The Academic Minor

Many departments have designed academic minors for the convenience of undergraduate students.

A minor is a structured group of courses that leads to considerable knowledge and understanding of a subject, although with less depth than a major. Some employers consider minors desirable, and the corresponding major requirements at the University may stipulate a minor. Some students choose to complement their major program with a minor in a related field or even in an entirely different field of interest. Students interested in pursuing an academic minor should contact their college dean’s office and the department responsible for the minor program for guidance and advising.

Please note that undergraduate students can only complete a minor in addition to and as a complement to a major. The University does not award stand-alone minors.

Minor in Entomology

Preminor Requirement
Two semesters of introductory biology ................................................ 6

Minor Requirements

Required: ENM 300 General Entomology .................................................. 3

Select the remaining credits (12 hours) from:
ENT 310 Insect Pests of Field Crops ................................................... 3
ENT 320 Horticultural Entomology ...................................................... 3
ENT 340 Livestock Entomology ........................................................... 2
ENT 360 Genetics ................................................................................. 3
ENT 395 Independent Work .............................................................. 1-3
ENT 502 Forest Entomology .................................................................. 3
ENT 530 Integrated Pest Management .................................................. 3
ENT 561 Insects Affecting Human and Animal Health ......................... 3
ENT 563 Parasitology .......................................................................... 4
ENT 564 Insect Taxonomy .................................................................... 4
ENT 568 Insect Behavior ...................................................................... 3
ENT 574 Advanced Applied Entomology .............................................. 4
