

College of Engineering

Thomas W. Lester, Ph. D., is Dean of the College of Engineering; Donn E. Hancher, Ph.D., is Associate Dean for Administration and Academic Affairs; Eric A. Grulke, Ph.D., is Associate Dean for Research and Graduate Studies; G.T. Lineberry, Ph.D., is Associate Dean for Commonwealth and International Programs; Bruce L. Walcott is Associate Dean for Economic Development and Innovations Management.

The College of Engineering offers programs leading to undergraduate and graduate degrees in computer science and the following engineering disciplines – biosystems and agricultural, chemical, civil, computer, electrical, materials, mechanical, and mining. Graduate training in biomedical engineering is also offered through the Colleges of Engineering and Medicine. The College also offers a highly multidisciplinary master of science in manufacturing systems engineering to address the growing need for enhancing manufacturing productivity and quality.

Creative accomplishment in the career of an engineer or computer scientist depends upon an education that stresses major ideas and fundamental concepts of engineering rather than specific technologies. The academic programs in engineering provide a sound background in the mathematical, physical and engineering sciences blended with the social sciences and humanities to ensure both a thorough education in engineering and a liberal education. Such an approach provides the best preparation for the engineer or computer scientist who must envisage and develop the technologies of the future and deal with scientific advances at present unknown.

The various curricula in the College of Engineering are broad, so that no student is limited to a narrow field of specialized knowledge but receives sufficient technical depth to provide a sound preparation for a professional career.

The first engineering degree from the University of Kentucky was granted in 1890. Since that time over 21,000 degrees have been awarded in the various fields of engineering. Among the alumni of the College of Engineering are those who have distinguished themselves in the major fields of industry, government and education.

Concern for the individual is a most important feature of education in the College of Engineering. Close faculty-student relationships are necessarily a meaningful part of the educational process. The faculty, in addition to their duties related to instruction and research, serve as advisors to the student in the preparation of the academic program best

“The technical engineering knowledge learned in the classroom is only part of an engineering education from UK. I would encourage all incoming students to become involved in student organizations, which can be a great way to develop both professionally and socially. Additionally, the faculty of the UK College of Engineering are generally very accessible. This helps students to succeed with understanding the material and also offers a chance to network and find out about various study abroad, co-op, internship, and research opportunities.”

– Melody Morris
Senior, Chemical Engineering
President, AIChE
Member, Tau Beta Pi and Omega Chi Epsilon
First Place AIChE National Undergraduate
Poster Competition (2005 and 2006)
AIChE Donald F. and Mildred Topp
Othmer National Scholarship Award (2006)
Outstanding Chemical Engineering
Junior Award, UK (2006)

matched to the student’s needs and intellectual capabilities.

Accreditation

The undergraduate program in Computer Science is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700.

The undergraduate programs in Biosystems and Agricultural Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Materials Engineering, Mechanical Engineering and Mining Engineering are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700.

Undergraduate Programs in Engineering

The University of Kentucky grants the following degrees in the College of Engineering:

- Bachelor of Science in Biosystems and Agricultural Engineering
- Bachelor of Science in Chemical Engineering
- Bachelor of Science in Civil Engineering
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Computer Science

- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Materials Engineering
- Bachelor of Science in Mechanical Engineering
- Bachelor of Science in Mining Engineering

While these are the official degrees granted at the bachelor’s level in the college, the prospective student is encouraged to study the wide variety of options available through technical electives, some of which are listed following the degree requirements of each department. Technical electives are included in each curriculum to allow the student to apply the fundamentals of a particular discipline to an area of special interest during the senior year.

Students in any department interested in biomedical engineering may make special arrangements to include a limited amount of such studies in the undergraduate program. The Department of Biosystems and Agricultural Engineering and the Center for Biomedical Engineering have approved an optional program in pre-biomedical engineering. Biomedical engineering is primarily the application of engineering principles to the solution of medical problems.

The Department of Chemical Engineering has approved an optional program in premedicine or pre dentistry. Students majoring in chemical engineering may arrange through their advisor to take courses that will satisfy the degree requirements for this program.

In response to industry requests, the College of Engineering and the Gatton College of Business and Economics have joined to offer a coordinated Bachelor of Science in Engineering and Masters of Business Administration. The intense five-year program may require summer courses to remain on track to complete the engineering part in four years. The MBA will be taken during a student's fifth year of study beginning in July and finishing the following June. In addition, students in the program will be required to complete a study abroad program designed specifically for the engineering/business student. This program will be conducted immediately upon completion of the MBA course requirements and the majority of costs will be paid by the program. Students earning a 3.25 or better GPA and having completed their junior year will be identified and will receive a letter asking them to apply for the program. Admission is highly competitive and is limited to 15 students. Selection is based on past academic performance, communication skills, and commitment to the program.

For engineering students interested in manufacturing, the University offers a dual-degree program. This program allows students pursuing a B.S. in Electrical Engineering or Mechanical Engineering to concurrently enroll in the M.S. in Manufacturing Systems Engineering. The BSEE/MSMSE or BSME/MSMSE dual-degree programs can be completed in five years. Students in the program can participate in intensive summer courses in Lean Manufacturing. Students in the program are strongly encouraged to be Co-op students or to do industry internships to supplement their course work with industry experience. During their junior year, students should apply to the Graduate School for admittance into the dual-degree program.

Graduate programs in the engineering fields of study are listed in *The Graduate School* section of this Bulletin.

ADMISSION POLICY

The minimum entry requirement for admission into the College of Engineering is:

- ACT math score of **23** or above, *or*
- SAT math score of **510** or above.

Four alternative admission routes include:

1. **3** or above on the Calculus AB portion of the Advanced Placement Exam;
2. Eligibility to enter **MA 110** based on the UK Math Department Placement Exam;
3. Completion of *or* the equivalent of **MA 110** with a grade of **C** or higher;
4. Completion of *or* the equivalent of **MA 109 and MA 112** with a grade of **C** or higher.

Newly admitted pre-engineering or pre-computer science students are allowed to choose an open major for one semester (12 credit minimum) called General Engineering. All students must select a program before the end of their first semester, preferably when they register for classes for their second semester.

Application must be made for admission to a specific pre-engineering program. However, subsequent transfer between programs will be permitted and may be accomplished by applying and satisfying the appropriate specified criteria.

All undergraduate degree programs are divided into pre-engineering and engineering. Pre-engineering is broadly defined as the first two years of a program, while engineering is broadly defined as the last two years of the program. Every student must be admitted to engineering standing in a specific program prior to graduation.

Engineering Standing Admission

Admission to engineering standing in a degree program is necessary in order to be granted a baccalaureate degree in engineering or computer science. Specific departmental requirements for admission to engineering standing are noted below. The same criteria are applied to transfer students with the equivalence of courses determined by the Director of Undergraduate Studies. A student must apply to the specific department for admission to engineering standing. **Note:** The cumulative grade-point average includes all listed college-level work taken at the University of Kentucky or elsewhere.

Students can request qualification for engineering standing after completing the required set of standing courses in the first three semesters of the published curriculum in their chosen program. Each program can specify its engineering standing requirements, but no program may specify a GPA higher than 2.50 for engineering standing.

Requirements by a program for engineering standing may include many items, such as courses counted in first three semesters, repeat options allowed, number of applications for engineering standing allowed, restrictions on taking upper-level courses, minimum course grades, etc. A student should refer to the UK *Bulletin* and the undergraduate advisor in their program of choice to identify the specific requirements.

Biosystems and Agricultural Engineering: Completion of a minimum of 35 semester hours acceptable towards the degree in biosystems and agricultural engineering with a minimum cumulative grade-point average of 2.50. Completion of ENG 104, MA 113, MA 114, MA 213, CHE 105 and PHY 231 with a minimum cumulative GPA of 2.5 in these courses. University repeat options may be utilized as appropriate. Students who do not

meet these GPA requirements may request consideration based upon departmental review if both of these GPA values are 2.25 or greater.

Chemical Engineering: Completion of CHE 105, CHE 107, CHE 111, CHE 113, MA 113, MA 114, MA 213, PHY 231, PHY 241, ENG 104 with a minimum cumulative grade-point average of 2.50 in these courses. Completion of CME 199 and CME 200 with grades of **C** or better. University repeat options may be applied as appropriate.

Civil Engineering: Completion of CE 106, CE 120, CE 211, CHE 105, CHE 107, EM 221, ENG 104, MA 113, MA 114, MA 213, PHY 231, PHY 241 with a minimum cumulative grade-point average (GPA) of 2.50 in these classes and a **C** or better in each of them as well as 45 or more semester credit hours. University repeat options may be utilized. Students who do not meet this GPA requirement may request consideration based upon departmental review if this core GPA is 2.25 or greater. Students are limited to two applications for engineering standing.

Computer Engineering: Completion of a minimum of 35 semester hours acceptable towards the degree in engineering with a minimum cumulative grade-point average of 2.50. Completion of MA 113, MA 114, MA 213, PHY 231, CHE 105, and ENG 104 with a minimum cumulative GPA of 2.50 in these courses. Completion of EE 211, EE 280, CS 115 and CS 215 with a minimum cumulative GPA of 2.50 in these courses. University repeat options may be utilized as appropriate. In addition, the Electrical and Computer Engineering Department will not permit a third admission into any of these courses. Students who do not meet these GPA requirements may request consideration based upon departmental review if the first two GPAs are 2.25 or greater and they receive a **C** or better in EE 211, EE 280, CS 115 and CS 215.

Computer Science: In order to graduate and take most of the 300 level and above computer science courses, a student must attain engineering standing. To attain engineering standing a student must complete the following courses with a grade-point average of at least 2.50: ENG 104, MA 113, MA 114, CS 100, CS 115, CS 215, CS 275, PHY 231, PHY 241.

Electrical Engineering: Completion of a minimum of 35 semester hours acceptable towards the degree in engineering with a minimum cumulative grade-point average of 2.50. Completion of MA 113, MA 114, MA 213, PHY 231, CHE 105, and ENG 104 with a minimum cumulative GPA of 2.50 in these courses. Completion of EE 211 and EE 280 with passing grades. University repeat options may be utilized as appropriate. In addition, the Electrical and Computer Engineering Department will not permit a third admission into any of these courses. Students who do not

meet these GPA requirements may request consideration based upon departmental review if the first two GPAs are 2.25 or greater and they receive a **C** or better in both EE 211 and EE 280.

Materials Engineering: Completion of CHE 105, CHE 107, CHE 111, CHE 113, MA 113, MA 114, MA 213, PHY 231, PHY 241, ENG 104 with a minimum cumulative grade-point average of 2.50 in these courses. Completion of MSE 201 with a grade of **C** or better. University repeat options may be applied as appropriate.

Mechanical Engineering: Mechanical Engineering students must have completed at least 35 semester credit hours applicable to the degree program with a minimum cumulative GPA of 2.50. In addition, completion of ME 101, ENG 104 (or ENG 101 and ENG 102), CHE 105, MA 113, MA 114, MA 213, PHY 231 and PHY 241 with a minimum cumulative GPA of 2.50 in these courses. Transfer students who have received more than 35 hours transfer credit in the degree program will be considered without the inclusion of ME 101. A student may exercise one of his/her official University repeat options to improve this grade-point average. Written request for exception to the allowed number of repeats should be submitted to the Director of Undergraduate Studies. In no case will there be an exception made to the minimum acceptable grade-point averages listed above.

Mining Engineering: Completion of a minimum of 35 semester hours acceptable towards the degree in mining engineering with a minimum cumulative grade-point average of 2.50. Completion of ENG, 104, MA 113, MA 114, MA 213, CHE 105 and PHY 231 with a minimum cumulative GPA of 2.50 in these courses. University repeat options may be utilized as appropriate. Students who do not meet these GPA requirements may request consideration based upon departmental review if both of these GPA values are 2.25 or greater.

COMBINED DEGREE PROGRAM

The College of Engineering has transfer agreements with several institutions throughout the state. Some of these institutions offer a "3/2" year dual degree program. Other academic institutions choose to offer this option to their students without benefit of a formal agreement. These programs enable students to enroll in a pre-engineering curriculum for the first three years at their respective schools and then transfer to the College of Engineering for the final two years. Upon completion, they receive two degrees, one from the school at which they originally enrolled and the other a Bachelor of Science in the appropriate field of engineering from the University of Kentucky.

COOPERATIVE EDUCATION PROGRAM

The nationally recognized engineering co-op program provides students the opportunity to gain practical work experience before graduation. By alternating semesters of academic study with semesters of salaried, full-time career-related employment, a full year of engineering work experience can be presented on a graduate resume. Students who wish to participate in the Cooperative Education program in the College of Engineering should contact the Director of Cooperative Education.

To be eligible for this program, students should have a minimum grade-point average of 2.5. In addition, they should complete all the courses in the first two semesters of the degree program prior to the first work tour. Students will remain on a full-time, continuing student status while they are at work by registering for a one-hour, pass/fail course. The grade, assigned by the director, is based on both a work report written by the student and an evaluation completed by the immediate supervisor. Six months of the year's co-op experience counts toward total experience required to sit for the Professional Engineer exam in Kentucky.

The Cooperative Education program contributes significantly to the student's academic motivation, career preparation, and success with job offers upon graduation. One-third of our students and nearly 100 employers nationwide participate in the UK program.

CONTINUING EDUCATION AND EXTENSION

The College of Engineering recognizes the rapid changes occurring in modern engineering technology. Students in engineering are made aware of the need to continue their studies after graduation. One of the ways to keep abreast of advances in engineering is for graduates and other engineering practitioners to participate in continuing education programs now available through the engineering colleges throughout the country.

The responsibilities of the Technology Exchange Program within the Kentucky Transportation Center, the Lean Manufacturing Program within the Center for Manufacturing at the University of Kentucky and the staff of the former Office for Informational Services and Technical Liaison (OISTL), now administratively housed in the Department of Mining Engineering, are to:

1. create and manage appropriate intensive noncredit technical courses of interest to and needed by practicing engineers;
2. develop appropriate video-based courses and materials to be of interest to practicing engineers. Such activity includes taping, live satellite uplinking, and two-way

video/audio of engineering-related courses and activities, Web-based instruction; and,

3. provide assistance in extension activities with other college and University units to be of assistance to engineers throughout the state.

SCHOLARSHIPS

The College of Engineering awards merit-based scholarships to incoming freshman and transfer students as well as to students already enrolled in the College. Freshman scholarship applications are due January 15; transfer scholarship applications are due March 15; and continuing student applications are due April 15. Awards are made for the upcoming academic year; no new awards are made for the spring semester.

For further information, contact the College of Engineering Office of Student Services.

ENGINEERING DEAN'S LIST

Students enrolled in the College of Engineering can make the Engineering Dean's List for a fall or spring semester by meeting the following requirements during the semester:

- 3.6 or better semester GPA;
- 12 or more credit hours;
- no **E**, **I** or **F** grades;
- no grades out; and
- no more than 3 hours pass/fail.

MINIMUM REQUIREMENTS FOR GRADUATION

NOTE: The following graduation requirements apply to engineering programs only. Separate graduation requirements currently apply to the Computer Science program as described in the corresponding section.

To be awarded a Bachelor of Science degree in any field of engineering, a student must:

1. complete the University and College requirements relating to writing and University Studies.
2. complete a minimum of 128 hours, exclusive of those earned in freshman college algebra and freshman college trigonometry, with a cumulative standing of not less than 2.0 on a 4.0 scale. In all departments the course requirements exceed this 128 hour minimum.
3. be admitted to engineering standing in an engineering program for at least the final semester, and complete the requirements of that program.
4. complete a minimum of 24 credit hours of departmental courses at or above the 300 level.
5. complete all departmental courses and technical electives with a cumulative standing of 2.0 or higher.
6. complete any additional departmental graduation requirements that may be listed below.

Additional Departmental Graduation Requirements

In the B.S. program in Civil Engineering, the student must earn a C or better in each CE prefix course, except that a maximum of one D is permitted in a CE prefix course numbered 400 or higher. In addition, a C or better must be earned in EM 221 and EM 302.

In the Mining Engineering Department, the student must have earned a grade of C or better in the following courses that are valuable for safe operation of mines: MNG 341, Mine Ventilation; MNG 551, Rock Mechanics; MNG 591, Mine Design Project I; and MNG 592, Mine Design Project II.

Second Bachelor's Degree Requirements

A student who has earned a bachelor's degree in the College of Engineering may earn a second bachelor's degree by meeting the following three conditions on the work applicable to the second degree:

1. The student must have been admitted to engineering standing in the program leading to the second degree at least for the final semester, or equivalent terms, prior to the completion of the degree requirements, and must be enrolled as a student in that degree program during the final semester or term.
2. The student must complete a minimum of 15 credit hours of departmentally approved courses at or above the 300 level.
3. To earn a second degree, a student must complete all degree requirements in that program.

ACADEMIC ADVISING

Sophomores, juniors, and seniors are advised by faculty in the department of the student's major. Professional staff provide academic advising and support services to entering freshman students through the Freshman Advising Center.

It is the students' responsibility to satisfy University and College requirements with consultation from their advisor.

PROBATION AND ACADEMIC SUSPENSION

Students should refer to the *Academic Requirements* section of this Bulletin for information concerning the College of Engineering's probation and academic suspension rules.

BACHELOR OF SCIENCE IN BIOSYSTEMS AND AGRICULTURAL ENGINEERING

Biosystems and agricultural engineering provides an essential link between the biological sciences and the engineering profession. This linkage is necessary for the development of production and processing systems involving biological materials that preserve our natural

resource base. Students have the latitude to develop an area of specialization relating to environmental engineering, biotechnology, food processing, machine systems, or controlled environment engineering. The curriculum is also ideal preparation for those students wanting to pursue a graduate or professional degree in biomedical engineering or veterinary medicine through the pre-biomedical and pre-veterinary medicine options.

Engineers completing this program of study find employment in industries related to the production and processing of biological products. Opportunities include placement with manufacturers, consulting firms, or state and federal regulatory agencies. Biosystems and agricultural engineers may work in the areas of biomedical/biotechnology; environmental engineering; agricultural equipment; heating, ventilation, and refrigeration equipment; food processing industries; livestock equipment and housing; or greenhouse structures.

The educational objectives for the biosystems and agricultural engineering program are as follows:

- educate engineers to design components and/or processes for advancement of agricultural, biological, or environmental systems; and
- prepare engineers for successful careers in industry, government, consulting firms, or academia. Successful careers begin with employment in their chosen field or admission to graduate and professional programs, continue with steady achievement, and include professional development.

Degree Requirements

Each student must complete the following:

University Studies Requirements See "University Studies Program" on pages 77-81 for the complete University Studies requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill University Studies areas. Students should work closely with their advisor to complete the University Studies Program requirements.

*To be selected from University Studies areas in Social Sciences, Humanities, Cross-Cultural and Electives in consultation with the academic advisor. A minimum of 15 credits in the humanities and social sciences are required.

**A minimum of 9 hours are required from the biosystems and agricultural engineering core courses: BAE 417 Design of Machine Systems, BAE 427 Structures and Environment Engineering, BAE 437 Land and Water Resources Engineering, and BAE 447 Bioprocess Engineering Fundamentals.

***A minimum of 12 hours are to be taken in addition to the 9 core hours selected by the student. The technical electives allow the student an opportunity to concentrate or gain depth in one or more of the various specialty areas of biosystems and agricultural engineering. The technical electives must be selected from the courses listed below and approved by the student's academic advisor. Other courses may be considered, each on its individual merit. In selecting technical electives students must concentrate their work in one or more of the professional areas of biosystems and agricultural engineering. These areas include: bio-environmental engineering, food and bioprocess engineering, machine systems/automation engineering and controlled environment engineering. Interested students are encouraged to contact the Department of Biosystems and Agricultural Engineering to discuss technical elective sequences.

Approved technical electives: BAE 417, 427, 435G, 437, 438G, 447, 450, 502, 513, 515, 536, 537, 545, 549, 580, 581, 599; BCH 401G; BME 481G, 501, 530; CE 351, 381, 382, 441, 451, 461G, 471G, 482, 506, 549; CHE 236; CME 425, 462, 599; EE 402G; FSC 434G, 530, 536, 538; KHP 515; ME 321, 344, 406, 440, 501, 542; PLS 366, 566, 575, 576.

†Free electives are any University course excluding more elementary versions of required courses such as pre-calculus math or PHY 211.

BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING

A foundation in mathematics, chemistry, and physics is required for the study of chemical engineering. Fundamental principles related to the transformations of matter and energy are developed in areas such as thermodynamics, mass transfer, reactor design, and chemical process design. Undergraduate elective options are available in polymers and environmental protection. A program is also available to fulfill premedical and pre dental requirements simultaneously with requirements for the B.S. in chemical engineering.

The education outcomes of the undergraduate education program are as follows:

- prepare students for successful chemical engineering practice and/or academic pursuits;
- provide a broad education as a foundation for life-long learning; and
- equip students with the ability to carry out in-depth solution strategies to chemical engineering problems.

Degree Requirements

The following curriculum meets requirements for the B.S. in chemical engineering, provided the student satisfies the graduation requirements listed earlier.

Each student must complete the following:

University Studies Requirements Hours
See "University Studies Program" on pages 77-81 for the complete University Studies requirements. Students should work closely with their advisor to complete the University Studies Program requirements.

Courses marked with an asterisk (*) may also be used to satisfy University Studies requirements.

Premajor Requirements	Hours

Subtotal: Major Hours 56

In addition to the premajor and major requirements, students must complete the following:

Chemical Engineering Electives Hours

Total of 6 credit hours must be chosen. Courses recommended are listed below. Other courses may be considered, each on its individual merit.

CME 395 Special Problems in Chemical Engineering	3
CME 404G Polymeric Materials	3
CME 505 Analysis of Chemical Engineering Problems	3
CME 515 Air Pollution Control	3
CME 554 Chemical and Physical Processing of Polymer Systems	3
CME 580 Design of Rate and Equilibrium Processes for Water Pollution Control	3
CME 599 Topics in Chemical Engineering	3

Technical Electives

Select one (must be a 3 or more credit hour course) from the following:

CME 395, 404G, 505, 515, 554, 580, 583; CHE 226 and all above 441; CS 320 and above; MA 321, 322, 416G, 432G, 433G, 471G, 481G; PHY any above 241; STA 381 and higher; BCH 401G, 501; MSE 401G, 402G, 403G, 462, 550; any BIO 150 and above; any Engineering course above that required, e.g. above ME 330.

Chemistry Elective (must total 3 credits)
CHE 226 and above (if not taken as technical elective).

Supportive Elective (must total 3 credits)
The supportive elective can be any course that carries college credit and is not a more elementary version of a required course. For example, college algebra would not be satisfactory because it is more elementary than the required calculus courses. The student completing 3 co-op tours (EGR 399) may count the co-op experience toward the supportive elective.

Subtotal: Electives: 15

Graduation Writing Requirement

ENG 2XX Writing Intensive Course

TOTAL HOURS: 132

Curriculum**Freshman Year**

First Semester	Hours
CME 101 Introduction to Chemical Engineering	1
CHE 105 General College Chemistry I	3
CHE 111 Laboratory to Accompany General Chemistry I	1
ENG 104 Writing: An Accelerated Foundational Course	4
MA 113 Calculus I	4
University Studies*	3

Second Semester

CME 199 Computational Tools in Chemical Engineering	3
CHE 107 General College Chemistry II	3
CHE 113 Laboratory to Accompany General Chemistry II	2
MA 114 Calculus II	4
COM 199 Presentational Communication Skills	1
University Studies*	3

Sophomore Year

First Semester	Hours
CME 200 Process Principles	3
MA 213 Calculus III	4
PHY 231 General University Physics	4
PHY 241 General University Physics Laboratory	1
CHE 230 Organic Chemistry I	3
CHE 231 Organic Chemistry Laboratory I	2

Second Semester

CME 320 Engineering Thermodynamics	4
CHE 232 Organic Chemistry II	3
MSE 201 Materials Science	3
MA 214 Calculus IV	3
PHY 232 General University Physics	4

Junior Year

First Semester	Hours
CME 415 Separation Processes	3
CME 471 Seminar	1
CHE 446G Physical Chemistry for Engineers	3
CME 330 Fluid Mechanics	3
Technical Elective***	3
ENG 2XX Writing Intensive Course	3

Second Semester

CME 006 The Engineering Profession (Junior and Senior)	0
CME 420 Process Modeling in Chemical Engineering	3
CME 425 Heat and Mass Transfer	4
CME 432 Chemical Engineering Laboratory I	2
CHE Elective†	3
University Studies*	6

Senior Year

First Semester	Hours
CME 006 The Engineering Profession (Junior and Senior)	0
CME 470 Professionalism, Ethics and Safety	1
CME 433 Chemical Engineering Laboratory II	3
CME 455 Chemical Engineering Process Design I	3
CME 550 Chemical Reactor Design	3
Supportive Elective	3
CME Elective	3

Second Semester

CME 006 The Engineering Profession (Junior and Senior)	0
CME 456 Chemical Engineering Process Design II ...	4
CME 462 Process Control	3
University Studies*	3
CME Elective	3
Bio Elective or Materials Elective	3

*Selected from University Studies areas in Social Science (6 credits), Humanities (6 credits), Cross-Cultural (3 credits) and Electives (3 credits/one-half the requirement) in consultation with the academic advisor to assure ABET depth and breadth requirements.

**Supportive elective is to be chosen from any University course, excluding a more elementary version of a required course, such as precalculus mathematics or PHY 211.

CME Electives: Courses recommended as Chemical Engineering electives are listed below. Other courses will be considered, each on its individual merit.

CME 395 Special Problems in Chemical Engineering
CME 404G Polymeric Materials

CME 505 Analysis of Chemical Engineering Problems

CME 515 Air Pollution Control

CME 554 Chemical and Physical Processing
of Polymer Systems

CME 580 Design of Rate and Equilibrium Processes
for Water Pollution Control

CME 599 Topics in Chemical Engineering

***Technical elective (must be a 3 or more credit hour course) and may be selected from the following: CME 395, 404G, 505, 515, 554, 580; CHE 226 and all above 441; CS 320 and above; MA 321, 322, 416G, 432G, 433G, 471G, 481G; PHY any above 241; STA 381 and higher; BCH 401G, 501; MSE 401G, 402G, 403G, 550; any BIO 150 and above course; any engineering course above that required, e.g. above ME 330.

†CHE elective (must total 3 credits): CHE 226 and above (if not taken as technical elective).

BACHELOR OF SCIENCE IN CHEMICAL ENGINEERING— PADUCAH

In addition to the program on the Lexington campus, students can pursue a B.S. degree in chemical engineering through the College's Extended Campus Program in Paducah, Kentucky. The Paducah program uses the same curriculum as the main campus, but provides the opportunity for students to complete all B.S. degree requirements without having to relocate to Lexington.

Consistent with the Vision and Mission statements of the University of Kentucky, the chemical engineering program at the UK Extended Campus in Paducah strives to meet the following specific educational objectives:

- Prepare our students for successful chemical engineering practice and/or academic pursuits with a broad education as a foundation for life-long learning and with the ability to carry out in-depth solution strategies to chemical engineering problems,
- Offer a program that complies with ABET 2000 Engineering Criteria and set educational objectives that are consistent with the College of Engineering's Vision and Mission statements using input from constituencies (students, faculty, alumni, and employers), and
- Develop a process for ongoing evaluation and review of the objectives to ensure the program curriculum and processes achieve education objectives.

The Paducah chemical engineering program collaborates with West Kentucky Commu-

nity and Technical College to provide the basic math and science courses, as well as the general studies course requirements. Murray State University faculty members teach upper-level non-engineering courses on the Paducah campus. On-site UK chemical engineering faculty members and jointly-appointed Murray engineering faculty members teach the upper-division engineering courses. Program admission, course registration, student advising and other student services all can be completed at the Paducah site.

Degree Requirements

The curriculum requirements for the B.S. degree in chemical engineering in Paducah are identical to those on the Lexington campus. Refer to those degree requirements for the Paducah degree program. Not all the technical electives listed for the Lexington program will be available in Paducah. The student must satisfy the College graduation requirements listed earlier.

BACHELOR OF SCIENCE IN CIVIL ENGINEERING

The student of civil engineering has a broad field of study to provide a strong foundation for entry into the profession or graduate school. Major areas include construction engineering, environmental engineering, geotechnical engineering, materials engineering, structural engineering, transportation engineering, and water resources engineering.

The civil engineering program at the University of Kentucky strives to meet the following educational objectives:

- advise its students in the pursuit of academic success and monitor their progress;
- prepare its students for successful civil engineering careers; and
- provide its students with a broad education that will serve as the foundation for professional licensure and life-long learning.

Degree Requirements

The following curriculum meets the requirements for a B.S. in civil engineering, provided the student satisfies the graduation requirements listed earlier.

Each student must complete the following:

University Studies Requirements Hours
See "University Studies Program" on pages 77-81 for the complete University Studies requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill University Studies areas. Students should work closely with their advisor to complete the University Studies Program requirements.

Math
MA 113 Calculus I

Inference - Logic
MA 113 Calculus I

Oral Communication

COM 252 Introduction to Interpersonal Communication or	
COM 281 Communication in Small Groups	3

Natural Sciences

CHE 105 General College Chemistry I	3
CHE 107 General College Chemistry II	3

Social Sciences

Technical Elective***	3
USP Cross-Cultural Elective [5]	3

[R] Recommended University Studies course.

**CE communication throughout the curriculum component.

***Technical Electives are to be chosen from any of the courses at the 300-level or above that carry a CE prefix and in which a student is qualified to enroll, exclusive of required courses. CHE 230 or CHE 236 is acceptable. Engineering elective courses are typically taught once per year.

[1] To be chosen from COM 252 or COM 281.

[2] To be chosen from ME 220 or EM 313.

[3] Math or Science Elective Options: MA 321, MA 322, MA 416G, MA 432G, BIO 208, CHE 230, CHE 236, EE 305, GEO 409G, GLY 430, GLY 560, MNG 551, or the other half of the Engineering Science Elective in [2].

[4] To be selected from: CE 482 (non-structural option) or CE 486G and CE 487G (technical elective).

[5] Either the Humanities or Cross-Cultural Elective can be used to simultaneously satisfy the second-tier University Writing requirement. In the Humanities area, choosing from the ENG 200-level humanities courses satisfies both. In the Cross-Cultural area, ENG 264 satisfies both. Only one second-tier writing course is required to meet the graduation writing requirements. Completion of the second-tier course must be in the sophomore year or later and after ENG 104.

[6] Choose from: CE 403, 451, 505, 533, 539, 549, 579, or 589. (NOTE: CE 579 is a co-requisite for CE 589.)

[7] Supportive elective is to be chosen from any University course, excluding a more elementary version of a required course, such as precalculus mathematics or PHY 211. However, each CE area has at least one recommendation for the supportive elective. Please review the Optional Specialization section in the Civil Engineering Undergraduate Handbook. The supportive elective can be taken pass-fail.

**BACHELOR OF SCIENCE IN
CIVIL ENGINEERING**

**Joint-Degree Program Offered by
Western Kentucky University (WKU)
and the University of Kentucky (UK)**

As part of the “Strategy for Statewide Engineering Education in Kentucky,” adopted July 17, 2000 by all the chief executive officers of Kentucky universities and endorsed by the Kentucky Council on Postsecondary Education (CPE), the vision was expressed that “access to undergraduate engineering education will expand primarily through the creation of joint programs managed by multiple post-secondary institutions.” In response, WKU and UK now jointly offer an ABET-accredited baccalaureate degree in civil engineering on the WKU campus in Bowling Green, Kentucky. By CPE definition, a joint-degree program is “a program that is mutually sponsored by two or more institutions leading to a single credential or degree, which is conferred by both or all participating institutions. All institutions share responsibility for all aspects of the program’s delivery and quality.”

The joint civil engineering program is one of only four such joint-degree programs in Kentucky; the others include a joint-degree program between WKU and UK in mechanical engineering, between WKU and the University of Louisville (UL) in electrical engineering, and between Murray State University and UL in electrical and telecommunications engineering.

The WKU/UK joint programs emphasize a project-oriented educational approach. Courses are provided by both WKU and UK faculty. Students are required to complete a minimum of 16 credit hours of engineering course work taught by UK engineering faculty. At present, the UK contribution is provided by distance delivery via interactive tele-

vision. The curriculum of the joint civil engineering program is under the direction of a joint program faculty, with equal representation from each participating institution. The curriculum for entering students requires 135.5 credit hours, with the General Studies component based on the requirements of WKU. Students who complete the program will receive a B.S. degree conferred jointly by WKU and UK. Under the terms of the agreements between the degree-awarding institutions, WKU provides basic administrative support for students in the joint-degree program, including admission services, registration, and student financial aid. In addition, academic advising, laboratory and equipment support, and library and media resources are supplied by WKU.

The civil engineering curriculum approved within UK is listed below. The joint program faculty are responsible for on-going review of the curricular requirements.

Degree Requirements

Freshman Year

Fall Semester	Hours
CE 175 Freshman Experience	2
AMS 202 CADD for Architecture	3

CE 480/481 Surveying III & Lab	3

**BACHELOR OF SCIENCE IN
COMPUTER ENGINEERING**

The Computer Engineering program prepares students for a productive career through developing strong foundations in math, physics, computer, and general engineering skills necessary for contributing to a rapidly developing field. Computer engineering centers on integrating hardware and software to create computing systems through combining computing hardware concepts from electrical engineering with system software issues from computer science. In the junior and senior years the program includes courses in specific application areas such as embedded systems, computer architecture, compilers, operating systems, digital logic design, software engineering, and networking.

The undergraduate education program focuses on achieving the following goals:

- Maintain a curriculum focused on developing relevant engineering skills, knowledge, and experience with current technologies.

- Provide opportunities for students to develop leadership, communication, and teamwork skills.
- Provide an environment that encourages independent learning, problem identification, and problem solving.
- Raise awareness of the engineers' professional and ethical responsibilities to society.

Degree Requirements

Each student must complete the following:

University Studies Requirements

See "University Studies Program" on pages 77-81 for the complete University Studies requirements. Students should work closely with their advisor to complete the University Studies Program requirements.

*Oral communications elective is satisfied by any one of the following courses COM 181, COM 252, COM 281, COM 287.

**Supportive elective is to be chosen from any University courses, excluding more elementary versions of required courses, such as precalculus mathematics or PHY 211.

†Technical elective may be selected from upper-division engineering, mathematics, statistics, computer science, physics, or other technically-related fields excluding more elementary version of required courses. To be selected in consultation with academic advisor.

††EE/CS technical electives are senior level courses in either the computer science or electrical engineering disciplines. These include 400-level CS courses and 500-level CS and EE courses with emphasis in the computer engineering area and excluding EE 595. To be selected in consultation with academic advisor.

Recommended EE/CS Technical Electives:

CS 405G Introduction to Database Systems
CS 415G Graph Theory
CS 416G Principles of Operations Research I
CS 422 Numerical Solutions of Equations
CS 450G Fundamentals of Programming Languages
CS 463G Introduction to Artificial Intelligence
CS 471G Networking and Distributed Operating Systems
CS 485G Topics in Computer Science (Subtitle required)
EE 581 Advanced Logical Design
EE 582 Hardware Description Languages and Programmable Logic
EE 584 Introduction of VLSI Design and Testing
EE 585 Fault Tolerant Computing
EE 586 Communication and Switching Networks
EE 587 Microcomputer Systems Design
EE 599 Topics in Electrical Engineering (Subtitle required)

**BACHELOR OF SCIENCE IN
COMPUTER SCIENCE**

The Computer Science program includes courses dealing with the design, implementation, analysis, and software-engineering issues related to algorithms and computer programs. A foundation in continuous and discrete mathematics is used to study numerical problems and to analyze algorithms. Through required and elective courses students are exposed to the fundamentals of computing theory and algorithms, programming languages, language translation and compiling, graphics, scientific computing, artificial intelligence, networks, databases, and operating systems.

The undergraduate program focuses on achieving the following goals:

- attract talented, motivated students with a strong background in mathematics and the sciences, some familiarity with computers and a desire to shape the future;
- develop the skills needed to analyze and synthesize solutions to computing problems;
- develop communications and teamwork skills in our students;
- open the doors to exciting, creative and economically-rewarding career opportunities;
- pave the way to educational opportunities at the graduate level; and
- instill a desire and ability for life-long learning in our students.

Degree Requirements

Each student must complete the following:

University Studies Requirements

See “University Studies Program” on pages 77-81 for the complete University Studies requirements. Students should work closely with their advisor to complete the University Studies Program requirements.

Courses marked with an asterisk (*) may also be used to satisfy University Studies requirements.

Premajor Requirements **Hours**

CS 100 The Computer Science Profession	1
CS 115 Introduction to Computer Programming	3
CS 215 Introduction to Program Design, Abstraction, and Problem Solving	4
CS 216 Introduction to Software Engineering	3
CS 275 Discrete Mathematics	4
ENG 104 Writing: An Accelerated Foundational Course	4
*MA 113 Calculus I	4
MA 114 Calculus II	4
*PHY 231 General University Physics	4
*PHY 241 General University Physics Laboratory ..	1
Subtotal: Premajor Hours	32

Major Requirements **Hours**

*PHY 232 General University Physics	4
*PHY 242 General University Physics Laboratory	1
Additional Science Electives	6
MA 213 Calculus III or	
MA 322 Matrix Algebra and its Applications	3-4
EE 280 Design of Logic Circuits	3
*COM 181 Basic Public Speaking or	
*COM 252 Introduction to Interpersonal Communication or	
*COM 281 Communication in Small Groups or	
*COM 287 Persuasive Speaking	3
STA 281 Probability and Statistics Using Interactive Computer Techniques	3
CS 315 Algorithm Design and Analysis	3
CS/MA 321 Introduction to Numerical Methods	3
CS 375 Logic and Theory of Computing	3
CS/EE 380 Microcomputer Organization	3
CS 470G Introduction to Operating Systems	3
CS 499 Senior Design Project	3
Subtotal: Major Hours	41-42

Computer Science Electives **Hours**

Choose three from the following list:	
CS 335 Graphics and Multimedia	3
CS 405G Introduction to Database Systems	3
CS 441G Compilers for Algorithmic Languages	3
CS 450G Fundamentals of Programming Languages	3
CS 463G Introduction to Artificial Intelligence	3
Any other CS class at the 300-level or above	3
Subtotal: CS Electives	9

Technical Electives

Choose 12 credit hours of the following:	
MA 214 Calculus IV or any 300-level or higher classes selected from computer science, electrical engineering, mathematics, or the College or Business and Economics	
Subtotal: Technical Electives	12

Free Electives

Two courses must be in areas other than computer science, science, engineering, or mathematics to satisfy the University Studies Program and the computer science ABET accreditation requirements. Any remaining electives should be selected to meet the minimum total of 128 hours required for graduation

Subtotal: Free Electives minimum of 6

TOTAL HOURS 128

*These courses may be used to satisfy University Studies requirements.

BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING

The undergraduate electrical engineering degree program seeks to produce graduates who are trained in the theory and practice of electrical and computer engineering and are well prepared to handle the professional and leadership challenges of their careers.

The following objectives relate to expectations for program graduates while in the early stages of their careers. These objectives are regularly assessed through surveys of employers and alumni. The EE program objectives are:

- Maintain a curriculum focused on developing relevant engineering skills, knowledge, and experience with current technologies.
- Provide opportunities for students to develop leadership, communication, and teamwork skills.
- Provide an environment that encourages independent learning, problem identification, and problem solving.
- Raise awareness of the engineers' professional and ethical responsibilities to society.

Degree Requirements

Each student must complete the following:

University Studies Requirements

See "University Studies Program" on pages 77-81 for the complete University Studies requirements. Students should work closely with their advisor to complete the University Studies Program requirements.

Premajor Requirements Hours

EE 211 Circuits I	4
EE 221 Circuits II	3

EE 582 Hardware Description Languages and Programmable Logic	
EE 585 Fault Tolerant Computing	
EE 587 Microcomputer Systems Design	
EE 599 Topics in Electrical Engineering (Subtitle required)	

BACHELOR OF SCIENCE IN MATERIALS ENGINEERING

The materials engineer is responsible for the preparation, fabrication, selection, use and reuse of existing materials and for the development of new and improved materials. The professional in this field is often called on to consider metals, ceramics and polymers. The engineer considers chemical, electronic, magnetic, optical, and mechanical properties of materials.

The goals of the undergraduate program are as follows:

- Produce graduates with an understanding of materials, who can function independently as professionals in the practice of engineering or as successful members of related graduate and professional programs.
- Produce graduates who can use their materials educations to continue their careers with steady advancement and professional development.

Degree Requirements

Each student must complete the following:

Premajor Requirements	Hours
ENG 104 Writing: An Accelerated Foundational Course	4
CHE 105 General College Chemistry I	3
CHE 107 General College Chemistry II	3
CHE 111 Laboratory to Accompany General Chemistry I	1
CHE 113 Laboratory to Accompany General Chemistry II	2
MA 113 Calculus I	4

***Choose from the list of Technical Electives above.

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

The training of the mechanical engineer is the broadest among the several fields of engineering. The mechanical engineer uses the techniques of mathematics combined with a specialized knowledge of the thermal and energy sciences, solid and fluid mechanics, and the properties of materials. This information is supplemented by an understanding of manufacturing processes, the design and control of systems, and the economics of the technological community.

Our graduates will be able to apply knowl-

edge of mathematics, science and mechanical engineering to the solution of problems, particularly in the areas of thermodynamics and energy systems; heat transfer; fluid mechanics; mechanical systems and controls; mechanical design; finite element methods and computer-aided graphics; manufacturing; instrumentation; and experimental method.

Consistent with the Vision and Mission statements of the University of Kentucky, the undergraduate programs in mechanical engineering strive to meet the following educational objectives:

1. Mechanical Engineering programs will prepare our students for successful practice or academic pursuits in mechanical engineering.
2. Our graduates will have the knowledge in analytical, computational, and experimental methods to begin engineering practice or continue their education. This will include the ability to design components and systems and to solve engineering problems using current analysis and computational methods.
3. Our graduates will have a broad education and communication skills needed for a variety of career options and an appreciation of the need for life-long learning.
4. Our graduates will have an understanding of the societal, environmental and ethical responsibilities of engineers.

Degree Requirements

Each student must complete the following:

University Studies Requirements Hours
See "University Studies Program" on pages 77-81 for the complete University Studies requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill University Studies areas. Students should work closely with their advisor to complete the University Studies Program requirements.

Courses marked with an asterisk (*) may also be used to satisfy University Studies requirements.

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING – PADUCAH

In addition to the program on the Lexington campus, students can pursue a B.S. degree in mechanical engineering through the College’s Extended Campus Program in Paducah, Kentucky. The Paducah program uses the same curriculum as the main campus, but provides the opportunity for students to complete all B.S. degree requirements without having to relocate to Lexington.

Consistent with the Vision and Mission statements of the University of Kentucky, the mechanical engineering program at the UK Extended Campus in Paducah strives to meet the following educational objectives:

- The Mechanical Engineering program will prepare our students for successful practice or academic pursuits in mechanical engineering.
- Our graduates will have the technical skills needed to begin engineering practice or to continue their education. These will include the knowledge of how to design and conduct experiments, mathematics and analytical skills, principles

for the design of components and systems, as well as a familiarity with software tools common to the field.

- Our graduates will have the broad education and communication skills needed for a variety of career options, and an appreciation of the need for life-long learning to maintain their competency.
- Our graduates will have an understanding of the social and ethical responsibilities of engineers, and the impact that engineers have in environmental and societal issues.

The Paducah mechanical engineering program collaborates with West Kentucky Community and Technical College to provide the basic math and science courses, as well as the general studies course requirements. Murray State University faculty members teach upper-level non-engineering courses on the Paducah campus. On-site UK mechanical engineering faculty members and jointly-appointed Murray engineering faculty members teach the upper-division engineering courses. Program admission, course registration, student advising and other student services all can be completed at the Paducah site.

Degree Requirements

The curriculum requirements for the B.S. degree in mechanical engineering in Paducah are identical to those on the Lexington campus. Refer to those degree requirements for the Paducah degree program. Not all the technical electives listed for the Lexington program will be available in Paducah. The student must satisfy the College graduation requirements listed earlier.

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING

Joint-Degree Program Offered by Western Kentucky University (WKU) and the University of Kentucky (UK)

As part of the “Strategy for Statewide Engineering Education in Kentucky,” adopted July 17, 2000 by all the chief executive officers of Kentucky universities and endorsed by the Kentucky Council on Postsecondary Education (CPE), the vision was expressed that “access to undergraduate engineering education will expand primarily through the creation of joint programs managed by multiple post-secondary institutions.” In response, WKU and UK now jointly offer an ABET-accredited baccalaureate degree in mechanical engineering on the WKU campus in Bowling Green, Kentucky. By CPE definition, a joint-degree program is “a program that is mutually sponsored by two or more institutions leading to a single credential or degree, which is conferred by both or all participating institutions. All institutions share responsibility for all aspects of the program’s delivery and quality.”

The joint mechanical engineering program is one of only four such joint-degree programs in Kentucky; the others include a joint-degree program between WKU and UK in civil engineering, between WKU and the University of Louisville (UL) in electrical engineering, and between Murray State University and UL in electrical and telecommunications engineering.

The WKU/UK joint programs emphasize a project-oriented educational approach. Courses are provided by both WKU and UK faculty. Students are required to complete a minimum of 16 credit hours of engineering course work taught by UK engineering faculty. At present, the UK contribution is provided by distance delivery via interactive television. The curriculum of the joint mechanical engineering program is under the direction of a joint program faculty, with equal representation from each participating institution. The curriculum for entering students requires 139.5 credit hours, with the General Studies component based on the requirements of WKU. Students who complete the program will receive a B.S. degree conferred jointly by WKU and UK. Under the terms of the agreements between the degree-awarding institutions, WKU provides basic administrative support for students in the joint-degree program, including admission services, registration, and student financial aid. In addition, academic advising, laboratory and equipment support, and library and media resources are supplied by WKU.

The mechanical engineering curriculum approved within UK is listed below. The joint program faculty are responsible for on-going review of the curricular requirements.

Category E Elective	3
Total	15

TOTAL HOURS 139.5

(1) The following UK courses are offered at WKU through the University of Kentucky: EM 221, EM 313, ME 220, ME 321, ME 344, and at least one Technical Elective (18-21 hours of UK courses).

(2) The following additional courses are based on UK syllabus, but taught by WKU: EM 302, ME 325, 330.

(3) Technical Electives: Two lists of ME Technical Electives are available, one for WKU courses and one for UK courses. Students must select one from each list, with the remaining ME Technical Elective selected from either list.

(4) Check the WKU undergraduate catalog for category B, C, E and F above.

Category B electives – Humanities

Category C electives – Social and Behavioral Sciences

Category E electives – World Cultures and American Cultural Diversity

Category F electives – Health and Wellness

BACHELOR OF SCIENCE IN MINING ENGINEERING

Mining engineering requires the broadest knowledge of sciences and other fields of engineering in its practice after graduation. The curriculum below prepares the student for a career in the field of mining.

The objectives of the undergraduate program in mining engineering take into consideration the intellectual and personal development of students so that after graduation they will be able to:

- Advance in their careers, adapting to new situations and emerging problems, through the application of general purpose engineering skills and the core technical disciplines, analytical procedures, and design practices of the mining engineering profession.
- Function ethically in a variety of professional roles such as mine planner, designer, production manager, mineral processing engineer, consultant, technical support representative and regulatory specialist with emphasis on the mineral industries of Kentucky and the surrounding region.
- Pursue advanced degrees in mineral-related fields and also those fields that support the mineral industries such as business and law.
- Utilize professional skills such as effective communication, teamwork, and leadership.
- Demonstrate an understanding of the critical role mining engineers play in society with respect to health, safety, and the environment in tangible ways such as achieving professional licensure.

Visit our Web page at: www.engr.uky.edu/mng.

Degree Requirements

Each student must complete the following:

University Studies Requirements Hours
See "University Studies Program" on pages 77-81 for the complete University Studies requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill University Studies areas. Students should work closely with their advisor to complete the University Studies Program requirements.

Courses marked with an asterisk (*) may also be used to satisfy University Studies requirements.

Math

MA 113 Calculus I 4

Inference – Logic

MA 113 Calculus I 4

Written Communication

ENG 104 Writing: An Accelerated Foundational Course 4

Oral Communication

COM 199 Presentational Communication Skills 1
plus MNG 371 and MNG 592

Natural Sciences	
CHE 105 General College Chemistry I	3
CHE 107 General College Chemistry II	3
Social Sciences	
ECO 201 Principles of Economics I	3
plus one other course from USP listing	3
Humanities	
Two courses from USP listing	6
Cross-Cultural	
Select from list	3
USPElectives	
Technical Elective	3
Supportive Elective	3
Premajor Requirements Hours	
*ENG 104 Writing: An Accelerated Foundational Course	4
*MA 113 Calculus I	4
MA 114 Calculus II	4
MA 213 Calculus III	4
MA 214 Calculus IV	3
*CHE 105 General College Chemistry I	3
*CHE 107 General College Chemistry II	3
PHY 231 General University Physics	4
PHY 232 General University Physics	4
PHY 241 General University Physics Laboratory	1
PHY 242 General University Physics Laboratory	1
Subtotal: Premajor Hours	35
Graduation Writing RequirementHours	
Select course from list of Graduation Writing Requirement courses	3
Major Requirements Hours	
CS 221 First Course in Computer Science for Engineers	2
*ECO 201 Principles of Economics I	3
EE 305 Electrical Circuits and Electronics	3
EM 221 Statics	3
EM 313 Dynamics	3
EM 302 Mechanics of Deformable Solids	3
GLY 220 Principles of Physical Geology	4
GLY 230 Fundamentals of Geology I	3
ME 220 Engineering Thermodynamics I	3
ME 330 Fluid Mechanics	3
MNG 101 Introduction to Mining Engineering	1

MNG 341 Mine Ventilation	3
MNG 431 Mines Systems Engineering and Valuation	4
MNG 551 Rock Mechanics	4
MNG 591 Mine Design Project I	1
University Studies*	3

Second Semester

MNG 592 Mine Design Project II	3
Supportive Elective**	3
Technical Electives††	6
University Studies*	3

*To be selected from University Studies areas in Social Sciences (6 credits), Humanities (6 credits), and Cross-Cultural (3 credits) in consultation with the academic advisor. Of these totals, 3 credits of Social Sciences are fulfilled by ECO 201. A minimum of 15 credits in the humanities and social sciences are required.

**The supportive elective is to be chosen from any University course outside the student's major excluding more elementary versions of required courses such as precalculus mathematics.

***The Mineral Processing Technical Elective is to be chosen between MNG 575, Coal Preparation Design, and MNG 580, Mineral Processing Plant Design.

†The course selected to fulfill the Graduation Writing Requirement can also be used to satisfy the Cross-Cultural requirement or 3 credits of the Humanities requirement. Selection of ENG 264 will satisfy the Graduation Writing Requirement and the Cross-Cultural requirement. Alternatively, selection of one course from among ENG 230, ENG 231, ENG 232, ENG 233, ENG 234, ENG 261, ENG 262, ENG 270, or ENG 271 will satisfy the Graduation Writing requirement and 3 credits of the Humanities requirement. Please consult the *Schedule of Classes* for updates to the list of courses.

††Courses recommended as technical electives are listed below. These courses must be chosen with the approval of the student's advisor to ensure that the curriculum includes sufficient engineering design content.

Technical Electives: Of the two technical electives in the undergraduate program, students are required to select at least one from departmental courses. The remaining course, chosen with the approval of the student's advisor, can be used to fulfill specific educational goals.

- MNG 511 Mine Power System Design
- MNG 561 Mine Construction Engineering I
- MNG 563 Simulation of Industrial Production Systems
- MNG 572 Advanced Coal Preparation
- MNG 575 Coal Preparation Design
- MNG 580 Mineral Processing Plant Design
- MNG 581 Geostatistics
- MNG 599 Topic in Mining Engineering
- BAE 438G Fundamentals of Groundwater Hydrology
- CE 441 Fluid Mechanics II
- CE 471G Soil Mechanics
- GLY 450G Sedimentary Geology
- GLY 585 Hydrogeology
- PLS 501 Reclamation of Disturbed Land
