Animals have many important roles in human societies including the provision of food and fiber, draft power, recreational and athletic activities, and companionship. In addition, animals and their interactions with humans have environmental consequences. Processing, preservation, and quality of animal-derived foods significantly affect human health and economics. Animal Sciences involves studying and applying the basic principles of nutrition, reproduction, and genetics to the production and management of animals including horses, dairy and beef cattle, sheep, swine, poultry, and other domesticated species. Additional course work provides information on production and handling of animal-derived foods.

No one program fits all Animal Sciences students. Students come from varied backgrounds and their interests range from livestock and poultry production and management to marketing and public relations; from public education and extension to graduate training in research and teaching and veterinary medicine. No matter what species you have an interest in, the Animal Sciences major will allow you to combine your interest with your desire for an exciting and rewarding career.

As an Animal Sciences major, students have the opportunity to pursue specific interests by selecting one of three study options: Animal Industry, Food Industry or Pre-Professional. The Animal Industry option is for those interested in animal production and management and allows specialization in one of three areas: livestock, equine, or dairy. The Food Industry option is designed to provide an emphasis on aspects of food processing, chemistry, and safety. The Pre-Professional option is a rigorous study program for students with interests in veterinary sciences, human medicine, and graduate research. Students must consult the pre-professional advisor or graduate school advisor of the university to which they intend on applying for additional or specific requirements.

Career Opportunities
To keep pace with the food, fiber, and recreation requirements of a growing world population, Animal Sciences graduates are needed in the livestock industry and closely related fields. The Animal Sciences major offers considerable flexibility in fulfilling specific career objectives, whether you are interested in working directly with livestock or indirectly in closely related areas such as agribusiness, research, government, or education.

Graduation Requirements
To earn the Bachelor of Science in Animal Sciences, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point standing. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to UK Core requirements, students must complete college, departmental and specialty support requirements.

UK Core Requirements
See the UK Core section of the 2015-2016 Undergraduate Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

**I. Intellectual Inquiry in Arts and Creativity**
Choose one course from approved list ................................................. 3

**II. Intellectual Inquiry in the Humanities**
Choose one course from approved list ................................................. 3

**III. Intellectual Inquiry in the Social Sciences**
Choose one course from approved list ................................................. 3

**IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences**
- CHE 105 General College Chemistry I ............................................. 4
- CHE 111 Laboratory to Accompany General Chemistry I ................. 1

**V. Composition and Communication I**
- CIS/WRD 110 Composition and Communication I ......................... 3

**VI. Composition and Communication II**
- CIS/WRD 111 Composition and Communication II ......................... 3

**VII. Quantitative Foundations**
- MA 123 Elementary Calculus and Its Applications
  or
- MA 113 Calculus I
  or
- MA 137 Calculus I With Life Science Applications......................... 4

**VIII. Statistical Inferential Reasoning**
Recommended:
- STA 210 Making Sense of Uncertainty: An Introduction to Statistical Reasoning ................................................. 3

**IX. Community, Culture and Citizenship in the USA**
- GEN 100 Issues in Agriculture, Food and Environment .................... 3

**X. Global Dynamics**
Choose one course from approved list ................................................. 3

**UK Core hours** ............................................................................ 33

**Graduation Composition and Communication Requirement (GCCR)**
- WRD 203 Business Writing
  or
- WRD 204 Technical Writing ........................................................... 3

**Graduation Composition and Communication Requirement hours (GCCR)** .......................................................... 3

**Premajor Requirements**
- MA 123 Elementary Calculus and Its Applications
  or
- MA 113 Calculus I
  or
- MA 137 Calculus I With Life Science Applications......................... 4

- BIO 148 Introductory Biology I ...................................................... 3
- BIO 152 Principles of Biology II ..................................................... 3
- CHE 105 General College Chemistry I ............................................. 4
- CHE 107 General College Chemistry II .......................................... 3
- CHE 111 Laboratory to Accompany General Chemistry I ............... 1
- CHE 113 Laboratory to Accompany General Chemistry II .............. 2

**Subtotal: Premajor hours** ................................................................ 20

---CONTINUED---
Option A: Animal Industry

Students fulfilling the Major Requirements are eligible for the Animal Industry Option by taking certain required Specialty Support Courses (see below). In addition, students with more specific interests may, but are not required to, choose from three specializations available within this Option.

No Specialization 
(Required Specialty Support only; see below) ............................................. 0

Livestock Specialization 
ASC 300 Meat Science ................................................................. 4
and at least two from:
ASC 340 Poultry Production ......................................................... 2
ASC 404G Sheep Science ............................................................. 4
ASC 406 Beef Cattle Science ......................................................... 4
ASC 408G Swine Production ........................................................ 2
ASC 410G Equine Science ............................................................ 2
ASC 420G Dairy Cattle Science ..................................................... 3

Equine Specialization 
ASC 310 Equine Anatomy ............................................................ 2
ASC 320 Equine Management ....................................................... 3
ASC 410G Equine Science ............................................................ 3

Dairy Specialization 
ASC 420G Dairy Cattle Science ..................................................... 3
ASC 364 Animal Genetics .............................................................. 4
ASC 364 Reproductive Physiology of Farm Animals ....................... 4
ASC 378 Animal Nutrition and Feeding ........................................ 4
ASC 470 Capstone for Animal Agriculture ..................................... 3
ASC 499 Academic Enrichment Experience in Animal Sciences ....... 1

Subtotal: Option A hours ......................................................... 0-5

In addition to the Major Requirements, students choose one of three options:

Option B: Food Industry

Students fulfilling the Major Requirements are eligible for the Food Industry Option by taking certain required Specialty Support Courses (see below) and:

FSC 107 Introduction to Food Science ............................................. 3
ASC 300 Meat Science ................................................................. 4

Subtotal: Option B hours ......................................................... 7

Option C: Pre-Professional

Students fulfilling the Major Requirements are eligible for the Pre-Professional Option by taking certain Specialty Support Courses (see below). Students must consult the pre-professional advisor or graduate school advisor of the university to which they intend on applying for additional or specific requirements.

Pre-Professional Option*

BIO 304 Principles of Genetics ..................................................... 3
CHE 230 Organic Chemistry ....................................................... 12
or
CHE 236 Survey of Organic Chemistry ...................................... 3
CHE 230/231 Organic Chemistry and Laboratory I .................... 4
PHV 211 General Physics ............................................................ 5
PHV 213 General Physics ............................................................ 5

*Students must consult the pre-professional advisor or graduate school advisor of the university to which they will apply for additional or specific requirements.

Subtotal: Specialty Support ....................................................... 18-22

Electives

Electives should be selected to complete the 120 hours required for graduation.

Subtotal: Electives ............................................................... minimum of 18

TOTAL HOURS: ........................................................................... 120
