Academic Advising

ACADEMIC ADVISING

Academic advising is an integral part of undergraduate education at the University of Kentucky. The goal of all academic advising is to assist students in taking responsibility for developing meaningful educational plans compatible with their potential and their career and life goals. Advising is more than the imparting of specialized information; it includes helping students formulate important questions about the nature and direction of their education and helping them find answers to those questions. Advisors will confer with students about course schedules and educational experiences, but students themselves are responsible for their academic program and for making progress toward an academic degree.

As students progress through their academic programs, their advising needs change. At the University of Kentucky, academic advisors help students meet these changing needs. Faculty advisors are key to understanding the nature of the academic program and how it can address student interests and goals. Professional advisors maintain up-to-date information on university requirements, academic policies, procedures, and deadlines; they also provide guidance for the exploratory student. Support offices such as the Counseling Center, Student Support Services, the Career Center, and the Office for Institutional Diversity can help students refine their academic interests and goals. Students should refer to specific college, school, and departmental advising materials for details on specific advising programs.

Academic Advising Mission Statement

The mission of academic advisors, both faculty and professional, is to:

- assist students in taking responsibility for developing meaningful education plans compatible with their potential and their career and life goals;
- help students formulate important questions about the nature and direction of their education and assist them in finding answers to those questions;
- assist students in acquiring accurate and timely information regarding academic policies, procedures, and requirements;
- facilitate the successful transition of prospective, continuing and nontraditional students to the academic and campus environment.

Undergraduate Studies

Undergraduate Studies, 109 Miller Hall, provides a home for students who are exploring majors at the University of Kentucky. The professional academic advisors in Undergraduate Studies also contribute to the university’s recruitment efforts, assist students with their transition to the university and between colleges, and provide general academic advising to students from across campus. Undergraduate Studies houses the university’s prelaw and premed advising, Academic Preparation Program advising, National Student Exchange, and transfer student services.

Students may enter Undergraduate Studies because there are many areas that interest them, they are considering a pre-professional field and have not selected an undergraduate major, or they wish to explore their options. Time as an Undergraduate Studies student provides an opportunity to investigate UK’s majors while fulfilling the UK Core requirements. Students can remain in Undergraduate Studies until they have earned 60 credit hours.

Academic advisors in Undergraduate Studies work individually with their assigned students to help them clarify their academic and professional goals, realistically assess their capabilities and options, develop appropriate degree plans, connect with campus resources, and declare a major of interest. Advisors also make referrals to student support services on campus for career interest testing, personal counseling, tutoring, and assistance with study skills. Visit Undergraduate Studies online at www.uky.edu/US or call (859) 257-3383.

Transfer Students

Students interested in transferring to the University of Kentucky can utilize the services of Undergraduate Studies, which serves as a focal point for information concerning programs, resources, and services available to aid the transfer student’s entry and continued success at the University of Kentucky. Advisors are available to answer questions about the transfer process, discuss course equivalencies, and provide both preadmission and general academic advising. UK’s transfer advisor is housed in Undergraduate Studies and divides her time between Miller Hall on UK’s campus and Bluegrass Community and Technical College’s Transfer Center on the Cooper Campus. Contact Sara Price at (859) 257-4428 at UK; (859) 345-6587 at BCTC; or email TransferAdvising@uky.edu.

Within the advising system at the University of Kentucky, both students and advisors have responsibilities.

Students are responsible for:

- knowing the requirements of their particular academic program; selecting courses that meet those requirements in an appropriate time frame; and monitoring their progress toward graduation;
- consulting with appropriate advisors designated to handle the kind of questions or concerns they have;
- scheduling and keeping academic advising appointments in a timely manner throughout their academic career, so as to avoid seeking advising only during busy registration periods; and
- being prepared for advising sessions.

Advisors are responsible for:

- helping students clarify their options, goals and potential, and understand themselves better;
- helping students understand the nature and purpose of a college education;
- providing accurate information about educational options, requirements, policies and procedures; and
- helping students plan educational programs and monitor and evaluate their educational progress.
National Student Exchange
Students attending the University of Kentucky can also attend one of over 200 colleges and universities in the United States and its territories while paying UK tuition and fees through the National Student Exchange (NSE). Students can visit for an academic year or a semester. Likewise, students attending other participating colleges and universities may visit UK. For more information about NSE, visit www.uky.edu/US/nse.html and contact Sarah Montgomery at (859) 257-3044 or nse@uky.edu.

Major Advising
Students who have declared a major are advised by either a faculty member or professional advisor in their college. These advisors, with their in-depth knowledge of a particular field, can provide guidance toward completing degree requirements as well as information regarding careers and long-term educational goals. It is important for students, as soon as they declare a major, to contact their college and request assignment to an advisor.

Pre-Professional Advising
Pre-Law and Pre-Med are not majors at the University of Kentucky, and preprofessional students may choose any undergraduate major based on their interests and strengths. Undergraduate Studies provides campus-wide advising for both prospective and current students considering professional programs in law, medicine, dentistry, podiatry, and optometry. Students are encouraged to contact Undergraduate Studies, 109 Miller Hall, at (859) 257-3383 to be assigned to a Pre-Law or Pre-Law advisor who will support them throughout their undergraduate career in selecting courses, connecting with curricular and co-curricular opportunities, and applying to professional schools. The College of Arts & Sciences, 202 Patterson Office Tower, (859) 257-8712, also offers preprofessional advising for its students.

Pre-Law Study
While a broad, liberal arts education is generally considered to be an excellent preparation for law school, no fixed, comprehensive prelaw curriculum is prescribed by any American law school. In general, prelaw students should develop rigorous study habits; become skilled in clear and logical communication; and select courses that enhance critical reading, writing, and analytical skills.

Law schools do not require or expect a particular undergraduate degree program. Students are advised to consider majors aligned with their interests, strengths, and potential career choices.

Students also are encouraged to explore the websites of law schools in which they are interested and to familiarize themselves with admissions standards at those schools. Almost all law schools require students to take the Law School Admission Test (LSAT). Additional information is available from the Law School Admission Council, www.lsac.org. Another valuable resource is the current ABA-LSAC Official Guide to ABA-Approved Law Schools, published and prepared by the Law School Admission Council and the American Bar Association. This yearly publication and information on the law and lawyers, Pre-Law preparation, applying to law schools, the study of law, and most American law schools is available at: www.lsac.org.

Students interested in law school should meet with a Pre-Law advisor at least once a year while pursuing their undergraduate curriculum, attend prelaw information sessions, visit the prelaw Web site at www.uky.edu/US/pre-law, and subscribe to the prelaw listserv. For additional information, contact a prelaw advisor at pre-law@uky.edu.

Pre-Medical Study
Students are free to choose any major while pursuing their undergraduate degree and fulfilling Pre-Medical requirements. When selecting a major, students should consider subjects they find interesting and challenging, and those in which they perform best. Medical schools do not require a specific major to enter the professional program, but they do have minimum entrance requirements. Most students accepted to medical school earn a bachelor’s degree while satisfying Pre-Med requirements.

Currently the minimum requirements for medical school are:
- 2 semesters of college English or intensive writing courses
- 2 semesters of biology with labs
- 2 semesters of general chemistry with labs
- 2 semesters of organic chemistry with labs
- 2 semesters of physics with labs

Some medical schools have additional requirements beyond the minimum. Check specific medical schools for admissions requirements.

In addition, students are encouraged to take course work in areas such as anatomy, biochemistry, cell biology, calculus, genetics, histology, immunology, microbiology, physiology, psychology, sociology, and statistics.

Students interested in medical school should meet with a premedical advisor at least once a year while pursuing their undergraduate curriculum, attend Pre-Medical information sessions, visit the Pre-Medical Web site at www.uky.edu/US/pre-med, and subscribe to the Pre-Med listserv. For additional information, contact a Pre-Med advisor at pre-med@uky.edu.

Pre-Dental Study
Students are free to choose any major while pursuing their undergraduate degree and fulfilling predental requirements. When selecting a major, students should consider subjects they find interesting and challenging, and those in which they perform best. Dental schools do not require a specific major to enter the professional program, but they do have minimum entrance requirements. Most students accepted to dental school earn a bachelor’s degree while satisfying predental requirements.

Currently the minimum requirements for entering dental school in the state of Kentucky are:
- 2 semesters of college English or intensive writing courses
- 2 semesters of biology with labs*
- 2 semesters of general chemistry with labs
- 2 semesters of organic chemistry with labs
- 1 semester of physics with labs
- 1 semester of microbiology (required by the University of Kentucky College of Dentistry and recommended by the University of Louisville School of Dentistry)
- 1 semester of biochemistry (required by the University of Kentucky College of Dentistry and highly recommended by the University of Louisville School of Dentistry)

*The University of Louisville School of Dentistry has additional biology requirements.

Other dental schools in the country may have different prerequisite courses. Check specific dental schools for admissions requirements.

In addition, students are encouraged to take course work in areas such as anatomy, biochemistry, cell biology, calculus, genetics, histology, immunology, physiology, psychology, and statistics.

Students interested in dental school should meet with a Pre-Dental advisor at least once a year while pursuing their undergraduate curriculum, attend Pre-Dental information sessions, visit the Pre-Dental Web site at www.uky.edu/US/pre-dent, and subscribe to the Pre-Dent listserv.

Pre-Optometry Study
Students are free to choose any major while pursuing their undergraduate degree and fulfilling Pre-Optometry requirements. When selecting a major, students should consider subjects they find interesting and challenging, and those in which they perform best. Optometry schools do not require a specific major to enter the professional program, but they do have minimum entrance requirements. Most students accepted to optometry school earn a bachelor’s degree while satisfying Pre-Optometry requirements.
Although the Commonwealth of Kentucky does not have an optometry school, contract seats are available to legal Kentucky residents at the University of Alabama, Indiana University, and Southern College of Optometry through the Southern Regional Education Board (SREB). Students accepted for the SREB contract program are exempt from the out-of-state tuition. Students are competitively selected by the optometry school to receive a contract seat. Kentucky residency and acceptance into the Doctor of Optometry program does not guarantee a contract seat. Contract availability is subject to change as state legislatures annually review budget expenditures. For the number of contract seats available and more information, contact the specific optometry school.

Pre-Optometry requirements differ but generally include:
- 2 semesters of general chemistry with labs
- 2 semesters of English
- 1 or 2 semesters of mathematics
- 1 or 2 semesters of general biology or zoology with labs
- 1 semester of microbiology with lab
- 2 semesters of general physics with labs
- 1 or 2 semesters of organic chemistry
- 2 semesters of statistics
- 1 or 2 semesters of psychology

Some schools may also require biochemistry, anatomy, and physiology. Check individual optometry schools for specific course requirements.

Students interested in optometry school should meet with a Pre-Optometry advisor at least once a year while pursuing their undergraduate curriculum, attend Pre-Optometry information sessions, visit the Pre-Optometry Web site at www.uky.edu/US/pre-op, and subscribe to the Pre-Med listserv.

**Prepharmacy Study**

In spring 2014 the UK College of Pharmacy revised its prerequisite courses for first-time freshmen entering college in fall 2014 or after. The equivalent of two years (70 semester credit hours) of college-level liberal arts and basic sciences is the minimum requirement for admission to the professional program. The minimum course requirements for admission to UK’s College of Pharmacy are:

- 2 semesters of English*
- 1 semester of introductory biology (with laboratory) (BIO 148) and (BIO 155)
- 1 semester of microbiology (with laboratory) (BIO 208 or BIO 308) and (BIO 209)
- 1 semester of mathematics (Calculus I) or the combination of 1 semester of college algebra and 1 semester of elementary calculus (MA 113 or MA 137) or (MA 109 and MA 123)
- 1 semester of any of the following: principles of microeconomics, principles of macroeconomics, financial accounting, corporation finance (ECO 201, ECO 202, ACC 201, or FIN 300)
- 1 semester of human anatomy (ANA 209)
- 1 semester of elementary physiology (PGY 206)
- 2 semesters of general chemistry (with labs) (CHE 105, CHE 111, CHE 107, CHE 113)
- 2 semesters of organic chemistry (with labs) (CHE 230, CHE 231, CHE 232, CHE 233)
- 1 semester of statistics (BST 330, STA 291 or STA 296)

Students must complete sufficient electives to raise the total hours, including prerequisites, to 70 or more semester hours.

*English requirement for students interested in pharmacy: University of Kentucky students must take courses which satisfy the Composition and Communications I & II requirements. Non-UK students: two semesters of English writing/composition and one semester of basic public speaking will suffice. For questions about this requirement, contact the Prepharmacy Advisor at pharmacyinfo@lsv.uky.edu.*

Prepharmacy courses should be completed by the end of the spring semester prior to the desired fall enrollment, with at least one semester completed in a lecture and lab in organic chemistry, and either anatomy or microbiology by the end of the fall semester prior to the application deadline.

Students are encouraged to take elective courses that satisfy their major requirements. Highly recommended electives include biochemistry, genetics, and physics. Other electives to consider: courses required by major; UK Core courses; PharmD Dual Degree prerequisites (if needed); medical terminology; healthcare-related courses; undergraduate courses in Human Health Sciences (HHS), Public Health (CPH), Clinical Leadership and Management (CLM).

Admission to the college is competitive, based on a holistic review of the application, grade-point average, PCAT scores and interview.

For more information, contact the College of Pharmacy at:

**Pre-Podiatry Study**

Students are free to choose any major while pursuing their undergraduate degree and fulfilling Pre-Podiatry requirements. When selecting a major, students should consider subjects they find interesting and challenging, and those in which they perform best. Podiatry schools do not require a specific major to enter the professional program, but they do have minimum entrance requirements. Most students accepted to podiatry school earn a bachelor’s degree while satisfying prepodiatry requirements.

Currently the minimum requirements for Pre-Podiatry school are:

- 2 semesters of college English or intensive writing courses
- 2 semesters of biology with labs
- 2 semesters of general chemistry with labs
- 2 semesters of organic chemistry with labs
- 2 semesters of physics with labs

In addition, students are encouraged to take course work in areas such as anatomy, biochemistry, cell biology, calculus, genetics, histology, immunology, microbiology, physiology, psychology, and statistics.

Students interested in podiatry school should meet with a Pre-Podiatry advisor at least once a year while pursuing their undergraduate curriculum, attend Pre-Podiatry information sessions, and subscribe to the Pre-Med listserv.
