Many departments have designed academic minors for the convenience of undergraduate students.

A minor is a structured group of courses that leads to considerable knowledge and understanding of a subject, although with less depth than a major. Some employers consider minors desirable, and the corresponding major requirements at the University may stipulate a minor. Some students choose to complement their major program with a minor in a related field or even in an entirely different field of interest. Students interested in pursuing an academic minor should contact their college dean’s office and the department responsible for the minor program for guidance and advising.

Please note that undergraduate students can only complete a minor in addition to and as a complement to a major. The University does not award stand-alone minors.

### Minor in Plant and Soil Science

<table>

#### Minor Requirements

- **Required:** 18 hours
  - PLS 104 Plants, Soils, and People: A Science Perspective: 3
  - PLS/BIO 210 The Life Processes of Plants
    or
  - BIO 152 Principles of Biology II: 3
  - PLS 366 Fundamentals of Soil Science: 4

*plus nine more hours of plant and soil science courses chosen from the following prefixes: PLS, PPA.*
