The research, teaching, extension, and regulatory functions of the College of Agriculture, Food and Environment are combined into a coordinated, mutually supporting program of undergraduate and graduate education. Teaching in this college is closely related to the other functions thus providing the student with a unique opportunity to broaden his or her background in the areas of research and application of scientific findings to stakeholders.

Degrees and preprofessional programs in the college encompass the entire range of the food, fiber, and agricultural system from farm production and marketing, manufacturing, processing and fabrication through nutrition, hospitality management, and consumer, community, and family sciences.

The School of Human Environmental Sciences is part of the College of Agriculture, Food and Environment. Degree requirements and information pertaining to these programs are listed beginning on page 118.

Admission

All students planning to study any phase of agriculture, food or environment, including pre-veterinary medicine, are admitted directly into the College of Agriculture, Food and Environment. Application for admission is made through the Office of Undergraduate Admission.

Students interested in the Landscape Architecture program must meet all requirements for admission to the University. In addition, enrollment in the landscape architecture program is determined by a selective admission procedure. Applicants are selected on a competitive basis as determined by potential success in the program.

Students must apply for the Coordinated Program in Dietetics by February 1 prior to potential admission to year three in the Dietetics Program. For additional information, see page 119.

Accreditation

The undergraduate Forestry program at the University of Kentucky is accredited by the Society of American Foresters. The Landscape Architecture program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. The Food Science program is accredited by the Institute of Food Technologists.

Accreditations for the School of Human Environmental Sciences are listed on page 118 of this Bulletin.

Undergraduate Programs in Agriculture, Food and Environment

The University of Kentucky grants the following degrees in the College of Agriculture, Food and Environment:

- Bachelor of Science in Agriculture
- Bachelor of Science in Agricultural and Medical Biotechnology
- Bachelor of Science in Agricultural Economics
- Bachelor of Science in Animal Sciences
- Bachelor of Science in Career and Technical Education
- Bachelor of Science in Community and Leadership Development
- Bachelor of Science in Consumer Economics and Family Financial Counseling
- Bachelor of Science in Dietetics
- Bachelor of Science in Equine Science and Management
- Bachelor of Science in Family Sciences
- Bachelor of Science in Food Science
- Bachelor of Science in Forestry
- Bachelor of Science in Horticulture, Plant and Soil Sciences
- Bachelor of Science in Hospitality Management and Tourism
- Bachelor of Science in Human Nutrition
- Bachelor of Science in Landscape Architecture
- Bachelor of Science in Merchandising, Apparel and Textiles
- Bachelor of Science in Natural Resources and Environmental Science
- Bachelor of Science in Sustainable Agriculture and Community Food Systems

Information and degree requirements for each program follow. Students may obtain additional information on programs and recommended plans of study from the Center for Student Success.

The college offers minors in agricultural economics, animal sciences, community and leadership development, entomology, family sciences, food science, pest management, plant and soil science, sustainable agriculture, technical systems management, and wildlife biology and management.

Students majoring in biosystems engineering are enrolled in the College of Engineering. Degree requirements and curriculum are listed in the College of Engineering section of this Bulletin.

See page 118 of this Bulletin for the list of degree requirements for majors in the School of Human Environmental Sciences.

Undergraduate Certificates in Agriculture, Food and Environment

The University of Kentucky grants the following undergraduate certificates in the College of Agriculture, Food and Environment:

- Distillation, Wine and Brewing Studies
- Food Systems and Hunger Studies

Undeclared / Exploratory Studies

Students who are interested in the College of Agriculture, Food and Environment but are undecided about a major should work closely with an advisor in the college who will assist them in selecting courses that will fulfill general requirements while exploring the various areas of study in agriculture, food and environment.

Scholarships and Financial Aid

The College of Agriculture, Food and Environment offers scholarship awards to students on the basis of academic accomplishment and involve-
Doctor of Philosophy degrees are offered in the following areas: Agricultural Economics, Animal and Food Sciences, Biosystems and Agricultural Engineering, Entomology, Family Sciences, Integrated Plant and Soil Science, Plant Pathology, and Veterinary Science. For more information, visit The Graduate School website at: www.research.uky.edu/gs/.

MINIMUM REQUIREMENTS FOR GRADUATION

NOTE: Except where noted in specific degree programs, students pursuing a Bachelor of Science degree in the College of Agriculture, Food and Environment:

1. Complete UK Core and University graduation requirements;
2. Complete GEN 100: Issues in Agriculture, Food and Environment. Students who transfer into the College and have already completed the UK Core Community, Culture and Citizenship in the USA requirement are not required to take GEN 100;
3. Earn a minimum of 120 credit hours with at least a 2.0 cumulative grade point average and at least a 2.0 grade-point average in major specific courses. Note that “major-specific” refers to all premajor, major, and specialty/professional support courses. Further, note that some programs require more than the minimum 120 credit hours and have higher grade-point average requirements. Remedial courses cannot be counted toward the total hours required for the degree;
4. Complete a minimum of 24 credit hours of major required course work to include a capstone course or other culminating experience;
5. Complete a core of specialty or professional support courses outside their major totaling 18 or more hours at the 200 level or above;
6. Complete a graded, credit-bearing Academic Enrichment Experience (AEE) as specified by the degree program. The AEE may consist of a single course or could involve a series of related courses. Such experiences may include mentored research or teaching, supervised internships, directed service learning, or Education Abroad. Some programs may choose to accept course work from other programs to satisfy this requirement; and
7. Complete a minimum of 45 graded credit hours from upper division courses (300 level and above). Note that some such courses are only offered for P/F grading; in that case, such courses can be counted toward this requirement at the discretion of the College.

B.S. in Agriculture with a major in INDIVIDUALIZED PROGRAMS

Individualized program opportunities have been developed to assist students with academic goals that cross several disciplines.

The procedure for entering an individualized program is as follows:

1. Each student must apply to the Associate Dean for Instruction. The student will receive an explanation of the program and its objectives, and the possible risks involved, including prospective employment and acceptance for advanced graduate degree work.
2. Students who continue their interest in the individualized program develop, with the assistance of an advisor, the plan which they propose to follow.
3. This plan must be submitted to the Associate Dean for consideration and possible approval.
4. Approval of the student’s program by the Associate Dean will admit the student to the individualized program option.

BACHELOR OF SCIENCE IN AGRICULTURAL AND MEDICAL BIOTECHNOLOGY

Agricultural and medical biotechnology encompasses cellular and molecular approaches to the manipulation and improvement of agricultural plants, animals and microorganisms, and the control of agricultural pests and diseases. The primary purpose of the baccalaureate degree program in Agricultural and Medical Biotechnology is to train students in modern cellular and molecular biology and genetic engineering. Students will be provided with a firm foundation in the principles of genetics and molecular biology of both prokaryotic and eukaryotic organisms. Each student will then specialize in an area appropriate to his or her interest and career objectives, including: microbial, fungal, plant, insect and mammalian biotechnology.

Graduates will be prepared to assume government, university, and industry positions with research and technology applications to agriculture and food production. Employment opportunities include research scientists, laboratory technicians or managers in university, government, industrial, or clinical laboratories using biotechnological tools for research and production. Examples of re-
search areas include: gene cloning, construction of novel pest and disease resistance genes, development of new immunological and nucleic acid types of diagnostic probes for plant and animal disease, genetic engineering of microorganisms for the production of important pharmaceutical agents, and development of new bioengineered strains of microorganisms for fermentation and food production services. Students will also be prepared to enter graduate programs in agriculture, molecular biology, and the biological sciences.

Graduation Requirements

To earn a Bachelor of Science in Agricultural and Medical Biotechnology the student must complete 125 semester hours with at least a 2.0 grade-point standing. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to the UK Core requirements, students must complete college, premajor, major, and specialty support requirements, including an independent research project relevant to the student’s interest in biotechnology.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

| Intellectual Inquiry in Arts and Creativity | 3 |
| Intellectual Inquiry in the Humanities | 3 |
| Intellectual Inquiry in the Social Sciences | 3 |
| Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences | 3 |

BACHELOR OF SCIENCE IN AGRICULTURAL ECONOMICS

The Agricultural Economics program enables graduates to pursue careers in agribusiness and food industries, international marketing and trade, farm management and production, and related opportunities. Opportunities are also available in public policy for agriculture and rural America and environmental economics. These career opportunities may be found in both the private and public sectors. Economic theory is applied to problems concerning the production, marketing, and distribution of agricultural and food products and also to public policy and natural resource and environmental issues facing rural communities.

Agricultural Economics students choose one of three options (1) Agribusiness Management & Food Marketing, (2) Agricultural Economics, or (3) Advanced Studies in Agricultural Economics.

Graduation Requirements

To earn the Bachelor of Science in Agricultural Economics, students must have a minimum of 120 credit hours with at least a 2.0 grade-point average in either of the first two program options or at least a 3.4 grade-point average in the Advanced Studies option. Students must earn a minimum grade of C in each of the five agricultural economics courses required in the major. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to UK Core requirements, students must complete college, departmental, and support requirements.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements. NOTE: Students who enter/transfer into the College and have already satisfied the UK Core Community, Culture and Citizenship in the USA requirement are not required to take GEN 100.

OPTIONS

1. Agribusiness Management & Food Marketing Option
This option provides a program of study for students interested in careers in marketing, sales, and management of farms or firms involved in production, financing, processing, marketing and distribution of food and agricultural products, depending on the electives chosen.

NOTE: MA 113 or MA 123 satisfies the UK Core Quantitative Foundations requirement and STA 296 satisfies the UK Core Statistical Inferential Reasoning requirement. Students must earn a C or higher in MA 113 or MA 123 to take AEC 303 and a C or higher in ECO 201 to take any AEC 300 level or higher course.

3. Advanced Studies in Agricultural Economics Option

This option targets students who plan to pursue graduate study in law (JD), business (MBA), public policy (MPA), or other areas including agricultural economics (MS) and international affairs (MA). This option is only available to students who maintain at least a 3.4 cumulative grade-point average. Students that complete this option will receive Departmental Honors in Agricultural Economics. Students in this option that have at least a 3.5 grade-point average in their major coursework are eligible to apply at the end of their Junior year for admission to the Department’s two University Scholars Programs where 12 credit hours from their undergraduate degree may also count towards a master’s degree at UK in Agricultural Economics (MS) or international affairs (Patterson School). Students enrolled in the Lewis Honors College who complete this option will satisfy their 2nd Tier Honors requirements (6 credit hours), Honors Experience requirement (6 credit hours), and Honors Capstone requirement (3 credit hours).

Important: This option requires students to substitute 9 hours of lower-level major elective or support specialty credit with 9 hours of graduate-level course work completed for graduate credit and selected with their advisor’s approval. Graduate-level courses include 500+ level AEC courses and non-AEC courses at the 400G level or higher.

NOTE: MA 113 satisfies the UK Core Quantitative Foundations requirement and STA 296 satisfies the UK Core Statistical Inference Reasoning requirement. Students must earn a C or higher in MA 113 to take AEC 303 and a C or higher in ECO 201 to take any AEC 300 level or higher course.

Electives should be selected by the student to complete the minimum total of 120 hours required for graduation.

Subtotal: Electives minimum of 20

TOTAL HOURS: 120

BACHELOR OF SCIENCE IN ANIMAL SCIENCES

Animals have many important roles in human societies including the provision of food and fiber, draft power, recreational and athletic activities, and companionship. In addition, animals and their interactions with humans have environmental consequences. Processing, preservation, and quality of animal-derived foods significantly affect human health and economics. Animal Sciences involves studying and applying the basic principles of nutrition, reproduction, and genetics to the production and management of animals including horses, dairy and beef cattle, sheep, swine, poultry, and other domesticated species. Additional course work provides information on production and handling of animal-derived foods.

No one program fits all Animal Sciences students. Students come from varied backgrounds and their interests range from livestock and poultry production and management to marketing and public relations; from public education and extension to graduate training in research and teaching and veterinary medicine. No matter what species you have an interest in, the Animal Sciences major will allow you to combine your interest with your desire for an exciting and rewarding career.

As an Animal Sciences major, students have the opportunity to pursue specific interests by selecting one of three study options: Animal Industry, Food Industry or Pre-Professional. The Animal Industry option is for those students interested in animal production and management and allows specialization in one of three areas: livestock, equine, or dairy. The Food Industry option is designed to provide an emphasis on aspects of food processing, chemistry, and safety. The Pre-Professional option is a rigorous study program for students with interests in veterinary sciences, human medicine, and graduate research. Students must consult the pre-professional advisor or graduate school advisor of the university to which they intend on applying for additional or specific requirements.

Career Opportunities
To keep pace with the food, fiber, and recreation requirements of a growing world population, Animal Sciences graduates are needed in the livestock industry and closely related fields. The Animal Sciences major offers considerable flexibility in fulfilling specific career objectives, whether you are interested in working directly with livestock or indirectly in closely related areas such as agribusiness, research, government, or education.

Graduation Requirements
To earn the Bachelor of Science in Animal Sciences, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point standing. A minimum of 45 credit hours must be from upper division courses (300 and above). Remedial courses may not be counted toward the total hours required for the degree. In addition to UK Core requirements, students must complete college, departmental and specialty support requirements.

Each student must complete the following:

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

**Subtotal: Major hours** ........................................... 37-43

In addition to the Major Requirements, students choose one of three options:

#### OPTIONS

**Option A – Animal Industry**

Students fulfilling the Major Requirements are eligible for the Animal Industry Option by taking certain required Specialty Support Courses (see below). In addition, students with more specific interests may, but are not required to, choose from three specializations available within this Option.

No Specialization

(required Specialty Support only; see below) ............... 0

Livestock Specialization

ASC 300 Meat Science .............................................. 4

and at least two from:

ASC 340 Poultry Production ................................. 2

ASC 404G Sheep Science ........................................ 4

ASC 406 Beef Cattle Science ................................. 4

ASC 408G Swine Production ................................. 3

Equine Specialization

ASC 310 Equine Anatomy ........................................ 3

ASC 320 Equine Management ................................. 3

ASC 410G Equine Science ....................................... 3

Dairy Specialization

ASC 420G Dairy Cattle Management ....................... 3

ASC 564 Milk Secretion .......................................... 3

**Subtotal: Option A hours** ........................................ 0-5

**Option B – Food Industry**

Students fulfilling the Major Requirements are eligible for the Food Industry Option by taking certain required Specialty Support Courses (see below) and:

- ASC 300 Meat Science .............................................. 4
- FSC 107 Introduction to Food Science .................. 3

**Subtotal: Option B hours** ........................................... 7

**Option C – Pre-Professional**

Students fulfilling the Major Requirements are eligible for the Pre-Professional Option by taking certain Specialty Support Courses (see below). Students must consult the pre-professional advisor or graduate school advisor of the university to which they intend on applying for additional or specific requirements.

#### Specialty Support

**Animal Industry Option**

CHE 230 Organic Chemistry I ................................. 4

or CHE 236 Survey of Organic Chemistry ................ 3

Depending on the student’s area of interest and subject to the advisor’s approval, additional courses at the 200-level or above may be selected from biochemistry, biology, chemistry, physics, statistics, or any agriculture-related area other than Animal Sciences ................................. 15

**Food Industry Option**

CHE 230 Organic Chemistry I ................................. 4

or CHE 236 Survey of Organic Chemistry ................ 3

FSC 304 Animal Food Products ................................. 4

Depending on the student’s area of interest and subject to the advisor’s approval, additional courses at the 200-level or above may be selected from biochemistry, biology, chemistry, physics, statistics, or any agriculture-related area other than Animal Sciences ................................. 12

**Pre-Professional Option**

- BIO 304 Principles of Genetics .......................... 3-4
- FSC 304 Animal Food Products ............................. 4
- CHE 232/233 Organic Chemistry and Laboratory I .... 4
- PHY 211 General Physics ....................................... 5
- PHY 213 General Physics ....................................... 5

*Students must consult the pre-professional advisor or graduate school advisor of the university to which they will apply for additional or specific requirements.

**Subtotal: Specialty Support** .................................. 18-22

**Electives**

Electives should be selected to complete the 120 hours required for graduation.

**Subtotal: Electives** ............................................. 120

**TOTAL HOURS**: ......................................................... 120

---

### BACHELOR OF SCIENCE IN BIOSYSTEMS ENGINEERING

Biosystems engineering provides an essential link between the biological sciences and the engineering profession. This linkage is essential for the development of production and processing systems involving biological materials that preserve our natural resource base. Students have the latitude to develop an area of specialization relating to bioenvironmental engineering, food and bioprocessing, machine systems, or controlled environment engineering. The curriculum is also ideal preparation for those students wanting to pursue a graduate or professional degree in biomedical engineering or veterinary medicine through pre-biomedical engineering and pre-veterinary medicine options.

The degree requirements and curriculum are listed in the **College of Engineering** section of this Bulletin.

---

### BACHELOR OF SCIENCE IN CAREER AND TECHNICAL EDUCATION

Students pursuing a degree in Career and Technical Education complete courses in education and agriculture. Graduates with this degree pursue careers in both formal and informal education in agriculture. Formal education opportunities include teaching in the middle school or high school classroom. Informal education opportunities include working in Extension and the public or private sectors of industry. In addition to receiving the degree, graduates attain Rank III teaching certification in Agricultural Education.

#### Teacher Certification

Besides receiving the B.S. in Career and Technical Education, students completing the requirements obtain a letter of endorsement to teach agricultural education.

Requirements for teacher certification are as follows:

You must be admitted to the teacher education program (TEP) after you have completed, or complete during the semester in which you apply, 60 semester hours of course work and AED/FCS 110 Introduction to Career and Technical Education and have at least a 2.75 grade-point standing (on a 4.0 scale). See a full description of “Admission, Retention, and Completion from Teacher Education Programs” in the **College of Education** section of this Bulletin.

Applicants are evaluated on an interview, recommendations, scholastic achievement, demonstrated skills, and professional commitment and goals. A student’s progress is continuously monitored, assessed, and reviewed throughout the teacher education program as described in the Teacher Education Programs section of this Bulletin.

You must successfully complete assessment items and portfolio items as required. Further, you must successfully complete the Principles of Learning and Teaching Exam and a professional exam, scoring above cutoff scores specified by the State Board of Education for each exam. After completing these exams, students hired by Kentucky schools will complete a one-year paid internship as a first-year teacher and will be evaluated at least three times by a three-person committee before certification is completed.

**Note:** Because graduation and teacher certification requirements change frequently, students should obtain more complete information from their advisors.
Graduation Requirements
To earn the Bachelor of Science in Career and Technical Education, the student must have a minimum of 120 credit hours with at least a 2.75 grade-point average (required for Teacher Certification). A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity
Choose one course from approved list ............................ 3

II. Intellectual Inquiry in the Humanities
Choose one course from approved list ............................ 3

III. Intellectual Inquiry in the Social Sciences
CLD 102 The Dynamics of Rural Social Life ....................... 3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences
Choose one course from approved list ............................ 3

V. Composition and Communication I
CIS/WRD 110 Composition and Communication I .............. 3

VI. Composition and Communication II
CIS/WRD 111 Composition and Communication II .............. 3

VII. Quantitative Foundations
Choose one course from approved list ............................ 3

VIII. Statistical Inferential Reasoning
STA 210 Making Sense of Uncertainty:
An Introduction to Statistical Reasoning ............................ 3

IX. Community, Culture and Citizenship in the USA
GEN 100 Issues in Agriculture, Food and Environment ....... 3

X. Global Dynamics

Agricultural Education Requirements

* AIC 302 Agricultural Management Principles .................. 4

AEN 252 Fabrication and Construction for Technical Systems ...................................................... 3

ASC 101 Domestic Animal Biology ................................ 3

ASC 102 Introduction to Livestock and Poultry Production ......................................................... 3

CLD 102 The Dynamics of Rural Social Life
(or other Social Science elective) .................................. 3

ECO 201 Principles of Economics I ................................ 3

PLS 210 The Life Processes of Plants or
PLS 386 Plant Production Systems ................................. 3-4

**PLS 366 Fundamentals of Soil Science .......................... 4

Subtotal: Agricultural Education hours ......................... 26-27

*ECO 201 is a prerequisite for AEC 302.

**CHE 105 is a prerequisite for PLS 366.

Specialty Support Requirements

Students must complete one additional agricultural economics course, one additional animal sciences course, one additional agricultural engineering course, two additional plant and soil sciences courses, and three additional courses in the College of Agriculture, Food and Environment in consultation with your advisor.

Subtotal: Specialty Support ........................................... 24

Other agriculture majors can also qualify to teach agricultural education provided they meet current certification requirements.

Electives
Electives should be selected by the student to lead to the minimum total of 120 hours required for graduation

Subtotal: Electives .................................................. minimum of 7

Total Minimum Hours for Program ......................... 120

BACHELOR OF SCIENCE IN COMMUNITY AND LEADERSHIP DEVELOPMENT

Community and Leadership Development is an interdisciplinary social science major. It provides students with the knowledge and skills to integrate communications, sociology, journalism, and community development theories and apply them to real-world situations involving local communities and agricultural organizations.

The major focuses on such skills as written and oral communication; strategic problem solving; critical thinking; understanding of group, organizational, and community dynamics; and ethical decision making.

Graduation Requirements

To earn the Bachelor of Science in Community and Leadership Development, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point average. A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity
Choose one of the following:
A-S 245 Introduction to Web Design
A-S 280 Introduction to Photographic Literacy
LA 111 Living on the Right Side of the Brain .................. 3

II. Intellectual Inquiry in the Humanities
Choose one of the following:
EGR 201 Literature, Technology, and Culture
ENG 230 Introduction to Literature (Subtitle required)
ENG 264 Introduction to Black Writers
GWS 201 Gender and Popular Culture
HIS 112 The Making of Modern Kentucky
MCL 100 The World of Language .................................. 3

III. Intellectual Inquiry in the Social Sciences
CLD 102 The Dynamics of Rural Social Life ....................... 3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences
Choose one of the following:
PLS 104 Plants, Soils, and People: A Science Perspective
ANT 230 Introduction to Biological Anthropology
BIO 102 Human Ecology
GEO 130 Earth’s Physical Environment
GEO 135 Global Climate Change
EES 120 Sustainable Planet:
The Geology of Natural Resources ............................... 3

V. Composition and Communication I

CLD 305 Research Methods in Community and Leadership Development ..................... 3

CLD 497 Senior Capstone Practicum in Community and Leadership Development ............... 3

Graduation Composition and Communication Requirement hours (GCCR) ....................... 6
The horse industry is a dynamic industry that encompasses not only the breeding, raising and training of horses but also the development of activities for the use of the horse in sports and recreation. The industry has a significant economic impact across the U.S. and world-wide. Equine science and management involves the study and application of science and business concepts to the horse industry. Additional course work supports learning in areas that aid in breeding and raising horses and marketing the industry. Students come from varied equine backgrounds but have a common interest in the horse. Regardless of which breed of horse or activity focus students have, equine science and management majors will have the opportunity to combine their interest in the horse with a desire to become active participants in the horse industry. Students in equine science and management considering a career in veterinary medicine or graduate research can meet those goals in the degree program as well. Interested students need to consult with an advisor to ensure all specific academic requirements are met.

Career Opportunities
The horse industry is continually changing. Equine science and management graduates are needed in all aspects of the industry including production, business management and other related support industries.

Graduation Requirements
To earn the Bachelor of Science in Equine Science and Management, the student must have a minimum of 120 credit hours with at least a 2.0 grade-point average. A minimum of 45 credit hours must be from upper division courses (300 level and above). Remedial courses may not be counted toward the total hours required for the degree.

Students must complete the following:

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

Major Requirements

See the Major Requirements section of this Bulletin for the complete list of major requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the major requirements.

Students must complete at least 31 credit hours in emphasis area courses.

BACHELOR OF SCIENCE IN EQUINE SCIENCE AND MANAGEMENT

Students must have one emphasis area. In order to have an emphasis area, students must take 12 credits in one area. Students will then select 9 additional credits from any emphasis area. 21 credit hours in emphasis area courses must be completed.

Equine Science

This area will provide the students with a strong background in basic sciences which will prepare them for graduate school or careers such as laboratory research assistants, breeding technicians, pharmaceutical sales representatives, and technical representatives for the feed industry.

ASC 220 Applied Animal Behavior and Welfare ........ 3

ASC 311 Advanced Equine Evaluation ........................ 1

VS 500 Advanced Equine Reproduction .................... 3

VS 507 Advanced Horse Genetics ......................... 2

Subtotal: Emphasis hours .................................... 21
### VI. College of Agriculture, Food and Environment

#### Equine Management and Industry

Students will learn skills related to marketing, operations, and management of equine businesses. This will prepare students for careers as farm managers as well as business managers for equine enterprises, breed associations, and sales associates.

This area also introduces them to the diversity of the equine industry through courses in equine law, sales, careers, event planning, marketing, and human resources.

- **AEC 305 Food and Agricultural Marketing Principles** ........................................ 3
- **AEC 312 Equine Markets** .......................................................................................... 3
- **AEC 320 Agricultural Product Marketing and Sales** or **MKT 300 Marketing Management** ........................................ 3
- **AEC 324 Agricultural Law** .......................................................................................... 3
- **AEC 325 Equine Law** .................................................................................................. 3
- **AEC 340 Human Resource Management in Agriculture** ........................................ 3
- **EQM 210 Tools and Tack in the Equine Industry** ........................................ 1-2
- **EQM 300 Topics in Equine Science and Management** ........................................ 1-6
- **EQM 301 Thoroughbred Sales** .................................................................................. 1
- **EQM 340 Equine Facility Design and Management** ........................................ 1

Subtotal: Emphasis hours ........................................ 21

#### Communications and Leadership

Students who are interested in leadership roles in business, breed associations or non-profit equine organizations and cooperative extension should consider this area. They will enhance their communication skills and be required to take courses in community dynamics, leadership development, and agriculture communication.

- **CLD 102 The Dynamics of Rural Social Life** ......................................................... 3
- **CLD 230 Intrapersonal Leadership** ........................................................................... 3
- **CLD 260 Community Portraits** ................................................................................... 3
- **CLD 320 Community and Communication: Exploring Their Interactions** .............. 3
- **CLD 400 Agricultural Communications Campaigns** ........................................... 3

- **CLD 403 Leadership and Communication** ................................................................. 3
- **CLD 404 Contemporary Leadership Applications** ...................................................... 3
- **CLD 430 Leading in Communities: Vision, Action, and Change** ......................... 3
- **CLD 495 Topical Seminar in Community and Leadership Development (Subtitle required)** ......................................................... 1-3
- **CLD 530 Fundamentals of Organizational Leadership** ......................................... 3
- **EQM 300 Topics in Equine Science and Management** ........................................ 1-6
- **EQM 302 Equine Event Planning** ............................................................................. 1

Subtotal: Emphasis hours ........................................ 21

#### Specialty Support Requirement

The student will choose, in consultation with an advisor, at least 18 hours of courses at the 200 level or above that will strengthen the program in an area of importance to the student. To aid in developing this area of study, a list of suggested courses is available from your advisor. The list includes courses in agricultural economics, animal sciences, community and leadership development, marketing, management, finance, plant and soil sciences plus other areas of study at UK.

Subtotal: Specialty Support ........................................ 18

#### Electives

Electives should be selected by the student to lead to the minimum total of 120 hours required for graduation

Subtotal: Electives ........................................ minimum of 3

Total Minimum Hours for Program ........................................ 120

---

#### BACHELOR OF SCIENCE IN FOOD SCIENCE

Food science is the study of the transformation of biological materials into food products acceptable for human consumption. This requires studying diverse scientific disciplines related to food, including chemistry, engineering, microbiology, biochemistry, toxicology, and management; and effectively applying the industrial and practical aspects to product development, food processing, preservation, and marketing. The program is administered by the Department of Animal and Food Sciences and offers training in the basic sciences and in the fundamentals of food science.

Career opportunities in food industries include: management, research and development of new food products and ingredients, process supervision, quality control, procurement, distribution, sales, and merchandising. Positions include sales and services in allied industries; consulting and trade association activities; and promotional and educational services. Governmental agencies employ food scientists whose work is directed towards research, regulatory control, and the development of food standards.

#### Graduation Requirements

To earn the Bachelor of Science in Food Science, the student must complete a minimum of 120 semester hours with at least 45 hours from courses at the 300 level and above. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree.

The Food Science program meets the requirements for accreditation by the Institute of Food Technologists and the National Organization of Food Science Professionals.

Each student must complete the following:

**UK Core Requirements**

See the UK Core section of this Bulletin for the complete UK core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK core areas. Students should work closely with their advisor to complete the UK core requirements.

Career Opportunities

Forestry graduates are employed as professional foresters in private forest industries and organizations, consulting companies, and public agencies, including the U.S. Forest Service, Soil Conservation Service, and state, county, or urban forestry programs. Graduates are also qualified to be research technicians in government, university, and private laboratories, or may continue their studies in specialized graduate programs.

The inclusion in the curriculum of management and processing principles makes UK forestry graduates attractive to the forest products industry; graduates are often employed as technical specialists, managers, and marketing and wood procurement personnel.

Graduation Requirements

To earn the Bachelor of Science in Forestry, the student must complete a minimum of 121 semester hours. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree.

Students will complete a field semester in the spring of their junior year. Throughout the spring field semester, students will visit numerous sites to see different ecosystems in the region. Students will periodically return to one site, or sample property, that will be used for in-depth analysis to show integration and application of field semester concepts.

The curriculum consists of UK Core requirements, preprofessional, professional, and specialty support components. Preprofessional, professional, and specialty support courses provide the skills and understanding to manage forest resources. Electives, chosen with the assistance of your advisor, strengthen your knowledge of basic principles in areas of special interest to you.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

BACHELOR OF SCIENCE IN FORESTRY

Kentucky boasts many forested areas with famous reputations, such as Natural Bridge, Red River Gorge, Daniel Boone National Forest, and Robinson Forest. Robinson Forest is one of the largest research and educational forests in the eastern United States. It is managed by the Department of Forestry and Natural Resources, and as a forestry student at the University of Kentucky all of its resources will be available to you as a unique outdoor laboratory.

The missions of the Department of Forestry and Natural Resources are to identify and address the challenges and opportunities facing sustained management of our renewable natural resources, including forests, soils, water, and wildlife. These missions involve three interrelated functions: research, extension, and education. The research goal of the department is to obtain basic and applied information leading to wise and effective management of our natural resources. Forestry extension seeks to inform land owners and the general public about forest stewardship. Forestry education prepares students for careers as forestry and natural resource professionals. The objectives of the required courses in the forestry curriculum are to educate and train students in the communication, managerial, scientific, processing, and administrative skills and principles related to the stewardship and utilization of renewable natural resources. Accomplishment of these objectives will ensure a continuing supply of entry-level professionals for Kentucky and the nation.

The undergraduate (B.S.) program leading to the professional degree in forestry is accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation as the accrediting agency for forestry in the United States. Additionally, you may become certified by The Wildlife Society if you choose appropriate elective courses.
Professional Electives
Nine hours of professional electives. In general, the professional electives should be a 300-level or above course. If a student wants to take a course not on the program’s professional elective list, the student must receive approval from the Department of Forestry and Natural Resources Undergraduate Programs Committee.

Subtotal: Professional electives ................. 9

Electives
Elective courses should be selected by the student to lead to the minimum total of 121 hours required for graduation.

TOTAL HOURS: ..................................... 121

BACHELOR OF SCIENCE IN HORTICULTURE, PLANT AND SOIL SCIENCES

The Horticulture, Plant and Soil Sciences degree program is designed to provide students with the knowledge and skills needed for a career in the production and management of plants and soils for food, fiber, forage, oil, recreation, landscaping and the enhancement of the human environment. Graduates have the technical and scientific skills as well as the communication, computational, leadership, and interpersonal capabilities necessary to function effectively as professionals. Careers are as diverse as they are challenging. Each Option prepares graduates for specific professional opportunities.

Options
Students pursuing a Horticulture, Plant and Soil Sciences degree may choose from the following Options:

- Horticulture Enterprise Management
- Turfgrass Science
- Crops and Livestock
- Crop, Soil, and Horticulture Science

Graduation Requirements
Students must complete a minimum of 120 semester credit hours with at least 45 credit hours from courses at the 300 level or above. A 2.0 grade-point standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree. In addition to the UK Core and college requirements, students must select an Option with the assistance of an advisor and fulfill the area’s program requirements.

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity
Choose one course from approved list ............... 3

II. Intellectual Inquiry in the Humanities

BACHELOR OF SCIENCE IN LANDSCAPE ARCHITECTURE

The profession of landscape architecture has grown out of the tradition of the great garden designers of Italy, France, England, and China to encompass the art and science of design, planning, and management of the land. The science of landscape architecture is concerned with the conservation and management of natural resources. The art of landscape architecture is concerned with the creation of more enjoyable, comfortable, and safe outdoor areas where human use requires adaptation of the natural environment.

This four-year professional program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. Landscape architecture employment opportunities may be found in the designing of urban communities, plazas, university campuses, institutional grounds, parks and recreational areas, commercial and industrial sites, and residential communities, as well as in the areas of historic preservation, regional planning, and mine reclamation.

Admission Requirements

Admission to the University of Kentucky and to the College of Agriculture, Food and Environment does not guarantee admission to the Landscape Architecture program. All applicants must be reviewed by the Landscape Architecture Program Chairperson. The number of applicants ultimately admitted is determined by the resources recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their academic advisor to complete the UK Core requirements.

Graduation Requirements

To earn a Bachelor of Science degree in Landscape Architecture, the student must have 128 semester hours with at least a 2.0 grade-point average (on a 4.0 scale). Remedial courses may not be counted toward the total hours required for graduation. In addition to satisfying the UK Core requirements, each student must complete pre-major, professional, and specialty support requirements. The Landscape Architecture program policy requires a student to achieve a C grade or better in major design studios in order to advance to the next level.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas.

I. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences

Choose one course from approved list ........................... 3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences

Choose one course from approved list ........................... 3

VII. Quantitative Foundations

Choose one course from approved list ........................... 3

VIII. Statistical Inferential Reasoning

STA 210 Making Sense of Uncertainty: An Introduction to Statistical Reasoning .......................... 3

Enter freshmen and transfer students from degree programs other than Landscape Architecture must:

1. submit a formal application to the Undergraduate Admissions Office indicating Landscape Architecture as your major;

2. meet the minimum criteria for admission to the University as specified in this Bulletin (The Landscape Architecture program requires a minimum of a 2.0 grade-point average on a 4.0 scale for eligibility to transfer into the program); and

3. successfully complete the aptitude testing designated by the Landscape Architecture program.

If a student transferring from another degree program has a background in related design fields, he or she may submit available work, such as a portfolio or other work examples, as an indication of potential success.

Transfer students from degree programs in Landscape Architecture at other accredited institutions must:

1. submit a formal application to the Office of Undergraduate Admissions indicating Landscape Architecture as your major;

2. meet the minimum criteria for admission to the University as specified in this Bulletin (The Landscape Architecture program requires a minimum of a 2.0 grade-point average on a 4.0 scale for eligibility to transfer into the program); and

3. submit a portfolio for review which, combined with an evaluation of courses completed, will determine acceptance into the program as well as the level to which the student will be accepted.

Prerequisites

Note that several classes in Group A and Group B have prerequisites beyond other than ASC 101. These are indicated in parentheses following the courses below. Students taking the minor are responsible for satisfying the prerequisites.

Minor Requirements

ASC 101 Domestic Animal Biology ............................... 3
ASC 102 Introduction to Livestock and Poultry Production (ASC 101) or
ASC 382 Animal Production Principles .......................... 3

Additional Course Work ........................................ 9
At least 9 credit hours must be selected from the list that follows (Groups A and B). At least one course must be selected from Group A and one course from Group B.

Group A

ASC 300 Meat Science (ASC 101, 102) ......................... 4
ASC 325 Animal Physiology (BIO 152) .......................... 3
ASC 362 Animal Breeding and Genetics
(ASC 101 and BIO 152) ........................................... 4
ASC 364 Reproductive Physiology
of Farm Animals (ASC 101 and BIO 152) ...................... 4
ASC 378 Animal Nutrition and Feeding
(ASC 101 and CHE 230 or 236) ................................. 3
ASC 380 Applied Animal Nutrition (ASC 378) .............. 3

Group B

ASC 340 Poultry Production (ASC 101 or 102) .............. 2
ASC 404G Sheep Science (ASC 300, 362, 364, 378) ......... 4
ASC 406 Beef Cattle Science
(ASC 300, 362, 364, 378) ........................................ 4
ASC 408G Swine Production (ASC 101, 102) ................. 3
ASC 410G Equine Science (ASC 310, 364, 378) ............. 3
ASC 420G Dairy Cattle Management
(ASC 325, 364, 378) ............................................ 3

Total Hours Required ........................................ 15

Additional specialty support classes may be selected in consultation with your academic advisor for a total of 21 hours in specialty support.

Subtotal: Specialty Support ................................. 21

Electives

Elective courses should be selected by the student to lead to the minimum total of 120 hours required for graduation.

Subtotal: Electives ........................................ minimum of 1

TOTAL HOURS: ........................................ 120

Crop, Soil and Horticulture Science Option

Select 18 hours of PLS courses with consent of advisor .......................... 18

Subtotal: Option hours ................................. 18

Minor in Animal Sciences

The profession of landscape architecture has grown out of the tradition of the great garden designers of Italy, France, England, and China to encompass the art and science of design, planning, and management of the land. The science of landscape architecture is concerned with the conservation and management of natural resources. The art of landscape architecture is concerned with the creation of more enjoyable, comfortable, and safe outdoor areas where human use requires adaptation of the natural environment.

This four-year professional program is accredited by the American Society of Landscape Architects and meets all the requirements for licensing of landscape architects in Kentucky and other states. Landscape architecture employment opportunities may be found in the designing of urban communities, plazas, university campuses, institutional grounds, parks and recreational areas, commercial and industrial sites, and residential communities, as well as in the areas of historic preservation, regional planning, and mine reclamation.

Admission Requirements

Admission to the University of Kentucky and to the College of Agriculture, Food and Environment does not guarantee admission to the Landscape Architecture program. All applicants must be reviewed by the Landscape Architecture Program Chairperson. The number of applicants ultimately admitted is determined by the resources recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their academic advisor to complete the UK Core requirements.

Graduation Requirements

To earn a Bachelor of Science degree in Landscape Architecture, the student must have 128 semester hours with at least a 2.0 grade-point average (on a 4.0 scale). Remedial courses may not be counted toward the total hours required for graduation. In addition to satisfying the UK Core requirements, each student must complete pre-major, professional, and specialty support requirements. The Landscape Architecture program policy requires a student to achieve a C grade or better in major design studios in order to advance to the next level.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their academic advisor to complete the UK Core requirements.

BACHELOR OF SCIENCE IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE

The program in Natural Resources and Environmental Science is designed to provide students with the knowledge and skills needed for a career in the rapidly growing fields of environmental science, natural resource management, and environmental policy. With global climate change and an inter-connected world economy, the conservation and management of our natural resources and sustainability of our natural environment is becoming an issue for all societies. This curriculum provides students with exposure to a broad array of disciplines that are essential in approaching issues of natural resources, environmental quality, and environmental sustainability. Experiential learning is a key component in the curriculum. As a result, graduates have the capacity to integrate perspectives and diverse bodies of knowledge in dealing with environmental resource management problems.

All students in the program take a common core of major requirements which is designed to provide exposure to technical and socioeconomic dimensions of natural resource management and policy. Important components of the core requirements are a required three-week summer camp, a pre-professional internship or research experience, and a senior capstone course that is problem based. In addition to the core requirements, all students must complete nine hours of course work in both an Analytical Skill Development Area (ASD) and an Environmental System Emphasis Area (ESEA). This allows students to match analytical skills to an area of particular interest in conservation biology, natural resource planning, environmental soil science, water resources, forestry, wildlife management, agricultural sustainability, geological processes, or related areas. Courses completed for the ASD and ESEA are selected from a list of choices in each area. Students are required to complete an off-campus internship or a research experience that is related to their ESEA and/or ASD. NRES majors have completed internships in several foreign countries, although most are conducted within the U.S. with organizations such as the National Park Service, the U.S. Forest Service, with local nature preserves, an Alaskan salmon recovery program, a national laboratory, environmental consulting firms, private corporations, and both state and local governments. All seniors apply their course work and experiential learning to the senior capstone course which focuses on a well-defined natural resource issue, requires group collaboration and problem-solving, and involves actual stakeholders.

Graduates of the Natural Resources and Environmental Science degree program move on to graduate work or careers. Many graduates continue their studies in Masters or Ph.D. programs or go on to law school. Most graduates begin careers as aspiring environmental professionals in both the public and private sector. Additional employment opportunities exist in environmental education, journalism, and work with nonprofit organizations which have environmental concerns.

Graduation Requirements
To earn a Bachelor of Science in Natural Resources and Environmental Science, a student must complete at least 120 semester hours of credit with at least a 2.0 cumulative grade-point average. A minimum of 45 credits must be from upper division courses (300-level and above). Remedial courses may not be counted toward the total degree hours. In addition to the UK Core requirements, students must complete College requirements, premajor and major requirements, and complete an internship or research experience. With advisor approval, students select and Analytical Skill Development and an Environmental System Emphasis Area which focuses course work in a student’s area of interest.

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

Analytical Skill Development (ASD) and Environmental System Emphasis Areas (ESEA)

Students must select one area within Analytical Skill Development and one Environmental System Emphasis Area to complete nine hours of coursework in each area from the list of courses provided below. Students must select from the courses listed under each ASD and ESEA but may request one (1) substitute course per ASD and ESEA, subject to approval by both their academic advisor and the DUS. For the 18 hours of ASD and ESEA course work, all classes must be 200-level or above and at least twelve (12) credit hours must be in 300-level or above courses. Classes taken to complete the ASD requirement may not count towards the ESEA course requirement and vice versa. Research experiences, internships, or apprenticeships cannot be used to satisfy the ASD and ESEA requirements, including individualized options.

Analytical Skill Development Areas

1. Economic and Policy Analysis

Economic and Policy Analysis – The economic and policy analysis skill development area will provide students with the theoretical and analytical tools necessary to evaluate the economic and social effects of resource and environmental issues. The policy courses will help students understand how environmental policy is made, the public agencies that manage resources, and how policies are evaluated for impact on humans and the environment.

2. Field and Laboratory Analysis of Ecosystems

Students will learn the theory and application of sample data collection and techniques, field and laboratory analysis, statistical analysis, and data interpretation required to evaluate the quality of water, soil, and ecosystem resources. This analytical skill development area is geared towards students pursuing careers as environmental science and protection scientists/technicians and forest and conservation scientists/technicians.

3. Geospatial Analysis

Geospatial technologies are often used in conjunction with traditional natural resource and environmental scientist job requirements. This development area will provide students with the skills necessary to make decisions in the use of geospatial software, approaches, and products. Students will learn the theory and application required to address a variety of environmental conditions. This analytical skill development area is geared towards students wishing to pursue careers that depend on extensively applying geospatial technologies to natural resources and environmental science issues or advanced study in geospatial science.

4. Environmental Education and Communication

The environmental education and communication area will introduce you to the concepts of Environmental Education (in NRE 365) and then provide you with the background necessary to apply your environmental systems knowledge in an educational (formal and non-formal) setting or through other avenues of communication.

5. Individualized Analytical Skill Development

With advisor approval, a student may submit a request for an individualized ASD. The written proposal must include a memo explaining the rationale, a list of proposed courses for the ASD, an explanation of how those courses meet the intent of the ASD, and a copy of the student’s Plan of Study which includes the proposed course work. The written proposal must be submitted to the DUS for Steering Committee approval.
to pursue careers with organizations dedicated to the pres-
ervation, conservation, and management of habitat, and
related rare species preservation. Other opportunities in-
clude nature preserve manager, natural resource educator,
naturalist, biological inventories and assessment, and envi-
ronmental consulting. This emphasis area also prepares
students for graduate studies in ecology, evolutionary biol-
ogy, zoology, or botany.

NRE/PLS 455G Wetland Delineation ........ 3

2. Forestry

The forestry emphasis area provides students with knowl-
edge in dendrology (the study of trees) and silviculture (the
cultivation, growing, and management of trees). In dendro-
logy students will learn basic concepts of botany of woody
species, and their use, along with basic soil and site charac-
teristics used in the identification of trees and forest vegeta-
tion. In silviculture students will learn the basics of ecologi-
cally-based management of forest ecosystems to achieve a
desired objective. Students who choose this emphasis area
may be qualified to pursue careers in natural resource man-
agement with an emphasis on forest systems. [Note: Students
with a B.S. in Forestry from a Society of American Foresters
(SAF) accredited forestry program may be more competitive
certain forestry jobs. The NRES program is not an SAF
accredited program.]

and Natural Resources .................................................. 3
FOR 425 Forest Management .............................................. 4
ENT/ FOR 502 Forest Entomology .................................. 3

Students are strongly encouraged to take these key courses.

3. Human Dimensions and Natural Resource Planning

The human dimensions and natural resource planning empha-
sis area will provide students with an understanding of the
interaction between society and natural systems and provide
students with the skills and knowledge for tomorrow’s
effective conservation leaders. This emphasis area does this
by building upon the core NRES curriculum with course work
and internship experience focused on land planning, legal
aspects of land and water, landscape ecology, biogeography,
and geospatial technologies. Private foundations and govern-
ment entities are funding land conservation efforts, and increas-
ingly, real estate developers and their consultants are
incorporating land conservation into their development
projects. There is a professional community working in a
variety of capacities for conservation organizations globally
and there is the opportunity for advanced study in a variety
of graduate programs.

4. Soil Science

Students choosing this emphasis area will learn about the
dynamic and interrelated processes taking place within the
thin skin of the Earth (i.e., Critical Zone) and the services
provided by these processes to ensure adequate and sustain-
able feed, fuel and fiber production, clean air and water, and
healthy habitats. Topics covered include bioremediation,
phytoremediation, soil fertility, microbiology, soil chemis-
try, biogeochemistry, etc. Students completing this empha-
sis area will be equipped to evaluate soils for a range of
management options, and be eligible for positions with public
and private agencies (e.g., the Natural Resource Conservation
Service, Environmental Protection Agency, U.S. Depart-
ment of Agriculture, Environmental Consulting Firms, etc.)

EES 530 Low Temperature Geochemistry ...................... 3

5. Water Resources

The water resources emphasis area will provide students
with a fundamental understanding of the hydrologic cycle so
that students understand how climate, soils, vegetation, and
land-use affect the amount, timing and quality of water. Use
of this information is important in natural resource manage-
ment so that one may determine where water resource
management objectives are compatible and where they con-
front with other resource management objectives. Ultimately,
students will gain an understanding of the role of watershed
management and multiple use in planning and implementing
natural resource programs while becoming familiar with current
issues in watershed management and water resources.

6. Wildlife Ecology and Management

This emphasis area will provide opportunities for students
to gain knowledge and experience, understand fundamental
ccepts, and develop basic skills in the area of wildlife
ecology and management. The curriculum provides students
with the option to meet certification requirements to become
a registered Associate Wildlife Biologist with The Wildlife
Society. To do this, students will need to complete additional
course work. For more information visit: http://wildlife.org/
learn/professionaldevelopment/certification/ certificationprograms/

7. Global Sustainable Food Systems

Students who choose this area will be exposed to basic
principles in sustainable agriculture, issues in global food
systems (e.g. food security) and the ecology of agricultural
systems, emphasizing the overlap and complementarities
between systems emphasized through NRES major require-
ments and food production systems. Some students choosing
this ESEA may want to obtain the minor in Sustainable
Agriculture, which requires the selection of SAG 210 (not
listed below because all 9 credits must be 200 or above),
in addition to SAG 310 and 386.

AEC 309 International Agriculture, World Food Needs

SAG 390 Agroecology ...................................................... 3

8. Earth System Sciences

The Earth Systems Science emphasis area will provide context
for understanding the processes that operate within and at the
interface between Earth’s lithosphere, biosphere, hydrosphere,
and atmosphere, i.e., the environments in which bedrock, soil,
organisms, water, and air interact. Students pursuing this area
of emphasis may choose to pursue the minor in Geological Sciences, which
can be partly satisfied with NRES required courses EES 220 and PLS 366,
plus EES 230 and 235, and an additional 5 credits at the 300
This interdisciplinary, interdepartmental program in the College of Agriculture, Food and Environment is grounded in the framework that integrates three conceptual “pillars”: environmental stewardship, economic profitability, and social responsibility. Sustainable Agriculture and Community Food Systems core courses are designed to integrate these perspectives at the introductory, intermediate, and capstone levels. The remainder of the curriculum leverages external courses within each of these “three pillars” of sustainability, in addition to UK Core and premajor requirements.

Specialty support credits are recommended along two tracks: 1) Farming Systems – for students seeking focus on sustainable production methods and biophysical systems; and 2) Community Food Systems – for students seeking focus on food systems issues beyond the “farm gate”, including access, food security, and hunger issues. Experiential learning is emphasized throughout the program, through the course work and faculty advising directing independent research (395-level) and EXP 399 credit, as well as Education Abroad offerings. Graduates of the B.S. in Sustainable Agriculture and Community Food Systems are prepared for careers in farming, the non-profit sector, Cooperative Extension, local government, on-farm conservation service providers, and graduate studies in their track area.

Graduation Requirements
Students must complete a minimum of 120 semester credit hours with at least 45 credit hours from courses at the 300-level or above. A 2.0 grade-point-standing (on a 4.0 scale) is necessary and remedial courses may not be counted toward the total hours required for the degree. In addition to the UK Core and college requirements, students must select an Option with the assistance of an advisor and fulfill the area’s program requirements.

UK Core Requirements
See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity

Specialty Support
Students must declare one track program in the SAG major.

Community Food Systems Track
Students must declare one track in the SAG major. At least 12 hours must come from this single track, with 9 additional credits selected from courses in either program track, or other supporting courses at the 200-level or above, with approval by the student’s academic advisor. For the Community Food Systems Track, select 12 hours from the following courses in consultation with your academic advisor. Additional course work, including education abroad credit and special topics courses, may be appropriate to fulfill this requirement, but must be approved in advance by the student’s academic advisor. All track course work must be taken for a grade, not pass/fail.

    - AEC 305 Food and Agricultural Marketing Principles
    - AEC 445G Introduction to Resource and Environmental Economics
  - Select one from:
    - **SOC 360 Environmental Sociology
    - GEN 501 Agricultural and Environmental Ethics
  *Prerequisite: CHE 105.
  **Prerequisite: SOC 101.

**Undergraduate Certificate in Distillation, Wine and Brewing Studies**

The Undergraduate Certificate in Distillation, Wine and Brewing Studies (DWBS) is inclusive of students from all departments and colleges at UK. The Departments of Animal and Food Sciences; Biosystems and Agricultural Engineering; Chemistry; Chemical and Materials Engineering; History; Horticulture; Plant and Soil Sciences; Retailing and Tourism Management; and Writing, Rhetoric and Digital Studies are all engaged in DWBS. Three key student learning outcomes comprise the DWBS and are accomplished through a cluster of courses:

- Students will comprehend the breadth of the career opportunities in the DWBS industry.
- Students will be able to identify key technical methods and analytical skills required in the DWBS industry.
- Students will be capable of outlining the history of DWBS and clearly explain how this relates to human cultures.

UK is offering this program because, (a) this industry represents the science of one of the oldest products linked to human civilization; thus, education opportunities span a breadth of disciplines; and (b) this is a global industry that provides a wide and interdisciplinary range of careers. The curriculum was developed due to an urgent need to train people in this area as identified by the local industries. The Bluegrass is home to nearly 95 percent of the production of bourbon, one of the world’s premier distilled spirits. There are over 70 wineries in the area as well, in addition to numerous large and small breweries. The program is suited to an undergraduate certificate rather than a minor because the undergraduate certificate creates a framework for students from programs across the UK to gain a certificate without changing their major/minor of interest, which is congruent with the interdisciplinary nature of the career opportunities available in this space.

The DWBS is affiliated with the Department of Horticulture in the College of Agriculture, Food and Environment (CAFE). The DWBS will complement the undergraduate B.S. program in Horticulture, Plant and Soil Science by providing additional opportunities for students already interested in these industries (e.g., in wine-growing) to delve into the related areas of wine-making.

Distillation, wine and brewing industries form a multi-billion dollar industry with a myriad of careers in science, engineering and the arts. Regionally, Kentucky is famous for bourbon production and in 2013 the industry surpassed 5 million barrels in over 40 distilleries worth more than $8 billion/year. Current estimates suggest Kentucky employment may now number 10,000 within the bourbon industry alone.
Further, approximately 25 new craft and full scale distillers are opening in the coming year with a shortage of trained intellectual infrastructure identified recently as a major hurdle to growth (by the Kentucky Distillers Association Technical Committee Meeting). There are over 70 wineries that also demand trained and knowledgeable employees, and a thriving craft beer movement has been established in the past 5 years.

Despite Kentucky being a landmark destination for producers, few courses focused on this industry have been delivered in the past at UK. The proposed certificate pedagogy will engage an inter-disciplinary team that will align certificate enrollees with skills and knowledge of career options. Intellectual infrastructure will immediately benefit the career opportunities and serve a rapidly growing industry.

The DWBS certificate program is designed to be applicable across many of the current UK academic majors. Most obviously, the DWBS would serve students in the colleges of Agriculture, Food and Environment; Arts & Sciences; Business & Economics; Education; and Engineering. However the DWBS is designed to also attract students from other colleges and units based on interest.

Distilling, Wine and Brewing Studies Curriculum

The Certificate in Distilling, Wine and Brewing Studies curricula are as follows:

- A minimum of 12 credits of course work taken for a letter grade.
- At least 12 credits must be 200 level or above, and a minimum of 6 credits must be at the 300-level or above.
- The student must complete a 3-credit breadth component. The breadth component requires that a student take courses in at least two colleges, with a minimum of three credits to be completed in a discipline other than the student’s major.
- Student must earn a C or better in each required certificate course to receive the certificate.
- Certificates will only be awarded to students who successfully complete a degree, or have completed a four-year degree.
- No more than 9 credits taken for a certificate can be used to satisfy the requirements for the student’s bachelor’s degree, a minor, or another certificate, exclusive of free or unrestricted electives.

Students must complete a minimum of 12 hours from the list of courses in the chart above. A&S 306 and PLS 335 are required. Students will select an additional 6 hours from the list of elective courses to complete the certificate.

### Undergraduate Certificate in Food Systems and Hunger Studies

Career opportunities related to food systems and hunger are expanding domestically and abroad. However, there are limited academic programs that prepare the workforce with a comprehensive approach focused on the impact of food systems on food security and health. The 12-credit hour Certificate in Food Systems and Hunger Studies provides students with a cross-disciplinary approach to understanding the impact of food systems on food security, hunger, and the overall health and wellness of a community. Through structured experiential learning opportunities, students will apply knowledge of food systems and the environment to develop and implement evidence-based strategies to end hunger in both the United States and globally.

The Certificate in Food Systems and Hunger Studies will complement numerous majors and minors offered on campus, but through a multidisciplinary approach and structured experiential learning opportunities tailored towards the interests and professional goals of the student. Students completing the certificate will have the basic knowledge and skills to provide thoughtful and impactful strategies to promote a sustainable food system and fight hunger and related issues.

All undergraduate students in good standing at the University of Kentucky are invited to declare the Certificate in Food Systems and Hunger Studies and complete the required coursework and certificate activities. Students must earn a C or better in each required certificate course to receive the certificate.

#### Required Courses

- SAG 210 Introduction to Sustainable Agriculture and Community Food Systems ................. 3
- DHN 318 Hunger, Food Behavior, and the Environment ................................................. 3
- DHN 319 Seminar in Hunger Studies ................................................................. 1
- DHN 320 Experiential Learning in Hunger Studies ........................................ 2
- plus 3 hours of pre-approved elective course work at the 200-level or above. The elective course work includes pre-approved courses as well as additional course work (3 hours), such as education abroad credit and special topics courses, that are appropriate to fulfill this requirement and should be approved in advance by the Certificate Director.
- AEC 309 International Agriculture, World Food Needs, and U.S. Trade in Agriculture Products ........................................ 3
- ANT 225 Culture, Environment and Global Issues ...... 3
- ANT 251 Global Health Inequalities ......................... 3
- CPH 201 Introduction to Public Health ........................................... 3
- ECO 456G The Economics of Poverty and Welfare Programs .................................... 3
- *GEN 300 Special Course ........................................ 3

*Course must have subtitle: Food Connections: Issues in Food Systems.
Students interested in becoming veterinarians may enroll in the College of Agriculture, Food and Environment at the University of Kentucky and complete their requirements for admission to veterinary school. Most students completing a science-based degree program can complete pre-vet requirements at the same time. Pre-veterinary advising is available for any UK student.

Although the Commonwealth of Kentucky does not have a school of veterinary medicine, it is a participating member of the Southern Regional Education Board plan, under which legal Kentucky residents may attend the Auburn University College of Veterinary Medicine. Each year 38 qualified Kentucky students are chosen from Kentucky to enter the Auburn program. There is also a plan whereby three legal Kentucky residents may be accepted by the Tuskegee University College of Veterinary Medicine each year. Admission is on a competitive basis with the final selection being made by a committee from each of the veterinary schools.

Pre-veterinary studies is not a degree program, but a pre-professional curriculum. It is strongly recommended that all pre-veterinary students choose a degree goal early in their college career. Although it is possible to complete pre-vet requirements in three years, the majority of students accepted to veterinary school have a B.S. or B.A. degree.

Due to the high level of competition for admission to any veterinary school, a student should maintain at least a 3.2 academic standing on all division to any veterinary school, a student should

Most US veterinary schools use the Veterinary Medical College Application Service (VMCAS) application.

The following is a list of courses for Auburn College of Veterinary Medicine requirements. However, some changes in the pre-veterinary curriculum may go into effect during the school year. The student has the responsibility to work closely with his or her pre-veterinary advisor in making certain that all requirements are met for consideration for acceptance.

All advanced placement credit for required courses, except for Animal Nutrition.

*All advanced placement credit for required courses, except for Animal Nutrition.

**Students should contact a UK pre-veterinary advisor regarding approved courses.

***Check with pre-veterinary advisor for approved courses.

****Science electives must be from the following courses: BIO 304, BIO 350 or ASC 325, BIO 308, BIO 542, ASC 364, BIO 561 or BIO 563, BIO 544, PHY 213.

Auburn strongly urges students to take organic chemistry and physics courses at a four-year college or university.

### Tuskegee’s Pre-Veterinary Curriculum

| Chemistry w/Lab | 4 |
| Organic Chemistry w/Lab | 4 |
| Biochemistry w/Lab | 4 |
| Physics w/Lab (300 level or above) | 8 |
| Advanced Biology (300 level or above) | 9 |
| ASC 101 Domestic Animal Biology | 3 |
| ASC 378 Animal Nutrition and Feeding | 3 |
| Mathematics | 6 |
| English | 6 |
| Social Sciences/Humanities | 6 |
| Liberal Arts | 6 |
| Advanced Biology Electives | 8 |
| Medical Terminology | 1 |

The student has the responsibility to work closely with his or her pre-veterinary advisor in making certain that all requirements are met for consideration for acceptance.

All pre-veterinary students who enter veterinary school without obtaining an Animal Science degree and petition UK for one later must fulfill the departmental requirements for an Animal Science degree. In order to be eligible for the B.S. in Animal Sciences, students must have completed all UK Core courses, all college requirements and all of the required core courses and production courses required in the Animal Sciences degree program.

### SCHOOL OF HUMAN ENVIRONMENTAL SCIENCES

Human Environmental Sciences provides science-based programs concerned with the interactions of individuals and families within multiple environmental contexts, including social, cultural, economic, and political. The specialized areas of study prepare graduates for professional roles through academic work, practicum or field experience, and research with a focus on improving quality of life for individuals and families throughout the lifespan.

There are three departments in the School of Human Environmental Sciences – Dietetics and Human Nutrition; Family Sciences; and Retailing and Tourism Management. Each department offers both undergraduate and graduate study.

For more information, visit: [http://hes.ca.uky.edu/](http://hes.ca.uky.edu/).

### Undergraduate Programs in Human Environmental Sciences

The University of Kentucky grants the following degrees in the School of Human Environmental Sciences:

- Bachelor of Science in Consumer Economics and Family Financial Counseling
- Bachelor of Science in Dietetics
- Bachelor of Science in Family Sciences
- Bachelor of Science in Hospitality Management and Tourism
- Bachelor of Science in Human Nutrition
- Bachelor of Science in Merchandising, Apparel and Textiles

### Minor Offered

The following minor is available:

- Family Sciences

### Accreditations and Approvals

All undergraduate programs in the School of Human Environmental Sciences are accredited by the American Association of Family and Consumer Sciences.

Additionally, all programs and facilities which can be accredited or approved have achieved that recognition:

- Didactic and Coordinated Programs in Dietetics are both accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND)
- The Masters Specialization in Couple and Family Therapy (M.S. in Family Sciences) is accredited by the Commission on Accreditation for Couple and Family Therapy Education (COACFTE). The program includes course work and clinical practicum required for licensure.

118
Unique Features of the School Facilities and Services

The School oversees the Research Center for Families and Children and the Family Center. The Family Center is a learning laboratory for students who provide services to students, staff, and community members. The Department of Retailing and Tourism Management oversees the Betty D. Eastin Costume Collection and the Textiles Quality Research Laboratory. The Department of Family Sciences includes two research labs. The Family Interaction Research Lab (FIRL) features equipment to measure family interactions, including psychological arousal and electrical brain activity. The Family Social Science Research Center includes equipment to complete random digit dialing research. The Department of Dietetics and Human Nutrition operates the Lemon Tree Restaurant and the Nutritional Assessment Laboratory.

Scholarships

Over fifty scholarships are awarded each year to undergraduate and graduate students enrolled in the School of Human Environmental Sciences. Information about scholarships is available from the College of Agriculture, Food and Environment Scholarship Office, N-8 Ag Science Building.

Advising

All students are assigned an advisor during their first semester in a program in the School of Human Environmental Sciences. For more information about programs or advising, contact:

Center for Student Success
N24 Ag. Science Center
University of Kentucky
Lexington, KY 40506-0091
859-257-3468

DEPARTMENT OF DIETETICS AND HUMAN NUTRITION

The Department of Dietetics and Human Nutrition provides sound undergraduate and graduate programs in foods and nutrition, and is concerned with research and extension services.

The department offers the Bachelor of Science in Dietetics and Human Nutrition. A post-baccalaureate dietetic internship is required for all students in the Department of Dietetics and Human Nutrition to complete the registration examination for dietitians. The UK DHN Dietetics Program offers two options to earn a bachelor’s degree in dietetics. Option A is the Didactic Program in Dietetics (DPD) and Option B is the Coordinated Program in Dietetics (CP). Both options lead to the Bachelor of Science in Dietetics and fulfill the foundation knowledge and/or competencies established by the Accreditation Council for Education in Dietetics, AND. The DPD and the CP are both fully accredited by ACEND. Option A, designated as the Didactic Program in Dietetics, DPD, focuses on the foundation knowledge requirements provided by the academic component of dietitian education. Students must complete the DPD curriculum to become Registered Dietitians.

Successful completion of the Dietetic Internship program to become a registered dietitian involves a combination of academic preparation, including a minimum of a baccalaureate degree, and supervised practice component and successfully passing the registration examination for dietitians.

BACHELOR OF SCIENCE IN DIETETICS with a major in Dietetics

Didactics prepares professionals who are recognized for expertise in food and nutrition. Graduates of the University of Kentucky Dietetics Program are prepared to apply to an accredited Dietetic Internship program to become Registered Dietitians to function as entry level professionals with opportunities for practice in medical nutrition therapy, community dietetics, food systems management, and/or the business of dietetics. Becoming a registered dietitian involves a combination of academic preparation, including a minimum of a baccalaureate degree, and a supervised practice component and successfully passing the registration examination for dietitians.

Admission Policy

Admission to the University is sufficient for lower-division admission to the human nutrition and dietetics majors. However, lower-level admission to the majors or any admission to the University does not guarantee upper-division admission to either of the degree programs in the Department of Dietetics and Human Nutrition. In general, admission depends upon the qualifications and preparation of applicants, as well as the availability of resources for maintaining quality instruction.

Upper-division admission into the human nutrition or dietetics degree programs is necessary in order to be granted a baccalaureate degree from the Department of Dietetics and Human Nutrition. Students who have attained a 2.8 or higher grade-point average in the premajor component required for all students in the Department of Dietetics and Human Nutrition will be assured admission.

To be considered for upper-division admission to either the human nutrition or dietetics undergraduate degree programs, an applicant must fulfill the following requirements:

1. Enrollment in the University of Kentucky.

(Students are considered for acceptance by the Department only after acceptance by the University of Kentucky.)

2. Completion of the premajor component (premajor courses include: CHE 105, CHE 107, CHE 111, CHE 113, BIO 148, DHN 212, and DHN 241) required for all students within the Department of Dietetics and Human Nutrition with a minimum premajor course work grade-point average of 2.8.*

3. Submission of an application form to the Department of Dietetics and Human Nutrition Academic Coordinator.

A student can repeat a premajor course to meet this GPA requirement. If a student repeats the course as one of their three University-accepted repeat options only the repeat grade will be factored into the premajor course work GPA. If a student repeats the course outside of the University-accepted repeat options then the course grades will be averaged and then factored into the premajor course work GPA.

Applications from students outside the University of Kentucky seeking admission to the Human Nutrition or Dietetics degree programs, whether for upper-division or lower-division status, must be received by the University Admissions Office no later than April 15 (first summer session); May 15 (second summer session); August 1 (fall semester); and December 1 (spring semester).

Students enrolled in other UK programs on campus should apply for admission prior to the priority registration period. (The appropriate deadlines are listed in the University calendar for approved times to change major.)

Lower-division students enrolled in the Department of Dietetics and Human Nutrition should apply for upper-division admission to the Human Nutrition Program or Didactic Program in Dietetics during the semester they are completing the premajor course work. The application for upper-division admission should be made before the priority registration period for the upcoming semester.

Appeal Process

Students with a GPA below 2.8 and who have completed all premajor requirements may appeal for admission into the human nutrition or dietetic programs. If the Appeals Committee feels that there is persuasive evidence that personal, academic or professional circumstances have affected a student’s grades and the student shows promise for successful completion of a degree in the Department of Dietetics and Human Nutrition, acceptance may be granted. Materials and information necessary for the appeals process will be available from the DHN Academic Coordinator. The deadline for submission of the appeals is generally 45 days prior to the beginning of the semester; however, appeals materials are not accepted for the first summer session.
mission on Dietetic Registration, CDR, the credentialing agency of the AND, which grants use of the nationally recognized credential “RD” Registered Dietitian.

Graduates of the UK DHN Option A may apply for placement in the Dietetic Internship program offered by the Department of Dietetics and Human Nutrition, School of Human Environmental Sciences, or any other ACEND-accredited dietetic internship outside the department. Students must consider the highly competitive scenario in competing for acceptance into a Dietetic Internship.

Option B, designated as the Coordinated Program in Dietetics, CP, provides the foundation knowledge requirements provided by the academic component of dietitian education (see DPDP above) and an ACEND-accredited supervised practice component. Students who have completed the premajor requirements and are interested in the Coordinated Program to attain the academic preparation and supervised practice program through the UK DHN Dietetics Program may apply for admission to Option B, the CP. Option B requires three additional semesters of didactic course work in the major requirements prior to beginning the 1,200 hour supervised practice program. Students in the CP must successfully complete the didactic and supervised practice component to receive the B.S. in Dietetics degree.

The ACEND-accredited CP is a selective admission program. Admission to the University of Kentucky DHN Dietetics Program does not guarantee admission to the Coordinated Program, CP. A limited number of students who have completed the required preprofessional courses will be admitted on the basis of cumulative grade-point average, potential qualities for becoming a successful dietitian, leadership potential and professional involvement and commitment.

The application deadline for the UK DHN CP is February 1, prior to potential fall admission in Year Three of the Dietetics Program. Year Three of the Dietetics Program is the beginning of the Major Requirements for completion of course work. Program application materials should include an application form, a letter of professional goals and qualifications, three letters of reference, and record of academic performance.

The CP Admissions Committee considers grade-point average, letter of application, work experience, honors and extracurricular activities and letters of recommendation. Students who apply to the UK DHN CP will be granted an interview where the applicant’s goals, communication skills, knowledge of the profession, and organizational and leadership skills are evaluated.

Successful CP applicants will be notified of provisional acceptance into the CP before UK’s priority registration dates for the ensuing fall semester. Final acceptance depends on successful completion of the work in progress at the time of the application and throughout the remaining didactic component prior to beginning the supervised practice component of the undergraduate dietetics program.

Transfer students are urged to contact the DHN Academic Coordinator, 203 Funkhouser Building, for a preliminary evaluation of credits well in advance of the application date. Year Three of the Dietetics Program is the beginning of the Major Requirements for completion of course work. CP applicants must be declared as major in the UK DHN dietetics program or if a transfer student, indicate intent to declare dietetics as their major. Students accepted into the CP must be majors in the UK DHN dietetics program.

Successful completion of Option B, the UK DHN CP, results in the Bachelor of Science in Dietetics degree. Graduates of Option B are eligible to sit for the national registry exam administered by the Commission on Dietetic Registration, CDR, the credentialing agency of the AND, which grants use of the nationally recognized credential “RD” Registered Dietitian.

The UK DHN ACEND-accredited Dietetic Internship, DI, selects competitive students who have completed a Didactic Program in Dietetics at UK or other ACEND-accredited institutions. Qualified graduates compete for a limited number of positions in the UK DHN DI. For information regarding the UK DHN Dietetic Internship, the application and/or screening procedures, please contact:

**Director, Dietetic Internship Program**

**DHN 342 Quantity Food Production**

**DHN 346 Management for Food Industries**
### BACHELOR OF SCIENCE IN HUMAN NUTRITION with a major in Human Nutrition

The Bachelor of Science in Human Nutrition offers appropriate preparation for further study in nutritional sciences and health-related sciences, particularly public health, pharmacy, medicine, dentistry, physical therapy, physician assistant school, optometry, and nutrition research.

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 120 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

#### UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

#### DEPARTMENT OF FAMILY SCIENCES

The Department of Family Sciences is committed to offering quality programs for students preparing to work with individuals and families in various settings including schools, private and public social agencies, and business. The focus is on enhancing the quality of life for families. Undergraduate programming is at an applied level using an interdisciplinary approach from the perspectives of individual and family development, family resource management, and family systems.

The department offers a major in family sciences. Students in the family sciences major earn the degree Bachelor of Science in Family Sciences. A minor in family sciences is available.

---

### University of Kentucky

**2019-2020 Undergraduate Bulletin**
Family sciences prepares students to work with individuals and families in unique ways. Positions include coordinators of community education and outreach, crisis management, residential care, family financial management, research and planning, and social service workers. Students completing the program are eligible to apply to become certified family life educators through the National Council on Family Relations. Contact the Department of Family Sciences, 315 Finkhouser Building, 859-257-7750, for more information about this optional credential.

Visit us on the Web at: http://fam-hes.ca.uky.edu/.

**BACHELOR OF SCIENCE IN CONSUMER ECONOMICS AND FAMILY FINANCIAL COUNSELING**

The Consumer Economics and Family Financial Counseling program provides students with the knowledge and skills to positively impact economic and financial decision making of individuals and families. The course work in consumer economics, personal finance, and financial counseling provides students with a broad skill-set to assist consumers in making sound financial decisions and ultimately improving overall family economic well-being and financial security.

Students will receive training that will allow them to pursue careers in local government agencies such as the housing authority; state agencies such as health and human services; and federal agencies such as the Social Security Administration. For students who choose to pursue the AFC (Accredited Financial Counselor) certification option, careers are available as financial counselors in credit counseling agencies and non-profits. Additionally, program graduates will have a clear understanding of consumer issues and personal finance; this educational background will result in individuals capable of making healthy and informed family and personal financial decisions leading to responsible consumerism and financial independence for themselves and their families.

To earn a Bachelor of Science in Consumer Economics and Family Financial Counseling, the student must have:

1. a minimum of 120 credit hours that meet the requirements of the UK Core, the College, and the curriculum of the major;
2. at least a 2.0 grade-point average;
3. a grade of C or higher in the following Consumer Economics and Family Financial Counseling courses required to graduate: CEF 350, CEF 351, CEF 352, CEF 402, and CEF 403; and
4. a minimum of 45 credit hours from upper division courses (300 level and above).

**UK Core Requirements**

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

Minor in Family Sciences

Any student interested in a minor in family sciences should file an application with the student’s college prior to entering the program.

Minor Requirements

FAM 251 Personal and Family Finance ........................... 3
FAM 254 Life Course Human Development ..................... 3
FAM 352 Issues in Family Sciences .................................. 3

Plus 12 additional hours in family sciences with at least 6 hours at the 300-level or above.

DEPARTMENT OF RETAILING AND TOURISM MANAGEMENT

The Department of Retailing and Tourism Management is committed to excellence in teaching, service and research resulting from innovative interdisciplinary education with a global, product, and consumer focus. Students build competencies for outstanding business and customer service in retail and hospitality organizations in a changing society. Opportunities are provided for experiential education through industry-related work experiences, internships, study tours, and exchange programs. Graduates are prepared for careers in the merchandising, hospitality and tourism industries in the developing experience economy. The department offers the Bachelor of Science in Hospitality Management and the Bachelor of Science in Merchandising, Apparel and Textiles.

Visit us on the Web at: http://rtm-hes.ca.uky.edu/.

BACHELOR OF SCIENCE IN HOSPITALITY MANAGEMENT AND TOURISM

The Hospitality Management and Tourism program focuses on the specialized knowledge needed for careers in the hospitality industry. The degree develops graduates who are consumer and technology focused within the service industry. Course work integrates hospitality marketing strategies, communications and financial management through a curriculum focused on management of facilities and operations that provide hospitality services to the public.

The curriculum challenges students to exercise an integration of creativity and business components for various tourism services such as, Food & Beverage, Lodging, Attractions, Convention and Meeting Planning, Non-Profit Management, and Special Event Coordinating. The hospitality and tourism industries are rapidly growing; as the United States’ second largest employer, a degree in Hospitality Management and Tourism provides many career opportunities for graduates.

Internships are a required component of the program, which can lead to permanent professional placement. The internship provides students with first-hand experience in hospitality and tourism related fields, allowing them to exercise classroom knowledge in a real-world setting. Visit us at: http://rtm-hes.ca.uky.edu/content/bachelor-science-hospitality-management-and-tourism.

Entrance Requirement

The minimum grade-point average for entrance of all students into the Hospitality Management and Tourism program is 2.30.

Progression Requirement

In addition, students must have completed the following premajor courses with a grade of C or better in order to progress to courses which are major requirements: CS 101, ACC 201, ACC 202, ECO 201, ECO 202, HMT 120, HMT 210, DHN 241, and HMT 270.

Graduation Requirement

Students must fulfill all prerequisites and achieve a grade of C or better in all DHN and HMT courses which are major requirements.

Each student must complete the following:

1. Complete UK Core requirements.
2. Complete 120 credit hours with a minimum grade-point average of 2.0.
3. Complete the required curriculum in the major program.

UK Core Requirements

See the UK Core section of this Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

BACHELOR OF SCIENCE IN MERCHANDISING, APPAREL, AND TEXTILES

The Merchandising, Apparel, and Textiles program blends creativity with business components to develop graduates who are consumer and technology focused. Students study concepts and develop skills necessary for understanding market trends, retail strategies, and industry structures that facilitate the development, sourcing, marketing, and merchandising of consumer goods and services in the domestic and international marketplace.

The curriculum challenges students to exercise resourceful thinking in business operations, merchandising strategies, and the interrelationships of people, technology, and materials. Course work is designed to match industry expectations and intended to provide students with the knowledge and experience they will need to understand trends and applications in the merchandising, apparel, and textiles industries.

Internships are a required component of the program, which can lead to permanent professional placement. The internship provides students with first-hand experience in merchandising, apparel, and textiles related fields, allowing them to exercise classroom knowledge in a real-world setting. Visit us at: http://rtmhes.ca.uky.edu/content/bachelor-science-merchandising-apparel-and-textiles.
