College of Agriculture, Food and Environment

The The research, teaching, extension, and regulatory functions of the College of Agriculture, Food and Environment are combined into a coordinated, mutually supporting program of undergraduate and graduate education. Teaching in this college is closely related to the other functions thus providing the student with a unique opportunity to broaden his or her background in the areas of research and application of scientific findings to stakeholders.

Degrees and preprofessional programs in the college encompass the entire range of the food, fiber, and agricultural system from farm production and marketing, manufacturing, processing and fabrication through nutrition, hospitality management, and consumer, community, and family sciences.

The School of Human Environmental Sciences is part of the College of Agriculture, Food and Environment. Degree requirements and information pertaining to these programs are listed beginning on page 119 of this Bulletin.

Admission

All students planning to study any phase of agriculture, food or environment, including pre-veterinary medicine, are admitted directly into the College of Agriculture, Food and Environment. Application for admission is made through the Office of Undergraduate Admission.

Students interested in the Landscape Architecture program must meet all requirements for admission to the University. In addition, enrollment in the landscape architecture program is determined by a selective admission procedure. Applicants are selected on a competitive basis as determined by potential success in the program.

Students must apply for the Coordinated Program in Dietetics by February 1 prior to potential admission to year three in the Dietetics Program. For additional information, see page 120.

Accreditation

The undergraduate Forestry program at the University of Kentucky is accredited by the Society of American Foresters. The Landscape Architecture program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. The Food Science program is accredited by the Institute of Food Technologists.

Accreditations for the School of Human Environmental Sciences are listed on page 119 of this Bulletin.

Undergraduate Programs in Agriculture, Food and Environment

The University of Kentucky grants the following degrees in the College of Agriculture, Food and Environment:

- Bachelor of Science in Agriculture
- Bachelor of Science in Agricultural and Medical Biotechnology
- Bachelor of Science in Agricultural Economics
- Bachelor of Science in Animal Sciences
- Bachelor of Science in Career and Technical Education
- Bachelor of Science in Community and Leadership Development
- *Bachelor of Science in Consumer Economics and Family Financial Counseling
- Bachelor of Science in Dietetics
- Bachelor of Science in Equine Science and Management
- Bachelor of Science in Family Sciences
- Bachelor of Science in Food Science
- Bachelor of Science in Forestry
- Bachelor of Science in Horticulture, Plant and Soil Sciences
- Bachelor of Science in Hospitality Management and Tourism
- Bachelor of Science in Human Nutrition
- Bachelor of Science in Landscape Architecture

For fall entry to the Coordinated Program in Dietetics, Upper division program applicants (students who have 71 semester hours of lower division courses) — special application, transcript(s), and recommendations are due by:

- February 1

Information and degree requirements for each program follows. Students may obtain additional information on programs and recommended plans of study from the Center for Student Success.

The undergraduate Forestry program at the University of Kentucky is accredited by the Society of American Foresters. The Landscape Architecture program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. The Food Science program is accredited by the Institute of Food Technologists.

Accreditations for the School of Human Environmental Sciences are listed on page 119 of this Bulletin.

Undergraduate Certificates in Agriculture, Food and Environment

The University of Kentucky grants the following undergraduate certificates in the College of Agriculture, Food and Environment:

- Bachelor of Science in Merchandising, Apparel and Textiles
- Bachelor of Science in Natural Resources and Environmental Science
- Bachelor of Science in Sustainable Agriculture and Community Food Systems

*Pending approval by the UK Board of Trustees and the Council on Postsecondary Education.

Students majoring in biosystems engineering are enrolled in the College of Engineering. Degree requirements and curriculum are listed in the College of Engineering section of this Bulletin. See page 119 of this Bulletin for the list of degree requirements for majors in the School of Human Environmental Sciences.
Undeclared / Exploratory Studies

Students who are interested in the College of Agriculture, Food and Environment but are undecided about a major should work closely with an advisor in the college who will assist them in selecting courses that will fulfill general requirements while exploring the various areas of study in agriculture, food and environment.

Scholarships and Financial Aid

The College of Agriculture, Food and Environment offers scholarship awards to students on the basis of academic accomplishment and involvement in extracurricular activities. Many of the departments in the college employ students in laboratories, greenhouses, barns, and field work in connection with the college’s research programs in agriculture. Information about scholarships and work opportunities is available in the Center for Student Success.

Freshman scholarship applications are due December 1. Continuing and transfer scholarship applications are due April 1. For more information go to: http://students.ca.uky.edu/scholarships.

Academic Advising

Students in the College of Agriculture, Food and Environment are advised by selected faculty or academic coordinators in the department of the student’s major. Students needing assistance selecting an advisor or general information about academics may visit the Center for Student Success.

Inquiries about programs or majors within the College of Agriculture, Food and Environment may be directed to:

College of Agriculture, Food and Environment
Center for Student Success
N24 Ag. Science Center
University of Kentucky
Lexington, KY 40546-0091
859-257-3468

Dean’s List

A student who completes at least 12 credits of “letter” grades with a 3.50 or higher grade-point average with no I grades listed for the fall or spring semester will be named to the Dean’s List in the College of Agriculture, Food and Environment. CLEP, AP, special exam and Independent Study credits are excluded. The student’s cumulative grade-point average is not considered; only the grade-point average for that particular semester is relevant. Exceptional circumstances including fewer than 12 credits will be considered for inclusion on the Dean’s List; students should contact the Center for Student Success for more information.

Graduate Work

Doctor of Philosophy degrees are offered in the following areas: Agricultural Economics, Animal and Food Sciences, Biosystems and Agricultural Engineering, Entomology, Family Sciences, Integrated Plant and Soil Science, Plant Pathology, and Veterinary Science. For more information, visit The Graduate School website at: http://gradschool.uky.edu/.

MINIMUM REQUIREMENTS FOR GRADUATION

NOTE: Except where noted in specific degree programs, students pursuing a Bachelor of Science degree in the College of Agriculture, Food and Environment:

1. Complete UK Core and University graduation requirements;
2. Complete GEN 100: Issues in Agriculture, Food and Environment. Students who transfer into the College and have already completed the UK Core Community, Culture and Citizenship in the USA requirement are not required to take GEN 100;
3. Earn a minimum of 120 credit hours with at least a 2.0 cumulative grade point average and at least a 2.0 grade-point average in major specific courses. Note that “major-specific” refers to all premajor, major, and specialty/professional support courses. Further, note that some programs require more than the minimum 120 credit hours and have higher grade-point average requirements. Remedial courses cannot be counted toward the total hours required for the degree;
4. Complete a minimum of 24 credit hours of major required course work to include a capstone course or other culminating experience;
5. Complete a core of specialty or professional support courses outside their major totaling 18 or more hours at the 200 level or above;
6. Complete a graded, credit-bearing Academic Enrichment Experience (AEE) as specified by the degree program. The AEE may consist of a single course or could involve a series of related courses. Such experiences may include mentored research or teaching, supervised internships, directed service learning, or Education Abroad. Some programs may choose to accept course work from other programs to satisfy this requirement; and
7. Complete a minimum of 45 graded credit hours from upper division courses (300 level and above). Note that some such courses are only offered for P/F grading; in that case, such courses can be counted toward this requirement at the discretion of the College.

B.S. in Agriculture with a major in INDIVIDUALIZED PROGRAMS

Individualized program opportunities have been developed to assist students with academic goals that cross several disciplines.

The procedure for entering an individualized program is as follows:

1. Each student must apply to the Associate Dean for Instruction. The student will receive an explanation of the program and its objectives, and the possible risks involved, including prospective employment and acceptance for advanced graduate degree work.
2. Students who continue their interest in the individualized program develop, with the assistance of an advisor, the plan which they propose to follow.
3. This plan must be submitted to the Associate Dean for consideration and possible approval.
4. Approval of the student’s program by the Associate Dean will admit the student to the individualized program option.

For more information, contact:

College of Agriculture, Food and Environment
Center for Student Success
N24 Ag. Science Center
University of Kentucky
Lexington, KY 40546-0091
859-257-3468
Agricultural and medical biotechnology encompasses cellular and molecular approaches to the manipulation and improvement of agricultural plants, animals and microorganisms, and the control of agricultural pests and diseases. The primary purpose of the baccalaureate degree program in Agricultural and Medical Biotechnology is to train students in modern cellular and molecular biology and genetic engineering. Students will be provided with a firm foundation in the principles of genetics and molecular biology of both prokaryotic and eukaryotic organisms. Each student will then specialize in an area appropriate to his or her interest and career objectives, including: microbial, fungal, plant, insect and mammalian biotechnology.

Graduates will be prepared to assume government, university, and industry positions with research and technology applications to agriculture and food production. Employment opportunities include research scientists, laboratory technicians or managers in university, government, industrial, or clinical laboratories using biotechnological tools for research and production. Examples of research areas include: gene cloning, construction of novel pest and disease resistance genes, development of new immunological and nucleic acid types of diagnostic probes for plant and animal disease, genetic engineering of microorganisms for the production of important pharmaceutical agents, and development of new bioengineered strains of microorganisms for fermentation and food production services. Students will also be prepared to enter graduate programs in agriculture, molecular biology, and the biological sciences.

Graduation Requirements

To earn a Bachelor of Science in Agricultural and Medical Biotechnology the student must complete 125 semester hours with at least a 2.0 grade-point standing. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to the UK Core requirements, students must complete college, premajor, major, and specialty support requirements, including an independent research project relevant to the student’s interest in biotechnology.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

1. Intellectual Inquiry in Arts and Creativity

All students are expected to undertake an independent study project in an area of their interest for a minimum of 3 credit hours. This requirement can be met by a research project or an internship that is agreed upon by a student’s advisor and approved by the Biotechnology Coordinating Committee prior to initiation of the project. Both written and oral reports are required when the project is completed.

Subtotal: Major hours ................................. 34-35

Specialty Support

Hrs

Students must take a minimum of 21 credit hours of specialty support courses that will be selected according to the student’s area of interest with the approval of the academic advisor. Of these 21 credits, a maximum of 9 credits may be ABT prefixed courses. Of the 21 credits, a maximum of 6 credits may be research credits. The remaining 15 credits must be in regularly scheduled courses.

Subtotal: Specialty support hours .................. 21

Electives

Electives should be selected to complete the 125 hours required for graduation.

Subtotal: Electives ........................................ 7-10

TOTAL HOURS: ........................................ 125
BACHELOR OF SCIENCE IN AGRICULTURAL ECONOMICS

The Agricultural Economics program enables graduates to pursue careers in agribusiness and food industries, international marketing and trade, farm management and production, and related opportunities. Opportunities are also available in public policy for agriculture and rural America and environmental economics. These career opportunities may be found in both the private and public sectors. Economic theory is applied to problems concerning the production, marketing, and distribution of agricultural and food products and also to public policy and natural resource and environmental issues facing rural communities.

Agricultural Economics students choose one of three options (1) Agribusiness Management & Food Marketing, (2) Agricultural Economics, or (3) Advanced Studies in Agricultural Economics.

Graduation Requirements

To earn the Bachelor of Science in Agricultural Economics, students must have a minimum of 120 credit hours with at least a 2.0 grade-point average in either of the first two program options or at least a 3.4 grade-point average in the Advanced Studies option. Students must earn a minimum grade of C in each of the five agricultural economics courses required in the major. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to UK Core requirements, students must complete college, departmental and support requirements.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements. NOTE: Students who enter transfer into the College and have already satisfied the UK Core Community, Culture and Citizenship in the USA requirement are not required to take GEN 100.

OPTIONS

1. Agribusiness Management & Food Marketing Option

This option provides a program of study for students interested in careers in marketing, sales, and management of farms or firms involved in production, financing, processing, marketing and distribution of food and agricultural products, depending on the electives chosen.

NOTE: MA 113 or MA 123 satisfies the UK Core Quantitative Foundations requirement and STA 296 satisfies the UK Core Statistical Inference Reasoning requirement. Students must earn a C or higher in MA 113 or MA 123 to take AEC 303 and a C or higher in ECO 201 to take any AEC 300 level or higher course.

3. Advanced Studies in Agricultural Economics Option
This option targets students who plan to pursue graduate study in law (J.D.), business (MBA), public policy (MPA), or other areas including agricultural economics (MS) or international affairs (MA). This option is only available to students who maintain at least a 3.4 cumulative grade-point average. Students that complete this option will receive Departmental Honors in Agricultural Economics. Students in this option that have at least a 3.5 grade-point average in their major coursework are eligible to apply at the end of their Junior year for admission to the Department’s two University Scholar Programs where 12 credit hours from their undergraduate degree may also count towards a master’s degree at UK in Agricultural Economics (MS) or international affairs (MA). Students enrolled in the Lewis Honors College who complete this option will satisfy their 2nd Tier Honors requirements (6 credit hours), Honors Experience requirement (6 credit hours), and Honors Capstone requirement (3 credit hours).

Important: This option requires students to substitute 9 hours of lower-level major elective or specialty support credit with 9 hours of graduate-level course work completed for graduate credit and selected with their advisor’s approval. Graduate-level courses include 500+ level AEC courses and non-AEC courses at the 4000 level or higher.

NOTE: MA 113 satisfies the UK Core Quantitative Foundations requirement and STA 296 satisfies the UK Core Statistical Inferential Reasoning requirement. Students must earn a C or higher in MA 113 to take AEC 303 and a C or higher in ECO 201 to take any AEC 300 level or higher course.

CHE 111 General Chemistry I Laboratory 1
CHE 113 General Chemistry II Laboratory 2

Subtotal: Premajor hours 20

Major Requirements

ASC 101 Domestic Animal Biology 3
ASC 102 Introduction to Livestock and Poultry Production 3
ASC 205 Career Development for Animal Sciences 1
ASC 325 Animal Physiology 3
ASC 362 Animal Breeding and Genetics 4
ASC 364 Reproductive Physiology of Farm Animals 4
ASC 378 Animal Nutrition and Feeding 3
ASC 380 Applied Animal Nutrition 3
ASC 470 Capstone for Animal Agriculture 3

Subtotal: Major hours 37-43

In addition to the Major Requirements, students choose one of three options:

OPTIONS

Option A – Animal Industry

Students fulfilling the Major Requirements are eligible for the Animal Industry Option by taking certain required Specialty Support Courses (see below). In addition, students with more specific interests may, but are not required to, choose from three specializations available within this Option.

No Specialization
(required Specialty Support only; see below) 0

Livestock Specialization
ASC 300 Meat Science 4
and at least two from:
ASC 340 Poultry Production 2
ASC 404G Sheep Science 3
ASC 406 Beef Cattle Science 4
ASC 408G Swine Production 3

Equine Specialization
ASC 310 Equine Anatomy 3
ASC 320 Equine Management 3
ASC 410G Equine Science 3

Dairy Specialization
ASC 420G Dairy Cattle Management 3
ASC 564 Milk Secretion 3

Subtotal: Option A hours 0-5

Option B – Food Industry

Students fulfilling the Major Requirements are eligible for the Food Industry Option by taking certain required Specialty Support Courses (see below) and:

ASC 300 Meat Science 4

PSC 107 Introduction to Food Science 3

Subtotal: Option B hours 7

Option C – Pre-Professional

Students fulfilling the Major Requirements are eligible for the Pre-Professional Option by taking certain Specialty Support Courses (see below). Students must consult the pre-professional advisor or graduate school advisor of the university to which they intend on applying for additional or specific requirements.

Specialty Support

Animal Industry Option
CHE 230 Organic Chemistry I
or
CHE 236 Survey of Organic Chemistry 3

Depending on the student’s area of interest and subject to the advisor’s approval, additional courses at the 200-level or above may be selected from biochemistry, biology, chemistry, physics, statistics, or any agriculture-related area other than Animal Sciences 15

Food Industry Option
CHE 230 Organic Chemistry I
or
CHE 236 Survey of Organic Chemistry 3

FSC 304 Animal Food Products 4

Depending on the student’s area of interest and subject to the advisor’s approval, additional courses at the 200-level or above may be selected from biochemistry, biology, chemistry, physics, statistics, or any agriculture-related area other than Animal Sciences 12

Pre-Professional Option*
BIO 304 Principles of Genetics 3
or
ABT/ENT 360 Genetics 3-4

CHE 230/231 Organic Chemistry and Laboratory I 4
CHE 232/233 Organic Chemistry and Laboratory II 4

PHY 211 General Physics 5

PHY 213 General Physics 5

*Students must consult the pre-professional advisor or graduate school advisor of the university to which they will apply for additional or specific requirements.

Subtotal: Specialty Support 18-22

Electives

Electives should be selected to complete the 120 hours required for graduation.

Subtotal: Electives minimum of 18

TOTAL HOURS: 120

BACHELOR OF SCIENCE IN BIOSYSTEMS ENGINEERING

Biosystems engineering provides an essential link between the biological sciences and the engineering profession. This linkage is essential for the development of production and processing systems involving biological materials that preserve our natural resource base. Students have the latitude to develop an area of specialization relating to bioenvironmental engineering, food and bioprocessing, machine systems, or controlled environment engineering. The curriculum is also ideal preparation for those students wanting to pursue a graduate or professional degree in biomedical engineering or veterinary medicine through pre-biomedical engineering and pre-veterinary medicine options.

The degree requirements and curriculum are listed in the College of Engineering section of this Bulletin.
BACHELOR OF SCIENCE IN CAREER AND TECHNICAL EDUCATION

Students pursuing a degree in Career and Technical Education complete courses in education and agriculture. Graduates with this degree pursue careers in both formal and informal education in agriculture. Formal education opportunities include teaching in the middle school or high school classroom. Informal education opportunities include working in Extension and the public or private sectors of industry. In addition to receiving the degree, graduates attain Rank III teaching certification in Agricultural Education.

Teacher Certification

Besides receiving the B.S. in Career and Technical Education, students completing the requirements obtain a letter of endorsement to teach agricultural education.

Requirements for teacher certification are as follows:

You must be admitted to the teacher education program (TEP) after you have completed, or complete during the semester in which you apply, 60 semester hours of course work and AED/FCS 110 Introduction to Career and Technical Education and have at least a 2.75 grade-point standing (on a 4.0 scale). See a full description of “Admission, Retention, and Completion from Teacher Education Programs” in the College of Education section of this Bulletin.

Applicants are evaluated on an interview, recommendations, scholastic achievement, demonstrated skills, and professional commitment and goals. A student’s progress is continuously monitored, assessed, and reviewed throughout the teacher education program as described in the Teacher Education Programs section of this Bulletin. You must successfully complete assessment items and portfolio items as required. Further, you must successfully complete the Principles of Learning and Teaching Exam and a professional exam, scoring above cutoff scores specified by the State Board of Education for each exam. After completing these exams, students hired by Kentucky schools will complete a one-year paid internship as a first-year teacher and will be evaluated at least three times by a three-person committee before certification is completed.

Note: Because graduation and teacher certification requirements change frequently, students should obtain more complete information from their advisors.

Graduation Requirements

To earn the Bachelor of Science in Career and Technical Education, the student must have a minimum of 120 credit hours with at least a 2.75 grade-point average (required for Teacher Certification). A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:

**UK Core Requirements**

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity

Choose one course from approved list .................. 3

II. Intellectual Inquiry in the Humanities

Choose one course from approved list .................. 3

III. Intellectual Inquiry in the Social Sciences

CLD 102 The Dynamics of Rural Social Life ............. 3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences

Choose one course from approved list .................. 3

V. Composition and Communication

CIS/WRD 110 Composition and Communication I ........ 3

VI. Composition and Communication II

CIS/WRD 111 Composition and Communication II ...... 3

VII. Quantitative Foundations

Choose one course from approved list .................. 3

Agricultural Education Requirements

*AEC 302 Agricultural Management Principles .................. 4

AEN 252 Fabrication and Construction for Technical Systems .................................. 3

ASC 101 Domestic Animal Biology .................................. 3

ASC 102 Introduction to Livestock and Poultry Production .................................. 3

CLD 102 The Dynamics of Rural Social Life (or other Social Science elective) .................. 3

ECO 201 Principles of Economics I .................................. 3

PLS 210 The Life Processes of Plants or PLS 386 Plant Production Systems .................. 3

**PLS 366 Fundamentals of Soil Science .................................. 4

Subtotal: Agricultural Education hours .......................... 26-27

*ECO 201 is a prerequisite for AEC 302.

**PLS 366 is a prerequisite for PLS 386.

Specialty Support Requirements

Students must complete one additional agricultural economics course, one additional animal sciences course, one additional agricultural engineering course, two additional plant and soil sciences courses, and three additional courses in the College of Agriculture, Food and Environment in consultation with your advisor.

Subtotal: Specialty Support .................................. 24

Other agriculture majors can also qualify to teach agricultural education provided they meet current certification requirements.

Electives

Electives should be selected by the student to lead to the minimum total of 120 hours required for graduation.

Subtotal: Electives .................................. minimum of 7

Total Minimum Hours for Program .......................... 120

BACHELOR OF SCIENCE IN COMMUNITY AND LEADERSHIP DEVELOPMENT

Community and Leadership Development is an interdisciplinary social science major. It provides students with the knowledge and skills to integrate communications, sociology, journalism, and community development theories and apply them to real-world situations involving local communities and agricultural organizations.

The major focuses on such skills as written and oral communication; strategic problem solving; critical thinking; understanding of group, organizational, and community dynamics; and ethical decision making.

Graduation Requirements

To earn the Bachelor of Science in Community and Leadership Development, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point average. A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:
UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements. The UK Core courses listed below are recommended by the College to fulfill each area.

I. Intellectual Inquiry in Arts and Creativity
Choose one of the following:
A-S 245 Introduction to Web Design
A-S 280 Introduction to Photographic Literacy
LA 111 Living on the Right Side of the Brain .............. 3

II. Intellectual Inquiry in the Humanities
Choose one of the following:
EGR 201 Literature, Technology, and Culture
ENG 230 Introduction to Literature (Subtitle required)
ENG 264 Introduction to Black Writers
GWS 100 The World of Language ................................... 3

III. Intellectual Inquiry in the Social Sciences
CLD 102 The Dynamics of Rural Social Life .................. 3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences
Choose one of the following:
PLS 104 Plants, Soils, and People: A Science Perspective
ANT 230 Introduction to Biological Anthropology
BIO 102 Human Ecology
GEO 130 Earth’s Physical Environment
GEO 135 Global Climate Change
EES 120 Sustainable Planet:
The Geology of Natural Resources ......................... 3

V. Composition and Communication I
CIS/WRD 110 Composition and Communication I ........ 3

Total Minimum Hours for Program ........ 120

BACHELOR OF SCIENCE IN EQUINE SCIENCE AND MANAGEMENT

The horse industry is a dynamic industry that encompasses not only the breeding, raising and training of horses but also the development of activities for the use of the horse in sports and recreation. The industry has a significant economic impact across the U.S. and world-wide.

Equine science and management involves the study and application of science and business concepts to the horse industry. Additional course work supports learning in areas that aid in breeding and raising horses and marketing the industry. Students come from varied equine backgrounds but have a common interest in the horse. Regardless of which breed of horse or activity focus students have, equine science and management majors will have the opportunity to combine their interest in the horse with a desire to become active participants in the horse industry.

Students in equine science and management considering a career in veterinary medicine or graduate research can meet those goals in the degree program as well. Interested students need to consult with an advisor to ensure all specific academic requirements are met.

Career Opportunities

The horse industry is continually changing. Equine science and management graduates are needed in all aspects of the industry including production, business management and other related support industries.

Graduation Requirements

To earn the Bachelor of Science in Equine Science and Management, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point average. A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

### Emphasis Areas

**Equine Science**

This area will provide the students with a strong background in basic sciences which will prepare them for graduate school or careers such as laboratory research assistants, breeding technicians, pharmaceutical sales representatives, and technical representatives for the feed industry.

- ASC 220 Applied Animal Behavior and Welfare
- ASC 311 Advanced Equine Evaluation
- ASC 325 Animal Physiology of Farm Animals
- ASC 364 Reproductive Physiology
- ASC 378 Animal Nutrition and Feeding
- ASC 380 Applied Animal Nutrition
- ASC 389 Advanced Equine Nutrition and Feeding
- ASC 4100 Equine Science
- EQM 300 Topics in Equine Science and Management
- PLS 366 Fundamentals of Soil Science
- PLS 510 Forage Management and Utilization
- VS 307 Genetics of Horses
- VS 500 Advanced Equine Reproduction
- VS 507 Advanced Horse Genetics

**Subtotal: Emphasis hours** **21**

### Equine Management and Industry

Students will learn skills related to marketing, operations, and management of equine businesses. This will prepare students for careers as farm managers as well as business managers for equine enterprises, breed associations, and sales associates. This area also introduces them to the diversity of the equine industry through courses in equine law, sales, careers, event planning, marketing, and human resources.

- AEC 305 Food and Agricultural Marketing Principles
- AEC 312 Equine Markets
- AEC 320 Agricultural Product Marketing and Sales
- or
- MKT 300 Marketing Management
- AEC 324 Agricultural Law
- AEC 325 Equine Law
- AEC 340 Human Resource Management in Agriculture
- EQM 210 Tools and Tack in the Equine Industry
- EQM 300 Topics in Equine Science and Management
- EQM 301 Thoroughbred Sales
- EQM 340 Equine Facility Design and Management

**Subtotal: Emphasis hours** **21**

### Communications and Leadership

Students who are interested in leadership roles in business, breed associations or non-profit equine organizations and cooperative extension should consider this area. They will enhance their communication skills and be required to take courses in community dynamics, leadership development, and agriculture communication.

- CLD 102 The Dynamics of Rural Social Life
- CLD 230 Intrapersonal Leadership
- CLD 260 Community Portraits
- CLD 320 Community and Communication: Exploring Their Intersections
- CLD 400 Agricultural Communications Campaigns
- CLD 401 Principles of Cooperative Extension
- CLD 402 Principles of Leadership
- CLD 403 Leadership and Communication
- CLD 404 Contemporary Leadership Applications
- CLD 430 Leading in Communities: Vision, Action, and Change
- CLD 495 Topical Seminar in Community and Leadership Development (Subtitle required)
- CLD 530 Fundamentals of Organizational Leadership
- EQM 300 Topics in Equine Science and Management
- EQM 302 Equine Event Planning

**Subtotal: Emphasis hours** **21**

### Specialty Support Requirement

The student will choose, in consultation with an advisor, at least 18 hours of courses at the 200 level or above that will strengthen the program in an area of importance to the student. To aid in developing this area of study, a list of suggested courses is available from your advisor. The list includes courses in agricultural economics, animal sciences, community and leadership development, marketing, management, finance, plant and soil sciences plus other areas of study at UK.

**Subtotal: Specialty Support** **18**

### Electives

Electives should be selected by the student to lead to the minimum total of 120 hours required for graduation.

**Subtotal: Electives** minimum of **3**

**Total Minimum Hours for Program** **120**

---

**BACHELOR OF SCIENCE IN FOOD SCIENCE**

Food science is the study of the transformation of biological materials into food products acceptable for human consumption. This requires studying diverse scientific disciplines related to food, including chemistry, engineering, microbiology, biochemistry, toxicology, and management; and effectively applying the industrial and practical aspects to product development, food processing, preservation, and marketing. The program is administered by the Department of Animal and Food Sciences and offers training in the basic sciences and in the fundamentals of food science.

Career opportunities in food industries include: management, research and development of new food products and ingredients, process supervision, quality control, procurement, distribution, sales, and merchandising. Positions include sales and services in allied industries; consulting and trade association activities; and promotional and educational services. Governmental agencies employ food scientists whose work is directed towards research, regulatory control, and the development of food standards.

### Graduation Requirements

To earn the Bachelor of Science in Food Science, the student must complete a minimum of 120 semester hours with at least 45 hours from courses at the 300 level and above. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree.

The Food Science program meets the requirements for accreditation by the Institute of Food Technologists and the National Organization of Food Science Professionals.

Each student must complete the following:

**UK Core Requirements**

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

BACHELOR OF SCIENCE IN FORESTRY

Kentucky boasts many forested areas with famous reputations, such as Natural Bridge, Red River Gorge, Daniel Boone National Forest, and Robinson Forest. Robinson Forest is one of the largest research and educational forests in the eastern United States. It is managed by the Department of Forestry and Natural Resources, and as a forestry student at the University of Kentucky all of its resources will be available to you as a unique outdoor laboratory.

The missions of the Department of Forestry and Natural Resources are to identify and address the challenges and opportunities facing sustained management of our renewable natural resources, including forests, soils, water, and wildlife. These missions involve three interrelated functions: search, extension, and education. The research goal of the department is to obtain basic and applied information leading to wise and effective management of our natural resources. Forestry extension seeks to inform land owners and the general public about forest stewardship. Forestry education prepares students for careers as forestry and natural resource professionals. The objectives of the required courses in the forestry curriculum are to educate and train students in the communication, managerial, scientific, processing, and administrative skills and principles related to the stewardship and utilization of renewable natural resources. Accomplishment of these objectives will ensure a continuing supply of entry-level professionals for Kentucky and the nation.

The undergraduate (B.S.) program leading to the professional degree in forestry is accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation as the accrediting agency for forestry in the United States. Additionally, you may become certified by The Wildlife Society if you choose appropriate elective courses.

Career Opportunities
Forestry graduates are employed as professional foresters in private forest industries and organizations, consulting companies, and public agencies, including the U.S. Forest Service, Soil Conservation Service, and state, county, or urban forestry programs. Graduates are also qualified to be research technicians in government, university, and private laboratories, or may continue their studies in specialized graduate programs.

The inclusion in the curriculum of management and processing principles makes UK forestry graduates attractive to the forest products industry; graduates are often employed as technical specialists, managers, and marketing and wood procurement personnel.

Graduation Requirements
To earn the Bachelor of Science in Forestry, the student must complete a minimum of 121 semester hours. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree.

Students will complete a field semester in the spring of their junior year. Throughout the spring field semester, students will visit numerous sites to see different ecosystems in the region. Students will periodically return to one site, or sample property, that will be used for in-depth analysis to show integration and application of field semester concepts.

The curriculum consists of UK Core requirements, preprofessional, professional, and specialty support components. Preprofessional, professional, and specialty support courses provide the skills and understanding to manage forest resources. Electives, chosen with the assistance of your advisor, strengthen your knowledge of basic principles in areas of special interest to you.

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

### BACHELOR OF SCIENCE IN HORTICULTURE, PLANT AND SOIL SCIENCES

The Horticulture, Plant and Soil Sciences degree program is designed to provide students with the knowledge and skills needed for a career in the production and management of plants and soils for food, fiber, forage, oil, recreation, landscaping and the enhancement of the human environment. Graduates have the technical and scientific skills as well as the communication, computational, leadership, and interpersonal capabilities necessary to function effectively as professionals. Careers are as diverse as they are challenging. Each Option prepares graduates for specific professional opportunities.

#### Options
- Students pursuing a Horticulture, Plant and Soil Sciences degree may choose from the following Options:
  - Horticulture Enterprise Management
  - Turfgrass Science
  - Crops and Livestock
  - Crop, Soil and Horticulture Science

#### Graduation Requirements
- Students must complete a minimum of 120 semester credit hours with at least 45 credit hours from courses at the 300 level or above. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree. In addition to the UK Core and college requirements, students must select an Option with the assistance of an advisor and fulfill the area’s program requirements.

#### UK Core Requirements
- See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

| I. Intellectual Inquiry in Arts and Creativity | Choose one course from approved list | 3 |
| II. Intellectual Inquiry in the Humanities   | Choose one course from approved list | 3 |

#### Professional Electives
- Nine hours of professional electives. In general, the professional electives should be a 300-level or above course. If a student wants to take a course not on the forestry program’s professional elective list, the student must receive approval from the Department of Forestry and Natural Resources Undergraduate Programs Committee.

| Subtotal: Professional electives | 9     |

#### Electives
- Elective courses should be selected by the student to lead to the minimum total of 121 hours required for graduation.

| Subtotal: Electives | 3     |

| TOTAL HOURS          | 121   |

---

**College of Agriculture, Food and Environment**

**University of Kentucky**

**2019-2020 Undergraduate Bulletin**

109
**Minor in Animal Sciences**

**Prerequisites**
Note that several classes in Group A and Group B have prerequisites beyond/other than ASC 101. These are indicated in parentheses following the courses below. Students taking the minor are responsible for satisfying the prerequisites.

**Minor Requirements**
ASC 101 Domestic Animal Biology ..................... 3
ASC 102 Introduction to Livestock and Poultry Production (ASC 101) ........................ 3
or
ASC 382 Animal Production Principles .......................... 3
Additional Course Work ................................. 9
At least 9 credit hours must be selected from the list that follows (Groups A and B). At least one course must be selected from Group A and one course from Group B.

**Group A**
ASC 300 Meat Science (ASC 101, 102) ................. 4
ASC 325 Animal Physiology (BIO 152) ..................... 3
ASC 362 Animal Breeding and Genetics (ASC 101 and BIO 152) ..................... 4
ASC 364 Reproductive Physiological Ecology of Farm Animals (ASC 101 and BIO 152) ................. 4
ASC 378 Animal Nutrition and Feeding (ASC 101 and CHE 230 or 236) ................. 3
ASC 380 Applied Animal Nutrition (ASC 378) ................. 3

**Group B**
ASC 340 Poultry Production (ASC 101 or 102) .......... 2
ASC 404G Sheep Science (ASC 300, 362, 364, 378) ................. 4
ASC 406 Beef Cattle Science (ASC 300, 362, 364, 378) ................. 4
ASC 408G Swine Production (ASC 101, 102) ................. 3
ASC 410G Equine Science (ASC 310, 364, 378) ................. 3
ASC 420G Dairy Cattle Management (ASC 325, 364, 378) ................. 3

**Total Hours Required** ......................... 15

Additional specialty support classes may be selected in consultation with your academic advisor for a total of 21 hours in specialty support.

**Subtotal: Specialty Support** .................. 21

**Electives**
Elective courses should be selected by the student to lead to the minimum total of 120 hours required for graduation.

**Subtotal: Electives** ................ minimum of 1

**TOTAL HOURS:** .................. 120

---

### BACHELOR OF SCIENCE IN LANDSCAPE ARCHITECTURE

The profession of landscape architecture has grown out of the tradition of the great garden designers of Italy, France, England, and China to encompass the art and science of design, planning, and management of the land. The science of landscape architecture is concerned with the conservation and management of natural resources. The art of landscape architecture is concerned with the creation of more enjoyable, comfortable, and safe outdoor areas where human use requires adaptation of the natural environment.

This four-year professional program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. Landscape architecture employment opportunities may be found in the designing of urban communities, plazas, university campuses, institutional grounds, parks and recreational areas, commercial and industrial sites, and residential communities, as well as in the areas of historic preservation, regional planning, and mine reclamation.

**Admission Requirements**
Admission to the University of Kentucky and to the College of Agriculture, Food and Environment does not guarantee admission to the Landscape Architecture program. All applicants must be reviewed by the Landscape Architecture Program Chairperson. The number of applicants ultimately admitted is determined by the resources available to provide high quality instruction. Applicants will be reviewed on a comparative basis. Determination of acceptability into the program is based on the following:

**Entering freshmen and transfer students from degree programs other than Landscape Architecture must:**

1. submit a formal application to the Undergraduate Admissions Office indicating Landscape Architecture as your major;
2. meet the minimum criteria for admission or readmission to the University as specified in this Bulletin (The Landscape Architecture program requires a minimum of a 2.0 grade-point average on a 4.0 scale for eligibility to transfer into the program); and
3. successfully complete the aptitude testing designated by the Landscape Architecture program.

If a student transferring from another degree program has a background in related design fields, he or she may submit available work, such as a portfolio or other work examples, as an indication of potential success.

Transfer students from degree programs in Landscape Architecture at other accredited institutions must:
1. submit a formal application to the Office of Undergraduate Admissions indicating Landscape Architecture as your major;
2. meet the minimum criteria for admission to the University as specified in this Bulletin (The Landscape Architecture program requires a minimum of a 2.0 grade-point average on a 4.0 scale for eligibility to transfer into the program); and
3. submit a portfolio for review which, combined with an evaluation of courses completed, will determine acceptance into the program as well as the level to which the student will be accepted.

Graduation Requirements
To earn a Bachelor of Science degree in Landscape Architecture, the student must have 128 semester hours with at least a 2.0 grade-point standing (on a 4.0 scale). Remedial courses may not be counted toward the total hours required for graduation. In addition to satisfying the UK Core requirements, each student must complete pre-major, professional, and specialty support requirements. The Landscape Architecture program policy requires a student to achieve a C grade or better in major design studios in order to advance to the next level.

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity

SOC 360 Environmental Sociology ......................... 3

Select one additional course from the 300-500 series with advisor assistance ........................................... 3

Subtotal: Specialty Support .... minimum of 17

Electives
Electives should be selected by the student to lead to the minimum total of 128 hours required for graduation. Electives may be chosen from the Landscape Architecture Topical Studies or other university courses at any level.

Subtotal: Electives .................................................. 3

TOTAL HOURS: ........................................... 128

BACHELOR OF SCIENCE IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE

The program in Natural Resources and Environmental Science is designed to provide students with the knowledge and skills needed for a career in the rapidly growing fields of environmental science, natural resource management, and environmental policy. With global climate change and an inter-connected world economy, the conservation and management of our natural resources and sustainability of our natural environment is becoming an issue for all societies. This curriculum provides students with exposure to a broad array of disciplines that are essential in approaching issues of natural resources, environmental quality, and environmental sustainability. Experiential learning is a key component in the curriculum. As a result, graduates have the capacity to integrate perspectives and diverse bodies of knowledge in dealing with environmental resource management problems.

All students in the program take a common core of major requirements which is designed to provide exposure to technical and socioeconomic dimensions of natural resource management and policy. Important components of the core requirements are a required three-week summer camp, a pre-professional internship or research experience, and a senior capstone course that is problem based. In addition to the core requirements, all students must complete nine hours of course work in both an Analytical Skill Development Area (ASD) and an Environmental System Emphasis Area (ESEA). This allows students to match analytical skills to an area of particular interest in conservation biology, natural resource planning, environmental soil science, water resources, forestry, wildlife management, agricultural sustainability, geological processes, or related areas. Courses completed for the ASD and ESEA are selected from a list of choices in each area. Students are required to complete an off-campus internship or a research experience that is related to their ESEA and/or ASD. NRES majors have completed internships in several foreign countries, although most are conducted within the U.S. with organizations such as the National Park Service, the U.S. Forest Service, with local nature preserves, an Alaskan salmon recovery program, a national laboratory, environmental consulting...
firms, private corporations, and both state and local governments. All seniors apply their coursework and experiential learning to the senior capstone course which focuses on a well-defined natural resource issue, requires group collaboration and problem-solving, and involves actual stakeholders.

Graduates of the Natural Resources and Environmental Science degree program move on to graduate work or careers. Many graduates continue their studies in Masters or Ph.D. programs or go on to law school. Most graduates begin careers as aspiring environmental professionals in both the public and private sector. Additional employment opportunities exist in environmental education, journalism, and work with nonprofit organizations which have environmental concerns.

Graduation Requirements

To earn a Bachelor of Science in Natural Resources and Environmental Science, a student must complete at least 120 semester hours of credit with at least a 2.0 cumulative grade-point average. A minimum of 45 credits must be from upper division courses (300-level and above). Remedial courses may not be counted toward the total degree hours. In addition to the UK Core requirements, students must complete College requirements, premajor and major requirements, and complete an internship or research experience. With advisor approval, students select and Analytical Skill Development and an Environmental System Emphasis Area which focuses course work in a student’s area of interest.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity

NRE 471 Senior Problem in Natural Resources and Environmental Science .......................... 4
PLS 366 Fundamentals of Soil Science ............................ 4
*NRE 320 is a three-week summer camp field data collection experience. The student will attend this camp after the sophomore or junior year. This camp exposes the student to a wide range of natural resource techniques and concepts, including aquatic ecology, soil and plant sciences, wildlife and forestry, and waste management.

Subtotal: Major hours ............................................. 44-47

Analytical Skill Development (ASD) and Environmental System Emphasis Areas (ESEA)

Students must select one area within Analytical Skill Development and one Environmental System Emphasis Area and complete nine hours of course work in each area from the list of courses provided below. Students must select from the courses listed under each ASD and ESEA but may request one (1) substitute course per ASD and ESEA, subject to approval by both their academic advisor and the DUS. For the 18 hours of ASD and ESEA course work, all classes must be 200-level or above and at least twelve (12) credit hours must be in 300-level or above courses. Classes taken to complete the ASD requirement may not count towards the ESEA course requirement and vice versa. Research experiences, internships, or apprenticeships cannot be used to satisfy the ASD and ESEA requirements, including individualized options.

Analytical Skill Development Areas

1. Economic and Policy Analysis
Economic and Policy Analysis – The economic and policy analysis skill development area will provide students with the theoretical and analytical tools necessary to evaluate the economic and social effects of resource and environmental issues. The policy courses will help students understand how environmental policy is made, the public agencies that manage resources, and how policies are evaluated for impact on humans and the environment.

AEC 309 International Agriculture, World Food Needs and U.S. Trade in Agricultural Products .......................... 3
AEC 483 Regional Economics ........................................ 3
AEC 532 Agricultural and Food Policy ................................ 3
AEC/NRE 545 Resource and Environmental Economics .................................................. 3

FOR 400 Human Dimensions of Forestry and Natural Resources .......................... 3
GEI 235 Environmental Management and Policy ................ 3
GEI 316 Environment and Development .......................... 3
GEI 431 Political Ecology ............................................. 3

2. Field and Laboratory Analysis of Ecosystems
Students will learn the theory and application of sample data collection and techniques, field and laboratory analysis, statistical analysis, and data interpretation required to evaluate the quality of water, soil, and ecosystem resources. This analytical skill development area is geared towards students pursuing careers as environmental science and protection scientists/technicians and forest and conservation scientists/technicians.

ENT/BIO 300 General Entomology ................................ 3
BIO 325 Ecology ..................................................... 4
BIO 351 Plant Kingdom .............................................. 3
BIO/NRE 420G Taxonomy of Vascular Plants .................. 4
BIO 559 Ornithology .................................................. 4
EES 230 Fundamentals of Geology .................................. 3
ENT/FOR 502 Forest Entomology .................................... 3

FOR 221 Winter Dendrology ......................................... 1
FOR 510 Herpetology .................................................. 4
FOR 520 Mammals of the Eastern United States ............... 4
PLS 396 Soil Judging .................................................. 1-2
PLS 468G Soil Use and Management ............................. 3
3. Geospatial Analysis

Geospatial technologies are often used in conjunction with traditional natural resource and environmental scientist job requirements. This development area will provide students with enhanced skills beyond the major requirements in the use of geospatial software, approaches, and products. Students will learn the theory and application required to address a variety of environmental conditions. This analytical skill development area is geared towards students wishing to pursue careers that depend on extensively applying geospatial technologies to natural resources and environmental science issues or advanced study in geospatial science.

FOR 200 Basics of Geospatial Technology .................. 3

5. Individualized Analytical Skill Development

With advisor approval, a student may submit a request for an individualized ASD. The written proposal must include a memo explaining the rationale, a list of proposed courses for the ASD, an explanation of how those courses meet the intent of the ASD, and a copy of the student’s Plan of Study which includes the proposed course work. The written proposal must be submitted to the DUS for Steering Committee approval.

Environmental System Emphasis Areas

1. Conservation Biology

The conservation biology emphasis area will provide students with knowledge of the ecological underpinnings and organismal biology of conservation biology. Depending on the courses chosen, students will: (1) gain a solid foundation in field botany by learning tree identification and by developing a taxonomic framework for plant identification; (2) become familiar with the mammals, birds, reptiles and amphibians of Kentucky and surrounding states; (3) gain an introduction to the vegetation, flora and forests of Kentucky and surrounding states; and (4) develop an understanding of ecosystem pattern and process. Students who choose courses in this environmental systems emphasis area may be qualified to pursue careers with organizations dedicated to the preservation, conservation, and management of habitat, and related rare species preservation. Other opportunities include nature preserve manager, natural resource educator, naturalist, biological inventories and assessment, and environmental consulting. This emphasis area also prepares students for graduate studies in ecology, evolutionary biology, zoology, or botany.

FOR 540 Urban Ecology .............................................. 3
FOR/GEO 570 Landscape Ecology for Natural Resources .... 3
NRE/PLS 455G Wetland Delineation ............................ 3

2. Forestry

The forestry emphasis area provides students with knowledge in dendrology (the study of trees and silviculture (the cultivation, growing, and management of trees). In dendrology students will learn basic concepts of botany of woody species, and their use, along with basic soil and site characteristics used in the identification of trees and forest vegetation. In silviculture students will learn the basics of ecologically-based management of forest ecosystems to achieve a desired objective. Students who choose this emphasis area may be qualified to pursue careers in natural resource management with an emphasis on forest systems. [Note: Students with a B.S. in Forestry from a Society of American Foresters (SAF) accredited forestry program may be more competitive for certain forestry jobs. The NRES program is not an SAF accredited program.]

*Students are strongly encouraged to take these key courses.

3. Human Dimensions and Natural Resource Planning

The human dimensions and natural resource planning emphasis area will provide students with an understanding of the interaction between society and natural systems and provide students with the skills and knowledge for tomorrow’s effective conservation leaders. This emphasis area does this by building upon the core NRES curriculum with course work and internship experience focused on land planning, legal aspects of land and water, landscape ecology, biogeography, and geospatial technologies. Private foundations and government entities are funding land conservation efforts, and there is the opportunity for advanced study in a variety of graduate programs.

4. Soil Science

Students choosing this emphasis area will learn about the dynamic and interrelated processes taking place within the thin skin of the Earth (i.e., Critical Zone) and the services provided by these processes to ensure adequate and sustainable feed, fuel and fiber production, clean air and water, and healthy habitats. Topics covered include bioremediation, phytoremediation, soil fertility, microbiology, soil chemistry, biogeochemistry, etc. Students completing this emphasis area will be equipped to evaluate soils for a range of management options, and be eligible for positions with public and private agencies (e.g., the Natural Resource Conservation Service, Environmental Protection Agency, U.S. Department of Agriculture, Environmental Consulting Firms, etc.)

PLS 396 Soil Judging .................................................. 3
PLS 406 Advanced Soil Judging .................................... 1
PLS/NRE 455G Wetland Delineation ............................ 3
PLS 468G Soil Use and Management ............................. 3
PLS/NRE 470G Soil Nutrient Management ................... 3
PLS 566 Soil Microbiology ............................................ 3
PLS 573 Soil Morphology and Classification .................. 3
PLS 575 Soil Physics .................................................... 3
GEO 351 Physical Landscapes ...................................... 3
EES 530 Low Temperature Geochemistry ..................... 3

5. Water Resources

The water resources emphasis area will provide students with a fundamental understanding of the hydrologic cycle so that students understand how climate, soils, vegetation, and land-use affect the amount, timing and quality of water. Use of this information is important in natural resource management so that one may determine where water resource management objectives are compatible and where they conflict with other resource management objectives. Ultimately, students will gain an understanding of the role of watershed management and multiple use in planning and implementing natural resource programs while becoming familiar with current issues in watershed management and water resources.

AEN 461G Biometeorology ......................................... 3
BAE 532/CE 542 Introduction to Stream Restoration ....... 3
BAE 538 GIS Applications for Water Resources ............. 3
BAE/CE 547 Watershed Sedimentation .......................... 3
6. Wildlife Ecology and Management

This emphasis area will provide opportunities for students to gain knowledge and experience, understand fundamental concepts, and develop basic skills in the area of wildlife ecology and management. The curriculum provides students with the option to meet certification requirements to become a registered Associate Wildlife Biologist with The Wildlife Society. To do this, students will need to complete additional course work. For more information visit: http://wildlife.org/learn/professionaldevelopment-certification/certificationprograms/

8. Earth System Sciences

The Earth Systems Science emphasis area will provide context for understanding the processes that operate within and at the interface between Earth’s lithosphere, biosphere, atmosphere, and hydrosphere, and at their overlap with human systems. The emphasis area is designed to provide students with a foundation in the physical, chemical, and biological Earth systems that underpin our environment and human interactions. The curriculum is designed to provide students with the knowledge and skills necessary to understand and address complex environmental issues, including climate change, biodiversity loss, and human-induced environmental degradation. Students will gain a deep understanding of the interactions between the Earth’s systems and how these interactions influence human societies and the environment.
College of Agriculture, Food and Environment

Graduation Composition and Communication Requirement (GCCR)
SAG 310 Cultural Perspectives on Sustainability ............... 3
SAG 490 Integration of Sustainable Agriculture Principles ......................... 3
Subtotal: Graduation Composition and Communication hours (GCCR) .............. 6

Premajor Requirements
BIO 148 Introductory Biology I ......................................... 3
BIO 152 Principles of Biology II .................................... 3
CHE 104 Introductory General Chemistry ......................... 3
CHE 108 Introduction to Inorganic, Organic and Biochemistry Without Laboratory .... 3
DHN 212 Introductory Nutrition ........................................ 3
ECO 201 Principles of Economics I .................................... 3
Subtotal: Premajor hours ................................................. 18

Major Requirements
Environmental Stewardship Cluster
ASC 382 Animal Production Principles ................................ 3
PLS 366 Fundamentals of Soil Science .................................. 4
PLS/SAG 386 Plant Production Systems ................................. 4
Economic Profitability Cluster
AEC 302 Agricultural Management Principles ................. 4
AEC 305 Food and Agricultural Marketing Principles ................. 3
AEC 445G Introduction to Resource and Environmental Economics ............... 3
Social Responsibility Cluster

SOC 360 Environmental Sociology ...................................... 3
CLD/SOC 420 Sociology of Communities ............................ 3
or
CLD/SOC 517 Rural Sociology ............................................... 3
Subtotal: Major hours ....................................................... 42

Specialty Support
Students must declare one program track in the SAG major.

Community Food Systems Track
Students must declare one track in the SAG major. At least 12 hours must come from this single track, with 9 additional credits selected from supporting courses in either program track, or other supporting courses at the 200-level or above, with approval by the student’s academic advisor. For the Community Food Systems Track, select 12 hours from the following courses in consultation with your academic advisor. Additional course work, including education abroad credit and special topics courses, may be appropriate to fulfill this requirement, but must be approved in advance by the student’s academic advisor. All track course work must be taken for a grade, not pass/fail.

AEC 309 International Agriculture, World Food Needs and U.S. Trade in Agricultural Products .................................................. 3
ASC 310 Introduction to Sustainable Agriculture and Community Food Systems ......................... 3
SAG 310 Cultural Perspectives on Sustainability ............... 3
SAG 397 Apprenticeship in Sustainable Agriculture .............. 3

MINORS IN AGRICULTURE, FOOD, AND ENVIRONMENT

Minor in Agricultural Economics

Preprofessional Requirement
ECO 201 Principles of Economics I ...................................... 3

Minor Requirements
Two courses selected from:
AEC 302 Agricultural Management Principles ...................... 4
AEC 303 Microeconomic Concepts in Agricultural Economics ................. 3
AEC 305 Food and Agricultural Marketing Principles ...................... 3

In addition, students should select 9 hours from other agricultural economics courses. A maximum of 3 credit hours from AEC 312, 313, 314, 315, or 341 may be credited to the minor. AEC 399 may not be included.

Minor in Animal Sciences

Prerequisites
Note that several classes in both Group A and Group B have prerequisites beyond ASC 101. These are indicated in parenthesis following the courses below. Students taking the minor are responsible for satisfying the prerequisites.

Minor Requirements

ASC 101 Domestic Animal Biology ........................................... 3
ASC 102 Introduction to Livestock and Poultry Production (ASC 101) or
ASC 382 Animal Production Principles .................................... 3

Additional Course Work ....................................................... 9
At least 9 credit hours must be selected from the list that follows (Groups A and B). At least one course must be selected from Group A and one course from Group B.

Group A
ASC 300 Meat Science (ASC 101, 102) ...................................... 4
ASC 325 Animal Physiology (BIO 152) .................................... 3
ASC 362 Animal Breeding and Genetics (ASC 101 and BIO 152) ................. 4
ASC 364 Reproductive Physiology of Farm Animals (ASC 101 and BIO 152) .... 4
ASC 378 Animal Nutrition and Feeding (ASC 101 and CHE 230 or 236) ......... 3
ASC 380 Applied Animal Nutrition (ASC 378) ................................ 3

Group B
ASC 340 Poultry Production (ASC 101 or 102) ......................... 2
ASC 404G Sheep Science (ASC 300, 362, 364, 378) ..................... 4
ASC 406 Beef Cattle Science (ASC 300, 362, 364, 378) ................. 4
ASC 408G Swine Production (ASC 101, 102) .......................... 4
ASC 410G Equine Science (ASC 310, 364, 378) .......................... 3
ASC 420G Dairy Cattle Management (ASC 325, 364, 378) ................. 3

Total Hours Required ....................................................... 15

</table>

*Forestry majors may not select FOR 340 or FOR 400 to count towards the Minor Electives. Forestry majors must select one of the other courses listed under the Minor Electives.*

---

*Image and raw text content provided by the University of Kentucky - 2019-2020 Undergraduate Bulletin*
The Undergraduate Certificate in Distillation, Wine and Brewing Studies (DWBS) is inclusive of students from all departments and colleges at the University of Kentucky. The Departments of Animal and Food Sciences; Biosystems and Agricultural Engineering; Chemistry; Chemical and Materials Engineering; History; Horticulture; Plant and Soil Sciences; Retailing and Tourism Management; and Writing, Rhetoric and Digital Studies are all engaged in DWBS. Three key student learning outcomes comprise the DWBS and are accomplished through a cluster of courses:

- Students will comprehend the breadth of the career opportunities in the DWBS industry.
- Students will be able to identify key technical methods and analytical skills required in the DWBS industry.
- Students will be capable of outlining the history of DWBS and clearly explain how this relates to human cultures.

UK is offering this program because, (a) this industry represents the science of one of the oldest products linked to human civilization; thus, education opportunities span a breadth of disciplines; and (b) this is a global industry that provides a wide and inter-disciplinary range of careers. The curriculum was developed due to an urgent need to train people in this area as identified by the local industries. The Bluegrass is home to nearly 95 percent of the production of bourbon, one of the world’s premier distilled spirits. There are over 70 wineries in the area as well, in addition to numerous large and small breweries. The program is suited to an undergraduate certificate rather than a minor because the undergraduate certificate creates a framework for students from programs across the UK to gain a certificate without changing their major/minor of interest, which is congruent with the interdisciplinary nature of the career opportunities available in this space.

The DWBS is affiliated with the Department of Horticulture in the College of Agriculture, Food and Environment (CAFE). The DWBS will complement the undergraduate B.S. program in Horticulture, Plant and Soil Science by providing additional opportunities for students already interested in these industries (e.g., in wine-growing) to delve into the related areas of wine-making.

Distillation, wine and brewing industries form a multi-billion dollar industry with a myriad of careers in science, engineering and the arts. Regionally, Kentucky is famous for bourbon production and in 2013 the industry surpassed 5 million barrels in over 40 distilleries worth more than $8 billion/year. Current estimates suggest Kentucky employment may now number 10,000 within the bourbon industry alone.

Further, approximately 25 new craft and full scale distillers are opening in the coming year with a shortage of trained intellectual infrastructure identified recently as a major hurdle to growth (by the Kentucky Distillers Association Technical Committee Meeting). There are over 70 wineries that also demand trained and knowledgeable employees, and a thriving craft beer movement has been established in the past 5 years.

Despite Kentucky being a landmark destination for producers, few courses focused on this industry have been delivered in the past at UK. The proposed certificate pedagogy will engage an inter-disciplinary team that will align certificate enrollees with skills and knowledge of career options. Intellectual infrastructure will immediately benefit the career opportunities and serve a rapidly growing industry.

The DWBS certificate program is designed to be applicable across many of the current UK academic majors. Most obviously, the DWBS would serve students in the colleges of Agriculture, Food and Environment; Arts & Sciences; Business & Economics; Education; and Engineering. However the DWBS is designed to also attract students from other colleges and units based on interest.

### Distilling, Wine and Brewing Studies Curriculum

The Certificate in Distilling, Wine and Brewing Studies curricula are as follows:

- A minimum of 12 credits of course work taken for a letter grade.
- At least 12 credits must be 200 level or above, and a minimum of 6 credits must be at the 300-level or above.
- The student must complete a 3-credit breadth component. The breadth component requires that a student take courses in at least two colleges, with a minimum of three credits to be completed in a discipline other than the student’s major.

</table>

Students must complete a minimum of 12 hours from the list of courses in the chart above. A&S 306 and PLS 335 are required. Students will select an additional 6 hours from the list of elective courses to complete the certificate.
Undergraduate Certificate in Food Systems and Hunger Studies

Career opportunities related to food systems and hunger are expanding domestically and abroad. However, there are limited academic programs that prepare the workforce with a comprehensive approach focused on the impact of food systems on food security and health. The 12-credit hour Certificate in Food Systems and Hunger Studies provides students with a cross-disciplinary approach to understanding the impact of food systems on food security, hunger, and the overall health and wellness of a community. Through structured experiential learning opportunities, students will apply knowledge of food systems and the environment to develop and implement evidence-based strategies to end hunger in both the United States and globally.

The Certificate in Food Systems and Hunger Studies will complement numerous majors and minors offered on campus, but through a multidisciplinary approach and structured experiential learning opportunities tailored towards the interests and professional goals of the student. Students completing the certificate will have the basic knowledge and skills to provide thoughtful and impactful strategies to promote a sustainable food system and fight hunger and related issues.

All undergraduate students in good standing at the University of Kentucky are invited to declare the Certificate in Food Systems and Hunger Studies and complete the required coursework and certificate activities. Students must earn a C or better in each required certificate course to receive the certificate.

**Required Courses**

- SAG 210 Introduction to Sustainable Agriculture and Community Food Systems .........................3
- DHN 318 Hunger, Food Behavior, and the Environment .................................................................3
- DHN 319 Seminar in Hunger Studies ..................................................1
- DHN 320 Experiential Learning in Hunger Studies ............................................................2
- plus 3 hours of pre-approved elective course work at the 200-level or above. The elective course work includes pre-approved courses as well as additional course work (3 hours), such as education abroad credit and special topics courses, that are appropriate to fulfill this requirement and should be approved in advance by the Certificate Director.

**Pre-Veterinary Medicine (Non-Degree)**

Students interested in becoming veterinarians may enroll in the College of Agriculture, Food and Environment at the University of Kentucky and complete their requirements for admission to veterinary school. Most students completing a science-based degree program can complete pre-vet requirements at the same time. Pre-veterinary advising is available for any UK student.

Although the Commonwealth of Kentucky does not have a school of veterinary medicine, it is a participating member of the Southern Regional Education Board plan, under which legal Kentucky residents may attend the Auburn University College of Veterinary Medicine. Each year 38 qualified Kentucky students are chosen from Kentucky to enter the Auburn program. There is also a plan whereby three legal Kentucky residents may be accepted by the Tuskegee University College of Veterinary Medicine each year.

Admission is on a competitive basis with the final selection being made by a committee from each of the veterinary schools. Pre-veterinary studies is not a degree program, but a pre-professional curriculum. It is strongly recommended that all pre-veterinary students choose a degree goal early in their college career. Although it is possible to complete pre-vet requirements in three years, the majority of students accepted to veterinary school have a B.S. or B.A. degree.

Due to the high level of competition for admission to any veterinary school, a student should maintain at least a 3.2 academic standing on all college work. The average overall GPA for students accepted to veterinary schools is approximately 3.6. All required courses must have a grade of C or greater.

Most US veterinary schools use the Veterinary Medical College Application Service (VMCAS) application. The following is a list of courses for Auburn College of Veterinary Medicine requirements. However, some changes in the pre-veterinary curriculum may go into effect during the school year. The student has the responsibility to work closely with his or her pre-veterinary advisor in making certain that all requirements are met for consideration for acceptance.

All advanced placement credit for required courses must have prior approval by Dr. Dwyer.

Auburn does not accept correspondence credit for required courses, except for Animal Nutrition.

**Auburn’s Pre-Veterinary Curriculum**

Written Composition** .................................................................6
- Literature (e.g. ENG 251)** ...............................................................................3 or 6
- Fine Arts (e.g. MUS 100)** ...............................................................................3

- Consult advisor.
- **Students should contact a UK pre-veterinary advisor regarding approved courses.
- ***Check with pre-veterinary advisor for approved courses.
- **Science electives must be two of the following courses: BIO 304, BIO 350 or ASC 325, BIO 398, ASC 342, ASC 364, BIO 561 or BIO 563, BIO 344, PHY 213.

Auburn strongly urges students to take organic chemistry and physics courses at a four-year college or university.

**Tuskegee’s Pre-Veterinary Curriculum**

- Chemistry w/Lab ........................................................................4
- Organic Chemistry w/Lab ..............................................................................4
- Biochemistry w/Lab .....................................................................................4
- Physics w/Lab ..............................................................................................8
- Advanced Biology (300 level or above) .....................................................................9
- ASC 101 Domestic Animal Biology ........................................................................3
- ASC 378 Animal Nutrition and Feeding ....................................................................3
- Mathematics .................................................................................................6
- English .........................................................................................................6
- Social Sciences/Humanities ..............................................................................6
- Liberal Arts .....................................................................................................6
- Advanced Biology Electives ..............................................................................8
- Medical Terminology .....................................................................................1

The student has the responsibility to work closely with his or her pre-veterinary advisor in making certain that all requirements are met for consideration for acceptance.

All pre-veterinary students who enter veterinary school without obtaining an Animal Science degree and petition UK for one later must fulfill the departmental requirements for an Animal Science degree. In order to be eligible for the B.S. in Animal Sciences, students must have completed all UK Core courses, all college requirements and all of the required core courses and production courses required in the Animal Sciences degree program.
SCHOOL OF HUMAN ENVIRONMENTAL SCIENCES

Human Environmental Sciences provides science-based programs concerned with the interactions of individuals and families within multiple environmental contexts, including social, cultural, economic, and political. The specialized areas of study prepare graduates for professional roles through academic work, practicum or field experience, and research with a focus on improving quality of life for individuals and families throughout the lifespan.

There are three departments in the School of Human Environmental Sciences – Dietetics and Human Nutrition; Family Sciences; and Retailing and Tourism Management. Each department offers both undergraduate and graduate study. For more information, visit: http://hes.ca.uky.edu/.

Undergraduate Programs in Human Environmental Sciences

The University of Kentucky grants the following degrees in the School of Human Environmental Sciences:

- Bachelor of Science in Consumer Economics and Family Financial Counseling
- Bachelor of Science in Dietetics
- Bachelor of Science in Family Sciences
- Bachelor of Science in Hospitality Management and Tourism
- Bachelor of Science in Human Nutrition
- Bachelor of Science in Merchandising, Apparel and Textiles

Unique Features of the School Facilities and Services

The School oversees the Research Center for Families and Children and the Family Center. The Family Center is a learning laboratory for students who provide services to students, staff, and community members. The Department of Retailing and Tourism Management oversees the Betty D. Eastin Costume Collection and the Textiles Quality Research Laboratory. The Department of Family Sciences includes two research labs. The Family Interaction Research Lab (FIRL) features equipment to measure family interactions, including psychological arousal and electrical brain activity. The Family Social Science Research Center includes equipment to complete random digit dialing research. The Department of Dietetics and Human Nutrition operates the Lemon Tree Restaurant and the Nutritional Assessment Laboratory.

Scholarships

Over fifty scholarships are awarded each year to undergraduate and graduate students enrolled in the School of Human Environmental Sciences. Information about scholarships is available from the College of Agriculture, Food and Environment Scholarship Office, N-8 Ag Science Building.

Advising

All students are assigned an advisor during their first semester in a program in the School of Human Environmental Sciences. For more information about programs or advising, contact:

Center for Student Success
N24 Ag. Science Center
University of Kentucky
Lexington, KY 40506-0091
859-257-3468

DEPARTMENT OF DIETETICS AND HUMAN NUTRITION

The Department of Dietetics and Human Nutrition provides sound undergraduate and graduate programs in foods and nutrition, and is concerned with research and extension services. The department offers the Bachelor of Science in Dietetics and the Bachelor of Science in Human Nutrition. A post-baccalaureate dietetic internship is also offered.

Visit us on the web at: http://dhn-hes.ca.uky.edu/.

Admission Policy

Admission to the University is sufficient for lower-division admission to the human nutrition and dietetics majors. However, lower-level admission to the majors or any admission to the University does not guarantee upper-division admission to either of the degree programs in the Department of Dietetics and Human Nutrition. In general, admission depends upon the qualifications and preparation of applicants, as well as the availability of resources for maintaining quality instruction.

Upper-division admission into the human nutrition or dietetics degree programs is necessary in order to be granted a baccalaureate degree from the Department of Dietetics and Human Nutrition. Students who have attained a 2.8 or higher grade-point average in the premajor component required for all students in the Department of Dietetics and Human Nutrition will be assured admission.

To be considered for upper-division admission to either the human nutrition or dietetics undergraduate degree programs, an applicant must fulfill the following requirements:

1. Enrollment in the University of Kentucky. (Students are considered for acceptance by the Department only after acceptance by the University of Kentucky.);
2. Completion of the premajor component (premajor courses include: CHE 105, CHE 107, CHE 111, CHE 113, BIO 148, DHN 212, and DHN 241) required for all students within the Department of Dietetics and Human Nutrition with a minimum premajor course work grade-point average of 2.8.*
3. Submission of an application form to the Department of Dietetics and Human Nutrition Academic Coordinator.

* A student can repeat a premajor course to meet this GPA requirement. If a student repeats the course as one of their three University-accepted repeat options only the repeat grade will be factored into the premajor course work GPA. If a student repeats the course outside of the University-accepted repeat options then the course grades will be averaged and then factored into the premajor course work GPA.

Applications from students outside the University of Kentucky seeking admission to the Human Nutrition or Dietetics degree programs, whether for upper-division or lower-division status, must be received by the University Admissions Office no later than April 15 (first summer session); May 15 (second summer session); August 1 (fall semester); and December 1 (spring semester).

Students enrolled in other UK programs on campus should apply for admission prior to the priority registration period. (The appropriate deadlines are listed in the University calendar for approved times to change major.)

Lower-division students enrolled in the Department of Dietetics and Human Nutrition should apply for upper-division admission to the Human Nutrition Program or Didactic Program in Dietetics during the semester they are completing the premajor course work. The application for upper-division admission should be made before the priority registration period for the upcoming semester.
Successful completion of the DPD curriculum enables graduates to apply to a ACEND-accredited supervised practice program, SPP, in a post-baccalaureate Dietetic Internship.

Upon successful completion of the Dietetic Internship the individual is eligible to sit for the national registry exam administered by the Commission on Dietetic Registration, CDR, the credentialing agency of the AND, which grants use of the nationally recognized credential “RD” Registered Dietitian.

Graduates of the UK DHN Option A may apply for placement in the Dietetic Internship program offered by the Department of Dietetics and Human Nutrition, School of Human Environmental Sciences, or any other ACEND-accredited dietetic internship outside the department. Students must consider the highly competitive scenario in competing for acceptance into a Dietetic Internship.

Option B, designated as the Coordinated Program in Dietetics, CP, provides the foundation knowledge requirements provided by the academic component of dietitian education (see DPD above) and an ACEND-accredited supervised practice component. Students who have completed the premajor requirements and are interested in the Coordinated Program to attain the academic preparation and supervised practice program through the UK DHN Dietetics Program may apply for admission to Option B, the CP. Option B requires three additional semesters of didactic course work in the major requirements prior to beginning the 1,200 hour supervised practice program. Students in the CP must successfully complete the didactic and supervised practice component to receive the B.S. in Dietetics degree.

The ACEND-accredited CP is a selective admission program. Admission to the University of Kentucky DHN Dietetics Program does not guarantee admission to the Coordinated Program, CP. A limited number of students who have completed the required preprofessional courses will be admitted on the basis of cumulative grade-point average, potential qualities for becoming a successful dietitian, leadership potential and professional involvement and commitment.

The application deadline for the UK DHN CP is February 1, prior to potential fall admission in Year Three of the Dietetics Program. Year Three of the Dietetics Program is the beginning of the Major Requirements for completion of course work. Program application materials should include an application form, a letter of professional goals and qualifications, three letters of reference, and record of academic performance.

The CP Admissions Committee considers grade-point average, letter of application, work experience, honors and extracurricular activities and letters of recommendation. Students who apply to the UK DHN CP will be granted an interview where the applicant’s goals, communication skills, knowledge of the profession, and organizational and leadership skills are evaluated.

Successful CP applicants will be notified of provisional acceptance into the CP before UK’s priority registration dates for the ensuing fall semester. Final acceptance depends on successful completion of the work in progress at the time of the application and throughout the remaining didactic component prior to beginning the supervised practice component of the undergraduate dietetics program.

Transfer students are urged to contact the DHN Academic Coordinator, 203 Funkhouser Building, for a preliminary evaluation of credits well in advance of the application date. Year Three of the Dietetics Program is the beginning of the Major Requirements for completion of course work. CP applicants must be a declared major in the UK DHN dietetics program or if a transfer student, indicate intent to declare dietetics as their major. Students accepted into the CP must be majors in the UK DHN dietetics program.

Successful completion of Option B, the UK DHN CP, results in the Bachelor of Science in Dietetics degree. Graduates of Option B are eligible to sit for the national registry exam administered by the Commission on Dietetic Registration, CDR, the credentialing agency of the AND, which grants use of the nationally recognized credential “RD” Registered Dietitian.

The UK DHN ACEND-accredited Dietetic Internship, DI, selects competitive students who have completed a Didactic Program in Dietetics at UK or other ACEND-accredited institutions. Qualified graduates compete for a limited number of positions in the UK DHN DI. For information regarding the UK DHN Dietetic Internship, the application and/or screening procedures, please contact:

Director, Dietetic Internship Program
203 Funkhouser Building
University of Kentucky
Lexington, KY 40506-0054

Degree Requirements

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 124-133 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

1. Intellectual Inquiry in Arts and Creativity
Choose one course from approved list .......................... 3

---

**BACHELOR OF SCIENCE IN DIETETICS with a major in Dietetics**

Dietetics prepares professionals who are recognized for expertise in food and nutrition. Graduates of the University of Kentucky Dietetics Program are prepared to apply to an accredited Dietetic Internship program to become Registered Dietitians to function as entry level professionals with opportunities for practice in medical nutrition therapy, community dietetics, food systems management, and/or the business of dietetics. Becoming a registered dietitian involves a combination of academic preparation, including a minimum of a baccalaureate degree, and a supervised practice component and successfully passing the registration examination for dietitians.

The UK DHN Dietetics Program offers two options to earn a bachelor’s degree in dietetics. Option A is the Didactic Program in Dietetics (DPD) and Option B is the Coordinated Program in Dietetics (CP). Both options lead to the Bachelor of Science in Dietetics and fulfill the foundation knowledge and/or competencies established by the Accreditation Council for Education in Nutrition and Dietetics, ACEND, the accrediting agency for the Academy of Nutrition and Dietetics, AND. The DPD and the CP are both fully accredited by ACEND. Option B, CP, is a selective admission program to which students must apply prior to beginning the major course work in the third year of the dietetics program.

Option A, designated as the Didactic Program in Dietetics, DPD, focuses on the foundation knowledge requirements provided by the academic component of dietitian education. A student must be a declared dietetics major in the Department of Dietetics and Human Nutrition to complete the DPD. Students must attain a cumulative grade-point average of 2.4 or above to progress into course work designated as major requirements.
Major Requirements

Prior to beginning the major requirements, students should indicate a choice of Option A or Option B with the UK DHN Academic Coordinator, 203 Funkhouser Building. Option B is a selective admissions program.

Option A – Didactic Program in Dietetics (DPD)

DHN 480 Dietetics Pre-Professional Practice .................. 1-6
Subtotal: Option A ......................................................... 1-6

Option B – Coordinated Program in Dietetics (CP)

Option B requires the student to apply to admission to the CP after completion of premajor requirements. See Bulletin for details.

DHN 510 Advanced Nutrition ........................................ 3
DHN 512 Medical Nutrition Therapy I ............................ 4
DHN 514 Dietetics: Counseling and Communication Theories and Applications .................... 3
DHN 517 Medical Nutrition Therapy II ............................ 3
Subtotal: Major hours ................................................. 41

Option Requirements

One option must be completed concurrently with the major requirements stated above.

OPTIONS

- Option A – Didactic Program in Dietetics (DPD)
- Option B – Coordinated Program in Dietetics (CP)

Requests for applications or further information may be directed to:

University of Kentucky
Lexington, KY 40506-0054

BACHELOR OF SCIENCE IN HUMAN NUTRITION

with a major in Human Nutrition

The Bachelor of Science in Human Nutrition offers appropriate preparation for further study in nutritional sciences and health-related sciences, particularly public health, pharmacy, medicine, dentistry, physical therapy, physician assistant school, optometry, and nutrition research.

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 120 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in the Humanities

**DEPARTMENT OF FAMILY SCIENCES**

The Department of Family Sciences is committed to offering quality programs for students preparing to work with individuals and families in various settings including schools, private and public social agencies, and business. The focus is on enhancing the quality of life for families. Undergraduate programming is at an applied level using an interdisciplinary approach from the perspectives of individual and family development, family resource management, and family systems.

The department offers a major in family sciences. Students in the family sciences major earn the degree Bachelor of Science in Family Sciences. A minor in family sciences is available.

Family sciences prepares students to work with individuals and families in unique ways. Positions include coordinators of community education and outreach, family management, residential care, family financial management, research and planning, and social service workers. Students completing the program are eligible to apply to become certified family life educators through the National Council on Family Relations. Contact the Department of Family Sciences, 315 Funkhouser Building, 859-257-7750, for more information about this optional credential.

Visit us on the Web at: [http://fam-hes.ca.uky.edu/](http://fam-hes.ca.uky.edu/).

Subtotal: Major hours 30

**Professional Support**

In addition to the major requirements, each student in consultation with his or her academic advisor will select a minimum of 18-21 credits in course work in a university-recognized minor. At least 12 of these hours must be at the 300 level or above. A minor is a structured group of courses that leads to considerable knowledge and understanding of a subject. Suggested minors include Psychology, Sociology,
Gender and Women’s Studies, Anthropology, Economics, Political Science, Appalachian Studies, Business, Communication, Health Promotion, Human Nutrition, Community and Leadership Development, etc.

Students must contact the department responsible for the minor program for guidance and advice.

**Subtotal: Professional Support ............ 18-21**

**Electives**

Electives at the 300 level or above to reach 120 credits including sufficient credits to reach 45 hours at the 300 level or above. Work with an advisor to select additional FAM classes if available.

**Subtotal: Electives ........................................ 7**

Plus 12 additional hours in family sciences with at least 6 hours at the 300-level or above.

---

**DEPARTMENT OF RETAILING AND TOURISM MANAGEMENT**

The Department of Retailing and Tourism Management is committed to excellence in teaching, service and research resulting from innovative interdisciplinary education with a global, product, and consumer focus. Students build competencies for outstanding business and customer service in retail and hospitality organizations in a changing society. Opportunities are provided for experiential education through industry-related work experiences, internships, study tours, and exchange programs. Graduates are prepared for careers in the merchandising, hospitality and tourism industries in the developing experience economy. The department offers the Bachelor of Science in Hospitality Management and the Bachelor of Science in Merchandising, Apparel and Textiles.

---

**BACHELOR OF SCIENCE IN HOSPITALITY MANAGEMENT AND TOURISM**

The Hospitality Management and Tourism program focuses on the specialized knowledge needed for careers in the hospitality industry. The degree develops graduates who are consumer and technology focused within the service industry. Course work integrates hospitality marketing strategies, communications and financial management through a curriculum focused on management of facilities and operations that provide hospitality services to the public.

The curriculum challenges students to exercise an integration of creativity and business components for various tourism services such as, Food & Beverage, Lodging, Attractions, Convention and Meeting Planning, Non-Profit Management, and Special Event Coordinating. The hospitality and tourism industries are rapidly growing; as the United States’ second largest employer, a degree in Hospitality Management and Tourism provides many career opportunities for graduates.

Internships are a required component of the program, which can lead to permanent professional placement. The internship provides students with first-hand experience in hospitality and tourism related fields, allowing them to exercise classroom knowledge in a real-world setting. Visit us at: [http://rtm-hes.ca.uky.edu/content/bachelor-science-hospitality-management-and-tourism](http://rtm-hes.ca.uky.edu/content/bachelor-science-hospitality-management-and-tourism).

**Entrance Requirement**

The minimum grade-point average for entrance of all students into the Hospitality Management and Tourism program is 2.30.

**Progression Requirement**

In addition, students must have completed the following pre-major courses with a grade of C or better in order to progress to courses which are major requirements:

- CS 101, ACC 201, ACC 202, ECO 201, ECO 202, HMT 120, HMT 210, DHN 241, and HMT 270.

**Graduation Requirement**

Students must fulfill all prerequisites and achieve a grade of C or better in all DHN and HMT courses which are major requirements.

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 120 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

---

**UK Core Requirements**

See the **UK Core** section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

1. **Intellectual Inquiry in Arts and Creativity**
   - Choose one course from approved list .......................... 3

  - MAT 247 Dress and Culture .................................. 3
  - RUS 372 Experiments in Life and Russian Art: Russian Culture 1900-Present .......... 3

**Subtotal: Diversity Requirement hours .............. 6**
**BACHELOR OF SCIENCE IN MERCHANDISING, APPAREL, AND TEXTILES**

The Merchandising, Apparel, and Textiles program blends creativity with business components to develop graduates who are consumer and technology focused. Students study concepts and develop skills necessary for understanding market trends, retail strategies, and industry structures that facilitate the development, sourcing, marketing, and merchandising of consumer goods and services in the domestic and international marketplace.

The curriculum challenges students to exercise resourceful thinking in business operations, merchandising strategies, and the interrelationships of people, technology, and materials. Course work is designed to match industry expectations and intended to provide students with the knowledge and experience they will need to understand trends and applications in the merchandising, apparel, and textiles industries.

Internships are a required component of the program, which can lead to permanent professional placement. The internship provides students with first-hand experience in merchandising, apparel, and textiles related fields, allowing them to exercise classroom knowledge in a real-world setting. Visit us at: [http://rtm-hes.ca.uky.edu/content/bachelor-science-merchandising-apparel-and-textiles](http://rtm-hes.ca.uky.edu/content/bachelor-science-merchandising-apparel-and-textiles).

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 120 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

**UK Core Requirements**

See the [UK Core section of this Bulletin](#) for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.
