PSC 815 FIRST-YEAR ELECTIVE, PSYCHIATRY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Psychiatry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

PSC 825 SECOND-YEAR ELECTIVE, PSYCHIATRY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Psychiatry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

PSC 826 MECHANISMS OF DISEASE AND TREATMENT/PSYCHIATRY. (2)
This is an introduction to psychopathology and the psychiatric nomenclature for second year medical students. It occurs during the spring and fits within the context of the larger pathology segment of MD 826. Integration with the pharmacology sequence that runs before and after is in place. Prereq: Promotion to the second year of medical school.

*PSC 841 ELECTIVE: PSYCHIATRY. (4)
This four-week rotation emphasizes the evaluation and care of psychiatric patients who present in various clinical settings. Students will have the opportunity to rotate through a variety of clinical sites based upon student interest and site availability. Students need to contact the course coordinator at least one month in advance to communicate their desired rotation sites. Prereq: Promotion to Advanced Development Phase of M.D. curriculum.

PSC 842 ELECTIVE: CHILD AND ADOLESCENT PSYCHIATRY. (4)
Psychiatry elective for fourth-year medical students offering a combined experience in inpatient, outpatient, consult/liaison child and adolescent psychiatry. Prereq: Promotion to Advanced Development Phase of M.D. curriculum.

#PSC 843 ACTING INTERNSHIP: ADULT INPATIENT PSYCHIATRY. (4)
This four-week rotation emphasizes the care of psychiatric patients who present in emergency and inpatient settings. The acting intern will be expected to perform the initial evaluation of a patient and follow the patient through the course of hospitalization. S/he will be responsible for writing orders and documenting in a timely manner. Night call, cross cover, and hand offs are expected. Supervision will occur by attending or resident. Anticipate minimum of 60 hours per week. Prereq: Promotion to the Advanced Development Phase of M.D. curriculum.

#PSC 849 ELECTIVE: EXTRAMURAL ROTATION IN PSYCHIATRY. (4)
Clinical electives allow students to gain exposure to medical specialties reflecting their career interests. Extramural electives allows students to experience clinical care in different environments at different institutions. Through this extramural clinical elective, the student will complete a clinical rotation in Psychiatry at another institution. The specific rotation details and institution must be approved by the course director. Prereq: Promotion to the Advanced Development Phase of the M.D. curriculum.

PSC 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.
