offers the dual B.H.S./M.S. in Physical Therapy degree.

The selection of students for the Dual Degree sequence will be on a competitive admissions basis with specific information and details available from the Division of Physical Therapy. Those students pursuing the dual degree must follow the application procedures as outlined through the Division of Physical Therapy.

Additional related programs include the doctoral degree in rehabilitation sciences through the College of Health Sciences. Information about the other graduate offerings in physical therapy is available through the Division of Physical Therapy, University of Kentucky, 900 S. Limestone St., Room 204, Lexington, KY 40536-0200. Or call (859) 323-1100, ext. 8-0494.

Dual Degree

The following descriptors outline the requirements of the student to enter the graduate phase of this program of study (Bachelor of Health Science and Master of Science — terminal — non-thesis option). The student will have completed:

1) the overall undergraduate application process including references, appropriate University requirements, and acceptance into the Professional Program.
2) a minimum of 90 semester hours including specific University and Professional
prerequisites and the first two semesters of the Professional Physical Therapy curriculum.

3) the graduate application process including references, GRE and University requirements (after completion of 1 and 2).

Degree Requirements

Dual Degree Program

The professional sequence of study results in the award of the dual degrees, the Bachelor of Health Science and a Master of Science in Physical Therapy. This involves a continuous 30 months of study, requiring the completion of approximately 100 semester hours. The 100 hours are divided among the following: 15 hours of basic/realted science, 19 hours of clinical clerkship/internship and 64 hours of physical therapy didactic and laboratory experiences. The students complete a joint research project and present it in both an oral and written format during the final portion of their graduate sequence of study. Students must successfully complete a written comprehensive examination during the last educational term of the program. The students are awarded a Bachelor of Health Science degree through the College of Health Sciences and a Master of Science in Physical Therapy degree from The Graduate School upon completion of the Professional Program. The Professional phase of study is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) of the American Physical Therapy Association.

Professional Program Application Deadline

(Spring admissions only)

June 1 – Deadline for UK and professional program applications, recommendations, transcript(s) and GRE scores.

University Studies Requirements Hours

GRADUATE DEGREES IN HEALTH SCIENCES

Master of Science in Athletic Training
The master’s degree program in Athletic Training (AT) is designed to accommodate both NATA certified athletic trainers and NATA “certification eligible” athletic trainers. Course work and clinical experiences are designed to develop skills necessary to conduct research and increase proficiency in sports injury prevention, treatment, and rehabilitation. It is a goal that graduates become: critical consumers of research and accepted clinical practices, advanced health care providers, and leaders in the clinical, educational, and research endeavors of the profession.

Master of Science in Communication Disorders
The Master of Science in Communication Disorders is designed for students seeking entry-level professional preparation in speech-language pathology. The degree is available for students who have completed an undergraduate major or equivalent in communication disorders. Any student without an undergraduate major or equivalent in Communication Disorders should apply as a prerequisite student in the undergraduate program to complete the prerequisite course work. The curriculum incorporates course work and intensive clinical practicum experiences designed to prepare students to meet state licensure and national certification requirements. For further information, contact:
Director of Graduate Studies
Division of Communication Disorders
900 S. Limestone St., Room 120
University of Kentucky
Lexington, KY 40536-0200
(859) 323-1100 ext. 8-0557

Master of Science in Health Physics
This program option produces specialists in the safe, efficient use of radiation and radioactive materials. Such professionals are responsible for the protection of the health and safety of users of radiation and the general public. The health physicist draws upon knowledge and skills derived from physics, mathematics, biology, medicine, chemistry, and management. As use of radiation has become more frequent and highly regulated, employment of radiation protection specialists has greatly increased.

Master of Science in Nutritional Sciences
The program is designed to develop nutrition specialists, knowledgeable in the metabolic changes that occur in normal exercise and various pathophysiological states. Opportunities for specialization are available in the areas of clinical nutrition/medical nutrition therapy, wellness and sports nutrition, and community nutrition. In addition, concurrent participation in an American Dietetic Association (ADA) approved dietetic internship and/or Physician Assistant Program are possible. Continued graduate study in Clinical Nutrition is possible through the multidisciplinary Ph.D. program in Nutritional Sciences.

The courses provide the student with in-depth knowledge of the role of nutrition in metabolism, the physiology of organ systems, and the pathophysiology of specific disease states. Elective course selections provide program focus while allowing maximum flexibility to meet individual needs. A minimum of 35 credit hours of course work is required for graduation.

Master of Science in Physical Therapy
The Division of Physical Therapy offers the Master of Science degree to qualified graduate students that have already obtained a professional physical therapy degree. The Master of Science in Physical Therapy degree with both thesis (Plan A) and non-thesis (Plan B) options is offered. Plan A is designed as an advanced degree sequence involving an area of specialty concentration (musculoskeletal, neuromuscular, cardiopulmonary) and the completion of an individual research project resulting in a thesis. Plan B is designed for the graduate physical therapist to further his or her knowledge in physical therapy practice and clinical research and requires the completion of a joint research project rather than the individual project and thesis. Graduates of the M.S. program will be prepared for advanced clinical practice in their selected area, able to conduct and report research, have experience in academic and clinical teaching and will be prepared to assume a leadership role in the profession. The intensity and depth of the course work will also prepare the student for work towards a doctoral degree if they so desire. For further information, contact:

Master of Science in Physician Assistant Studies
Criteria for Admission
All applicants must have taken the Graduate Record Examination (GRE) within the last five years. Official scores of the verbal, quantitative and analytical portions of the GRE must be submitted with application.
All applicants must hold a baccalaureate degree with a minimum GPA of 3.0 accredited college or university. Applicants must have earned a C grade or better in the following prerequisite courses:
Prerequisite Courses
1 semester of general chemistry with laboratory
1 semester of organic chemistry with laboratory
1 semester of general psychology
1 semester of developmental psychology
1 semester of biology/zoology with laboratory
1 semester of microbiology (lab recommended)
1 semester of sociology/anthropology
1 semester of human anatomy
1 semester of human physiology
1 semester of medical terminology

Letters of Recommendation
Three (3) letters of recommendation must be submitted from persons familiar with the applicant (for at least one year) and his/her professional goals.

Commitment
Applicants must demonstrate an understanding of and commitment to the role and responsibilities of a physician assistant.

Admission Essays
Applicants must submit an Admissions Essay according to the directions of the application for admission. The writing sample must be of graduate level quality and reflect the applicant’s commitment to primary care.

Basic Life Support
Proof of current American Heart Association certification of basic life support must be submitted at the time of interview and certification must be maintained throughout the program.

Technical Standards
All applicants must comply with the Technical Standards of the Physician Assistant Studies Program as established by the College of Health Sciences.

Interview
Competitive applicants who have complete files and who meet the minimum entrance requirements as set forth above will be granted an interview.

Health Care Experience
Health care experience is preferred, but not required.

Master of Science in Radiological Medical Physics
This program option trains professionals involved with the application of ionizing and nonionizing radiation to the diagnosis and treatment of disease. Such individuals plan radiation treatments for cancer patients, measure output from radiation sources, calibrate and evaluate instrumentation, design radiation facilities, and control medical radiation hazards.

For further information about this program option, contact:
