Vince J. Kellen, Senior Vice Provost for Academic Planning, Analytics and Technologies

University of Kentucky 2013-2014 Undergraduate Bulletin
**Drug-Free Policy**

**Policy Statement as a Drug-Free Institution**

The University of Kentucky is committed to providing a healthy and safe environment for its students, faculty and staff. The University has defined conduct in relation to the unlawful possession, use, dispensation, distribution or manufacture of alcohol or illicit drugs. Conduct which is violative of this definition poses unacceptable risks and disregard for the health, safety, and welfare of members of the University community and shall result in disciplinary action up to and including suspension or termination.

As a recipient of federal grants and contracts, the University of Kentucky gives this notice to students, faculty and staff that it is in compliance with and shall continue to be in compliance with the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendment of 1989. Students, faculty and staff are herein notified of the standards of conduct which shall be applicable while on University of Kentucky property, on University business, and/or at University sponsored activities.

**Standards of Conduct**

By University regulations, by federal law, by state law, and, in some instances, by local ordinance, students, faculty and staff are prohibited from the unlawful possession, use, dispensation, distribution, or manufacture of illicit drugs on University property, on University business and/or at University sponsored activities.

Under University regulations, students, faculty and staff are required to abide by state laws concerning alcoholic beverages. Basically, Kentucky laws state that if one is under the age of 21, it is unlawful to:

1. Possess or consume alcoholic beverages,
2. Misrepresent one’s age for the purpose of purchasing alcoholic beverages, or
3. Use a fake ID in an attempt to purchase alcoholic beverages.

No matter what one’s age, Kentucky law states that it is unlawful to:

1. Procure any alcoholic beverages for anyone under 21 years of age or
2. Drink or to be drunk in a public place.

University campuses and buildings are considered as public places for purposes of these laws, except for a facility licensed to serve alcoholic beverages, and except for a facility used as a private residence, unless University regulations state otherwise.

Ordinances of the Lexington-Fayette Urban County Government basically parallel the state laws.

Any member of the University student body, faculty, or staff who violates these defined standards of conduct shall be subject to appropriate disciplinary action up to and including suspension and/or termination. The specifically defined standards of conduct, the disciplinary procedures, and the appropriate sanctions are detailed in the codes of student conduct and in the Administrative Regulations (AR 6:4, HRP&P 13, HRP&P 14 and Human Resource Policy & Procedures Numbers 13.0 and 14.0).

In addition, it is a violation of state law to operate a motor vehicle while under the influence of any substance which may impair one’s driving ability (drugs or alcoholic beverages).

**Sanctions**

Under University regulation, students who violate this standard of conduct are subject to disciplinary action from a minimum of a warning to a maximum of suspension from the University. Students who reside in University Housing are subject to further disciplinary action which may vary from a warning to termination of their housing contract.

Faculty and staff are subject to disciplinary action from a minimum of a warning to a maximum of termination from University employment.

Under state and federal drug laws, the gravity of the sanction depends on the classification of the controlled substance, the particular activity involved (possession or trafficking which includes manufacture, sale and possession with intent to sell), and whether or not multiple convictions are involved. Specific penalties under federal and state laws for trafficking in various controlled substances are outlined in Appendix A to this policy.

**Notice of Drug-Related Conviction**

In compliance with the Federal Drug-Free Workplace Act of 1988, any employee shall notify the immediate supervisor if the employee is convicted of a criminal drug offense occurring in the workplace or while on University business within five (5) days of the conviction. The University shall take appropriate sanction and remedies in accordance within its policies. The provisions of this section are applicable to students who are employees of the University. If the employee is under a federal contract or grant, the University shall notify the contracting or granting agency of the conviction and of its actions. This section of this policy is also applicable to students who receive a Pell grant (federal grant).

**Health Risks**

The scope and impact of health risks from alcohol and drug abuse are both alarming and well-documented, ranging from mood-altering to life-threatening, with consequences that extend beyond the individual to family, organizations and society at large. The University of Kentucky, therefore, conducts regular programs to educate its students, faculty and staff that consumption and use of drugs may alter behavior, distort perception, impair thinking, impede judgment, and lead to physical or psychological dependence.

Alcohol and/or drugs and/or drug abuse may lead to the deterioration of physical health by causing or contributing to various health conditions including but not limited to fatigue, nausea, personal injury, insomnia, pathological organ damage, some forms of cancer, pancreatitis, heart attack, respiratory depression, birth defects, convulsions, coma, and even death. Alcohol and drug abuse may also result in deterioration of mental health by causing or contributing to various conditions such as increased aggression, hallucinations, depression, disorientation, and psychosis.

A detailed list of the effects and health risks associated with the use of many specific drugs appears as Appendix B to this policy. Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident.
Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information.

Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.

\section*{Training and Counseling Resources}

Continuous efforts are made to make students, faculty and staff aware of the on-campus and off-campus programs which provide information and professional services on matters related to the abuse of alcohol and drugs.

Lists of sources for information and counseling for students are published in the *Kernel* regularly. Students are encouraged to contact the Dean of Students and/or the Office of Residence Life for information and appropriate referral.

Counseling is provided by such areas as the University Health Services Counseling Center, Educational, School, and Counseling Psychology, the Medical Student Support Services program (MS3), and an In-resident counselor in the residence halls system.

For faculty and staff the Employee Assistance Program, REFER, specifically provides information as to resources available to employees. Other counseling, treatment, and rehabilitation services are available in the Lexington community as well as communities throughout the state in which College of Agriculture employees are located.

- Comprehensive Care Centers offer both counseling and treatment. (Visit \url{www.bluegrass.org} for locations and contact information.)
- In the Lexington area, the number for Alcoholics Anonymous (AA) is 859-225-1212. (Check local telephone directory for listings.)
- The Chrysalis House Inc. (859) 977-2501 offers long term, half-way house residential treatment for recovering chemically dependent women.
- University of Kentucky Family Center 859-257-7755.
- REFER Program 859-257-1467.

Many other services are available and may be located by looking in the local telephone directory yellow pages under “Social Services” or “Alcohol Abuse & Addiction – Information & Treatment” or in the section at the front of the telephone directory. Services may also be located by searching on-line.

\section*{Policy Review}

This policy statement and any revisions thereto shall be distributed annually to students and employees. Distribution shall be the responsibility of the Vice President for Student Affairs and the Associate Vice President for Human Resources.

\textit{Annual Review Policy} – The Vice President for Student Affairs and the Associate Vice President for Human Resources shall review and interpret policies and procedures relevant to this policy statement. These two administrators shall jointly be responsible for maintaining records of the annual review of the policy statement.

Policy on Residency

13 KAR 2:045.

DETERMINATION OF RESIDENCY STATUS FOR ADMISSION AND TUITION ASSESSMENT PURPOSES.

RELATES TO: KRS Chapter 13B, 164.020, 164.030, 164A.330(6)

STATUTORY AUTHORITY: KRS 164.020(8)

NECESSITY, FUNCTION, AND CONFORMITY: KRS 164.020(8) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state postsecondary education institution and authorizes the Council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedure and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported postsecondary education institution.

Section 1. Definitions.

(1) “Academic term” means a division of the school year during which a course of studies is offered, and includes a semester, quarter, or single consolidated summer term as defined by the institution.

(2) “Continuous enrollment” means enrollment in a state-supported postsecondary education institution at the same degree level for consecutive terms, excluding summer term, since the beginning of the period for which continuous enrollment is claimed unless a sequence of continuous enrollment is broken due to extenuating circumstances beyond the student’s control, including serious personal illness or injury, or illness or death of a parent.

(3) “Degree level” means enrollment in a course or program which could result in the award of a:

   (a) Certificate, diploma or other program award at an institution;
   (b) Baccalaureate degree or lower, including enrollment in a course by a nondegree-seeking postbaccalaureate student;
   (c) Graduate degree or graduate certification other than a first-professional degree in law, medicine, dentistry or “Pharm. D”; or
   (d) Professional degree in law, medicine, dentistry, or “Pharm. D”.

(4) “Dependent person” means a person who cannot demonstrate financial independence from parents or persons other than a spouse and who does not meet the criteria for independence established in Section 5 of this administrative regulation.

(5) “Determination of residency status” means the decision of a postsecondary education institution that a student is either a Kentuckian resident or a nonresident of Kentucky.

(6) “Domicile” means a person’s true, fixed, and permanent home and is the place where the person intends to remain indefinitely, and to which the person expects to return if absent without intending to establish a new domicile elsewhere.

(7) “Full-time employment” means continuous employment for at least forty-eight (48) weeks at an average of at least thirty (30) hours per week.

(8) “Independent person” means a person who demonstrates financial independence from parents or persons other than a spouse and who meets the criteria for independence established in Section 5 of this administrative regulation.

(9) “Institution” means an entity defined by KRS 164.001(12) if the type of institution is not expressly stated and includes the Kentucky Virtual University, the Council on Postsecondary Education, and the Kentucky Higher Education Assistance Authority.

(10) “Kentucky resident” means a person determined by an institution for tuition purpose to be domiciled in and a resident of Kentucky as determined by this administrative regulation.

(11) “Nonresident” means a person who:

   (a) Is domiciled outside by Kentucky;
   (b) Currently maintains legal residence outside Kentucky; or
   (c) Is not a Kentucky resident as determined by this administrative regulation.

(12) “Parent” means one (1) of the following:

   (a) A person’s father or mother; or
   (b) A court-appointed legal guardian if:
      1. The guardianship is recognized by an appropriate court within the United States;
      2. There was a relinquishment of the rights of the parents; and
      3. The guardianship was not established primarily to confer Kentucky residency on the person.

(13) “Preponderance of the evidence” means the greater weight of evidence or evidence that is more credible and convincing to the mind.

(14) “Residence” means the place of abode of a person and the place where the person is physically present most of the time for a noneducational purpose in accordance with Section 3 of this administrative regulation.

(15) “Student financial aid” means all forms of payments to a student if one (1) condition of receiving the payment is the enrollment of the student at an institution, and includes student employment by the institution or a graduate assistantship.

(16) “Sustenance” means living expenses including room, board, maintenance, transportation, and educational expenses including tuition, fees, books, and supplies.

Section 2. Scope.

(1) State-supported postsecondary education institutions were established and are maintained by the Commonwealth of Kentucky primarily for the benefit of qualified residents of Kentucky. The substantial commitment of public resources to postsecondary education is predicated on the proposition that the state benefits significantly from the existence of an educated citizenry. As a matter of policy, access to postsecondary education shall be provided so far as feasible at reasonable cost to a qualified individual who is domiciled in Kentucky and who is a resident of Kentucky.

(2) The Council on Postsecondary Education may require a student who is neither domiciled in nor a resident of Kentucky to meet higher admission standards and to pay a higher level of tuition than resident students.

(3) This administrative regulation shall apply to all student residency determinations regardless of circumstances, including residency determinations made by the state-supported institutions for prospective and currently-enrolled students; the Southern Regional Educational Board for contract spaces; reciprocity agreements, if appropriate; the Kentucky Virtual University; academic common market programs; the Kentucky Educational Excellence Scholarship Program; and other state student financial aid programs, as appropriate.

Section 3. Determination of Residency Status; General Rules.

(1) A determination of residency shall include:

   (a) An initial determination of residency status by an institution during the admission process or upon enrollment in an institution for a specific academic term or for admission into a specific academic program;
   (b) A reconsideration of a determination of residency status by an institution based upon a changed circumstance; or
   (c) A formal hearing conducted by an institution upon request of a student after other administrative procedures have been completed.

(2) An initial determination of residency status shall be based upon:

   (a) The facts in existence when the credentials established by an institution for admission for a specific academic term have been received and during the period of review by the institution;
   (b) Information derived from admissions materials;
   (c) If applicable, other materials required by an institution and consistent with this administrative regulation; and
   (d) Other information available to the institution from any source.

(3) An individual seeking a determination of Kentucky residency status shall demonstrate that status by a preponderance of the evidence.

(4) A determination of residency status shall be based upon verifiable circumstances or actions.

(5) Evidence and information cited as the basis for Kentucky domicile and residency shall accompany the application for a determination of residency status.

(6) A student classified as a nonresident shall retain that status until the student is officially reclassified by an institution.

(7) A student may apply for a review of a determination of residency status once for each academic term.

(8) If an institution has information that a student’s residency status may be incorrect, the institution shall review and determine the student’s correct residency status.
Policy on Residency

(9) If the Council on Postsecondary Education has information that an institution’s determination of residency status for a student may be incorrect, it may require the institution to review the circumstances and report the results of that review.

(10) An institution shall impose a penalty or sanction against a student who gives incorrect or misleading information to an institutional official, including payment of nonresident tuition for each academic term for which resident tuition was assessed based on an improper determination of residency status. The penalty or sanction may also include:
   (a) Student discipline by the institution through a policy written and disseminated to students; or
   (b) Criminal prosecution.

Section 4. Presumptions Regarding Residency Status.

(1) In making a determination of residency status, it shall be presumed that a person is a nonresident if:
   (a) A person is, or seeks to be, an undergraduate student and admissions records show the student to be a graduate of an out-of-state high school within five (5) years prior to a request for a determination of residency status;
   (b) A person’s admissions records indicate the student’s residence to be outside of Kentucky at the time of application for admission;
   (c) A person moves to Kentucky primarily for the purpose of enrollment in an institution;
   (d) A person moves to Kentucky and within twelve (12) months enrolls at an institution more than half time; or
   (e) A person has a continuous absence of one (1) year from Kentucky;
   (f) A person attended an out-of-state higher education institution during the past academic year and paid in-state tuition at that institution.

(2) A presumption arising from subsection (1) of this section shall only be overcome by preponderance of evidence sufficient to demonstrate that a person is domiciled in and is a resident of Kentucky.

Section 5. Determination of Whether a Student is Dependent or Independent.

(1) In a determination of residency status, an institution shall first determine whether a student is dependent or independent. This provision is predicated on the assumption that a dependent person lacks the financial ability to live independently of the person upon whom the student is dependent and therefore lacks the ability to form the requisite intent to establish domicile. A determination that a student is independent shall be one (1) step in the overall determination of whether a student is or is not a resident of Kentucky.

(2) In determining the dependent or independent status of a person, the following information shall be considered as well as other relevant information available at the time the determination is made:
   (a) Whether the person has been claimed as a dependent on the federal or state tax returns of a parent or other person for the year preceding the date of application for a determination of residency status; or
   (b) Whether the person is no longer claimed by a parent or other person as a dependent or as an exemption for federal and state tax purposes; and
   (c) Whether the person has financial earnings and resources independent of a person other than an independent spouse necessary to provide for the person’s own sustenance.

(3) An individual who enrolls at an institution immediately following graduation from high school and remains enrolled shall be presumed to be a dependent person unless the contrary is evident from the information submitted.

(4) Domicile may be inferred from the student’s permanent address, parent’s mailing address, or location of high school of graduation.

(5) Marriage to an independent person domiciled in and who is a resident of Kentucky shall be a factor considered by an institution in determining whether a student is dependent or independent.

(6) Financial assistance from or a loan made by a parent or family member other than an independent spouse, if used for sustenance of the student:
   (a) Shall not be considered in establishing a student as independent; and
   (b) Shall be a factor in establishing that a student is dependent.

Section 6. Effect of a Determination of Dependent Status on a Determination of Residency Status.

(1) The effect of a determination that a person is dependent shall be:
   (a) The domicile and residency of a dependent person shall be the same as either parent. The domicile and residency of the parent shall be determined in the same manner as the domicile and residency of an independent person; and
   (b) The domicile and residency of a dependent person whose parents are divorced, separated, or otherwise living apart shall be Kentucky if either parent is domiciled in and is a resident of Kentucky regardless of which parent has legal custody or is entitled to claim that person as a dependent pursuant to federal or Kentucky income tax provisions.

(2) If the parent or parents of a dependent person are Kentucky residents and are domiciled in Kentucky but subsequently move from the state:
   (a) The dependent person shall be considered a resident of Kentucky while in continuous enrollment at the degree level in which currently enrolled; and
   (b) The dependent person’s residency status shall be reassessed if continuous enrollment is broken or the current degree level is completed.

Section 7. Member of Armed Forces of the United States, Spouse and Dependents; Effect on a Determination of Residency Status.

(1) A member, spouse, or dependent of a member whose domicile and residency was Kentucky at the time of induction into the Armed Forces of the United States, and who maintains Kentucky as home of record and permanent address, shall be entitled to Kentucky residency status:
   (a) During the member’s time of active service; or
   (b) If the member returns to this state within six (6) months of the date of the member’s discharge from active duty.

(2) A member of the armed services on active duty for more than thirty (30) days and who has a permanent duty station in Kentucky shall be classified as a Kentucky resident and shall be entitled to in-state tuition as shall the spouse or a dependent child of the member.

(3) A person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been decided by the federal government.

(4) A person’s residency status established pursuant to this section shall be reassessed if the qualifying condition is terminated.

Section 8. Status of Nonresident Aliens; Visas and Immigration.

(1) (a) A person holding a permanent residency visa or classified as a political refugee shall establish domicile and residency in the same manner as another person.

(b) Time spent in Kentucky and progress made in fulfilling the conditions of domicile and residency prior to obtaining permanent residency status shall be considered in establishing Kentucky domicile and residency.

(2) A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a person with an H-1 visa, I, K, L, N, R, shall establish domicile and residency the same as another person.

(3) (a) An independent person holding a nonimmigrant visa with designation B, C, D, F, H-2, H-3, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD or TN shall not be classified as a Kentucky resident, because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.

(b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.

(4) A person holding a nonimmigrant visa with designation A, E, G, H-1, H-4 if accompanying a person with an H-2 or H-3 visa, J, M, O, P, Q, S, TD or TN shall not be classified as a Kentucky resident, because that person does not have the capacity to remain in Kentucky indefinitely and therefore cannot form the requisite intent necessary to establish domicile as defined in Section 1(6) of this administrative regulation.

(b) A dependent person holding a visa as described in paragraph (a) of this subsection, but who is a dependent of a parent holding a visa as described in subsection (2) of this section, shall be considered as holding the visa of the parent.

(5) (a) Except as provided in paragraph (b) of this subsection, a person who has petitioned the federal government to reclassify visa status shall continue to be ineligible until the petition has been decided by the federal government.

(b) A person who has petitioned the federal government to reclassify visa status based on a marriage to a Kentucky resident and who can demonstrate that the petition has been filed and acknowledged by the federal government, may establish Kentucky domicile and residency at that time.

University of Kentucky
2013-2014 Undergraduate Bulletin
Section 9. Beneficiaries of a Kentucky Educational Savings Plan Trust.

A beneficiary of a Kentucky Educational Savings Plan Trust shall be granted residency status if the beneficiary meets the requirements of KRS 164A.330(6).

Section 10. Criteria Used in a Determination of Residency Status.

(1) (a) A determination of Kentucky domicile and residency shall be based upon verifiable circumstances or actions.
   (b) A single fact shall not be paramount, and each situation shall be evaluated to identify those facts essential to the determination of domicile and residency.
   (c) A person shall not be determined to be a Kentucky resident by the performance of an act that is incidental to fulfilling an educational purpose or by an act performed as a matter of convenience.
   (d) Mere physical presence in Kentucky, including living with a relative or friend, shall not be sufficient evidence of domicile and residency.
   (e) A student or prospective student shall respond to all requests for information regarding domicile or residency requested by an institution.

(2) The following facts, although not conclusive, shall have probative value in their entirety and shall be individually weighted, appropriate to the facts and circumstances in each determination of residency:

   (a) Acceptance of an offer of full-time employment or transfer to an employer in Kentucky or contiguous area while maintaining residence and domicile in Kentucky;
   (b) Continuous physical presence in Kentucky while in a nonstudent status for the twelve (12) months immediately preceding the start of the academic term for which a classification of Kentucky residency is sought;
   (c) Payment of Kentucky withholding taxes while employed during the calendar year preceding the date of application for a change in residency status;
   (d) Full-time employment of at least one (1) year while living in Kentucky;
   (e) Attendance as a full-time, nonresident student at an out-of-state institution based on a determination by that school that the person is a resident of Kentucky;
   (f) Abandonment of a former domicile or residence and establishing domicile and residency in Kentucky with application to attendance at an institution following and incidental to the change in domicile and residency;
   (g) Obtaining licensing or certification for a professional and occupational purpose in Kentucky;
   (h) Payment of real property taxes in Kentucky;
   (i) Ownership of real property in Kentucky, if the property was used by the student as a residence preceding the date of application for a determination of residency status;
   (j) Marriage of an independent student to a person who was domiciled in and a resident of Kentucky prior to the marriage and the extent to which a student is dependent on student financial aid in order to provide basic sustenance;
   (k) The extent to which a student is dependent on student financial aid in order to provide basic sustenance.

(3) Except as provided in subsection (4) of this section, the following facts, because of the ease and convenience in completing them, shall have limited probative value in a determination that a person is domiciled in and is a resident of Kentucky:

   (a) Kentucky automobile registration;
   (b) Kentucky driver’s license;
   (c) Registration as a Kentucky voter;
   (d) Long-term lease of at least twelve (12) consecutive months of noncollegiate housing; and
   (e) Continued presence in Kentucky during academic breaks.

(4) The absence of a fact contained in subsection (3) of this section shall have significant probative value in determining that a student is not domiciled in or is not a resident of Kentucky.

Section 11. Effect of a Change in Circumstances on Residency Status.

(1) If a person becomes independent or if the residency status of a parent or parents of a dependent person changes, an institution shall reassess residency either upon a request by the student or a review initiated by the institution.

(2) Upon transfer to a Kentucky institution, a student’s residency status shall be assessed by the receiving institution.

(3) A reconsideration of a determination of residency status for a dependent person shall be subject to the provisions for continuous enrollment, if applicable.

Section 12. Student Responsibilities.

(1) A student shall report under the proper residency classification, which includes the following actions:
   (a) Raising a question concerning residency classification;
   (b) Making application for change of residency classification with the designated office or person at the institution; and
   (c) Notifying the designated office or person at the institution immediately upon a change in residency.

(2) If a student fails to notify an institutional official of a change in residency, an institutional official may investigate and evaluate the student’s residency status.

(3) (a) If a student fails to provide, by the date specified by the institution, information required by an institution in a determination of residency status, the student shall be notified by the institution that the review has been canceled and that a determination has been made.
   (b) Notification shall be made by registered mail, return receipt requested.
   (c) Notification shall be made within ten (10) calendar days after the deadline for receipt of materials has passed.

(4) (a) The formal hearing conducted by an institution and the final recommended order shall be a final administrative action with no appeal to the Council on Postsecondary Education.
   (b) A formal administrative hearing conducted by the Council on Postsecondary Education for residency determinations related to eligibility for the Academic Common Market and Regional Contract Programs shall be conducted pursuant to the provisions of KRS Chapter 13B and 13 KAR 2:070. The recommended order issued by the President of the Council shall be a final administrative action.

(5) A student shall not be entitled to appeal a determination of residency status if the determination made by an institution is because a student has failed to meet published deadlines for the submission of information as set forth in subsection (3) of this section. A student may request a review of a determination of residency status in a subsequent academic term.

Section 13. Institutional Responsibilities.

Each institution shall:

(1) Provide for an administrative appeals process that includes a residency appeals officer to consider student appeals of an initial residency determination and which shall include a provision of fourteen (14) days for the student to appeal the residency appeals officer’s determination;

(2) Establish a residency review committee to consider appeals of residency determinations by the residency appeals officer. The residency review committee shall make a determination of student residency status and notify the student in writing within forty-five (45) days after receipt of the student appeal;

(3) Establish a formal hearing process as described in Section 14 of this administrative regulation; and

(4) Establish written policies and procedures for administering the responsibilities established in subsections (1), (2), and (3) of this section and that are:
   (a) Approved by the institution’s governing board;
   (b) Made available to all students; and
   (c) Filed with the council.

(1) A student who appeals a determination of residency by a residency review committee shall be granted a formal hearing by an institution if the request is made by a student in writing within fourteen (14) calendar days after notification of a determination by a residency review committee.

(2) If a request for a formal hearing is received, an institution shall appoint a hearing officer to conduct a formal hearing. The hearing officer shall:
   (a) Be a person not involved in determinations of residency at an institution except for formal hearings; and
   (b) Not be an employee in the same organizational unit as the residency appeals officer.

(3) An institution shall have written procedures for the conduct of a formal hearing that have been adopted by the board of trustees or regents, as appropriate, and that provide for:
   (a) A hearing officer to make a recommendation on a residency appeal;
   (b) Guarantees of due process to a student that include:
      1. The right of a student to be represented by legal counsel; and
      2. The right of a student to present information and to present testimony and information in support of a claim of Kentucky residency; and
   (c) A recommendation to be issued by the hearing officer.

(4) An institution’s formal hearing procedures shall be filed with the Council on Postsecondary Education and shall be available to a student requesting a formal hearing.
Section 15. Cost of Formal Hearings.

(1) An institution shall pay the cost for all residency determinations including the cost of a formal hearing.

(2) A student shall pay for the cost of all legal representation in support of the student’s claim of residency. (17 Ky.R. 2557; eff. 4-5-1991; Am. 22 Ky.R. 1656; 1988; eff. 5-16-1996; 23 Ky.R. 3380; 3797; 4099; eff. 6-16-1997; 24 Ky.R. 2136; 2705; 25 Ky.R. 51; eff. 7-13-1998; 25 Ky.R. 2177; 2577; 2827; eff. 6-7-1999; 749; 1238; eff. 11-12-2002; 36 Ky.R. 1083; 1951; 2033-M; eff. 4-2-2010.)

Revised Effective April 2, 2010

For further information about residency, please contact the Office of Undergraduate Admission and University Registrar, Funkhouser Bldg., University of Kentucky, Lexington, KY 40506-0054.

Policy subject to change without notice.
A&S 100 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED. (1-6) This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most three times under the A&S 100 number. Students may not repeat under the same title. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

A&S 101 SPECIAL INTRODUCTORY COURSE: TITLE TO BE ASSIGNED. (1-6) This course permits the offering at the introductory level of special courses of an interdisciplinary, topical or experimental nature. Each proposal must be approved by the Dean of the College of Arts and Sciences. A particular title may be offered at most twice under the A&S 101 number. Students may not repeat under the same title. Offered pass/fail only. May be repeated to a maximum of 12 credits. Prereq: Will be set by instructor.

A&S 103 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES (Subtitle required). (3-5) This course provides elementary language instruction with an emphasis upon the spoken language of everyday use where appropriate. Writing and the elements of grammar are gradually introduced. Students may not repeat this course under the same subtitle. Prereq: Will be set by instructor.

A&S 104 BASIC INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES (Subtitle required). (3-5) A continuation of A&S 103. Students may not repeat this course under the same subtitle. Prereq: A&S 103.

A&S 150 YOUR CAREER AND ACADEMIC JOURNEY. (2) This course simplifies the complex process of choosing a major by leading students through personal, academic and occupational information searches. It offers a natural progression for decision making by using thought-provoking self-exploratory activities. Whether choosing or changing a major, the discovery process examines different perspectives, such as relating interests, skills and values to academic fields of study. Once specific academic alternatives are identified, a search of occupational information helps students examine the career possibilities that specifically relate to the majors they are considering.

A&S 203 INTERMEDIATE INSTRUCTION IN LESS COMMONLY TAUGHT LANGUAGES (Subtitle required). (3-5) This course provides intermediate instruction in a less commonly taught language. Development of speaking, listening, reading, and writing skills, as appropriate, will be stressed. Students may not repeat this course under the same subtitle. Prereq: A&S 104 in the same language or permission of instructor.

A&S 300 SPECIAL COURSE (Subtitle required). (1-6) Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Arts and Sciences. A particular course may be offered at most three times under the A&S 300 number, and no A&S 300 course may be given for more than six credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. May be repeated to a maximum of 12 credit hours under different subtitles.

A&S 350 PERSONAL STRENGTHS AND YOUR CAREER DEVELOPMENT. (3) This course is designed to introduce students to the fundamentals of planning and organizing career development strategies. Emphasis is placed on identification of individual goals, assessment of talents/ strengths and values, exploration of career options, analysis of the job market, effective use of employment search tools (e.g., resumés, cover letters, and interviewing), and management of career pathways. Stressors and the value of the arts and sciences degree in the labor market and develops job search skills that will be useful throughout life. Prereq: Sophomore standing (30+ credits) or higher.

A&S 500 SPECIAL COURSE (Subtitle required). (1-6) Interdisciplinary, topical, or experimental courses to be approved by the Dean of the College of Arts and Sciences and the Dean of the Graduate School. A particular course may be offered at most three times under the A&S 500 number. Open to all university students, subject to such limitations or prerequisites as set by the instructor. May be repeated to a maximum of six credits under different subtitles. Prereq: As specified by the instructor.

A-E 120 PATHWAYS TO CREATIVITY IN THE VISUAL ARTS. (3) Students will be challenged to think creatively, expand cognitive development, perception, self-expression, and sensory awareness through research and rich studio experiences. Aesthetic knowledge and skills will provide students with a pathway to learning that integrates prior knowledge with new experiences which enhance creative learning through discovery, discussion, and collaboration.

A-E 200 WORKSHOP IN DESIGN EDUCATION FOR ELEMENTARY TEACHERS. (3) A lecture-laboratory course that explores and analyzes concepts in the visual arts and examines how these concepts might be used to improve and enhance learning opportunities in the visual arts and in various disciplines for elementary students.

A-E 362 FIELD EXPERIENCES IN SECONDARY EDUCATION. (1) A course is designed for prospective student teachers to observe the day-to-day teaching and management of the actual art education classes in a high school setting and in the community. Students are required to do a total of fifty (50) hours of observation. Forty two (42) must be completed in an assigned school during the fall or spring semester. The remaining eight (8) hours will be done in a community setting. Prereq: Admission to the Teacher Education Program (TEP).

A-E 395 INDEPENDENT WORK: ART EDUCATION. (1-3) Supervised individual research, practicum, and field experience leading to the development of art education curriculum theory, and teaching techniques appropriate for various populations and conditions. A learning contract will be submitted to both the department and to the office of the dean at the time of registration. May be repeated to a maximum of six credits. Prereq: Major and consent of instructor.

A-E 399 EXPERIENTIAL EDUCATION. (1-15) Development of personally motivated and planned projects and internships in art education and interdisciplinary program activities outside the academic classroom environment, encompassing recreation, general education, adult education, special education, state programs, and group field experiences and workshops. May be repeated to a maximum of 15 credits. (Approval of Fine Arts dean required for more than six credits per semester.) Prereq: Recommendation of art faculty member and department chairman; completion of departmental learning agreement.

A-E 515 INTRODUCTION TO ART THERAPY. (3) An examination of various historical and contemporary conceptions of the therapeutic function and value of art from an art education perspective. The impact of art experience on emotional, intellectual and behavioral development and/or rehabilitation will be explored through readings, discussions, guest lectures, and lab experiences. Lecture, two hours per week; laboratory, two hours per week. Prereq: PSY 331 and major or consent of instructor.

A-E 538 ADVANCED ARTS AND CRAFTS IN THE ELEMENTARY SCHOOL. (3) Planned to give the elementary teacher an understanding of teaching methods involved in, and construction of, art activities which would enrich the classroom program.

A-E 545 TOPICAL STUDIES IN ART EDUCATION (Subtitle required). (3) Intensive study and analysis of a designated topic, issue or development in the philosophy, history, or methodology of art education in community and public school settings. May be repeated to a maximum of six credits. Prereq: Art education major or consent of the instructor.

A-E 550 COMMUNITY ART EDUCATION. (3) An examination of community arts organizations and the role they play in identifying and interpreting the diverse artistic make-up of the community. The course will provide students with the tools to define, locate, and research community organizations as potential sites for art programming.

A-E 560 MUSEUM EDUCATION. (3) An examination of educational theories and practices of learning in a museum setting. The course will focus on educational theories, learning styles and techniques, audiences, educational materials and outreach strategies that will prepare students for successful professional careers in museum education.

A-E 576 ART IN MIDDLE SCHOOLS. (3) Centering on the study of perceptual and aesthetic development of middle school adolescents, this course provides field and practicum experiences that utilize methods and materials appropriate to the teaching of art in the middle school. Topics include: curriculum design, lesson
planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-
teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major
in art education, admission to the Teacher Education Program (TEP), or consent of instructor.

A-E577 ART IN SECONDARY SCHOOLS. (3)
This course provides students with an overview of the secondary school in American education
and explores the history, theory, and techniques and contemporary issues of teaching art in
the secondary schools. Skills in the planning of multicultural activities and the teaching and
evaluation of secondary art experiences are stressed. Full class instruction, videos, micro-
teaching, laboratory and studio experiences are incorporated into class design. Prereq: Major
in art education, admission to the Teacher Education Program (TEP).

A-E578 ART IN ELEMENTARY SCHOOLS. (3)
Focusing on the study of perceptual and aesthetic development of elementary age children, this
course covers field art and art education experiences that utilize methods and materials appropriate
to the teaching of art in the elementary school. Topics include: curriculum design, lesson
planning, teaching skills, classroom safety and assessment. Lecture, demonstrations, micro-
teaching, laboratory and studio experiences are integrated into the class design. Prereq: Major
in art education, admission to the Teacher Education Program (TEP).

A-E579 ARTS AND HUMANITIES IN ART EDUCATION. (3)
Inquiry into the relationship of current philosophies of art education and aesthetics; a
consolidation of art education ideas with a formation of criteria for making value judgments;
the development of a personal viewpoint consistent with education and art as humanistic
efforts. Prereq: Major in art education, admission to the Teacher Education Program (TEP).

A-E645 TOPICAL RESEARCH IN ART EDUCATION (Subtitle required). (3)
Advanced study and research of a designated topic, issue, or development in the philosophy,
history, or methodology of art education in community and public school settings. May be
repeated for a maximum of nine credits. Prereq: Graduate standing in department.

A-E665 ISSUES IN ART EDUCATION. (3)
This course is built within the context of the Advanced Preparation Programs in Teacher Leader
Programs in Art Education. Each week one or two topics representing issues facing the arts
in K-12 education will be assigned to candidates. Selected candidates are expected to research
these topics and post their thoughts on them on blackboard. Fellow candidates are expected to
research the topics as well and provide cogent responses to the postings of the selected
candidates. The class meets once per week throughout the semester for discussion and analysis
of the assigned topics. Prereq. Candidates must be enrolled in one of the Advanced Teacher
Leader Programs in Art Education to take this course or by instructor permission.

A-E670 SCHOOL AND COMMUNITY ART. (3)
Analysis of the instructional function of art; organization of school and community related programs
in art; case studies of existing programs. Field experience, educational involvement. Lectures
and demonstrations. Prereq: Major in Art Education or consent of instructor.

A-E675 AESTHETICS AND DESIGN. (3)
Aesthetics and Design focuses on advancing aesthetic awareness, developing an understanding
of the principles of visual design, and the application of aesthetic design to human-computer
interaction in order to integrate an artistic approach to the examination of technological
innovation.

A-E680 HISTORY OF ART EDUCATION. (3)
A-E 680 is a survey of general education practices from classical times to the present. The class
will examine the development of concepts and the influence of art education in schools and its influence on American art education. The course will analyze the birth of American art education and significant events related to art in the schools from the 19th to the 21st century.

A-E685 ACTION RESEARCH IN ART EDUCATION. (3)
This course is built within the context of the Advance Teacher Leader program. All students
in this course are expected to integrate the design elements of their curriculum contract into
their activities, field experiences, research, and action research projects. Prereq: Students must be
enrolled in one of the Advanced Teacher Leader Programs in Art Education to take this course
or by instructor permission.

A-E686 TEACHER LEADERSHIP IN ART EDUCATION. (3)
This course is built within the context of the Advanced Preparation Programs in Teacher Leader
Programs in Art Education. All candidates in this course are expected to integrate the design
elements of their curriculum contract into their activities, field experiences, research, and action
research projects. This course must be repeated for a minimum of two times for a total of six
hours but can be repeated for no more than three times for a total of nine credits. Prereq: Candidates must be enrolled in one of the Advanced Preparation Teacher Leader Programs in Art Education to take this course. Candidates must also have completed A-E 685 Action Research in Art Education as a prerequisite.

A-E695 INDEPENDENT WORK: ART EDUCATION. (1-3)
Supervised individual research, experimental practicum, and the initiation of field programs
leading to the discovery and development of new knowledge in education theory and method.
A formal learning contract between student and supervising faculty member is required. May
be repeated to a maximum of nine credits. Prereq: Graduate standing in the department and
consent of instructor.

A-E748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq:
All course work toward the degree must be completed.
A-H 334 REFRAMING RENAISSANCE ART. (3)
An exploration of Renaissance artistic production as a European phenomenon of dynamic interchange between European artistic centers, artists, and trade in works of art. Besides painting, sculpture, and architecture, the study of Renaissance visual culture is expanded to include prints and the decorative arts. While the achievements of individual artists are considered, focus is placed on the values and motives of the patrons as well as the purposes and functions of art works. Prereq: Sophomore standing or permission of the instructor.

A-H 335 EARLY MODERN ART AND VISUAL CULTURE, 1400-1700 (Subtitle required). (3)
According to the subtitle, this course examines various aspects of the social, political, cultural, and aesthetic contexts of European art and visual culture. Issues of production and reception, style and function, artist and viewer, and European interactions with non-European cultures will be considered. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 101 or A-H 106 recommended.

A-H 339 ART AND VISUAL CULTURE 1700-1840 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1700 and 1840. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 101 recommended.

A-H 340 ART AND VISUAL CULTURE 1840-1914 (Subtitle required). (3)
Study of specific developments, problems, and issues pertaining to art, art practice, and art theory between 1840 and 1914. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 110 recommended.

A-H 341 20TH CENTURY (Subtitle required). (3)
Depending on subtitle, this course examines aspects of 20th century art in its social, political, and aesthetic contexts. May be repeated under a different subtitle for a maximum of six credits. Prereq: A-H 106 recommended.

A-H 342 MODERN AMERICAN ART AND VISUAL STUDIES (Subtitle required). (3)
According to the subtitle, this course examines various aspects of American art and visual culture in their social, political, and aesthetic contexts. May be repeated under a different subtitle for a maximum of six credits. Prereq: A-H 106 recommended.

A-H 343 HISTORY OF PHOTOGRAPHY. (3)
Chronological survey of the history of photography from its inception to the present day. Emphasis on fine art photography, the work and contributions of its practitioners, the relationship of photography to other art forms, general issues within the medium. Prereq: A-H 106 recommended.

A-H 350 CONTEMPORARY. (3)
Through lectures, readings, discussions, and research, this course examines major issues raised in art and criticism since 1965. Particular attention is given to the impact of social, intellectual, and technological developments upon art making and concepts of art and the artist. Prereq: A-H 106 recommended.

A-H 360 VISUAL CULTURE OF POLITICS. (3)
The course examines specific instances of visual political discourse across a range of historic periods, cultural contexts, political positions, and media. Although a significant portion of the historic part of the course focuses on works of art and architecture, the course also examines popular print culture and political use of mass media from film to television and Internet. Some of the themes covered in the course are: symbols and symbolism of political power, imagery of specific political values, emotional appeal, political propaganda, politics of gender and race, and visual strategies of political opposition and resistance.

A-H 390 EXPERIMENTAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-15)
A community-based or field-based experience in Art History. A formal learning contract among the student, field supervisor, and supervising faculty member required. May be repeated to a maximum of 15 hours. Prereq: Any 100-level course in Art History and Visual Studies.

A-H 407 ART HISTORY HONORS THESIS. (3)
Faculty-sponsored research projects for art history majors, leading to an Honors Thesis. Topics to be determined. Prereq: A-H major and CFA learning contract approved by faculty member.

A-H 501 MUSEUM STUDIES I. INTRODUCTION. (3)
An introduction to museology and the museum profession as related to a particular exhibition project. Intended for advanced students in arts related professions. Seminar format, coordinated with the University of Kentucky Art Museum staff. Prereq: Major in art history or arts administration (with art history emphasis), or consent of instructor.

A-H 502 MUSEUM STUDIES II. INTERNSHIP. (3)
A supervised internship in a professional museum setting that builds upon Museum Studies I. The focus may be on a single aspect or several areas of museum activity, including administration, curatorship, education, registration and collection management, design, development, public relations, etc. Laboratory, 10 hours per week. May be repeated to a maximum of 9 credits within different contexts. Prereq: Completion of A-H 501 with a grade of B or better.

A-H 503 ART HISTORY THROUGH THE ART OBJECT (Subtitle required). (3)
Examination of original works of art on campus or in regional collections within an art historical context. The course may focus on a particular medium, class or objects, period, or artist. May be repeated up to 6 credits with different course subtitles. Prereq: Junior standing.

A-H 504 PRACTICAL ISSUES IN ART HISTORY (Subtitle required). (3)
This course examines art from a practical perspective. It introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. In this course, students will have the opportunity to engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing and at least one course in Art History and Visual Studies.

A-H 524 THEORY AND METHODS. (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of the instructor.

A-H 525 STUDIES IN GENRES AND MEDIA (Subtitle required). (3)
Study of a particular genre (type of subject, such as still life) or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 526 ART AND THE ARTIST IN SOCIETY (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of 6 credits when identified by a different subtitle. Prereq: Junior standing.

A-H 527 INTERDISCIPLINARY APPROACHES (Subtitle required). (3)
Study of artistic and other visual production of a period, geographical location, theme, or medium, with emphasis on its interdisciplinary connections. Depending on the topic, readings may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing or permission of instructor.

A-H 528 TOPICAL SEMINAR IN ART HISTORY AND VISUAL STUDIES (Subtitle required). (3)
An in-depth study of works of art and visual culture, the study of a specific period, geographical location, medium, or theme, or the study of ideas and/or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Junior standing.

A-H 529 TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY (Subtitle required). (3)
According to subtitles, seminar will focus on developments, problems, or issues in architectural or design history. Subtitle required. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Junior standing.

A-H 555 METHODS IN ART HISTORY AND VISUAL STUDIES. (3)
A seminar that reviews basic research methods used by scholars in art history, visual studies, and related fields. In addition to becoming familiar with a range of methodological approaches to the study of objects, environments, and images, students develop and refine the practical skills needed to conduct and present their research. Prereq: Junior status and at least two courses in Art History and Visual Studies at the 300-level, or permission of the instructor.

A-H 592 AESTHETICS. (3)
Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts, in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. (Same as PH 592.)

A-H 598 COORDINATE STUDY IN ART HISTORY AND VISUAL STUDIES. (3)
Course number for those students wishing to do advanced work on a special subject in conjunction with a regularly scheduled 300-level course in Art History and Visual Studies not previously taken by the student. May be repeated to a maximum of nine credits. Prereq: Two courses in Art History and Visual Studies or permission of the instructor.

A-H 599 EXPERIMENTAL EDUCATION IN ART HISTORY AND VISUAL STUDIES. (1-9)
Internship with a university, community, state, regional or national organization that provides practical work experience related to art history and/or visual studies. The internship is identified by the student, conducted under the supervision of the on-site supervisor, and evaluated by a faculty advisor. Students must file a learning contract with the College of Fine Arts to register for the course. May be repeated to a maximum of nine credits. Prereq: Two art history courses at the 500-level, or graduate status, or permission of the instructor.
A-H 603 THE ART OBJECT: (Subtitle required). (3)
Examination of original works of art on campus or in regional collections with an art-historical context. The course may focus on a particular medium, class of objects, period, or artist. May be repeated up to six credits with different subtitles. Prereq: Graduate status in Art History.

A-H 604 PRACTICAL PROBLEMS IN ART HISTORY: (Subtitle required). (3)
A seminar that examines art from a practical perspective. Introduces various disciplines that relate to the understanding of art, such as materials, formats, handling, display, storage, conservation, and connoisseurship. Students engage firsthand with artworks, meanwhile deepening their knowledge of the background and context of the types of art examined. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 624 THEORY AND METHODS: (Subtitle required). (3)
According to the subtitle, the seminar will focus on different theoretical and methodological issues pertaining to art and visual studies. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 625 PROBLEMS IN GENRES AND MEDIA: (Subtitle required). (3)
Study of a particular genre (type of subject), such as still life or a particular medium (type of object, such as the icon) in the history of art. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 626 THE ARTIST IN SOCIETY: (Subtitle required). (3)
Art historical study of a topic or period with particular emphasis on artists and the social and cultural context of their roles in the production of visual art forms. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Graduate standing.

A-H 627 INTERDISCIPLINARY PROBLEMS: (Subtitle required). (3)
Seminar that focuses on the artistic and other visual production of a period, geographical location, theme, or medium with an emphasis on its interdisciplinary connections. Depending on the topic, readings and research may engage with a wide variety of disciplines, for example, literature, music, theater, history, political science, philosophy, classics, anthropology, etc. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 628 ART HISTORY AND VISUAL STUDIES TOPICAL SEMINAR: (Subtitle required). (3)
In-depth study of works of art and visual culture, the study of a specific period, geographical location, medium or theme, or the study of ideas and or institutions related to the use of art and other forms of visual expression in society. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate status or permission of the instructor.

A-H 629 ART HISTORY TOPICAL SEMINAR IN ARCHITECTURAL OR DESIGN HISTORY: (Subtitle required). (3)
According to subtitles, seminar will focus on developments, problems or issues in architectural or design history. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Graduate standing.

A-H 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

A-H 768 THESIS FORMULATION AND PREPARATION IN ART HISTORY. (3)
Independent study for art history graduate students to formulate and prepare master’s thesis under the direction of their thesis advisor. A formal learning contract between student and thesis advisor is required. May be repeated to a maximum of six credits. Prereq: Art History graduate student completing thesis option (Option A).

A-H 780 INDEPENDENT WORK: ART HISTORY. (1-3)
Supervised and sustained individual research and interpretation in the history of art leading to the discovery and demonstration of new knowledge. A formal learning contract between student and supervising faculty member required. May be repeated to a maximum of six credits. Prereq: Graduate standing in the department, 18 credits in art history and consent of instructor.

A-S Art Studio

A-S 001 FOUNDATION EXHIBITION. (0)
An annual exhibition where all first-year Foundation students will select and exhibit one of their works created in a course at UK during their first year. Students will be required to select their own work, present it professionally, and provide an accompanying artist’s statement. The exhibition will occur each spring semester. Grade: P or F. Prereq or coreq: A-S 101, A-S 102, and A-S 130.

A-S 101 CREATIVITY PRACTICES IN ART STUDIOS. (1)
This seminar course for incoming Art Studio and Art Education majors is designed to develop creative strategies and orient students to the Department and University. Through discussion, in-class exercises, and out-of-class assignments, students will gain knowledge of arts-related resources and programming at UK and in the local community. Students will acquire skills for a sustained career in the visual arts, including an introduction to professional practices and portfolio development. Art Studio and Art Education Majors only; no prerequisites.

A-S 102 TWO-DIMENSIONAL SURFACE. (3)
A broad, cross-disciplinary studio course exploring design elements and principles as the basic means of organizing two-dimensional space. Each student develops the ability to form strategies, concepts and ideas to enhance creativity and articulate personal expression.

A-S 103 THREE-DIMENSIONAL FORM. (3)
A broad, cross-disciplinary studio course exploring the elements and principles of designing in the round. Basic concepts involving three-dimensional design in visual art will be explored through discussion and the creation of spatial forms. Special emphasis will be given to the creative process in problem solving.

A-S 130 DRAWING. (3)
A broad, cross-disciplinary studio course exploring the visual language of drawing through observation. Students learn the mechanisms of visual perception, how individual components of a drawing relate to the organization of the composition as a whole. Each student develops not only observational skills rooted in traditional drawing media for realistic renderings, but also gradually builds strategies, concepts, and ideas for abstract expression.

A-S 200 INTRODUCTION TO DIGITAL ART, SPACE AND TIME. (3)
This course provides fundamental instruction in digital media as a creative tool. Students will learn the basics of digital collage, video editing and sound design. An overview of historical and contemporary digital art practice will be presented as well as elements of design and composition. Four studio hours and one 50-minute lecture per week.

A-S 201 PROFESSIONAL PRACTICES IN ART STUDIO. (1)
This course is designed to assist Art Studio and Art Education majors in developing practical skills needed to create a successful, professional practice in the visual arts. Students are expected to prepare a portfolio emphasizing written, oral, and visual presentation and documentation skills. The course will include developing resumes, artist and biographical statements, community engagement, networking, and locating exhibition opportunities. Art Studio and Art Education majors only. Prereq: A-S 101, A-S 102, A-S 130, A-S 200, or consent of instructor.

A-S 245 INTRODUCTION TO WEB DESIGN. (3)
An introductory level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the Internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week.

A-S 270 CERAMICS FOR NON-MAJORS. (3)
This is a studio course that explores the arts and creativity through the discipline of ceramics. An overview of historical and contemporary ceramic art practices will be presented as well as the basics of design and composition. Using hand building and wheel throwing techniques, students will explore the sculptural and functional potential of clay as an object-making media. No prerequisites.

A-S 280 INTRODUCTION TO PHOTOGRAPHIC LITERACY. (3)
Students are introduced to photography, through both the study of its history and the practice of making photographs. The historical portion will focus on both photographic literacy and aesthetics. The practice will take students through various styles, genres and technical aspects of the medium.

A-S 300 DIGITAL PHOTOGRAPHY. (3)
A-S 300 is an introductory course in digital photography as a creative tool. The primary emphasis is the practice of photography as fine art. This course also provides a thorough background in basic techniques that students may apply to any photographic discipline as well as historical and theoretical approaches to photography. Students receive technical instruction in the DSLR camera, lens choice, exposure controls, digital workflow, processing of digital files, output and presentation. Students must have a DSLR camera. Studio 9 hours per week.

A-S 305 STUDIO LIGHTING. (3)
A-S 305, Studio Lighting is an introductory course in lighting control in photography. This course provides a thorough background in basic techniques that students may apply to any discipline, with its primary emphasis upon the practice of the medium as a fine art. Students will receive technical instruction in types of lighting, exposure controls, lighting styles and working in a photographic lighting studio. Prereq: A-S 300 or consent of instructor.

A-S 310 PAINTING I. (3)
Concentrated painting experience stressing enlargement of formal understanding and personal expression. Prereq: A-S 102 and A-S 130.

A-S 311 PAINTING II. (3)
A continuation of A-S 310. Prereq: A-S 310 and consent of the instructor.

A-S 320 PRINTMAKING I. (3)
Introductory studio experience in printmaking media and procedures relevant to individual development. Nine studio hours per week. Prereq: A-S 102 or consent of instructor.

A-S 321 PRINTMAKING II. (3)
A continuation of A-S 320. Nine studio hours per week. Prereq: A-S 320 or consent of instructor.
A-S 330 INTERMEDIATE DRAWING. (3)
Continued studio experience in two-dimensional representation and abstraction using a variety of drawing materials and processes. When offered in the fall, emphasis will be on the human figure. When offered in the spring, course content will cover a broad range of traditional and experimental subjects including landscape, still lifes, collage, and mixing words with images. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 102 or consent of instructor.

A-S 331 EXPLORATION OF HUMAN FORM. (3)
Students strengthen drawing skills through observation and in experimentation with process and strategy. Students gain a better understanding of design and composition in relationship to overall outcome of drawing and explore a range of drawing materials. Prereq: A-S 102 and A-S 130.

*A-S 340 INTRODUCTION TO GRAPHIC DESIGN, MEANING AND IMAGE. (3)
An introductory digital-media studio course in graphic design. Emphasis will be placed on the study of typography, illustration, and layout design, as well as the social, political, and historical impact of graphic design. Technical and theoretical issues pertinent to the field will be presented.

A-S 341 GRAPHIC DESIGN: LAYOUT. (3)
Students prepare professional quality assignments in lettering, pictogram systems, logos, and corporate identity. Emphasis is placed on the use of graphics and cartoons for advertising illustration, as well as solutions for posters, billboards, folders, storyboards, and cover illustration. Nine studio hours per week. Prereq: A-S 340 (with a grade of B or better) and Portfolio Review.

A-S 345 WEB DESIGN. (3)
An intermediate level course designed to prepare students to create web pages. Emphasis is on creating functional and aesthetic web content within the current design parameters of the Internet. Navigation strategies, directory structures and familiarity with networks is stressed. Nine studio hours per week. Prereq: A-S 200 or consent of instructor.

A-S 346 DIGITAL VIDEO. (3)
An intermediate level course in which students learn advanced video composing methods, image control and key effects in the digital world specific to the Final Cut Pro or like environment. Basic and advanced titling and graphic animation are explored as well as storyboarding, sound design and title effects. This course explores various video editing styles. Work is collaborative and individual. Nine studio hours per week. Prereq: A-S 200 or consent of instructor.

A-S 347 MULTIMEDIA (Subtitle required). (3)
An intermediate level course that allows students to explore a variety of programming environments. Programming topics may include video, audio and/or still images with net-based or physical installation based output. This class builds on students’ previous experiences with digital media production and introduces programming to their tool palette. Fundamentals of computer programming are presented, supplemented by historical readings and discussions of art theory dealing with the use of digital technologies in artistic context. Nine studio hours per week. May be repeated to a maximum of nine hours when identified under a different subtitle. Prereq: A-S 200 or consent of instructor.

A-S 348 CIRCUITS & BITS: INTRODUCTION TO HARDWARE AND SOFTWARE TOPICS IN ARTS. (3)
A broad, cross-disciplinary, intermedia studio course designed to teach students custom software creation and electronics fabrication in an art environment. Technical information is presented in conjunction with art historical and theoretical issues. Students will be introduced to a skill-set needed to create interactive artworks. Prereq: A-S 200, or junior standing (or above) in the College of Design, or consent of the instructor.

A-S 350 FIBER I. (3)
Introductory studio experience to the design and fabrication of woven and non-woven fiber art in two and three dimensions; emphasis on color, structure and related aesthetic values. Nine studio hours per week. Prereq: A-S 102 or A-S 103 or consent of instructor.

A-S 351 FIBER II. (3)
Continuation of A-S 350, emphasis on developing perceptual and technical skills toward increasing aesthetic involvement with woven and nonwoven fiber and fabrics. Nine studio hours per week. Prereq: A-S 350 or consent of instructor.

A-S 355 INTRODUCTION TO SCULPTURE. (3)
A broad, cross-disciplinary studio course exploring traditional and current perceptions in sculpture. Sculptural concepts will be explored through discussion and the creation of spatial forms, emphasizing conceptual growth and technical development. Special emphasis will be given to the creative process in problem solving using a variety of materials. Prereq: A-S 103 and A-S 130.

A-S 360 SCULPTURE I. (3)
Concentrated sculptural experience in a variety of media emphasizing expanded understanding of material and methods. Nine studio hours per week. Prereq: A-S 355 or consent of instructor.

A-S 361 SCULPTURE II. (3)
A continuation of A-S 360. Nine studio hours per week. Prereq: A-S 360 or consent of instructor.

A-S 370 CERAMICS I. (3)
Introductory studio experience to a variety of ceramic materials and processes. Nine studio hours per week. Prereq: A-S 103 or consent of instructor.

A-S 371 CERAMICS II. (3)
A continuation of A-S 370. Nine studio hours per week. Prereq: A-S 370 or consent of instructor.

A-S 380 BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)
An introductory course in photography. Although it provides a thorough background in basic techniques that students may apply to any discipline, its primary emphasis is upon the practice of the medium as a fine art. Students receive technical instruction in camera and lens construction, exposure controls, processing of black and white negatives and prints, and presentation. Studio, nine hours per week.

A-S 381 ADVANCED BLACK & WHITE DARKROOM PHOTOGRAPHY. (3)
A-S 381 is a continuation of A-S 380. The emphasis is upon refining visual perception and basic photographic skills with an introduction to some of the more advanced techniques of black and white photography. Students receive technical instruction in the Zone System, archival processing, toning, and presentation. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.

A-S 384 COLOR PHOTOGRAPHY. (3)
A-S 384 is an introductory course in color photography. The emphasis is upon the unique qualities of color photography relating to visual perception. Students receive technical instruction in negative and transparency film development and printing. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.

A-S 385 DIGITAL METHODS FOR PHOTOGRAPHY. (3)
An intermediate level course designed to help students integrate traditional silver-based photography processes with new digital computer imaging tools such as Adobe Photoshop or like program. Students are required to produce original photographic imagery for use in creating digital artwork output to printed material with inkjet printers. Advanced methods of input and output calibration; as well as advanced methods of image manipulation, are covered. Emphasis is placed on the aesthetics and ethics of digital photographic art and creating meaningful and effective images. Nine studio hours per week. Prereq: A-S 200 and A-S 380.

A-S 386 NONSILVER PHOTOGRAPHY I. (3)
A-S 386 is an introductory course in nonsilver photography. The emphasis is upon the unique qualities of nonsilver photography relating to visual perception. Students receive technical instruction in the use of orthochromatic films, half-tone separations, cyanotypes, Van Dyke brown prints, and gum-bichromate prints. Studio, nine hours per week. Prereq: A-S 380 or consent of instructor.

A-S 390 TOPICAL STUDIES (Subtitle required). (3)
Studio investigation of art forms, processes, and topics not specially treated in the regular studio course of study. Topics announced in schedule book for each semester. Nine studio hours per week. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: To be specified as appropriate when topic is identified.

A-S 395 INDEPENDENT WORK: ART STUDIO. (1-3)
Supervised individual work in Art Studio. A learning contract will be submitted both to the department and the office of the dean at the time of registration. May be repeated to a maximum of nine credits. Prereq: Art major, senior standing, grade-point average of 3.0 within the department and consent of instructor.

A-S 396 WORKSHOP (Subtitle required). (1-6)
Workshops in a variety of media dealing with supervised investigation of Art-Studios problems. Studio, 1-18 hours per week. May be repeated to a maximum of nine credits when identified by different subtitles. Prereq: Consent of instructor.

A-S 398 COORDINATED STUDIES IN ART STUDIO. (3)
Supervised independent study in conjunction with regularly scheduled upper-division classes. Coordinate study credits may not be attached to any upper-division course in which the student is concurrently enrolled. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: Art major, junior standing or above, grade-point average of 3.0 in the department.

A-S 399 EXPERIENTIAL EDUCATION. (1-15)
Offers supervised study experience outside the academic environment leading to significant professional growth. A formal learning contract among student, field supervisor and the department. Studio hours per week by arrangement. May be repeated to a maximum of 15 credits. Prereq: Upper division standing; written statement of objective, recommendation of a studio faculty member and the approval of the department chairperson and the Office of Experiential Education.

A-S 490 SENIOR SEMINAR. (1)
Readings and discussions in art. Selection, preparation, and presentation of senior exhibitions and portfolios. To be taken during the student’s final semester of study. Two lecture hours per week. Prereq: Senior standing in Department of Art.

A-S 510 PAINTING III. (3)
Continuing studio credit course in painting. Nine studio hours per week. Prereq: A-S 311 or consent of instructor.
A-S 551 PAINTING IV. (3) Continuation of A-S 510; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 510 or consent of instructor.

A-S 520 PRINTMAKING III. (3) Supervised individual development in printmaking. Nine studio hours per week. Prereq: A-S 321 or consent of instructor.

A-S 521 PRINTMAKING IV. (3) Continuation of A-S 520; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 520 or consent of instructor.

A-S 530 ADVANCED DRAWING. (3) Supervised individual development in drawing. When offered in the Fall, emphasis will be on the human figure. When offered in the Spring, students may select from a broad range of traditional and experimental subjects. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 330 or consent of instructor.

A-S 540 GRAPHIC DESIGN: PUBLICATION DESIGN. (3) Students develop innovative concepts in advertising layout and design through brochures, direct mailers, magazine and newspaper ads. Contemporary techniques in design and production emphasized. Printing techniques, and paper selection introduced as design elements. Nine studio hours per week. Prereq: A-S 341 (with a grade of B or better) and Portfolio Review.

A-S 541 GRAPHIC DESIGN: ADVANCED DESIGN. (3) Provides an opportunity for the advanced study of artistic and technical solutions for graphic design problems. Prospecting for employment, working conditions, avenues for advancement in the field emphasized. May be repeated to a maximum of six credits when identified by the same subtitle and nine credits when identified by different subtitles. Nine studio hours per week. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

A-S 550 FIBER III. (3) Supervised individual development in fiber. Nine studio hours per week. Prereq: A-S 351 or consent of instructor.

A-S 551 FIBER IV. (3) Continuation of A-S 550; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 550 or consent of instructor.

A-S 560 SCULPTURE III. (3) Supervised individual development in sculpture. Nine studio hours per week. Prereq: A-S 361 or consent of instructor.

A-S 561 SCULPTURE IV. (3) Continuation of A-S 560; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 560 or consent of instructor.

A-S 570 CERAMICS III. (3) Supervised individual development in ceramics. Nine studio hours per week. Prereq: A-S 371 or consent of instructor.

A-S 571 CERAMICS IV. (3) Continuation of A-S 570; emphasis on professional awareness and development. May be repeated to a maximum of six credits. Nine studio hours per week. Prereq: A-S 570 or consent of instructor.

A-S 580 PHOTOGRAPHY III. (3) A-S 580 is a continuation of A-S 381. The emphasis is upon advanced black and white photographic processes and continued acquisition of skills for self-expression through the medium. Students receive technical instruction in the use of different photographic films, papers, and chemicals, as well as master printing processes. Studio, nine hours per week. Prereq: A-S 381 or consent of instructor.

A-S 581 PHOTOGRAPHY IV. (3) A-S 581 is a continuation of A-S 580. The emphasis is upon advanced black and white photographic processes and continued acquisition of skills for self-expression through the medium. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 580 or consent of instructor.

A-S 584 COLOR PHOTOGRAPHY II. (3) A-S 584 is a continuation of A-S 384. The emphasis is upon advanced color photographic processes and continued acquisition of skills for self-expression through the medium. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 384 or consent of instructor.

A-S 586 NONSILVER PHOTOGRAPHY II. (3) A-S 586 is a continuation of A-S 386. The emphasis is upon advanced nonsilver photographic processes and continued acquisition of skills for self-expression through the various media. May be repeated to a maximum of six credits. Studio, nine hours per week. Prereq: A-S 386 or consent of instructor.

A-S 596 WORKSHOP. (1-6) Workshops in a variety of media dealing with supervised investigation of advanced art studio problems. Prereq: Consent of instructor.

A-S 610 PAINTING V. (3) Advanced studio investigation of current ideas in painting. Exploration of contemporary and traditional procedures, materials, and issues in a context of group discussion and review. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 586 or consent of instructor.

A-S 611 PAINTING VI. (3) Continued studio investigation of current ideas in painting, with increased concentration on critical group discussions of student work and readings in contemporary art. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: A-S 610 and consent of instructor.

A-S 620 PRINTMAKING V. (3) Advanced studio investigation of current ideas in printmaking. Exploration of contemporary and traditional procedures, materials, and issues. May be repeated to a maximum of nine credits. Studio, nine hours. Prereq: Graduate standing in the department and consent of the instructor.

A-S 621 PRINTMAKING VI. (3) Continued advanced studio investigation of current ideas in printmaking. Increased concentration of technical and aesthetic development in preparation for entry into the professional environment. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 646 ADVANCED INTERMEDIA STUDIO (Subtitle required). (3) A studio course specially designed for graduate students emphasizing sustained individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits when identified by the same subtitle. Nine studio hours. Prereq: A-S 200 and either A-S 346 or A-S 347 or consent of instructor, or graduate enrollment.

A-S 650 FIBER V. (3) In this advanced studio graduate course in fiber, emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in the fiber arts. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 651 FIBER VI. (3) Continued advanced studio investigation of current ideas in the fiber arts. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 650.

A-S 660 SCULPTURE V. (3) In this supervised studio course in graduate sculpture, emphasis will be placed on personal style, its identification, definition, and further development in the context of modern sculpture. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: Twelve credits in upper division studio work and consent of instructor.

A-S 661 SCULPTURE VI. (3) Continued advanced studio investigation of current ideas in sculpture. Increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prereq: A-S 660.

A-S 670 CERAMICS V. (3) In this supervised studio course in graduate ceramics, emphasis will be placed on personal style, its identification, definition, and further development in the context of direction in modern ceramics. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: A-S 670 or consent of instructor.

A-S 671 CERAMICS VI. (3) Continued advanced studio investigation of current ideas in ceramics, increased concentration on technical and aesthetic development, professional readings, and group discussions. Studio, nine hours per week. May be repeated to a maximum of nine credits. Prereq: A-S 670.
**Course Descriptions**

*A-S 809 PHOTOGRAPHY V.*  
A-S 809 is a continuation of A-S 808. This supervised studio course in graduate photography is designed to provide students with the opportunity to explore a variety of photographic forms and techniques. The emphasis will be placed on personal style, its identification, definition, and further development in the context of major directions in photography. Prerequisite: A-S 808 and consent of instructor.

*A-S 811 PHOTOGRAPHY VI.*  
A-S 811 is a continuation of A-S 810. The emphasis will be upon continued advanced studio investigation of current ideas in photography with increased concentration on technical and aesthetic development, professional readings, and group discussion. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: A-S 809 and consent of instructor.

*A-S 710 PROBLEMS IN PAINTING.*  
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of painting. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 720 PROBLEMS IN PRINTMAKING.*  
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of printmaking. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 730 PROBLEMS IN DRAWING.*  
Sustained individual projects focusing on problems and experimental work in the technical and theoretical aspects of drawing. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 740 PROBLEMS IN FIBER.*  
Sustained individual projects and experimental work in the technical and theoretical problems of fiber. May be repeated twice to a maximum of nine credits. Nine studio hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 750 PROBLEMS IN SCULPTURE.*  
Sustained individual problems and experimental work in the technical and theoretical problems of sculpture. May be repeated to a maximum of nine credits. Nine studio hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 767 M.F.A. STUDIO THESIS PROJECT.*  
Independent research and preparation for the M.F.A. thesis exhibition. For the student working in a highly technical medium or process, the preparation of a correlated written thesis under close guidance will be the outcome. The student will be expected to know the standard forms for photographic records and the preparation of a professional portfolio. May be repeated to a maximum of six credits. Prerequisite: Normally taken during final semester for graduate study.

*A-S 770 PROBLEMS IN CERAMICS.*  
Sustained individual problems and experimental work in the technical and theoretical problems of ceramics. May be repeated twice to a maximum of nine credits. Nine studio hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 777 PROBLEMS IN INTERMEDIA.*  
A studio course specially designed for independent graduate research emphasizing individual, technical and theoretical work in the area of Intermedia. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 779 PROBLEMS IN PHOTOGRAPHY.*  
A-S 779 emphasizes sustained individual projects and experimental work in the technical and theoretical problems of photography. May be repeated to a maximum of nine credits. Studio, nine hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 808 PROBLEMS IN DESIGN.*  
Sustained individual problems and experimental work in the technical and theoretical problems of design. May be repeated twice for a maximum of nine credits. Nine studio hours per week. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

*A-S 803 GRADUATE STUDY SEMINAR.*  
A seminar especially for graduate students in the studio area, in all areas of concentration. Lectures, discussion and criticism will focus on current formal and aesthetic problems in the arts. Emphasis will be placed on the integration of concepts arising in the different fields in the visual arts. Required of M.F.A. candidates for three semesters. May be repeated to a total of three credits. Prerequisite: Graduate standing in the department.

*A-S 795 INDEPENDENT RESEARCH.*  
Advanced studio investigation of art forms, processes, and topics not specially treated in the regular curriculum. May be repeated to a maximum of nine credits. Studio, three hours per week per credit. Prerequisite: Twelve credits in upper division studio work and consent of instructor.

**AAD Arts Administration**

*AAD 101 ARTS ADMINISTRATION PROFESSIONS.*  
The primary intent of this course is to make students aware of the opportunities open to them in the field of Arts Administration, and to network with other students in the program, faculty, program graduates and working arts administrators. Course activities will include program and announcements regarding the availability of grants and awards. Students will also become aware of employment and volunteer opportunities while they are in school, and how to pursue professional positions upon graduation. Pass/fail only. Majors are required to enroll a minimum of 4 semesters.

*AAD 150 INTRODUCTION TO ARTS ADMINISTRATION.*  
By requiring attendance at a designated arts event each week, this course introduces Arts Administration majors to the multitude of arts-related resources available on campus and in the surrounding community. Students will also be introduced to the roles, governing structures, management practices and revenue sources of both for-profit and nonprofit arts organizations within the United States, as well as the types of jobs that are generally filled by Arts Administrators. Prerequisites: Pre-Arts Administration major or consent of instructor.

*AAD 200 ARTS ADMINISTRATION COMMUNICATIONS.*  
The purpose of this course is to introduce students to the primary writing styles that they will be using throughout the remainder of their arts administration courses. For example, business letters, education and program guides, print and electronic advertisements, publicity materials, sales brochures, invitations and advocacy letters, all require mastering a different writing style. Additionally, students will learn how to make effective public presentations, based upon their writing assignments. Prerequisite: Completion of CIS 110 or WRD 110. Enrollment restricted to AAD pre-majors during primary windows.

*AAD 202 GRAPHIC DESIGN FOR PRINT AND THE WEB.*  
Visual communication has become even more important in the contemporary world. This course is designed to teach students basic design skills utilizing creative software. By creating design projects, students will become proficient in using design software for both print and web-based projects. Through the exploration of topics including computer software applications, design elements and viewer considerations, students will develop materials for personal and professional use.

*AAD 302 WEB SITE DESIGN AND MAINTENANCE.*  
Most successful business ventures in the arts involve creating and maintaining an effective web presence. Therefore, this course teaches students the process of designing, building and maintaining web sites that meet personal and organizational needs. The course also examines some of the legal, philosophical, societal and technological issues relevant to delivering information in this manner.

*AAD 310 MARKETING THE ARTS.*  
Connecting and communicating with current and prospective arts audiences is essential for the ensuring a strong future for the arts. This course offers students an overview of marketing, advertising and promotion for visual and performing arts institutions. Students will learn practical strategies and solutions for building audiences for the arts through market research, marketing principles and communication techniques. Topics include identification and development of the audience, market segmentation, positioning strategies, marketing plans, media coverage and promotion techniques. Prerequisites: Completion of AAD 200, AAD 202 and CIS 110 OR WRD 111, or consent of the instructor.

*AAD 320 FUND RAISING FOR THE ARTS.*  
In the United States, nonprofit organizations have the ability to raise money through two primary sources: earned revenue and contributed revenue. By focusing on the methods and techniques necessary to secure contributed revenue, this course explores how to identify, cultivate and solicit current and potential donors. Students will have the opportunity to learn the theories and application of successful fund raising methods including the primary mechanisms for raising money from individuals, foundations, businesses and government entities. Prerequisites: Completion of AAD 200, AAD 202 and CIS 111 OR WRD 111, or consent of the instructor.

*AAD 340 ARTS MANAGEMENT ISSUES.*  
Artists and arts administrators are required to work within current business and legal environment. Thus, this course introduces students to the management and legal issues that affect the arts, arts organizations and artists. Topics examined include First Amendment rights, intellectual property, organizational structure, contracts and employee relations. Through the exploration of historical and contemporary case studies, students will be exposed to the legal frameworks, terminology and basic legal principles. Prerequisites: Completion of AAD 200, AAD 202 and CIS 111 OR WRD 111, or consent of the instructor.

*AAD 350 FINANCIAL MANAGEMENT OF ARTS ORGANIZATIONS.*  
The successful operation of any business entity is dependent on effective financial management. The primary emphasis for this course is the study of the financial aspects of nonprofit arts organizations in order to guide effective financial decision-making. This course will guide students through the key conceptual areas of financial management including understanding primary sources: earned revenue and contributed revenue. By focusing on the methods and techniques necessary to secure contributed revenue, this course explores how to identify, cultivate and solicit current and potential donors. Students will have the opportunity to learn the theories and application of successful fund raising methods including the primary mechanisms for raising money from individuals, foundations, businesses and government entities. Prerequisites: Completion of ACC 201, ACC 202, AAD 200, AAD 202 and one of the following: CIS 111 OR WRD 111, or consent of the instructor.
AAD 399 ARTS ADMINISTRATION PRACTICUM. (1)
Under the supervision of a faculty member, students complete on-campus arts administration service projects. At least one of the two projects must be in service to the student’s primary art discipline’s department or school. Examples of projects might include conducting a publicity campaign for an event, working on a fundraiser, producing a publication, conducting research, updating a website, etc. Pass/fail option only. Learning contract required. Prereq: Arts Administration major or consent of instructor.

*AAD 402 TOPICS IN ARTS ADMINISTRATION (Subtitle required). (3)
A seminar which covers special topics in arts administration. May be repeated to a maximum of 12 credits when identified by different subtitles. Prereq: Completion of AAD 200, AAD 202 and one of the following: CIS 111 or WRD 111, or consent of instructor.

AAD 699 INTERNSHIP IN ARTS ADMINISTRATION. (1-12)
An internship with a university, community, state, regional or national arts organization, providing practical work experience related to arts administration. The internship is identified and conducted under the supervision of a faculty member. Students must file a learning contract with the College of Fine Arts. May be repeated to a maximum of twelve credits. Pass/fail only. Prereq: Completion of AAD 200, AAD 202 and one of the following: CIS 111 or WRD 111, or consent of instructor.

*AAD 520 THE ARTS AND ARTISTS IN SOCIETY. (3)
The arts and artists have influenced concepts of love, war, religion, race, ethnicity and gender and helped societies face problems, celebrate accomplishments, mourn losses, beautify environments and drive economies. The course will investigate the intersection of arts and civic life. Through writing research papers, exploring topics including the intrinsic and extrinsic value of the arts, and through analyzing social, economic and political trends, students will learn the role of the arts and artists in historical and contemporary society. Prereq: Undergraduate Arts Administration students: senior status.

AAD 600 ARTS ADMINISTRATION TECHNOLOGIES. (3)
From brochures to web sites to video, arts organizations are investing more time and resources in effectively communicating with the public. As such, arts administrators must be skilled in utilizing current technology to convey messages. In this course, students will learn a variety of software applications that will aid in the successful creation of print materials, web sites, video and other multi-media presentations. Additionally, the course will introduce concepts of design principles and relevant theories.

AAD 610 FINANCIAL MANAGEMENT FOR ARTS ORGANIZATIONS. (3)
Financial management is a central function of successful arts management. It is the foundation in which human, physical and financial resources are maintained and monitored. In the nonprofit sector, the relationship of “mission to money” is a key conceptual framework that must be understood by arts managers. Arts managers are the source of financial information to both internal and external stakeholders and successful financial analysis is essential for sound strategic planning and governance. This course guides students through key topics of financial management including accounting practices, interpreting financial statements, creating mission-driven budgets, analyzing cash-flow, developing cost-benefit analyses and managing investments.

AAD 620 MANAGEMENT AND LEADERSHIP IN THE ARTS. (3)
People are the basis of arts organizations. Understanding the factors that determine individual actions and interactions, being able to solve problems, capitalize on new opportunities and reach goals is necessary for being a successful leader in a work environment. As such, this course focuses on the planned, systematic process in which applied organizational theory and behavioral science principles and practices are introduced into organizations, toward the goal of increasing organizational and individual effectiveness. The course prepares students to organize and motivate people within an arts organization, manage social environments, and execute strategic change. Topics explored include organizational design, decision-making, conflict resolution, designing effective reward systems, team building, and organizational dynamics and culture. Additionally, students will focus on reflecting upon their own leadership skills and abilities.

AAD 630 MARKETING RESEARCH AND PLANNING FOR ARTS ORGANIZATIONS. (3)
Arts managers are consistently faced with the challenge of connecting arts offerings with an audience. Understanding the possible markets and developing strategies to reach the desired audience are part of every arts organization’s primary administrative activities. Throughout this course, students will explore theories and frameworks crucial to the marketing function including product development, market research, consumer behavior, brand development, pricing strategies and promotion techniques. Students will utilize the knowledge to analyze marketing strategies, investigate consumer behavior and conduct primary and secondary marketing research for an arts organization. Prereq: AAD 600.

AAD 640 PRINCIPLES OF FUNDRAISING. (3)
Most nonprofit organizations earn more than half of their annual revenue from fundraising activities, involving contributions from businesses, foundations, government and individuals. This course will examine how each of these entities are identified, contacted, courted, asked and convinced to contribute. Students will learn practical fundraising techniques such as how to identify government and foundation granting programs, how to write successful grants to those programs, how to identify potential individual donors and solicit their contributions, and how to identify and carry out special events that lead to contributions from a variety of donors. The philosophies and theories that underlie the concept of charitable giving will also be examined, as will the ethical considerations inherent in the fundraising process.

AAD 650 THE ARTS AND THE LAW. (3)
How does art interact with law? How does law impact artistic creation? How can arts administrators ensure that their organization legally protects itself? Understanding the legal environment in which arts organizations exist and artists create empowers arts administrators to make sound and reasoned decisions. Throughout this course, students will be exposed to a variety of legal topics related to artistic creation and the managing of arts organizations. The course will provide historical and contemporary introduction to the laws and policies, both in the United States and internationally, related to intellectual property, First Amendment, cultural property, human resource management, labor relations, immigration and cultural exchange, and contract development and enforcement.

AAD 660 SOCIAL AND CULTURAL ENTREPRENEURIALISM. (3)
Utilizing entrepreneurial concepts, social entrepreneurs use innovative solutions in order to achieve social change. Social entrepreneurialism is a burgeoning field that is garnering attention from investors, philanthropists, foundations and nonprofit leaders in order to achieve meaningful social returns while maintaining financially viable organizations. This course will explore the relationship of “mission to money” and its importance to arts organizations as well as the intersection between the arts and social entrepreneurialism with an emphasis on arts organizations utilizing entrepreneurial concepts to create cultural change.

AAD 699 INTERNSHIP IN ARTS ADMINISTRATION. (3)
Students without substantial work experience in the field of Arts Administration are required to complete three credit hours of internships in order to graduate, and must work at least 50 hours for each credit hour earned. While students are ultimately responsible for finding and completing their internships, students do receive ample support and assistance from Program faculty throughout the process. The activities to be carried out during internships must be mutually agreed upon by the student, their faculty supervisor and the host organization supervisor. Most internships are completed during the summer between the student’s first and second year in the program. However, internships can also be completed during spring and fall semesters, or the summer after students have completed their regular course work.

AAD 730 MARKETING STRATEGIES AND APPLICATIONS FOR ARTS ORGANIZATIONS. (3)
Effective implementation of a marketing plan and marketing strategies brings an audience and arts organization together. During this course, students will learn the components and construction of a strategic integrated marketing communications plan. The process will allow students to make reasoned and sound marketing decisions for an arts organization based on marketing research conducted in AAD 630: Marketing Research and Planning for Arts Organizations. Additionally, students will utilize their skills in writing, graphic design and communications to create effective marketing messages in a variety a media and channels.

AAD 740 FUNDRAISING TECHNIQUES. (3)
This course will explore how the basic techniques examined in AAD 640 Principles of Fundraising are organized into sophisticated annual and capital campaigns. Emphasis will be placed on goal setting, message development, use of outside consultants, prospect identification, pre-campaign testing, campaign execution, and donor follow-up. The course will also cover how these campaigns are supported by planned giving methods, databases and web-based applications, as well as related legal and ethical issues. Prereq: AAD 640.

AAD 750 CAPSTONE COURSE IN ARTS ADMINISTRATION. (3)
As the final course in the graduate program in Arts Administration, students will demonstrate their knowledge of the field through the completion of a significant research project. Students will design an independent study utilizing recognized research methodology under the guidance of their faculty advisor and graduate committee. The research findings, conclusions and recommendations will be presented as both a formal research paper and oral presentation.

AAS African American Studies

AAS 200 INTRODUCTION TO AFRICAN-AMERICAN STUDIES. (3)
An interdisciplinary course which establishes the intellectual context for an examination of the African-American experience; it introduces students to the various approaches scholars use to analyze that experience. This course employs a topical framework which permits focus on issues reflecting the diversity and richness of African-American experience across geographic boundaries.

AAS 235 INEQUALITIES IN SOCIETY. (3)
This course seeks to promote an understanding of inequalities in American society by considering them in the context of the social origins, development, and persistence of inequality. Inequalities considered may include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as SOC 235.)

AAS 254 HISTORY OF SUB-SAHARAN AFRICA. (3)
A survey of the social institutions, values systems and political organization of Sub-Saharan Africa since the 16th century but with particular emphasis on the 19th and 20th centuries. (Same as HIS 254.)

AAS 260 AFRICAN AMERICAN HISTORY TO 1865. (3)
A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black entrepreneurship. (Same as HIS 260.)
AAS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT. (3) This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960’s. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as HIS 261.)

AAS 263 AFRICAN AND CARIBBEAN LITERATURE AND CULTURE OF FRENCH EXPRESSION IN TRANSLATION (Subtitle required). (3) This course treats major cultural questions concerning the exchange between Africa and the Caribbean in terms of historical, sociological, political, and literary events. No knowledge of French is required. (Same as FR 263.)

*AAS 264 INTRODUCTION TO BLACK WRITERS. (3) An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core Credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prereq: Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite. (Same as ENG 260.)

AAS 300 HISTORY OF JAZZ. (3) A listening survey course covering the chronological evolution of jazz from its West African and European roots, through its germination in America, to the present. Emphasis will be on the various styles and functions of jazz, particularly as they have been affected by changing social-cultural patterns during the twentieth century. (Same as MUS 300.)

AAS 326 PEOPLE AND CULTURES OF SUB-SAHARAN AFRICA. (3) A survey of indigenous societies and cultures of Africa south of the Sahara, with special attention to their adaptation of colonialism and post-colonial national development. Prereq: Sophomore standing or higher. (Same as ANT 326.)

AAS 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTH AFRICA. (3) A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interrelationships among religions, cultures, and the physical environment will be examined. Prereq: Intelligence quotient score of 110 or higher; or consent of instructor. (Same as GEO 328.)

AAS 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3) This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and cultures and environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as GEO 336.)

AAS 360 RACE AND SPORTS IN AMERICA. (3) This reading seminar examines the history of race and sport in America. (Same as HIS 360.)

AAS 384 BLACK THEATRE WORKSHOP. (3) A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as TA 384.)

AAS 400 SPECIAL TOPICS IN AFRICAN-AMERICAN STUDIES (Subtitle required). (3) Detailed investigation of a particular topic in African-American Studies, with emphasis both on content and existing research. Topics will vary from semester to semester and are announced the preceding semester. May be repeated to a maximum of six credits when identified by a different subtitle. Prereq: Twelve hours of African-American Studies minor courses, including AAS 200.

AAS 401 INDEPENDENT READING AND RESEARCH IN AFRICAN-AMERICAN STUDIES. (3) For African-American Studies minors. The student pursues a course of reading and research under the guidance of a staff member, completes a major research project, and takes an examination. A written contract defining the area of study is negotiated between student and instructor at the beginning of the course. May be repeated to a maximum of six credits. Prereq: African-American Studies minor, 12 hours of African-American Studies minor courses, including AAS 200.

AAS 417G SURVEY OF SUB-SAHARAN POLITICS. (3) A survey of sub-Saharan government and politics intended to give the student broad knowledge about the setting of African politics, precolonial African political systems, the political legacies of major European colonial powers, and problems of political development. Prereq: PS 210 or 212. (Same as PS 417G.)

AAS 420 AFRICAN-AMERICAN RELIGIOUS EXPERIENCE. (3) This course explores and examines how African Americans shaped and fashioned their religion to meet their own peculiar needs as they responded to historical occurrences.

AAS 432 RACE AND ETHNIC RELATIONS. (3) Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as SOC 432.)

AAS 433 TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3) A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: SOC 101 or CLD 102; SOC 235; and either SOC 302 or 304. (Same as SOC 433.)

AAS 471 RACE, ETHNICITY AND POLITICS. (3) An examination of the role that race and ethnicity play in the political arena. Students will explore the nature of race, racism, and ethnocentrism, as well as their impact on political institutions and public policy. Particular attention will be given to elections, public opinion, mass media and social movements in the United States. (Same as PS 471.)

AAS 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICES IN AMERICA. (2-3) The course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as SW 523.)

AAS 535 ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3) A sociological study of topics relevant to social inequalities and stratification. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 535.)

AAS 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3) This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as EDC 550.)

AAS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930. (3) This course will focus on the struggle for African American equality in the U.S. during the mid-twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as HIS 587.)

AAS 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3) This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as EDC 601.)

AAS 616 MULTICULTURAL PSYCHOLOGY. (3) This course is designed to increase one’s sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one’s skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as EDP 616.)

AAS 635 SEMINAR IN SOCIAL INEQUALITIES. (3) This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classical and contemporary works on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking a specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as SOC 635.)

AAS 654 READING IN MODERN AFRICAN-AMERICAN HISTORY. (3) Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as HIS 654.)

AAS 656 BLACK AMERICAN LITERATURE. (3) An in-depth study of black American literature, with concentration on major texts by black writers. (Same as ENG 656.)

AAS 657 RACE RELATIONS IN THE UNITED STATES. (3) This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as HIS 657.)
ABT 101 INTRODUCTION TO BIOTECHNOLOGY. (1)
An introduction to biotechnology: historical perspectives, current applications and future directions. The course will consist of informal lectures and interactive discussions led by Biotechnology faculty and visiting professionals. The course will also orient students to the educational/career opportunities in Biotechnology and assist them in developing a focus for their individualized degree programs. Lecture, two hours per week. Prereq: First year or first semester transfer students in Agricultural Biotechnology.

ABT 120 GENETICS AND SOCIETY. (3)
This course is designed for science and non-science majors, giving students an understanding of how genetics influences and impacts our social fabric on a daily basis, and equipping students with a sufficient understanding to participate in the policy debates that are impacting our lives. The course will introduce students to the basic concepts of genetics and to the modern methodologies of molecular genetics. The course will also educate students in the process of scientific discovery and empower students with the knowledge and critical thinking skills necessary to evaluate current and future impact of genetics on society. While the course is intended for first semester freshmen, students at all class standings are welcome to enroll.

ABT 201 SCIENTIFIC METHOD IN BIOTECHNOLOGY. (1)
A course designed to acquaint students with the common experimental methods used in agricultural biotechnology. Students will be presented with several case studies which demonstrate basic scientific reasoning and experimental strategies. The students will then use their understanding of basic scientific methods and agricultural systems to critically evaluate work from the current scientific literature. Each student will be required to provide a written and oral evaluation of a research project in some aspect of agricultural biotechnology. The class will provide the students with the basic skills needed for preparing their own research proposals. Prereq: ABT 101 and enrollment in the Agricultural Biotechnology degree program or consent of instructor.

ABT 360 GENETICS. (3)
The basic principles of heredity as currently understood from evidence accumulated in classical, cyto genetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: Six credits in biological sciences and one course in general chemistry. (Same as ASC/ENT 360.)

ABT 361 GENETICS LAB ONLINE. (1)
Analysis and interpretation of genetics problems using interactive computer programs. Prereq: ABT/ASC/ENT 360 (should be taken concurrently).

ABT 395 INDEPENDENT STUDY IN BIOTECHNOLOGY. (1-4)
Independent study in biotechnology under the supervision of a faculty member. May be repeated to a maximum of six credits. Prereq: Agricultural Biotechnology major and consent of appropriate instructor before registration.

ABT 399 EXPERIENTIAL LEARNING IN BIOTECHNOLOGY. (1-6)
An internship in biotechnology under the supervision of a faculty member. May be repeated for a maximum of six credits. Prereq: Consent of the instructor, chairperson for the Agricultural Biotechnology degree program and completion of a learning contract before registration.

ABT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)
Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of the genetic material of the cell. An understanding of the biochemical events involved in gene duplication, splicing, and recombinant DNA, as well as RNA processing, recombination, and the theoretical underpinnings of genetic engineering. Prereq: ABT/ASC/ENT 360 or BIO 304 or consent of instructor. (Same as ENT 460.)

ABT 461 INTRODUCTION TO POPULATION GENETICS. (3)
This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance in plants, animals, and microorganisms, but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as BIO/ENT/FOR 461.)

ABT 495 EXPERIMENTAL METHODS IN BIOTECHNOLOGY. (4)
A laboratory techniques course designed to give students the technical skills and understanding necessary to critically examine biological systems at the molecular level. The course will emphasize the principles of chemistry, biochemistry and molecular biology as applied to a model system for laboratory investigations. Laboratory, nine hours per week. Prereq: BIO 150 and AGR 360, or consent of instructor.

ACC 200 FINANCIAL ACCOUNTING I. (3)
This course is designed to provide an introduction to financial accounting from the users’ perspectives. Its primary purposes are to promote understanding of financial accounting information for decision making purposes and to focus on financial accounting’s role in communicating business results. Prereq: Successful completion of 27 semester credit hours.

ACC 202 MANAGERIAL USES OF ACCOUNTING INFORMATION. (3)
An introduction to the use of accounting data within an organization to analyze and solve problems and to make planning and control decisions. Prereq: ACC 201 or BE 161 and BE 162.

ACC 211 FINANCIAL ACCOUNTING LAB. (1)
A laboratory-based approach to introductory financial accounting applications, with the primary focus on the accounting cycle. The primary objective is to promote an understanding of how accounting information is identified, recorded, and processed for financial reporting. Prereq: ACC 201. Enrollment priority will be given to accounting and finance majors.

ACC 300 FINANCIAL ACCOUNTING II. (3)
This course is designed for non-accounting majors to provide expanded study of the impact of relevant financial accounting issues on the users of financial reporting. Topics may include financial statements; income recognition; cash and receivables; inventories; operational assets; investments; intangible assets; current liabilities; long-term liabilities emphasizing leases, pensions, postretirement benefits, and bonds; financial instruments; accounting for income taxes; and owner’s equity. Not open to Accounting majors. Prereq: ACC 201 and ACC 202.

ACC 301 INTERMEDIATE ACCOUNTING I. (3)
This course is the first of a two-course financial accounting series, providing in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

ACC 302 INTERMEDIATE ACCOUNTING II. (3)
This course is the second of a two-course financial accounting series, providing an in-depth study of the accounting cycle, conceptual framework of financial accounting, valuation of balance sheet accounts, recognition of revenues, matching of expenses, and the reporting of the financial condition, operating results, and cash flows of an entity. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

ACC 324 ACCOUNTING INFORMATION SYSTEMS. (3)
This course focuses on two major components of accounting information systems: conceptual models and physical implementation. Accounting systems are studied from an accounting cycles perspective, emphasizing the nature and relevance of accounting internal controls and the relationship of accounting systems to the functional areas of accounting. Using contemporary information technology, students analyze, design, and implement accounting systems along with relevant internal control structures. Prereq: A grade of C or better in ACC 201 and ACC 202 or consent of the Director of the School of Accountancy.

ACC 395 INDIVIDUAL WORK IN ACCOUNTING. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ACC 399 INTERNSHIP IN ACCOUNTING. (1)
A course designed for undergraduate accounting students who, through the Accounting Internship Director, have secured full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass/fail basis only and for no more than two consecutive semesters, repeated to a maximum of three credits. Prereq: Junior standing in accounting and approval of the Accounting Internship Director.

ACC 403 AUDITING. (3)
This course examines the attest function in accounting. Emphasis is placed on audit standards and objectives, including the evaluation of internal control structures for the purpose of determining relevant auditing procedures. Prereq: ACC 301 and ACC 324 or consent of the Director of the School of Accountancy.
**Course Descriptions**

**ACC 407 CONCEPTS OF INCOME TAXATION.** (3)
A study of the federal income tax structure with emphasis upon the conceptual foundations of taxation relating to the three types of taxpayers: businesses, individuals, and estates and trusts. Prereq: Junior standing and ACC 202 or consent of the Director of the School of Accountancy.

**ACC 410 NOT-FOR-PROFIT AND GOVERNMENTAL ACCOUNTING.** (3)
This course examines accounting topics specific to not-for-profit entities and various governmental units. Emphasis is placed on the recording of usual transactions, form and content of reports, and analysis of external reports. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

**ACC 418 COST MANAGEMENT.** (3)
Traditional and contemporary concepts and techniques that provide accounting information for management decision making at both strategic and operational levels. Topics include the costing of products and services; project and activity analysis; planning and control methods; and performance measurement. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

**ACC 507 ADVANCED TOPICS IN TAXATION.** (3)
A study of advanced topics in taxation, including corporate taxation, accounting for income taxes, and international tax. Prereq: ACC 302 and ACC 407 or consent of the Director of the School of Accountancy.

**ACC 508 CONTROLLERSHIP.** (3)
A comprehensive study of the controller’s objectives, responsibilities, functions, organizational roles, etc. Prereq: ACC 418.

**ACC 516 ADVANCED TOPICS IN FINANCIAL REPORTING.** (3)
A comprehensive study of financial accounting and reporting issues involving business combinations, partnerships, foreign currency transactions, not-for-profit accounting and other current accounting issues. Prereq: ACC 302 or consent of the Director of the School of Accountancy.

**ACC 555 FORENSIC ACCOUNTING AND FRAUD EXAMINATION.** (3)
This course will cover the principles and methodology of fraud detection and deterrence. The course includes such topics as skimming, cash larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement schemes, non-cash misappropriations, corruption, fraudulent financial statements, and interviewing witnesses. Prereq: ACC 301 or consent of the Director of the School of Accountancy.

**ACC 590 SPECIAL TOPICS IN ACCOUNTING: (Subtitle required).** (3)
Readings, projects, lectures and/or discussion to illuminate current topics of special interest or concern in accounting. May be repeated to a maximum of twelve credits. May not be repeated under the same title. Prereq: Consent of instructor.

**ACC 600 INQUIRY, COMMUNICATION, AND LEADERSHIP IN ACCOUNTING.** (3)
This course is designed to develop the inquiry, communication, and leadership skills that are key determinants of success for many not-for-profit, business, and accounting professionals. The course uses readings, in-class exercises, case analyses, small group work, and oral presentations as vehicles for developing these skills. Class modules focus on accounting relevant professional inquiry, oral persuasion, communication, leadership, and teambuilding skills. Class sessions will include participation by and leadership from business, not-for-profit, and accounting professionals. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 601 RESEARCH IN ACCOUNTING THEORY.** (3)
Critical examination of accounting concepts and standards. Study of current problems and contemporary developments reflected in accounting literature and reports. Prereq: Admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 603 ATTEST FUNCTION.** (3)
A critical examination of contemporary professional attestation theory and practice including a comprehensive review of AICPA audit case studies, statements on audit procedure, and their application in simulated business situations. Prereq: ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 610 NOT-FOR-PROFIT REGULATORY ACCOUNTING.** (3)
A study of the contemporary issues in the area of not-for-profit and regulatory accounting. Prereq: ACC 410 or consent of instructor.

**ACC 617 SELECTED TOPICS IN TAXATION.** (3)
A study of selected topics in taxation, including partnership taxation, tax research, and other tax topics. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 619 INDEPENDENT STUDY IN ACCOUNTING.** (1-3)
Designed for students undertaking special studies to be conducted in regular consultation with the instructor. Prereq: Consent of instructor.

**ACC 621 UNDERSTANDING FINANCIAL STATEMENTS.** (3)
Financial statements communicate information about a business and its operations. Students will gain an understanding of the information being communicated (or not communicated) by the business entity. Emphasis is on the uses of information, rather than its preparation. Prereq: Admission to MSACC program or consent of DGs.

**ACC 624 ENTERPRISE INFORMATION AND CONTROL SYSTEMS.** (3)
The course simultaneously examines two issues related to enterprise information systems development: 1) methodologies for designing and implementing information systems, and 2) assessment of enterprise risk and internal control systems. Case analyses and “real world” projects are used to accomplish the course objectives. Current computer technologies, including relational database systems and internet data processing, are integrated into the course content. Prereq: ACC 324, ACC 403 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 627 CORPORATE TAXATION.** (3)
A detailed study of Income taxation of corporations and shareholders. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 628 FINANCIAL/MANAGERIAL ACCOUNTING.** (3)
A study of the application of accounting information and services in the recognition or solution of management problems in business. Prereq: Graduate standing in the MBA program, ACC 202 or its equivalent and MA 123 or its equivalent. Course credit will not be given to students in the MSACC program.

**ACC 637 TAXATION OF FLOW-THROUGH ENTITIES.** (3)
A detailed study of the income taxation of flow-through entities, including Partnerships, S corporations, and limited liability companies. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 647 MULTI-JURISDICTIONAL TAXATION.** (3)
A study of the taxation of taxpayers located in two or more tax jurisdictions. The course involves two major categories, international taxation and state and local taxation. Prereq: ACC 507 and admission to MSACC program, or consent of the Director of Graduate Studies.

**ACC 691 ADVANCED TOPICS IN ACCOUNTING** (Subtitle required). (3)
Readings, projects, lecture, and/or discussion to illuminate current topics of special interest or concern in accounting. May not be repeated under the same title. A particular topic may be offered at most three times under the ACC 691 number. Prereq: Admission to MSACC program or consent of DGs.

**ACC 700 TOPICAL SEMINAR IN ACCOUNTING RESEARCH** (Subtitle required). (1-3)
An advanced seminar on selected topics such as cross-disciplinary research on behavioral decision-making, research using archival data, and analytical models in accounting. May be repeated to a maximum of eighteen credits. Prereq: Doctoral student status in business administration.

**ACC 790 DOCTORAL COLLOQUIUM – ACCOUNTANCY.** (1-2)
This course provides professional socialization for Ph.D. students in accounting. Topics include research, teaching, and service, transition, preparation for a career as a professor, and special research topics, including lectures by noted scholars.

**ACC 795 INDEPENDENT STUDY IN ACCOUNTING.** (1-6)
Designed for students undertaking special studies to be conducted in irregular consultation with instructor. Class hours by appointment. Prereq: Consent of instructor.

**AEC Agricultural Economics**

**AEC 101 THE ECONOMICS OF FOOD AND AGRICULTURE.** (3)
An introduction to the field of agricultural economics and some of the basic tools and concepts of decision making. Concepts are illustrated in terms of selected current social and economic issues including the role of agriculture in both a national and international dimension. Students who have completed ECO 201 are not eligible to take AEC 101 without the consent of the instructor.

**AEC 201 INTRODUCTION TO FARM AND NATURAL RESOURCE FINANCE.** (3)
This course provides an introduction to basic concepts used in financial analysis that can be applied to farms and small agriculturally-related businesses. It provides an overview of basic financial statements and their role in business planning. These tools will be applied to case studies of farms, agribusiness, and forestry firms. Prereq: MA 123 and ECO 201 or ECO 202 or AEC 101.

**AEC 300 TOPICS IN AGRICULTURAL ECONOMICS** (Subtitle required). (1-3)
Study in special topics in agricultural economics. May be repeated under a different subtitle to a maximum of six credits. A course may be offered twice under a given subtitle. Lecture, 1-3 hours; laboratory, 0-6 hours per week. Prereq: ECO 201.

**AEC 302 AGRICULTURAL MANAGEMENT PRINCIPLES.** (4)
A comprehensive study of economic principles and management tools useful in farm and agribusiness decision making. Utilizes a systems approach to the planning, implementation and control of the agricultural business. Specific attention to application of management and decision theory, economic principles used in decision making, and risk management strategies. Emphasis on planning the future course of the business, acquiring and managing the necessary resources, and establishing physical and financial control over the business. Lab incorporates microeconomic applications of management principles developed in lectures. Prereq: "C" or better in ECO 201.
AEC 303 MICROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)
Emphasis on the development of theoretical models of production and consumption economics and application of these models to problems. The importance of concepts of marginality to managers and consumers is emphasized. Role of risk and uncertainty in resource allocation is outlined. Prereq: "C" or better in ECO 201 and "C" or better in MA 123 or MA 113.

AEC 304 MACROECONOMIC CONCEPTS IN AGRICULTURAL ECONOMICS. (3)
This course addresses the concern that U.S. farmers and the food industry are increasingly affected by macroeconomic forces and general conditions in the national economy. Interdependencies between agriculture, farm size, rural economic well-being and key macroeconomic variables including interest rates, foreign exchange rates and the rate of inflation will be examined. Prereq: AEC 101, ECO 202.

AEC 305 FOOD AND AGRICULTURAL MARKETING PRINCIPLES. (3)
Analysis of the market’s role in determining prices and coordinating productive activities in the food and agricultural systems. Prereq: "C" or better in ECO 201.

AEC 309 INTERNATIONAL AGRICULTURE, WORLD FOOD NEEDS AND U.S. TRADE IN AGRICULTURAL PRODUCTS. (3)
Present and projected world food/population balance by geographic regions; food production and world trade in agricultural products with an emphasis upon the implications for U.S. agriculture; an introduction to agricultural development problems of the less developed nations of Latin America, Africa, and Asia. Prereq: "C" or better in ECO 201.

AEC 311 LIVESTOCK AND MEAT MARKETING. (1)
Provides students with a comprehensive look at the unique characteristics of the marketing system for livestock. Problems in both the feeder animal sector and the fed animal sector will be considered. Lecture, three hours per week for one-third of the semester. Prereq: AEC 305.

AEC 313 TOBACCO MARKETING. (1)
Analysis of the structure of the production and marketing system for tobacco including institutions and public regulation. Application of marketing methods and principles to tobacco. Lecture, three hours per week for one-third of the semester. Prereq: AEC 305.

AEC 314 GRAIN MARKETING. (1)
Study of production and utilization of grain by areas of the world, the marketing systems for grain, and the application of economic and marketing principles to the pricing and movement of grain. Prereq: AEC 305, AEC 321.

AEC 316 COOPERATIVE MANAGEMENT AND MARKETING. (1)
This course provides knowledge about the unique features of cooperatives and their role in a market economy and examines the structure, organization, finance, management, and operations of cooperative organizations. Prereq: AEC 305.

AEC 317 MARKETING HORTICULTURAL PRODUCTS. (1)
This course examines the market structure and institutions associated with horticultural and nursery product markets within the context of formulating and evaluating alternative, firm-specific marketing strategies. Prereq: AEC 305.

AEC 320 AGRICULTURE PRODUCT MARKETING AND SALES. (3)
This course examines marketing activities within the U.S. food system. Sector performance is considered as well as the competitive behavior of firms within various agricultural market channels. Firm level marketing principles, methods, and strategies are considered, with a special focus on developing extension economics programs for agricultural products. Prereq: AEC 305.

AEC 321 AGROECONOMIC FUTURES MARKETS. (3)
The mechanics, theory, and practical application of hedging as related to agricultural commodities. The historical development of futures markets, functions of the futures markets, and the role of the speculator will also be explored. Prereq: AEC 303 and AEC 305.

AEC 324 AGRICULTURAL LAW. (3)
A study of legislative, administrative regulations, constitutions, and court cases that have economic ramifications on agricultural and rural life. Prereq: "C" or better in ECO 201.

AEC 325 EQUINE LAW. (3)
This course examines equine law from tort and contractual perspectives dealing with basics of liability, purchase and sale, entity formation, constitutional and tax issues. Following the class, students should be able to recognize when it is necessary to retain a lawyer, but are not expected to be able to act as a lawyer. Prereq: "C" or better in ECO 201.

#AEC 340 HUMAN RESOURCE MANAGEMENT IN AGRICULTURE. (3)
An overview of the management of the human resource in an agricultural context. Major components will include the acquisition, training, motivation, compensation, performance evaluation, and retention of the agricultural labor force. Other topics include the legal and taxation components of hired labor and working with a multi-cultural and multi-generational work force. Prereq: ECO 201.

AEC 399 EXPERIENTIAL LEARNING IN AGRICULTURAL ECONOMICS. (1-6)
A field or community-based experience in the application of economics to agricultural or rural problems. May be repeated; a maximum of six credits allowed. Pass-Fail only. Credit not available for Agricultural Economics Majors. Prereq: Nine hours in agricultural economics or economics, permission of instructor and department chairperson, and completion of learning agreement prior to registration.

AEC 422 AGRIBUSINESS MANAGEMENT. (3)
Examines and analyzes decision-making tools and problem-solving techniques available to agribusiness managers. Provides learning experience in addressing contemporary economic, marketing and management issues through case study analyses, selected readings and computerized business simulations. Prereq: AEC 303, AEC 305, FIN 300, MGT 301, MKT 300, and senior standing in Agricultural Economics.

AEC 424 PRINCIPLES OF ENVIRONMENTAL LAW. (3)
Provides a basic knowledge of the principles of United States environmental law. Addresses the framework of the American Legal system as it applies to environmental regulation. Covers the sources of environmental law and reviews major federal environmental statutes and judicial decisions addressing specific issues. Prereq: "C" or better in ECO 201.

AEC 425 FOREST MANAGEMENT. (3)
The principles of sustained yield forest management, management objectives, forest regulation, allowable cut, and timing of timber harvests. Students will identify management objectives from various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions. Prereq: Completion of the Spring Field Semester (FOR 355, 356, 357, 358, and 359) and consent of instructor. (Same as FOR 425.)

AEC 441G AGRICULTURAL FINANCIAL MANAGEMENT. (3)
Applies micro agricultural finance to farm and other agricultural business firms. Reviews elementary mathematics of finance and the objectives of financial management. Uses financial statements, cash flow analysis, financial leverage and other elements in applying the theory of capital investment for making management decisions. Prereq: AEC 303 and FIN 300.

AEC 445G INTRODUCTION TO RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)
Economic analysis of the problems of assuring resource availability and environmental quality. Theoretical concepts and empirical tools for evaluating resource and environmental policy. Prereq: "C" or better in ECO 201 or consent of the instructor.

AEC 471 INTERNATIONAL TRADE. (3)
This is an advanced economic course in international trade. The first part of the course covers the basics of why countries trade, what explains the pattern of trade that we observe and what are the effects of trade on welfare and the distribution of income. The second part of the course covers issues concerning trade policy and looks at the positive and normative effects of trade policy and trade agreements as well as investigating topics of current interest. While the focus of the course is on theory, students will also be exposed to many applications of the theory as means of both explaining the economic intuition and encouraging students to analyze the world around them from an economic perspective. Prereq: ECO 401 or equivalent. (Same as ECO 471.)

AEC 479 PUBLIC ECONOMICS. (3)
An application of economic analysis to the study of the role of government. Emphasis is on the reasons for and the effects of government intervention in the economy. Topics covered include: market failure, public goods and externalities, welfare policy, voting and public choice, taxation, public debt and cost-benefit analysis. Prereq: ECO 401 or equivalent. Agricultural Economics majors may substitute AEC 303 for this prerequisite. (Same as ECO 479.)

AEC 483 REGIONAL ECONOMICS. (3)
This course presents an economic approach to the study of regions. The emphasis is on the role of spatial relationships in economic activity. Topics considered include market area analysis, location theory, economic base and input-output analysis as well as regional economic development. Prereq: AEC 303.

AEC 490 QUANTITATIVE METHODS AND PRICE ANALYSIS. (3)
An integration of current issues in Agricultural Economics with oral and written communications, problem solving, and research. Major emphasis is on a senior paper and oral presentation. Prereq: AEC 302, 303, 305, ECO 391 and senior standing in Agricultural Economics.

AEC 503 PRICE THEORY AND APPLICATIONS. (3)
This course uses calculus to develop core concepts in microeconomics and show how they can be applied to agricultural and natural resource issues. A central objective of this course is to link mathematical techniques with economic analysis to show students that calculus provides an efficient way to study producer and consumer behavior. Prereq: AEC 303 and MA 113.

AEC 510 INTERNATIONAL TRADE AND AGRICULTURAL MARKETING. (3)
A study of institutional, economic and cultural factors that influence aggregate agricultural trade and exports of individual agribusinesses. Macro issues of agricultural trade policies are examined along with elements of international marketing for agricultural products. Prereq: AEC 303 (or equivalent) and AEC 305.

AEC 531 AGRICULTURAL PRICE ANALYSIS. (3)
The course links calculus-based microeconomic theory, industry-specific pricing systems, and empirical analysis of agricultural and food markets ranging from farm inputs to the consumer level. Students gain experience with tools and techniques used in empirical analysis of supply and demand. Prereq: AEC 303 and (ECO 391 or STA 570).

AEC 532 AGRICULTURAL AND FOOD POLICY. (3)
This course surveys a variety of current public policies that influence the agricultural and rural economies. Students are exposed to the conflicting views of those concerned with food and agricultural policy issues in an international context. Economic principles are used to evaluate alternatives in terms of the general welfare of society. Prereq: AEC 303 and AEC 305.
Course Descriptions

**AEC 545 RESOURCE AND ENVIRONMENTAL ECONOMICS.** (3)
This is an advanced level course focused on economic analysis. It will help students frame natural resource and environmental problems so that they can be analyzed and solved. Major topic areas include water resources, fisheries, energy (and other non-renewable resources), agriculture, and pollution. Policy instruments such as pricing, emission fees, and tradable permits will be covered in detail. Prereq: AEC 303 or AEC 445G or consent of instructor. (Same as NRE 545.)

**AEC 580 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS.** (1-3)
Directed independent study of a selected problem. May be repeated to a maximum of six credits. Prereq: Consent of instructor, director of undergraduate or graduate studies and completion of a proposed plan of learning objectives and outcomes prior to registration.

**AEC 590 INTRODUCTION TO QUANTITATIVE ECONOMICS.** (3)
An introduction to mathematical approaches to economic theory. Emphasis on linear models, constrained optimization, and techniques used in applied statistical analysis. Prereq: ECO 401 and MA 113, or consent of instructor. (Same as ECO 590.)

**AEC 606 ADVANCED AGRICULTURAL MARKETING.**
A critical examination of objectives and results of various types of research in market organization, marketing functions, price analysis, markets over time, space and form, market information, commodity promotion programs, quality standards, and macroeconomic linkages to marketing. Prereq: AEC 624 and ECO 601 (may be concurrent).

**AEC 610 INTERNATIONAL TRADE IN AGRICULTURAL PRODUCTS.** (3)
This course analytically examines current empirical research in the area of agricultural trade. Prereq: ECO 601. (Same as AEC 624 and ECO 671.)

**AEC 620 ADVANCED PRODUCTION ECONOMICS.** (3)
An advanced treatment of production economics with emphasis on flexible product and factor price situations, factor demand functions, multiple product production, and poly-periodic production theory. Prereq: ECO 601.

**AEC 622 ADVANCED AGRIBUSINESS MANAGEMENT STRATEGIES.** (3)
This course integrates knowledge of economics, econometrics, business administration, finance, accounting, marketing, decision making, and research methodology. The focus is on analytical skills and scholarly academic research. Prereq: AEC 422, ECO 601 or AEC 603, an introductory course in econometrics, or consent of instructor.

**AEC 624 ADVANCED QUANTITATIVE METHODS IN AGRICULTURAL ECONOMICS.** (3)
This course uses statistical techniques to model agricultural and economic systems. Subjects covered include: (1) the classical linear regression model, (2) statistical hypothesis tests, and (3) estimation techniques for single and simultaneous equation models. Prereq: ECO 391, STA 291 and MA 113.

**AEC 626 AGRICULTURE AND ECONOMIC DEVELOPMENT.** (3)
Analytical consideration of the role of agriculture in economic development in relation to overall development strategy at various stages of growth. Theoretical and policy issues of particular relevance to the agricultural development in underdeveloped agrarian economies with various resource, social, political and economic systems. Prereq: ECO 473G or consent of instructor. (Same as ECO 674.)

**AEC 640 ADVANCED AGRICULTURAL POLICY.** (3)
This course focuses on development of a framework to analyze alternate paradigms of the policy options available for the solution of agricultural problems. The framework focuses on the roles of institutions that modify behavior of decision makers. Agricultural and food policies are evaluated in terms of the efficient use of resources and the general welfare of society. Prereq: ECO 601 or AEC 503.

**AEC 645N NATURAL RESOURCE ECONOMICS.** (3)
Economic analysis of natural resource use and environmental issues. Discussion of criteria for public decision making, welfare economics, market failure, benefit-cost analysis, and benefit estimation, as applied to natural resources and the environment. Prereq: ECO 590 and ECO 601.

**AEC 646N INTERTEMPORAL ALLOCATION OF NATURAL RESOURCES.** (3)
This course teaches the application of economic theory to the analysis of solutions for current and prospective natural resource problems. Such understanding will be geared toward fashioning, selecting and implementing planning associated with land, water, air, biological and other natural resources and conservation of the natural environment in serving the needs and desires of citizens. Prereq: ECO 601 and AEC 590.

**AEC 653 LOCAL ECONOMIC DEVELOPMENT.** (3)
Focusing on the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as PA 653.)

**AEC 661 PROGRAMMING MODELS IN AGRICULTURAL ECONOMICS.** (3)
A study of some programming models useful in agricultural economics; includes an examination of the structure of the models themselves, economic interpretation of their components, and their use in research in agricultural economics. Prereq: MA 416G and either AEC 620 or ECO 601.

**AEC 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT.** (3)
Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as FOR 662.)

**AEC 691 STRUCTURE OF U.S. AGRICULTURE.** (3)
This seminar will analyze the structural transformation of U.S. agriculture in the 19th and 20th centuries in the context of sociological theory. Emphasis is given to key historical transitions, changing social relations of production and state policy. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. agriculture. Prereq: Graduate standing in sociology, agricultural economics or CLD or consent of instructor. (Same as CLD/SOC 691.)

**AED 674 APPLIED ECONOMETRICS.** (3)
This course introduces students to the econometric models, estimation procedures, and model applications in the literature. The course includes an overview of different econometric models, model estimations using Stata and SAS, discussion of agricultural and applied economics papers applying these models, and writing mini projects and a term paper with econometric applications. Topics include discrete and limited dependent variable models, panel data models, time-series models, instrumental variables, survival analysis, spatial econometrics and other special topics. Prereq: ECO 703 or consent of instructor.

**AED 678 MASTER'S THESIS RESEARCH.** (0)
Half-time to full-time on research network. Prereq: May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**AED 679D DISSERTATION RESEARCH.** (0)
Half-time to full-time on dissertation network. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examinations. Prereq: ECO 703 or consent of instructor.

**AEC 686 RESIDENCE CREDIT FOR MASTER'S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of advisor and chairperson of department.

**AEC 687 RESIDENCE CREDIT FOR DOCTOR'S DEGREE.** (0-12)
May be repeated indefinitely. Prereq: Consent of advisor and chairperson of department.

**AEC 780 SPECIAL PROBLEMS IN AGRICULTURAL ECONOMICS.** (1-3)
Open to graduate students who have the necessary training and ability to conduct research on a selected problem. May be repeated three times for a total of nine credits. Prereq: Consent of instructor and departmental chairperson.

**AEC 790 RESEARCH WORK IN AGRICULTURAL ECONOMICS.** (3-9)
Independent research under the direction of a faculty member and the Director of Graduate Studies. Prereq: Successful completion of written portion of AEC qualifying exam and permission of Director of Graduate Studies.

**AEC 796 SEMINAR (Subtitle required).** (3)
An extended original investigation of a specific topic designed to give students experience in methods of research and an intensive study of a particular subject in the field of agricultural economics. May be repeated to a maximum of six credits under different subtitles. Prereq: Ph.D. applicant or candidate.

**AEC 797D DISSERTATION RESEARCH.** (0)
Half-time to full-time on dissertation network. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examinations. Prereq: ECO 703 or consent of instructor.

**AEC 849 DISSERTATION RESEARCH.** (0)
Half-time to full-time on dissertation network. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examinations. Prereq: ECO 703 or consent of instructor.

**AEC 859 DISSERTATION RESEARCH.** (0)
Half-time to full-time on dissertation network. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examinations. Prereq: ECO 703 or consent of instructor.

**AED Agricultural Education**

**AED 110 INTRODUCTION TO CAREER AND TECHNICAL EDUCATION.** (3)
The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as FCS 110.)

**AED 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION.** (3)
Supervised experiences in schools and other agencies. Required of all Career and Technical Education majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as FCS 362.)

**AED 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION.** (3)
This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. Prereq: AED 362. (Same as FCS 371.)

**AED 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION.** (1-3)
Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as FCS 395.)
AED 399 EXPERIENTIAL LEARNING IN CAREER AND TECHNICAL EDUCATION. (1-3)
A field-based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as FCS 399.)

AED 535 PRINCIPLES AND PHILOSOPHY OF CAREER AND TECHNICAL EDUCATION. (3)
Study is made of philosophy, accepted principles, and legislation affecting programs in vocational education. (Same as FCS 535.)

AED 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as FCS 580.)

AED 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as FCS 583.)

AED 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Development of teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as FCS 586.)

AED 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION. (12)
Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regularly scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as FCS 592.)

AED 670 ADVANCED METHODS IN TEACHING CAREER AND TECHNICAL EDUCATION. (3)
The principles of method applied to teaching in the field of career and technical education. Prereq: Experience in teaching vocational education. (Same as FCS 670.)

AED 671 YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION. (3)
A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as FCS 671.)

†AED 682 RESEARCH METHODS.

AED 686 INSTRUCTIONAL ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional assessment of learning and achievement in Career and Technical Education middle and high school classrooms is addressed. Focus is placed on test writing, measurement and student achievement. (Same as FCS 686.)

AED 695 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (3)
An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems. (Same as FCS 695.)

AED 710 COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES. (3)
A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture. (Same as FCS 710.)

†AED 748 MASTER’S THESIS RESEARCH.

†AED 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.

†AED 779 SEMINAR IN CAREER AND TECHNICAL EDUCATION.

†AED 789 INDEPENDENT WORK IN CAREER AND TECHNICAL EDUCATION.

AED 799 RESEARCH IN CAREER AND TECHNICAL EDUCATION. (1-3)
Individual research of importance to career and technical education. May be repeated to a maximum of nine credits. (Same as FCS 799.)

AEN Agricultural Engineering

AEN 103 BASIC PRINCIPLES OF SURVEYING. (2)
General use of surveying equipment, development of topographic maps, layout of engineering systems, earthwork computations, and introduction to boundary surveys for Agriculture students. This course is not available for credit to persons who have received credit in another introductory surveying course. Lecture, one hour; laboratory, three hours. Prereq: A course in trigonometry, enrollment in the College of Agriculture and/or consent of instructor.

AEN 220 FARM TRACTORS AND ENGINES. (3)
Principles of selection and application of farm tractors and engines. Operating principles of internal combustion engines including carburetion, fuel injection, ignition, and lubrication. Power transmission application and efficiency are considered. Lecture, two hours per week; laboratory, two hours per week.

AEN 252 FARM SHOP. (3)
Wood and metal work, including blueprint reading, oxyacetylene and arc welding, power woodworking tools, soldering and pipe work. Lecture, one hour; laboratory, four hours. Prereq: Major in agricultural education or consent of instructor.

AEN 340 PRINCIPLES OF FOOD ENGINEERING. (4)
The functional requirements and principles of operation of systems for the handling and processing of food and agricultural products. Lecture, three hours; laboratory, two hours per week. Prereq: Junior standing and completion of physics and mathematics requirement in Food Science curriculum.

AEN 461G BIOMETEOROLOGY. (3)
An introduction to the impact and relationship of the atmosphere on living organisms. Emphasis on the practical application of meteorology to everyday problems within the biosphere. Weather analysis, interpretation, psychometrics of the atmosphere, and the impact of weather and climate on animals, plants and man are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: BIO 150 and STA 291 or consent of instructor.

AEN 462G RESIDENTIAL AND COMMERCIAL IRRIGATION DESIGN. (3)
The utilization of hydraulic principles in the design, assimilation, installation and operation of residential and commercial irrigation systems in applications which emphasize water conservation, nutrient management and environmental protection. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

AEN 463G AGRICULTURAL SAFETY AND HEALTH. (3)
The course provides a comprehensive overview of major safety and health hazards in agricultural production and an overview of the basic approaches for the prevention and control of agricultural injuries and illnesses. The course is oriented toward upper class and graduate students. Prereq: AEN 220, AEN 252, and junior standing or consent of instructor.

AEN 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

AFS Air Force Studies

AFS 111A AEROSPACE STUDIES I. (1)
A course designed to provide the student with a basic understanding of the nature and principles of war, national power, and the Department of Defense role in the organization of national security. The student also develops leadership abilities by participating in a military organization, the cadet corps, which offers a wide variety of situations demanding effective leadership.

AFS 112 LEADERSHIP LABORATORY I. (1)
A course designed for development of basic skills required to be a manager, including communications, human relations, and administration of equal opportunity. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 111.

AFS 113A AEROSPACE STUDIES II. (1)
A course designed to provide the student with a basic understanding of the contribution of aerospace power to the total U.S. strategic offensive and defensive military posture. The student also develops leadership abilities by participating in a military organization, the cadet corps, which offers a wide variety of situations demanding effective leadership. Prereq: AFS 111.

AFS 114 LEADERSHIP LABORATORY II. (1)
A continuation of AFS 113. A course designed to develop managerial skills including superior/subordinate relationships, communications, customs and courtesies, basic drill movements and career progression requirements. Credit will not be granted toward the hours requirements for the degree. Pass/fail only. Coreq: AFS 113.

AFS 211A AEROSPACE STUDIES II. (1)
Introduces the study of air power from a historical perspective; focuses on the development of air power into a primary element of national security. Leadership experience is continued through active participation in the cadet corps. Lecture, one hour; leadership laboratory, one hour. Prereq: AFS 111, 113 or PAS approval.
AHP 840 ETHICS IN HEALTH PRACTICE. (2)
A study of selected ethical issues that arise in the practice of health professionals. The health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed.

AIS 101 ELEMENTARY MODERN STANDARD ARABIC. (4)
An introduction to the standard written language of the Arab World. Initial emphasis upon the phonology and script, followed by gradual coverage of the grammar, with exercises in reading, writing, pronunciation, and vocabulary building.

AIS 102 ELEMENTARY MODERN STANDARD ARABIC. (4)

AIS 201 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 102, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 102.

AIS 202 INTERMEDIATE MODERN STANDARD ARABIC. (3)
A continuation of AIS 201, stressing comprehension of written and oral material, the ability to read Arabic aloud and to compose written material, and the ability to speak. Prereq: AIS 201.

AIS 301 COLLOQUIAL ARABIC. (3)
Provides advanced skills in developing linguistic and communicative skills in colloquial Arabic based on Egyptian Arabic that is widely understood throughout the Arab world. Introduces aspects of Egyptian cultural life. Designed for those who have some experience with Standard Arabic. Prereq: AIS 202 or consent of instructor.

AIS 302 COLLOQUIAL ARABIC II. (3)
Prereq: AIS 301. Prereq: AIS 301 or consent of instructor.

AIS 328 ISLAMIC CIVILIZATION I. (3)
The rise of Islam and its classical development.

AIS 330 ISLAMIC CIVILIZATION II. (3)
The Islamic world’s response to westernization and the resultant reassessment of its cultural role in the modern world.

AIS 331 CLASSICAL ARABIC LITERATURE (in English). (3)
Reading from some of the major works of Arabic literature (poetry and prose) of the 8th-14th centuries which are an integral part of the Arab cultural heritage, e.g., the Mu’talifat, Koran, Ibn Ishaq’s Sirah, al-Tabarî’s Ta’rikh; Abu ’l-Faraj’s Kitab al-Aghani; al-Ghazzali’s Ihya; al-Hariri’s Maqamat; and Ibn Khaldu’n’s Muqaddimah.

AIS 338 WOMEN AND ISLAM. (3)
A survey of women’s issues related to Islam and contemporary Muslim culture including the perception of women in Islam, the role and rights of women in Islam, female circumcision, honor killing women’s dress. The course will discuss the viewpoints of the Muslim traditionalists, modernists, western feminists and the emerging Islamic feminists.

AIS 340 FUNDAMENTALISM AND REFORM IN ISLAM. (3)
The course focuses on the revival of Islam in the 20th century and the various responses of Islam to modernism and western political and intellectual domination. Particular attention will be given to the rise of militant Islam and the terrorist attacks of 9/11. The original writings of major thinkers will be read and discussed.

AIS 395 INDEPENDENT WORK IN ISLAMIC STUDIES. (1-3)
Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

AIS 435 TOPICS IN ISLAMIC STUDIES (Subtitle required). (3)
Variable in content, this course focuses on important texts and issues in Islamic history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

AIS 440 INTRODUCTION TO THE QURAN. (3)
An introduction to the disciplines of knowledge related to the Quran, its major themes, style of presentation, and relevance to contemporary societies and issues.

AIS 442 ARABIC READING I. (3)
Advanced skills in speaking, reading, and analyzing selected texts from traditional and modern Arabic literature using formal spoken and written Arabic. Introduction to the use of Arabic computer software. Prereq: AIS 442 or equivalent.

AIS 443 ARABIC READING II. (3)
Continuation of AIS 442 with emphasis on Modern Arabic Short Stories. Prereq: AIS 442 or equivalent.

AIS 495G ADVANCED INDEPENDENT WORK IN ARABIC STUDIES. (1-3)
Independent research in Russian and Eastern Studies on an advanced level for undergraduate and graduate students. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of AIS 395 and 495G.
AMS American Military Studies

BASIC COURSES

AMS 101 INTRODUCTION TO THE ARMY. (2)
This introductory level course is designed to give students an appreciation for the role the Army currently plays in our society. The course covers the history of the Army and the roles and relationships of the Army within our society. The course also covers some of the basic skills necessary for today’s leaders to include oral presentation, time management, map reading, basic rifle marksmanship and squad tactics. Prereq: Must be concurrent with AMS 250.

AMS 102 INTRODUCTION TO LEADERSHIP. (2)
This course is designed to acquaint the student with the fundamental skills necessary to be a leader, both in military and civilian context. Course also covers basic military map reading skills. Prereq: Must be concurrent with AMS 250.

AMS 201 AMERICAN MILITARY HISTORY. (2)
Study of the development of the U.S. from a military perspective. Pre-parallel development of technology and warfare; and emphasis on the evaluation of military leadership from the historically tested principles of warfare from the Civil War to the present.

AMS 202 EFFECTIVE MILITARY COMMUNICATIONS. (2)
This course provides instruction and practical experience in the art of speaking and writing in the Army style. Students will demonstrate competency through a series of oral presentations and writing assignments. Small unit tactics and map reading skills will also be used in the implementation of the oral presentations.

AMS 211 ADVANCED LEADERSHIP I. (2)
This course focuses on both theoretical and practical aspects of leadership. Students will examine topics such as written and oral communication, effective listening, assertiveness, personality, adult development, motivation, and organizational culture and change. Prereq: AMS 101 and 102, or consent of instructor. Must be taken concurrent with AMS 250.

AMS 212 ADVANCED LEADERSHIP II. (2)
This course focuses principally on officeriness, providing an extensive examination of the unique purpose, roles, and obligations of commissioned officers. It includes a detailed investigation of the origin or our institutional values and their practical application in decision making and leadership. Prereq: AMS 101, 102 and 211, or consent of the instructor. Must be taken concurrent with AMS 250.

AMS 250 BASIC MILITARY SCIENCE LAB. (1)
A hands-on practicum which exposes the student to the military skills required for basic technical and tactical competence to enter the Advanced Course laboratory. Two hours per week and two week-end exercises. May be repeated to a maximum of four credits.

ADVANCED COURSES

AMS 301 LEADERSHIP AND MANAGEMENT I. (3)
Course of study in development of basic skills required to function as a manager; study of leadership styles, group dynamics, communications, motivation and military instruction methods; and school of the soldier and exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 302 ADVANCED TACTICS. (3)
Small unit tactics and communications, organization and mission of combat arms units; leadership and the exercise of command. Prereq: AMS 101, 102, graduate or undergraduate student (male or female), successful completion of basic course or basic camp, physically fit to pursue program; consent of PMS. Must be taken concurrent with AMS 350.

AMS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3)
This course will cover upper level U.K. ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as HIS 320.)

AMS 341 LEADERSHIP AND MANAGEMENT II. (3)
An advanced study of logistics, operations, military administrations, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 342 COMMAND MANAGEMENT. (3)
An advanced study of logistics, operations, military administration, personnel management, military justice, world change and military implications, service orientation and leadership training. Prereq: AMS 301, 302. Must be taken concurrent with AMS 350.

AMS 350 ADVANCED MILITARY SCIENCE LAB. (1)
A hands-on practicum which exposes the student to the military skills required for advanced technical and tactical competencies as an Army officer. The course affords junior and senior cadets opportunities to develop and refine their leadership style and abilities under differing constraints and environments. Laboratory, two hours per week and two weekend exercises. May be repeated to a maximum of four credits. Prereq: AMS 250, AMS 101, AMS 201 and AMS 202. Concurrent: AMS 301, 302, 341 or 342.

AMS 395 INDEPENDENT STUDY IN LEADERSHIP. (1-2)
Advanced study in leadership. Students are under guidance and confer individually with faculty or approved topic(s). A written report or paper is expected and will be filed in the chairperson’s office. May be repeated to a maximum of four credits. Prereq: Completion of AMS 302 and approval of PMS.

AN Analytics

AN 300 ANALYZING BUSINESS OPERATIONS. (3)
To be well-prepared, a business graduate must appreciate the nature and importance of an enterprise’s operations. This core business course introduces underlying concepts and basic analytical techniques essential for managing a firm’s manufacturing and service operations. Operations decisions focus on how to plan, control, and coordinate the organizational resources and processes concerned with producing and distributing goods and/or services. This course emphasizes quantitative and technology-based analyses of real decision problems involving such operations issues as quality control, capacity planning, location analysis, layout analysis, inventory management, forecasting, and project management within a business firm. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics.

AN 303 SUPPLY CHAIN MANAGEMENT. (3)
The study of supply chain management involves the management of key business processes, the flow of goods and information, and relationships with fellow members of the supply chain. This course will introduce students to the terminology, concepts, and skills related to supply chain management. Students will develop an understanding of the complexities associated with the physical movement of goods and information, and how they affect the mission of the firm. Discussions will address the various processes and activities within an organization and how they interface with other members of the supply chain. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 306 ANALYTICS: MODELS AND METHODS. (3)
Analytical activities are rapidly expanding in businesses, government and not-for-profit organizations. For the modern enterprise, problems in practically every domain are being formulated as models, which are then used to analyze data – producing explanations and predictions to help solve these problems. Using potentially vast volumes of data, these models are implemented and solved via computers – generating solutions that must then be interpreted and appropriately applied in decisional processes. This course leads students through the steps of model formulation, solution, interpretation, and application in such crucial decision domains as investment, scheduling, production, inventory, and logistics. It furnishes hands-on experiences with such widely used modeling techniques as linear programming, network flow programming, and multiple-objective decision modeling. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.

AN 320 BUSINESS COMPUTING SYSTEMS. (3)
This course investigates how business firms use computing systems to facilitate effective and efficient business processes – thereby improving individual and organizational productivity and competitiveness. The course is geared toward non-technical professionals who seek an overall understanding of how firms design and deploy computer-based solutions to organizational problems. Using cases and hands-on exercises as pedagogical tools, the course furnishes business applications-oriented view of various computing technologies, such as communication networks, databases, decision support systems, and enterprise systems. The course also addresses ethical and global management issues arising from the worldwide deployment and use of such systems by modern, global business firms. Prereq: CS 101 or MOS Certification. Open only to Business Minors; not available for credit to Business and Economics Majors.

AN 322 INFORMATION SYSTEMS IN THE MODERN ENTERPRISE. (3)
This course provides an introduction to the uses of information systems in the management of organizations. Recognizing that modern organizations rely on such systems, it is geared toward aspiring professionals who need to understand both how these systems contribute to their organizations and how they can participate in the realization in value from these systems. The course covers basic systems concepts; socio-technical issues; emerging hardware, software, and telecommunications infrastructure technologies; systems analysis and design, database management; system implementation; project management; and systems management. It also introduces such applications as decision support, knowledge management, and e-business with an emphasis on relevant managerial problems within both local and global contexts. Prereq: Completion of all college pre-major requirements and admission to Upper Division in Business and Economics. Non-B&E Upper Division undergraduate students may be enrolled with the consent of the instructor.
AN 440G ADVANCED TOPICS IN ANALYTICS. (3)
This course is designed for students seeking advanced treatments of contemporary topics
related to enterprise data, analysis, and decision making. Past coverage has included Data
Mining, Data Communications, and Valuation of Information. Students who enroll in this
course are expected to be highly motivated self-starters, who seek to distinguish themselves
from peers by demonstrating an interest in, and the ability to master, challenging material of
high practical relevance. The kinds of topics addressed and the treatment of these topics makes
the course invaluable to students from programs such as Computer Science, Telecommunications,
Statistics, and Engineering. Prereq: Completion of all college pre-major requirements and
admission to Upper Division or Graduate Student status in Business and Economics. Non-
B&E Upper Division undergraduate students and graduate students may be enrolled with the
counsel of the instructor.

AN 450G ANALYTICS TECHNOLOGIES. (3)
This course develops computing skills relevant to the construction, maintenance, and usage
of systems for analytics. It does so by combining the facets of technology (e.g., advanced
spreadsheet computing), realistic workplace decision making, and decision support system
development into a capstone experience. Prior courses introduce students to analytical
techniques commonly used in organizational decision making, as well as current information
technologies. This course combines students’ abilities in both areas within an advanced
software context. Specifically, the course enhances students’ abilities in developing computer-
based systems that employ analytical techniques for the purpose of aiding organizational
decision makers. Prereq: Senior standing or graduate student status in the College of Business
and Economics. B&E undergraduate students must have completed 9 of the 18 credits required
for an Analytics major. Non-B&E Upper Division undergraduate students and graduate students
may be enrolled with the consent of the instructor.

ANA Anatomy and Neurobiology

*ANA 109 ANATOMY AND PHYSIOLOGY FOR NURSING. (3)
Basic anatomy and physiology integrated to prepare freshman students for nursing. Lecture,
3 hours; laboratory, 1 hour. (This course will have a laboratory fee.) Prereq: Successful completion of
ANA 109.

ANA 209 PRINCIPLES OF HUMAN ANATOMY. (3)
The structure of the human body will be examined at various levels: cellular, tissues and organ
systems. The gross anatomical arrangement of the body will be studied in a system-by-system
format relating structure to function and the fundamentals of human embryology/malformation
with adult anatomy. The central nervous system will be emphasized. Prereq: Introductory
biology or zoology.

ANA 309 AN INTRODUCTION TO REGIONAL ANATOMY. (5)
This course is designed to serve as a transition between systems-based undergraduate anatomy
and regionally-based medical professional anatomy. The human body will be taught in an online
format, including modules for independent study, weekly virtual team-based learning sessions,
and formal course and practical examinations. Anatomical organization will be presented in a
regional format so that students can assimilate the bones, muscles, vasculature, innervations,
and sympathetic patterns for each region of the body, similar to the pedagogical approach used
in medical professional programs. Prereq: ANA 209 and mastery of the Second Life program.

ANA 350 INDEPENDENT RESEARCH IN ANATOMY AND NEUROBIOLOGY. (1-3)
Independent research with faculty members. May be repeated to a maximum of 12 credits.
Laboratory, three to nine hours per week. Prereq: Biology or psychology majors with
sophomore, junior, or senior standing and consent of a faculty member.

ANA 501 IN INTRODUCTION TO HUMAN ANATOMY. (4)
The principles of organization of the human body are presented. Gross anatomy lectures
initially follow a systemic plan. This is succeeded by a regional presentation. Several methods
of studying anatomy are utilized. These include radiology, palpation of living structures,
and the demonstration of preserved fresh and fixed materials. Prereq: Some background in biology,
including one or more such courses as biology, zoology, botany, comparative anatomy or
embryology, and enrollment in the College of Medicine or a graduate program in the biomedical
sciences. In addition, students from graduate programs outside of anatomy must obtain the
consent of the course director before registration.

ANA 512 MICROSCOPY AND ULTRASTRUCTURE. (4)
The organization of cells, tissues and organs are presented through lectures and in the
laboratory, through the microscopic study of histological sections and illustrations. Prereq:
Some background in biology, including one or more such courses as biology, zoology, botany,
biology, comparative anatomy or embryology, and enrollment in the College of Medicine or a
graduate program in the biomedical sciences. In addition, students from graduate programs
outside of anatomy must obtain the consent of the course director before registration.
ANA 516 SELECTED TOPICS IN ADVANCED NEUROSCIENCE. (3)
ANA 516 will cover advanced topics in neuroscience. Topics include: neural pathways, development, neuroanatomy, neurobiochemistry, neuropathology, neural imaging and molecular neuroscience. Laboratory experiences will be used to complement lectures. Prereq: ANA 511, 512, 513, PGY 511; and enrollment in the College of Medicine or a graduate program in the bio-medical sciences. In addition, students from graduate programs outside of anatomy must obtain the consent of the course director before registration.

ANA 530 COMBINED HISTOLOGY AND SPECIAL ORAL MICROANATOMY. (5)
An analysis of the histological structure and organization of the human body, including an especially detailed treatment of the tissues and organs related to the oral cavity. Prereq: Admission to the College of Dentistry or some background in biology and consent of instructor.

ANA 532 SYSTEMIC HUMAN ANATOMY. (2)
A presentation at the gross-anatomical level of the structure and organization of the several organ systems that constitute the human body. Prereq: Admission to the College of Dentistry.

ANA 534 DENTAL GROSS ANATOMY AND EMBRYOLOGY. (6)
Study of human gross and developmental anatomy with particular emphasis on functional anatomy of the head and neck. Lecture/laboratory course, with dissection being an essential component of the laboratory portion. 140 hours. Prereq: Admission to the College of Dentistry. (Same as OBI 815.)

ANA 536 HUMAN EMBRYOLOGY, AN ABBREVIATED COURSE. (2)
A concise presentation of developmental mechanisms, early development of the embryo, and subsequent development of selected systems and regions of the body. Lecture, one hour. Prereq: Admission to the College of Dentistry.

ANA 538 DENTAL NEUROANATOMY. (2)
Study of human dental neuromotor anatomy with emphasis on functional neuromotor anatomy of central nervous system, especially related to cranial nerves 5, 7, 9, and 10; pain, and long tracts. Lecture, one hour per week. Prereq: Admission to the College of Dentistry. (Same as OBI 817.)

ANA 600 SEMINAR IN ANATOMY. (1)
A weekly seminar devoted to presentation and discussion of classic and new research in the field. May be repeated to a maximum of four credits. Prereq: Admission to the anatomy graduate program or permission of the course director.

ANA 605 NEUROBIOLOGY OF CNS INJURY AND REPAIR. (3)
The objective of the course will be to provide a general overview of the current state of knowledge concerning the pathophysiologic and therapeutic approaches to central nervous system injury. The course will provide a strong working background concerning the issues, techniques and frontiers of neurotrauma therapeutic discovery research at an advanced post-traumatic neurodegeneration in the injured brain or spinal cord or enabling regeneration and repair. This course is a graduate level course intended for students who are in their second or subsequent years of graduate study and who are pursuing focused research training in neurotrauma research. No special prerequisites, other than graduate standing, are necessary. However, a background in neuroanatomy and neuropathology is highly recommended. Prereq: Permission of instructor. (Same as PGY 605.)

ANA 609 EDUCATIONAL STRATEGIES IN THE ANATOMICAL SCIENCES. (3)
This course informs on and examines multiple aspects of teaching the Anatomical Sciences. Classroom and laboratory issues, teaching theory, portfolio development and presentation strategies are among the topics covered. Prereq: Admission to the graduate certificate program in the Anatomical Sciences or the permission of the course director.

ANA 611 REGIONAL HUMAN ANATOMY. (5)
Functional human anatomy covering all regions of the body utilizing dissection techniques with an emphasis on cross-sectional anatomy and normal morphology. Lecture, four hours; laboratory, four hours per week. Prereq: Enrollment in the PAS Program of the College of Allied Health or a graduate program in the biomedical sciences (by consent of course director only).

ANA 612 BIOLOGY OF AGING. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as BIO/GRN/PGY 612.)

ANA 618 MOLECULAR NEUROBIOLOGY. (4)
This course provides knowledge base and analytical skills in the field of molecular neurobiology. An in-depth introduction to current technologies, their rationale and limitations, will be the focus to address normal brain function and neuropathological conditions. Prereq: BCH 501, 502, NEU 605, or consent of instructor. (Same as BIO/MU/PGY 618.)

ANA 625 INTRODUCTION TO FUNCTIONAL MRI. (1)
Hands-on course for practitioners interested in acquiring functional MRI techniques as a research tool. Prereq: (1) Introductory statistics (e.g. PSY 610, STA 503, STA 570). (2) Permission of instructor.

ANA 629 TECHNIQUES OF ANATOMICAL RESEARCH. (2)
The objective of this course is the familiarization of students with research techniques in anatomy. The relationship will be theoretical. Students will work under the direction of appointed staff members for determined periods of time, usually on a problem. The exact length of time will depend upon the student’s purposes, progress and the techniques. The problem may be new research or a repetition of previous work. May be repeated to a maximum of four hours. Prereq: Previous senior college or graduate level work in biology and consent of instructor.

ANA 631 ADVANCED HUMAN ANATOMY. (3-5)
The objective of this course is to meet individual student needs for increased knowledge in particular areas of gross human morphology. Investigations of problems involving gross morphology will be carried out. One or several defined areas of the body will be studied in considerable detail by dissection, by intensive use of the pertinent literature, by the use of visual aids, projected materials and other appropriate learning aids. Prereq: A background in gross human anatomy equivalent to a medical school course in regional anatomy and consent of course director and/or Director of Graduate Studies in Anatomy and Neurobiology.

ANA 633 ADVANCED DEVELOPMENTAL ANATOMY. (2-5)
This is a detailed study of intra-uterine development, both normal and abnormal, usually including the entire gestational period from fertilization to birth. May be repeated to a maximum of 10 credits. Prereq: ANA 511 or 512 and ANA 513 or their equivalents, or consent of instructor.

ANA 636 ADVANCED NEUROANATOMY. (3-5)
The objectives include specific and detailed correlation of microscopic and ultrastructural morphology of structures in the nervous system with function of these structures. Emphasis will be placed on structure-function relationships, neurotransmitters, chemical constituents of the nervous system, neuronal as well as non-neuronal cells, plasticity of the nervous system and diseases, development and neurobiology. The detailed content and emphasis will depend on both the background and goals of the students. Depending on number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: ANA 511, 512, 513, 516, or equivalents, or consent of instructor.

ANA 638 DEVELOPMENTAL NEUROBIOLOGY. (3)
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cellular and molecular approaches to cell differentiation, neural pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as BIO/PGY/PSY 638.)

ANA 655 INTRODUCTION TO MAGNETIC RESONANCE IMAGING. (3)
Survey of basic concepts and applications in magnetic resonance imaging: physics and chemistry, basic mathematical foundations, workings of a modern MRI scanner, image reconstruction, biology with emphasis on neurobiology, medical applications in the brain and heart. Covers basic functional imaging and spectroscopy. Prereq: Undergraduate major in a science or engineering discipline.

ANA 660 BIOLOGY OF REPRODUCTION. (3)
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, gonadotropin production and control, gametogenesis, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as ASC 660 and PGY 660.)

ANA 662 ULTRASTRUCTURAL ANATOMY. (2-5)
The objectives of this course are to advance the students’ knowledge of the submicroscopic structure of cells and tissues. Correlation of intra- and extracellular morphology and function will be emphasized. Students will do detailed laboratory work in the techniques of electron microscopy. Depending on the number of credits a student registers for, and the topic and course orientation, laboratory work, library work, written and/or oral presentations may be a course requirement. Prereq: ANA 512, previous work in microscopy including histology or cytology, or equivalents, and consent of instructor.

ANA 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as GRN/PGY/PHA 710.)

ANA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
Course Descriptions

ANA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ANA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

ANA 780 SPECIAL TOPICS IN NEUROBIOLOGY. (1-3)
A lecture/seminar course offered based on contemporary topics in neurobiology. Course is designed to offer different emphasis in a given year and to cover timely topics. Prereq: Consent of the course director.

ANA 790 RESEARCH IN ANATOMY. (1-12)
Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Consent of the instructor.

ANA 801 HISTOLOGY FOR PHYSICAL THERAPY STUDENTS. (1)
A survey of selected basic and specialized mammalian tissues most commonly involved in diseases treated by physical therapists. The course provides information required for understanding the cellular mechanisms behind the various diseases and the rationale for subsequent treatment. Prereq: Admission to the College of Allied Health.

ANA 802 NEUROANATOMY FOR PHYSICAL THERAPY STUDENTS. (2)
A concise account of the functional anatomy of the central nervous system. The anatomical organization is correlated with physiological activity. Emphasis is placed upon the morphological basis for progressively higher levels of control of activity from the simple reflex to voluntary motor activities controlled by the cerebral cortex. This type of knowledge is required for proper understanding and performance of physical therapy technicians in the treatment of medical and surgical disease.

ANA 811 HUMAN ANATOMY FOR ALLIED HEALTH PROFESSIONS. (5)
A dissection-based gross anatomy course designed to present the principles of the human body in a regional format with special emphasis on functional/clinical anatomical relationships. Prereq: Enrollment in the PT program of the College of Allied Health Professions.

ANA 814 HUMAN STRUCTURE/GROSS ANATOMY. (6)
The course consists of lecture, small group, laboratory, and palpation exercises that provide a basic understanding of anatomical principles, organization and development. Anatomical structures are introduced as a basis for future functional correlates and principles are taught via laboratory discussions, presentations, directions, films and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year). (Same as MD 814.)

ANA 815 FIRST-YEAR ELECTIVE, ANATOMY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ANA 825 SECOND-YEAR ELECTIVE, ANATOMY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anatomy and Neurobiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

ANS 825 SECOND-YEAR ELECTIVE, ANESTHESIOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Anesthesia. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Prereq: Admission to second-year medical curriculum and approval of adviser.

ANS 842 ADVANCED CLINICAL PHARMACOLOGY AND ANESTHESIOLOGY. (4)
This course uses lectures, interactive small groups, and firsthand experience to introduce anesthesiology as it relates to pharmacology and physiology. The course also teaches pharmacology and therapies utilizing clinical cases. Students develop their own personal formularies during the course. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical curriculum. (Same as PHA 842 and MD 842).

ANS 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
ANS 850 CLINICAL CLERKSHIP IN ANESTHESIOLOGY
ANS 851 CRITICAL CARE UNIT
ANS 852 RESEARCH IN ANESTHESIOLOGY
ANS 853 CLINICAL CLERKSHIP IN PAIN MANAGEMENT
ANS 854 ANESTHESIOLOGY OFF-SITE

ANT Anthropology

ANT 101 INTRODUCTION TO ANTHROPOLOGY. (3)
This course introduces the student to the study of human cultures, past and present. It offers a comprehensive introduction to anthropology, emphasizing the concepts and methods of the major sub-fields, i.e., cultural, biological, archaeology, and linguistics.

ANT 102 ARCHAEOLOGY: MYSTERIES AND CONTROVERSIES. (3)
Scientific archaeology has a problem: fringe ideas about mysteries of the past attract more interest than scholarly accounts of these same mysteries. In discussing the "mysterious" side of archaeology, this course asks why consideration of the past invites some of the most bizarre speculations about human life. Why do fringe theories about lost civilizations, intergalactic interactions, and mysterious technologies gain more popularity than mainstream theories? Why should serious archaeologists and students pay any attention to such "wacko" ideas? To answer these questions, this course attends to two kinds of controversies: fantastic claims in the past (such as the Myth of the Moundbuilders and the Shroud of Turin) and debates in the present (such as the cultural affiliation of Kennewick Man and uses of archaeology to promote discrimination).

ANT 130 INTRODUCTION TO COMPARATIVE RELIGION. (3)
Comparative study of major world and selected regional religions with emphasis on analysis of beliefs, rituals, artistic expression and social organization. Eastern and Western religions are considered. (Same as R5 130.)

ANT 160 CULTURAL DIVERSITY IN THE MODERN WORLD. (3)
Directed at non-majors, this course is intended to introduce the student to the diversity of human cultural experience in the contemporary world. Goals of the course include gaining an appreciation for the common humanity and uniqueness of all cultures; to gain a sensitivity toward stereotypes and ethnocentrism, and to understand the distinctions between "race," ethnicity and racism. The course features extended descriptions of the cultural dynamics of the culture(s) with which the instructor has worked.

ANT 220 INTRODUCTION TO CULTURAL ANTHROPOLOGY. (3)
The study of the lifeways and beliefs of different peoples. The objectives of the course are to foster an appreciation for the variety of cultural traditions found throughout the world, and to introduce students to anthropological concepts and methods of inquiry.

ANT 221 NATIVE PEOPLE OF NORTH AMERICA. (3)
This is a survey of the aboriginal Native American cultures of North America and of the impact of four centuries of British, French, Spanish, and Russian contact on Native American societies. Particular emphasis is placed on comparing and contrasting cultural characteristics of Native American groups living in ecologically divers regions of North America. The course will include consideration of the status of Native Americans in present-day North America.

ANT 222 MIDDLE EAST CULTURES. (3)
As part of the General Education curriculum, this course falls under the "Global Dynamics" major category. Students are offered by the Department of Anthropology. This course will explore some of the cultures, and aspects of culture, found in the broad region of the Middle East and North Africa. Exploration will be rooted in anthropological research and perspective, and organized around rubrics including kinship, gender, religion, and cultural performance.
The course Descriptions

**ANT 225 CULTURE, ENVIRONMENT AND GLOBAL ISSUES.** (3)
A fundamental part of human experience is interacting with our physical surroundings, but in the globalized context of the world, our interactions with the physical world increasingly include distant places rather than just the surroundings we see from our door step. This course aims to develop students’ awareness, knowledge and ability to reflect on how human behavior intersects with global environments. To do so, it applies an anthropological interpretive framework to topics that link human lifestyles, the environment and global issues. Prereq: Freshman or sophomore standing only.

**ANT 230 INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY.** (3)
This course explores the ways in which biology, the environment and culture come together to form the human condition. Topics include human genetics, human evolution, primate behavior, contemporary human variation and applied biological anthropology, including forensics, child growth and human nutrition. This course includes a laboratory component.

**ANT 240 INTRODUCTION TO ARCHAEOLOGY.** (3)
Introduces the theories, techniques, and strategies used by archaeologists to recover and interpret information about past cultures.

**ANT 241 ORIGINS OF OLD WORLD CIVILIZATION.** (3)
This course explores the rise of civilizations in the Old World through archaeology and history. The course examines theories of civilization and state formation and case studies that demonstrate how states arose. Concentrates on regions that produced some of the earliest and most complex societies on the planet: Mesopotamia, Egypt, the Indus Valley, China, and Europe. Comparing and contrasting these great societies will show how each was influenced by its unique social, cultural and environmental surroundings. The course also examines the origins of agriculture, writing, art, trade, mathematics, astronomy and religion in Africa, Asia, and Europe.

**ANT 242 ORIGINS OF NEW WORLD CIVILIZATION.** (3)
This course discusses warfare, commerce, social organization, political diplomacy, disease, demographic change, religion, and environmental degradation among the ancient peoples of the Americas as revealed by archaeological, art historical, and textual data. Students will gain an appreciation of the diversity of human life in the New World as well as an understanding of the tremendous cultural achievements of the Inca, the Aztec, the Maya, and their neighbors. We will use the concept of complexity as a framework for comparing different societies and for contextualizing the relevance of ancient civilizations for understanding global processes in the contemporary world.

**ANT 245 FOOD CULTURE AND SOCIETY.** (3)
This course is designed for students in anthropology, food and nutrition, agriculture and environmental studies. It explores food in terms of human food systems. Human food systems include the knowledge, values, and practices used to produce, distribute, process, exchange, and consume food. These are embedded in culture and operate within societies. Thus, why we eat, what we eat, when, where and with whom we eat, how and where we obtain our food, how we prepare it, and distribute it in specific ways may vary as a function of the culture in which we live, our place of residence and our location within society. We will explore these issues through the lectures, readings, videos and discussions to gain a better understanding of the complexity of food-related behaviors among people around the world.

**#ANT 251 GLOBAL HEALTH: CULTURE, PATHOLOGIES AND SOCIAL INEQUALITIES.** (3)
What are the relationships between globalization, development, social justice and health? How do different global health interventions influence how people provide and seek out solutions to chronic and emergency health problems? This course explores contemporary global health issues from an anthropological perspective. Participants examine health effects of economic collapse, disasters and socio-political changes in industrialized and developing countries. We also study the growing global health industry from a social science perspective to evaluate the strengths and limitations of international aid, humanitarian interventions and NGOs for the wellbeing of individuals and communities. Topics include chronic and infectious diseases, environmental disasters, pharmaceuticals and the traffic in human organs. Course materials include texts from anthropology, mass media, documentaries, blogs and Twitter feeds. This course will be of interest to students in anthropology and the social sciences, International Studies, pre-med students and those who are interested in pursuing advanced degrees of professional careers in development and policy.

**ANT 301 HISTORY OF ANTHROPOLOGICAL THEORY.** (3)
The purpose of this course is to acquaint the undergraduate student with the history of the development of anthropological ideas from their precursors in thoughts about human nature and behavior beginning with ethnographic and philosophical literature from Greek and Roman civilization. This course ends with discussion of current emphases in anthropological theory. The course will provide anthropology majors with the foundations they need to master this area of disciplinary knowledge.

**ANT 303 TOPICS IN THE ANTHROPOLOGY OF FOOD AND NUTRITION: (Subtitle required). (3)**
This course focuses on food and nutrition through the lens of anthropology. Topics will vary, but each semester the course will provide insight into an aspect of food and nutrition that is relevant to present-day concerns in regional, national, and or global context. Nutrition is one of the most critical health issues in the U.S. and globally as people struggle with both undernutrition and overnutrition and the long-term consequences of both to human well-being. At the same time, it is important to recognize that food is embedded in cultural, social and political-economic contexts that serve to foster and maintain cultural and social identity, and or in which food is a commodity to be bought, sold and traded for economic profit and/or political gain.

**ANT 311 GLOBAL DREAMS AND LOCAL REALITIES IN A “FLAT” WORLD.** (3)
This course explores the ways in which differences in factors such as nationality, ethnicity, gender and occupation shape experiences of globalization. We will analyze and interpret rapidly changing patterns of global production, consumption, politics, resistance, adaptation, and identity construction around the world.

**ANT 320 ANDEAN CIVILIZATION.** (3)
A study of the Inca and other pre-Hispanic civilizations of highland South America in terms of their origins, their development, and their material, social, and intellectual achievements.

**ANT 321 INTRODUCTION TO JAPANESE CULTURE. MEIJU (1868) TO PRESENT.** (3)
General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nation-building, Japan and the West, Japan and Asia (for the Meiji period 1868-1912); gender construction and class formation, urbanization and mass culture (for the Taisho period 1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as JPN 321.)

**ANT 322 ANCIENT MEXICAN CIVILIZATIONS.**
The course provides a study of the Aztec and the related cultures of the New World. It provides a detailed discussion of the pre-Columbian subsistence practices, economy, religion, and politics by tracing the development of ancient Mesoamerican civilization from its earliest beginnings to the Spanish conquest.

**ANT 324 CONTEMPORARY LATIN AMERICAN CULTURES.** (3)
This course is a detailed survey of societies and cultures of contemporary Latin America, utilizing contributions from anthropological research. Prereq: Introductory social science course.

**ANT 325 LANGUAGE AND CULTURE.** (3)
This course is an introduction to linguistic anthropology. The course reviews the basic principles of linguistic analysis and examines the ways in which linguistic structures interact with and reflect cultural variation. (Same as LIN 325.)

**ANT 326 PEOPLE AND CULTURES OF SUB-SAHARAN AFRICA.** (3)
A survey of indigenous societies and cultures of Africa south of the Sahara, with special attention to their adaptation of colonialism and post-colonial national development. Prereq: Sophomore standing or higher. (Same as AAS 326.)

**ANT 327 CULTURE AND SOCIETIES OF INDIA AND SOUTH ASIA.** (3)
This course considers the interrelationships between the various religious, political and philosophical traditions and practices of India and South Asia in the context of their shared cultural, historic, structural, geographic and demographic ties.

**ANT 328 THE ANCIENT MAYA.** (3)
This course uses archaeology, epigraphy, ethnohistory and ethnographic analogy to explore the origin, florescence and decline of the ancient Maya (1000 BC to 1500 AD). The class studies economics, politics, social organization, and religion into a holistic understanding of the ancient Maya world.

**ANT 329 CULTURES AND SOCIETIES OF EURASIA AND EASTERN EUROPE: SOCIALISM AND POST-SOCIALIST CHANGE.** (3)
This course provides an anthropological study of cultures and societies of Eurasia and Eastern Europe. The course considers the demise of Soviet socialism and the emergence of democracy and market economies. We examine how people experience political, cultural and economic transformations in their social relations and in their everyday lives.

**ANT 330 NORTH AMERICAN CULTURES.** (3)
This course uses readings, films, and music to explore the plurality of peoples and cultures in North America – with particular attention to the U.S. We will look at youth cultures as sites of creativity and resistance, examine perennial problems in social equality, consider the similarities and differences between urban and rural ways of life, and explore environmental concerns as an integral part of making and sustaining culture.

**ANT 331 ANTHROPOLOGY OF NORTH AFRICA.** (3)
This is a survey course of North Africa as a cultural area. Countries included in any given semester will vary. North Africa is Islamic and is often considered to be part of the Middle East but has a distinct history and culture of its own. Course content will include cultural, social, historical, economic, religious, and political perspectives of North Africa. Ethnicity and the impact of colonialism will be discussed. Other important segments will examine gender status and roles, family and marriage, sociopolitical organization, the life course of males and females, and aging.

**ANT 332 HUMAN EVOLUTION.** (3)
Basic concepts and theory of evolution will be reviewed and applied to the study of fossil humans. The evidence for the evolution of humans and their primate relatives will be studied, with attention paid to alternate interpretations of the data. Prereq: ANT 230 or BIO 150.
ANT 333 CONTEMPORARY HUMAN VARIATION. (3)
This course focuses on human variation resulting from adaptation to a wide range of environments and the stresses inherent in each. It explores how humans respond/have responded to natural stresses, e.g., cold, heat, aridity, and altitude, and human-made stresses, e.g., poverty, malnutrition and chemical pollution.

ANT 338 ECONOMIC ANTHROPOLOGY. (3)
A comparative ethnographic, theoretical, and historical exploration of the socio-cultural constitution of economic practices. Students will examine different approaches to questions of human nature, choice, values and morality. The course explores power and social life in diverse cultures through topical focus on peasants, markets, gifts, commodities, consumption and systems of production. The course provides a foundation for applying anthropological knowledge to real-world situations and the material is readily applied to archaeology, international business and social science.

ANT 340 DEVELOPMENT AND CHANGE IN THE THIRD WORLD. (3)
This course introduces the student to how anthropologists approach the study and practice of economic development. It explores cross-culturally how local populations have responded to development; the different topics of development anthropology, such as agriculture and rural development; and the ways anthropological knowledge is applied in addressing development problems.

ANT 342 NORTH AMERICAN ARCHAEOLOGY. (3)
This course focuses on the origins and growth of prehistoric American Indian cultures north of Mexico as revealed by archaeological data.

ANT 350 TOPICS IN ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in anthropology. May be repeated to a maximum of nine credits under different subtitle.

ANT 351 SPECIAL TOPICS IN ARCHAEOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in archaeology. May be repeated to a maximum of twelve credits under a different subtitle.

ANT 352 SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in cultural anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

ANT 353 SPECIAL TOPICS IN PHYSICAL OR BIOLOGICAL ANTHROPOLOGY (Subtitle required). (3)
Discussion, reading and writing focusing on specific topics in physical or biological anthropology. May be repeated up to a maximum of twelve credits under a different subtitle.

ANT 375 ECOLOGY AND SOCIAL PRACTICE. (3)
This course provides a broad survey of theoretical and historical issues in the link between humans and their environment. Throughout the semester, students will read about and discuss the many ways humans interact with their physical surroundings. Students will examine human cultural adaptation to different ecological settings, with an overall concern of finding general principles that apply to the many human lifestyles on the planet.

ANT 399 FIELD-BASED/COMMUNITY BASED EDUCATION IN ANTHROPOLOGY. (1-15)
A community-based or field-based experience in Anthropology under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Pass-fail only. Prereq: Permission of instructor and departmental chairperson; completion of departmental learning agreement.

ANT 401 GENDER ROLES IN CROSS-CULTURAL PERSPECTIVE. (3)
Explores the theoretical and substantive basis for contemporary thinking about gender from an anthropological perspective. Gender content is explored in several cultures representing all levels of sociocultural complexity.

ANT 429 SURVEY OF MEDICAL ANTHROPOLOGY. (3)
This course provides a survey of health, disease, and healing in non-Western and Western societies. An examination of major theoretical perspectives in medical anthropology.

ANT 431 ANTHROPOLOGY OF EASTERN EUROPE AND RUSSIA. (3)
An anthropological approach to the cultural, political, and economic experiences of people living under state socialism and through its demise. We ask how everyday life and social relations in this region are being affected by emerging market relations and democracy. Reading include ethnographic studies and the works of essayists, fiction writers, and scholars from the region. Prereq: ANT 160 or ANT 220.

ANT 433 SOCIAL ORGANIZATION. (3)
This course provides an overview of how anthropologists approach the study of social organization. The class will provide historical and conceptual background to the study of social organization, and explore a range of organizational forms from rural households to complex communities.

ANT 435 CULTURES AND POLITICS OF REPRODUCTION. (3)
This course takes a cross-cultural approach to understanding the ways reproduction and associated phenomena (such as family formations and the social use of technologies) comprise areas where social relations become created and challenged. Ethnographic case studies will explore cross-cultural constructions of the body (sexuality, anatomy and physiology), parenthood, and kinship relations; and students will examine the ways the state, social movements, legal/medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: ANT 220 or WS 201 or permission of instructor.

ANT 440 ANTHROPOLOGICAL PERSPECTIVES ON CHILD GROWTH. (3)
This course examines basic concepts of child growth and development, the evolutionary pattern of human growth and comparative patterns of human growth across populations. Taking a biocultural approach, the course explores the many influences that facilitate or constrain child growth, including poverty, gender ideology, nutrition, and illness, focusing especially on social inequality. Taking a child-centered approach, the course also focuses on the lives of children, how children cope with the circumstances of their lives, and the effect of those circumstances on their well-being.

ANT 450 SYMBOLS AND CULTURE. (3)
Examines the way in which symbolic systems create the meanings through which we experience life. The course will explore symbols and symboling behavior from a humanistic perspective, and will present examples of non-Western symbolic systems. Prereq: ANT 220, or consent of instructor.

ANT 470G REGIONAL AMERICAN ETHNOGRAPHY. (3)
The ethnography of a selected North American or South American culture area or group. Both historical and contemporary cultures will be considered, e.g., Appalachia, Northwest Coast Indians, Urban American, etc. May be repeated to a maximum of six credits.

ANT 490 ANTHROPOLOGICAL RESEARCH METHODS. (3)
Introduction to anthropological research methodology and techniques in ethnology, biological anthropology and archaeology.

ANT 506 SOCIOLINGUISTICS. (3)
This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq LIN/ENG 211, ANT 220, SOC 101 or graduate standing. (Same as LIN/SOC 506.)

ANT 507 LINGUISTIC ANTHROPOLOGY. (3)
This course is an advanced survey of current areas of research in linguistic anthropology. Topics include language and thought, cultural differences in linguistic interaction, the ethnography of communication, ritual uses of language, language and identity and cultural poetics. Prereq LIN/ENG 211, or ANT 220, or consent of instructor. (Same as LIN 507.)

ANT 515 PHONOLOGICAL ANALYSIS. (3)
This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: ENG/LIN 211 or equivalent. (Same as LIN 515.)

ANT 516 GRAMMATICAL TYPOLOGY. (3)
This course examines the typological classification of languages according to their morphological and syntactic characteristics. Course work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from a non-Western language. Discussion includes extensive reference to languages other than English. Prereq: ENG/LIN 211 or equivalent. (Same as LIN 516.)

ANT 519 HISTORICAL LINGUISTICS. (3)
This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semant ic, and lexical. The course will also investigate a variety of topics related to the phenomenon of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world’s languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 211 (Same as LIN 519.)

ANT 525 APPLIED ANTHROPOLOGY. (3)
Principles of policy research and intervention in cultural anthropology with attention to the theoretical and ethical basis of such research and intervention. Intervention techniques considered include research and development anthropology, action anthropology, community development, community advocacy anthropology and culture brokerage. Prereq: Nine hours of cultural anthropology or consent of instructor.

ANT 532 ANTHROPOLOGY OF THE STATE. (3)
This course offers an anthropological examination of the state in historical, cross-cultural perspective. We will cover such topics as modern state and imperial practices and institutions, state and non-state actors, resistance, citizenship and globalization. Prereq: Nine hours of cultural anthropology or consent of instructor.
ANT 534 SOCIOLOGY OF APPALACHIA. (3)
A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing national political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD Senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as CLD/SOC 534.)

ANT 541 ARCHAEOLOGICAL METHOD AND THEORY. (3)
Examines the concepts, aims and methodology of archaeology as a scientific discipline within the social sciences. Attention given to the basic principles and recent advances of archaeological fieldwork and post-field analysis. Prereq: ANT 240 and six hours of cultural anthropology or archaeology courses, or consent of instructor.

ANT 543 CULTURAL RESOURCES MANAGEMENT. (3)
Introduction to the theory and practice of culture resource management as it has developed in the historic preservation movement in the United States. The history of preservation is covered along with the development of the contemporary legal tools. The implications of these for the field evaluation of sites is presented. Prereq: Nine hours cultural anthropology or archaeology, or consent of instructor.

ANT 545 HISTORICAL ARCHAEOLOGY. (3)
Historical archaeology applies archaeological methods and techniques to the remains of societies having written histories. The course introduces students to the history and theoretical development of the discipline, and to the variety of the data sources used by historical archaeologists. Particular attention is given to the ways in which historical archaeologists use material culture to address research issues of interest in anthropology, history, and other relevant disciplines. Prereq: ANT 240.

ANT 555 EASTERN NORTH AMERICAN ARCHAEOLOGY. (3)
Detailed analysis of prehistoric cultures of eastern United States with emphasis on interpretation of prehistory in Ohio River Valley. Prereq: ANT 240 and six hours of archaeology or cultural anthropology, or consent of instructor.

ANT 580 ADVANCED TOPICS IN ANTHROPOLOGY. (3)
Selected topics of theoretical or methodological importance in anthropology, with special attention to topics of contemporary relevance. Refer to Schedule of Classes for topics. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

ANT 581 INDEPENDENT WORK IN ANTHROPOLOGY. (1-4)
May be repeated three times to a maximum of 12 credits. Prereq: Major in anthropology, standing of 3.0 in the department and consent of instructor.

ANT 582 SENIOR INTEGRATIVE SEMINAR. (3)
Seminar focusing on current issues in anthropology. Purpose is to provide a format in which advanced undergraduates can integrate knowledge acquired in previous anthropological coursework and evaluate the contribution of the different anthropological subdisciplines to understanding contemporary problems. Emphasis placed on oral and written communication. Prereq: Major in anthropology, senior standing.

ANT 585 FIELD LABORATORY IN ARCHAEOLOGICAL RESEARCH. (3-6)
Practical supervised training in field in archaeological research methods and techniques, problem analysis, field laboratory procedures, recording methods. Laboratory, 20 to 40 hours per week. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

ANT 600 PRACTICUM IN TEACHING ANTHROPOLOGY. (1)
Guided practical experience in teaching, supplemented with group discussions of teaching practice and selected reading on lecture technique, course development, test writing and other skills for participation in the professoriate. May be repeated to a maximum of three credits. Prereq: Graduate status in anthropology or consent of instructor.

ANT 601 THEORIES AND CONCEPTS IN ANTHROPOLOGY. (3)
This course is an intensive examination of the theoretical perspective in anthropology. While attention will be given to the historical foundations of anthropological theory, emphasis will be placed on contemporary concerns in anthropology as illustrated through the contributions of selected theorists. Prereq: Admission to Graduate Program or approval of instructor.

ANT 602 SEMINAR IN CULTURE CHANGE. (3)
An in-depth discussion of the theory and method of the various approaches to the study of long-term culture change in past and present societies. This course stresses interdisciplinary problem-oriented research on a specific theme of culture change. Emphasis also is placed on the development of writing skills, oral presentations, professional standards or performance in research and communication, and critical thinking. Prereq: Admission to the Anthropology graduate program and ANT 601; consent of instructor.

ANT 603 HUMAN BIOLOGY IN CONTEXT OF SOCIOCULTURAL CHANGE. (3)
This course explores the relationship between society, culture, and human biology. Its thematic focus will be how cultural ideologies and social organization play out with respect to the biology of human groups, both archaeological and contemporary populations. We will pay special attention to issues of class, gender and ethnicity and focus on demographic and health-related issues. Current issues in biology, anthropology, including critical analysis of evolutionary adaptation theory and the concept of “race” in contemporary human populations will also be addressed. Prereq: First-year graduate standing in Anthropology, or permission of instructor.

ANT 604 SOCIAL ORGANIZATION. (3)
This course begins with discussion of the major theoretical approaches to the study of social organization, and examines major contemporary approaches to organization, and membership. Prereq: ANT 541 or consent of instructor.

ANT 608 ANTHROPOLOGY OF FOOD AND NUTRITION. (3)
This graduate seminar explores food as fundamental to human existence in a variety of ways. We eat to maintain life – and the nutritional characteristics of human diets shape the development and health of individuals and populations. But, for the most part, humans do not eat nutrients, humans eat food, and food consumption and production is an intensely cultural, social and political activity. We will explore food and nutrition from all these perspectives. In addition to theorizing food and nutrition, we will become familiar with the methods most often used by national and global scholars and practitioners for assessing dietary and nutritional status of individuals and populations. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 610 HISTORY OF THEORY IN ANTHROPOLOGY. (3)
This course aims to give graduate students a firm grounding in the development of anthropological thought from its origins in 18th century Enlightenment social philosophy and 19th century evolutionism to the emergence of poststructuralist theory in the late 20th century. Upon completion of this course students should be thoroughly familiar with the major theoretical schools and debates in the history of anthropology and the broader social discourses that shaped them. Prereq: Graduate standing in Anthropology or permission of instructor.

ANT 620 TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodological state of the art ideas and methods of conducting evaluation studies and analyzing data from these studies are presented. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as EDP/EPE 620/SOC 622.)

ANT 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodological state of the art ideas and methods of conducting evaluation studies and analyzing data from these studies are presented. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Basic course in statistics or its equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as EDP/EPE 621.)

ANT 637 SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT. (3)
Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and developments, and of alternative policies for the world of the future. Considers the possible roles for social scientists in policy formulation and application. Prereq: Six graduate credits in social sciences or consent of instructor. (Same as CLD/SOC 637.)

ANT 640 SCIENCE, AGRICULTURE AND DEVELOPMENT. (3)
An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as CLD/SOC 640.)

ANT 641 GENDER ISSUES IN DEVELOPMENT. (3)
An examination of gender issues in domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as SOC 641).

ANT 645 ANTHROPOLOGY AND EPIDEMIOLOGY. (3)
This course will introduce students to the fundamentals of epidemiology, as the methodological approach, which underlies biomedical research, and will examine the ways that the methodologies of anthropology and epidemiology complement each other in the study of health and disease. The course will examine the points of similarity between anthropology and epidemiology particularly as regards the importance of examining sociocultural phenomena in order to better understand the origins of disease. The course will explore the tensions between anthropology and epidemiology in matters of methodology, exemplified by the debate over quantitative vs. qualitative approaches, as well as theoretical perspectives. Prereq: Permission of instructor.

ANT 646 GLOBAL HEALTH: PEOPLE, INSTITUTIONS AND CHANGE. (3)
This course presents anthropological studies of health in an international context, attending to ways in which anthropological study can contribute to identification of issues relevant to health and development. It will have a dual focus. First, it will privilege western concepts and explore both biological and biomedical accounts of health. Topics may include culturally-defined syndromes, international medicines and health, and illness and body from an international, ethnographic perspective. Second, the course will explore the culture of international health agencies, e.g., WHO, UNICEF, etc. Prereq: Permission of instructor.

ANT 650 THEORY IN ARCHAEOLOGY. (3)
This seminar examines the development of archaeological theory with specific emphasis on the discipline of anthropological archaeology in the New World. Particular schools and trends in contemporary archaeological theory are discussed in detail. Prereq: ANT 541 or consent of instructor.
ANT 632 House Hold, community, and demographic archaeology. (3)
A seminar which examines the theory and methodology used by archaeologists to study population aggregates ranging from individual households to regional populations. Particular emphasis given to theoretical perspectives which integrate ecological, social and spatial analyses of population data. Prereq: Graduate standing in the Department of Anthropology or consent of instructor.

ANT 735 Seminar in anthropological archaeology. (3)
Theoretical frameworks for the analysis of economic systems and processes. The seminar explores the interaction between economic phenomena and other aspects of social and political organization both as action, structure, and systemic process in contemporary, prehistoric, and historical contexts. Students are expected to formulate research questions and discuss current theory in a critical fashion. Prereq: ANT 601 and 602 (ANT 538 is recommended) or consent of instructor.

ANT 736 Culture, environment, and development. (3)
Comparative analysis of various modes of social action including action research, advocacy, cultural action, and participatory action research. Foundations in social theory considered. Prereq: Admission to graduate program in anthropology or consent of instructor.

ANT 737 Sociocultural theories in the anthropology of gender. (3)
Anthropological approaches to the study of gender have proliferated since the 1970s. The primary objective of this seminar is to provide participants with an overview of some of the salient "schools" that have emerged, and through comparison, critically to assess their limitations and utility for both theoretical and applied objectives. Prereq: Graduate standing in anthropology, or permission of instructor.

ANT 739 Seminar in regional archaeology. (3)
This course examines contemporary issues and theory in the archaeology of a particular region of the world. Students may take this course up to 9 credit hours under a different region each time course is offered. Prereq: Graduate/standing in Anthropology or permission of instructor.

ANT 742 Master's thesis research. (0-6)
Half-time to full-time work on thesis may be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ANT 746 dissertation research. (0-6)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ANT 750 Graduate field study in anthropology. (1-6)
Field research as part of a long-range anthropological research program for graduate interns training under direct faculty supervision. Provides student with experience conducting scientific research as research team member. Report required. Laboratory, three hours to full time. Prereq: Appropriate language fluency; preparatory area study plus consent of instructor.

ANT 760 practicum in applied anthropology. (1-6)
Practical field experience in which the student applies the theory and method of social anthropology to the solution of a problem defined by the student in consultation with a community or a public or private service agency. Required of all doctoral students in Applied Anthropology. Prereq: Consent of instructor.

ANT 765 advanced seminar in medical anthropology. (3)
(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as BSC 765.)

ANT 766 gender, ethnicity, and health. (3)
This course will bring the anthropology of gender to the study of medical anthropology. We will examine the interconnections between gender, ethnicity, and class in relation to the greater and lesser likelihood of disease. We will explore differences in health in relation to the resources available and the treatment modalities called upon by people in different social locations within the United States, and internationally. We will also look at the symbolic importance given to different phenomena related to the body, disease, and healing. This course will draw heavily upon the ethnographic literature to develop conceptual accounts of gender, ethnicity, class, and health. Prereq: Permission of instructor.

ANT 767 dissertation residency credit. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ANT 768 residence credit for master's degree. (1-6)
May be repeated to a maximum of 12 hours.
ANT 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

ANT 770 TOPICAL SEMINAR: (Subtitle required). (3)
Intensive work in particular fields of anthropology. May be repeated four times. Prereq: Graduate standing in Anthropology, or consent of instructor.

ANT 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)
This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approach issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as BSC 774.)

ANT 775 CULTURES AND POLITICS OF REPRODUCTION. (3)
This course takes a cross-cultural approach to understanding how reproduction and associated phenomena (family formations and the social use of technologies) comprise arenas where broader political debates become played out, and social relations become created and contested. Ethnographic case studies include cross-cultural constructions of the body, parenthood, and kinship relations; and we examine how the state, social movements, legal/medical experts, and lay persons struggle to appropriate reproductive potentials for their own needs. Prereq: Graduate standing in Anthropology or consent of instructor.

ANT 776 SEMINAR: INDEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as SOC/PSY/BSC 776.)

ANT 790 RESEARCH PROBLEMS IN ANTHROPOLOGY. (1-6)
Intensive study in the fields of physical anthropology, archaeology and ethnology with qualified staff members. May be repeated a maximum of nine credits. Prereq: Admission into the graduate program."

APP Appalachian Studies

APP 200 INTRODUCTION TO APPALACHIAN STUDIES. (3)
A multidisciplinary introduction to Appalachian culture, history and society. Examines how Appalachia came to be viewed as a distinct region; looks at its place in American life.

APP 300 TOPICS IN APPALACHIAN STUDIES (Subtitle required). (3)
Study of topics relevant to Appalachian Studies, such as gender, folklore, literature, religion, community development, public policy, social movements and social change. May be repeated to a maximum of twelve credits under different subtitles. Prereq: APP 200 or consent of instructor.

APP 395 INDEPENDENT STUDY. (1-6)
Independent study of special topics under the supervision of Appalachian Studies-affiliated faculty. Students must identify both a topic for this project as well as a faculty mentor who has agreed to supervise this project. May be repeated to a maximum of six credits. Prereq: APP 200.

APP 399 PRACTICUM. (1-6)
A field-, community-based, practical or applied educational experience supervised by an Appalachian Studies Program faculty affiliate. May be repeated to a maximum of six hours. Pass-fail only. A learning contract must be filed in order to receive credit for this course. Prereq: APP 200.

ARC Architecture

ARC 101 DRAWING I: OBSERVATIONAL FREEHAND DRAWING. (2)
Focuses on the rigs of observational drawing. Structure, space, contour, line, and color are explored through study of the human body, still life, landscape, and architectural spaces with attention to their application to the architectural experience. Studio: 4 hours per week. Prereq: Admission to the School of Architecture.

ARC 102 DRAWING II: OBSERVATIONAL FREEHAND DRAWING. (2)
A continued focus on the content of Drawing I with particular attention to basic notions of descriptive geometry. Students are introduced to three-dimensional perspective drawing, rendering in color, and shade and shadow. Studio: 4 hours per week. Prereq: ARC 101.

ARC 111 INTRODUCTION TO HISTORY AND THEORY. (3)
Introduces enduring themes and generative forces in the history and theory of architecture by examining the cultural periods of various societies in different historical periods.

ARC 120 INTRODUCTION TO THE HISTORY AND THEORY OF ARCHITECTURE. (3)
Introduces recurrent themes in the history and theory of architecture through an examination of seminal examples from different cultures in various historical periods and serves as an introduction to surveys of the history and theory of architecture. Prereq: Admission to College of Architecture or permission of dean.

ARC 121 HISTORY AND THEORY OF ARCHITECTURE I. (3)
The first of four courses in the survey of the history and theory of architecture in the West, with attention to the achievements in Mesopotamia and Egypt, the empires of the Greeks and Romans, and medieval Europe. Prereq: ARC 120.

ARC 151 DESIGN STUDIO I. (6)
Students investigate two-dimensional media, analyze buildings and text, and construct models as a means to explore basic environmental design principles. The studio continues with an emphasis on three-dimensional exploration and construction. Students investigate architectural design programs and materials of constructions. Studio: 12 hours per week. Prereq: Admission to the School of Architecture.

ARC 199 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 203 DIGITAL MEDIA WITHIN ARCHITECTURE. (3)
A workshop that introduces students to the creative, analytical and generative potential of computers in the design of architecture. Lecture: one hour; laboratory: four hours per week. Prereq: Admission to the School of Architecture.

ARC 212 HISTORY AND THEORY II: 15TH-17TH CENTURIES. (3)
An overview of the key themes and historical developments in architecture from the fifteenth through seventeenth centuries. Emphasis on Western examples and relationships with earlier and later conditions, including contemporary problematics.

ARC 213 HISTORY AND THEORY III: 18TH-19TH CENTURIES. (3)
Continues the investigation of key themes and historical developments of architecture in the eighteenth and nineteenth centuries. Prereq: ARC 212 or consent of instructor.

ARC 222 HISTORY AND THEORY OF ARCHITECTURE II. (3)
Introduces the architecture of the Renaissance and baroque architecture with emphasis on the seminal Italian contributions as a basis for the investigation of regional varieties elsewhere and the influence of the heritage on contemporary issues in design. Prereq: ARC 121.

ARC 223 HISTORY AND THEORY OF ARCHITECTURE III. (3)
Introduces the developments in architecture and theory in the Enlightenment, the nineteenth century, and the early twentieth century. Prereq: ARC 222.

ARC 231 STRUCTURAL AND MATERIAL CONCEPTS. (3)
Introduces technological concepts of building and investigates the spatial and formal language of architecture with visual and physical analyses of various building structures and materials through the use of computers, field observations, etc. Prereq: Admission to the School of Architecture; MA 109 or MA 123. Paired with: ARC 252.

ARC 252 DESIGN STUDIO II. (6)
Students gain understanding of architectural language based on modern archetypes. Projects explore aesthetic and poetic possibilities while also emphasizing cohesion among space, structure, site, program, and material assembly. A variety of assembly types are introduced for the examining of structural and materials concepts. Studio: 12 hours per week. Prereq: ARC 151 with a grade of C or better. Paired with course: ARC 231.

ARC 253 DESIGN STUDIO III. (6)
Extends the consideration of the issues related to the isolated object to the multiplication of that object with reference to issues of site and context, focusing attention on formal strategies for obtaining thematic unity. Studio: 12 hours per week. Prereq: ARC 252 with a grade of C or better.

ARC 299 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 314 HISTORY AND THEORY III: 20TH CENTURY AND CONTEMPORARY ARCHITECTURE. (3)
Investigates modern and late twentieth century architecture as well as current themes and issues in contemporary architecture in relation to their historical context. Satisfies graduate writing requirement for Architecture Majors. Prereq: ARC 111, ARC 212 and ARC 213; or consent of the instructor.

*ARC 315 WORLD ARCHITECTURE AND URBANISM. (3)
An investigation of the factors and a consideration of the theories which have affected world urban form related to architecture. Prereq: ARC 314, or consent of the instructor.
### Course Descriptions

**ARC 324 HISTORY AND THEORY OF ARCHITECTURE IV.**
(3)
Continues the investigations of the history and theory of architecture in the twentieth century. Prereq: ARC 223.

**ARC 325 THEORIES OF URBAN FORM.**
(3)
An investigation of the factors and a consideration of the theories which have affected urban form.

**ARC 332 ENVIRONMENTAL CONTROLS I.**
(3)
Design, analysis and coordination of building systems to meet basic human needs and social expectations of the built environment. Considers ecology when addressing the thermal environment, water, sanitation, concentrated energy, circulation, life-safety, and communication. Prereq: ARC 231. Paired with: ARC 354.

**ARC 333 ENVIRONMENTAL CONTROLS II.**
(3)
A continuing investigation into ideas and issues raised in ARC 332, Environmental Controls I. Prereq: ARC 332. Paired with: ARC 355.

**ARC 354 DESIGN STUDIO IV.**
(6)
Studies the formal characteristics of site and context together with laws and principles of building and nature, ecology, and the ways these forces influence architecture. The studio investigates applications of current technology and building systems. Studio: 12 hours per week. Prereq: ARC 253 with a grade of C or better. Paired with course: ARC 332.

**ARC 355 DESIGN STUDIO V.**
(6)
Explores the architectural problem of a large-scale interior space conditioned by social and cultural programs. Special problems in lighting and acoustics will be addressed along with long-span structure. Attention will be paid to issues of scale, life safety social interaction and public circulation. Studio: 12 hours per week. Prereq: ARC 354 with a grade of C or better. Paired with course: ARC 333.

**ARC 399 TOPICS IN ARCHITECTURE.**
(3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, may be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

**ARC 404 DRAWING III (Off Campus).**
(3)
An elective course offered in conjunction with a sponsored travel program requiring student observation of and interaction with the visited environment to be expressed formally through visual representation. The sponsors of each travel program tailor the course to suit the needs of the program as it relates to a particular locale. Studio: 6 hours per week. Prereq: ARC 102.

**ARC 405 DIGITAL VISUALIZATION.**
(3)
Students are introduced to concepts of computer visualization as applied to the study of architecture. Students will utilize modeling, rendering, and animation software to create three-dimensional representations of selected projects. Lecture: two hours; laboratory: two hours per week. Prereq: ARC 203.

**ARC 406 DIGITAL VISUALIZATION.**
(3)
A continued exploration of computer visualization with particular emphasis on a specific software. Subtitle required. Lecture: 1 hour; laboratory: four hours per week. Prereq: ARC 405.

**ARC 410 INDEPENDENT STUDY.**
(3)
An independent study of architecture history and/or theory, wherein a student will research a specific topic agreed upon with a designated faculty member of the college. Laboratory, six hours per week. May be repeated to a maximum of six hours.

**ARC 424 STRUCTURAL DESIGN AND ANALYSIS.**
(3)

**ARC 435 MATERIALS AND METHODS OF CONSTRUCTION.**
(3)
An intensive exploration of materials and building techniques with special consideration given to the properties of materials and their uses in various methods of construction. Prereq: ARC 231.

**ARC 456 DESIGN STUDIO VI.**
(6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 355 with a grade of C or better.

**ARC 457 DESIGN STUDIO VII.**
(6)
This studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 455 or ARC 456 with a grade of C or better.

**ARC 461 TRAVEL SEMINAR: URBAN CONTEXT (Off Campus).**
(3)
An elective seminar offered in conjunction with a sponsored travel program, which investigates factors and considers theories of urban form in the context of the locale in question. Lecture: two hours; laboratory: two hours per week. Prereq: ARC 315.

**ARC 499 TOPICS IN ARCHITECTURE.**
(3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

**ARC 510 GENERATIVE AND CRITICAL STRATEGIES.**
(3)
This course explores, studies, and tests various visual and analytical tools used by designers to understand their work in order to understand the relationship of form, content, and performance of a design. Students will use these tools to gain an understanding of buildings, spaces, objects, contexts, and landscapes from a wide range of cultures and time periods. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

**ARC 511 HISTORY AND THEORY SEMINAR: PRE-20TH CENTURY (Subtitle required).**
(3)
One of a series of graduate seminars devoted to investigations and analyses of pre-twentieth century architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

**ARC 512 HISTORY AND THEORY SEMINAR: MODERN (Subtitle required).**
(3)
One of a series of graduate seminars devoted to investigations and analyses of modern architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

**ARC 513 HISTORY AND THEORY SEMINAR: CONTEMPORARY (Subtitle required).**
(3)
One of a series of graduate seminars devoted to investigations and analyses of contemporary architecture. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

**ARC 514 HISTORY AND THEORY SEMINAR: THEORY AND CRITICISM (Subtitle required).**
(3)
One of a series of graduate seminars devoted to investigations and analyses of architectural theory and criticism. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

**ARC 515 HISTORY AND THEORY SEMINAR: URBAN FORMS (Subtitle required).**
(3)
One of a series of graduate seminars devoted to investigations and analyses of urban forms. Subtitle required. May be repeated to a total of 6 credit hours under different subtitles. Prereq: Junior or Senior standing with six credit hours of architecture history or art history at the 200 level or above, graduate standing, or consent of instructor.

**ARC 533 STRUCTURAL DESIGN AND ANALYSIS.**
(3)
An exploration of structural concepts for the materials of steel and wood, including considerations of load and resistance as factors in architectural design. Prereq: ARC 434.

**ARC 534 ADVANCED STUDIES IN STRUCTURAL SYSTEMS.**
(3)
An exploration of structural concepts relating to construction with the materials concrete and masonry, including discussion of stress and load as considerations in architectural design. Prereq: ARC 533.

**ARC 550 ACCELERATED DESIGN I.**
(9)
Accelerated Design I: immersion through design in the comprehensive elements that order architecture with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

**ARC 551 ACCELERATED DESIGN II.**
(9)
Accelerated Design II: an immersion in the art and science of architectural design with emphasis on integrative strategies. Prereq: Admission to the UK School of Architecture Graduate 3+ track.

**ARC 584 DESIGN OF TIMBER AND MASONRY STRUCTURES.**
(3)
Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as CE 584.)

**ARC 599 TOPICS IN ARCHITECTURE.**
(3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

**ARC 631 BUILDING SYSTEMS INTEGRATION.**
(3)
Graduate level study of the art and science of building design with emphasis given to integrative strategies for developing a comprehensive, multi-systemic, architectural project. Paired with: ARC 750.
University of Kentucky

2013-2014 Undergraduate Bulletin

Course Descriptions

ARC 632 SPECIAL TOPICS IN ENVIRONMENTAL CONTROLS. (3)
Advanced studies in human environmental design. Topics for research and development will include sustainability, energy, infrastructure, sanitation and water, lighting, and acoustics. Subtitle required. Prereq: ARC 332 and ARC 333.

ARC 634 ARCHITECTURAL DETAILING. (3)
A study of the art and technique of complete building design through detail development. Prereq: Completion of all technical requirements for B.A. in Architecture or equivalent and admission to the Master of Architecture program.

ARC 641 PROFESSIONAL PRACTICE. (3)
An exploration of professional and ethical responsibilities of the architect as they pertain to the procedural matters of practice and management. Prereq: Admission to the M. Arch. program.

ARC 642 PROFESSIONAL INTERNSHIP. (3)
A graduate-level summer internship with a professional architectural firm in which the student, along with a faculty advisor, will determine specific experiential and educational goals to be met. Laboratory: hours to be agreed upon with selected firm (apx. 10-15 hrs/wk for duration of internship). Prereq: Admission to the M. Arch. program.

ARC 658 DESIGN STUDIO VIII. (6)
This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 457 with a grade of C or better.

ARC 659 DESIGN STUDIO IX. (6)
This graduate level studio explores various design topics including building technology, furniture design, digital visualization, historic preservation, and human settlement. Studio: 12 hours per week. Prereq: ARC 658 with a grade of C or better.

ARC 699 TOPICS IN ARCHITECTURE. (3)
This course number is to allow for new and experimental classes to be introduced into the architectural curriculum on an ad hoc basis. The course, if adopted on a permanent basis, will be formally proposed for addition to the College curriculum and assigned a new, permanent number. May be repeated to a maximum of six credits under different subtitles. Prereq: TBA.

ARC 707 DIGITAL MEDIA: HISTORY AND THEORY. (3)
A graduate level seminar exploring the impact of digital media on visualization and the theoretical implications arising from its use as a means of visual expression. Laboratory: 6 hours per week. Prereq: ARC 406.

ARC 709 MASTER’S PROJECT IN DIGITAL VISUALIZATION. (9)
A final, comprehensive project in the digital visualization concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Digital Visualization concentration.

ARC 719 MASTER’S PROJECT IN HISTORY/THEORY/CRITICISM. (9)
A final, comprehensive project in the history, theory, and criticism concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the History, Theory and Criticism concentration.

ARC 729 MASTER’S PROJECT IN HISTORIC PRESERVATION. (9)
A final, comprehensive project in the historic preservation concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Historic Preservation concentration.

ARC 735 PROJECT DELIVERY. (3)
A study in the execution of an architectural design including contract documents, cost estimation, and construction management. Prereq: Completion of all technical requirements for B.A in Architecture or equivalent and admission to the Master of Architecture program.

ARC 736 BUILDING CODES AND DESIGN. (3)
An analysis of content and format of current model building codes combined with discussion of the necessity for building codes, problems in interpretation and applications as well as legal aspects involved. Prereq: Completion of all technical requirements for B.A in Architecture or equivalent and admission to the Master of Architecture program.

ARC 738 CONSTRUCTION SPECIFICATIONS. (3)
A study in defining the quality of materials used in architectural design. Prereq: Admission to the Master of Architecture program.

ARC 743 ADVANCED PROFESSIONAL PRACTICE. (3)
A continuation of concepts introduced in ARC 641, Professional Practice, with an emphasis in issues relating to the legal, business, and organizational considerations of architectural practice as well as investigations into advocacy and the public and private leadership roles of the architect. Prereq: ARC 641.

ARC 748 MASTER’S PROJECT RESEARCH. (0)
Half-time to full-time work on Master’s Project. May be repeated a maximum of six times. Prereq: All course work toward the degree must be completed.

ARC 750 DESIGN STUDIO X. (6)
Utilizing given site and program requirements, graduate students explore design issues comprehensively by producing developed and detailed building design. Students will engage in structural design, environmental systems, life-safety and post-design assessments as required to meet the most current NAAB standards for a comprehensive studio. Studio: 12 hours per week. Prereq: ARC 659.

ARC 759 MASTER’S PROJECT IN BUILDING DESIGN. (9)
A final, comprehensive project in the building technology and tectonics concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Building Design concentration.

ARC 761 SPECIAL PROBLEMS IN TOWN DESIGN. (3)
Students explore various topics related to the theory and practice of existing, emerging and new strategies for city and town development, revitalization, and long-term sustainability. Subtitle required. Prereq: Admission to the Master of Architecture program.

ARC 779 MASTER’S PROJECT IN TOWN DESIGN. (9)
A final, comprehensive project in the town design concentration, which synthesizes conceptual and experiential knowledge into a cohesive presentation. Studio: 18 hours per week. Prereq: ARC 750 and all requisite courses for the Town Design concentration.

ARC 799 TOPICS IN ARCHITECTURE. (3)
A series of seminars devoted to investigations of theories of architecture. Prereq: ARC 324.

ARC 820 STUDIES IN HISTORY AND THEORY OF ARCHITECTURE I: THEORIES. (3)
A series of seminars devoted to investigations of topics in urban forms. Prereq: ARC 325.

ARC 822 STUDIES IN HISTORY AND THEORY OF ARCHITECTURE II: URBAN FORM. (3)
A series of seminars devoted to investigations of the means by which architecture is made. Prereq: ARC 324.

ARC 825 DRAWING STUDIO I. (1)
Focuses on the rigor of observational drawing. Structure, contour, line, and color are explored through study of the human body with attention to their application to the architectural experience. Studio, three hours per week. Prereq: Admission to the College.

ARC 826 DRAWING STUDIO II. (1)
A continuation of Drawing Studio I with further development of the themes of two-dimensional representation integral to the architectural experience. Studio, three hours per week. Prereq: ARC 825.

ARC 827 RE-PRESENTATION. (2)
A review of the 20th century tectonic themes through readings and visual analyses and an interpretation and re-presentation of these themes looking toward new idiomatic expressions. Prereq: ARC 860.

ARC 828 COMPUTERS AND ARCHITECTURE. (3)
Introduces computers with an emphasis on the exploration of their applications in architecture. Students will be exposed to the creative potential of computers in design as well as to their analytic capabilities. Lecture, two hours; laboratory, three hours per week. Prereq: Restricted to Architecture and/or Landscape Architecture students only.

ARC 829 MATERIALS AND METHODS OF CONSTRUCTION. (3)
Introduces the art and techniques of building, with attention to their influence on the formal language of architecture. Considerations of the properties of materials and methods of construction through analyses of selected works, lectures, and tours of construction sites.

ARC 830 STRUCTURAL DESIGN AND ANALYSIS I. (3)
Conception of building forms and behaviors as total structural systems and major subsystems. The use of mathematics and physics to determine forces, stresses, and deformations in structural systems. Prereq: MA 109 or 123, MA 112 and PHY 201 or their equivalents.

ARC 831 STRUCTURAL DESIGN AND ANALYSIS II. (3)
A continuation of ARC 830 with an introduction to computer-aided analysis. Prereq: ARC 828 and ARC 830.

ARC 832 STRUCTURAL DESIGN AND ANALYSIS III. (3)
Design of steel structures and timber structures. Prereq: ARC 831.

ARC 833 STRUCTURAL DESIGN AND ANALYSIS IV. (3)
Design of reinforced concrete structures, masonry structures, and foundations. Prereq: ARC 832 or consent of instructor.

ARC 834 ENVIRONMENTAL CONTROLS I. (3)
Introduces concepts of the luminous, thermal, and acoustical environment and the mechanical and electrical systems of buildings. Prereq: PHY 203.
Course Descriptions

ARC 835 ENVIRONMENTAL CONTROL III. (3)
A continuation of ARC 834. Prereq: ARC 834.

ARC 836 BUILDING SYSTEMS INTEGRATION. (3)
A continuation of ARC 829, with an emphasis on the integration of materials, structural systems, and environmental controls. Detailed investigations of the interpretation and employment of materials and systems of construction, with attention to the manner in which they order architecture. Prereq: ARC 829 and ARC 835; coreq: ARC 833.

ARC 850 PROFESSIONAL PRACTICE. (3)
Professional and ethical responsibility to profession and community; procedural matters pertaining to practice and management.

ARC 860 TECHNICS AND KINEMATICS I. (2)
Full-scale, three-dimensional construction, investigations of two-dimensional expression, analysis of texts, and writing as the means to explore theoretical constructs. Lecture, one hour; studio, two hours per week. Prereq: Admission to the College.

ARC 861 BASIC ARCHITECTURAL DESIGN I. (4)
Exploration of varieties of architectural experiences through tectonics and individual experimentation. Studio, eight hours per week. Prereq: Admission to College of Architecture.

ARC 862 BASIC ARCHITECTURAL DESIGN II. (4)
A continuation of Basic Architectural Design I with further exploration of tectonics and experimentation as vehicles for the creation of architectural experiences. Studio, eight hours per week. Prereq: ARC 861 with at least a grade of C.

ARC 863 ARCHITECTURAL DESIGN STUDIO I: MODERN SPACE. (6)
Offers the student an understanding of architectural language based on the new hypotheses about space proposed by Cubism and Neoplasticism. Projects explore their aesthetic and poetic possibilities, with an emphasis on coherence in space, structure, and program. Studio, twelve hours per week. Prereq: ARC 862 with at least a grade of C.

ARC 864 ARCHITECTURAL DESIGN STUDIO II: SINGLE AND MULTIPLE OBJECTS. (6)
Extends the consideration of the issues related to the isolated object to that object upon its multiplication, introduces the issues of site and context, and focuses attention on strategies to obtain thematic unity in a manner that enables the student to develop an architectural language. Studio, twelve hours per week. Prereq: ARC 863 with at least a grade of C.

ARC 865 ARCHITECTURAL DESIGN STUDIO III: CONTEXT. (6)
Emphasizes the problems of site and context and the way they influence the specificity of the object as well as the programmatic strategies. Studio, 12 hours per week. Prereq: ARC 864 with at least a grade of C.

ARC 866 ARCHITECTURAL DESIGN STUDIO IV: TRANSFORMATION AT THE LARGE SCALE. (6)
Explores the relationship between one type of unit and another, between a type of unit and a series, between the aggregation of a series and the structural integrity and unity of a building, and between a building’s image, scale, and context. Studio, 12 hours per week. Prereq: ARC 865 with at least a grade of C.

ARC 867 ARCHITECTURAL DESIGN STUDIO V: COMPLEX PROGRAM IN COMPLEX CONTEXT. (6)
Explores the dialogue between a functional requirement of a complex program and its context through a consideration of the program and the constraints of the site and a detailed development of a portion of the project. Studio, twelve hours per week. Prereq: ARC 866 with at least a grade of C.

ARC 868 ARCHITECTURAL DESIGN STUDIO VI: A PIECE OF THE CITY. (6)
Confronts the problem of the design of public space in the urban and/or suburban fabric of the city and explores the transformation of a fragment of the city through a socially responsive project. Studio, twelve hours per week. Prereq: ARC 867 with at least a grade of C.

ARC 869 ARCHITECTURAL DESIGN STUDIO VII: READING THE OBJECT. (6)
Presents the theme of an object with restrained scale in order to permit the evaluation and refinement of the knowledge, methods of design, and skill at the student’s disposal. Studio, twelve hours per week. Prereq: ARC 868 with at least a grade of C.

ARC 870 ARCHITECTURAL DESIGN STUDIO VIII: RECAPITULATION. (6)
A continuation of the evaluation and refinement of knowledge, methods of design, and skills, which was begun in ARC 869 with the opportunity for independent investigation. Studio, twelve hours per week. Prereq: ARC 869 with at least a grade of C.

ARC 899 THESIS RESEARCH. (3)
Supervised investigation which is intended to identify the salient issues which will be addressed in the thesis and to provide a rationale for the student’s approach to these issues. Prereq: ARC 868 with at least a grade of C and approval of the faculty advisor for the thesis.

ARC 901 ARCHITECTURAL DESIGN THESIS. (6)
Supervised individual exploration of an architectural problem which permits the student to demonstrate his competence as a designer of buildings and to formalize a coherent personal view of architecture. Studio, twelve hours per week. Prereq: ARC 869 and ARC 899 with at least grades of C.

ARC 912 INDEPENDENT STUDY. (3)
Supervised, independent investigations of selected topics in architecture. May be repeated to a maximum of nine credits when topics differ sufficiently. Prereq: Written consent of instructor.

ARC 963 SELECTED TOPICS IN ARCHITECTURE (Subtitle required). (3)
Seminars and workshops for investigations of selected topics in architecture. May be repeated to a maximum of nine credits when topics differ sufficiently. Prereq: Consent of instructor.

ART Art

ART 100 INTRODUCTION TO ART. (3)
This course is open to all University students interested in an understanding and appreciation of the visual arts. The formal and expressive qualities of major art forms are examined through lectures and presentations.

ART 191 ART PROFESSIONS. (1)
Lectures and discussions on the various art professions as they affect the student, the professional artist, the art historian, the art educator, and the community. May be repeated to a maximum of eight hours.

ART 291 B.F.A. STUDIO PRACTICUM. (1)
The study and practice of professional techniques of the organization and maintenance of the art studio environment. Orientation and application of best practices for health and safety. Prereq: Acceptance into B.F.A. program and consent of instructor.

ART 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ART 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ASC Animal Sciences

ASC 101 DOMESTIC ANIMAL BIOLOGY. (3)
The first in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on a fundamental understanding of anatomy, physiology, nutrition, reproduction, genetic and behavior of domestic animals.

ASC 102 APPLICATIONS OF ANIMAL SCIENCE. (3)
The second in a sequence of two courses providing an introduction to the subject of animal science. Emphasis is placed on the application of scientific disciplines of anatomy, physiology, nutrition, reproduction, genetics and behavior in the management of domestic animals. Prereq: ASC 101.

ASC 106 ANIMAL AGRICULTURE IN THE MODERN WORLD. (3)
Relationships of food production and consumption to income of humans throughout the world; major livestock (beef and dairy cattle, sheep, swine, poultry and horses); production areas of the world; relationships between live animal merit and yield of retail cuts of meat; identification of skeletal components; identification and functions of reproductive and digestive tract components; characteristics of breeds of beef and dairy cattle, sheep, swine, poultry and horses.

ASC 205 LIVESTOCK, PEOPLE AND THEIR INTERACTIONS. (1)
Local experts in a wide variety of animal production enterprises and associated support services will present lectures and discussions on a variety of topics. Prereq: ASC 102 (or concurrent enrollment).

ASC 300 MEAT SCIENCE. (4)
A historical perspective of the meat industry together with major changes in body type and composition in both the live animal and its end product meat. Students will evaluate live market animals (swine, cattle, sheep), harvest the market animals, and follow their carcasses and cuts through fabrication and distribution channels. Major topics of discussion will focus on growth and development, inspection, grading, physical and chemical composition of meat and postmortem changes that affect meat quality. Additional information will cover meat marketing trends, nutrition, meat cookery, meat selection, health issues and consumer information. Prereq: ASC 101 and ASC 102.

ASC 301 LIVESTOCK SELECTION AND EVALUATION. (3)

ASC 303 EVALUATION AND GRADING OF MEATS. (2)
A detailed consideration of the factors involved in the selection, grading and evaluation of carcasses and wholesale cuts of beef, pork and lamb. Specific emphasis will be given to cutability, quality and maturity as they relate to palatability and acceptance by the consumer. Laboratory, four hours. Prereq: FSC 304 or FSC 306.
ASC 309 ADVANCED EVALUATION AND GRADING OF MEAT. (2) Further consideration of the factors involved in selecting, grading and evaluating carcasses and wholesale cuts of beef, pork, and lamb. Emphasis will be placed on writing reasons. Laboratory, four hours. Prereq: ASC 303 or consent of instructor.

ASC 310 EQUINE ANATOMY. (2) Anatomy of the horse’s systems. Topics will include the anatomy of skeletal, muscular, respiratory, digestive, cardiovascular, and nervous systems. By the end of the course the student will be able to name and label all of the equine bones and their respective anatomical landmarks, know the equine muscles and tendons responsible for locomotion and their respective skeletal attachments, and describe the anatomy and recognize the function of the equine respiratory, cardiovascular, digestive, and nervous systems. Prereq: ASC 101.

ASC 311 ADVANCED EQUINE EVALUATION. (1) Advanced study of conformation and performance in the horse. Selection of horses of different breeds based on confirmation, breed character and movement. Emphasis will be placed on developing a knowledge of industry standards and preparation of oral reasons. Prereq: ASC 310.

ASC 312 ADVANCED LIVESTOCK SELECTION AND EVALUATION. (2) Selection of purebred and commercial beef cattle, sheep, swine and horses. Special emphasis on oral reasons, livestock contest procedures and herd improvement principles. Laboratory, six hours. Prereq: ASC 301 or consent of instructor.

ASC 320 EQUINE MANAGEMENT. (3) Study of the basic principles associated with horse management. Topics will include equine behavior, equine diseases and herd health programs, facilities and environmental management, nutrition and feed management. Lecture, two hours; laboratory, three hours per week. Prereq: ASC 101.

ASC 321 DAIRY CATTLE EVALUATION. (2) Evaluation of dairy cattle for type characteristics. Laboratory, four hours.

ASC 323 ADVANCED DAIRY CATTLE EVALUATION. (1) Open only to those who have consent of instructor. Laboratory, two hours. Prereq: ASC 321.

ASC 325 ANIMAL PHYSIOLOGY. (3) An introduction to the functional anatomy and physiology of major body systems in domestic animals. Emphasis will be on how these systems interact to regular circulation, gas exchange, acid-base balance, digestion and metabolism, location and adapting to environmental changes. Prereq: BIO 152, junior standing or consent of instructor.

ASC 340 POULTRY PRODUCTION. (2) A study of the application of avian biology to modern poultry production. Topics include anatomy, physiology, reproduction, incubation and embryonic development, breeding and genetics, nutrition and feeding, disease control, housing and environmental control, management, poultry and egg products, and the structure of the poultry industry. For majors and non-majors. Prereq: ASC 101 or ASC 102 or equivalent or permission of the instructor.

ASC 362 ANIMAL GENETICS. (4) Study of genetics as applied to specific companion animals and livestock species. Roles of selection and mating systems and their expected consequences are examined when applied to qualitative and quantitative traits expressed by specific companion animals and various livestock species. Prereq: ASC 101, BIO 152.

ASC 364 REPRODUCTIVE PHYSIOLOGY OF FARM ANIMALS. (4) Introduction to anatomy and physiological processes related to reproduction with a focus on farm animals. Evaluations of management procedures as they related to reproductive physiology. Prereq: ASC 101 or BIO 152.

ASC 378 ANIMAL NUTRITION AND FEEDING. (4) A fundamental study of the nutrients, their utilization and their role in the animal in conjunction with an understood understanding of the manner in which feedstuffs are evaluated and blended to meet the various species needs for those nutrients. Prereq: ASC 101 and CHE 230 or CHE 236.

ASC 380 FEEDS AND FEEDING. (3) The composition and nutritional characteristics of common feedstuffs. The digestive systems, nutritional requirements, formulated rations and economical feeding programs for farm animals. Prereq: ASC 101, BIO 152, CHE 105, MA 109 or equivalent, or consent of instructor.

ASC 382 ANIMAL PRODUCTION PRINCIPLES. (3) A broad survey of animal agricultural management covering cattle, horses, poultry, swine, sheep and goats. Emphasis is placed on the practical application of scientific disciplines including anatomy, physiology, nutrition, reproduction and genetics. For non-majors only.

ASC 388 COMPANION ANIMAL NUTRITION. (3) This course offers an introductory look at the nutrition of companion animals, primarily the dog and cat. Basic concepts in nutrition, food chemistry, biochemistry, digestive physiology and microbiology will be addressed as they pertain to pet health and well being. Prereq: CHE 107 or equivalent.

ASC 389 APPLIED EQUINE NUTRITION AND FEEDING. (2) This course examines the feeding management of broodmares, growing horses, performance horses and horses with special needs. Lecture material covers common equine feeds, feed ration analysis, factors influencing the utilization of feeds by horses, and factors affecting nutrient requirements and feeding management of the different classes of horses. Prereq: A course in nutrition or consent of instructor.

ASC 395 SPECIAL PROBLEM IN ANIMAL SCIENCES. (1-4) Independent study in Animal Sciences under the supervision of a faculty member. May be repeated to a maximum of eight credits. Prereq: Consent of appropriate instructor.

ASC 399 EXPERIMENTAL LEARNING IN ANIMAL SCIENCES. (1-6) A field-based learning experience in animal sciences under the supervision of a faculty member. May be repeated to a maximum of six credits on a pass/fail basis. Prereq: Consent of instructor and department chairperson and completion of a departmental learning contract before registration.

ASC 404G SHEEP SCIENCE. (4) History and importance of the sheep industry; application of the principles of selection, breeding, feeding and management of sheep for efficient lamb and wool production. Lecture, three hours per week; laboratory, three hours per week. Prereq: ASC 300, ASC 362, ASC 364, ASC 378 or consent of instructor.

ASC 406B BEEF CATTLE SCIENCE. (4) Scope and importance of the beef cattle industry; roles of the major cattle breeds and organizations associated with the beef cattle industry; application of equipment, identification, nutrition, reproduction, genetics, marketing, fixation and management principles to beef cattle production; impact of current economic, social and environmental issues on the beef cattle industry. Lecture, three hours; laboratory, three hours. Prereq: ASC 300, ASC 362, ASC 364 and ASC 378 or consent of instructor.

ASC 408G SWINE PRODUCTION. (2) A study of scope and importance of the swine industry. Application of principles of breeding, reproduction, nutrition, housing, health, and management of swine in modern production systems. Prereq: ASC 101, 102, 378.

ASC 410G EQUINE SCIENCE. (3) Detailed study of the anatomy and physiology of the horse as they relate to the nutrition, reproduction, athletic ability, soundness and control of diseases and parasites. Lecture, two hours; laboratory, two hours. Prereq: Junior standing, ASC 320 or instructor consent.

ASC 420G DAIRY CATTLE SCIENCE. (3) Scope and importance of the dairy cattle industry; selection, breeding, housing, feeding and management of dairy cattle. Lecture, two hours; laboratory, two hours. Prereq: ASC 362, ASC 364 and ASC 378 or consent of instructor.

ASC 470G CAPSTONE FOR ANIMAL AGRICULTURE. (3) Discussion of the importance of livestock production to society and consideration of major issues impacting animal agriculture. Principles and practices learned in disciplinary and commodity Animal Sciences courses are integrated into a unified perspective, and the scientific method is employed as an approach to problem analysis and resolution. Refinement of skills in critical thinking, information gathering, writing, and oral communication is emphasized. Prereq: Senior standing in College of Agriculture, Animal Sciences major.

ASC 564 MILK SECRETION. (3) Anatomy of the mammary gland, physiology and biochemistry of milk secretion and management factors affecting yield and composition of milk. Prereq: ASC 101 and BIO 152.

ASC 601 MAMMALIAN ENDOCRINOLOGY. (3) An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on hormone endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 401G and BIO 350 or equivalents. (Same as PGY 601.)

ASC 602 INTEGRATED NUTRITIONAL SCIENCES II. (2) Integrated study of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as CNU/NS 602.)

ASC 630 ADVANCED MEAT SCIENCE. (4) Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as FSC 630.)

ASC 660 BIOLOGY OF REPRODUCTION. (3) Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanism of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as PGY 660 and ANA 660.)
ASC 680 LABORATORY METHODS IN NUTRITIONAL SCIENCES. (4)
The use of laboratory techniques and instrumentation in the solution of fundamental problems of nutrition. Lecture, one hour; laboratory, six hours.

ASC 681 ENERGETIC METABOLISM. (2)
An in-depth discussion of energetic efficiencies, from the standpoint of factors which influence the utilization of dietary energy. A critical review of current literature. Prereq: ASC 378 or equivalent, BCH 502 or equivalent or consent of instructor.

ASC 682 MICROBIAL ECOLOGY OF DIGESTION. (4)
Principles of microbiology as they relate to nutrition and digestion in ruminant and nonruminant animals. Procedures for cultivation, isolation and characterization of anaerobic bacteria from the gastrointestinal tract. Methods for measuring and evaluating microbial growth and activity in the gastrointestinal tract. Lecture, two hours; laboratory, four hours. Prereq: BIO 476G or equivalent and consent of instructor.

ASC 683 PROTEIN METABOLISM. (2)
A study of the principles and present concepts of protein and amino acid nutrition and metabolism in the animal. Prereq: Graduate level biochemistry.

ASC 684 ADVANCED RUMINANT NUTRITION. (3)
Principles of nutrient metabolism in the utilization of feedstuffs for meat, milk, and wool production. Prereq: ASC 682 and two or more courses from ASC 681, ASC 683, ASC 685 and ASC 687 or consent of instructor.

ASC 685 MINERAL METABOLISM. (2)
An in-depth review of the function, requirement deficiency and toxicity of mineral elements in nutrition. Emphasis on the interactions between elements and current literature will be made. Prereq: ASC 378 or NFS 310 or equivalent, BCH 502 or equivalent or consent of instructor.

ASC 686 ADVANCED NONRUMINANT NUTRITION. (3)
A study of nutrient utilization as influenced by digestion, absorption and metabolism with emphasis on swine and poultry. Prereq: One course each in nutrition and biochemistry.

ASC 687 VITAMIN METABOLISM. (2)
Detailed study of the metabolism of vitamins and the role of vitamins in the metabolism of carbohydrates, proteins, lipids, and minerals. Prereq: BCH 502 or CHE 552 or consent of instructor.

ASC 688 EQUINE NUTRITION. (2)
Detailed study of anatomical, physiological and microbiological factors influencing the nutritive requirements of the equine for maintenance, growth, reproduction, lactation and work. Prereq: One course in nutrition and physiology or biochemistry or consent of instructor.

ASC 689 PHYSIOLOGY OF NUTRIENT DIGESTION AND ABSORPTION. (3)
An analysis and comparison of the structure and function of mammalian and avian gastrointestinal tracts, of feedstuff digestive processes, and of specific mechanisms responsible for nutrient absorption in various cell types. Emphasis is placed on livestock and avian species. Prereq: Graduate level Biochemistry.

ASC 7484 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ASC 7490 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ASC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ASC 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ASC 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

ASC 771 ANIMAL SCIENCE SEMINAR. (1)
May be repeated twice for a maximum of three credits.

ASC 780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)
May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 780.)

ASC 781 SPECIAL PROBLEMS IN GENETICS AND ANIMAL BREEDING. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser.

ASC 782 SPECIAL PROBLEMS IN ANIMAL NUTRITION. (1-4)
May be repeated to a maximum of nine credits. Prereq: Consent of graduate adviser.

ASC 783 SPECIAL PROBLEMS IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-4)
Intensive study or investigation of topics in physiology not covered in formalized courses. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser.

ASC 790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser. (Same as FSC 790.)

ASC 791 RESEARCH IN GENETICS AND ANIMAL BREEDING. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser.

ASC 792 RESEARCH IN ANIMAL NUTRITION. (1-6)
Problems involving original investigation. May be repeated for a maximum of nine credits. Prereq: Consent of graduate adviser.

ASC 793 RESEARCH IN REPRODUCTIVE PHYSIOLOGY (Subtitle required). (1-6)
Original investigation of mechanisms and problems related to the processes of mammalian reproduction. May be repeated under different subtitle to a maximum of nine credits. Prereq: Consent of graduate adviser.

AST 191 THE SOLAR SYSTEM. (3)
A course emphasizing the nature, origin and evolution of planets, satellites and other objects in the Solar System. Topics include historical astronomy, the naked eye phenomena of the sky and modern solar system discoveries made by spacecraft. This course may be taken independently of AST 192.

AST 192 STARS, GALAXIES AND THE UNIVERSE. (3)
A course covering the universe outside the Solar System. A principle theme is the origin and evolution of stars, galaxies and the universe at large. Topics also include black holes, quasars and the big bang model of the universe. This course may be taken independently of AST 191.

AST 310 TOPICS IN ASTRONOMY AND ASTROPHYSICS (Subtitle required). (3)
Readings, research, discussions and lectures to illuminate problems of contemporary significance in astronomy and astrophysics. May be repeated to a maximum of six credits under a different subtitle. Prereq: To be announced with subtitle.

AST 395 INDEPENDENT WORK IN ASTRONOMY. (1-3)
Students may select an approved topic for study under the direction of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.

AST 591 ASTROPHYSICS I--STARS. (3)
The physics of stars from star formation to stellar death. Topics include stellar structure and evolution, energy generation and transport, the later stages of stellar evolution and stellar remnants. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 591.)

AST 592 ASTROPHYSICS II--GALAXIES AND INTERSTELLAR MATERIAL. (3)
The physics of galaxies and of the interstellar medium. Topics include galaxy formation, evolution and interaction, phases of the interstellar medium, and physical processes in the interstellar medium. Prereq: PHY 361, PHY 416G, PHY 417G or consent of instructor. (Same as PHY 592.)

AST 639 PHYSICAL PROCESSES IN ASTROPHYSICS. (3)
A lecture and problem course covering the physical processes encountered in astrophysics. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 592 or consent of instructor. (Same as PHY 639.)

AT 1000 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3)
Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describe the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as HS 500, CLS 500, CNU 500, CD 500, PAS 500.)
AT 660 DIRECTED STUDY IN ATHLETIC TRAINING. (1-3)
A specific topic in Athletic Training related to the student’s interests is selected for intensive study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Graduate standing and consent of instructor.

AT 670 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING I. (2)
An introduction to the research process in athletic training. The importance of pursuing quality research in athletic training will be stressed and the procedures necessary to complete this process will be presented. May be repeated to a maximum of 8 credits. Prereq: Graduate standing and consent of the instructor.

AT 671 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING II. (2)
The second course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 672 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING III. (2)
The third course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will address the design of research and synthesis of data in athletic training. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing and consent of instructor.

AT 673 SCIENTIFIC INQUIRY IN ATHLETIC TRAINING IV. (2)
The final course of a four part series that will develop skills and a knowledge base that will aid the student while conducting and critically reviewing research in athletic training. Course work will focus on developing the skills needed to critically synthesize material with accepted practice, and prepare professional presentations using acquired data and an appropriate statistical analysis. The importance of pursuing quality research will be stressed and the procedures necessary to complete this process will be presented. Prereq: Graduate standing, and consent of instructor.

AT 680 SPECIAL TOPICS IN ATHLETIC TRAINING. (Subtitle required). (1-3)
Study of emerging topics of current high interest in athletic training. May be repeated to a maximum of 9 credits. Prereq: Graduate standing and consent of instructor.

AT 682 CLINICAL SEMINAR IN ATHLETIC TRAINING. (1)
This is an advanced athletic training course encompassing a wide range of topics related to all domains of the athletic training profession. The primary focus of this course will be on the presentation of case studies for group discussion and contribution. This course will utilize a combination of discussion, review, and student presentation.

AT 685 PRINCIPLES AND APPLICATION OF KINESIOLOGICAL EMG. (3)
To introduce the student to the principles and application of kinesiologic electromyography (EMG).Kinesiologic EMG research incorporates the study of human movement with direct assessment of the muscles involved with human motion. The primary aim for this course is to provide the student with background and practical knowledge of kinesiologic EMG in order to be able to better understand and analyze kinesiologic EMG studies. Students will enhance their understanding of neuromuscular properties of skeletal musculature. Students will be exposed to the common procedures used to collect, analyze, and interpret both surface and indwelling kinesiologic EMG research. Prereq: KHP 615 or comparable grade level biomechanics course, the course can be taken concurrently. Approval of instructor.

AT 690 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE UPPER EXTREMITY. (4)
Current evaluation and rehabilitation of upper extremity and upper spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory techniques will be used to review current practice and interventions. Prereq: Graduate standing and consent of instructor.

AT 692 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE SPINE. (4)
This is an advanced athletic training course encompassing a regional study of orthopedic evaluation and management of cervical, thoracic, and lumbar spine. A combination of applied evaluation and rehabilitation techniques, critical reviews of the literature, discussion, and student presentations will be employed. Prereq: Graduate standing and consent of instructor.

AT 695 ORTHOPAEDIC EVALUATION AND REHABILITATION OF THE LOWER EXTREMITY. (4)
Current evaluation and rehabilitation of lower extremity and lumbar spine injuries that commonly occur in athletic, recreational or occupational activities. A combination of lecture, laboratory and student presentation and written reviews of current practice and interventions will be employed. Prereq: Graduate standing and consent of instructor.

AT 700 MUSCLE MECHANICS. (3)
This is an advanced athletic training course encompassing a wide range of topics related to all aspects of skeletal muscle form and function. The primary focus of this course will be on the mechanical properties of skeletal muscle, and translational aspects of basic science research and clinical care.

AT 720 SPORTS MEDICINE. (3)
A study of the basic areas covered in sports medicine with readings and discussions of current professional trends in the research and practice in this field. Prereq: Twelve semester hours; credit in the field of biological sciences; consent of instructor. (Same as KHP 720.)

AT 740 MUSCULOSKELETAL ANATOMICAL DISSECTION. (3)
This course is a 3-credit cadaver anatomy laboratory course, which will include examination and dissection of the human cadaver. Lectures and laboratory experience will emphasize the musculoskeletal, articular, nervous, and vascular systems particularly as they relate to athletic injury mechanism and evaluation.

AT 768 RESCR MASTERS DEGREE. (1-3)
Residency credit for master’s thesis.

B&E Business and Economics

B&E 102 MICROSOFT OFFICE SPECIALIST—WORD. (0)
This course is designed to give students experience with the Microsoft Office Application of Word 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Word 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 103 MICROSOFT OFFICE SPECIALIST—POWERPOINT. (0)
This course is designed to give students experience with the Microsoft Office Application of PowerPoint 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification in PowerPoint 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 104 MICROSOFT OFFICE SPECIALIST—EXCEL. (0)
This course is designed to give students experience with the Microsoft Office Application of Excel 2003 for the purpose of performing business tasks and for providing training for upper-division coursework. The course is self-directed with certification of the appropriate skill level determined by successful completion of the Microsoft Office Specialist Certification Exam in Excel 2003. Prereq: Premajor status in the Gatton College of Business and Economics.

B&E 105 TECHNOLOGY FOR BUSINESS SOLUTIONS. (1)
This course prepares pre-major students in the Gatton College of Business & Economics to use business software at a high level of proficiency and focuses on Microsoft Excel and Access. Lectures will be supplemented with hands on experiences with business problems. Prereq: ACC 201 and ECO 201, pre-major in the Gatton College of Business & Economics, or consent of instructor.

B&E 120 LEADERSHIP IN THE GLOBAL MARKETPLACE. (3)
An introductory examination of the skills, competencies, and styles of effective global leaders. Activities include individual assessments and a personal leadership development plan. Prereq: Acceptance in the Global Scholars Certificate program.

B&E 122 THE CHALLENGE OF LEADERSHIP. (1)
Current leadership challenges as discussed by the people who confront them. Students have the opportunity to discuss leadership challenges with guest speakers from the corporate, government and non-profit sectors. Prereq: Acceptance into Global Business Leadership certificate program.

B&E 221 ACCOUNTING FUNDAMENTALS I. (2)
Examines the basic principles/concepts which govern the recording/reporting of accounting data. Studies the language of accounting and the accounting cycle. Establishes a framework for understanding how data is transformed into the accounting statements and how these statements are used by decision makers. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

B&E 222 ACCOUNTING FUNDAMENTALS II. (2)
Examines the preparation and use of accounting information for management decision making. Provides an understanding of various traditional and contemporary management accounting techniques used to combine and analyze data within a company. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.

B&E 223 INTRODUCTION TO THE ECONOMICS OF BUSINESS. (2)
Provides an introduction to the principles of microeconomics and some key concepts of macroeconomics as they relate and apply to the immediate interests of business managers. Basic tools of economics will be used to study consumer/producer behavior, how markets work, supply and demand interaction, and intra to market structure. This course is specifically designed to help prepare prospective MBA students for the economics and business classes and will not satisfy ANY undergraduate degree requirement. Prereq: Acceptance into MBA program, other graduate program or consent of instructor.
**Course Descriptions**

**B&E 240 INTER-CULTURAL BUSINESS COMMUNICATION.** (3)
This course is designed to improve students’ ability to communicate effectively with people from diverse cultural backgrounds. Prereq: Acceptance into Global Business Leadership certificate program.

**B&E 300 CAREER DEVELOPMENT IN BUSINESS AND ECONOMICS.** (1)
The course will emphasize the application of analytical, communicative, and critical thinking skills in the development of students’ careers. It will address career opportunities, selection of personally appropriate career plans, and job search activities. It will enhance analytical skills through career analysis and company analysis, and enhance written and oral communication skills through their application to job search activities. Prereq: At least 60 hours of earned credit.

**B&E 327 LARGER WORLD ISSUES IN BUSINESS.** (3)
A case-based course that explores the nexus between business and the social issues of the day (e.g., poverty, the environment). Student activities include a case competition exercise where they examine a social issue in business and hone their analytical and oral presentation skills. Prereq: Acceptance into the Global Scholars program.

**BA Business Administration**

**BA 700 TEACHING METHODS IN BUSINESS.** (1)
A three part course that examines what constitutes good teaching and explores effective techniques for college instruction. Seminars emphasize practical information for both the principal activities and the details of teaching. Departmental discussions allow students to discuss issues that arise in their teaching practice. Reviews of classroom performance provide professional feedback in order to enhance on-the-job learning. Seminar, two hours per week. Prereq: Approval of Director of Graduate Studies. (Same as ECO 700.)

**BA 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**BA 762 RESEARCH METHODOLOGY.** (3)
Examines fundamental concepts in design, control, and measurement for social science research with emphasis on: reliability, internal and external validity, and causality. Prereq: Admission to DBA program and completion of or concurrent enrollment in a graduate level course on the general linear model.

**BA 767 DISSERTATION RESIDENCY CREDIT.** (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**BA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

**BA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.** (0-12)
May be repeated indefinitely.

**BAE Biosystems and Agricultural Engineering**

**BAE 102 INTRODUCTION TO BIOSYSTEMS ENGINEERING.** (1)
An introduction to the engineering of food and fiber production and processing systems. Professionalism and the engineering approach will be emphasized.

**BAE 103 ENERGY IN BIOLOGICAL SYSTEMS.** (2)
This course introduces the concepts of energy transport in biological systems including the study of thermodynamics, heat transfer, psychometrics, and fluid flow. BAE 102 and prereq or concur: MA 113, or consent of instructor.

**BAE 201 ECONOMIC ANALYSIS OF BIOSYSTEMS.** (2)
The financial and managerial aspects of biosystems in evaluating design alternatives. Typical topics include: concepts of present and future value, techniques of managerial economics, and biosystem design analysis in the evaluation of alternatives. Retirement/replacement policies and risk analysis. Prereq: MA 113, BAE 103 or consent of instructor.

**BAE 202 STATISTICAL INFERENCE FOR BIOSYSTEMS ENGINEERING.** (3)
Introduction to statistics and statistical inference reasoning. Evaluation of common claims based on statistical constructs, hypothesis tests, margins of error, confidence intervals, and analysis of variation. Identification of possible statistical obstacles, such as confounding, missing data, and inappropriate randomness. Conceptual statistics will be emphasized. Special attention will be given to include biosystems engineering problems. Prereq: MA 114.

*BAE 305 DC CIRCUITS AND MICROELECTRONICS.** (3)
An introduction to the use of digital electronics and integrated circuits in solving biosystems engineering problems. Digital circuits, microprocessor concepts, computer interfacing, transducers, signal conditioning and control applications are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: EE 305; prereq or concur: CS 221 or equivalent.

*BAE 400 SENIOR SEMINAR.** (1)
A course for senior students in biosystems engineering with emphasis on oral communications skills. Students will do literature searches on topics related to the biosystems engineering profession and present oral and written reports. Prereq or concur with BAE 402.

*BAE 402 BIOSYSTEMS ENGINEERING DESIGN I.** (2)
A design course for seniors in BAE requiring students to solve open-ended problems. Students will use previously learned engineering principles to produce actual designs which will be built and analyzed in BAE 403. Prereq: BIO 150, 152; prereq or concur: BAE 417 or BAE 447.

*BAE 403 BIOSYSTEMS ENGINEERING DESIGN II.** (2)
Student design teams evaluate and enhance design solutions, fabricate prototypes, execute performance tests, analyze results, and develop final design specifications. Oral and written reports are required. Prereq: BAE 402.

*BAE 417 DESIGN OF MACHINE SYSTEMS.** (3)
A study of the operational characteristics and design features associated with production and processing equipment for food and fiber products and an introduction to conceptualization, analysis and design of these systems. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330 or CE 341, EM 302; prereq or concur: EM 313.

*BAE 427 STRUCTURES AND ENVIRONMENT ENGINEERING.** (3)
This course teaches load estimate for light timber and concrete structures and introduces the design of heating, cooling, and ventilation systems in these structures. Prereq: CE 341 or ME 330; BIO 148 and 152; prereq or concur: EM 313.

*BAE 435G WASTE MANAGEMENT FOR BIOSYSTEMS.** (3)
A study of the characteristics; treatment and utilization principles; and analysis and design of systems for managing waste from the production and processing of food and fiber. Lecture, two hours, laboratory, three hours per week. Prereq: MA 214; BIO 152.

*BAE 437 LAND AND WATER RESOURCES ENGINEERING.** (3)
The hydrologic cycle is studied and design procedures are developed for flood control structures, water table management, wetlands, irrigation, and erosion control systems. Prereq: CE 341 or ME 330; BIO 148 and BIO 152.

*BAE 436G FUNDAMENTALS OF GROUNDWATER HYDROLOGY.** (3)
The first course in the physics of saturated flow in porous media. Topics include groundwater occurrence, Darcian flow, well hydraulics, flow nets, layered systems flow and pollutant movement. Prereq: ME 330 or CE 341 or consent of instructor, and engineering standing. (Same as CE 460.)

*BAE 447G BIOPROCESS ENGINEERING FUNDAMENTALS.** (3)
Design principles and equipment selection for the most common processing operations are studied for the manufacturing and preservation of biological materials. Topics will include the design of fluid flow systems, transient heat transfer, heat exchangers, psychrometers, and refrigeration. Prereq: BIO 148 and BIO 152; prereq or concur: ME 325.

*BAE 450 SPECIAL PROBLEMS.** (1-3)
An intensive study of some phases of biosystems engineering in which the student is particularly interested. Approval of instructor is required. May be repeated to a maximum of six credits. Prereq: Approval of the instructor.

*BAE 502 MODELING OF BIOLOGICAL SYSTEMS.** (3)
The course will focus on the mathematical description and computer simulation of the complex interactions involved in biological systems. Computer simulation will be used as a tool to analyze and suggest design changes to optimize performance. Prereq: BAE 402.

*BAE 503 FUNDAMENTALS OF BIORENEWABLE RESOURCE ENGINEERING.** (3)
This course introduces students to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Topics include: Defining the resource base; physical and chemical properties of biorenewable resources; description of biobased products; methods of production for biorenewable resources.

*BAE 504 BIOFUELS PRODUCTION AND PROPERTIES.** (3)
This course introduces students to the science and engineering of liquid biofuels for transportation. Topics include: physical and chemical properties; engine performance; processing technologies; and environmental impact of biofuels. Prereq: BAE 503 or consent of instructor.

*BAE 505 THERMOCHEMICAL PROCESSING OF BIOMASS.** (3)
Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Prereq: BAE 503, BAE 504, or consent of instructor.

*BAE 506 LIFE CYCLE ASSESSMENTS FOR BIORESOURCE ENGINEERING.** (3)
Life Cycle Assessment (LCA) is a method in which the energy and raw material consumption, different types of emissions and other important factors related to a specific production or service are measured, analyzed and summarized over the entire life cycle. This course will cover the theory, practice and application of Life Cycle Assessment. Life Cycle Assessment is one tool in a large toolbox of methods, such as Life Cycle Costing (LCC), Substance Flow Analysis (SFA), and Risk Assessment (RA), used to evaluate goods, services and systems. Prereq: Senior or graduate student standing.
Course Descriptions

**BAE 513 SOIL DYNAMICS IN TILLAGE AND TRACTION.**
A course for advanced undergraduate and graduate students which presents the principles of dynamic soil-machine interaction. The performance characteristics of tractive devices are presented along with the corresponding soil compliance. Soil response to mechanical disturbance or tillage is also presented. Lecture, two hours; laboratory, two hours per week. Prereq: EM 313; EM 302. (3)

**BAE 515 FLUID POWER SYSTEMS.**
Analysis and design of fluid power systems used in agricultural, industrial and processing equipment. Selected topics to include: positive displacement components, control devices, actuators, fluid transmission and system dynamics. Lecture, two hours; laboratory, two hours per week. Prereq: ME 330, ME 340 and engineering standing. (3)

**BAE 517 OFF-ROAD VEHICLE DESIGN.**
Morphology, operational characteristics, and design considerations of off-road vehicles used in agriculture, forestry and construction. This course provides an introduction to conceptualization, analysis and design of these vehicles. Topics to be addressed include: engine performance and design, vehicle testing, turbo chargers and intercoolers, drivetrains, chassis mechanics, electronic systems, hydraulic systems, and human factors. Prereq: BAE 417. (3)

**BAE 532 INTRODUCTION TO STREAM RESTORATION.**
Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology, hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as CE 542.) (3)

**BAE 536 FLUVIAL HYDRAULICS.**
Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as CE 546.) (3)

**BAE 537 IRRIGATION AND DRAINAGE ENGINEERING.**
Planning and design of irrigation system; sprinkler, traveling gun, center pivot, trickle, subirrigation and residential and commercial irrigation; pumps; water quality treatment and supply; ponds and wells; principles of water movement and plant-soil relationships; surface and subsurface drainage. Prereq: ME 330 or CE 341 or consent of instructor. (3)

**BAE 538 GIS APPLICATIONS FOR WATER RESOURCES.**
This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complimented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as CE 546.) (3)

**BAE 541 INTERMEDIATE FLUID MECHANICS.**
Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as CE 541.) (3)

**BAE 545 ENGINEERING HYDRAULICS.**
Analysis and Design of flow in open channel open channels. Design of hydraulic structures. Prereq: CE 461G or CE 541 and engineering standing, or consent of instructor. (Same as CE 549.) (3)

**BAE 547 WATERSHED SEDIMENTATION.**
The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which they are initiated, developed, and worked to equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural carbon and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre- or Co-requisite or equivalent). (Same as CE 547.) (3)

**BAE 549 BIOLOGICAL PROCESS ENGINEERING.**
An analysis of processing operations for the conversion or generation of biological materials. The course material applies thermodynamics, heat transfer, mass and energy balances, and reaction kinetics to biological process operations such as stabilization, fermentation, product recovery, freezing, drying, evaporation, and refrigeration. Applications include biomedical, food processing, and biochemical and biofuel production from biomass. Prereq: BAE 447 or consent of instructor. (3)

**BAE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT.**
Study of the generation and management of solid and hazardous wastes. Application of engineering materials to the collection, transport, processing, resource recovery and ultimate disposal of these wastes. Prereq: CE 471G, CE 521 or consent of instructor and engineering standing. (Same as CE 556.) (3)

**BAE 580 HEATING, VENTILATING AND AIR CONDITIONING.**
A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in thermal environmental design. Building energy requirements will be computed and thermal comfort criteria will be studied. Prereq: BAE 427 or ME 321 or consent of instructor. (Same as ME 580.) (3)

**BAE 581 PHYSICS OF PLANT AND ANIMAL ENVIRONMENTS.**
A study of the thermal, moisture, light, and gaseous components of plant and animal environments with emphasis on interactions between these biological systems and their environments. Prereq: BAE 427 or consent of instructor. (3)

**BAE 599 TOPICS IN BIOSYSTEMS ENGINEERING.**
A detailed investigation of a topic of current significance in biosystems engineering such as: design of small earth dams, vacuum dehydration systems, small particle mechanics, biofuels, environmental control for bioreactors, sprinkler irrigation, energy conversion in agriculture, bio-simulation. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the BAE 599 number. Prereq: Variable; given when topic identified. (2-3)

**BAE 618 ADVANCED PLANT, SOIL AND MACHINERY RELATIONSHIPS.**
A consideration of fundamental concepts of energy and materials in the identification and mensuration of parameters needed in the development of new machines for agriculture. Lecture, two hours; laboratory, two hours. Prereq: BAE 417. (3)

**BAE 625 TOPICS IN ADVANCED ENVIRONMENT CONTROL AND ANALYSIS (Subtitle required).**
A study of current research in environment control and analysis of agricultural, commercial and residential structures. May be repeated three times for a maximum of nine credits, but not more than three credits may be earned under a particular topic. Prereq: Senior course in environment control and HVAC, BAE/ME 580, or consent of instructor. (3)

**BAE 635 GROUNDWATER HYDROLOGY.**
The equations of saturated and unsaturated groundwater flow, the formulation of boundary value problems, and some analytical methods of solution. Solutions using Fourier series, solutions involving the Fourier transform and the Fourier sine and cosine transforms. The Boltzmann transformation, development of the Philip solution for horizontal and vertical flow. Mathematical statement of the saturated and unsaturated groundwater pollution problem and some analytical methods of solution. The semigroup solution of the resulting evolution equation, examples of solutions using the Laplace transform and the Fourier transform, complex solutions in two-dimensional and three-dimensional domains, solutions for distributed sources in time and in space, solutions for time-varied boundary conditions. Prereq: MA 214, CE 461G or equivalent. (Same as CE 660.) (3)

**BAE 642 OPEN CHANNEL FLOW.**
The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as CE 642.) (3)

**BAE 643 MECHANICS OF SEDIMENT TRANSPORT.**
Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, regulation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as CE 643.) (3)

**BAE 647 SYSTEM OPTIMIZATION.**
Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g. biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as ME 647.) (3)

**BAE 648 ENERGY AND MASS TRANSFER IN BIOSYSTEMS PROCESSING.**
A comprehensive and in-depth study of the principles of energy and mass transfer as they apply to the processing of agricultural and biological materials. Prereq: BAE 549 or consent of instructor. (3)

**BAE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL.**
Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as CE 652.) (3)

**BAE 653 WATER QUALITY IN SURFACE WATERS.**
The principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as CE 653.) (3)

**BAE 658 INSTRUMENTATION FOR ENGINEERING RESEARCH.**
Instrumentation and measuring system characteristics; transducers for engineering measurements; and data acquisition and analysis. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor. (3)

**BAE 660 SIMILITUDE IN ENGINEERING.**
An advanced approach to engineering problems through the theory of similitude and its application to models. The use of geometrically similar, distorted and dissimilar models will be discussed. Prereq: Graduate standing. (3)
BAE 662 STOCHASTIC HYDROLOGY. (3)
Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as CE 662.)

BAE 665 WATER RESOURCE SYSTEMS. (3)
Application of systems analysis, mathematical modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as CE 665.)

BAE 667 STORMWATER MODELING. (3)
Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Presentation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as CE 667.)

BAE 672 LANDFILL DESIGN. (3)
This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as CE 672.)

BAE 680 BIOCHEMICAL ENGINEERING. (3)
Principles and design of processes involving biochemical reactions, including aerobic and anaerobic reactions and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as CME 680.)

BAE 748 MASTERS THESIS RESEARCH. (0-12)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BAE 749 DISSERTATION RESEARCH. (0-12)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BAE 750 SPECIAL PROBLEMS IN BIOSYSTEMS ENGINEERING. (1-3)
Independent work on selected research problems in one of the various fields of biosystems and agricultural engineering. Consultation and laboratory by appointment. May be repeated three times for a maximum of nine credits. Prereq: Approval of chairperson of department.

BAE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students must register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BAE 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BAE 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

BAE 775 PROFESSIONAL PRACTICE SEMINAR. (2)
Review of current research topics, methods, management tools and communications techniques with applications. Required of all departmental graduate students. May be repeated once for credit. Lecture, two hours per week. Prereq: Graduate standing.

BAE 795 INDEPENDENT WORK IN BIOCHEMISTRY. (3-12)
Students will carry out a laboratory research project and related reference reading. Laboratory: 9.36 hours per week. May be repeated to a maximum of 12 credits. Prereq: Permission of instructor.

BAE 401G FUNDAMENTALS OF BIOCHEMISTRY. (3)
Descriptive chemistry of amino acids and proteins, carbohydrates, lipids, and nucleic acids. Discussion of structure and function; metabolism and bioenergetics; and biological information flow. At the undergraduate level, understanding is demonstrated through hour examinations; at the graduate level, understanding is demonstrated through hour examinations and a brief paper. Lecture, three hours; one optional conference. Prereq: CHE 107, CHE 236 and BIO 152 or equivalent.

BAE 619G MOLECULAR BASIS OF HUMAN DISEASE. (3)
The goal of this course is to provide students with an understanding of the defining characteristics of the major human diseases, the molecular mechanisms responsible for causing these diseases, and some of the molecular technologies used to diagnose and treat them. Prereq: BCH 401G.

BAE 617 EXPERIMENTAL METHODS IN BIOCHEMISTRY. (4)
A laboratory course dealing with the instrumentation and procedures of biochemical research. Because many of the materials used are labile, the course is given in a block during a four-week period at the end of the spring semester. Five days per week during four-week intersession, or summer session. Prereq: BCH 401G, 502 or 811 and consent of instructor.

BAE 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/MI/PLS/PPA 601.)

BAE 604 STRUCTURAL BIOLOGY. (3)
An advanced course on the structure and function of proteins and nucleic acids. Topics include: the physical determinants of protein structure, classification of protein architecture, proteins-nucleic acid and protein-protein interactions, sequence dependence of nucleic acid structure, ribozymes, dynamics and evolutionary relationships. Prereq: IBS 601-602/BCH 607-608 or equivalent.

BAE 605 BIOMOLECULES AND METABOLISM. (3)
An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230 and 232, BIO 150 and 152; or equivalents. (Same as BAE 601.)

BAE 606 BIOCHEMISTRY AND MOLECULAR BIOLOGY. (3)
An introductory graduate-level biochemistry course focused on the cellular mechanisms that underlie the regulated expression of genes, including transcription and translation, as well as basic mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches critical to molecular biology research will be reviewed. Prereq: CHE 105, 107, 230 and 232, BIO 150 and 152; or equivalents.

BAE 607 PLANT BIOCHEMISTRY. (3)
The course will consider the chemical constituents of plants (with emphasis on biologically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or consent of instructor. (Same as PL/S/PPA 609.)

BAE 610 BIOCHEMISTRY OF LIPIDS AND MEMBRANES. (3)
A lecture and seminar course devoted to intermediary metabolism of lipids and various biochemical aspects of the structure, assembly and functions of biological membrane systems. Prereq: CHE 232, CHE 444G, BCH 401G, 502 or 811. BCH 502 may be taken concurrently.

BAE 611 BIOCHEMISTRY AND CELL BIOLOGY OF NUCLEIC ACIDS. (3)
A lecture and seminar course devoted to a study of the principles of nucleic acid chemistry and to the role of nucleic acids in cellular function. Prereq: BCH 401G, 502 or 811.

BAE 612 STRUCTURE AND FUNCTION OF PROTEINS AND ENZYMES. (3)
Primarily a lecture course devoted to the relationship of the structure of protein molecules to their biological roles. Proteins will be discussed in terms of their size, shape, conformation, primary structure, catalytic mechanism, metabolism, and regulatory properties. Prereq: BCH 401G, 502 or 811; CHE 444G or consent of instructor. May be taken concurrently with BCH 502.

BAE 615 MOLECULAR BIOLOGY. (3)
An integrative and functional approach to the regulatory aspects of DNA, RNA and proteins in prokaryotic and eucaryotic cells. Lectures and discussions with readings in original literature. Prereq: A course in genetics (e.g. BSO 304) and a course in nucleic acids and elementary molecular biology (e.g. BCH 502) or consent of instructor. (Same as BIO/MI/615.)

BAE 616 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of six credits.
BCH 619 SEMINAR IN BIOCHEMISTRY. (1)
A weekly seminar, required of all students majoring in biochemistry, devoted to discussions of areas not covered in other courses and to recent developments in the field. May be repeated to a maximum of five credits.

BCH 620 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as CHE 620/PLS 642.)

BCH 640 RESEARCH IN BIOCHEMISTRY. (1-9)
Prereq: Consent of instructor.

BCH 740 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769/795 residency credit following the successful completion of the qualifying examinations.

BCH 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BCH 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

BCH 779 MEMBRANE SCIENCES COLLOQUIUM. (12)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as CHE/CME/PHA/PHR 779.)

BCH 780 TOPICS IN BIOCHEMISTRY. (1-3)
A lecture and seminar course offered on topics of special interest to graduate students. May be repeated to a maximum of six credits.

BCH 812 DENTAL BIOCHEMISTRY. (6)
This is a comprehensive course in biochemistry designed to fulfill the specific needs of student dentists. Course content is generally as outlined in the American Association of Dental Schools suggested curriculum guidelines for biochemistry. Part I acquaints students with the chemical constituents of prokaryotic and eukaryotic cells; topics include the chemistry of lipids, carbohydrates, proteins, vitamins and coenzymes, and the nature of enzyme action. Part II integrates the chemical principles learned from Part I with concepts of cell dynamics, structure, function, subcellular organization, and metabolism. Topics include intermediary metabolism, bioenergetics, DNA replication, protein synthesis, and cellular regulatory and control mechanisms. Course content, where possible, is related to current concepts concerning the etiology of oral diseases, their treatment, and prevention to assist student dentists in attaining institutional goals and objectives for clinical competency. Prereq: Admission to the College of Dentistry. (Same as OBI 812.)

BCH 815 FIRST-YEAR ELECTIVE BIOCHEMISTRY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-Fail only. Prereq: Admission to first year, College of Medicine.

BCH 819 CELLULAR STRUCTURE AND FUNCTION BIOCHEMISTRY. (7)
The course combines lecture, small group activities, clinical correlations, problem-based learning, and problem-solving sessions in providing an understanding of the relationship of biochemical principles to human health and disease. Close integration with genetics topics provides a better picture of how biochemistry, molecular biology and genetics contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

BCH 825 SECOND-YEAR ELECTIVE BIOCHEMISTRY. (1-4)
With the advice and approval of his or her faculty advisor, the second-year student may choose approved electives offered by the Department of Biochemistry. The intent is to provide the student with an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-Fail only. Prereq: Admission to second year medical curriculum and approval of advisor.

BCH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his or her field of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved elective:
BCH 850 ELECTIVE IN BIOCHEMISTRY

BIO 101 WAYS OF DOING BIOLOGY. (1)
Through a series of lectures and discussions students will gain a better understanding of the various academic programs in the life sciences across campus. Information will also be provided about research opportunities and career possibilities. Pass/Fail only. Enrollment limited to freshmen and sophomore science majors.

BIO 102 HUMAN ECOLOGY. (3)
A study of the interrelationships of man, populations, space, energy, food, mineral resources and other life on earth. Not for life science majors.

BIO 103 BASIC IDEAS OF BIOLOGY. (3)
Introductory biology. Discussion topics are those relevant to both plants and animals - cell structure and function, molecules important to living things, metabolism, heredity, environment. Not for life science majors.

BIO 104 ANIMAL BIOLOGY. (3)
An introduction to the major areas of interest in animal biology, e.g., life processes, the cell, development, heredity, body systems, evolution, taxonomy, phylogeny, ecology. Prereq: High school chemistry recommended.

BIO 106 PRINCIPLES OF PLANT BIOLOGY. (3)
The principles underlying the structure, physiology and reproduction of flowering plants. Prereq: High school chemistry recommended.

BIO 110 INTRODUCTION TO HUMAN BIOLOGY AND HEALTH. (3)
This course provides the student with a general overview of the basic dimensions of health (such as physical, social and emotional) and the applications of these dimensions to personal wellness.

BIO 111 GENERAL BIOLOGY LABORATORY. (1)
Laboratory studies in the structure and function of cells, plants, and animals; ecology; heredity; and evolution. Prereq or coreq: BIO 103 or consent of instructor.

BIO 148 INTRODUCTORY BIOLOGY I. (3)
BIO 148 introduces the student to the biological mechanisms operating at the molecular, cellular, and population level that contribute to the origin, maintenance, and evolution of biodiversity including the origins and history of the evolutionary process. Course material is presented within a phylogenetic context, emphasizing the shared history of all living organisms on earth through common ancestry. The first semester of an integrated one-year sequence (BIO 148 and BIO 152). Prereq: Math ACT of 23 or above or MA 109, past or concurrent enrollment in CHE 105.

BIO 150 PRINCIPLES OF BIOLOGY I. (3)
The first semester of an integrated one-year sequence (BIO 150 and BIO 152) that is designed to develop an appreciation of biological principles necessary to explore life at the cellular and molecular levels. Similarities and differences in structure and function of simple and complex cells will be covered along with theories in the origin and evolution of biological systems. Prereq: CHE 105, or Math ACT score of 26 or above plus concurrent enrollment in CHE 105, or chemistry placement test passed plus concurrent enrollment in CHE 105.

BIO 151 PRINCIPLES OF BIOLOGY LABORATORY. (2)
An introductory laboratory in which biological systems are investigated at the cellular and molecular levels. Laboratory, four hours per week. Prereq: This course is a companion to the BIO 150 lecture course, but it need not be taken concurrently.

BIO 152 PRINCIPLES OF BIOLOGY II. (3)
The second semester of an integrated one-year sequence (BIO 150 and BIO 152) that is designed to develop understanding and appreciation for the diverse forms of plant and animal life, and their relationships to each other and to their environment. Structure and function relationships will be explored at many levels of organization: cell, tissue, organ, organism, population and community. Prereq: CHE 105, or Math ACT of 26 or above plus concurrent enrollment in CHE 105, or chemistry placement test passed plus concurrent enrollment in CHE 105.

BIO 153 PRINCIPLES OF BIOLOGY LABORATORY II. (2)
An introductory laboratory course in which biological systems are investigated at the organismal, population and community levels. Laboratory, four hours per week. Prereq: CHE 105, or Math ACT of 26 or above plus concurrent enrollment in CHE 105, or chemistry placement test passed plus concurrent enrollment in CHE 105.

BIO 155 LABORATORY FOR INTRODUCTORY BIOLOGY. (1)
This course is designed to provide a broad introduction into the data, results, and information associated with biological research, and into some of the analytical approaches used to test biological hypotheses. Communication of these aspects of biological research is crucial, and much of this lab course will be focused on the development of effective writing skills for the delivery of this information. Prereq: Math ACT of 23 or above or MA 109, past or concurrent enrollment in CHE 105.

BIO 180 SPECIAL TOPICS IN BIOLOGY (INTRODUCTORY LEVEL): (Subtitle required). (1-4)
Interdisciplinary, topical or experimental course in introductory biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.
Course Descriptions

BIO190 SUPPLEMENTAL BIOLOGY WORKSHOP. (1) Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 150.

BIO192 SUPPLEMENTAL BIOLOGY WORKSHOP II. (1) Cooperative workshop offered only as an optional supplement to certain biology lecture courses. Offered only on a pass/fail basis. Coreq: BIO 152.

BIO199 RESEARCH EXPERIENCE IN BIOLOGY. (6-1) Participation in biological research under the direction of a faculty mentor in Biology or related field. A research contract signed by the student and faculty mentor must be approved by the Director of Undergraduate Studies in Biology. Offered pass/fail only.

BIO208 PRINCIPLES OF MICROBIOLOGY. (3) The course introduces fundamental microbiological principles and techniques. Emphasis is placed on the structural, functional, ecological and evolutionary relationships among microorganisms, primarily viruses, rickettsiae, bacteria, fungi and algae. Prereq: High school chemistry recommended.

BIO209 INTRODUCTION TO MICROBIOLOGY LABORATORY. (2) Laboratory exercises in general microbiology. Laboratory, four hours per week. Prereq: One unit of chemistry or consent of instructor; BIO 208 or BIO 308 should be taken concurrently.

BIO210 THE LIFE PROCESSES OF PLANTS. (3) This course is intended to provide a basic understanding of the natural products and processes that shape the nature of modern plants, and their interactions with the environment and characteristics unique to plants, and develop a basic understanding of how these plant attributes relate to organismic function. Emphasis will be placed on exploring the nature of the major plant biomes of the Earth, their community dynamics, and how members plants compete for space and other resources. Development of optimal plant strategies for reproductive success, plant interaction with other living systems as well as biotic factors and their defense from predation and attack will also be considered. (Same as PLS 210.)

BIO300 GENERAL ENTOMOLOGY. (3) Fundamentals of insect biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as ENT 300.)

BIO302 INTRODUCTION TO NEUROSCIENCE. (3) This introductory course is designed to provide students with a basic understanding of the physiological, cellular and molecular levels, of how the nervous system functions to control behavior. It will also introduce students to the consequences of abnormal system functioning brought about by either disease or injury. Prereq: BIO 152 or equivalent or permission of instructor.

BIO303 INTRODUCTION TO EVOLUTION. (4) This course covers topics in evolution, concentrating on the Darwinian theories of evolution including descent with modification, natural selection, and sexual selection. Topics will include: patterns of evolution, the genetic source of variation, measuring evolution, adaptation, speciation, human evolution, “evo-devo”, and evolutionary medicine. Taught on campus (lecture: three hours; recitation, three hours) or online. Prereq: BIO 148, BIO 152 and BIO 155 or equivalent.

BIO304 PRINCIPLES OF GENETICS. (4) A study of the physical and chemical aspects of the genetic material and their relationship to the expression and inheritance of the phenotype. Lecture, three hours; laboratory, three hours per week. Prereq: BIO 148, BIO 152, BIO 155, CHE 107, CHE 113.

BIO308 GENERAL MICROBIOLOGY. (3) Fundamental concepts of microbiology. The nutrition, physiology, genetics, molecular biology of microorganisms, and their roles in nature and in infection and immunity will be studied. Prereq: BIO 150, 151, 152, and 153 (or equivalent courses); CHE 230; and BIO 315 or BIO 304.

BIO315 INTRODUCTION TO CELL BIOLOGY. (4) The structure and function of cells will be considered. Emphasis will be placed on the ultrastructure of cell organelles in plants and animals as a framework for understanding the compartmentalization of intracellular activity. Lecture, three hours; laboratory, three hours weekly. Prereq: BIO 303 and BIO 304. Coreq: CHE 230 or equivalent. Consent of instructor.

BIO325 ECOLOGY. (4) This course introduces the scientific study of relationship between organisms and their environment. The course is structured around levels of organization—from physiological ecology to individuals, populations, communities, ecosystems, landscapes, regions, and the biosphere. Students will be expected to develop a solid knowledge base and understanding of key concepts and issues in contemporary ecology; to become familiar with how ecological understanding is attained by researchers; and to see how ecological knowledge and methods can be used to address important societal problems. Lecture, three hours per week; laboratory, an average of three hours per week. Prereq: BIO 150-153 or equivalent introductory biology sequence; and BIO 304 or equivalent genetics course; or consent of instructor.

BIO340 COMPARATIVE ANATOMY. (5) Comparative study of the anatomy of vertebrates with emphasis on evolutionary change, and development of morphological and functional significance of structural organization and basic concepts of the comparative approach. Laboratory studies on representative vertebrates involving dissections, models, and demonstrations. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 150, 151, 152, 153 or BIO 104, 105 or equivalent course in animal biology.

BIO350 ANIMAL PHYSIOLOGY. (4) An introduction to the basic principles of animal physiology. An elementary discussion of the major vertebrate organ systems including nutrition, metabolism, respiration, circulation, excretion, muscle contraction, peripheral and central nervous system, and endocrine function emphasizing homeostasis. Lecture, three hours; laboratory, three hours. Prereq: BIO 150-153 or equivalent introductory biology sequence, BIO 315, CHE 105, CHE 107.

BIO351 PLANT KINGDOM. (3) An evolutionary survey of the morphology, taxonomy, life histories and biological relationships of all plant groups comprising the plant kingdom. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in biology.

BIO355 BIOLOGY STUDY ABROAD (Subtitle required). (3) This course offers students an opportunity to study unique biological communities and to experience living in a foreign culture. Specific content and location varies. May be repeated a maximum of two times under different subtitles. Prereq: Will be set by instructor.

BIO361 ECOLOGY OF THE KENTUCKY FLORA AND VEGETATION. (3) An overview of the physiography, geology, soils, hydrology, climate (paleo and recent), florae (including floristic relationships), archaeobotany, and agriculture of Kentucky. Lecture, two hours; laboratory, two hours per week. Prereq: One year of introductory Biology or consent of instructor.

BIO375 BEHAVIORAL ECOLOGY AND SOCIOBIOLOGY. (3) This course will explore the selective forces influencing animal behavior, such as foraging, predator avoidance, mate choice, parental care, and social interaction. Specific phenomena to be explored include the evolution of optimal foraging and search images, extravagant male characteristics, female preferences, conflicts between the sexes, infanticide, parent-offspring conflict, dominance hierarchies, optimal group size, altruism, and eusociality. The study of these behaviors integrates ideas and approaches from ecology, genetics, physiology, and psychology. Students will be encouraged to read outside material, to think carefully, logically, and critically about ideas, and to ask questions and defend their views in class. Prereq: A year of introductory biology (BIO 150/152).

#BIO 380 SPECIAL TOPICS IN BIOLOGY (INTERMEDIATE LEVEL) (Subtitle required). (1-4) Interdisciplinary, topical or experimental course in intermediate (300-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO395 RESEARCH IN BIOLOGY. (1-3) An independent research project in an area of biology under the direction of a faculty mentor. The research may be conducted in the School of Biological Sciences or in other biological units on campus. A research contract signed by the student and the faculty research mentor must be approved by the Director of Undergraduate Studies in Biology. May be repeated to a maximum of 12 credits, but a maximum of only 6 credits may be used to satisfy the requirements of a BS or BA in Biology. Prereq: BIO 150, 151, 152, and 153. Completion of at least one of the Biology core courses (Cell Biology, Genetics, Physiology, Ecology) is strongly recommended.

BIO401G SPECIAL TOPICS IN BIOLOGY FOR ELEMENTARY, MIDDLE AND HIGH SCHOOL TEACHERS (Subtitle required). (1-4) Selected topics in biology of special interest to teachers such as biological research experiences related to pharmacological assays, collecting behavioral data, and statistically analyzing data. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory, will be given. Lecture discussion, two-four hours; laboratory, zero-four hours. May be repeated to a maximum of 12 credits. Prereq: By consent of instructor only.

BIO410 LABORATORY IN GENETICS AND CELL BIOLOGY. (3) A laboratory course for students of genetics and cell biology to provide practical experience in contemporary experimental analysis. Prereq: BIO 315 and BIO 304, or equivalent (may be taken concurrently).

BIO420 TAXONOMY OF VASCULAR PLANTS. (4) A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local spring flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 150, 152 or one course in introductory botany, or consent of instructor. (Same as NRE 420G.)
Course Descriptions

**BIO 425 BIOLOGY SEMINAR:** (Subtitle required.)
This seminar develops effective analysis, presentation, and discussion skills required of Biology majors by exploring various life science topics of interest to faculty and students. Satisfies seminar requirements for Biology majors and can be repeated for a maximum of 2 credits under a different subtitle. Prereq: Senior standing in Biology recommended. BIO 150 or equivalent. Additional prereq(s) may be identified by instructor when topic is selected.

**BIO 430G PLANT PHYSIOLOGY.**
Basic principles of plant physiology; the physiological processes of green plants and the effect of the environment on these processes. Lecture (three hours) and laboratory (three hours). Prereq: BIO 148, 152, 155 (or equivalent), CHE 230/231 (or equivalent), BIO 315 (or equivalent) or consent of instructor.

**BIO 452G LABORATORY IN ECOLOGY.**
An introduction to laboratory and field experimentation and computer simulation in ecology. Exercises and demonstrations will be performed to familiarize students with (1) particular populations and ecosystems, (2) some important research problems in ecology, and (3) current research techniques for dealing with them. One or two Saturday field trips will be required. Laboratory, four hours. Prereq or coreq: BIO 325 or equivalent and consent of instructor.

**BIO 461 INTRODUCTION TO POPULATION GENETICS.**
This course surveys the population dynamics and equilibria of genes in nucleic, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/ENT/FOR 461.)

**BIO 494G IMMUNOLOGY.**
A survey of theories and mechanisms of immunity including: nature of antigens and antibodies, antigen-antibody reactions, immunocompetent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as MI 494G.)

**BIO 499 BIOLOGY RESEARCH SEMINAR.**
A seminar for students engaged in independent research. Students with BIO 395 experience will interact with student colleagues and an experienced research mentor. Prereq: Past or current enrollment in BIO 395.

**BIO 502 PRINCIPLES OF SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY.**
Advanced survey of major mammalian physiological systems at the systems, cellular and molecular level; lectures, assigned reading, advanced texts or monographs, demonstrations and problem-oriented study questions. Prereq: One year each, physics, general chemistry; PGY 206 or its equivalent. (Same as PGY 502.)

**BIO 507 BIOLOGY OF SLEEP AND CIRCADIAN RHYTHMS.**
This course provides an introduction to the fields of sleep and circadian rhythms including the underlying neuroanatomy, neurophysiology, and the molecular and genetic underpinnings of sleep and circadian behaviors. The medical and societal relevance of these areas will also be emphasized. Considerable time will be spent reading and analyzing the primary literature in these fields, including student presentations of selected articles. Prereq: BIO 304; BIO 315; BIO 350 (or equivalent).

**BIO 508 EVOLUTION.**
Mechanisms of evolutionary change, with a brief summary of historical evolutionary, especially of the Metazoa. Prereq: BIO 304 or ASC/ABT 360.

**BIO 510 RECOMBINANT DNA TECHNIQUES LABORATORY.**
An introduction to the construction, isolation, and analysis of recombinant DNA clones, with emphasis on practical experience in basic techniques. Graduate students will be given first preference in course enrollment. Lecture, one hour; laboratory, 6 hours per week. Prereq: BIO 304 and BIO 315 or equivalent with consent of instructor.

**BIO 515 GENERAL CELL BIOLOGY.**
An integrative, analytical study of the cell as the basic unit of biological structure and function, with emphasis on eukaryotes. Lecture, discussions with readings in some original literature. Prereq: BIO 315 or BCH 401G or equivalent and consent of instructor. (Same as MI 515.)

**BIO 520 BIOINFORMATICS.**
An introduction to computer analysis of macromolecular structure information. This course describes how to use computer software and interpret structural information regarding biological macromolecules as a guide to experiments in biology. Prereq: BIO 315 or BIO 304 or BCH 401 or BCH 501 or BCH 502 or BIO 510 or consent of instructor. (Same as INF 520.)

**BIO 529 DEVELOPMENTAL BIOLOGY.**
An introduction to the principles of developmental biology, particularly of animals, including genetic and environmental control of development at the molecular, cellular, and physiological levels. Prereq: BIO 304 or equivalent, or graduate standing in life sciences, or consent of instructor.

**BIO 530 BIOGEOGRAPHY AND CONSERVATION.**
An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as GEO 530.)

**BIO 535 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR.**
The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as PGR 535.)

**BIO 542 HISTOLOGY.**
An in-depth study of vertebrate cell and tissue structure and function. Human tissue is emphasized. Some knowledge of biochemistry, physiology, and anatomy is desirable. The laboratory involves study of prepared microscope slides. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 315 or consent of instructor.

**BIO 550 COMPARATIVE PHYSIOLOGY.**
Physiological mechanisms by which animals cope with different environmental stresses. Osmoregulation, respiration, temperature regulation and tolerance, sensory reception, circulation, etc. Prereq: One year college chemistry, BIO 350 or equivalent, one year college physics or consent of instructor.

**BIO 551 LIFE CYCLE ECOLOGY OF FLOWERING PLANTS.**
The effect of physical and biotic factors on plants and environment. Physiological, morphological and anatomical adaptations of plants to the physical factors of the environment are emphasized. Some of the laboratory exercises are carried out in the field. Lecture, three hours; laboratory, two hours. Prereq: BIO 325 or consent of instructor.

**BIO 553 FISH BIOLOGY.**
This course explores the biology of fishes from an evolutionary perspective. Lectures cover physiology, functional morphology, ecology, population biology, behavior, evolutionary relationships, and fisheries biology. Laboratory exercises include development of a fish collection; experiments in fish physiology, behavior and ecology; computer modeling of problems in fisheries biology; and field trips. Lecture, three hours; laboratory, two hours per week. Prereq: BIO 150, 151, 152 and 153 or consent of instructor.

**BIO 555 VERTEBRATE ECOLOGY.**
An intensive survey of the vertebrate classes with emphasis on trends and processes in evolution, classification, phylogeny, ecology, and adaptations in morphology and behavior. Lecture, three hours; laboratory, four hours per week. Prereq: BIO 150, 151, 152, 153 or consent of instructor.

**BIO 556 COMMUNICATION BIOLOGY.**
Animals sense and respond to numerous signals from their environment by using sensory modalities attuned to visual, auditory, chemical, and electromagnetic cues. This course is an in-depth examination of the physiological bases of sensory input and the interactive, motor system-mediated, behavioral repertoires exhibited by different species in response to such inputs. Prereq: BIO 325 or BIO 350.

**BIO 559 ORNITHOLOGY.**
A study of the life histories, habits, identification, structure, adaptations, and physiology of birds. Special emphasis upon migrations, songs, nests and economic importance of our native birds. Lecture, field excursions, laboratory studies. Prereq: BIO 104, 105 or BIO 150, 151, 152, 153 or consent of instructor.

**BIO 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY.**
Emphasis will be placed on the physiological and toxicological effects of chemicals on natural biota, including considerations at cellular, organismal, population, and community levels. This will include assimilation and metabolism of pollutants by animal species, with emphasis upon biochemical and physiological mechanisms involved in stress-induced responses and stress reduction. Additional areas of concern will include the transport, fate, and effects of chemical stressors on structure and function of biotic communities and will include introductions to ecotoxicology and environmental regulatory strategies. Lecture, three hours; recitation, two hours per week. Prereq: BIO 350 or PGY 550 or equivalent and consent of instructor. (Same as TOX 560.)

**BIO 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH.**
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: One year of biology. (Same as ENT 561.)

**BIO 563 PARASITOLOGY.**
Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on pathology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques for host examination and preparation of material for study. Prereq: BIO 150, 151, 152, 153 or consent of instructor. (Same as ENT 563.)

**BIO 564 INSECT TAXONOMY.**
A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as ENT 564.)
**Course Descriptions**

BIO 567 APPLICATIONS OF GENETICS. (4)
Course covers genetic concepts with an emphasis on interpretation and analysis of molecular and population genetic data using examples from the entomological literature. Prereq: ABT 360 or BIO 304 or equivalent and an introductory statistics course.

BIO 568 INSECT BEHAVIOR. (3)
The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as ENT 568.)

BIO 575 PLANT ANATOMY AND MORPHOLOGY. (4)
A survey of the diverse structural features of plants and their functional and phylogenetic significance. Emphasis will be on the adaptive design of modern vascular plants as a response to natural and artificial selection. Lecture, three hours; laboratory, two hours per week. Prereq: Introductory biology sequence (six hours) or consent of instructor.

#BIO 580 SPECIAL TOPICS IN BIOLOGY (ADVANCED LEVEL): (Subtitle required). (1-4)
Interdisciplinary, topical or experimental course in advanced (500-level) biology. Subtitle required. May be repeated for a maximum of 12 credit hours under different subtitles. Course format: variable – Lecture and/or laboratory and/or recitation and/or seminar. Prereq: Determined by instructor.

BIO 582 VIROLOGY. (3)
Physical, chemical and biological properties of viruses. Modes of replication and control of gene product formation displayed by representative plant, animal, and bacterial viruses. Prereq: BIO 304 and biochemistry or equivalent strongly recommended, or consent of instructor.

BIO 595 IMMUNOBIOLOGY. (2)
Laboratory in immunology and serology. Preparation, standardization, and uses of biological products; serology. Laboratory, four hours. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as MI 595.)

BIO 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/MI/PLS/PPA 601.)

BIO 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, chemical ecology, behavioral studies, motion analyses, using high-speed video, image analysis for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as ENT FOR 605.)

BIO 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course includes a laboratory component to model situations in which very small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as ENT FOR 606.)

BIO 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: BIO 304 and biochemistry or equivalent or consent of instructor. (Same as ENT FOR 607.)

BIO 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (2)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as ENT FOR 608.)

BIO 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as ENT FOR 609.)

BIO 611 BIOPATHOLOGY. (3)
The course will examine the mechanisms by which various biological, chemical and physical agents injure susceptible hosts and the complex biochemical and immunological responses which occur in response to injury. The host defense mechanisms will be illustrated by an analysis of selected human diseases and animal model systems with particular emphasis on the events at the molecular and cellular level. Prereq: BCH 502 or concurrent, BIO/MI 494G or equivalent and consent of instructor. (Same as MI 611.)

BIO 612 BIOLOGY OF AGING. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/GRN/PGY 612.)

BIO 615 MOLECULAR BIOLOGY. (3)
An integrative and functional approach to the regulatory aspects of DNA, RNA and proteins in prokaryotic and eukaryotic cells. Lectures and discussions with readings in original literature. Prereq: A course in genetics (e.g., BIO 304) and a course in nucleic acids and elementary molecular biology (e.g., BCH 502) or consent of instructor. (Same as BCH/MI 615.)

BIO 618 MOLECULAR NEUROBIOLOGY. (4)
This course provides knowledge and analytical skills in the field of molecular neurobiology. An in-depth introduction to current technologies, their rationale and limitations, will be the focus to address normal brain function and neuropathological conditions. Prereq: BCH 501, 502, NEU 605, or consent of instructor. (Same as ANA/MI/PGY 618.)

BIO 620 PLANT MOLECULAR BIOLOGY. (3)
This course is intended to be a treatment of current concepts of plant molecular biology. It will be a literature-based course, supplemented by handouts and reading lists. The course will deal as much as is possible with topics that are unique to plants. Current aspects of molecular biology that are relevant to the course content will be covered in the first part of the course; however, these lectures will not be a review of topics that should have been retained from introductory genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as PLB 620.)

BIO 621 TOPICS IN MODERN BIOLOGY (Subtitle required). (1-3)
(1-3) This course provides students in the biological and related sciences to be taught on various topics by specialists in their fields. Designed to give the student the most up-to-date information on the various topics. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

BIO 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 622.)

BIO 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, the introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photonorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as FOR/PLS 623.)

BIO 625 INSECT-PLANT RELATIONSHIPS. (3)
This course examines the natural history, ecology, and evolution of insect/plant relationships. Topics include mechanisms and theory of plant defense, behavioral and physiological adaptations of herbivorous insects, pollination biology, multilevel-top interaction, causes of insect outbreaks, and applications to managed ecosystems. Critical reading and discussion of current literature is emphasized. Prereq: Two years of college-level biology. (Same as ENT 625.)

BIO 632 ADVANCED CELL BIOLOGY I. (3)
A molecular level treatment of cell structure and function derived from current experimental approaches. Eukaryotes will be stressed. Topics will usually include membrane structure and function, the cytoskeleton and the extracellular matrix, and bioenergetics. Lecture discussions with reading in the original literature. Prereq: BIO 304 or equivalent; coreq: BCH 501 or equivalent or consent of instructor.

BIO 633 ADVANCED CELL BIOLOGY II. (3)
This course is a companion to BIO 632. Topics will usually include a molecular level discussion of gene structure, gene expression, and gene regulation, followed by the cell and molecular biology of cell proliferation, development, and differentiation. Lectures and discussions with reading in the original literature. Prereq: BIO 304 or equivalent, BCH 501 or equivalent or consent of instructor.

BIO 635 INSECT PHYSIOLOGY. (4)
Study of insect physiological processes including development, digestion, reproduction, respiration, excretion, hormones and immunity. Opportunity to learn techniques used in insect physiology and molecular biology. Prereq: Consent of instructor. (Same as ENT 635.)
BIO636: INSECT MOLECULAR BIOLOGY. (4)
Principles of insect molecular biology. Analysis of insect development, reproduction, behavior, immunity, transgenic insects and insecticide resistance at the molecular level. Hands-on experience with molecular biology techniques. Prereq: ENT/BIO 635 or consent of instructor. (Same as ENT 636.)

BIO638: DEVELOPMENTAL NEUROBIOLOGY. (3)
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cell biological and molecular approaches to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 553 or consent of instructor. (Same as ANA/PGY/PSY 638.)

BIO650: ANIMAL PHYSIOLOGY LABORATORY. (2)
Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as PGY 650.)

BIO655: INSECT ECOLOGY. (3)
The biotic and physical factors influencing the distribution and abundance of insects and insect populations. Prereq: Consent of instructor. (Same as ENT 665.)

BIO667: INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as ENT/FOR 667.)

BIO684: PHYLOGENETIC SYSTEMATICS. (3)
Theory and methods of phylogenetic analysis and cladistics will be explained. Applications of phylogenetic analysis, such as historical biogeography, biological classification, and testing of ecological hypotheses will be explored. (Same as ENT 684.)

BIO685: IMMUNOBIOLOGY, INFECTION AND INFLAMMATION. (3)
An introductory level graduate course surveying current trends in immunobiology including the organization of the immune system, cells important for immunity and inflammation; types of immune responses, cellular immunity, molecular immunology, self-nonself discrimination, vaccines and immune mediated diseases. Prereqs: BCH 401G, or BCH 501 or 502, JBS 501 or equivalent or consent of the course director. (Same as MI 685.)

BIO707: CONTEMPORARY TOPICS IN IMMUNOLOGY. (3)
This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 685 or equivalent or consent of instructor. (Same as MI 707.)

BIO720: MICROBIAL STRUCTURE AND FUNCTION. (3)
Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture growth, division, and differentiation. Prereq: to reflect appropriate IBS course. (Same as MI 720 and OB T 720.)

BIO740: MAMMALIAN RADIATION BIOLOGY. (2)
The physical and biological sequelae of radiation effects will be discussed emphasizing human and mammalian responses and radiation health. Emphasis will be for health and medical workers. Prereq: Must have consent of instructor, BIO/RM 540 or RM 546 or equivalent background. (Same as RM 740.)

BIO748: MASTERS THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BIO749: DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

BIO767: DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BIO768: RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

BIO769: RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

BIO770: SEMINAR IN BIOLOGY. (1)
Reports and discussions of current research and literature in biology. Required of all graduate students. May be repeated to a maximum of 8 credits. Prereq: Graduate standing in biological sciences.

BIO772: SEMINAR IN MICROBIOLOGY. (0-1)
Review of current literature in microbiology; presentation of papers on work in progress in the department or on assigned topics; reports on meetings of national and international scientific and professional societies and symposia. Required of all graduate students. Two hours per week. May be repeated nine times for a maximum of 10 credits. (Same as MI 772.)

BIO773: SEMINAR IN PLANT PHYSIOLOGY. (1)
Reports and discussions on various topics in plant physiology. May be repeated for a maximum of eight credits.

BIO782: ADVANCED VIROLOGY. (3)
Current trends in virology. Typical topics include DNA tumor viruses, RNA tumor viruses, persistent virus infections, and interference. Emphasis of molecular mechanisms. Prereq: BIO 582. Adequate biochemistry and genetics strongly recommended, or consent of instructor. (Same as VS 782.)

BIO795: RESEARCH IN BIOLOGY. (1-9)
Independent research work in biology. May be repeated to a maximum of 24 credits. Prereq: Graduate standing in biological sciences.

BIO798: RESEARCH IN MICROBIOLOGY. (1-9)
May be repeated to a maximum of 24 credits. Prereq: Consent of instructor. (Same as MI 798.)

BME: Biomedical Engineering

BME 481G: TOPICS IN BIOMEDICAL ENGINEERING. (3)
Detailed investigation of a topic of current significance in biomedical engineering such as: biomaterials, hard or soft tissue biomechanics, rehabilitation engineering, cardiopulmonary systems analysis, biomedical imaging. Prereq: Consent of instructor.

BME 488G: INTRODUCTION TO BIOMATERIALS. (3)
Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Engineering standing, MSE 201, and MSE 301; or consent of instructor.

BME 501F: FOUNDATIONS OF BIOMEDICAL ENGINEERING. (3)
This course demonstrates the application of diverse engineering principles to analysis and understanding of the structure, function, and control of biological systems. Quantitative measurements and analysis of homeostatic, regulatory, transport, biochemical, and biomechanical processes of the human body. Prereq: Engineering standing or consent of instructor.

BME 530: BIOMEDICAL INSTRUMENTATION. (3)
A comprehensive introduction to major aspects of biomedical instrumentation. Topics include basic concept of medical instrumentation, biopotentials, physiological pressure/flow/respiratory measurement, optical sensing, and clinical applications of all the above. The fundamental mathematics underlying each instrument will be reviewed and an engineering picture of the hardware and software needed to implement each system will be examined. Prereq: Consent of instructor.

BME 579: NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)
A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as EE 579.)

BME 599: TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (3)
An interdisciplinary course devoted to detailed study of a topic of current significance in biomedical engineering, such as cellular mechanotransduction, systems biology, and tissue engineering. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BME 605: BIOMEDICAL SIGNAL PROCESSING. (3)
Continuous and discrete signals, sampling, Fourier Transform, LaPlace Transform, Z-Transform, correlation and spectral analysis, digital filters. Prereq: Concurrent enrollment or completion of PGY 412G or PGY 502.

BME 610: BIOMEDICAL CONTROL SYSTEMS. (3)
Homeostatic mechanisms, input-output analysis, steady state and transient response, feedback concepts, system identification and simulation from actual operating data. Prereq: PGY 502 and ME 440 or equivalent.

BME 615: BIOMEDICAL SIGNAL PROCESSING. (3)
Stochastic processes, Fourier-based spectral analysis and linear system identification, modern spectral estimation (AR, MA, ARMA), parametric transfer function estimation, time-frequency analysis of nonstationary signals. Prereq: BME 605, BME 610, EE 640 recommended.
Course Descriptions

BME 640 BIOMEDICAL ENGINEERING ETHICS. (1) This course presents an engineering-based approach to study the system of ethics applicable to biomedical engineering. This course will describe and examine the responsibilities of biomedical engineers to stakeholders, e.g., patients, research subjects, and engineering clients as well as to the legal system (where applicable) and the profession as an entity. As a scholarly discipline, biomedical engineering ethics draws upon principles from subjects such as: the philosophy of science, the philosophy of engineering, and the ethics of technology. Materials from these principles will be used in this course with adaption to the special circumstances attending the practice of Biomedical Engineering.

BME 642 NAVIGATIONAL GUIDES FOR BIOMEDICAL PRODUCT DEVELOPMENT. (3) This course teaches engineers how biomedical product designs are influenced by government regulations, economic issues, and ethical concerns.

BME 661 BIOMATERIALS SCIENCE AND ENGINEERING. (3) Study of biological and man-made materials that perform, improve, or restore natural functions. Structure and properties of connective tissue and commonly implanted metals, ceramics, and polymers; biocompatibility of materials used in orthopedic, soft tissue, and cardiovascular applications. Prereq: Undergraduate engineering degree or consent of instructor.

BME 662 TISSUE-IMPLANT INTERFACE. (3) Study of the interface between implants and host tissues from both the materials and biological perspective. Structure of the tissue-implant interface; surface characterization of biomaterials; protein adsorption; mechanisms of cell responses; the methods for controlling the tissue-implant interface, with emphasis on orthopedic and cardiovascular applications. Prereq: BME 661 or consent of instructor.

BME 670 BIOSOLID MECHANICS. (3) Application of laws of mechanics to study the behavior of human organ systems. Stress-strain analysis of soft and hard body tissues with emphasis on pulmonary and musculoskeletal systems. Viscoelastic properties. Prereq: Undergraduate engineering degree or consent of instructor.

BME 672 MUSCULOSKELETAL BIOMECHANICS. (3) Application of laws of mechanics to study behavior of human musculoskeletal system. Materials science of bone, muscle, tendon are integrated into static and dynamic analyses of isolated (e.g., foot, arm, and hand) and whole body segment. Prereq: PGY 502, ME 330 or consent of instructor.

BME 685 BIOFLUID MECHANICS. (3) Review of the rheology of circulatory processes in the body. Special emphasis on cardiovascular dynamics; pulsatile pressure and flow; vascular impedance, wave propagation/reflection, cardiac dynamics. Special topics. Lecture, three hours with periodic lab demonstrations. Prereq: Undergraduate engineering degree or consent of instructor.

BME 690 RESEARCH IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3) Individual study related to a special research project. Intended for M.S. candidates who want a research project experience independent of their M.S. thesis work. This course cannot be used to satisfy residency credit requirements. Lecture, 1-3 hours; laboratory, 3-6 hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor and graduate standing in BME.

BME 699 SPECIAL TOPICS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3) Special topics in biomedical engineering, addressed primarily in a lecture/discussion format. Presentation of focussed or specialized topics that are not available in standard courses. Lecture, three hours; laboratory, 0-2 hours per week. May be repeated to a maximum of nine credits. Prereq: Consent of instructor and graduate standing in BME.

BME 748 MASTER'S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

BME 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

BME 766 MANAGEMENT OF TECHNOLOGY. (3) Successfulness in developing new technologies relies upon knowing which technology advance, the ultimate scientific limits of that technology, and the forecasted rate of technological change. This course presents curricula that explore the direction of technological change and how this affects the rate and extent of innovation.

BME 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

BME 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

BME 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12) May be repeated indefinitely.

BME 772 SEMINAR. (0) Review of current literature in the field of biomedical engineering, general discussion and presentation of papers on research in biomedical engineering. Lecture, one hour per week. Required for all graduate students in biomedical engineering.

BME 774 GRADUATE BME SEMINAR. (0-1) Scientists and engineers present current research in their own biomedical research. Students are required to prepare for and deliver a seminar on their own research. May be repeated to a maximum of 4 credits. Prereq: Graduate standing in Biomedical Engineering or consent of instructor.

BME 777 ADVANCED STUDY PROJECT. (3) This is an independent study project, topic to be selected in consultation with the instructor. Purpose is to integrate all materials learned in the program and apply these principles to the solution of an actual problem in biomedical engineering technology. Prereq: Permission of instructor and completion of year 1 PBME studies.

BME 781 SPECIAL PROBLEMS IN BIOMEDICAL ENGINEERING (Subtitle required). (1-3) Discussion of advanced and current topics in biomedical engineering. Individual work on research problems of current interest. May be repeated to a maximum of nine credits. Lecture/ laboratory hours, variable. Prereq: Approval of instructor.

BME 790 RESEARCH IN BIOMEDICAL ENGINEERING. (1-9) Graduate research in any area of biomedical engineering, subject to approval of the Director of Graduate Studies. May be repeated to a maximum of nine hours. Prereq: Consent of the Director of Graduate Studies.

BSC Behavioral Science

BSC 331 BEHAVIORAL FACTORS IN HEALTH AND DISEASE. (3) The study of human behavior relating to health and disease and the organization of health care as a social system. Selected concepts from the psychological and social sciences are presented in a biobehavioral frame of reference and applied to the consideration of specific problems.

BSC 534 ETHICS AND RESPONSIBILITY IN CLINICAL RESEARCH. (3) Clinical scientists need a sound understanding of the ethical principles guiding the conduct of research projects. This course will address issues relevant to ethically sound study design, responsible conduct of research and scientific misconduct. Students will also complete human subjects protection training and learn to conduct research in an ethical manner. During this course, students will engage in both in-class lecture and discussion sessions as well as out-of-class learning activities (outlines below). The final project for graduate students for this course will serve as a practical application of what is learned during the course to students’ stated research interest. The goal of this course is to provide an overview of ethical considerations when conducting and reporting clinical research, as well as to provide experience in the practice and application of ethics to clinical science.

BSC 620 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1) This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy under discussion at the University Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as CPH 841.)

BSC 625 SURVEY OF HEALTH PSYCHOLOGY. (3) A survey of the field of health psychology. It will explore the ways in which social and psychological research contribute to an understanding of health and illness behavior. Prereq: Graduate or professional standing and consent of instructor. (Same as PSY 626.)
BSC 731 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE. (3)
This course will introduce the student to the major methods and technologies of clinical and translational science. The course will consist of 14 presentations followed by open discussion of the presentation and assigned readings by class members. The location of classes may change based on the content of the lecture. Homework assignments will provide experiential opportunities to work with the various methods and technologies. Active participation is expected. Each weekly presentation is designed to provide a general overview of a method or technology commonly used in clinical and translational science. Discussions are intended to integrate the information across traditional disciplinary boundaries. Homework assignments are designed to provide practical experience with the discussion topic. Prereq: Graduate standing. (Same as CPH 669.)

BSC 732 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (2)
This course is designed to orient students to leadership and teamwork processes involved in clinical and translational research and to train students to function effectively in team settings. Students will be assigned to multidisciplinary teams with a designated principal investigator. Each team will be assigned to develop an integrated multidisciplinary grant application to address an assigned clinical research topic. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to the grant application. The course will consist of four class periods. The first three classes will consist of an orientation to communication and the role of leadership and teamwork in multidisciplinary clinical and translational research. The final class period will be reserved for a teams organizational meeting. Supplemental team meetings are optional. Each team member will be required to complete an individual five-page research manuscript report, which is integrated into a multidisciplinary research application addressing a clinical research topic assigned to the team under the direction of an assigned principal investigator. Prereq: Graduate standing. (Same as CPH 670.)

BSC 733 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE. (1)
This seminar course is designed to orient students to clinical and translational research community and activities at the University of Kentucky and to incorporate a multidisciplinary cooperative approach to clinical and translational research. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to ongoing discussions. The course will consist of seven evening seminars focusing on different topics of clinical and translational research. Students will be required to present a description of their research interests and activities during one seminar. Homework assignments will require students to summarize the key elements of each seminar as related to clinical and translational research and the relevance of these issues to their own research interests and career plans. Active participation by all members is expected. Prereq: Graduate standing. (Same as CPH 671.)

BSC 745 RESEARCH METHODS IN MEDICAL BEHAVIORAL SCIENCE. (3)
This is an applied methods course which will review the various aspects of research and apply them to current medical behavioral studies. The different approaches used by the behavioral and clinical sciences will be reviewed and demonstrated. Prereq: Any methods courses required for a Ph.D. in the department major.

BSC 746 RESEARCH ETHICS AND DILEMMAS. (3)
This class will utilize case studies for debate, class participation, and papers to help students gain skills in critical research, ethical reasoning, responsible conduct of research, and methods and technologies of clinical and translational science. Prereq: Consent of instructor. (Same as PSY/SOC 776.)

BSC 750 AGING, HEALTH AND DECISION MAKING. (3)
This is a doctoral level seminar that provides an overview of behavioral decisional theories (e.g., rational choice, multiattribute utilities models, naturalistic decision-making, ethnographic decision models, Janis and Mann's conflict theory, information processing theory, heuristic models, process tracing models, etc.) and examines research applications of those theories to the health of older adults. Research focuses on decision made by physicians, older adults, family caregivers and policy makers. A variety of approaches include such decision domains as preventative screening, retirement and financial planning, other medical treatments, self-care, seeking medical care, institutionalization, end-of-life, etc.

BSC 763 WOMEN'S TRAUMA AND MENTAL HEALTH. (3)
This course will examine the research on intimate partner violence, mental health, and substance abuse among women. Clinical and legal interventions will also be discussed. Although knowledge of at least basic statistics would be helpful, it is not required for this class.

BSC 764 SEMINAR IN HEALTH INEQUITIES. (3)
This course is designed to critically examine undeniable inequities in the distribution of morbidity and mortality. Students explore linkages between disease burdens and the social, economic, and cultural contexts of our rapidly changing world by integrating local, national and international perspectives from social and biomedical sciences. Prereq: Graduate study in the social sciences and permission of the instructor.

BSC 765 RESEARCH PROBLEMS IN MEDICAL ANTHROPOLOGY. (3)
(1) Advanced history and theory of medical anthropology; (2) research design, field work, analysis of data in medical anthropology. Prereq: Consent of instructor. (Same as ANT 765.)

BSC 766 CONCEPTS IN MEDICAL SOCIOLOGY. (3)
A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as SOC 766.)

BSC 770 PSYCHOSOCIAL ISSUES IN HEALTH AND AGING. (3)
This course will focus on psychosocial issues related to the physical health and functioning of older adults. Topic areas include: theories of aging; age-appropriate research designs; age-related cognitive personality, social and family changes which influence physical health, health behavior and education of older adults; and selected chronic conditions, e.g., Alzheimer's disease, arthritis, depression, diabetes, and stroke.

BSC 772 TOPICAL SEMINAR IN MEDICAL BEHAVIORAL SCIENCE. (1-3)
A selected study of selected topics of current importance in medical behavioral science. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

BSC 773 PSYCHOSOCIAL ONCOLOGY. (3)
This course will introduce the student to the field of psychosocial oncology. Historical and recent developments in the application of behavioral science knowledge and methodology to the understanding and treatment of cancer and the cancer patient will be examined. The role of psychosocial factors in the etiology, prevention, and treatment of cancer will be explored. Emphasis will be placed upon the interaction of biological, psychological, and social factors throughout the course of cancer. Prereq: Graduate standing.

BSC 774 FOOD AND FOOD SECURITY IN A CHANGING WORLD. (3)
This cross-cultural seminar explores the biocultural interactions among food, human biology, and the social, cultural, political and economic factors that shape food-related behaviors and nutritional status of populations. Topics include the social role of food, food beliefs and ideology, the political economy of malnutrition, development strategies and food security, and methods in nutritional anthropology research. Readings and discussions are research focused and approaches issues from a variety of theoretical perspectives. Prereq: ANT 601 or consent of instructor. (Same as ANT 774.)

BSC 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/SOC 776.)

BSC 777 SEMINAR IN MENTAL ILLNESS CONCEPTS, RESEARCH AND PRACTICE. (3)
Advanced study of contemporary concepts of mental health and mental illness, and their historical development; major forms of response to mental illness. Prereq: Consent of instructor. (Same as SOC 777.)

BSC 778 BEHAVIORAL FACTORS IN SELECTED DISEASES. (3)
An exploration of behavioral science concepts which bear on various physical illnesses. The perspective of the course is interdisciplinary, using concepts from the various behavioral science disciplines. Prereq: Consent of instructor.

BSC 779 BEHAVIORAL FACTORS IN DEATH AND DYING. (3)
Behavioral concepts are examined which explain reactions of individuals, collectivities and social institutions to the phenomenon of death. Prereq: Consent of instructor.

BSC 782 WOMEN'S HEALTH AND AGING. (3)
This course explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as GRN 782.)

BSC 785 COMPARATIVE HEALTH CARE SYSTEMS. (3)
This seminar will focus on concepts, issues, and research pertaining to health care systems in comparative perspective. It will deal with the following questions. (1) What are the core analytical dimensions of a health care system? (2) How do health care systems connect with the other institutional domains of a society, with its value-system, and with its major cultural and historical trends? (3) Within the health care system, how are the main constituents of modern medicine related to each other? Prereq: Consent of instructor. (Same as SOC 785.)

BSC 787 BIOBEHAVIORAL PERSPECTIVES ON DRUG AND ALCOHOL ABUSE AND DEPENDENCY. (3)
This seminar course is designed to survey major topics, concepts and issues pertinent to the field of drug and alcohol abuse and dependence. The course will consist of 14 weekly presentations by instructors followed by open discussion of the presentation and assigned readings by class members. Active participation by all members is expected. Each weekly presentation is designed to provide a general overview of the current state of knowledge (e.g., theory, methods, ethics, review of classic and/or exemplary studies) in a given area of drug and alcohol abuse and dependence research. Discussions are intended to integrate the information across traditional disciplinary boundaries. Prereq: Graduate standing.

BSC 788 DRUG ABUSE: CONTEMPORARY THEORIES AND ISSUES. (3)
This course is designed to familiarize students with major concepts and current issues in the field of substance abuse research.
Course Descriptions

**BSC 790 RESEARCH IN MEDICAL BEHAVIORAL SCIENCE.** (1-6)
Individually directed research and reading in particular aspects of medical behavioral science under the supervision of one or more members of the faculty. May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

**BSC 814 PATIENTS, DENTISTS AND SOCIETY I.** (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as CDE 814.)

**BSC 815 FIRST-YEAR ELECTIVE, BEHAVIORAL SCIENCE.** (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

**BSC 824 COMMUNICATION IN THE DENTAL HEALTH CARE SETTING.** (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second year standing in the College of Dentistry. (Same as CDE 824.)

**BSC 825 SECOND-YEAR ELECTIVE, BEHAVIORAL SCIENCE.** (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Behavioral Science. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

**BSC 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth-year College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
- BSC 850 ELECTIVE IN BEHAVIORAL SCIENCE
- BSC 880 TREATMENT OF DENTAL FEAR

**BST Biostatistics**

**#BST 330 STATISTICAL THINKING FOR POPULATION HEALTH.** (3)
This course provides students with an introduction to statistical concepts that are important for solving real-world public health problems. This course will present statistical principles and associated scientific reasoning underlying public health practice and health policy decision making. Prereq: UK Core course in Quantitative Foundations.

**#BST 639 COMPUTING TOOLS FOR THE BIOMEDICAL SCIENCES.**

**#BST 655 INTRODUCTION TO STATISTICAL GENETICS.** (3)
BST 655 presents an introduction to the statistical methodologies used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used (and freely available) software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical human genetics literature. Prereq: STA 580 or equivalent. (Same as STA 655.)

**BST 675 BIOMETRICS I.** (4)
This course, the first of a two-semester sequence in biometrics, introduces probability, discrete random variables, continuous random variables, joint distributions, and sampling distributions. Prereq: STA 580 and MA 114 or equivalent.

**BST 676 BIOMETRICS II.** (4)
This course, the second of a two-semester sequence in biometrics, introduces techniques for constructing and evaluating point estimators, hypothesis testing procedures, and interval estimators. Prereq: BST 675.

**#BST 681 LINEAR REGRESSION.** (3)
This course, the first in a two-semester sequence in regression modeling, covers linear regression models for normally distributed outcomes. The course will cover simple and multiple linear regression, estimation, interpretation, hypothesis testing, model building and diagnostics, matrix algebra for regression, and an introduction to design of experiments. The course will include the use of computing tools to apply these models to real data. Prereq: STA 580 or consent of instructor.

**#BST 682 GENERALIZED LINEAR MODELS.** (3)
This course, the second in a two-semester sequence in regression modeling, covers regression models for outcomes which are not normally distributed, such as binary and count data. The course will cover the generalized linear model framework, multivariate maximum likelihood theory, logistic regression, Poisson regression, and ordinal and ordinal logistic regression models, as well as approaches for building and checking these models. The course will include the use of computing tools to apply these models to real data. Prereq: BST 675, BST 681.

**#BST 701 BAYESIAN MODELING IN BIOSTATISTICS.**
This course provides an introduction to Bayesian ideas and data analysis applied to the biosciences. The course illustrates current approaches to Bayesian modeling and computation in biostatistics. Prereq: BST 682 and BST 676 or equivalent.

**#BST 713 CLINICAL TRIALS.**
Design and analysis of Phase I-III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalency, mixed models, and meta analysis. Coreq: STA 603. (Same as STA 653.)

**#BST 740 SPATIAL STATISTICS.**
Course will cover risks and rates, types of spatial data, visualizing spatial data, analysis of spatial point patterns, spatial clustering of health events based on case control studies, and based on regional counts, linking spatial exposure data to health events through regression modeling. Bayesian spatial analysis. Prereq: BST 682.

**#BST 760 ADVANCED REGRESSION.**

**#BST 761 TIME TO EVENT ANALYSIS.** (3)

**#BST 762 LONGITUDINAL DATA ANALYSIS.** (3)
This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models, and an introduction to non-linear models as they apply to the analysis of correlated data. Prereq: BST 682 and BST 676. (Same as STA 663.)

**#BST 763 ANALYSIS OF CATEGORICAL DATA.** (3)
Multinomial and product-multinomial models; large-sample theory of estimation and testing. Pearson chi-square and modified chi-square statistics, Pearson-Fisher Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as STA 665.)

**#BST 764 APPLIED STATISTICAL MODELING FOR MEDICINE AND PUBLIC HEALTH.** (3)
This course introduces some useful statistical models not typically encountered in the core courses of a master’s or doctoral biostatistics curriculum. These include finite mixture models, nonparametric regression models, covariance-based models, and stochastic models. Prereq: BST 682 and BST 676.

**#BST 765 MISSING DATA METHODOLOGY FOR PUBLIC HEALTH.** (3)
This course surveys methods for analyzing data with missing observations. This includes models for data missing completely at random, imputation of missing data using complete case analysis, and single imputation; methods for data missing at random including multiple imputation and weighted estimating equations and methods for data missing not at random including pattern mixture models, selection models, and shared random effects models. Prereq: BST 676 and BST 762.

**#BST 766 ANALYSIS OF TEMPORAL DATA IN PUBLIC HEALTH.** (3)
This course surveys methods for analyzing public health data collected over time. Methods covered include smoothing time series data; the modeling of stationary time series for Gaussian, dichotomous, and case count responses; methods for detecting the clustering of disease over time, and methods for the surveillance of infectious diseases in real time. Prereq: BST 682 and BST 676.

**CDE Community Dentistry**

**#CDE 814 PATIENTS, DENTISTS AND SOCIETY I.** (1)
This course aims to orient the student to the place health and health professions play in modern cultures. Recognition of their own social assumptions and values and those of persons of different backgrounds is encouraged. Understanding, predicting, and changing dental patient behavior from a social standpoint is emphasized. (Same as BSC 814.)
CDE 815 Fundamentals of Dental Public Health. (2)
Fundamentals of Dental Public Health is a first-year course designed to introduce student dentists to the dental specialty of Dental Public Health, to dental epidemiological concepts, terminology, and methods used in population-based health care. Community oral health problems in Kentucky and the United States will be reviewed. Emphasis will be placed on public health research, programming, and outcome evaluation strategies related to oral disease in populations. Lecture, 28 hours; laboratory, 3 hours.

CDE 824 Communication in the Dental Healthcare Setting. (1)
This course aims to improve the student’s ability to communicate with patients and the public in an empathetic and professional manner. Methods of obtaining necessary health information from all types of patients are taught. Prereq: Second-year standing in the College of Dentistry. (Same as BSC 824.)

CDE 830 Advanced Concepts in Dental Public Health. (2)
The American Dental Association’s Principles of Ethics and Code of Professional Conduct state that the dentist has a “primary duty of service to the public.” The Dental Public Health Curriculum is designed to prepare students to assume this obligation. The student will acquire a basic understanding of the scientific method through course work in epidemiology, research design, and evaluation of scientific literature. This basis of knowledge will provide the basis for the planning and evaluation of community-based preventive dental programs. The student will understand the dental delivery system and the variety of financing mechanisms that are available to meet the dental needs of specific population groups. To provide a framework for the dental student’s professional development, the instructional content in dental public health will be coordinated with CDE 841 (Community-Based Dental Education). helping the student to prepare for the extramural learning experience. Prereq: Admission to the College of Dentistry or consent of course director.

CDE 840 Advanced Course on the Treatment of Special Patients. (1)
In this course, dental students participate in preclinical seminars and dental treatment of mentally, medically and physically handicapped patients. Several phases of dental treatment of the special patient, such as sedation and general anesthesia, pharmacological evaluation and preventive dentistry, are covered. The course is individually designed based on the student’s interest in treating compromised patients. Note: Scheduling for this course will take place outside of regularly scheduled clinic class time. Enrollment minimum is one and maximum enrollment is four. Prereq: Fourth-year standing, consent of Course Director, Academic Performance Committee (APC), and Team Leaders.

CDE 841 Dental Practice Field Experience. (6-10)
Students are provided a full-time off-campus assignment to a dental practice environment for a period of 6-10 weeks. Students spend an average of 32 hours each week participating in practice management and patient treatment activities under the supervision of a dentist. Approximately eight hours a week are spent in career plan development and in study of the community or region, particularly its healthcare delivery system and the role of dentistry in that system. Prereq: CDE 830.

CDE 844 Dental Practice Management II. (4)
This course is primarily designed to give the student-dentists, prior to graduation, practical, useful knowledge on establishing and maintaining a private dental practice. The course will be presented in an active learning format. Course sessions and activities will also include special sessions designed to introduce students to the current environment of dental practice, to organize dentistry in Kentucky, to the College’s Alumni Association and to new developments and continuing education in the dental profession. Lecture 69 hours. Prereq: CDE 830 or consent of course director.

CDE 850 Extramural Experiences for Student Dentists. (1-6)
This course is designed to provide second and/or third-year student dentists an experiential learning experience in a research program, clinical program, public health program, and/or institutional dental program. Career planning and service-learning are emphasized and coordinated with placement in a community-based site. Fourth-year students may also participate in elective experiences with the approval of the Academic Performance Committee (APC). Students learn by active participation in patient care and/or research, by observation and by discussion with mentors. Discussions and interviews with patients and dental residents and staff are also encouraged. This course provides an opportunity for selected students, based on their own career goals, to participate in short-term elective dental educational experiences external to the student dentists' clinics. While the sites vary greatly, most experiences include some patient care experiences (observation, assisting, direct participation in patient care under the direct supervision of an approved mentor). Extramural experiences are customized for each student dentist. If completed as an elective in Year 3 of the curriculum this does not satisfy the Year 4 elective requirement. Prereq: Getting a passing score on the National Board.

CDE 855 Public Health Dentistry Field Experience. (1-2)
This course allows implementation of oral health promotion programs designed in CDE 830 in community settings. Prereq: Must be fourth-year dental student.

CDE 880 Treatment of Dental Fear. (1)
This advanced course in the treatment of dental fear is intended to prepare the student to manage very fearful dental patients. Topics covered include etiologies, diagnosis and types, relaxation and distraction, and basic physical and psychological techniques. Students will take part in regularly scheduled clinic class time. Prereq: CDS 823 and consent of course director. (Same as BSC 880.)

CDE 883 Community-Based Service Elective. (1-5)
This Community-Based Service elective is designed to give students greater opportunities to provide dental services to diverse, underserved populations. The goals of this course are to expand development of a service ethic and to meet some of the needs of populations who do not have access to dental care. The majority of the time requirements for this course will be rotations to community clinics where students will work under the supervision of a College of Dentistry faculty providing dental services. Individual contracts will be developed with participating students to determine credit hours. In addition, there will be two one-hour seminars to discuss and debrief on the experiences of participating students. Prereq: Completion of year two of dental school curriculum and/or approval of College of Dentistry APC.

CDE 884 International Elective. (1-3)
This community-based service learning elective is designed to afford students greater opportunities to provide a broad spectrum of dental educational, clinical and public health services to diverse, underserved populations in an international setting. The majority of the time requirements for this course will be in a foreign country at designated community sites potentially working with other health care professionals. Activities will include but are not limited to assessing both community and patient needs and providing services based on the needs assessment and community goals. Students will work with UK approved organizations and under the direct supervision of a College of Dentistry faculty while in-country. Prereq: Admission to College of Dentistry.

CDS Conjoint Dental Science

CDS 611 Child Growth and Development Part I. (2)
A seminar course on the nature and physiologic control of physical growth, for graduate students in dentistry. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 612 Child Growth and Development Part II. (2)
A seminar course for graduate students in dentistry covering emotional and intellectual growth of children, and diseases and congenital anomalies of children. Prereq: Admission to graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

CDS 613 Contemporary Leadership in Dentistry. (1)
The course will explore the current leadership dilemma in the health professions (specifically). The purpose is to prompt the extension of the role of oral health professionals to serve as leaders who engage in a richer “public good” agenda as part of their role as doctor/teacher. The course will concentrate on important issues such as leadership development and theories of leadership: team building; personality preferences and leadership; peer assessment; transformational and transactional leadership; stress management; leading change; negotiation; and giving and receiving feedback. Prereq: Enrollment in one of the College of Dentistry’s post-doctoral programs.

CDS 631 Diagnosis and Management of Temporomandibular Disorders and Orofacial Pain. (1)
This course provides information regarding the normal anatomy and function of the masticatory system and then highlights some of the common disorders related to dysfunction of this system. Emphasis is placed on temporomandibular disorders and how they are identified and managed in the clinical practice. Other disorders associated with orofacial pain complaints will be discussed so that students are able to identify these conditions and successfully manage them or refer the patient to the appropriate health care provider. Prereq: Admission to dental graduate program; D.D.S. or D.M.D. degree.

CDS 660 Research Design, Methods and Dissemination. (2)
This lecture/seminar course is designed to provide students with an overview of the basic principles of study design and protocol development, with a focus on clinical and translational research. It also is designed to expose students to the interplay between patient care and clinical/translational research and to provide the students with tools that will assist them in dissemination of their research findings. Prereq: Admission to dental graduate program.

CDS 670 Advances in Oral and Maxillofacial Pathology. (1)
This course consists of 16 hours of lecture on the major disease topics in Oral and Maxillofacial Pathology including oral mucosal, salivary gland and bone pathology. Current classifications of these major categories will be presented and selected topics of current importance will be discussed. Prereq: Admission to dental graduate program.

CDS 680 Clinical Medicine for Postgraduate Dental Students. (2)
This course is designed to provide graduate students and dental residents with an advanced understanding of how various medical disorders and medical therapies can affect oral health and the delivery of dental care. Prereq: Admission to dental graduate program.

CDS 746 Master’s Thesis Research. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CDS 768 Residency Credit for the Master’s Degree. (1-6)
May be repeated to a maximum of 12 hours.
Course Descriptions

CDS 810 NEW DEVELOPMENTS IN DENTISTRY I. (1-2)
This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. Methods of instruction will vary, depending on topics. When offered, this course will be required of first-year dental students. May be repeated to a maximum of four credits. Prereq: First-year standing in the College of Dentistry; any course prerequisite will be announced.

CDS 812 NORMAL HUMAN GROWTH AND DEVELOPMENT. (1)
This is a lecture course which introduces basic concepts of normal human growth and development from birth through adolescence. Lectures emphasize the time-dependent changes that normally occur during physical and psychological maturation. A special emphasis is directed toward basic knowledge and understanding of craniofacial growth and development of the teeth and occlusion. Lecture, 22 hours. Prereq: Admission to the College of Dentistry or consent of course director.

CDS 813 MANAGEMENT I: INTRODUCTION TO MANAGEMENT FOR THE DENTIST. (2)
In this introductory course in management for the dentist, basic concepts will be presented which can be applied in the management of time, people, facilities and money. Instruction leading to certification in cardiopulmonary resuscitation is included. Lecture, 45 hours. Prereq: Admission to the College of Dentistry.

CDS 815 INTRODUCTION TO CLINICAL AND COMMUNITY PRACTICE. (3)
This survey course presents an introduction to the dental field of operation (operator), basic assisting procedures, preventive dentistry, infection control, application of sealants and oral isolation techniques. It is designed to prepare students to function in dental environments, safely and effectively, and to provide them with the skills and knowledge necessary for the efficient and safe performance of care offered in CDE 815, Fundamentals of Dental Public Health. Lecture, 21 hours; lab, 20 hours; clinic, 16 hours. Prereq: Admission to the College of Dentistry or consent of the course director.

CDS 816 THE PROFESSION OF DENTISTRY. (1)
This course is an introduction to life in the profession of dentistry. The course will explore normal everyday morality, and consider whether a case can be made for an extraordinary morality or ethic for practitioners. The course will conclude with a brief review of the history of dentistry to enable the student to place the profession of dentistry in cultural and historical perspective. Prereq: Admission to the College of Dentistry.

CDS 818 THE PROFESSION OF DENTISTRY I. (1)
This course is an introduction to life in the profession of dentistry. The course will explore normal everyday morality, and consider whether a case can be made for an extraordinary morality or ethic for practitioners. The course will conclude with a brief review of the history of dentistry to enable the student to place the profession of dentistry in cultural and historical perspective. Prereq: Approval of dean and/or his designee for academic affairs and the course director.

CDS 819 SPECIAL TOPICS IN DENTISTRY. (1)
This course will have first-year dental students consider important social, educational, and professional issues they will encounter during dental school and in their careers. The topics range from cultural diversity, professional and academic responsibility, sexual harassment awareness, minority health and related issues, to time management, personality type, and learning/teaching styles. Prereq: First-year standing.

CDS 820 NEW DEVELOPMENTS IN DENTISTRY II. (1-2)
This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. Methods of instruction will vary, depending on topics. When offered, this course will be required of second-year dental students. May be repeated to a maximum of four credits. Prereq: Second-year standing in the College of Dentistry; any course prerequisite will be announced.

CDS 821 LOCAL ANESTHESIA. (1)
The action and dosage of local anesthetic agents used in dentistry is taught as are the proper injection techniques. The technique of venipuncture and administration of intravenous drugs are also included. Patient evaluation and emergency techniques for cardiac and respiratory resuscitation are reviewed. Lecture, six hours; self-instruction, 10 hours; clinic, five hours. Prereq: ANA 534; corequisite: OBI 822.

CDS 822 GERIOTRONOLOGY/GERIATRIC DENTISTRY. (1)
This course is designed to help students gain an appreciation for the significant opportunities as well as challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

CDS 823 MANAGEMENT II: PATIENT COMMUNICATION. (1)
The primary purpose of this course is to improve students’ ability to interact with patients in an empathetic and professional manner. Proper management of all assigned patients is required. Instruction leading to certification in cardiopulmonary resuscitation is provided. Lecture, 26 hours; Prereq: CDS 821 or consent of course director.

CDS 824 INTRODUCTION TO ORAL DIAGNOSIS AND TREATMENT PLANNING. (2)
This course presents the rationale for the development of the University of Kentucky College of Dentistry Preliminary, Phase I and Phase II treatment plans and a method of critically evaluating treatment results. Basic UKCD clinical protocol is presented and discussed. Lecture, 25 hours. Prereq: CDS 815 or consent of course director.

CDS 825 THE PROFESSION OF DENTISTRY II. (1)
This course focuses on ethical practice in clinical dentistry. In the life of a health-care clinician circumstances arise daily which are ethical in nature. The dentist, and the patient, must respond to these circumstances in ways that result in the best for all parties concerned. This course will explore the duties and responsibilities of dentists in becoming a provider of oral health care for patients. In doing so, the major question will be asked, “How do dentists interact with their patients for the good of both?” Prereq: Approval of dean and/or his designee for academic affairs and the course director.

CDS 830 NEW DEVELOPMENTS IN DENTISTRY III. (1-2)
This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. When offered, this course will be required of third-year dental students. May be repeated to a maximum of four credits. Prereq: Third-year standing in the College of Dentistry; any course prerequisites will be announced.

CDS 831 CONSCIOUS SEDATION. (1)
This course is designed to teach the principles of nitrous oxide-oxygen inhalation sedation and intravenous sedation in dentistry. The management of emergencies associated with these techniques as well as principles of general anesthesia are also included. Lecture, 21 hours; clinic, four hours. Prereq: CDS 821, OBI 824.

CDS 833 CLINICAL PATIENT MANAGEMENT. (1)
This course introduces the dental student to various special needs conditions and teaches the proper methods of physical management of special needs patients needed to provide dental care. Proper management of all assigned dental patients is required. Instruction leading to recertification in cardiopulmonary resuscitation is also included. Lecture, 26 hours; laboratory, 3 hours; clinic, 3 hours per term. Prereq: CDS 823.

CDS 835 DENTAL IMPLANTOLOGY. (2)
Dental implantology has become an integral part of dental services. This course contains information on patient centered criteria for implant services, surgical considerations, and prosthetically driven treatment results. The student will have the opportunity to familiarize him/herself with the components used in providing such treatment through a hands-on laboratory session. Lecture, 24 hours; laboratory, 12 hours. Prereq: Admission to College of Dentistry or discretion of course director.

CDS 838 THE PROFESSION OF DENTISTRY III. (1)
This course is an introduction to the issues of justice and how we define, appropriate, and ensure justice today. The ethical principle of justice is the touchstone for American law, and a vision for our judiciary system. While dentists, as members of society, comply with laws in a way common to all other citizens, they also have additional legal responsibilities which derive from the unique relationship dentist and dentists have with society generally and patient specifically. This course will explore the relationship of dentistry to society and attempt to explicate further the nature of professional responsibilities. In so doing, the major question will be asked, “How do society and dentistry interact for the good of the public and the profession?” Prereq: Approval of dean and/or his designee for academic affairs and the course director.

CDS 840 NEW DEVELOPMENTS IN DENTISTRY IV. (1-2)
This course will cover selected new developments in dentistry or treat with added emphasis established dental skills and knowledge. The topics will be in such areas as the basic sciences, behavioral science, clinical dentistry, dental practice management, and community dentistry. Methods of instruction will vary, depending on topics. When offered, this course will be required of fourth-year dental students. May be repeated to a maximum of four credits. Prereq: Fourth-year standing in the College of Dentistry; any course prerequisites will be announced.

CDS 843 MANAGEMENT IV: GERIATRIC DENTISTRY. (1)
Emphasis in this course is placed on developing abilities to make individual treatment decisions for elderly dental patients and attaining positive attitudes toward the provision of oral health care to the aged. Students will make site visits to residential centers for the elderly. Proper management of all assigned dental patients and instruction leading to recertification in cardiopulmonary resuscitation is provided. Lecture, 23 hours; laboratory, 12 hours. Prereq: CDE 810 and CDS 833 or consent of course director.

CDS 844 DRUG MISUSE, ABUSE AND DEPENDENCY: WHAT DENTISTS NEED TO KNOW. (1)
This course is designed to provide new insights and understanding into prevention, recognition and treatment of patients with, and at risk for, drug misuse and abuse. The course enables dental students to understand addiction as primary, chronic and progressive disease and to develop an understanding of the pharmacology, abuse potential, as well as the behavioral and physiological effects of the commonly abused drugs. Emphasis will be on increasing dental students skills and abilities to recognize the signs and symptoms of drug abuse; identify and manage patients at risk for drug problems; and become effective in providing successful care for drug dependent patients while minimizing their potential for relapse.
University of Kentucky

**Course Descriptions**

### CE Civil Engineering

**CE 106 COMPUTER GRAPHICS AND COMMUNICATION. (3)**
Introduction to the use of scale, dimensioning, and orthographic projections. Graphical solution of spatial problems. Integrated application of computer graphics. Lecture, two hours; laboratory, four hours per week. Prereq or coreq: MA 113 or consent of instructor.

**CE 120 INTRODUCTION TO CIVIL ENGINEERING. (1)**
An introduction to the civil engineering profession and the use of computer hardware and software in CE systems analysis and design. Presentations will be used to illustrate the conception, design, construction, and operation processes. Sample problems and class exercises on the various technical areas of civil engineering will make use of existing computer software packages and teamwork principles.

**CE 195 INDEPENDENT WORK IN PRE-CIVIL ENGINEERING. (0-4)**
Independent or make-up work for lower division engineering students in the field of civil engineering. May be repeated for a maximum of four credit hours. Prereq: Admission to the College of Engineering and consent of department chair or DUS, and the instructor.

**CE 211 SURVEYING. (4)**
A comprehensive course in the art and science of surveying as applied to civil engineering, including the use and care of surveying instruments; measurement of horizontal and vertical distances, angles and directions; collection of ground and underground data for the design and layout of roads, buildings, various mineral workings and other structures; and some aspects of the precise determination of position and direction for survey control. Lecture, three hours; laboratory, three hours per week. Prereq: CE 106 and MA 114.

**CE 221 APPLIED UNCERTAINTY AND RISK ANALYSIS IN CIVIL ENGINEERING. (3)**
An introduction to the applications of uncertainty, reliability, decision, and risk analysis in civil engineering. Data collection, systems analysis, and civil engineering design under uncertainty. Probabilistic analysis applied to the various areas of civil engineering: geotechnical, transportation, environmental, materials, structural, hydraulic, and water resources engineering. Civil engineering systems governed by random processes. Applications of mathematics software, Monte Carlo simulation, and time series in civil engineering. Prereq: MA 114.

**CE 303 INTRODUCTION TO CONSTRUCTION ENGINEERING. (3)**
The study of the planning, administration, management, and cost of construction projects and an introduction to the methodology utilized in executing specific designs. Emphasis is placed on the organization of construction firms, development of construction documents, theory of engineering economics, estimating and quantity take-off, contractual and management systems, scheduling, project administration, and inspection of construction operations. Prereq: CE 106 and engineering standing.

**CE 321 CIVIL ENGINEERING SYSTEMS. (3)**
An introduction to basic principles of engineering problem solving with applications to civil engineering systems. Formulation and solution of inductive and deductive mathematical models using principles of numerical analysis and mathematical programming. Prereq or concord: CS 221.

**CE 329 CIVIL ENGINEERING COMMUNICATIONS AND TEAMS LAB. (1)**
The course focuses on presenting the proper tools and techniques for oral presentations, identifying the requirements for proper technical writing, and providing students with the means to effectively work within a team environment. Prereq: CIS 111 Comp and Comm II; Engineering standing.

**CE 331 TRANSPORTATION ENGINEERING. (3)**

**CE 341 INTRODUCTION TO FLUID MECHANICS. (4)**
Fundamental principles of thermodynamics and fluid flow. Includes fluids at rest, fluids in motion. Continuity, momentum and energy relations, ideal and viscous fluids. Emphasis on incompressible fluids. Description of pumps and open channels. Prereq: PHY 231 and MA 214 and engineering standing.

**CE 351 INTRODUCTION TO ENVIRONMENTAL ENGINEERING. (3)**
Overview of environmental chemistry and microbiology, water quality, water and wastewater treatment, solid and hazardous waste management, hazardous waste remediation, and air pollution control. Emphasis on the basic science and engineering principles required to understand both natural and engineered systems, as well as the engineering approach to understanding the natural environment and specific treatment mitigation methods. Prereq: CHE 107, MA 214, PHY 231, and engineering standing.

**CE 381 CIVIL ENGINEERING MATERIALS I. (3)**
A study of the microscopic and macroscopic structures and properties of materials used in civil engineering construction with emphasis on the relationships of their physical and mechanical properties to engineering design and application. Written reports and oral presentation of results will be required. Lecture, two hours; laboratory, three hours per week. Coreq: EM 302 and engineering standing.

**CE 382 STRUCTURAL ANALYSIS. (3)**

**CE 395 INDEPENDENT WORK IN CIVIL ENGINEERING. (1-6)**
Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Engineering standing, consent of department chairperson and the instructor.

**CE 399 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)**
A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 399 number. Prereq: Prereq: Variable; given when topic identified and registration in the College of Engineering.

**CE 401 SEMINAR. (1)**
A discussion of the ethical and professional aspects of civil engineering practice. Concepts of loss prevention and conflict resolution. Structured small group discussion, oral presentations, and role playing. Lecture, two hours per week. Prereq: Senior classification and engineering standing.

**CE 403 CONSTRUCTION METHODOLOGY. (3)**
A study of the methodology used in construction, with an emphasis on the selection and application of resources: labor, materials, equipment, money and time. The importance of cost and quality is stressed. Weekly lab periods are used to acquaint the student with actual construction documents and to provide supervised work sessions in plan reading and basic estimating. Lecture, two hours; laboratory, three hours per week. Prereq: CE 303, CE 381, engineering standing.

**CE 429 CIVIL ENGINEERING SYSTEMS DESIGN. (3)**
The course is designed to provide the graduating civil engineer with an integration of professional practice issues with planning, design, and construction. Topics to be covered will include: development of learning, problem solving, and decision-making skills; development of written and oral technical communication skills; procurement of professional services; integration of planning, design, and construction activities; integration of environmental, legal, political, and social issues and concerns into the project process. All activities will be conducted in teams. Lecture, three hours; laboratory three hours per week. Prereq: To be taken during the student’s last semester.

**CE 433 RAILWAY FREIGHT AND PASSENGER OPERATIONS AND INTERMODAL TRANSPORTATION. (3)**
Study of the transportation engineering aspects of efficient management of railway operations including freight, passenger, and intermodal transportation. Prereq: CE 331 and engineering standing.

**CE 451 WATER AND WASTEWATER TREATMENT. (3)**
Fundamentals of the design and operation of water and wastewater treatment facilities. Prereq: CE 341, CE 351, and engineering standing or consent of instructor.

**CE 460 FUNDAMENTALS OF GROUNDWATER HYDROLOGY. (3)**
The first course in the physics of saturated flow in porous media. Topics include groundwater occurrence, Durcian flow, well hydraulics, flow nets, layered systems flow and pollutant movement. Prereq: ME 330 or CE 341 or consent of instructor, and engineering standing. (Same as BAE 438G.)
Course Descriptions

CE 461G WATER RESOURCES ENGINEERING. (4)
A hydrological and hydraulic study of the laws governing the occurrence, distribution, and movement of water in watershed systems. Meteorological considerations, precipitation, evaporation, infiltration, streamflow, hydrograph analysis, flood routing, open channel hydraulics, culvert design, pump systems, groundwater flow, and frequency analysis. Principles of mathematical models that describe the flow processes in a natural watershed and hydraulic structures. Prereq: CE 341 and engineering standing or consent of instructor.

CE 471G SOIL MECHANICS. (4)
A study of the strength, deformation and hydraulic properties of soils and their relationship to settlement, stress distribution, earth pressure, bearing capacity and slope stability. Design of footing foundations and retaining walls. Written and oral presentations of student projects will be required. Lecture, three hours; laboratory, three hours per week. Prereq: EM 302; precon: GLY 220; and engineering standing or consent of instructor.

CE 482 ELEMENTARY STRUCTURAL DESIGN. (3)
Application of principles of solid mechanics to the design of steel, timber, and reinforced concrete members and structures. Emphasis on basic ideas and their application to practical design of relatively simple structures according to the building code. Credit may not be used to satisfy degree requirements if credit is earned in CE 485G, or CE 486G, or CE 487G. Prereq: CE 382 and engineering standing.

CE 486G REINFORCED CONCRETE STRUCTURES. (3)
Theory and design of beams, slabs, girders and columns as related to building frames and bridges. Introduction to pre-stressed concrete, elastic design and ultimate strength design. Concur: CE 487G; prereq: CE 382 and engineering standing, consent of instructor.

CE 487G STEEL STRUCTURES. (3)
Behavior, analysis, and design of structural steel columns, laterally braced and unbraced beams, column base plates, beam-columns, directly loaded bolted and welded connections. Introduction to frame stability. Introduction to steel/concrete composite beams. Prereq: CE 382 and engineering standing, consent of instructor.

CE 499 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
Devoted to a special topic of current interest in civil engineering. May be repeated to a maximum of eight credits, but not more than four credits may be earned under the same subtitle. A particular topic may be offered at most twice under the CE 499 number. May be counted as technical or design elective with consent of chairman. Prereq: Variable, given when topic is identified, plus engineering standing.

CE 507 CONSTRUCTION SAFETY AND HEALTH. (3)
The course will develop an understanding of safety and health; cost and human impact; hazard and risk analyses; psychological facts of organizational culture and climate; design safe work procedures for the execution of particular types of work; and individual versus management level improvement in safety and health procedures in the construction process. Prereq: Engineering standing and CE 303 or consent of instructor.

CE 508 DESIGN AND OPTIMIZATION OF CONSTRUCTION OPERATIONS. (3)
The course critically examines repetitive operations that occur from project to project and the deterministic approaches used to design and optimize their effectiveness. Scientific techniques used to field measure the efficiency of construction operations are also examined. The primary metrics used to optimization include cost, schedule, and sustainability. Prereq: CE 303, CE 381, and engineering standing or graduate standing.

CE 509 CONTROL OF THE CONSTRUCTION PROJECT. (3)
This course investigates the principles and practices for the control of budget and schedule for construction projects. Topics studied include: estimating construction costs and developing a project budget, planning construction operations and developing a project schedule, documenting and reporting of project progress and spending, and the management of change of contract amount, contract time, and contract scope work. Prereq or coreq: CE 506 or consent of instructor.

CE 517 BOUNDARY LOCATION PRINCIPLES. (3)
Procedures for locating or relocating the boundaries of real property; records searching, technical aspects of field work, preparation of descriptions and survey reports, land data systems, legal aspects, special problems. Prereq: CE 211, engineering standing, or consent of instructor.

CE 518 ADVANCED SURVEYING. (3)
Principles of precise survey procedures in triangulation, trilateration, traverse and leveling; adjustment computations; theory and practice of electronic distance measurement; basic geodesy and state plane coordinate systems; applications to the horizontal and vertical control of engineering projects: review of modern land surveying problems and procedures. Lecture, two hours; laboratory, three hours per week. Prereq: MA 214, CE 211 or CE 215, and engineering standing.

CE 521 ENGINEERING ECONOMY. (3)
Economic evaluation and financial analysis of engineering alternatives in which the goal of economic efficiency is applied to engineering design. Prereq: Engineering standing.

CE 525 CIVIL ENGINEERING APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS. (3)
This course focuses on the application of Geographic Information Systems. The terms and concepts related to Geographic Information Systems are introduced. The management of spatial databases, particularly those related to Civil Engineering, is covered. Students will collect data using a Global Positioning System (GPS). Students will be required to use the GIS ArcInfo to solve a specific individual spatial problem that they propose based on several Civil Engineering databases available to them. Lecture, two hours; laboratory, three hours per week. Prereq: Engineering standing and one of the following: CE 331, CE 341, or CE 471G.

CE 531 GEOMETRIC DESIGN AND OPERATIONS OF ROADWAYS. (3)
Analysis of transportation facilities through a diagnostic study of transportation systems with emphasis on design, capacity and safety. Engineering practice oriented toward open-ended design solutions, mostly focused on roadway design. Prereq: CE 211, CE 331, and engineering standing.

CE 533 RAILROAD FACILITIES DESIGN AND ANALYSIS. (3)
Principles of railroad location, construction, rehabilitation, maintenance, and operation with emphasis on track structure design and analysis, bridges and bridge loading, drainage fieldwork, track geometry effects, and operating systems analysis. Prereq: CE 331, CE 381; CE 382; concur: CE 471G and engineering standing.

CE 534 PAVEMENT DESIGN, CONSTRUCTION AND MANAGEMENT. (3)
Design, analysis, construction, and management of flexible and rigid pavements. Stresses and strains, pavement materials, subgrade soil stabilization, bases and subbases, quality control, drainage, pavement-type selection, and pavement management. Prereq: CE 381, prerequisite or concurrent CE 471G, and engineering standing.

CE 539 TRANSPORTATION SYSTEMS DESIGN. (3)
This course focuses on the design of urban intersections and the procedures used to evaluate the operational level of urban roadway systems. First, a review of urban intersection design principles and aspects is presented. Second, traffic signal timing techniques are reviewed and students are required to use two software packages for evaluation of traffic operation of urban roadway systems. The focal point of the course is a group design project where solutions to accommodate all transportation modes and their issues along a corridor in Lexington are sought. Fieldwork and data collection are part of this course. Lecture, two hours; laboratory, one hour. Prereq: CE 211 and CE 331; CE 531 prerequisite or concurrent.

CE 541 INTERMEDIATE FLUID MECHANICS. (3)
Application of basic fluid mechanics to problems of importance to civil engineering practice. This includes flow measuring, closed conduit flow and pipe networks, open channel flow, turbomachinery (pumps), hydraulic structures, culvert flow. Prereq: CE 341, CS programming course, and engineering standing or consent of instructor. (Same as BAE 541.)

CE 542 INTRODUCTION TO STREAM RESTORATION. (3)
Introduction to principles of fluvial geomorphology for application in restoring impaired streams. Topics include channel formation processes (hydrology/hydraulics), stream assessment, sediment transport, in-stream structures, erosion control, habitat, and monitoring. Prereq: CE 341 (or equivalent) and engineering standing or consent of instructor. (Same as BAE 532.)

CE 546 FLUVIAL HYDRAULICS. (3)
Rainfall physics, principles of erosion on upland areas and construction sites, stable channel design in alluvial material, mechanics of sediment transport, river mechanics, reservoir sedimentation. Prereq: CE 341 or ME 330 and engineering standing. (Same as BAE 536.)

CE 547 WATERSHED SEDIMENTATION. (3)
The course objective is to gain an understanding of watershed sedimentation including: (1) erosion and sediment transport processes in a watershed and the mechanisms by which the processes are initiated, developed, and worked towards equilibrium; (2) measurement of the sediment budget for a watershed using sediment fingerprinting and sediment loading data; and (3) prediction of sediment loading in watersheds with different human disturbances using hydrologic-based modeling tools. Specific emphasis will be placed on the use of natural and nitrogen isotopic tracer measurements within sediment fingerprinting as a data-driven approach to measure sediment loading from different sources in a watershed. In order to fulfill the course objective, the instructor will use traditional classroom learning as well as field and laboratory components of the course in order that students can participate in hands-on learning. Prereq: CE 461G (Pre- or Co-requisite or equivalent). (Same as BAE 547.)

CE 549 ENGINEERING HYDRAULICS. (3)
Analysis and Design of flow in closed conduits and natural and artificial open channels. Design of hydraulic structures. Prereq: CE 461G or CE 541 and engineering standing, or consent of instructor. (Same as BAE 545.)

CE 551 WATER AND WASTEWATER TREATMENT ENGINEERING. (3)
This course examines the scientific and engineering aspects of water and wastewater treatment. Conventional water treatment processes such as rapid mixing, flocculation, sedimentation, filtration, and disinfection as well as biological processes for wastewater treatment are analyzed. Sustainable alternative treatment techniques are also discussed. Prereq: CE 341, CE 351, and engineering standing or consent of instructor.

CE 555 MICROBIAL ASPECTS OF ENVIRONMENTAL ENGINEERING. (3)
Environmental microbiology for engineering students with emphasis on microbiologically mediated chemical cycles/microbial ecology, and industrial microbiology. Prereq: CHE 105 and 107, engineering standing or consent of instructor.
Course Descriptions

CE 556 SOLID AND HAZARDOUS WASTE MANAGEMENT. (3)
Study of the generation and management of solid and hazardous wastes. Application of engineering principles to the collection, transport, processing, resource recovery and ultimate disposal of these wastes. Prereq: CE 471G; CE 521 or consent of instructor and engineering standing. (Same as BAE 556.)

CE 568 GIS APPLICATIONS FOR WATER RESOURCES.
This course studies the principles, methodology and analysis of geographic information systems and spatially-referenced data unique to water resources and hydrologic modeling. Lectures will explore the latest GIS concepts, hydrologic modeling relationships and data sources and be complemented with computer-based laboratory exercises. Prereq: BAE 437, CE 461G, or consent of instructor. (Same as BAE 538.)

CE 570 COGNITIVE ENGINEERING.
Application of the principles of soil mechanics and structural mechanics to the design of retaining walls, bracing for excavations, footings, mat and pile foundations and to the analysis of the stability of earth slopes. Prereq: CE 471G and engineering standing.

CE 581 CIVIL ENGINEERING MATERIALS I.
Design, evaluation, and construction of Portland cement concrete and hot mix asphalt (HMA). Advanced topics related to high performance concrete and asphalt materials are covered in this course. Prereq: CE 381 and engineering standing.

CE 582 INTERMEDIATE STRUCTURAL ANALYSIS.
Analysis of indeterminate trusses, frames, arches and structures using energy principles associated with the flexibility and stiffness methods; influence line functions for indeterminate structures; and use of available computer programs for the construction of systems and matrix operations. Prereq: CE 382 and engineering standing; or consent of instructor.

CE 584 DESIGN OF TIMER AND MASONRY STRUCTURES.
Current and historic design methods of buildings and their components using wood, wood products, bricks, and concrete blocks. Prereq: Courses in steel and reinforced concrete design at the senior level, or consent of instructor. (Same as ARC 584.)

CE 585 CIVIL ENGINEERING FAILURES.
Fundamentals of failure investigation and forensic engineering; Failure types and mechanisms; Case studies and discussions on various constructed facilities. Prereq: CE 382 or consent of instructor, and engineering standing.

CE 586 PRESTRESSED CONCRETE.
Fundamental basis and underlying principles for the analysis and design of prestressed concrete. Working stress and ultimate strength design methods, full and partial prestressing. Design for shear and torsion, deflection, crack control, and long-term effects, and prestress losses. Composite beams, continuous beams, slabs, short and slender columns, precast structures and their connections. Prereq: CE 486G and engineering standing.

CE 589 DESIGN OF STRUCTURAL SYSTEMS.
Design loads. Structural systems and bracing. Analysis and design of buildings and bridges. Use of computer systems for design projects. Written and oral presentations required. Prereq: CE 486G and CE 487G; prereq or concor: CE 579; or consent of instructor.

CE 595 INDEPENDENT WORK IN CE.
Individual work on some selected problem in the field of civil engineering. May be repeated for a maximum of six credits. Prereq: Consent of department chairperson and the instructor with engineering standing.

CE 599 TOPICS IN CIVIL ENGINEERING (Subtitle required).
A detailed investigation of a topic of current significance in civil engineering such as: design of small earth dams, man and the environment, drilling and blasting, scheduling construction operations, construction equipment and methods, traffic safety, optimum structural design, environmental impact analysis, systems analysis in civil engineering, motor vehicle noise and its control. May be repeated to a maximum of eight credits, but only four credits can be earned under the same title. A particular topic may be offered at most twice under the CE 599 number. Prereq: Variable; given when topic is identified; plus engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor’s degree in civil engineering or its equivalent.

CE 601 CONSTRUCTION EQUIPMENT.
Analysis of construction equipment use and economics. Selection and matching equipment for productivity and cost effectiveness. Mathematical simulation of construction operations. Prereq: CE 403, CE 503, or consent of instructor.

CE 602 CONSTRUCTION PROJECT MANAGEMENT.
Management of construction projects: planning, estimating, scheduling and control; organization; site relationships; material management; safety management; quality management; construction labor relations; productivity management; claims. Prereq: Engineering Standing, graduate status, or consent of instructor.

CE 605 NEW ENGINEERING ENTERPRISES.
The course covers the theory and actual practices of organization, management and operation of engineering companies. Primary emphasis on construction companies; however, the principles apply to most service oriented engineering companies. Students will be required to do several independent exercises related to establishing an engineering company. Prereq: Graduate standing in engineering or consent of instructor.

CE 621 INTRODUCTION TO FINITE ELEMENT ANALYSIS.
Theoretical, conceptual, and computational aspects of the finite element method are developed. Development of the element relationships, element calculations, and assembly of the finite element equations are covered. Both one- and two-dimensional finite element problems are considered. One-dimensional problem areas include elastic deformation, heat conduction, fluid flow, electrostatics, groundwater flow, mass transport, beams on elastic foundations, etc. Two- dimensional problem areas include Poisson’s equation, viscous incompressible flow, plane elasticity, and bending of elastic plates. Prereq: MA 432G, MA 537 or consent of instructor.

CE 631 URBAN TRANSPORTATION PLANNING.
A detailed review of the transportation planning process; inventory methodologies; trip generation, distribution and assignment with associated mathematical models and theories; prediction of future travel; land and use models; modal split; developing and testing proposed systems; simulation. Prereq: CE 531 or equivalent and STA 381, or 681 or equivalent statistics course. (Sameas GEO 643.)

CE 633 AIR TRANSPORT ENGINEERING.
Planning location and design of airports, STOL ports, and heliports. Air traffic operations, performance and control as related to facility requirements. Role of governmental agencies. Prereq: CE 531 or consent of instructor.

CE 641 MECHANICS OF LIQUID FLOW IN PIPES.

CE 642 OPEN CHANNEL FLOW.
The study of open channel flow fundamentals and concepts. Topics include uniform flow, varied flow, steady and unsteady flow, energy dissipators, flow transitions, controls, analytical and numerical solutions in 1D and 2D applications. Prereq: CE 541 or consent of instructor. (Same as BAE 642.)

CE 643 MECHANICS OF SEDIMENT TRANSPORT.
Fundamentals of turbulence in rivers and sediment transport will be taught including recent theory, derivation of governing equations, experimental methods, modeling, and design based on sediment thresholds. Prereq: CE 341 or consent of instructor. (Same as BAE 643.)

CE 651 FUNDAMENTALS OF WATER QUALITY CONTROL.
Theory and practices of water and wastewater treatment with emphasis on physical and chemical processes for municipal and industrial wastewater treatment. Prereq: CE 451 or consent of instructor.

*CE 652 BIOLOGICAL PROCESSES FOR WATER QUALITY CONTROL.
Principles and applications of environmental biotechnology for water quality control. Process microbiology and kinetics for various water and wastewater treatment processes. Prereq: CE 351 or consent of instructor. (Same as BAE 652.)

*CE 653 WATER QUALITY IN SURFACE WATERS.
Principles of surface water quality modeling and control. Analysis of dispersion, advection, natural aeration, biological oxidation and photosynthesis; their effects on the physical, chemical, and biological quality of waters in streams, lakes, reservoirs, estuaries and other surface waters. Prereq: CE 351 or consent of instructor. (Same as BAE 653.)

CE 655 WATER SANITATION AND HEALTH.
Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. Prereq: Previous college-level courses in chemistry and/or biology, CE 451, or consent of instructor. (Same as CHP 790.)

CE 660 GROUNDWATER HYDROLOGY.
The equations of saturated and unsaturated groundwater flow, the formulation of boundary value problems, and some analytical methods of solution. Solutions using Fourier series, solutions involving the Fourier transform and the Fourier sine and cosine transforms. The Boltzman transformation, development of the Philip solution for horizontal and vertical flow. Mathematical statement of the saturated and unsaturated groundwater pollution problem and some analytical methods of solution. The semigroup solution of the resulting evolution equation, examples of solutions using the Laplace transform and the Fourier transform, more complex solutions in two-dimensional and three-dimensional domains, solutions for distributed sources in time and in space, solutions for time-varyed boundary conditions. Prereq: MA 214, CE 461G or equivalent. (Same as BAE 638.)
Course Descriptions

CHE 662 STOCHASTIC HYDROLOGY. (3)
Hydrologic random variables and probability distributions. Statistical measures, development and use of Monte Carlo simulations in the generation of precipitation fields. Statistical tests of hydrologic data. Point frequency and regional frequency analysis. Analysis of hydrologic time series. Long-term trend, harmonic analysis of periodicity, autocorrelation, spectral analysis. Correlation and regression analysis. Linear stochastic models. Introduction to stochastic processes in hydrology, real-time hydrologic forecast (Kalman filter), pattern recognition, and stochastic differential equations. Prereq: MA 214, CE 461G or equivalent. (Same as BAE 662.)

CHE 665 WATER RESOURCES SYSTEMS. (3)
Application of systems analysis, mathematical modeling, and optimization in water resources management and design. Solution of engineering problems found in water supply, water quality, urban drainage, and river basin development and management by use of linear, nonlinear, and dynamic programming models. Prereq: Consent of instructor. (Same as BAE 665.)

CHE 667 STORMWATER MODELING. (3)
Introduction to deterministic and parametric modeling approaches for mathematically simulating stormwater runoff and quality. Emphasis on modeling concepts and model formulation. Analysis of deterministic component models and their linkage. Formulation of existing parametric models. Presentation of methods for parameter optimization and regionalization. Demonstration of linkage between the two approaches with illustrative examples. Prereq: CE 341 and CE 461G, or consent of instructor. (Same as BAE 667.)

CHE 671 ADVANCED SOIL MECHANICS. (3)
Detailed study of soil behavior. Specific topics include soil classification and structure, strength and deformational behavior, compaction, consolidation, and stress distribution in earth masses. Prereq: CE 471G or consent of instructor.

CHE 672 LANDFILL DESIGN. (3)
This course deals with the geotechnical aspects of the design of landfills for the disposal of municipal solid waste. Since landfill design is driven by state and federal regulations, time is taken to review these regulations. Landfills are evaluated as engineered systems consisting of multiple components. Each component is investigated individually, and methods are developed to predict and quantify the performance of these components so that appropriate materials, design criteria, and construction methods can be selected to assure that the landfill will function with minimal environmental impact. Prereq: CE 471G. (Same as BAE 672.)

CHE 676 GROUNDWATER AND SEEPAGE. (3)

CHE 679 GEOTECHNICAL EARTHQUAKE ENGINEERING. (3)

CHE 681 ADVANCED CIVIL ENGINEERING MATERIALS. (3)

CHE 682 ADVANCED STRUCTURAL ANALYSIS. (3)
Theory and application of energy principles for plane and space frames; material and geometric nonlinearities; and nonlinear solution schemes. Prereq: CE 582 or consent of instructor.

CHE 684 SLAB AND FOLDED PLATE STRUCTURES. (3)
Design and analysis of reinforced concrete floor slabs and folded plate roofs. Elastic and inelastic methods. Prereq: CE 582 or consent of instructor.

CHE 686 ADVANCED REINFORCED CONCRETE THEORY. (3)
Background and origin of modern reinforced concrete design procedures and codes. Comparison of American and foreign methods of analysis. Review of current research and projection to anticipated future changes in design and construction practices. Prereq: CE 486G or consent of instructor.

CHE 687 ADVANCED STEEL DESIGN. (3)
Strength of structural steel columns, including asymmetry and slender compression elements. Flexural strength of slender plate girders. Shear strength with and without tension field action. Frame stability. Steel connections. Floor vibration serviceability. Prereq: CE 487G or consent of instructor.

CHE 699 TOPICS IN CIVIL ENGINEERING (Subtitle required). (1-4)
An advanced level presentation of a topic from one of the major areas of civil engineering such as hydraulics, geotechnics, structures, transportation, surveying, or water resources. Course with a given subtitle may be offered not more than twice under this number. Prereq: Variable, given when topic identified; graduate standing.

CHE 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CHE 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 749 residence credit following the successful completion of the qualifying exams.

CHE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CHE 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CHE 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)

CHE 779 ADVANCED GEOTECHNICAL ENGINEERING. (3)
Application of the principles of soil mechanics to the design and analysis of foundations and earth structures. Prereq: CE 579 and CE 671 or consent of instructor.

CHE 782 DYNAMICS OF STRUCTURES. (3)

CHE 783 STRUCTURAL FINITE ELEMENT ANALYSIS. (3)
Theoretical, conceptual and computational aspects of the finite element method are presented. Development of the element relationships, element calculations, assembly and efficient solution of the finite element method are emphasized. Finite element formulations developed for 2D, 3D axisymmetric and plate bending problems in structural mechanics for both static and dynamic applications. Prereq: MA 432G and EGR 537, or CE 682 or consent of instructor.

CHE 784 SHELL STRUCTURES. (3)
Design and analysis of reinforced concrete shell structures, including domes, barrel shells, hyperbolic paraboloids and cylindrical tanks. Prereq: CE 684 or consent of instructor.

CHE 790 SPECIAL RESEARCH PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Prereq: Consent of the chairperson of the department.

CHE 791 SPECIAL DESIGN PROBLEMS IN CIVIL ENGINEERING. (1-6)
Individual work on some selected problems in one of the various fields of civil engineering. Prereq: Consent of the chairperson of the department.

CGS Cognitive Science

CGS 500 COGNITIVE SCIENCE IN THEORY AND PRACTICE. (3)
This course will introduce upper-level undergraduate students (and lower-level graduate students) to Cognitive Science, an interdisciplinary field that seeks to study the mind from the perspective of various disciplines: Biology, Computer Science, Linguistics, the Neurosciences, Philosophy, and Psychology. The course will consist of modules in at least four of these six disciplines. Prereq: Upper-class standing.

CHE Chemistry

CHE 101 MOLECULAR SCIENCE FOR CITIZENS. (3)
A conceptual introduction to the molecular nature of natural and man-made materials as well as the key molecules of biological organisms. The important classes of molecules will be discussed in terms of their properties and impact on our everyday real world experience.

CHE 103 CHEMISTRY FOR HEALTH PROFESSIONALS. (4)
A study of the basic concepts of general, organic, and biological chemistry. Topics include electronic structure of atoms and molecules, periodicity of the elements, stoichiometry, states of matter, kinetics, equilibria, acids and bases, organic functional groups, stereochemistry, carbohydrates, lipids, proteins, and enzymes. Topics are presented with an emphasis on application to the allied health professions. Prereq: Two years of high school algebra and math ACT of 19 or above, or Math placement test, or completion of MA 108R.

CHE 104 INTRODUCTORY GENERAL CHEMISTRY. (3)
A study of the general principles including laws of definite and multiple proportions, stoichiometry, gases, electronic structure, chemical bonding, periodic relationships, oxidation-reduction, acid bases, chemical equilibrium and acids/bases. Intended for students interested in a one-semester course in general chemistry and recommended for students seeking careers in nursing, nutrition and allied health science fields. Not open to students who have already completed both CHE 105 and 107. Prereq: Two years of high school algebra and math ACT of 19 or above (or Math placement test), or completion of MA 108R or a higher level math course.
CHE 105 GENERAL COLLEGE CHEMISTRY. (4)
A study of the principles of chemistry and their application to the more important elements and their compounds. Not open to students who have already completed both CHE 104 and 106 or CHE 104 and 108, but open to students who have completed just CHE 104. Prereq: Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110, or the KCTCS course CHE 102R or CHM 100.

CHE 106 INTRODUCTION TO INORGANIC, ORGANIC AND BIOCHEMISTRY. (4)
A continuation of CHE 104. A study of selected aspects of inorganic, organic and biochemistry including the chemistry of metals and nonmetals, introduction to organic functional group chemistry, proteins, nucleic acids and lipids. Lecture, three hours; laboratory, three hours per week. Not open to students who have already completed CHE 105 and 107. (Not recommended for students seeking careers in medicine, science, dentistry, engineering, veterinary science, agricultural sciences, education, or allied fields for which the recommended sequence is CHE 105-107-115. Prereq: CHE 104 or the KCTCS course CHM 100.

CHE 107 GENERAL COLLEGE CHEMISTRY II. (3)
A continuation of CHE 105. A study of the principles of chemistry and their application to the more important elements and their compounds. Not open to students who have completed only CHE 104 but is open to students who have completed both CHE 104 and 106. Prereq: CHE 105 (with a grade of C or better), or both CHE 104 and 108 (with a grade of C or better in CHE 108).

CHE 108 INTRODUCTION TO INORGANIC, ORGANIC AND BIOCHEMISTRY WITHOUT LABORATORY. (3)
A continuation of CHE 104. A study of selected aspects of inorganic, organic, and biochemistry including the chemistry of metals and nonmetals, basic organic functional groups, proteins, nucleic acids, and lipids. Lecture material is identical to that of CHE 106, but there is no laboratory component. Not open to students who have already completed CHE 105 and 107 or CHE 106. (Not recommended for students seeking careers in medicine, science, dentistry, engineering, veterinary science, agricultural sciences, education, or allied fields for which the recommended sequence is CHE 105/107/115. Prereq: CHE 104 or the KCTCS course CHM 100.

CHE 109 GENERAL CHEMISTRY I. (4)
A study of the principles of chemistry and their application to the more important elements and their compounds. The two-semester CHE 109/110 sequence covers the same material as CHE 105. Prereq: Math ACT of 23 or above; or math placement test; or KCTCS course CHM 100 or CHM 102.

CHE 110 GENERAL CHEMISTRY II. (4)
The second half of a sequence (with CHE 109) in which the material of CHE 105 is covered in two semesters.

CHE 111 LABORATORY TO ACCOMPANY GENERAL CHEMISTRY I. (1)
A laboratory course, to accompany CHE 105, dealing with the properties of chemical substances and providing an introduction to quantitative chemical analysis. Prereq or concur: CHE 105.

CHE 113 LABORATORY TO ACCOMPANY GENERAL CHEMISTRY II. (2)
A laboratory course, to accompany CHE 107, emphasizing qualitative and quantitative chemical analysis. Prereq: CHE 111; prerequisite or concur: CHE 107.

CHE 115 GENERAL CHEMISTRY LABORATORY. (3)
An introductory laboratory course dealing with chemical and physical properties; qualitative analysis, and an introduction to quantitative analysis. Lecture, one hour; laboratory, four hours. Prereq or concur: CHE 107.

CHE 195 GENERAL CHEMISTRY WORKSHOP I. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 105 need not be accompanied by enrollment in CHE 195. Prereq: Concurrent registration in CHE 105 required.

CHE 197 GENERAL CHEMISTRY WORKSHOP II. (1)
Peer-led team problem solving. Two-hour workshop offered on a pass-fail basis only. Enrollment in CHE 107 need not be accompanied by enrollment in CHE 197. Prereq: Concurrent registration in CHE 107 required.

CHE 199 RESEARCH EXPERIENCE IN CHEMISTRY. (0)
Participation in laboratory research in chemistry. Offered pass/fail only. Prereq: Permission of instructor.

CHE 226 ANALYTICAL CHEMISTRY. (3-5)
An introduction to the theory and practice of quantitative analysis. Lecture, two hours; laboratory, three to six hours. Prereq: CHE 107 and 113.

CHE 230 ORGANIC CHEMISTRY. (3)

CHE 231 ORGANIC CHEMISTRY LABORATORY I. (1)
Laboratory for CHE 230 or CHE 236. Laboratory, three hours per week. Prereq: CHE 113; prereq or concur: CHE 230 or CHE 236.

CHE 232 ORGANIC CHEMISTRY LABORATORY II. (1)
CHE 525 BIOANALYTICAL SENSORS. (3)
Theory, principles, and applications of bioanalytical sensors and sensing systems, including transducers, molecular recognition, and microfabrication. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 526 CHEMICAL SEPARATIONS. (3)
An advanced study of the theory, instrumentation, and analytical applications of chemical separation methods. Prereq: A physical chemistry course at or above the 400 level, or consent of instructor.

CHE 532 SPECTROMETRIC IDENTIFICATION OF ORGANIC MOLECULES. (2)
A discussion of nuclear magnetic resonance, ultraviolet and infrared spectroscopies, and mass spectrometry in the determination of the structure and stereochemistry of organic molecules. Prereq: CHE 231 and CHE 232.

CHE 533 QUALITATIVE ORGANIC ANALYSIS LABORATORY. (2)
The identification of unknown organic compounds using nuclear magnetic resonance, ultraviolet- and infrared spectroscopy, mass spectrometry and traditional chemical techniques. Separation techniques are also emphasized. Laboratory, six hours. Prereq: CHE 532.

CHE 535 SYNTHETIC ORGANIC CHEMISTRY. (3)
A general survey of organic chemistry with emphasis on synthetic methods and the synthesis of natural products. Prereq: CHE 232.

CHE 538 PRINCIPLES OF ORGANIC CHEMISTRY. (3)
A general survey of the field of organic chemistry. Topics emphasized are: mechanistic principles relating molecular structure to reaction outcome, stereoisomerism and its effect on chemical reactivity, and simple molecular orbital theory as required to understand aromaticity and to predict the occurrence and stereochemistry of pericyclic reactions. Prereq: CHE 232.

CHE 547 PRINCIPLES OF PHYSICAL CHEMISTRY I. (3)
An introduction to quantum chemistry and spectroscopy, emphasizing modern applications of quantum theory to the calculation of molecular properties. Practical experience with quantum chemistry software on various computer platforms is included. Prereq: MA 213; PHY 213 or 232, or consent of instructor.

CHE 548 PRINCIPLES OF PHYSICAL CHEMISTRY II. (3)
Fundamental principles of classical physical chemistry, including thermodynamics, statistical thermodynamics, and chemical kinetics. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 550 BIOLOGICAL CHEMISTRY I. (3)
An introduction to biological chemistry. Topics include amino acids and proteins; nucleic acids and nucleotides; enzyme structure, function and energetics; metabolism including glycolysis; the tricarboxylic acid cycle; electron transport and oxidative phosphorylation; glycogen metabolism; hormone action; and other aspects of modern biological chemistry. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 552 BIOLOGICAL CHEMISTRY II. (3)
A further introduction to biological chemistry. Topics include lipid metabolism, biosynthesis and metabolism of nitrogen-containing compounds, storage and utilization of genetic information, immunology, and other contemporary topics in biological chemistry. Prereq: CHE 232 and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 553 CHEMISTRY AND MOLECULAR BIOTECHNOLOGY. (3)
This course focuses on the chemical aspects of biotechnology development. Current topics in biotechnology are emphasized. Prereq: CHE 522 or above, or consent of instructor.

CHE 554 BIOCHEMICAL LABORATORY. (2)
An introductory biochemical laboratory course. Areas of experimentation will include spectroscopic methods, electrophoresis, chromatography, and isolation and characterization of biological macromolecules. Prereq: CHE 232, CHE 550 or CHE 552, and a physical chemistry course at or above the 400 level, or consent of instructor.

CHE 555 HOMONUCLEAR NMR. (3)
This course will give students hands-on experience with modern NMR experiments that are the mainstays of chemical structural analysis and biological studies of macromolecules and pharmaceuticals. Lecture, two hours; laboratory, three hours per week. Prereq: CHE 232 or 236; and a physical chemistry course at or above the 400 level.

CHE 558 HORMONE RECEPTORS AND CELL SIGNALS. (3)
This course starts with the general concepts on hormones and their receptors and describes how hormones interact with their receptors and generate hormone signals and responses. Prereq: BIO 315 or equivalent, BCH 401G or equivalent, CHE 550 or 552 or equivalent, or consent of instructor.

CHE 559 MOLECULAR BIOPHYSICS. (3)
Overview of intermolecular forces responsible for formulation of the structure and behavior of biomolecules, as well as linked equilibria, allostery and propagation of signals. Extension of these principles to explain macromolecular machines, complex molecular behavior and, ultimately, processes of life. Prereq: A physical chemistry course at the 400 level or above, or consent of instructor.

CHE 565 ENVIRONMENTAL CHEMISTRY. (3)
A study of the sources, reactions, transport, effects, and fate of chemical species in the atmosphere, hydrosphere, lithosphere and biosphere. Prereq: Two semesters of general college chemistry are required. Courses in analytical and physical chemistry are recommended, but are not required.

CHE 572 COMMUNICATION IN CHEMISTRY. (1)
Reports and discussions on recent research and current chemical literature in seminar format: literature searching methods; resume construction; preparation of effective presentations, abstracts, and visual aids. May be repeated for a total of two credits. Students taking CHE 572 for the first time should register for CHE 572-001. Students who are taking CHE 572 for the second time should register for CHE 572-002.

CHE 580 TOPICS IN CHEMISTRY. (1-3)
A detailed investigation of a topic of current significance in chemistry. May be repeated a maximum of six credits. Lecture and/or laboratory: variable. Prereq: CHE 232 and a physical chemistry course at the 400 level or above, or consent of instructor.

CHE 610 CHEMISTRY OF THE TRANSITION METALS. (3)
A detailed treatment of the chemistry of the transition elements, lanthanides and actinides, including the structure of coordination complexes, bonding, reaction mechanisms and preparations. Prereq: CHE 510.

CHE 612 INORGANIC CHEMISTRY OF THE NON-METALS. (3)
A detailed treatment of the inorganic chemistry of the nonmetals. Topics include theories of bonding, spectral characteristics, reaction mechanisms, preparations, physical methods of characterization and structural determination, and applications. Prereq: CHE 510.

CHE 614 ORGANOTRANSITION METAL CHEMISTRY. (3)
A detailed treatment of the organometallic chemistry of the transition metals, including lanthanides and actinides. Topics include synthesis, structure, bonding theories, reactions, characterization by physical methods, and applications in organic chemistry and catalysis. Prereq: CHE 232, and CHE 410G or 510, and a physical chemistry course at the 400 level or above, or consent of instructor.

CHE 616 NUCLEAR CHEMISTRY. (3)
An advanced study of nuclear chemistry and topics related to nuclear and radiochemistry. Prereq: CHE 520 and a physical chemistry course at the 400 level or above.

CHE 620 ELECTROCHEMICAL METHODS OF ANALYSIS. (3)
An intensive study of the fundamental theories and principles of electrochemistry, and their practical applications for physical and quantitative analytical measurements. Topics include potentiometric, voltammetric, amperometric, and coulometric methods. Prereq: CHE 522 or a physical chemistry course at the 400 level or above.

CHE 623 CHEMICAL EQUILIBRIUM AND DATA ANALYSIS. (3)
An advanced treatment of chemical equilibrium, sampling, and the evaluation of data obtained from chemically related measurements. Prereq: CHE 226 or 522 or a physical chemistry course at the 400 level or above.

CHE 625 SPECTROCHEMICAL ANALYSIS. (3)
An intensive study of the theory, instrumentation, and analytical applications of modern atomic and molecular spectrometric methods. Prereq: CHE 522.

CHE 626 ADVANCED ANALYTICAL CHEMISTRY. (3)
An advanced study of the theory and practice of quantitative analysis.

CHE 640 CHEMICAL CRYSTALLOGRAPHY. (3)
An introduction to modern small-molecule crystallography with emphasis on typical applications of interest to synthetic chemists. Prereq: CHE 232 and a physical chemistry course at the 400 level or above.

CHE 643 SPECTROSCOPY AND PHOTOPHYSICS. (3)
An advanced treatment of modern spectroscopy and photophysics. Topics include atomic spectroscopy, microwave, infrared and UV-visible spectroscopy of diatomic and polyatomic molecules, lasers, creation and detection of excited states, fluorescence, phosphorescence, radiationless processes and photocatalytic transformations. Prereq: CHE 547 or 446G or permission of instructor.

CHE 664 CHEMICAL KINETICS. (3)
Studies of chemical reactions from the standpoint of velocity and mechanism. Prereq: CHE 442G.

CHE 666 MULTIDISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CME/EE/MSE 664.)

CHE 666 PROTEOMICS AND MASS SPECTROMETRY. (3)
A course in the identification, characterization, and quantification of the proteins in tissues and cells. Mass spectrometric methods are of central importance, and those techniques (including data analysis) are a major focus of the course. Prereq: CHE 232, a course in physical chemistry at the 400 level or above.
Selected library and laboratory problems in conformance with the student's interest will be try, radiochemistry, or physical chemistry. May be repeated indefinitely.

Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry. Work may be taken in the following fields, subject to the approval of the Departmental Graduate Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry, physical chemistry. May be repeated to a maximum of six credits. (Same as BCH/CME/PHA/PHR 779.)

CHE 776 GRADUATE SEMINAR. (1)
CHE 779 MEMBRANE SCIENCES COLLOQUIUM. (1)
CHE 780 INDIVIDUAL WORK IN CHEMISTRY. (1-5) Selected library and laboratory problems in conformance with the student’s interest will be attacked and pursued under the direction of a suitable staff member who is proficient in the area under investigation.

CHE 790 RESEARCH IN CHEMISTRY. (1-12) Work may be taken in the following fields, subject to the approval of the Departmental Graduate Committee: analytical chemistry, industrial chemistry, inorganic chemistry, organic chemistry, physical chemistry, or photographic chemistry. May be repeated indefinitely.

CHE 746 TOPICS IN PHYSICAL CHEMISTRY. (2-4) Selected topics which may include photochemistry, structure of crystals, molecular spectra, nature of the chemical bond, and other recent advances in the field of physical chemistry. May be repeated to a maximum of 12 credits. Prereq: A physical chemistry course at the 400-level or above.

CHE 747 TOPIC IN ELECTROCHEMISTRY. (1-4) Selected topics in electrochemistry. May be repeated to a maximum of 12 credits. Prereq: Prerequisite for the course at the 400-level or above.

CHE 749 DIScotERATIoN RESeARCHeR. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CHE 767 DIScoterATIoN RESIDENTy CRedit. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester following the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CHE 789 RESIDENTy CRedit FOR DoCToR’S DEGREE. (0-12) May be repeated indefinitely.

CHE 772 SEMIAR IN CHEMISTRY INSTRUCTION. (1) A seminar for teaching assistants on the methods and techniques of effective instruction in laboratory and recitation classes in chemistry. Required of all new graduate teaching assistants. Prereq: Admission to M.S. or Ph.D. program in chemistry.

CHE 776 GRADUATE SEMINAR. (1) Reports and discussions on recent research and current literature. Required of all graduate students. May be repeated for a total of eight credits.

CHI 102 BEGINNING CHINESE II. (4) A course in second semester Chinese language. Prereq: CHI 101 or equivalent.

CHI 201 INTERMEDIATE CHINESE I. (4) A course in third semester Chinese language. Prereq: CHI 102 or equivalent.

CHI 202 INTERMEDIATE CHINESE II. (4) A fourth semester course in Chinese language. Prereq: CHI 201 or equivalent.

CHI 301 ADVANCED INTERMEDIATE CHINESE I. (3) A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 300 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 302 ADVANCED INTERMEDIATE CHINESE II. (3) A course designed to increase student skills in listening, speaking, writing, reading and culture. More complex grammatical forms introduced; focus on control of basic forms. Development of students’ lexicon through reading, watching films, conversation, tapes, etc. Prereq: CHI 300 or equivalent. All students who have had three or more years of high school Chinese or are heritage learners of Chinese and are enrolling in college-level Chinese for the first time must take the Chinese placement exam before enrolling in this course.

CHI 310 SOUNDS OF EAST ASIAN LANGUAGES. (3) The aim of this course is to provide students with the tools to understand and analyze the complexity of sounds and sound systems in East Asian languages (including Chinese, Japanese, Korean and Vietnamese). To this end, students learn to produce, identify and perceive human sounds and to describe and understand the physical properties with which these sounds are produced. Students explore the relationship between sound systems and human perception. Finally, students apply the methods, theory and practice of the course in an in-class field work of an East Asian language unknown to them.

CHI 320 GENDER POLITICS IN CHINESE LITERATURE. (3) An interdisciplinary, multimedia approach to the representation of gender relations in Chinese literature over time. Critical engagement of such topics as the complex relationship between women’s issues and national discourse, between identity and performance, between the construction of female subjectivity and male fantasy, between gender and genre. Students will be encouraged to conduct cross-genre and cross-cultural comparisons. All readings in English. Prereq: Junior status or consent of instructor.

CHI 321 INTRODUCTION TO CONTEMPORARY CHINESE FILM. (3) The course offers an overview of major films, directors and actors in the contemporary PRC, Taiwan, and Hong Kong. It examines the genres of Chinese film better known in the U.S., including the Hong Kong action film, fifth-generation mainland cinema and Taiwanese urban dramas. The course will provide an understanding of contemporary Chinese cinema through analyses of the content and style, and poetry and films/filmmakers/film movements, that reflect the Chinese cultural value system and differing Chinese aesthetics vis-a-vis Western and Hollywood views. All films are screened with English subtitles. Prereq: Junior status or consent of instructor.

CHI 322 SELF AND SOCIETY IN CHINESE CULTURE. (3) This course takes an interdisciplinary approach to the concept of the self and its relationship to larger social categories such as family and society in Chinese culture. Critical approaches to topics such as self-expression in art and literature over time and across genres, self-cultivation, gender, consciousness, modernity, and transnational identity. Course readings will include philosophical and religious texts as well as literature, historical writing, and material culture in its various forms. Prereq: Junior status or consent of instructor.

CHI 330 INTRODUCTION TO CHINESE CULTURE, PRE-MODERN TO 1840. (3) This course introduces students to modern Chinese history, society, and culture up to 1840. Some of the major questions to be addressed include: Is “China” the oldest continuous civilization? Was it culturally and ethnically homogeneous? Was Chinese traditional culture and society “patrarchal”? To what extent was the state successful in penetrating into the daily lives of individuals? Course assignments will include primary and secondary literature (entirely in English) as well as visual and material culture sources. No prior knowledge of Chinese history, culture, or language required.

CHI 331 INTRODUCTION TO CHINESE CULTURE, 1840 TO PRESENT. (3) This course introduces students to modern Chinese history, society, and culture from 1840 to the present, with a special focus on developments in the twentieth century. We will investigate three sets of major problems: (1) China is often seen as an ethnically and culturally homogeneous society, but what is China and (Han) Chinese? (2) How did China transition from a multi-ethnic empire to a modern nation-state? (3) What does modernity mean in the Chinese context? Aside from these specific objectives, this course will also teach students to analyze written and visual texts found in various genres. No prior knowledge of Chinese history, culture, or language required.

CHI 345 INTRODUCTION TO EARLY CHINESE THOUGHT. (3) This course will examine the intellectual history of China’s classical period, from the late Shang until the sixth century CE, and critically engage fundamental concepts of early Chinese philosophy and religion including: the Dao, the discourse of tradition, formation of philosophical “schools,” cosmic and social gender, the Sage, and human nature. This course will also consider “Religion” and “Philosophy” as terms of inquiry, and synthesize this literature to describe and analyze changes and continuities to Chinese thought during the classical era. Prereq: Junior standing or consent of instructor. CHI 330 recommended.

CHI 395 INDEPENDENT WORK IN CHINESE. (1-3) Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)
**Course Descriptions**

**CIS 300 STRATEGIC BUSINESS AND PROFESSIONAL COMMUNICATION.** (3)

Theories; strategies; techniques for researching, analyzing, constructing, and presenting oral and written arguments for audiences and selected contemporary topics and issues. Emphasis on in-class presentations. Prereq: Instructor approval required to enroll.

**CIS 191 SPECIAL TOPICS IN INSTRUCTIONAL COMMUNICATION (Subtitle required).** (1-3)

Study of a specialized topic in instructional communication. May be repeated to a maximum of nine credits under different subtopics. Lecture. Prerequisites will be set by the instructor.

**CIS 284 INTERCOLLEGIATE DEBATING.** (1)

Preparation for and participation in intercollegiate debate. May be repeated to a maximum of four credits. Prereq: Instructor approval required to enroll.

**CHI 300 INTRODUCTION TO CHINESE LINGUISTICS.** (3)

This course introduces the grammar, vocabulary, and concepts of Literary Chinese. The class will focus on early texts written in what is often referred to as “Classical Chinese,” which flourished from the late Zhou to the end of the Han dynasty (220 CE) and was the common written language of East Asia. Prereq: CHI 301 or JPN 301 or consent of instructor.

**CIS 100 COMPOSITION AND COMMUNICATION I.** (3)

Composition and Communication I is the introductory course in a two-course sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

**CJ 601 PROSEMINAR IN COMMUNICATION.** (3)

Introduction to graduate study; theory and systems, research strategies. Prereq: Graduate standing in communication or consent of instructor.

**CIS 111 ACCELERATED COMPOSITION AND COMMUNICATION II (CIS).** (3)

Composition and Communication II is an accelerated version of the standard two-semester composition and communication sequence. It focuses on integrated oral, written, and visual communication skill development and emphasizes critical inquiry and research. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and use interpersonal skills to work effectively in groups (dyads and small groups). Prereq: AP English Composition score of 4 or 5, an ACT English score of 32 or higher, an SAT verbal score of 720 or higher, or acceptance into the University’s Honors Program.

**CJ 608 MASS COMMUNICATIONS AND SOCIETY.** (3)

A study of the ways in which the communications media play their roles in contemporary society with special attention to the major functions, rights, and responsibilities of media and individuals. Prereq: Graduate standing in communication or consent of instructor.
CJT 615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS. (3)
This course is an introductory graduate-level survey of theory and research on human communication mediated by communication and information technologies. This course is designed to cover the areas not typically addressed in traditional courses of mass or interpersonal communication, including theory and research on the use of computers and electronic communication over a variety of communication and information systems. Prereq: Graduate standing or consent of instructor. (Same as LIS 615.)

#CJT 616 FOUNDATIONS IN INSTRUCTIONAL COMMUNICATION. (3)
Instructional communication is a blending of three disciplines including pedagogy (i.e., teaching), educational philosophy (i.e., cognitive learning), and interpersonal communication. Although each of these unique disciplines is embedded in its own theoretical and research tradition, this course is designed to focus on the synthesis of these three disciplines. The students will learn to synthesize various instructional and communication models, design in-person and computer-based instructional delivery, and learn various methods for assessing teaching and learning. The course will discuss the managerial and political aspects of instructional delivery in various professional contexts, with a special emphasis on those in academic, information, and organizational settings.

CJT 619 PROSEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION. (3)
Examines important issues in communication from a global perspective. In-depth study of international communications systems and networks, with special emphasis on the communication needs of organizations and related topics. Students will be exposed to a variety of contemporary theories and perspectives on international communication and related topics. Prereq: Graduate standing in communication or consent of instructor.

CJT 625 PROSEMINAR IN ORGANIZATIONAL COMMUNICATION. (3)
This course is an introductory graduate-level survey of theory and research in the area of organizational communication and related topics. Students will be exposed to a variety of contemporary theories and perspectives on organizational communication and related topics. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

CJT 630 PROSEMINAR IN MASS MEDIA LAW AND PUBLIC POLICY. (3)
Study of media law and policy-making. Intensive review of court decisions, statutes and administrative rules and regulations regarding libel, privacy, public access to government meetings and documents, intellectual property, broadcast regulation, corporate and corporate speech, obscenity and protection of news sources. Prereq: CJT 601 and graduate standing in communication or consent of instructor.

CJT 631 PROSEMINAR IN INTERPERSONAL COMMUNICATION. (3)
The course reviews existing and emerging theoretical perspectives relevant to the context of interpersonal communication. Emphasis is given to theories of message production and reception, identity management, relationship development, and related processes. Methods of investigation include examination of the study of interpersonal interaction are addressed. Students are expected to be familiar with general communication theory and basic research methods prior to enrolling in the course.

#CJT 636 ASSESSMENT AND EVALUATION METHODS IN APPLIED COMMUNICATION RESEARCH. (3)
In applied instructional settings (e.g., training, workshops, teaching, online courses, conference proceedings), goals are set for specific outcomes to be achieved, whether they are affective, cognitive, or behavioral. In these instructional contexts, assessment is used to evaluate the effectiveness of any program or intervention. Additionally, assessment is used to improve upon existing programs and interventions. Students will learn how to develop, conduct, and evaluate sound assessment plans, and provide recommendations based on assessment results.

CJT 637 INFORMATION TECHNOLOGY. (3)
Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer services, hardware and software evaluation and selection, and system security. Prereq: Consent of instructor. (Same as LIS 637.)

CJT 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)
Course covers the structure, development and evolution of the Internet; network protocols and client/server architecture issues; Web page design, authoring, and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTML and scripting languages; and Internet-related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as LIS 638.)

CJT 639 INTRODUCTION TO MEDICAL INFORMATICS. (3)
This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical Informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including patient care, research, and education. During the semester we will explore a number of topics central to understanding the field, including: the nature of biomedical information, the electronic medical record, the role of information and computing technologies to support clinical decision making, health care information and informatics standards, information provider communication, and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and can use this as a foundation for further education, training, and work in health information professions. (Same as LIS 639.)

CJT 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to: the healthcare community and their information needs, information resources in the health sciences, controlled medical vocabularies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as LIS 640.)

CJT 645 PROSEMINAR IN MASS COMMUNICATION THEORY. (3)
A broad examination and critical analysis of major mass communication theories and research areas. Prereq: A course in research methods and graduate standing in communication or consent of instructor.

#CJT 646 INTERPERSONAL COMMUNICATION INSTRUCTION. (3)
Intercultural communication exists in the relationships between students and instructors and between students, both in and out of the classroom. Although these relationships differ from other interpersonal relationships (e.g., friends, significant others), their impact is no less profound or influential. In this course, students will explore how interpersonal concepts, constructs, theories, and relationships emerge in the classroom and the impact overall instructional environment in terms of teaching outcomes, satisfaction, and engagement, among other important instructional outcomes.

CJT 651 COMMUNICATION THEORY. (3)
Examination and critical analysis of the major theories of communication processes, including systems theory, structural theories and semiotics, behaviorism, symbolic interactionism, theories of the social construction of reality, and other theoretical approaches to the study of communication. Prereq: Graduate standing or consent of instructor.

#CJT 656 INSTRUCTIONAL COMMUNICATION AND TECHNOLOGY. (3)
Instructional communication is an introduction to teaching and learning with a special emphasis on those in academic, information, and organizational settings. Students will learn how to develop, conduct, evaluate sound assessment plans, and provide recommendations based on assessment results.

CJT 664 QUANTITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
Goals, epistemology and methods of qualitative inquiry in communication. Strengths and limitations of different qualitative research methodologies. Distinctive contributions of qualitative research to theory and practice of communication.

CJT 665 QUANTITATIVE METHODS IN COMMUNICATION RESEARCH. (3)
The scientific method. Communication research as part of social science research. Study and practice of quantitative research techniques which apply to communication. Prereq: Graduate standing in communication or consent of instructor.

CJT 668 INFORMATION SYSTEMS DESIGN. (3)
Study of concepts and methods of information system design and development with particular relevance to library and information center applications. Emphasis is given to modeling of system functions, data, and processes of computer-based information systems including the development of small scale information systems. Prereq: LIS 636 or consent of instructor. (Same as LIS 668.)

CJT 671 PROSEMINAR IN HEALTH COMMUNICATION. (3)
This course is designed to provide a broad introduction to communication in health care settings. Topics addressed are patient-provider communication, communication in health care organizations, intercultural communication in health care, and health images in the mass media. Prereq: Graduate standing in communication or consent of instructor.

CJT 672 COMMUNICATION AND PERSUASION. (3)
An advanced course examining the literature in communication and attitude change. Issues in measurement, theory, and philosophical orientation are central. Covers communication broadly, including interpersonal, mediated, and mass communication. Prereq: Graduate standing in communications or consent of instructor.

CJT 684 PROSEMINAR IN INSTRUCTIONAL COMMUNICATION. (3)
This course is an introductory graduate-level survey of current theory, research, and current developments in the area of instructional communication. Students will be exposed to a variety of current theoretical perspectives and methodological orientations. Hands-on opportunities are provided to construct and refine strategies and resources for instruction. Prereq: Prior teaching experience, or COM 584, or consent of instructor.

CJT 685 SEMINAR: PREPARING FUTURE FACULTY FOR THE MULTICULTURAL CLASSROOM. (1)
This course is designed to prepare communication faculty for facilitating and dealing with diverse student learning in an increasingly multicultural classroom context. Prereq: Recommend CJT 684 or GS 650.

CJT 686 PRACTICUM IN PREPARING FUTURE FACULTY. (1)
Practicum at a participating institution to provide students with variety of experiences as faculty member working with a mentor there and supervised through CJT. Prereq: CJT 684 or CJT 685.

KEY: # = new course  * = course changed † = course dropped
CJT 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE. (1-3)
A survey and historical study of multicultural literature for your of all ages. Students will engage in extensive reading, evaluation, and discussion of literature and the issues related to developing an understanding of various cultures and special populations. Prereq: LIS 610 or LIS 614, or consent of instructor.

CJT 696 INTERNSHIP IN COMMUNICATION. (3)
Field experience for candidates for the M.A. degree in any field of communications through work in industry, government, education, research or business agencies. Laboratory, 12 hours per week. Prereq: Admission to M.A. program and 18 hours of graduate work. Consent of DGS required.

CJT 700 DIRECTED READING IN COMMUNICATION. (1-3)
Individual reading study on some communications aspects not treated in depth in a regular course or of topical interest. A topical list and examination procedure required. May be repeated to a maximum of 12 credits. Prereq: Graduate standing in communication or consent of instructor.

CJT 719 SEMINAR IN INTERNATIONAL/INTERCULTURAL COMMUNICATION (Subtitle required). (3)
Special Topics/Issues in International/Intercultural Communication examines the current and the alternative perspectives in the field of study. Topics/Issues such as the New World Information and Communication Technologies, Communication and Development, Transborder Data Flows, etc., are studied. May be repeated to a maximum of six credits. Prereq: CJT 619 and graduate standing in communication or consent of instructor.

CJT 721 SEMINAR IN RISK COMMUNICATION. (3)
This course establishes risk communication as a distinct sub-discipline within the communication discipline. Ethical considerations are paramount in all areas covered in the course. Theories of risk communication such as mindfulness, sensemaking, chaos, image repair, issues management, the constraints of structuration, and renewal discourse are discussed in terms of pre-crisis, crisis, and post-crisis. Applied research areas such as best practices, high reliability organizations, terrorism, and health risks are also considered. Ultimately, the course provides an overview of the established and emerging perspectives on risk and crisis from the communication perspective.

CJT 722 SEMINAR IN CRISIS COMMUNICATION. (3)
This course follows the crisis communication management process through the stages of pre-crisis, crisis, and post-crisis. The pre-crisis stage discusses planning and environmental scanning. The crisis stage discusses communication strategies for image restoration. The post-crisis stage depicts crisis as an opportunity for organizational learning and for rebuilding or expanding public trust. The course uses a case study approach throughout.

CJT 723 SEMINAR IN TRAINING AND CONSULTING. (3)
This graduate course explores communication training and consultation as a research and instructional focus for students interested in applied communication. Students will learn how to identify and assess communication competence and how to develop training programs to enhance communication competency.

CJT 725 SEMINAR IN ORGANIZATIONAL COMMUNICATION: (Subtitle required). (3)
This course is concerned with theory and research relevant to organizational communication and related areas of interest. Special attention is given to various topics relevant to a specific subtitle. May be repeated to a maximum of six credits under a different subtitle. Prereq: Graduate standing in communication or consent of instructor.

#CJT 726 COMMUNICATION LEADERSHIP STUDIES. (3)
The primary purpose of this course is to extend students’ theoretical understanding of leadership from a communication perspective. Specifically, this course is designed to (1) sharpen the students’ understanding of the role of communication in developing effective leadership behaviors; (2) familiarize students with leadership as it relates to the communication process; (3) involve students in major term projects which incorporate current leadership theory and research; and (4) enhance students’ understanding of published research in leadership communication.

CJT 730 SEMINAR IN MASS MEDIA AND PUBLIC POLICY (Subtitle required). (3)
The role of mass communications media in making public policy and the effects of public policies on the mass media. One subject area will be investigated each semester; typical topics are (1) political campaign communications; (2) censorship; (3) controversial public issues; (4) rights; (5) international and world agreements. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 630 and graduate standing in communication or consent of instructor.

CJT 731 SEMINAR IN INTERPERSONAL COMMUNICATION (Subtitle required). (3)
Consideration of special problems in interpersonal communication with emphasis on emergence of theory and implications for further research. May be repeated to a maximum of six credits under a different subtitle. Prereq: CJT 631 and graduate standing in communication or consent of instructor.

CJT 745 SEMINAR IN MASS COMMUNICATION (Subtitle required). (3)
Consideration of selected topics in mass communication theory and research. May be repeated under a different subtitle to a maximum of six credits. Prereq: Graduate standing in communication or consent of instructor.

CJT 746 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CJT 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CJT 751 ADVANCED TOPICS IN COMMUNICATION THEORY CONSTRUCTION. (3)
Intensive examination of selected topics important to the construction, development, and testing of communication theories and problems. Prereq: Completion of required first-year curriculum for the Ph.D.

CJT 764 ADVANCED TOPICS IN QUALITATIVE RESEARCH METHODS. (3)
A focused treatment of one or more issues, topics, or problems in qualitative research methodology in communication, such as ethnography, discourse analysis, semiotics, or historical methods. Prereq: CJT 664 or consent of instructor.

CJT 765 ADVANCED SEMINAR IN COMMUNICATION RESEARCH METHODS. (3)
A course in the methods and design of communication studies. Prereq: CJT 665 or the equivalent and graduate standing in communications or consent of instructor.

CJT 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CJT 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CJT 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Satisfactory completion of Qualifying Examination third year).

CJT 771 SEMINAR IN HEALTH COMMUNICATION. (3)
A topical seminar discussing issues in the field of health communication from a variety of perspectives, e.g., the relevance of interpersonal, international and intercultural and mass communication processes to the quality and availability of health care. May be repeated to a maximum of six credits.

CJT 775 SEMINAR IN HEALTH COMMUNICATION CAMPAIGNS. (3)
The role of communication in public health campaigns. Includes theories relevant to such campaigns, campaign effects studies, methods of evaluation, and message design and targeting principles. Prereq: CJT 645 and graduate standing in communication or consent of instructor.

CJT 780 SPECIAL TOPICS IN COMMUNICATION (Subtitle required). (3)
Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated to a maximum of six credits. Prereq: At least one year of graduate study in communication.

CJT 781 DIRECTED STUDY IN COMMUNICATION. (1-6)
To provide advanced students with an opportunity for independent work to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. (To be used for independent work.) Prereq: Consent of instructor.

CJT 789 RESEARCH PROBLEMS IN COMMUNICATION. (1-6)
Significant participation in important aspects of a research project under the direction of a graduate faculty member. May be repeated to a maximum of six credits. Prereq: Completion of all required first-year courses in the doctoral curriculum and consent of Associate Dean for Graduate Studies.

CLA

COURSES IN CULTURE AND CIVILIZATION
(No knowledge of Greek or Latin expected.)

CLA 100 ANCIENT STORIES IN MODERN FILMS. (3)
This course will view a number of modern films and set them alongside ancient literary texts which have either directly inspired them or with which they share common themes. In the first part of the course, we will consider the relationship between ancient Greek epic, tragic, and comic literature and the modern cinema. In the second part, we will look at a number of ways in which the city of Rome has been treated as both a physical place and as an idea or ideal in the works of both ancient Romans and modern film-makers.
CLA 131 MEDICAL TERMINOLOGY FROM GREEK AND LATIN. (3)
Latin and Greek roots, prefixes, and suffixes as found in medical terminology. Primarily for pre-medical, pre-dental, pre-nursing and pre-veterinary students, but others will be admitted for help in preparation for medical school. Prereq: Consent of instructor.

CLA 135 GREEK AND ROMAN MYTHOLOGY. (3)
The Greek myths studied both from the standpoint of their meaning to the Greeks and Romans and from the standpoint of their use in later literature and in everyday life. Fullfill Gen Ed Inquiry, Humanities.

CLA 191 CHRISTIANITY, CULTURE, AND SOCIETY: AHISTORICAL INTRODUCTION. (3)
A historical introduction to Christianity in its varying cultural contexts, examining the primary developments in its teachings, practices, and structures from its origins to the sixteenth century.

CLA 210 THE ART OF GREECE AND ROM. (3)
A survey of the major forms of art in ancient Western Asia, Greece, and Rome, with emphasis on the comparative typology and cultural significance of the monuments.

CLA 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT. (3)
Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as HIS 229.)

CLA 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE. (3)
Covers the conquests of Alexander the Great, and the main features of the Hellenistic World, the Roman Republic and the Roman Empire to the death of Constantine. (Same as HIS 230.)

CLA 261 LITERARY MASTERSPIECES OF GREECE AND ROME. (3)
A survey of major Greek and Roman literary works. Attention will be focused on the various genres of Classical literature, and the course will include comparative analysis of Greek and Latin literary pieces.

CLA 314 ANCIENT (Subtitle required). (3)
Study of the arts and visual cultures of the Ancient World. According to subtitles, focus may be on selected periods or media of art and visual production, in the context of political, social and cultural developments, from Bronze Age through the Roman Empire under Constantine. May be repeated under a different subtitle to a maximum of six credits. Prereq: A-H 105 recommended. (Same as A-H 314.)

CLA 331 GENDER AND SEXUALITY IN ANTIQUITY. (3)
A survey of the construction of gender, sexuality, and their relation to and expression in the societies of ancient Greece and Rome. Gender roles, marriage, social problems concerning sex and virginity, and different ways of understanding sexuality and gender in historical contexts are examined through the study of ancient literature, art, and the insights of contemporary scholarship.

CLA 382 GREEK AND ROMAN RELIGION. (3)
A broad examination of the varieties of religious practice and experience in the ancient Mediterranean world, particularly in Greece and Rome, with emphasis placed on how dramatically ancient religious concepts and systems differ from those of the modern world.

CLA 390 BACKGROUND TO AND EARLY HISTORY OF CHRISTIANITY TO 1500CE. (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judeo-Christian identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 390.)

CLA 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, the development of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as HIS 391.)

CLA 450G SPECIAL TOPICS IN CLASSICAL STUDIES (Subtitle required). (3)
This course offers advanced study of a particular topic in classical studies not covered in other CLA courses. The field of study for this course is broadly conceived, and can include aspects of Greek or Latin philology and literature, as well as the history and culture of antiquity, archaeology and material studies, literary rhetorical theory and criticism, the classical tradition in the humanities, and pertinent topics in the Middle Ages and Renaissance. Format includes lectures and discussions, assigned and supplementary readings, and paper writing. May be repeated to a maximum of nine credits with different topics.

CLA 462G TOPICS IN CLASSICAL LITERATURE (Subtitle required). (3)
A study of a specific genre or genres, or author or set of authors, selected from Greek and Roman literature read in English translation. In addition to developing an appreciation of the works studied and their ongoing contribution to world literature, the course will examine various methods of literary analysis and criticism as well as the historical, social, and cultural context of these works in classical antiquity. The course is especially suited for students outside the classical languages who wish to acquire a sophisticated understanding of classical culture and for students interested in comparative literary studies.

CLA 509 ROMAN LAW. (3)
An historical introduction to the development of Roman law, from the Twelve Tables through the Code of Justinian. (Same as HIS 509.)

COURSES IN LATIN

CLA 101 ELEMENTARY LATIN. (4)
An introduction to the study of classical Latin. Emphasis is placed on learning to read the language. Some attention is given to Latin literature and Roman civilization.

CLA 102 ELEMENTARY LATIN. (4)
A continuation of CLA 101. Prereq: CLA 101 or the equivalent.

CLA 201 INTERMEDIATE LATIN. (3)
Review of grammatical principles together with readings from Latin prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Latin literature. Emphasis is placed on developing reading ability. Prereq: CLA 101 or two years of high school Latin or equivalent.

CLA 202 INTERMEDIATE LATIN. (3)
A continuation of CLA 201. Prereq: CLA 201 or three years of high school Latin or equivalent.

CLA 205 COMPREHENSIVE INTERMEDIATE LATIN. (3)
An accelerated course offered in the summer session designed to take the student through the material normally covered in the two intermediate-level Latin courses (201 and 202). This course is intended to expand the student’s knowledge of the vocabulary, grammar, and prose idiom of classical and post-classical Latin. There will also be discussions of Roman art, literature, history, and culture and, as time permits, Latin’s role in the development of the English language. Oral exercises will also be part of the instruction. Prereq: CLA 102 or equivalent, or permission of the instructor.

CLA 211 ACCELERATED LATIN. (3)
An intensive course that covers, in one semester, all the morphology, syntax, and grammar of Latin that is required to bring students with no background in the language to the level at which they can begin to read unaltered Latin texts.

CLA 301 LATIN LITERATURE I (Subtitle required). (3)
An introduction to the literature of Republican Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

CLA 302 LATIN LITERATURE II (Subtitle required). (3)
An introduction to the literature of Imperial Rome with selected readings of complete works from the major Latin authors. Lectures and class discussions on the various genres, styles, and themes of Latin literature. Topics vary every time the course is offered. May be repeated once under a different subtitle. Prereq: CLA 202 or equivalent.

CLA 501 LATIN COMPOSITION. (3)
The course is designed for students with a good command of Latin morphology and basic knowledge of Latin syntax. The participants will deepen their knowledge of Latin syntax, internalize the principles of Latin grammar and usage, and develop a sensitivity to prose style. The course will involve readings from Latin authors from all periods, and exercises in Latin prose composition. It will foster familiarization with the language through exercises that will go beyond simple translation from English. English, not Latin, will be the spoken language used in this course. Prereq: Proficiency in Latin above the 300 level.

CLA 521 ADVANCED LATIN COMPOSITION AND READING. (3)
This course continues the study of Latin composition, concentrating on the compound sentence, modes of expression in subordinate clauses, and the figures of speech in rhetoric. Students will become acquainted with masterpieces of Latin prose from all periods, including Cicero, Sallust, Livy, Petronius, Pliny Minor, Einhard, Abelard, Erasmus of Rotterdam, Thomas More. This course, unlike CLA 501, will be conducted entirely in Latin, with the objective of further enhancing the students’ abilities to express themselves in correct Latin prose. Prereq: Consent of instructor.

CLA 524 THE LATER LITERATURE OF THE REPUBLIC (Subtitle required). (3)
A study of one or more works selected from the beginnings of Roman literary history to 31 BCE, the period of such writers as Cicero, Caesar, Sallust, Plautus, Terence, Lucretius, and Catullus. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and or poetry, including drama and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.
CLA 525 THE LATE LITERATURE OF THE EMPIRE (Subtitle required). (3)
A study of one or more works selected from approximately 31 B.C. to the end of the Western Empire, the period of such writers as Livy, Tacitus, Pliny, Seneca, Virgil, Horace, Ovid, and Juvenal. Texts may include prose, including history, philosophy, rhetoric and oratory, and letters, and or poetry, including epic, lyric, elegiac, pastoral, and satire. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, with lectures and class discussion on the literary milieu. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

CLA 528 LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)
A study of one or more works selected from Latin literature of late antiquity, or after the fall of the empire in the west, from approximately 200 AD into the Middle Ages and Renaissance. Authors and works may include early Christian Latin writers such as Augustine, late antique pagan writers such as the historian Ammianus, as well as medieval poetry, the Latin novel, medieval Christian writers, and Renaissance figures such as Erasmus. A particular author, work, genre, or theme is selected each time the course is offered. Textual analysis is emphasized, as well as the historical and cultural setting of the text and author. May be repeated to a maximum of nine credits under a different subtitle. Prereq: CLA 301 or equivalent.

CLA 611 LATIN OF ANTIQUE ROME AND THE MIDDLE AGES (Subtitle required). (3)
This course is based on extensive reading of Latin texts taken from the Roman through the Medieval periods. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding each work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 612 LATIN OF THE MIDDLE AGES TO THE MODERN WORLD (Subtitle required). (3)
This course is based on extensive reading of Latin texts taken from the Medieval through the Modern period. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding each work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: At least one course in Latin composition or permission of instructor.

CLA 624 SEMINAR IN THE LATIN LITERATURE OF THE REPUBLIC (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem in the period of the Roman Republic. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 625 SEMINAR IN THE LATIN LITERATURE OF THE EMPIRE (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem in the period of the Roman Empire. Intensive study of the Latin text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 628 SEMINAR IN LATE ANTIQUE AND POST-IMPERIAL LATIN LITERATURE (Subtitle required). (3)
Graduate seminar in an author, a literary form, or a problem from Latin literature of late antiquity or early Christian. It aims to foster close familiarization with the Latin language, cultivate an appreciation for different Latin prose styles, as well as investigate the broader historical and cultural circumstances surrounding each work. The classes will be conducted in Latin, and the assignments will involve Latin composition. May be repeated to a maximum of nine hours. Prereq: Graduate standing or consent of the Classics DGS and instructor.

COURSES IN GREEK
CLA 151 ELEMENTARY GREEK. (4)
An introduction to the study of Classical Greek. Emphasis is placed on learning to read the language. Some attention is given to Greek literature and civilization.

CLA 152 ELEMENTARY GREEK. (4)
A continuation of CLA 151. Prereq: CLA 151 or equivalent.

CLA 251 INTERMEDIATE GREEK. (3)
Review of grammatical principles together with readings from Greek prose and poetry. Selections from a wide range of authors will be included in order to demonstrate the diversity and appeal of Greek literature. Emphasis is placed on developing reading ability. Prereq: CLA 152 or equivalent.

CLA 252 INTERMEDIATE GREEK. (3)
The reading of Greek prose and poetry. Textual and literary analysis of selections from classical authors and the New Testament. Prereq: CLA 251 or equivalent.

CLA 350 PREPARING TO READ GREEK TEXTS. (3)
This course completes the study of fundamentals of the grammar and syntax of Classical Greek and prepares the student to read original Greek texts with competence and confidence. Prereq: CLA 252 or equivalent, or permission of instructor.

CLA 551 GREEK POETRY AND DRAMA (Subtitle required). (3)
A study of one or more works of Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed on both mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 555 GREEK PROSE (Subtitle required). (3)
A study of one or more works of Greek prose literature, which may include history, biography, philosophy, satire, and the novel, selected from the whole of ancient Greek literature from Homer through the Roman period. A particular author, work, genre, or theme is selected each time the course is offered. Emphasis is placed on both mastering the Greek language and on literary analysis of the texts studied. Lectures and class discussions will further illuminate the literary and cultural milieu of the author or text. May be repeated to a maximum of nine credits under a different title. Prereq: CLA 252 or equivalent.

CLA 651 SEMINAR IN GREEK POETRY AND DRAMA (Subtitle required). (3)
Graduate seminar in Greek poetic and/or dramatic literature, which may include epic, lyric, tragedy, and comedy. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 655 SEMINAR IN GREEK PROSE (Subtitle required). (3)
Graduate seminar in Greek prose literature, which may include history, biography, satire, and the novel. Intensive study of the Greek text(s) is accompanied by considerable attention to current scholarship and bibliography. Students will write extended papers and present oral reports in class. May be repeated to a maximum of nine credits. Prereq: Graduate standing or consent of the Classics DGS and instructor.

OTHER ADVANCED COURSES
CLA 395 UNDERGRADUATE INDEPENDENT STUDY IN CLASSICS. (1-3)
An independent investigation of a topic, usually outside of or in considerably greater depth than available in the regular course offerings, in Greek and or Roman language, literature, history, or culture. The course is designed for advanced undergraduate students under the supervision of a faculty member, and usually takes the form of directed readings, writing, and discussion, with tutorial meetings with the instructor no less than once a week. An advanced undergraduate research paper or equivalent project is the standard product of the course. May be repeated to a maximum of 6 credits. Prereq: Advanced undergraduate experience in Classics and permission of the instructor.

CLA 480G STUDIES IN GREEK AND LATIN LITERATURE (Subtitle required). (3)
A study of one or more works of Classical literature, either Greek or Latin, is designed to offer study in a particular text or author meeting a particular need or demand for graduate students from other disciplines and advanced undergraduate students in Classics. The course is not intended for Classics graduate students. Mastering the language of the text is a fundamental objective of this course, but the historical, social, and cultural milieu will also be studied. May be repeated for credit up to a maximum of six hours.

CLA 580 INDEPENDENT WORK IN CLASSICS. (3)
Courses to meet the needs of the student, including those who wish to study Medieval and/or Renaissance Latin, will be arranged in various areas. May be repeated to a maximum of 12 credits. Prereq: Major standing of 3.0 in the department or consent of instructor.

CLA 615 MANUSCRIPT CULTURES. (3)
This course examines how the vehicle of the manuscript and the circumstances of manuscript production shaped the creation, transmission, and reading of texts before the fifteenth century. Among the topics to be studied are orality and literacy, the transcription of sacred texts in Christianity, Judaism, and Islam, the political, economic, and social impacts of manuscript production and circulation, the impact of institutions (such as universities) on reading practices, contexts for the suppression, control, and alteration of texts, and the radical differences between print and manuscript cultures. (Same as HIS 615.)

CLA 616 PALEOGRAPHY. (3)
This course provides training in the skills needed to read the handwritten materials that constitute evidence for historical investigation of the production and circulation of information outside the medium of print. While the specific scripts to be studied will vary from semester to semester, depending upon whether the course is focused upon Latin paleography, Greek paleography, or vernacular paleographies, students will learn to read and transcribe manuscript scripts, to expand abbreviations appropriately, to recognize the chronological and geographical extent of particular scripts, to develop strategies for reading difficult scripts, to find the specialized reference works to assist them in studying handwritten materials, and to understand the historical arguments that have been constructed on the basis of analysis of scripts and the “archaeology of the book.” The course also provides training in basic codicology and editorial techniques for establishing a text and recording variant readings. Prereq: Some familiarity with the language of the materials. (Same as HIS 616.)
CLA 630 SEMINAR IN CLASSICAL LITERATURE AND CULTURE (Subtitle required). (3)
This graduate seminar offers advanced, intensive study in two particular approaches to the study of Classics, requiring a broader and more inclusive approach beyond the scope of the typical Greek or Latin seminar. These are: 1) the coordinated study of works of both Greek and Latin literature, and 2) the study of a specific research area in classical studies and culture. One of these areas will be the focus of the course each time it is offered. Topics in the coordinated study of Greek and Latin literature can vary based on various forms, such as the passions in Greek and Latin poetry, comparative Greek and Latin drama, Homer and Virgil, etc. Research in classics and culture involves extensive reading of a large body of sources and scholarship on a specific topic of current scholarly interest, along with the use of texts in the original language(s) for course assignments and papers. Appropriate competence in reading Latin and/or Greek texts is expected of all students in the course. Topics may include a focused aspect of Greek and/or Roman society, material culture, early Christianity—and its relation to classical culture, aspects of Medieval or Renaissance culture, or the ongoing influence of classical stories, ideals, and cultural forms in modern media. May be repeated for up to six credits on different topics.
Prereq: Graduate standing or consent of the Classics DGS and instructor.

CLA 695 INDEPENDENT STUDY. (1-3)
Independent investigation of a problem under supervision of a graduate faculty member; or directed readings, writing, and discussion in small groups on topics outside the usual seminar offerings, guided by a graduate faculty member. May be repeated to a maximum of nine credits.
Prereq: Admission to graduate program, permission of instructor and of departmental Director of Graduate Studies.

CLA 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters.
Prereq: All course work toward the degree must be completed.

CLA 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CLA 790 RESEARCH IN THE TEACHING OF CLASSICAL LANGUAGES. (3)
Problems in the teaching of Latin and/or Greek in secondary and/or higher education. Objectives, methods, preparation of materials, development of curricula, or the history of the field. Prereq: CLA 530 or the equivalent.

CLD Community and Leadership Development

CLD 100 INTRODUCTION TO COMMUNITY AND LEADERSHIP DEVELOPMENT. (1)
The course explores how communities of place and interest influence our lives and how these different types of communities are related to the media and leadership. Introduces the intellectual frameworks underlying this field as well as the types of research and outreach done by faculty.

CLD 102 THE DYNAMICS OF RURAL SOCIAL LIFE. (3)
Introduces major concepts of sociology by exploring social, political and cultural issues confronting rural society and American agriculture, such as: population change, industrialization, energy developments, agricultural change. Student may not receive credit for both this course and SOC 101.

CLD 204 WRITING FOR THE MASS MEDIA. (3)
This course will explore the inextricable link between community and communication by examining the social structure of communities and the media residing within them. Particular emphasis will be placed on the availability of information to citizens and in turn how this information environment facilitates or thwarts social interaction.

CLD 225 COMMUNITY AND COMMUNICATION: EXPLORING THEIR INTERSECTIONS. (3)
This course will provide students with a foundation for individuals “to get to know themselves better” in the context of leadership. Examination of effective leader characteristics, personality traits, motivation, personal leadership vision and other concepts will encourage students to develop a better understanding of their own leadership skills and perspectives. In addition, students will determine their own personality style, and learn how to best use this style when leading others. Ultimately, this type of intrapersonal knowledge will serve as the building block for deeper exploration into the field of leadership.

CLD 250 READING CRITICALLY AND WRITING WELL: COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3)
This course will provide students with a foundation in critical thinking through an emphasis on reading, writing and analytical discussions addressing basic agricultural topics, controversial agricultural topics and specific topics in community communications and leadership development. Prereq: ENG 104 and sophomore status. Primary registration access limited to majors and remaining seats open during secondary registration.

CLD 260 COMMUNITY PORTRAITS. (3)
This course introduces the social science concept of community. The focus will be on the definition of community, and the different types of communities that exist in society. Students will gather and analyze information about real communities that represent different types of community.

CLD 300 FOUNDATIONAL THEORIES IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
This course illustrates the role of social theories and research. More importantly, it addresses the question, “How do we apply theory to guide our understanding of the world around us?” Students will study theories current and postmodern social science contexts (communications, leadership, community and education) and, following critical analysis, describe how they are applied within various situations. Students will be expected to integrate the theories into a personal holistic viewpoint that affects their lives. Prereq: Major standing in CLD.

CLD 301 NEWS REPORTING. (3)
This course will familiarize students with research concepts, methods and skills often used in community and organizational development and communication. The course focuses on applied research topics such as: design and analysis, data gathering, assessment, and related issues such as the politics of information and ethical concerns in social research. Prereq: Major standing and CLD 300 (may be taken concurrently).

CLD 325 WRITING FOR COMMUNITY MEDIA. (3)
This 3-hour skills course will teach students how to write clearly, concisely and accurately for various community media, including print, radio, television and new social media. It provides a broad-based understanding of writing and communicating to community audiences. Prereq: Major standing in CLD plus completion of graduation writing requirement.

CLD 330 IMPERSONAL SKILLS FOR TOMORROW’S LEADERS. (3)
This course provides fundamental leadership theories, models, and perspectives to aid students in conducting interpersonal relationships in their daily lives, and help students acquire skills basic to becoming a leader in their professional lives. Each student will begin developing a foundation of practical leadership applications. Prereq: Major standing in CLD.

CLD 340 COMMUNITY INTERACTION. (3)
Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attitudes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or SOC 101 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as SOC 340.)

CLD 350 ENVIRONMENTAL SOCIOLOGY. (3)
A sociological study of the inter-relationship between human societies and the natural environment. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as SOC 360.)

CLD 362 FIELD EXPERIENCE IN CLD. (3)
Supervised experiences in businesses, agencies or government. Required of all Community Communications and Leadership Development majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Junior standing, majors only.

CLD 370 LEARNING IN SOCIETY. (3)
Learning in Society is designed to assist students in identifying and evaluating human learning and development within various social contexts. This course focuses on the impact social interactions have on human cognition, emotion and identity. Theoretical foundations for this course include social learning, social integration, multiple intelligences, emotional intelligence, systems psychology, and identity development. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 375 CONTEMPORARY ADULT LEARNING. (3)
This course expands on adult learning theory first presented by Malcolm Knowles and focuses on the idea of lifelong learning, differences between pedagogy and andragogy, fundamental andragological concepts, and the role that adult learning professionals play in the adult learning process. Finally, an international context will be explored by comparing and contrasting adult education in the U.S. and around the world. Prereq: Major standing in CLD or CTE students admitted to TEP.

CLD 380 GLOBALIZATION: A CROSS-CULTURAL PERSPECTIVE. (3)
A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as SOC 380.)

CLD 385 SPECIAL PROBLEMS IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (1-3)
Directed independent study of a selected problem in the field of community communications and leadership development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
JECA 399 EXPERIENTIAL LEARNING IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (1-3) A field-based learning experience, under faculty supervision, in the application of community communications and leadership techniques in agricultural/public issues. May be repeated to a maximum of six credits. Offered on a pass/fail basis only. Prereq: Consent of instructor and completion of learning contract.

JECA 400 AGRICULTURAL COMMUNICATIONS CAMPAIGNS. (3) Exploration of communications campaigns and strategies in the agricultural sector. Students will learn how to plan and enact communications campaigns centered on agricultural issues and audiences. Prereq: Primary registration access limited to majors and remaining seats open during secondary registration.

JECA 401 PRINCIPLES OF COOPERATIVE EXTENSION. (3) Philosophy, history, and development of Cooperative Extension Service; evaluation of instructional techniques; leadership training; and practice in use of Extension methods. Open to junior and senior students.

JECA 420 SOCIOLOGY OF COMMUNITIES. (3) A sociological study of issues relevant to communities. Topics may include: conceptual approaches to community; organizational and institutional linkages within and beyond the community; social inequality and social processes within communities such as social networks, social capital, organizing, and social change. Prereq: SOC 101 or RSO 102 or CLD 102; and one of the following: SOC 362 or 304 or CLD 405; or consent of instructor. (Same as SOC 420.)

JECA 430 LEADING IN COMMUNITIES: VISION, ACTION, AND CHANGE. (3) This course examines the nuances of leadership within communities. To learn what makes an effective community leader and the role a leader plays in community action, students will explore the importance of framing ideas, mobilizing resources, and developing social capital. This course expands on theories to highlight correlations with servant leadership, community behavior, and collaborative leadership styles. Finally, working with community visions of change and ambiguity will reinforce the need for flexibility within the community leader’s toolkit. Prereq: Major standing in CLD.

JECA 440 COMMUNITY PROCESSES AND COMMUNICATION. (3) This course examines the relationship between community organization and change and the media. Special emphasis is given to the place of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD/SOC 340 or consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration. (Same as SOC 440.)

JECA 460 COMMUNITY DEVELOPMENT AND CHANGE. (3) This course examines change and change management within communities and organizations. This includes looking at the change process through the eyes of innovation, opinion leader and community member. In addition to individual skill development, this course will introduce a vision of an ideal organization/community, one that supports innovation and creativity, knowledge exchange and application and collaboration; a culture that makes productive change a part of the everyday work, encouraging initiative and promoting viability in today’s society. This course weaves together theoretical and experiential threads using insights gained from readings, industry-based examples, case studies, class assignments and experiential activities. Prereq: Major standing in CLD.

JECA 465 TOPICS IN COMMUNITY COMMUNICATIONS (Subtitle required). (3) Intensive study of a specialized topic in community communications. May be repeated under different subtitles. Prereq: Major standing in CLD.

JECA 470 TOPICS IN LEADERSHIP (Subtitle required). (3) Intensive study of a specialized topic in leadership studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

JECA 475 TOPICS IN NON-FORMAL EDUCATION (Subtitle required). (3) Intensive study of a specialized topic in non-formal education. May be repeated under different subtitles. Prereq: Major standing in CLD or CTE students admitted to TEP.

JECA 480 TOPICS IN COMMUNITY (Subtitle required). (3) Intensive study of a specialized topic in community studies. May be repeated under different subtitles. Prereq: Major standing in CLD.

JECA 490 SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT. (3) A capstone course for seniors in community communications and leadership development. Presentations, research papers, outside speakers and career guidance will be significant course components. Prereq: Senior standing in the major, or consent of instructor.

JECA 495 TOPICAL SEMINAR IN COMMUNITY COMMUNICATIONS AND LEADERSHIP DEVELOPMENT (Subtitle required). (1-3) Topical seminar using readings, discussions and papers to focus on current issues of significance to community communications and leadership development. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor. Primary registration access limited to majors and remaining seats open during secondary registration.

JECA 497 PROFESSIONAL PRACTICUM IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) This is a cooperative educational program between the University of Kentucky and approved employers who furnish facilities and instruction that help students acquire the skills and knowledge required in their chosen field. Ultimately, this is a dually beneficial relationship; stakeholder relations are improved while students have an opportunity to build relationships/networks that could encourage future career development. Prereq: Major standing in CLD; senior standing.

JECA 517 RURAL SOCIOLOGY. (3) A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; and the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as SOC 517.)

JECA 525 COMMUNITY DIVERSITY AND MEDIA. (3) This course covers how media, both traditional news media and newly emerging digital communication technologies, relate to community diversity. Specifically, the course focuses on the relationships between media and community (power) structure, community institutions/organizations, social movements and minority groups, urban/rural communities, gender/race/ethnicity/class and more. Prereq: Major standing in CLD or graduate student status.

JECA 530 FUNDAMENTALS OF ORGANIZATIONAL LEADERSHIP. (3) This course examines the existing and emerging knowledge base for leadership within organizations. Leadership and motivation of others requires individuals to go beyond their basic knowledge of managing others and learn how cultures, structures, and individuals in organizations interact within the system. This course highlights correlations with organizational behavior, teamwork building, and collaborative leadership styles. In this class, students will explore organizational culture, team synergy and individual leadership capital. Prereq: Major standing in CLD or graduate student status.

JECA 534 SOCIOLOGY OF APPALACHIA. (3) A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/SOC 534.)

JECA 560 COMMUNITY INEQUALITIES. (3) This course focuses on the emergence and persistence of community inequalities in contemporary American society. This begins by identifying, describing, and analyzing inequalities within and among American communities and then considering the implications of these inequalities for organizational and community processes. The essential questions that will guide this course are: How do we define, measure and evaluate the differences among communities? What factors contribute to the emergence and persistence of the inequalities among communities? What are the consequences of these inequalities for the people who live in these communities? Prereq: Major standing in CLD or graduate student status.

JECA 575 SCHOOLS, COMMUNITY AND SOCIETY. (3) This course highlights the integral relationships between contemporary and historical societal norms, distinctive communities and educational systems. Prereq: Major standing in CLD; CTE students admitted to TEP; or graduate student status.

JECA 640 SCIENCE, AGRICULTURE, AND DEVELOPMENT. (3) An in-depth examination of the interactions between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT/SOC 640.)

JECA 650 APPLIED COMMUNITY COMMUNICATIONS. (3) Designed to familiarize students with advanced writing and editing techniques, common forms of workplace writing, audience analysis, content analysis, and graphic design tips and tools. Discussion will include some of the larger issues surrounding community communications, such as discourse communities, bias, and ethics. Prereq: Graduate standing.

JECA 665 PROGRAM DEVELOPMENT AND EVALUATION. (3) Course is designed to help students design, implement, and evaluate educational and social programs using a logic-based framework. (Same as SOC 665.)

*JECA 672 ADULT EDUCATION IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3) Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

*JECA 673 CURRENT TRENDS IN AGRICULTURAL EDUCATION. (3) Class work pertains to current trends and significant developments in agricultural education. May be repeated to a maximum of nine credits.

*JECA 675 THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY. (3) This course is designed to explore the dynamics of community development and leadership communication within both geographic-bounded communities and communities of place. (Same as SOC 675.)

*JECA 676 SUPERVISION IN AGRICULTURAL EDUCATION. (3) This course includes practice in teaching for observation by others, student teaching, and school visiting.
CLM 685 COMMUNITY DEVELOPMENT THEORY AND PRACTICE. (3)
This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as SOC 685.)

CLM 691 STRUCTURE OF U.S. AGRICULTURE. (3)
This seminar will analyze the structural transformation of U.S. agriculture in the 19th and 20th centuries in the context of sociological theory. Emphasis is given to key historical transitions, changing social relations of production and state policy. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. agriculture. Prereq. Graduate standing in sociology, agricultural economics or CLD or consent of instructor. (Same as AEC/SOC 691.)

*CLD 694 THE ADMINISTRATION OF AGRICULTURAL EDUCATION. (3)
A course designed for superintendents, high school principals, and other administrators. Its purpose is to prepare administrators and supervisors for leadership in agricultural education. (Same as EDL 694.)

CLD 748 MASTER’S THESIS RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

1CLD 750 PRACTICUM IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
Supervised individual graduate projects on selected issues in community and leadership development. May be repeated to a maximum of six credits. Prereq: Consent of instructor. (Same as HSE 595.)

CLD 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: All course work toward the degree must be completed.

CLD 775 TOPICAL SEMINAR IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (3)
Advanced study of topics of current importance in community and leadership development such as dispute resolution, volunteer management, or advanced program design and evaluation. May be repeated to a maximum of six credits.

CLD 780 SPECIAL PROBLEMS IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6)
Supervised individual study on selected issues in community and leadership development. May be repeated to a maximum of six credits. Learning contract must be filed with Director of Graduate Studies.

CLD 790 RESEARCH IN COMMUNITY AND LEADERSHIP DEVELOPMENT. (1-6)
Supervised individual graduate research projects on selected issues in community and leadership development. May be repeated to a maximum of six credits. Research Learning contract must be filed with the Director of Graduate Studies.

CLM Clinical Leadership and Management

CLM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)
Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also includes a discussion of major health problems and health-related health care programs. (Same as HHS/HSM 241.)

CLM 350 HEALTH POLICY AND POLITICS. (3)
This course will address the development of past and current U.S. health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media, and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed. Prereq: Consent of instructor. (Same as HHS/HSM 350.)

CLM 351 HEALTH SERVICES ADMINISTRATION. (3)
Theories and practices of administration in health care institutions with special emphasis on organizational behavior and analyses of various administrative processes and techniques. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HHS/HSM 351.)

CLM 353 ETHICS IN HEALTHCARE. (2)
The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed. (Same as HHS 353.)

CLM 354 HEALTH LAW. (3)
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical-moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HHS/HSM 354.)

CLM 355 FINANCIAL MANAGEMENT OF HEALTHCARE INSTITUTIONS. (3)
A review of financial management practices in health care institutions. Course will analyze regulatory and third party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HSM 355.)

CLM 405 EPIDEMIOLOGY AND BIOSTATISTICS. (3)
This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiologic factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious disease; rates of morbidity and mortality, sensitivity, specificity, and predictive values’ strategies used in epidemiological studies to include measures of disease effect, validity, reliability; sampling methods and computer-based biostatistical analysis that emphasize the generalized linear model and forms of SEM as appropriate for an upper division undergraduate course. Prereq: Admission to the CLM or HHS program or consent of instructor. (Same as HHS 405.)

CLM 444 LEADERSHIP AND HUMAN RESOURCE MANAGEMENT. (3)
This course focuses on clinical leadership and managerial roles and responsibilities, with particular emphasis on organizational design, theory, and behavior. Human resource management, team leadership, and strategies for promoting employee motivation, loyalty, and productivity will be discussed. Other topics to be discussed include writing a business plan, financial and budgetary considerations, public relations, and quality and productivity. Laboratory compliance, government regulations, and accreditation will also be covered. Prereq: Admission to the CLM Program or consent of instructor.

CLM 445 QUALITY AND PRODUCTIVITY IMPROVEMENT AND EVALUATION. (3)
A core program course that focuses on leadership and management knowledge, skills, and practices that promote clinical quality, efficiency, and productivity. Methods to measure, monitor, and evaluate quality and productivity will be discussed. Prereq: Admission to the CLM Program or consent of instructor.

CLM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)
Theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as HSM 452.)

CLM 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as HHS 480.)

CLM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR. (3)
This course examines the structure and function of the long-term care sector with emphasis on nursing homes and the role of noninstitutional alternatives. Analysis focuses on the impact of changes in reimbursement and regulatory policy, interorganizational relations, newly emerging treatment modalities, and the influence of the external organizational, economic, and political environment. Prereq: A course in health care delivery systems or permission of instructor. (Same as HSM 510.)

CLM 595 DIRECTED STUDIES. (1-3)
Independent work devoted to research on specific problems, to challenge the student to synthesize concepts from his total program and relate them to his allied health specialty. Conference, one to three hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor. (Same as HSE 595.)
Course Descriptions

CLS Clinical Laboratory Sciences

CLS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3) Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated for a maximum of 3 credits; credit/didactic and up to 2 credits experiential/research. (Same as AT 500, HS 500, CNU 500, CD 500, PAS 500.)

CLS 501 SEMINAR IN ADVANCED HEMATOLOGY. (2) Study of the biochemical aspects of blood cell physiology and kinetics as applied to practice in the clinical hematology laboratory and a review of current related literature. This course is designed for practicing clinical laboratorians or medical technologists who are pursuing a graduate degree. Prereq: BCH 401 or equivalent and consent of instructor.

CLS 520 REPRODUCTIVE LABORATORY SCIENCE. (3) This is a course designed to educate students in basic theories, procedures and quality assurance concepts of assisted reproduction. It will consist of two lectures per week and a limited number of three-hour laboratories. Computer-assisted instruction and video-tapes will also be used. Prereq: Admission to the professional CLS program; or a baccalaureate degree with CLS certification; or consent of instructor.

CLS 610 ETHICS IN CLINICAL SCIENCES RESEARCH. (1) Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as CD/CNU/PT/RAS 610.)

CLS 816 HISTOTECNOLOGY II. (3) The study of the principles and applications of microscopy, frozen sectioning and some special staining techniques.

CLS 832 BASIC CLINICAL CHEMISTRY. (1) The study of the theory and practice of clinical chemistry laboratory testing, including quality control, instrumentation principles, problem-solving, and appreciation of accuracy of and confidentiality for patient laboratory findings. Prereq: Admission into the Clinical Laboratory Sciences Professional Program or consent of instructor.

CLS 833 BASIC HEMATOLOGY. (1) The theory and practice of clinical hematology laboratory testing, including manual and automated procedures, instrumentation principles, quality assurance, and problem-solving. Hemopoesis, hemostasis, and blood cell function are discussed as they relate to clinical laboratory practice. Special emphasis is placed on the relationship of clinical hematology testing to pathophysiology and on the acquisition of valid test results. Prereq: Admission into the Clinical Laboratory Sciences Program or consent of instructor.

CLS 838 BASIC IMMUNOHEMATOLOGY. (1) An introduction to the principles and practice of blood banking follows a review of classic genetics and fundamentals of immunology. The course includes didactic instruction in blood group systems; donor selection and component preparation; antibody detection and identification and compatibility testing. Prereq: Admission to the Clinical Laboratory Sciences Program and CLS 835 (or equivalent) or consent of instructor.

CLS 851 BASIC CLINICAL MICROBIOLOGY. (1) The study of medically significant microbiology, including commensal flora, normal flora and pathogens. Lectures also cover microbial physiology, interactions between host and pathogenic microorganisms, and the clinical and epidemiological consequences of these interactions. Prereq: Admission to the Clinical Laboratory Sciences Program.

CME Chemical Engineering

CME 006 THE ENGINEERING PROFESSION (JUNIOR AND SENIOR). (0) Activities of the Student Chapter of the American Institute of Chemical Engineers (for junior and senior year chemical engineering students). Lecture: one hour per week. May be repeated three times. Prereq: Chemical engineering major.

CME 101 INTRODUCTION TO CHEMICAL ENGINEERING. (1) An introduction to the chemical engineering profession including: problem-solving techniques, use of computers, computer problems and lectures by practitioners.

CME 200 PROCESS PRINCIPLES. (3) A course in material and energy balances, units, conversions, tie elements, recycle, bypass, equations of state, heat effects, phase transitions, and the first and second laws of thermodynamics applications in separation processes involving equilibrium reactions and energy exchange. Prereq: CHE 115, CME 199; “C” grade or better in MA 113; “C” average or better in CHE 105 and CHE 107; prereq or concur: MA 114, PHY 231.

CME 220 COMPUTATIONAL TOOLS IN CHEMICAL ENGINEERING. (3) An introduction to computational tools used in chemical engineering, such as Microsoft Excel, MATLAB, and Aspen. Prereq: Grade of “C” or better in CME 200.

CME 300 ENGINEERING THERMODYNAMICS. (4) Fundamentals of thermodynamics, review of first law, second and third laws, VL, LL and SL equilibria, homogeneous and heterogeneous chemical reaction equilibria. Prereq: MA 213, PHY 231 and a “C” grade or better in CME 200.

CME 330 FLUID MECHANICS. (3) Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows; flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing, CME 200, CME 300, CME 199, and MA 214.

CME 395 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3) Individual work on some selected problems in the field of chemical engineering. May be repeated one time. Prereq: Engineering standing and approval of the chairperson of the department.

CME 404G POLYMERIC MATERIALS. (3) Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and thermal properties, crystallinity, polymer blends, evaluation of polymers for specific applications (aerospace, automotive, biomedical), laboratory activities for each of the above. Prereq: Engineering standing, CHE 230 or CHE 236, MSE 301 or consent of instructor. (Same as MSE 340G.)

CME 415 SEPARATION PROCESSES. (3) Separations based on both equilibrium stage concepts and mass transfer rate control are addressed in a range of chemical process operations, including distillation, gas absorption, extraction, adsorption, and membrane-based processes. Design problems are conceived to require computer-aided modeling and analysis. Prereq: CME 300, engineering standing.

CME 420 PROCESS MODELING IN CHEMICAL ENGINEERING. (3) Applications of principles of material and energy balances, thermodynamics, heat and mass transfer, physical chemistry and numerical methods to problems in separation and transport processes and reactive systems. Prereq: CME 199, MA 214; prereq or concur: CME 320, CME 330, engineering standing.

CME 425 HEAT AND MASS TRANSFER. (4) Fundamental principles of conduction and convective heat transfer, and diffusion and convective mass transfer. Design applications to heat exchanges and packed bed absorbers. Prereq: CME 320, CME 330, engineering standing.

CME 432 CHEMICAL ENGINEERING LABORATORY I. (2) A laboratory course emphasizing experimental work in fluid flow, separations, heat transfer, and mass transfer. A majority of this course will focus on lab report writing, statistics, experimental design and safety in the laboratory. Prereq: CME 330, CHE 446G, CME 415; concur: CME 425, CME 420, and engineering standing.

CME 433 CHEMICAL ENGINEERING LABORATORY II. (2) A continuation of CME 432. A laboratory course emphasizing more detailed experiments in fluid flow, heat transfer, mass transfer, separations, and chemical reaction kinetics with more extensive data collection and analysis as well as a design component based on the experimental results. Prereq: CME 432; concur: CME 550.

CME 455 CHEMICAL ENGINEERING PRODUCT AND PROCESS DESIGN I. (3) A lecture and problem-solving course emphasizing process economic evaluation, product design, and process synthesis as they apply to chemical units and systems. Appropriate use of software for simulation and design of chemical systems will also be emphasized. Prereq: CME 220, CME 330, CME 415, CME 420, CME 425; prerequisite or concur: CME 550, engineering standing.

CME 456 CHEMICAL ENGINEERING PROCESS DESIGN II. (4) A lecture and problem-solving course intended to combine the principles of chemical engineering with optimization as they apply to the design of chemical processes. Results of each design case studied will be presented by both oral and written reports. Prereq: COM 199, CME 455, CME 550 and engineering standing.

CME 462 PROCESS CONTROL. (3) Basic theory of automatic control devices and their application in industrial chemical plants is emphasized. Identification of control objectives, appropriate measurements and manipulations, and possible loops between these, requires integration of the control system with the original process design. Interactions between process units are analyzed using well-known analytical tools and design strategies. Prereq: Consent of instructor.

CME 470 PROFESSIONALISM, ETHICS AND SAFETY. (2) Detailed lectures and supervised discussions on standards of ethics and safety as they relate to the chemical engineering profession. Emphasis will be on safety in plant design and process operations, laboratory safety, hazardous risk management, regulation and oversight. Prereq: Engineering Standing. Concurrent: CME 455.

CME 471 SEMINAR.
CME 505 ANALYSIS OF CHEMICAL ENGINEERING PROBLEMS. (3) The application of differential and integral equations to traditional and non-traditional chemical engineering problems. Prereq: CME 425, CME 550 concurrent or consent of instructor.

CME 542 ELECTRIC POWER GENERATION TECHNOLOGIES. (3) Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, and solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as EGR 542.)

CME 550 CHEMICAL REACTOR DESIGN. (3) A lecture and problem course dealing with interpretation of rate data and development of performance equations for single and multiple reactor systems. A design problem will be selected for an industrially important chemical reaction system requiring computer solution. Prereq: CS 221, CME 420, CME 425, and engineering standing, or consent of instructor.

CME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3) Theory and practice as related to the chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. (Same as ME/MSF/MSE 554.)

CME 556 INTRODUCTION TO COMPOSITE MATERIALS. (3) Applications, materials selection and design of materials. Relation between properties of constituent materials and those of composite. Processing methods for materials and for some structures. Lab focuses on preparation and testing of composite materials and their constituents. Prereq: MSE 201, 301, CHE 236, and Engineering Standing, or consent of instructor. (Same as ME/MSF/MSE 556.)

CME 580 DESIGN OF RATE AND EQUILIBRIUM PROCESSES FOR WATER POLLUTION CONTROL. (3) The design of chemical and physical processes for the removal and concentration of organic, inorganic, and particulate pollutants from aqueous solution/suspension: adsorption, destabilization, disinfection, membrane processes, thermal processes, flow through beds of solids, etc. Prereq: CHE 440G, CME 425 and prereq or concur: CME 550 or consent of instructor.

CME 599 TOPICS IN CHEMICAL ENGINEERING. (3) A detailed investigation of a topic of current significance in chemical engineering such as contemporary energy topics, fuels development, membrane science, computer control of chemical processing. A particular topic may be offered twice under the CME 599 number. May be repeated to a maximum of six credits. Prereq: Engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics, and mathematics. For major work, a candidate must hold a bachelor’s degree in chemical engineering or its equivalent.

CME 620 EQUILIBRIUM THERMODYNAMICS. (3) The criteria for physical and chemical equilibria, including: predictive equations, solution theory, chemical activity, coupled chemical equilibria, and external constraints. Emphasis may be on vapors, aqueous equilibria, chemical reaction equilibria, or complex ionic equilibria in dilute aqueous solutions and suspensions. Prereq: CHE 440G and CME 320 or consent of instructor.

CME 622 PHYSICS OF POLYMERS. (3) An in-depth look at the physical and mathematical descriptions of polymer behavior. Comparison of diverse approaches to modeling the same behavior. Study of isolated polymer chain and how it relates to polymers in rigid, rubbery, melt, and solution states. Prereq: Graduate standing and undergraduate degree in the physical sciences or engineering that includes advanced calculus, differential equations, and matrix algebra. (Same as MSE 622.)

CME 630 TRANSPORT. (3) A unified study of physical rate processes in liquids and vapors, including: mass, energy, and momentum transport, transport in chemically reacting systems, similarities, turbulence modeling, buoyancy-induced transport and multiphase diffusion. Prereq: ME 330, CME 425, CME 505 concurrent or consent of instructor.

CME 650 ADVANCED CHEMICAL REACTOR DESIGN. (3) Rate expressions for heterogeneous reaction kinetics; energy and mass transport within and external to reacting porous catalysts; design equations for multiphase fixed and moving bed reactors. Prereq: CME 550, CME 630, CME 505, or instructor consent.

CME 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3) A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/EE/MSE 664.)

CME 680 BIOCHEMICAL ENGINEERING. (3) Principles and design of processes involving biochemical reactions, including aerobic and anaerobic respirations and fermentations, and involving pure and mixed cultures. Energy considerations, heat and mass transfer, biochemical kinetics, and application to biological waste treatment. Prereq: CME 550, CME 630, CHE 440G or consent of instructor. (Same as BAE 680.)

CME 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CME 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Preregistration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

CME 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CME 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

CME 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) CME 771 SEMINAR. (0) Review of current literature in the field of chemical engineering; general discussion and presentation of papers on departmental research. Lecture, one hour per week. Required for all graduate students in chemical engineering.

CME 779 MEMBRANE SCIENCES COLLOQUIUM. (1) Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student’s own research in particular. May be repeated to a maximum of six credits. (Same as BCH/CHM/PHY 779.)

CME 780 SPECIAL PROBLEMS IN CHEMICAL ENGINEERING. (1-3) Independent study, design, or research in chemical engineering topics. May be repeated to a maximum of 12 credits. Prereq: Approval of the departmental director of Graduate Studies.

CME 790 RESEARCH IN CHEMICAL ENGINEERING. (1-9) Graduate Research in Chemical Engineering on a topic approved by the Departmental Graduate Studies Committee. May be repeated to a maximum of two semesters. Prereq: Consent of the Director of Graduate Studies.

CNU 501 NUTRACEUTICALS AND FUNCTIONAL FOODS IN HEALTH AND DISEASE PREVENTION. (2) This course will acquaint students with general concepts in nutrition that relate to physical activity, injury prevention, and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level physiology or equivalent. (Same as HHS 400.)

CNU 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3) Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CLS 500, CD 500, PAS 500.)

CNU 501 NUTRACEUTICALS AND FUNCTIONAL FOODS IN HEALTH AND DISEASE PREVENTION. (2) The course will cover the classification, brief history and the impact of nutraceuticals and functional foods on health and disease. An example of nutraceuticals to be covered in the course includes isoflavones, flavonoids, carotenoids, lycopene, garlic, omega 3 fatty acids, sphingolipids, vitamin E and antioxidants, S-adenosyl-L-methionine, CLA, creatine, herbal products in foods and lipic acid. Prereq: Undergraduate organic chemistry and/or biochemistry.
CNU 502 OBESITY C2C: CELL TO COMMUNITY (Subtitle required). (2)
This course will provide an overview of the obesity epidemic from an applied clinical as well as public health perspective. Topics to be covered include: etiology, pathophysiology, evaluation, treatment, management, and prevention of obesity throughout the lifecycle.

CNU 503 NUTRITION FOR THE HEALTH PROFESSIONS: MEDICAL NUTRITION THERAPY. (1)
An interdisciplinary approach to applied medical nutrition therapy and its role in primary, secondary, and tertiary healthcare delivery. Covers the fundamental principles and concepts of nutrition science as applied to the human life cycle. Prereq: Undergraduate senior students planning to enroll or students who are currently enrolled in the Colleges of Medicine, Nursing, Dentistry, Pharmacy or Health Sciences. Completion of at least one semester of physiology, one semester of organic chemistry or biochemistry, and preferred, clinical exposure.

CNU 601 INTEGRATED NUTRITIONAL SCIENCES. (3)
The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism, (2) the impact of nutritional influences on macronutrient metabolism to health and disease, (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: IBS 601, PGY 206. (Same as NS/ASN 601.)

CNU 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrated analysis of the properties, metabolism, biochemical and physiological functions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as ASN/NSC 602.)

CNU 603 INTEGRATED NUTRITIONAL SCIENCES III. (3)
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as FSC/NS-603.)

CNU 604 LIPID METABOLISM. (3)
Emphasis on factors influencing the absorption of fats and fatty acids, distribution, and incorporation of fatty acids into body tissues, the biosynthesis of and catalysis of fatty acids, as well as cholesterol, bioactive eicosanoid production and the involvement of fats in the disease process. Lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: NS/CNU 601, BCH 401G and PGY 412G or consent of instructor. (Same as NS 604.)

CNU 605 WELLNESS AND SPORTS NUTRITION. (3)
Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in physical and sport. Targeted focus areas include: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G and BCH 401 G or equivalent or consent of instructor. (Same as NS/PT 605.)

CNU 606 MOLECULAR BIOLOGY APPLICATIONS IN NUTRITION. (3)
Focus will be on the use of the most recently developed techniques and model systems in molecular biology for studying nutrient regulation of gene expression. Examples include current problems in nutrition such as models for engineering plants containing more desirable nutrient sources (fats); for studying effects of various nutrients in transgenic mice on tumor suppressor proteins; and for understanding some of the mechanisms of human nutrition related to growth and development. Prereq: consent of instructor. (Same as NS/PT 606.)

CNU 607 NUTRITIONAL IMMUNOLOGY. (3)
Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from experimental and clinical perspectives. A lecture and problem-based learning process. Lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: NS/CNU 601, BCH 401G and PGY 412G or consent of instructor. (Same as NS 607.)

CNU 613 APPLIED NUTRITION AND DISEASE PREVENTION. (2)
This course is designed to give the medical and health professional student an understanding of the basic principles of normal nutrition and medical nutrition therapy during the course of health and disease. A more detailed list of topics will be provided. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient counseling. Students are directed to develop critical thinking with regard to class presentations including case studies with regard to various medical or health services, e.g., surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CNU 601, NS/ASN 602, NS/ASC 602, NS/NFS 610 and graduate status or consent of instructor. (Same as NS 701.)

CNU 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1-3)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as NFS/NS 704.)

CNU 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as NFS/NS 782.)

CNU 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as NFS/NS 790.)

COM Communication

COM 101 INTRODUCTION TO COMMUNICATION. (3)
An introduction to the process of communication as a critical element in human interaction and in society. Designed to enhance effective communication and informed use of the mass media.

COM 181 BASIC PUBLIC SPEAKING. (3)
A course designed to give the student platform experience in the fundamentals of effective speaking.

COM 199 PRESENTATIONAL COMMUNICATION SKILLS. (1)
Introduces students to fundamental oral communication skills needed to prepare and present messages effectively. Note: This course will not substitute for the three-credit course COM 181, Basic Public Speaking. It will count toward partial completion of the oral communication skills component of the University Studies Program.

COM 249 MASS MEDIA AND MASS CULTURE. (3)
An examination of the interplay between the technology and content of the mass communication media. Prereq: COM 101 or its equivalent.

*COM 252 INTRODUCTION TO INTERPERSONAL COMMUNICATION (GWR). (3)
This writing intensive course examines basic verbal and nonverbal concepts affecting the communication process between individuals in various interpersonal contexts. Course also requires participation in written and oral activities designed to develop and improve interpersonal skills. Topics may include: perspective-taking, relationship and conversation management, effective listening, conflict management, communication climate, communication anxiety, and cultural gender differences in interpersonal communication.

COM 281 COMMUNICATION IN SMALL GROUPS. (3)
A study of communication processes in small group situations. Topics include conflict, leadership, and decision-making. Students will participate in group discussion and develop skill in analyzing group performance.

COM 285 APPLIED PHONETICS. (3)
Study of the phonetic structure of English language with requirement of mastery of international Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in general speech, speech correction, radio, television, and theatre.

COM 287 PERSUASIVE SPEAKING. (3)
A study of the processes involved in attitude change, with emphasis on the preparation and delivery of persuasive messages.
University of Kentucky

Course Descriptions

COM 311 TAKING CONTROL OF YOUR HEALTH: PATIENT-PROVIDER COMMUNICATION. (3)
This course helps students explore, understand, and appreciate the patient-provider relationship through an examination and analysis of selected health communication case studies and related materials. It is also designed to improve communication skills with and among physicians, nurses, and allied health professionals.

COM 312 LEARNING INTERCULTURAL COMMUNICATION THROUGH MEDIA AND FILM. (3)
This course examines intercultural and co-cultural divides using a skills-based approach. Students will be exposed to cultural communication situations and will apply skills using lecture, discussion, and various media (e.g., news, radio, film, blogs), equipping them with more effective skills for communicating with other groups, communities, and cultures.

COM 313 INTERPERSONAL COMMUNICATION INCLOSE RELATIONSHIPS. (3)
Focuses on describing and explaining communication processes that occur within the context of close relationships. Three general topic areas include: (1) developing and escalating relationships, (2) satisfying interpersonal relationships, and (3) coping with relational challenges.

COM 314 THE DARK SIDE OF INTERPERSONAL COMMUNICATION AND RELATIONSHIPS. (3)
Provides an overview of research and theory related to the “dark side” of interpersonal communication and relationships. This course will cover topics such as secrets, bullying, cyberstalking, verbal abuse, and revenge between romantic partners, family members, friends, and sometimes strangers.

*COM 315 UNDERSTANDING WORKPLACE COMMUNICATION IN A DIVERSE U.S. SOCIETY. (3)
Understanding workplace communication in U.S. society requires an interdisciplinary approach in preparing students to develop an enlightened consideration of the complex and contextual nature of communication in organizations. The emphasis on community, culture, and citizenship is designed to engage students using dynamic learning experiences such as debates and discussion over topics relevant to the role of communication and organizations in U.S. society.

COM 325 INTRODUCTION TO ORGANIZATIONAL COMMUNICATION. (3)
Designed to introduce students to basic concepts in the study of organizational communication. The course considers approaches to the practice and study of communication within organizational settings, including classical approach, human relations, human resources approaches, systems approaches, cultural approaches, and critical approaches. It also introduces specific issues within the study of organizational communication, including assimilation, decision-making, conflict, change, emotion, cultural diversity and communication technologies. Prereq: Communication major; others need departmental approval.

COM 350 LANGUAGE AND COMMUNICATION. (3)
An introductory survey course covering syntactic, semantic and pragmatic aspects of language as they relate to communication. Language learning, sign systems, psycholinguistics, and the nature of meaning are selected topics. Emphasis is on behavioral, communication approach. Not open to students who have completed a 300-level (or above) linguistic class.

COM 351 INTRODUCTION TO COMMUNICATION THEORY. (3)
Considers various theoretical perspectives which lead to a more thorough understanding of communication processes. Begins with discussion of the development of theory and inquiry. Includes perspectives of systems, cognitive, behavioral, affective, symbolic interactionist, dramatic, cultural and social reality, interpretive and critical theories.

#COM 352 INTERPERSONAL COMMUNICATION AND SOCIAL MEDIA. (3)
With the proliferation of technology enhanced social media (e.g., Facebook, Google+, chat, twitter) available at the fingertips of individuals through multiple channels (e.g., phone, iPad, laptop, online video games), interpersonal relationships are being affected. Negotiating this relatively new, understudied, and quickly evolving terrain can present relational difficulties for a variety of relationships types. Students in this class will gain a thorough understanding of multiple communication platforms and the communication theory that can explain the interactions occurring in each platform, as well as improve their mediated communication skills to enhance interpersonal relationships. Prereq: CIS 110, CIS 111, COM 252.

COM 365 INTRODUCTION TO COMMUNICATION RESEARCH METHODS. (3)
An introduction to the methods of applied research into the origins, nature, and effects of communication processes. Provides skills necessary for designing research projects and for interpreting and critically evaluating research results. Prereq: STA 210.

*COM 390 COMMUNICATION EDUCATION ABROAD (Subtitle required). (1-6)
Communication education abroad is an academically rigorous and experientially rich opportunity for students to work with a UK faculty member on a formal study abroad course, research project, or other academic experience to one or more of many communication theories, concepts, and skills. Any communication education abroad offering will be grounded firmly in the communication discipline in ways designed to enrich one’s understanding of how individual and local communication norms and practices both shape and are shaped by global trends, communication, and interactions. Prereq: CIS 110 and CIS 111 or approval from instructor.

*COM 395 INDEPENDENT WORK. (1-3)
Research and study of special topics in communication. The student proposes the specific study to be undertaken and formally contracts with a faculty supervisor for guidance and evaluation. Ordinarily, projects will require the production of written materials as a basis for the evaluation. May be repeated to a maximum of six credits. Prereq: Communication major, departmental approval, and completion of learning contract prior to registration.

*COM 399 INTERNSHIP IN COMMUNICATION. (1-6)
Provides field-based experience in communication through work in industry, government, education, etc. Pass-fail only. May be repeated to a maximum of six credits. A maximum of three credit hours may be counted toward the communication major. Prereq: Consent of Department Internship Director prior to registration, and completion of departmental learning contract.

#COM 425 COMMUNICATION, NEGOTIATION, AND CONFLICT MANAGEMENT IN ORGANIZATIONS. (3)
This course explores the role of communication in negotiation and conflict management in organizations. The course examines conflict theories and approaches, negotiation processes, and third party intervention through the study of strategies and tactics, interaction processes, phases and stages of negotiation development and conflict framing. The course examines strategies and tactics used in exchange of offers and counteroffers, salary negotiations, buying and selling of products, team bargaining, and multiparty negotiations. Prereq: CIS 110, CIS 111, COM 325.

*COM 449 MASS MEDIA AND SOCIAL INFLUENCE. (3)
This course examines the relationship between the organization of modern society and its communication media with special emphasis on cultural processes and social change. The social-psychological bases of communication are studied within a context of theory and research. Prereq: CIS 110, CIS 111, COM 249.

*COM 452 STUDIES IN INTERPERSONAL COMMUNICATION. (3)
Examines current theory and research on the nature and development of interpersonal communication ability. Topics include: understanding strategic communication relational communication elements, and cultural and institutional influences on the development of interpersonal communication. Prereq: CIS 110, CIS 111, COM 252.

*COM 453 DIGITAL AND MASS COMMUNICATION MEDIA LITERACY. (3)
A course designed to examine theory and research related to the use of mass media and to the relationship of digital and mass communication media to contemporary social issues. Prereq: CIS 110, CIS 111, COM 249.

#COM 454 HONORS SEMINAR IN COMMUNICATION (Subtitle required). (3)
Intensive study of a communication topic in professional, theoretical, and research methodology areas of communication. This seminar will count toward a Communication major and toward credits for graduation. Prereq: COM 351, COM 365, and 3.3 GPA in Communication Major, or permission by instructor.

*COM 462 INTERCULTURAL COMMUNICATION. (3)
An overview of problems, issues, processes and assumptions involved with communicating across cultures and co-cultures. Theories of cognition and communication will be used to explore the manner in which communication processes are influenced by people from diverse cultures. Differences in both verbal and nonverbal communication among different cultural groups will be discussed. Prereq: CIS 110, CIS 111, COM 252.

#COM 471 INTRODUCTION TO HEALTH COMMUNICATION. (3)
This course examines theory and research relevant to health communication including interpersonal, organizational, and mass communication approaches. Topics include the role of communication in general models of health and illness, the relationship between patients and healthcare providers, social support, and health campaigns. Prereq: CIS 110, CIS 111.

*COM 482 STUDIES IN PERSUASION. (3)
Examines theory and research related to the development of messages and the processes by which people are persuaded through communication. Topics include social influence, attitudes, and counter-persuasion. Prereq: CIS 110, CIS 111.

*COM 525 ADVANCED ISSUES IN ORGANIZATIONAL COMMUNICATION (Subtitle required). (3)
Examines theory and research related to understanding advanced issues in organizational communication. Topics may include strategies of innovation, organizing, networking, decision-making, globalization, technology, power, and diversity. Prereq: CIS 110, CIS 111, COM 325.

*COM 535 RISK AND CRISIS COMMUNICATION. (3)
This course examines critical case studies and communication research practice. Special emphasis is placed on crisis planning, media relationships, image restoration, ethical responses, and organizational learning. Prereq: CIS 110, CIS 111, CIS 325.

#COM 535 CRITICAL ANALYSIS OF COMMUNICATION AND PERSUASION IN POPULAR CULTURE. (3)
This course focuses on critical perspectives on how the media and entertainment industries can be interpreted and analyzed. The course examines the role of mass communication and the impact of mass communication on individual behavior and society. Prereq: CIS 110, CIS 111, COM 249.
Course Descriptions

**CPH College of Public Health**

**CPH 201 INTRODUCTION TO PUBLIC HEALTH.** (3)
This course provides the student with basic knowledge about the discipline of public health. After receiving a philosophical and political orientation to public health, students will begin to acquire functional knowledge of the strategies and principles often applied in public health practice. Key content areas (such as HIV prevention, maternal and child health, reducing obesity rates, and reducing tobacco addiction) will become focal points for the investigation of these strategies.

**CPH 202 PUBLIC HEALTH THROUGH POPULAR FILM.** (3)
This course will provide students with an introductory understanding of public health concepts through critical examination of popular cinema and instruction in basic public health principles, disease principles, and behavioral and social interactions related to the movie topics. A combination of film viewing and film discussion will enable students to understand the relationship between behavioral, environmental, biological and other risk factors with disease, injury or other health outcomes. The effect of social, economic and health systems context will also be examined. In addition, students will learn to distinguish between fact and fiction with regard to the science and activities of public health as portrayed in cinema.

**CPH 203 SEXUAL HEALTH.** (3)
This course will be an in-depth introduction to the relationship of sex and sexual behaviors to health and wellness.

**CPH 310 DISEASE DETECTIVES: EPIDEMIOLOGY IN ACTION.** (3)
This course will outline the history of epidemiology as a science and examine its wide-ranging contributions to the fields of public health, medicine, and the social sciences. This course will focus on epidemiological methods to investigate health outcomes and identify associated and causative factors of disease in populations.

**CPH 365 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required).** (3)
This course provides focused coverage within domains of public health, including: Health Behavior; Epidemiology; Gerontology; Environmental Health; Health Services Management, and Biostatistics. A central goal of these special topics courses is to provide a public health context to material in a way that promotes applicability to undergraduate majors university-wide.

**CPH 440 FOUNDATIONS OF HEALTH BEHAVIOR.** (3)
This course will provide students with an overview of how the social and behavioral sciences contribute to primary prevention in the rapidly expanding field of health behavior. Emphasis will be placed on theory-driven approaches that are supported by empirical investigations. Students will acquire a working knowledge of foundational theories used in public health practice as well as the ability to measure key theoretical constructs. The course includes an overview of public health issues in the United States. The course also includes training regarding the translation of research findings into public health practice.

**CPH 535 DATABASES AND SAS PROGRAMMING.** (3)
Students will learn how to construct and maintain databases with applications to public health. They will also learn how to program in SAS, the leading statistical analysis system. SAS skills include report writing, MACRO writing, and Programming using SAS Intranet. Lecture, two hours; laboratory, two hours per week. Prereq: STA 291 or equivalent.

**CPH 601 ENVIRONMENTAL HEALTH.** (3)
An introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as ES 620.)

**CPH 602 OVERVIEW OF THE HEALTH CARE DELIVERY SYSTEM.** (3)
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

**CPH 604 PUBLIC HEALTH AND DISEASE PREVENTION.** (3)
This course will introduce students to issues of public health and populations health status. Principles of disease prevention and the focus on population health will be explored. The behavior of population is a major variable in health outcomes. Behavior models resulting in positive health will be introduced. Prereq: Admission to MPH program or permission of instructor.

**CPH 605 EPIDEMIOLOGY.** (3)
This is an initial graduate level course in the principles of epidemiology and applications in preventive medicine and environmental health. The course consists of lectures and informal discussions. Principles and methods of epidemiologic research with a focus on issues of study design and analysis will be presented. Prereq: Graduate student in good standing in the MPH program, MSPH program, or community health nursing, or consent of instructor.

**CPH 608 PUBLIC HEALTH CAPSTONE.** (3)
To be successful in the M.P.H. degree program and the profession, students are expected to demonstrate excellence in communication skills both orally and in writing. The “manuscript” format for the capstone project is intended to familiarize students with the rigors of preparing manuscripts for professional journals. This course provides course credit for students who successfully complete the M.P.H. capstone project and oral final examination. May be repeated to a maximum of six credits.

**CPH 609 PUBLIC HEALTH PRACTICUM.** (3 or 6)
The public health practicum is designed as an integrative experience in the workplace. The practicum is an opportunity to apply classroom theories and methods under the guidance of an experienced public health practitioner with faculty oversight. Prereq: Admission to MPH program or permission of instructor.

**CPH 610 INJURY EPIDEMIOLOGY AND CONTROL.** (3)
The epidemiological basis for understanding the distribution and determinants for traumatic injury and poisonings including both intentional and unintentional events. Topics include sources of data, methodological approaches to studying injuries, evaluation of injury interventions and the link between epidemiology and public health policy impacting injuries. Prereq: PM 620 and/or permission of instructor.

**CPH 611 ADVANCED EPIDEMIOLOGY.** (3)
This course provides specialized epidemiologic content and method designed to meet the research and practice needs of health professionals. Practice-based problem sets and hands-on computer assignments will complement this seminar-oriented course, focusing on the role of epidemiology in the prevention of disease and injury. Prereq: CPH 605 or consent of instructor. (Same as PM 621.)

**CPH 612 INFECTIOUS/EMERGING DISEASES EPIDEMIOLOGY.** (3)
The theory/concepts of infectious diseases epidemiology, such as epidemic modeling expos- tulated through a systematic study of the most recent emerging diseases. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH 613 MOLECULAR EPIDEMIOLOGY, CANCER PREVENTION AND CONTROL.** (3)
This course consists of didactic lectures, journal clubs, and small group roundtable discussions related to the principles of underlying biomarker discovery and development for cancer prevention and control. The overarching goal of this course will be to assess how biomarkers are developed and used for the risk assessment, early detection, diagnosis, prognosis, and theragnosis of cancer. Prereq: CPH 605 or consent of instructor.

**CPH 614 MANAGERIAL EPIDEMIOLOGY.** (3)
This course applies and integrates the principles and tools of epidemiology to the decision-making process in health care management. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

**CPH 615 CANCER EPIDEMIOLOGY.** (3)
This course applies and integrates the principles and tools of epidemiology to the study of cancer. The course includes discussion of the burden of various kinds of cancer across the United States and the world by age, gender, and race/ethnicity, the underlying biology behind the development of cancer in humans, cancer surveillance, the epidemiology of various kinds of cancer by category of major risk factors such as human behavior (e.g. smoking and alcohol use), endogenous/exogenous hormones, viruses, environmental/occupational, and diet, and sources of data and methods for evaluating cancer screening, measuring the impact of risk factors, determining the incidence of cancer and cancer clusters, measuring patterns of care, and understanding the determinants of survival. Prereq: CPH 605 or consent of instructor.
University of Kentucky

---

**Course Descriptions**

**CPH616 CARDIOVASCULAR DISEASE EPIDEMIOLOGY.**

This course is designed to study and evaluate the broad array of epidemiologic studies on cardiovascular disease, and the impact on prevention policy. Prereq: Enrollment in a Public Health degree program, CPH 605/PM 620 - Introduction to Epidemiology, or consent of instructor.

**CPH617 ENVIRONMENTAL/OCCUPATIONAL EPIDEMIOLOGY.**

A study of work-related and environmental exposures and hazards associated with adverse health outcomes. Integrating the fields of occupational and environmental epidemiology. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 620 or consent of instructor.

**CPH618 EPIDEMIOLOGY OF AGING.**

This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and CPH 605/PM 620 Intro to Epidemiology and GEN 650, or consent of instructor. (Same as GEN 618.)

**CPH620 OCCUPATIONAL AND ENVIRONMENTAL HEALTH II.**

Covers advanced theories and practices of identifying, assessing, and controlling occupational and environmental hazards that may adversely affect the health of communities and working populations. The course emphasizes harmful effects of non-chemical hazards, such as radiation, noise, hypoxia, and physical agents that lead to morbidity and mortality. However, evaluation and control measures will cover many types of hazardous exposures, including those from chemical exposures. Prereq: CPH 601.

**CPH622 TOXIC AGENTS AND THEIR IMPLICATIONS IN PUBLIC HEALTH.**

This course provides an overview of chemical agents within the environment, their interaction with the human organism, and resultant public health implications. The goal of this course is to utilize toxicological information to create, understand, and explain control strategies that protect and improve public health. Prereq: CPH 601.

**CPH630 BIOSTATISTICS II.**

Students will learn statistical methods used in public health studies. This includes receiver operator curves, multiple regression logistic regression, and latent stratification, the Mantel-Haenzel procedure, and the Cox proportional hazard model. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent. (Same as STA 681.)

**CPH631 DESIGN AND ANALYSIS OF HEALTH SURVEYS.**

Students will learn design and analysis issues associated with well-known national health surveys, including reliability and validity of measurements, instrument validation, sampling designs, weighing of responses, and multiple imputations. Students will learn how to use statistical software to analyze data from complex survey designs. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent.

**CPH632 MIXED MODELS IN PUBLIC HEALTH.**

Students will learn statistical techniques for analyzing longitudinal studies in public health that involve repeated measures and random effects. This course will cover multilvel regression models, Poisson regression models, logistic Models with random effects, crossover experiments, and nonlinear pharmacokinetic models. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent.

**CPH636 DATA MINING IN PUBLIC HEALTH.**

This course concerns statistical techniques and practical issues associated with the exploration of large public health data sets, the development of models from such data sets, and the effective communication of one’s findings. Prereq: STA 570 or 580 and CPH 535, or consent of instructor.

1CPH639 COMPUTING TOOLS FOR THE BIOMEDICAL SCIENCES.

**CPH641 PUBLIC HEALTH AND ANTHROPOLOGY.**

Examination of how the perspectives and methods of anthropology can be and have been applied in public health research and intervention projects. Prereq: Enrollment in the MPH. or Dr.PH program, or consent of instructor.

**CPH642 ECOLOGICAL PERSPECTIVES ON HEALTH BEHAVIOR.**

Exploration of ecological model of health behavior, based on theoretical and case-study literature. Contrasts individual-level and population-level approaches to health behavior. Prereq: CPH 604 or consent of instructor.

**CPH643 MEASURING HEALTH BEHAVIOR.**

This course focuses on measurement, the key component of research, and focuses on survey research. Ultimately this course emphasizes how to do research rather than what to research. Topics cover the capstone research process including theoretical framework, research design, ethical considerations, and rudimentary survey statistics. The goal of the course is to train the student in how to measure human behavior both responsibly and effectively. Prereq: Enrollment in the M.P.H. or Dr. P.H. program, or consent of instructor.

**CPH644 RURAL HEALTH DISPARITIES.**

Through class meetings, course readings, and assignments, this course will provide students with a comprehensive overview of issues pertaining to health disparities of rural populations by examining current programs and policies, relevant literature, public health practice, and quantitative and qualitative research pertaining to the health and well-being of rural populations.

**CPH645 FOOD SYSTEMS, MALNUTRITION AND PUBLIC HEALTH.**

Exploration of the role of the global food system in shaping food consumption and the implications for public health. Prereq: Enrollment in College of Public Health or consent of instructor.

**CPH646 SPECIAL TOPICS IN BEHAVIORAL HEALTH (Subtitle required).**

This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH647 RESEARCH METHODS FOR PUBLIC HEALTH.**

This course provides the student with basic knowledge about the design and analysis of research in the field of health behavior. The theory, design, applications, and analytic strategies used for various types of research are presented in a sequential format. Goals of the course include: 1) gaining the ability to critically evaluate research in health behavior 2) achieving competence in research methodology, and 3) understanding the conceptual application of analytic techniques to data. Prereq: M.P.H., Dr. P.H., or Ph.D. in public health student or permission of instructor.

**CPH648 ELIMINATING RACIAL AND ETHNIC HEALTH DISPARITIES.**

This course will help the learner understand differences in minority populations in order to help build and lobby for the infrastructure needed to prevent excess disease and death among underserved populations. Special emphasis in this class will be placed on understanding the role of culture in influencing the adaptation of health attitudes, practices, and behaviors. An additional focus will be placed on health status, current trends, and health indicators for special populations. Prereq: Graduate student in Public Health and others by instructor permission.

**CPH649 INDEPENDENT STUDIES IN HEALTH BEHAVIOR.**

Designed for advanced students with research or special study interest in Behavioral Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH650 MANAGEMENT OF PUBLIC HEALTH ORGANIZATIONS.**

This course teaches the theories and practice of administration as they are applied in public health settings. It addresses knowledge and applications of the functions of public health management and their relationship to organizational effectiveness. Prereq: College of Public Health major or by permission of instructor.

**CPH652 FINANCE MANAGEMENT FOR HEALTHCARE DELIVERY/PUBLIC HEALTH ORGANIZATION.**

This course is an overview of financial practices in public health care organizations, including government, non-profit, insurance and direct providers. Prereq: Enrollment in a Public Health degree program and CPH 602/HSN 601, or consent of instructor.

**CPH653 PUBLIC HEALTH LAW AND POLICY.**

Overview of public health law with emphasis on topics and materials used by public health practitioners, as well as the use of law to advance a public health agenda. Prereq: Public Health graduate standing: CPH 663, or consent of instructor.

**CPH655 PUBLIC HEALTH ACCOUNTING AND FINANCE.**

This course is designed to introduce the use of accounting and financial management techniques in the management of public health organizations. Emphasis will be on the use of accounting and financial information to achieve management functions such as planning, staffing, organizing, controlling, and directing. Prereq: Enrollment as an MPH student.

**CPH658 PUBLIC HEALTH ECONOMICS.**

This course describes the role and methods of economics as applied to public health care delivery in the United States. Prereq: Enrollment in a Public Health degree program, CPH 602/HSN 601, or consent of instructor.

**CPH660 GIS AND PUBLIC HEALTH.**

This course will introduce students to the ArcView Geographic Information System (GIS) to map and spatially analyze public health data. Prereq: Public Health graduate student or permission of instructor.

**CPH661 BIOETHICS FOR PUBLIC HEALTH PROFESSIONALS.**

This course will engage students in readings, projects, and discussions to address controversial issues of bioethics for public health professionals. Prereq: Enrollment in a Public Health degree program or consent of instructor.

**CPH662 PUBLIC HEALTH RESPONSE TO TERRORISM, DISASTERS AND EMERGENCIES.**

This course will focus on the public health concepts, history, methods, planning, and response preparedness to weapons of mass destruction, terrorism, natural and human-made disasters, and other health emergencies. Prereq: Enrollment in a Public Health degree program and CPH 605, or consent of instructor.

**CPH663 INTRODUCTION TO PUBLIC HEALTH PRACTICE AND ADMINISTRATION.**

This course is to be a practical application of the principles of health care organization to public health at the national, state, and local levels. Prereq: Health care organization course.
Course Descriptions

CPH664 DESIGN AND ANALYSIS OF CLINICAL TRIALS. (3)
This course will introduce the fundamental concepts used in the design of Phase IV clinical trials. Students will be directed to "Ten Essential Functions of Public Health" through weekly lectures, readings, and activities at the University of Kentucky and a local mentor, and will develop a plan for participating in some type of health-related project or activity during a four-week period. A paper or presentation summarizing the key components of the internship experience will be submitted upon returning to Lexington. Prereq: Enrollment in the Graduate Certificate in Global Health Program, and completion of the course CPH 751, Introduction to Global Health, or approval from the Director of the certificate.

CPH665 ETHICAL ISSUES IN CLINICAL RESEARCH. (3)
Based on NIH guidelines for Responsible Conduct of Research, this course will present ethical and regulatory guidelines for conducting clinical research. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills, or permission of instructor. (Same as PHR 665.)

CPH666 PRACTICUM IN CLINICAL RESEARCH I. (1)
This course for participants in the curriculum leading to the Graduate Certificate in Clinical Research Skills includes participation in a mentored research experience with the final goal of a research project and an in-class or seminar paper. Attendance at monthly journal club meetings, two annual retreats, and special seminars; and completion of research reports. Prereq: Participation in curriculum leading to the Graduate Certificate in Clinical Research Skills.

CPH667 PRACTICUM IN CLINICAL RESEARCH II. (1)
Participants working toward Graduate Certificate in Clinical Research Skills earn credit for associated activities and an abstract for a national meeting. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills.

CPH668 PRACTICUM IN CLINICAL RESEARCH III. (1)
Participants working toward Graduate Certificate in Clinical Research Skills earn credit for associated activities and a journal article or funding proposal. Prereq: Participation in curriculum leading to Graduate Certificate in Clinical Research Skills.

CPH669 METHODS AND TECHNOLOGIES IN CLINICAL AND TRANSLATIONAL SCIENCE. (3)
This overview course is designed to introduce the student to the major methods and technologies of clinical and translational science. The course will consist of 14 presentations followed by open discussion of the presentation and assigned readings by class members. The location of classes may change based on the content of the lecture. Homework assignments will provide exponential opportunities to work with the various methods and technologies. Active participation by all members is expected. Each weekly presentation is designed to provide a general overview of a method or technology commonly used in clinical and translational science. Discussions are intended to integrate the information across traditional disciplinary boundaries. Homework assignments are designed to provide practical experience with the discussion topic. Prereq: Graduate standing. (Same as BSC 731.)

CPH670 INTERDISCIPLINARY PROTOCOL DEVELOPMENT. (2)
This course is designed to orient students to leadership and teamwork processes involved in clinical and translational research and to train students to function effectively in team settings. Students will be assigned to multidisciplinary teams with a designated principal investigator. Each team will be assigned to develop an integrated multidisciplinary grant application to address an assigned clinical research topic. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to the grant application. The course will consist of four class periods. The first three classes will consist of an orientation to communication and the role of leadership and teamwork in multidisciplinary clinical and translational research. The final class period will be reserved for a teams organizational meeting. Supplemental team meetings are optional. Each team member will be required to complete an individual five-page literature review report that is integrated into a multidisciplinary research application addressing a clinical research topic assigned to the team under the direction of a designated principal investigator. Prereq: Graduate standing. (Same as BSC 732.)

CPH671 SEMINAR IN CLINICAL AND TRANSLATIONAL SCIENCE. (1)
This seminar course is designed to orient students to clinical and translational research community and activities at the University of Kentucky and to incorporate a multidisciplinary cooperative approach to clinical and translational research. Students are expected to apply their knowledge of effective scientific communication, responsible conduct of research, and methods and technologies of clinical and translational science to ongoing discussions. The course will consist of seven evening seminars focusing on different topics of clinical and translational research. Students will be required to present a description of their research interests and activities during one seminar. Homework assignments will require students to summarize the key elements of each seminar as related to clinical and translational research and the relevance of these elements to their own research interests and career plans. Active participation by all members is expected. Prereq: Graduate standing. (Same as BSC 733.)

CPH695 PUBLIC HEALTH PRACTICE THROUGH SERVICE LEARNING. (3)
This course will provide students the opportunity to gain first hand public health experience by participating in projects in a community setting, completing a project, and participating in a series of seminars. Lecture, two hours; laboratory, two hours per week. Prereq: Enrollment in a Public Health degree program and completion of the core curriculum, or consent of instructor.

CPH701 CURRENT ISSUES IN PUBLIC HEALTH. (1)
This seminar course will introduce M.S. and Ph.D. students to the critical role of public health in protecting, maintaining, and improving the health of the population. Specific emphasis will be directed to the "Ten Essential Functions of Public Health" through weekly lectures, readings, and writing assignments. While all five core areas of public health will be introduced. Prereq: Admission to College of Public Health M.S. or Ph.D. program.

CPH709 GLOBAL HEALTH INTERNSHIP. (3)
This course will consist of an internship in a foreign country, preferably in a resource-limited setting, and may have both a University of Kentucky and a local mentor, and will develop CPH 710, Introduction to Global Health, or approval from the Director of the certificate.

CPH711 CHRONIC DISEASE EPIDEMIOLOGY. (3)
A survey course on the leading chronic diseases in the U.S., including cardiovascular disease, cancer and diabetes with focus on surveillance and risk factors. Prereq: Enrollment in a Public Health degree program, CPH 605/PM 620 Introduction to Epidemiology or consent of instructor.

CPH712 ADVANCED EPIDEMIOLOGY. (3)
Introduction to specialized epidemiologic content areas as well as methods designed to meet the research and practice of health professionals. Lecture, two hours; laboratory, two hours per week. Prereq: Enrollment in a Public Health degree program and CPH 605/PM 620 or consent of instructor.

CPH713 PHARMACOEPIDEMIOLOGY. (3)
This course will provide an overview of the field of pharmacoepidemiology and its relationship to health care research. Various topics including methodology and analytical issues relevant to the conduct of pharmacoepidemiologic research will be covered. Time will also be spent reviewing existing papers in the field of pharmacoepidemiology. Prereq: CPH 605 and STA 580 or equivalent; may be concurrent. (Same as PPS 701.)

CPH718 SPECIAL TOPICS IN EPIDEMIOLOGY: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH719 INDEPENDENT STUDIES IN EPIDEMIOLOGY. (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH725 CLINICAL PREVENTIVE SERVICES. (3)
Disease prevention and control have been recognized as more efficient and effective in extending the quality and quantity of human life. As a core part of the Preventive Medicine- Public Health Residency curriculum, this course will focus on up-to-date, clinically relevant information and cutting edge research results regarding clinical preventive medicine and public health issues. The primary focus of this course will be evidence-based preventive health care services, and recommendations of the United States Preventive Services Task Force for screening and preventive health care services. Prereq: Permission of instructor.

CPH728 SPECIAL TOPICS IN OCCUPATIONAL/ENVIRONMENTAL HEALTH: (Subtitle required). (1-3)
This course will engage students in reading, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health program or consent of instructor. This is a controlled enrollment course; see instructor for additional information.

CPH730 INDEPENDENT STUDIES IN OCCUPATIONAL/ENVIRONMENTAL HEALTH. (1-3)
Designed for students with research or special study interest in Occupational and Environmental Health. Structured activities with goals, objectives, and deliverables are designed with individual faculty. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a College of Public Health degree program or consent of instructor.

CPH731 INDEPENDENT STUDIES IN BIOSTATISTICS. (1-3)
Designed for advanced students with research or special study interest in Biostatistics. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH732 SPECIAL TOPICS IN BIOSTATISTICS: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH739 INDEPENDENT STUDIES IN BIOSTATISTICS. (1-3)
Designed for advanced students with research or research interest in Biostatistics. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH740 INTRODUCTION TO MATERNAL AND CHILD HEALTH. (3)
This course will acquaint students with the major issues and challenges of working in the area of maternal and child health. Prereq: UK graduate or professional school student status.

CPH746 RESEARCH. (0)
Half- time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CPH750 LEGAL BASIS OF PUBLIC HEALTH. (3)
Introductory course for non-lawyers in selected aspects of the law relating to public health. Prereq: Enrollment in a Public Health degree program or consent of instructor.
Course Descriptions

CPH 751 INTRODUCTION TO GLOBAL PUBLIC HEALTH. (3)
This course will acquaint students with the major issues and challenges for public health in a variety of wealthy, emerging, and impoverished nations and with the impact of local or regional issues on national and/or global levels. Prereq: UK graduate or professional school student status.

CPH 752 LEADERSHIP IN PUBLIC HEALTH. (3)
This course is designed to explore the dimensions of leadership as presented in both the traditional and contemporary literature. It focuses student understanding on their leadership qualities and the ways to apply them in the current public health environment. Prereq: CPH 650 or consent of instructor.

#CPH 754 HEALTH CARE ACCESS AND COVERAGE. (3)
This course offers students a greater understanding of programs available to underserved populations, how the changes in the health care market impacts care provided to underserved populations, and policy and programmatic options to address the needs of underserved populations. Prereq: Graduate or post-baccalaureate student status.

CPH 758 SPECIAL TOPICS IN HEALTH SERVICES MANAGEMENT: (Subtitle required). (1-3)
This course will engage students in readings, projects, lectures and/or discussions to address current topics of special interest or concerns. May be repeated to a maximum of 6 credit hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

*CPH 759 INDEPENDENT STUDIES IN HEALTH SERVICES MANAGEMENT. (1-3)
Designed for students with research or special study interest in Health Services Management. Students must develop a prospectus that specifies goals, objectives, and deliverables with individual faculty. May be repeated to a maximum of 6 credit hours per semester. Prereq: Enrollment in a College of Public Health degree program or consent of instructor. This is a controlled enrollment course; contact instructor for additional information.

CPH 767 DISSERTATION RESEARCH CREDIT. (2)
Students will enroll in this course to complete their research for their dissertation. Prereq: Approval of DGS.

CPH 768 RESIDENCY CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 credits. Prereq: All course work toward the degree must be completed.

CPH 778 SPECIAL TOPICS IN PUBLIC HEALTH: (Subtitle required). (1-3)
This course will engage in reading, projects, lectures and/or discussions to address current topics of special interest or concern in public health. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 779 INDEPENDENT STUDIES IN PUBLIC HEALTH. (1-3)
Designed for advanced students with research or special study interests in Public Health. Students are under guidance and confer individually with faculty. May be repeated to a maximum of 6 semester hours. Prereq: Enrollment in a Public Health degree program or consent of instructor.

CPH 786 DOCTORIAL SEMINAR. (1)
Students will attend colloquium sessions that will supplement the core curriculum with additional educational programs. Prereq: Enrollment in the Ph.D. in Epidemiology and Biostatistics program.

CPH 790 WATER SANITATION AND HEALTH. (3)
Prevention of water-related diseases by appropriate supply and sanitation practices with designs applicable to small systems and rural areas of developing nations. Prereq: Previous college-level courses in chemistry and/or biology, CE 451, or consent of instructor. (Same as CE 655.)

CPH 841 ORIENTATION TO MEDICAL BEHAVIORAL SCIENCE. (1)
This course offers a structural exposure of students to the varieties of basic and clinical science research and current issues in health care policy. Prereq: U of K Medical Center. Following weekly attendance at research seminars and clinical rounds, students will present their observations in follow-up discussion groups. May be repeated to a maximum of three credits. (Same as BSC 620.)

CPH 901 PUBLIC HEALTH DOCTORAL PROFESSIONAL COLOQUIUM. (1)
Seminar course designed as the integrative introduction, consideration, capstone for the Doctor of Public Health (Dr.P.H.) degree. Offered each semester of enrollment. Prereq: Admission to the Dr.P.H. program.

CPH 910 TOPICS IN ADVANCED EPIDEMIOLOGY AND LABORATORY. (3)
Provides the student with an introduction to advanced epidemiologic content areas as well as methods designed to meet the research and practice needs of health professionals. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 911 PROFESSIONAL SEMINAR IN EPIDEMIOLOGY. (3)
Professional Seminar in Epidemiology is an advanced course in one of the five content areas of public health designed as the link between academic work in epidemiology and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 910, or approval of instructor.

CPH 920 ADVANCED ENVIRONMENTAL HEALTH. (3)
This professional seminar in Environmental Health is designed to provide comprehensive coverage of the principles upon which the Environmental Health field relies. Prereq: Admission into the Dr.P.H. curriculum.

CPH 921 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH. (3)
Designed as the link between academic work in environmental health and application health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, completion of MHP/MSPH core or equivalent, or approval of instructor.

CPH 930 ADVANCED BIOSTATISTICAL METHODS IN PUBLIC HEALTH. (3)
The study of advanced topics in biostatistics for the public health professional emphasizing concepts over methodology. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 931 PROFESSIONAL SEMINAR IN BIOSTATISTICS. (3)
Designed as the link between academic work in biostatistic and application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 930, or approval of instructor.

CPH 940 HEALTH-RELATED BEHAVIORS: MODELS AND APPLICATIONS. (3)
This course evaluates the use of models of health on related behavior and their applications for intervention in public health problems. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 941 PROFESSIONAL SEMINAR IN HEALTH ENHANCEMENT. (3)
Designed as the opportunity to link academic work in health enhancement with application in public health practice and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 940, or approval of instructor.

CPH 942 SEMINAR IN PUBLIC HEALTH COMMUNICATION. (3)
This seminar in Public Health Communication is intended to acquaint students with theory and current research related to communication in public health settings. It is designed to provide insight into the communication that serves as the lifeblood of the organized institutions which promote public health. Those who wish to have a significant role in the management of public health practitioners, improve their understanding of organizations, understand how groups and individuals fit into the larger mission, need to apply advanced information and communication technologies, and desire to become more effective communicators will find this course worthwhile. This course is primarily designed to give students a background in theories, perspectives, concepts, and approaches to understanding communication. Thus, it seeks to promote student understanding, analytical skills, and critical thinking necessary for such professions as consulting, research, and management for their own personal development.

CPH 949 DOCTORAL CAPSTONE RESEARCH. (0)
This course will allow Dr.P.H. students to remain in a full-time enrollment status at the University of Kentucky while working on their doctoral capstone. Enrollment is restricted and by special permission only; students may only register for this course after all for-credit course work has been completed.

CPH 950 WELL MANAGED PUBLIC HEALTH CARE ORGANIZATION. (3)
The Well Managed Public Health Care Organization is an advanced course addressing effective senior management of public and private organizations focusing upon public health. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, or approval of instructor.

CPH 951 PROFESSIONAL SEMINAR IN PUBLIC HEALTH MANAGEMENT AND PRACTICE. (3)
Designed to link academic work in public health management with application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 950, or approval of instructor.

CPH 952 SEMINAR IN ADVANCED LEADERSHIP. (3)
This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the learner for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 953 SEMINAR IN ETHICAL AND MORAL DECISION-MAKING. (3)
This course provides the opportunity to link academic work in public health decision-making with its application to public health practice and to prepare the learner for the practice of public health decision-making based on ethical and moral principles. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health decision-making. The period of Nazi Germany 1933-1945 will extensively in the seminar. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 954 SEMINAR IN ADVANCED LEADERSHIP. (3)
This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the student for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 956 SEMINAR IN PUBLIC HEALTH DATA MANAGEMENT AND ANALYSIS. (3)
This course provides the opportunity to link academic work in public health data management and analysis with application in public health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, CPH 950, or approval of instructor.

CPH 958 PROFESSIONAL SEMINAR IN EPIDEMIOLOGY. (3)
Designed as the link between academic work in epidemiology and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 910, or approval of instructor.

CPH 959 PROFESSIONAL SEMINAR IN GLOBAL LATERAL HEALTH. (3)
Designed as the link between academic work in global health and application in Public Health practice. Prereq: Admission to the Dr.P.H. program, completion of CPH 910, or approval of instructor.

CPH 960 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH. (3)
This professional seminar in Environmental Health is designed to provide comprehensive coverage of the principles upon which the Environmental Health field relies. Prereq: Admission into the Dr.P.H. curriculum.

CPH 961 PROFESSIONAL SEMINAR IN ENVIRONMENTAL HEALTH. (3)
Designed as the link between academic work in environmental health and application health practice, and to prepare the student for a leadership role in public health. Prereq: Admission to the Dr.P.H. program, completion of MHP/MSPH core or equivalent, or approval of instructor.

CPH 962 SEMINAR IN ADVANCED LEADERSHIP. (3)
This course provides the opportunity to link academic work in public health leadership with application in public health practice and to prepare the learner for a leadership role in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health and leadership. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.

CPH 963 SEMINAR IN ETHICAL AND MORAL DECISION-MAKING. (3)
This course provides the opportunity to link academic work in public health decision-making with its application to public health practice and to prepare the learner for the practice of public health decision-making based on ethical and moral principles. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health decision-making. The period of Nazi Germany 1933-1945 will extensively in the seminar. Prereq: Enrollment as a Dr.P.H. student or permission of the instructor.
Course Descriptions

CPH 954 SEMINAR IN ADVANCED PUBLIC HEALTH FINANCE AND ECONOMICS. (3)
This course provides the opportunity to link academic work in public health finance and economics with application in public health practice and to prepare the learner for key leadership roles in public health. This will be accomplished through readings, case studies, exercises, and individual research relevant to the disciplines of the profession of public health finance and economics. Prereq: Enrollment as a Dr.P.H. student or permission of instructor and approval of the Associate Dean for Admissions and Student Affairs.

CPH 955 PROGRAM EVALUATION FOR PUBLIC HEALTH PROFESSIONALS AND LEADERS. (3)
This course is designed to provide Dr.P.H. students the knowledge and skills to guide and critically review program evaluations in their roles as public health professionals and leaders. The course focuses on providing an overview of the key concepts, methods, and approaches to program evaluation with an emphasis on public health practice. Topics include approaches to program evaluation, defining evaluation questions, managing an evaluation, program evaluation standards, program evaluation designs, reporting and disseminating results and findings, and political issues of evaluation. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 960 BIOLOGY OF AGING. (3)
This course will focus on the recognition and discussion of outcomes of biological changes in terms of the effects of the individual's physical and psychosocial systems. It will be organized utilizing a systems approach to presentations, class discussions, class readings and on-line discussions. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 961 A STUDY OF THE OLDER PERSON. (3)
An increasing elderly population during this century has created a variety of pressing social issues. Underscoring such issues is a long-standing cultural view of elders as a homogeneous group of people who are “different” from younger labor force participants. A view that has resulted in pervasive “agingism” – the collection of attitudes, beliefs, and practices that may reflect discrimination against elders. A properly informed public is necessary to combat ageism and establish sound economic, social, cultural and health care policies that successfully encompass all ages of society. Gerontology is a field of study designed to provide knowledge and a sound data base for dealing with present and future issues of aging and the older population, especially within the realm of public health. This course has been designed to give students pursuing a Dr.P.H. with a concentration in gerontology a broad yet comprehensive graduate-level introduction to the field and to the experience of an older individual that will provide a solid foundation for subsequent courses, and more importantly, personal scholarly development in the program. An array of topics and themes will be presented to adequately represent the multidisciplinary nature of gerontology. Through critical examination of such topics and themes the learner will gain a conceptual foundation for developing effective skills in interdisciplinary inquiry. Prereq: Enrollment as a Dr.P.H. student or by permission of the instructor.

CPH 993 PROFESSIONAL SEMINAR IN FOUNDATIONS OF PUBLIC HEALTH PRACTICE. (3)
A culminating experience professional seminar linking evidence-based academic work in public health with the foundations of practice. A fundamental part of the course is to prepare the learner for a community advocacy role in public health using skills set found in critical analysis and leadership. Prereq: All 9X0 and 9X1 courses in the Dr.P.H. program.

CPH 994 PROFESSIONAL SEMINAR IN LEADING PEOPLE—MANAGING CHANGE. (3)
A culminating experience professional seminar linking academic work in public health leadership, management and ethics with application to public health practice and preparing learners for leadership roles in public health. Prereq: All five 9X0 and three 9X1 courses in the Dr.P.H. program.

CPH 995 DOCTORAL SEMINAR IN PUBLIC HEALTH RESEARCH METHODS. (3)
A survey course in seminar style covering both classical and recent literature in public health services, including description and critique of research. Prereq: HSM 601/CPH 602, STA 570 or 580, and admission to the Dr.P.H. program or post-doctoral fellowship; or consent of instructor.

CPH 996 PUBLIC HEALTH PROJECT OR DISSERTATION RESEARCH. (1-12)
Public health project or dissertation research for residency credit. To be repeated unlimited. Prereq: Completion of the Dr.P.H. Determinative Examination.

CPH 997 DOCTORAL PUBLIC HEALTH FIELD PRACTICUM. (2-4)
Required public health field work is the integrative component of the curriculum and an opportunity to apply and test didactic learning. May be repeated twice. Laboratory, eight to sixteen hours per week. Prereq: Admission to the Dr.P.H. program, completion of MPH/MSPH core or equivalent, second year status, or approval of instructor.

CPH 998 SPECIAL TOPICS IN PUBLIC HEALTH (Subtitle required). (1-4)
Designed to address contemporary topics of significance in the field of public health as well as the study of specific topics and problems. May be repeated three times. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CPH 999 DIRECTED STUDIES IN PUBLIC HEALTH. (1-4)
Study and research on contemporary and specific topics and problems of significance to the field of public health, and the interests of individual students. May be repeated to a maximum of six hours. Prereq: Admission to the Dr.P.H. program, consent of instructor.

CS Computer Science

CS 100 THE COMPUTER SCIENCE PROFESSION. (1)
An introductory seminar which covers the fundamental activities, principles, and ethics of the computer science profession. An overview of the discipline of computer science, examples of careers, the history of computing and experience with elementary computing tools are included.

CS 101 INTRODUCTION TO COMPUTING. (3)
An introduction to computing and its impact on society from a user’s perspective. Topics include computation using spreadsheets, beautification using text formatters and word processors, information management with database managers, and problem solving through program design and implementation using a simple programming language. Not open to students who have received credit for higher level computer science courses.

CS 115 INTRODUCTION TO COMPUTER PROGRAMMING. (3)
This course teaches introductory skills in computer programming using a high-level computer programming language with an emphasis on both the principles and practice of computer programming. Covers principles of problem solving by computer and requires completion of anumber of programming assignments.

CS 215 INTRODUCTION TO PROGRAM DESIGN, ABSTRACTION, AND PROBLEM SOLVING. (4)
The course covers introductory object-oriented problem solving, design, and programming engineering. Fundamental elements of data structures and algorithm design will be addressed.

CS 216 INTRODUCTION TO SOFTWARE ENGINEERING. (3)
Software engineering topics include: life cycles, metrics, requirements specifications, design methodologies, validation and verification, testing, reliability and project planning. Implementation of large programming projects using object-oriented design techniques and software tools in a modern development environment will be stressed. Prereq: CS 215.

CS 221 FIRST COURSE IN COMPUTER SCIENCE FOR ENGINEERS. (2)
Characteristics of a procedure-oriented language; description of a computer as to internal structure and the representation of information, introduction to algorithms. Emphasis will be placed on the solution of characteristic problems arising in engineering. Prereq: Not open to students who have received credit for CS 115.

CS 275 DISCRETE MATHEMATICS. (4)

CS 315 ALGORITHM DESIGN AND ANALYSIS. (3)

CS 316 WEB PROGRAMMING. (3)
This course introduces students to the World Wide Web, languages and techniques used for web programming, data transfer over the Internet, and the tools available in the web environment. Prereq: CS 216.

CS 321 INTRODUCTION TO NUMERICAL METHODS. (3)

CS 335 GRAPHICS AND MULTIMEDIA. (3)
This course focuses on the graphical human-machine interface, covering the principles of windowing systems, graphical interface design and implementation, and processing graphical data. There is an emphasis on medium-scale programming projects with graphical user interfaces using a high-level procedural programming language and concepts such as object-oriented design. Prereq: CS 216 and engineering standing.
CS 340 APPLICABLE ALGEBRA. (3) Topics include: Euclid’s algorithm, unique factorization modulo arithmetic, Fermat’s and Euler’s theorems, Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotient rings, field extensions, finite fields and BCH codes. Prereq: MA 322 or MA 213. (Same as MA 340.)

#CS 378 INTRODUCTION TO CRYPTOGRAPHY. (3) The study of security in digital systems. Methods of keeping information secure from classical systems dating from ancient times to modern systems based on modern mathematics. Basic methods of encryption using public key systems, block ciphers, and stream ciphers. The mathematical tools for the design and analysis of such systems. Topics will include classical cryptography, modern methods of public and private key encryption, authentication and digital signatures, hashing, and passwords. Number theory, abstract algebra, combinatorics, and complexity theory necessary for the design and analysis of cryptographic systems. Prereq: CS 315 and STA 281, or instructor’s consent.

CS 380 MICROCOMPUTER ORGANIZATION. (3) Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: EE 280 or CS 245. (Same as EE 380.)

CS 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3) A course in the hardware and software of microprocessors. Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and CS 380. (Same as EE 383.)

*CS 395 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-2) A course for a computer science majors only. A topic, approved by the chairperson of the department, provides an opportunity for supervised individual research and study. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

CS 405G INTRODUCTION TO DATABASE SYSTEMS. (3) Study of fundamental concepts behind the design, implementation and application of database systems. Brief review of entity-relationship, hierarchical and network database models and the relational model. Emphasis on practical experience with database management systems, and database database theory, concepts in schema design and commercial database languages. Prereq: CS 315 and graduate or engineering standing.

CS 415G COMBINATORICS AND GRAPH THEORY. (3) A basic course in the theory of counting and graph theory. Topics in enumerative combinatorics may include: generating functions, compositions, partitions, Fibonacci numbers, permutations, cycle structure of permutations, permutations statistics, Stirling numbers of the first and second kind, Bell numbers, inclusion-exclusion. Topics in graph theory may include: Eulerian and Hamiltonian cycles, matrix tree theorem, planar graphs and the 4-color theorem, chromatic polynomial, Hall’s marriage theorem, stable marriage theorem, Ramsey theory, electrical networks. Prereq: MA 213 or MA 322. (Same as MA 415G.)

CS 416G PRINCIPLES OF OPERATIONS RESEARCH. (3) The course is an introduction to modern operations research and includes discussion of modeling, linear programming, dynamic programming, integer programming, scheduling and inventory problems and network algorithms. Prereq: MA 213 or equivalent. (Same as MA 416G.)

CS 422G NUMERICAL SOLUTIONS OF EQUATIONS. (3) Linear equations: Gaussian elimination, special linear systems, orthogonalization, eigenproblem, iterative methods. Nonlinear equations: solutions of equations in one variable, solutions of systems of nonlinear equations. Optimization. Prereq: CS/MA 321 and MA 322; or consent of instructor. (Same as MA 422.)

CS 441G COMPILERS FOR ALGORITHMIC LANGUAGES. (3) The techniques of processing, specifying, and translating high-level computer languages are studied. Topics include finite state machines and lexical analysis, context-free grammars for language specification, attributed translation grammars, language parsing, and automatic generation of compilers by SLR, LALR, and other methods of analyzing context-free grammars. Other topics may include code optimization, semantics of programming languages, and top-down parsing. Prereq: CS 315 and engineering standing.

CS 450G FUNDAMENTALS OF PROGRAMMING LANGUAGES. (3) An intensive study of fundamental programming concepts exhibited in current high level languages. Concepts include recursion, iteration, coroutines, multiprocessing, backtracking, pattern-matching, parameter passing methods, data structures, and storage management. Typical languages studied are SNOBOL, LISP, PASCAL, and ALGOL. Prereq: CS 370. Restricted to computer science and electrical engineering majors. Others by permission.

CS 463G INTRODUCTION TO ARTIFICIAL INTELLIGENCE. (3) The course covers basic techniques of artificial intelligence. The topics in this course are: search techniques, logic and reasoning, expert systems, knowledge representation, intelligent agents, planning, reasoning under uncertainty, and declarative programming languages. The course covers both theory and practice, including programming assignments that utilize concepts covered in lectures. Prereq: CS 315, CS 375, and engineering standing.

CS 470G INTRODUCTION TO OPERATING SYSTEMS. (3) This course provides an introduction and overview of operating system design, internals, and administration. Topics include classical operating systems (process management, scheduling, memory management, device drivers, file systems), modern operating systems concepts (kernel/microkernel design, concurrency, synchronization, interprocess communication, security and protection), and operating system administration. Prereq: CS 315, CS 380, and graduate or engineering standing.

CS 471G NETWORKING AND DISTRIBUTED OPERATING SYSTEMS. (3) Broad overview of concepts in networking and distributed operating systems with examples. Topics will include protocol stacks, link, network, transport, and application layers, network management, the client-server model, remote procedure calls, and case studies of distributed OS and file systems. Prereq: CS 315 and graduate or engineering standing.

CS 480G ADVANCED COMPUTER ARCHITECTURE. (3) This course focuses on advanced computer architectures and low-level system software. Topics include RISC architectures, vector and multiprocessor architectures, multiprocessor memory architectures, and multiprocessor interconnection networks. Peripheral devices such as disk arrays, NICs, and video/audio devices are covered. Topics also include device drivers, interrupt processing, advanced assembly language programming techniques, assemblers, compilers, and linkers. Prereq: CS/E E 380. (Same as EE 480.)

CS 485G TOPICS IN COMPUTER SCIENCE (Subtitle required). (2-4) Studies of emerging research and methods in computer science. A review and extension of selected topics in the current literature. When the course is offered, a specific title with specific credits, the number of hours in lecture-dissertation and laboratory will be announced. Lecture/ discussion, two-four hours; laboratory, zero-four hours per week. May be repeated to a maximum of eight credits under different subtitles. Prereq: Variable, given when topic is identified; or consent of instructor.

CS 499 SENIOR DESIGN PROJECT. (3) Projects to design and implement complex systems of current interest to computer scientists. Students will work in small groups. Prereq: CS 315 and engineering standing.

CS 505G INTERMEDIATE TOPICS IN DATABASE SYSTEMS. (3) The course introduces a variety of modern techniques in database and distributed database systems. The major topics include, but are not limited to: object-oriented database systems; distributed, heterogeneous and web-based databases; knowledge based systems; physical database design; and security. The course covers a variety of methods that allows for a solution of database problems where the traditional relational database techniques are not viable or not sufficient. Prereq: CS 405 or consent of instructor.

CS 515G ALGORITHMS DESIGN. (3) The design and analysis of efficient algorithms on data structures for problems in sorting, searching, graph theory, combinatorial optimization, computational geometry, and algebraic computation. Algorithm design techniques: divide-and-conquer, dynamic programming, greedy method, and randomization, approximation algorithms. Prereq: CS 315 and engineering standing.

CS 521 COMPUTATIONAL SCIENCES. (3) Study of computer science techniques and tools that support computational sciences and engineering. Emphasis on visualization, performance evaluation, parallel computing, and distributed computing. Prereq: CS 115, CS/EE 380, and engineering standing.

CS 535G INTERMEDIATE COMPUTER GRAPHICS. (3) Three-dimensional graphics primitives such as 3D viewing, lighting, shading, hidden line/surface removal, and more advanced topics such as solid modeling, image storage and representation, advanced raster graphics architecture and algorithms, advanced modeling techniques, and animation will be covered. Prereq: CS 335, CS 315, CS 321, and engineering standing.
Course Descriptions

CS 536 SITUATED COMPUTING. (3)
This course covers the fundamental concepts involved in understanding and engineering a closed-loop, sensing, reasoning, and acting agent. Biological models of sensing and acting will be discussed and related to modern artificial counterparts. The course consists of three major topic areas: vision, brain, and robotics. It will introduce students to the issues in computer and biological vision, to models of belief representation and modification, architectures for perception processing and reasoning, machine learning for vision, neural networks, path planning, intelligent recognition, control. Basic issues, and to forward and inverse kinematics, intelligence grasping, and the integration of perception and action. Prereq: CS 4600 or consent of instructor.

CS 537 NUMERICAL ANALYSIS. (3)
Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as EGR/MA 537.)

CS 541 COMPILER DESIGN. (3)
Intermediate aspects of a compilation process with an emphasis on front-end issues. Practical issues in using compiler writing tools. Code generation for expressions, control statements and procedures (including parameter passing). Symbol tables, runtime organization for simple and structured expressions, optimizations. Using compilers and translators for automation (fillers, programs writing programs). Prereq: CS 441 or consent of instructor.

CS 555 DEclarative PROGRAMMING. (3)
The course covers fundamentals of propositional and predicate logic, and their uses in declarative programming to model and solve computational problems. Topics include propositional satisfiability, satisfiability testing techniques such as the DPLL algorithm, automated reasoning techniques for predicate logic such as resolution with unification and logic programming. Prereq: CS 315 and CS 375 or consent of instructor.

CS 570 MODERN OPERATING SYSTEMS. (3)
Brief review of classical operating system concepts (process and memory management, process coordination, device drivers, file systems, starvation/deadlock). Modern topics of files systems (log-structured file systems, distributed file systems, memory-based file systems), operating system design (monolithic, client-server, kernel-based, distributed system design). Principles of parallel processing and distributed computing. Safety and security. Prereq: CS 471G or consent of instructor.

CS 571 COMPUTER NETWORKS. (3)
Principles of computer networks using current Internet technologies and protocols as examples. Routing algorithms and protocols; end-to-end transport; flow control; congestion avoidance and control; mail, web, and file transfer protocols; designing and implementing applications using common network APIs. Advanced topics, included as time permits, include network security, multicast, and quality of service. Prereq: CS 471G or consent of instructor.

CS 575 MODELS OF COMPUTATION. (3)
The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Formal languages and machines as recognizers of languages. The Chomsky Hierarchy of language types. Topics may include Turing machines or other basic models of computation; decidability and undecidability; basic complexity theory; finite automata and regular languages; pushdown automata and context-free languages. The course will cover primarily theory, including assignments that utilize concepts covered in lectures. Prereq: CS 375 and engineering standing, or consent of instructor.

CS 585 INTERMEDIATE TOPICS IN COMPUTER SCIENCE (Subtitle required). (3)
Topics to be selected by staff. May be repeated to a maximum of six credits, but only three credits may be earned by a student under the same topic. Prereq: Restricted to computer science and electrical engineering majors. Others by permission.

CS 587 MICROCOMPUTER SYSTEMS DESIGN. (3)
A course in the design of microcomputer systems for hardware engineers which includes the following topics: use of uncommitted logic arrays in instruction set design; hardware support for operating systems and programming languages; customizing microcomputers for specific execution environments; and control of concurrency. Prereq: EE 581 and EE 583, or consent of instructor. Engineering standing or upper division computer science standing. (Same as EE 587.)

CS 610 MASTER’S PROJECT. (3)
Design and implementation of a large computing project under the supervision of a member of the graduate faculty. Prereq: Satisfactory completion of the departmental foundational examinations.

CS 611 RESEARCH IN COMPUTER SCIENCE. (3-9)
Doctoral students conduct research work in computer science under supervision of a faculty member from the Department of Computer Science. May be repeated to a maximum of 4 semesters (9 credits, maximum) for a total of 18 credit hours. Registration for graduate research work in computer science and approval of the Departmental Committee on Higher Degrees.

CS 612 INDEPENDENT WORK IN COMPUTER SCIENCE. (1-3)
Reading course for graduate students in computer science. May be repeated to a maximum of nine credits. Prereq: Overall standing of 3.0, and consent of instructor.

CS 616 SOFTWARE ENGINEERING. (3)
This course provides an overview of the software engineering discipline: software requirements, software design, software construction, software management, and software quality. Testing and validation techniques will be emphasized throughout the course. Programs and program modules will be developed and studied throughout the course to illustrate specific problems encountered in the lifecycle development of software systems. Prereq: At least nine hours of graduate computer science courses.

CS 617 REQUIREMENTS ENGINEERING. (3)
The course examines the requirements phase of the Systems Engineering and Software Engineering lifecycles in detail. Students will learn how to develop requirements specifications, requirements verification, requirements validation, and requirements analysis. Verification and validation techniques are emphasized throughout the course. Students work in small groups to research and present a related topic. Prereq: Nine hours of graduate study.

CS 618 SOFTWARE DESIGN. (3)
This course provides an overview of the software design field: software design overview, software design process, a survey of software design method (such as structured design methods, object-oriented design methods, concurrent design methods), design reviews, as well as discussing current topics such as aspect-oriented programming, refactoring, and design patterns. Testing and validation techniques are emphasized through the course. Program designs are developed and validated throughout the course. Readings and summaries of current and seminal journal papers and texts are required. Prereq: Nine hours of graduate study.

CS 621 PARALLEL AND DISTRIBUTED COMPUTING. (3)
This course provides graduate students in computer science and in other fields of science and engineering with experience of parallel and distributed computing. It gives an overview of parallel and distributed computing concepts, including process models, resources, execution environments; and control of concurrency. Prereq: EE 581 and EE 583 or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS 570 or CS 587.)

CS 622 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA. (3)
Numerical solution of systems of linear equations. Prereq: CS 537 or consent of instructor.

CS 623 PARALLEL ITERATIVE COMPUTING. (3)
The course will present an introduction to numerical methods for solving large sparse linear systems and parallel implementations of iterative techniques. Prereq: CS 537 or consent of the instructor.

CS 630 FREE-FORM SOLID MODELING. (3)
This course covers the path from a conceptual vision of a shape to a concrete computer-based description that is suitable for manufacturing. It covers various solids modeling techniques, including volume representation, boundary representation, instance and Boolean combinations of shapes, and procedural generation such as sweeps. It discusses effective data structures and consistent and unambiguous part description formats to transfer a shape from a designer to a fabrication house, as well as problems with maintaining unambiguous topologies in the presence of finite-precision geometry. Prereq: CS 535 or consent of instructor.

CS 631 COMPUTER-AIDED GEOMETRIC DESIGN. (3)
Overview of current concepts and issues in CAGD with emphasis on free-form surface design; mathematics of free-form curve and surface representations, including Non-uniform rational B-splines (B-splines), geometry, and parametric continuity, texture mapping onto complex shapes, subdivision surfaces, surface evolution, and global optimization. Prereq: CS 535 and CS 532, or consent of instructor.

CS 633 3D COMPUTER ANIMATION. (3)
This course covers the following techniques and principles of 3D computer animation. The topics covered include: (1) modeling: the process of building the final animation, (2) rendering: the process of defining how the final picture in the model will look, (3) animation techniques: the process of creating in-between frames and key-frames, (4) compositing and special effects: the process of assembling various pieces of an image to get special two-dimensional effects, and (5) recording: the process of converting the animation sequences involved in putting animation frames onto film or video. Prereq: CS 335 or CS 535, or consent of instructor.

CS 644 MULTIMEDIA SYSTEMS. (3)
This course covers fundamental techniques in multimedia systems for capturing, managing, accessing and delivering digital media over local, wide-area and wireless network technology. The core topics will focus on processing and the algorithms to generate, store, access and process it. Network concepts will be presented at a high level only. Prereq: CS 335 or consent of instructor.
CS 6351 IMAGE PROCESSING. (3)
The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as EE 635.)

CS 6360 COMPUTER VISUALIZATION. (3)
This course covers digital image processing as well as advanced topics in computer vision. Initial topics include image formation, digital filtering, sensor modeling and feature detection techniques. The course will discuss how these algorithms are used to address general computer vision problems including three-dimensional reconstruction, scene understanding, object recognition, and motion analysis. Prereq: CS 536 or consent of instructor.

CS 6371 ADVANCED COMPUTER NETWORKS. (3)
This course is intended to provide students with a solid understanding of the state of the art in computer networking and greedy algorithms. Methods based upon natural models such as force-directed iteration, dynamic programming. Approximation techniques including local search, divide and conquer, Reed-Muller, Reed-Solomon, trellis, and convolutional codes. Prereq: CS 515 or consent of the instructor.

CS 6370 DISCRETE EVENT SYSTEMS. (3)
The objective of the course is to prepare students for research in the field of supervisory control of discrete event systems (DES's). Logical models, supervising control. Stability and optimal control of DES, complexity analysis and other related research areas will be covered. Prereq: Graduate standing or consent of instructor. (Same as EE 642.)

CS 6555 PROBLEM SOLVING. (3)
Overview of programming-language styles: imperative, functional, declarative, object-oriented, concurrent, simulation, and non-local referencing environments, combinatorial control structures (backtracking, coroutine), higher-order types, lazy-eager evaluation. This course looks at familiar, not complete languages, touching on such languages as Ada, CLU, FP, Haskell, Icon, Lisp, ML, Modula-2, Modula-3, Pascal, Post, Prolog, Russell, C++, Simula-67, and Smalltalk. Students will not become proficient in any of these languages, but rather will learn what contributions each has made to the state of the art in language design. Compiler-construction issues will be touched on only in passing. Prereq: CS 450C or consent of instructor.

CS 6600 AI ARTIFICIAL INTELLIGENCE. (Subtitle required).
Advanced topics chosen from the following: knowledge representation, knowledge acquisition, problem solving, expert systems, high-level programming languages, expert systems, intelligent and deductive databases, automated theorem proving. May be repeated to a maximum of six credits, but only three credits may be earned under the same topic. Prereq: CS 505 and CS 560 or consent of instructor.

CS 6631 ARTIFICIAL INTELLIGENCE. (3)
Overview of modern artificial intelligence. Covers topics such as searching and game trees, knowledge representation techniques, methods to represent uncertain information and to reason about it, reasoning about action and planning, expert systems, machine learning and neural networks. Prereq: CS 555 or consent of instructor.

CS 6700 DISTRIBUTED OPERATING SYSTEMS. (3)
This course covers advanced distributed operating system algorithms and theory. Topics such as distributed mutual exclusion, distributed event ordering, distributed deadlock detection, avoidance, agreement protocols, consistent global snapshot collection, stable predicate detection, failure recovery, fault-tolerant consensus, leader election, process groups and group communication. Case studies of distributed operating systems such as LOCUS, Grapevine, V System, ISIS, Amoeba, Sprite, and Mach will be used as illustrations of the above algorithms. Prereq: CS 570 or consent of instructor.

CS 6710 ADVANCED COMPUTER NETWORKS. (3)
This course is intended to provide students with a solid understanding of the state of the art in computer network systems and protocols. Topics are covered in some depth, including both abstract and concrete aspects. The course begins with a study of implementations of the current Internet Protocols (TCP, UDP and IP); this provides a concrete backdrop for the rest of the course. The emphasis is on learning by doing, with programming and other hands-on assignments associated with most topics. Prereq: CS 571 or consent of instructor.

CS 6720 ERROR CORRECTING CODES. (3)
The problem of correct transmission of data in a noisy environment. The design and analysis of codes that efficiently (in terms of data rate and encryption and decryption speed) correct errors. Linear and nonlinear block codes, general encoding and decoding techniques, fundamental bounds, dual codes, cyclic codes. Specific codes will be studied, including Hamming, BCH, Reed-Muller, Reed-Solomon, trellis, and convolutional codes. Prereq: CS 515 or consent of the instructor.

CS 6740 HEURISTIC ALGORITHMS. (3)
Solving problems that are intractable. Exact techniques such as search integer programming and dynamic programming. Approximation techniques including local search, divide and conquer, and greedy methods. Algorithms based upon natural models such as force-directed iteration, simulated annealing, genetic algorithms, and neural networks. Examples will be selected from active research areas. Prereq: CS 515 or consent of instructor.

CS 6750 COMPUTABILITY AND COMPLEXITY. (3)
The formal study of computation, including computability and computation with limited resources. Church’s thesis and models of computation. Topics will include Turing machines or other basic models of computation; reductions; computable and computably enumerable sets; Rice’s Theorem; decidability and undecidability; basic complexity theory; NP-completeness and notions of intractability. Additional topics may include primitive recursive functions and Grzegorczyk hierarchy; nondeterminism; the arithmetic hierarchy; formal complexity measures; time and space hierarchy theorems; the polynomial hierarchy and PSPE; probabilistic complexity classes; circuit complexity. Prereq: CS 575 or consent of instructor.

CS 6770 COMPUTATIONAL GEOMETRY. (3)
Design and analysis of algorithms and data structures for geometric problems. The particular groups of problems addressed include convex hull construction, proximity, Voronoi diagrams, geometric search, intersection. Prereq: CS 580.

CS 6780 CRYPTOGRAPHY. (3)
The study of security in communications and electronic computing. The encryption of data using public key systems, block ciphers, and stream ciphers. The basic tools for the design and analysis of such systems. Topics may include information theory, authentication, digital signatures, secret sharing schemes, complexity theoretic issues, probabilistic encryption, electronic commerce and others. Prereq: CS 515 or consent of the instructor.

CS 6800 SEMINAR IN COMPUTER SCIENCE. (2)
May be repeated to a maximum of four credits. Prereq: Consent of instructor, or two 500-level computer science courses.

CS 6830 HUMAN-COMPUTER INTERACTION. (3)
Survey of computer systems technology and human factors. Areas of interest to students vary widely. May be repeated to a maximum of six credits, but only three credits may be earned under the same topic. Prereq: Consent of instructor.

CS 6851 SPECIAL TOPICS IN VISION, GRAPHICS AND MULTIMEDIA. (Subtitle required.)
Topics to be selected by staff. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or two 500-level computer science courses.

CS 6852 SPECIAL TOPICS IN SYSTEMS. (3)
Advanced topics in computer graphics, computer vision, and multimedia systems. Specific topics include but are not limited to: isophotes, volume rendering, displacement mapping, geographic information systems (GIS), remote sensing topics, large scale sensor networks, video and audio encoding, visualization, immersive environments, and multimedia interfaces. May be repeated to a maximum of up to 6 credit hours, with no more than 3 in the same topic. Prereq: Consent of instructor.

CS 6853 SPECIAL TOPICS IN COMPUTER SCIENCE. (Subtitle required.)
Topics to be selected by staff. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or two 500-level computer science courses.

CS 6860 SPECIAL TOPICS IN THE THEORY OF COMPUTATION. (Subtitle required.)
Advanced topics in the theory of computation and the design and analysis of algorithms, including heuristic approaches for algorithm design, parallel computation, problem complexity, and concurrent processes and other areas of current research interest. May be repeated to a maximum of six credits but only three credits may be earned under the same topic. Prereq: Consent of instructor or CS 575 and CS 580.

CS 6861 SPECIAL TOPICS IN SYSTEMS. (3)
This course is a special topics course. The topic and syllabus will change each time the course is offered, reflecting the interests of the instructor. Typically the course will survey new research in the topic area but may also look back at canonical and ground breaking work from the past. Example course topics might include things such as web operating systems, global file systems, distributed object-based systems, fault tolerance/distributed check pointing, high-speed networking, network security, active networking, group communication models, compilers for parallel/distributed computing, recent programming languages, and data mining. Prereq: Consent of instructor.

CS 6890 SPECIAL TOPICS IN NUMERICAL AND SCIENTIFIC COMPUTING. (Subtitle required.)
Advanced topics in numerical analysis, scientific computation, and complexity of continuous problems. Specific topics may include, but are not limited to: iterative methods, advanced parallel algorithms in numerical linear algebra, multivariate function approximation and integration. Prereq: CS 537 or consent of instructor.

CS 6900 OPERATING SYSTEMS THEORY. (3)
An advanced study of operating systems theory including cooperating sequential processes, processor scheduling, paging systems, and memory management. Prereq: CS 570.

CS 7480 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CS 7490 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.
CSC 600 HUMAN PATHOPHYSIOLOGY. (4)
A study of disease processes, pathognomonic parameters, and pathologic factors that mediate disease. Diagnostic testing used to validate disease process will be utilized to emphasize the student the role of clinical sciences in the diagnosis of these complex disease states. Variations in disease in relationship to age will be examined. Prereq: Admission to the Clinical Sciences graduate program or consent of the course faculty committee.

CSC 601 HEALTHCARE POLICY AND ETHICS. (3)
The focus of this integrative course will be on policy and ethical issues confronting health care providers, health care systems, and particularly those issues specific to clinical sciences. Emphasis will be placed on current trends and anticipated challenges in providing humane and cost-effective health care services, with particular reference to the medically underserved and other at-risk populations. The different needs of special populations such as the aging, socioeconomically disadvantaged, insured and uninsured persons, ethically and culturally diverse groups such as recent immigrants and minorities will be explored. Discussion of technology dissemination delivery models, funding sources, human resources required to provide health care, alternative methods of coordinating these resources, and shifting from an “illness” orientation to a “wellness” approach will be included. The bioethics of health care delivery addressed will also include global considerations relative to health care, population dynamics, health care rationing, health care economics and assisted reproduction and transplantation issues.

CSC 602 CLINICAL SCIENCES SEMINAR (Subtitle required). (1)
Provides skills required of successful scientist to communicate effectively with peers, clients and general public. Each student will demonstrate an ability to interact with community, to function in an educator role by investigating a topic and preparing and delivering a presentation to the class and a community group. May be repeated up to five times. Prereq: Admission to the Clinical Sciences graduate program or consent of instructor.

CSC 603 QUALITY ASSURANCE AND LABORATORY REGULATIONS. (4)
Accreditation processes are evaluated with special emphasis on standards established by agencies and organizations such as JCAHO, CAP, FDA, NCCLS (FCC). The continuing quality improvement models of the Clinical Laboratory Improvement Act of 1988 (CLIA ’88) and the various accrediting bodies are addressed through a statistical approach that examines descriptive and inferential analysis to include hypothesis testing (t-test), power and confidence intervals, OVA-A testing and regression analysis, TEA algorithms, reference range establishment, interference studies, bias studies, method comparison, validation studies, and, unstable error studies. Performance and utilization management systems, standard compliance issues related to Medicare laboratory fee schedules, CPT and ICD coding, reimbursement strategies and other billing practices are presented. The course concludes with a unit on OSHA that delineates chemical and infectious hazards and safety in the laboratory. Prereq: Admission to the Clinical Sciences graduate program or consent of the course faculty committee.

CSC 604 RESEARCH METHODS FOR THE CLINICAL SCIENCES. (3)
Introduction to experimental design, data collection and data analyses for clinical biomedical research. Students will examine ethical issues in biomedical science research using a case- study approach. Representative issues to be addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, review of protocols by human studies committees (institutional review boards or IRB) and informed consent.

CSC 605 EPIDEMIOLOGY AND BIOSCIENCES. (3)
This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiological factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious disease; rates of morbidity and mortality; sensitivity, specificity, and predictive values; strategies used in epidemiological studies to include measures of disease effect, validity, reliability, sampling methods and computer-based biostatistical analysis that emphasize the generalized linear model and forms of SEM.

CSC 606 ADVANCED LABORATORY STATISTICS AND ADMINISTRATIVE ANALYSIS. (3)
Application based statistical analytical software is used to demonstrate Continual Quality Improvement (CQI) adherence to Federal regulation, NCCLS/IFCC protocols, and other accrediting agency requirements. Special emphasis is on defining and controlling unstable error through a statistical modeling approach. Documentation structures for quality operations policy, and processes, procedures and implementation of a quality system are examined with special attention to assuring quality of point-of-care testing. Detailed computerized study of method comparison includes receiver operator charting (ROC). Computerized diagnostic screening programs are used to evaluate prevalence, sensitivity, specificity, and predictive values. Utilization of management systems to track expenses, budget/inventory management, employee scheduling, productivity evaluations, process improvement and restructuring are demonstrated. Computerized performance management systems and innovations in compliance strategies are featured. Student evaluation will be based on examinations, projects, and papers.

CSC 615 REPRODUCTIVE LABORATORY SCIENCE. (1)
The course includes basic cell biology and principles of genetics; a review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization; a review of the female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation.

CSC 616 ANDROLOGY. (1)
The course will include a review of male physiology, spermatogenesis and fertilization. The procedures appropriate for evaluation of male fertility will be presented and conditions and diseases associated with male factor infertility will be discussed. Basic and advanced andrology tests and procedures for both diagnostic and treatment purposes will be reviewed. Micromanipulation procedures (intracytoplasmic injection ICSI) and treatments using epididymal and testicular sperm will be introduced. Prereq: CSC 528, CSC 615 or consent of the instructor.

CSC 617 REPRO MICROBIOLOGY AND IMMUNOLOGY. (1)
A review of basic immunology will be covered including an overview of the organs, tissues and cells that comprise the immune system, different forms of immunity and the basis of the immune response. The reproductive immunology segment will focus on antibodies associated with infertility and reproductive failure, and also will include properties of the immune system during pregnancy. Microbiology will be covered as it pertains to assisted reproductive technology, focusing on: (1) causes of infertility may be transmitted in the assisted reproductive technology (ART) laboratory and (2) prevention of contamination in the ART facility. Prereq: CSC 528, CSC 615 or consent of instructor.

CSC 618 LABS IN ANDROLOGY, REPRODUCTIVE MICROBIOLOGY AND IMMUNOLOGY. (1)
Student laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Advanced andrology procedures, including the sperm penetration assay and the hemi-zona assay, will be discussed and protocols provided. Reproductive Immunology: Students will perform procedures for detecting antisperm antibodies in semen and in serum. Sperm- cervical mucus testing and cross-testing will be performed using controlled donor semen and bovine cervical mucus. Reproductive Microbiology: Organisms associated with sexually transmitted diseases, infertility, and reproductive failure will be demonstrated with representative demonstrations consisting of: stained slide of bacteria, fungi and parasites and electron micrographs of viruses; organisms on appropriate culture media; examples of testing for identification. Student will use data from the demonstrations to develop summaries for the correct isolation and identification of these organisms. Prereq: CSC 528, CSC 615, CSC 616, and CSC 617 or consent of instructor.

CSC 620 ANTHROLOGY. (3)
Review of the male reproductive system including hormonal control, early development, spermatogenesis and fertilization. Basic and advanced andrology procedures will be discussed and laboratories will focus on semen analysis, sperm function tests, and preparation of partner and donor semen for artificial insemination. Prereq: BIO 549.

CSC 621 EMBRYOLOGY/ASSISTED REPRODUCTIVE TECHNOLOGY. (3)
Review of female reproductive system including hormonal control, early development, oogenesis, the menstrual cycle, fertilization and early implantation. Assisted reproductive technology procedures will be discussed with the aid of photographs and videos and laboratories will focus on culturing and manipulating mouse embryos. Prereq: BIO 549, CSC 620.

CSC 623 REPRODUCTIVE IMMUNOLOGY. (1)
Immunology associated with fertilization, implantation, and early development in humans. Various procedures for detecting antibodies associated with reproduction will be discussed and the laboratories will assess both direct and indirect antibodies on spermatozoa. Prereq: BIO 494G, CSC 620, CSC 621.

CSC 624 CRYOPRESERVATION OF REPRODUCTIVE TISSUES. (2)
Principles of methods of cryopreservation will be covered and procedures for freezing human oocytes, embryos, and ovarian and testicular tissues will be detailed. Legal, ethical and policy issues associated with cryopreservation will be introduced. Laboratory sessions will focus on freezing human spermatozoa and mouse gametes and embryos. Prereq: CSC 620 and CSC 621.
CSC 625 POLICY, MANAGEMENT, ETHICAL, AND LEGAL ISSUES IN ASSISTED REPRODUCTION. (2)
Current and anticipated regulations of assisted reproductive technology will be discussed. Legal and ethical concerns associated with ART will be introduced and case studies will focus on specific issues. Prereq: CSC 620, 621, 624.

CSC 626 CLINICAL PRACTICUM IN ANDROLOGY LABORATORY. (2)
Students must complete the checklist procedures while working under supervision. Andrology procedures will include semen analysis, sperm function tests, microbiology, preparation for artificial insemination, and cryopreservation of male gametes. Prereq: CSC 620, 621, 623, 624, 625.

CSC 627 CLINICAL PRACTICUM IN ART LABORATORY. (3)
Students must complete the checklist procedures while working under supervision. All ART procedures involving in vitro fertilization, ICSI, zona-hatching, and cryopreservation of gametes and embryos will be practiced under supervision using appropriate models for practice. Prereq: CSC 620, 621, 623, 624, 625.

CSC 628 RLS SEMINAR. (1)
Students in the RLS seminar will critique research papers in the field, will develop and present PowerPoint presentations on subjects covering andrology, ART, cryopreservation of human reproductive tissue, management issues in the reproductive laboratory, and policy, ethical and legal issues in ART. May be repeated for total of two credits. Prereq: CSC 528, CSC 615, CSC 616, CSC 617, CSC 618, CSC 619, CSC 621, CSC 624, CSC 625 or consent of instructor.

CSC 630 RLS RESEARCH. (1-5)
Research projects for students in Reproductive Laboratory Science. Students will complete web-based modules, “The Scientific Method and the Art of Research” prior to project initiation. Projects should be related to the student’s individual interest and should address an area in reproductive laboratory science. Projects should be under the supervision of a faculty member with expertise in the project area. Prereq: CSC 528, CSC 615, CSC 616, or consent of instructor. Additional CSC courses in the RLS track may be required as prerequisites depending on the nature of the research project.

CSC 670 HISTOCOMPATIBILITY AND IMMUNOGENETICS. (3)
In-depth study of the human histocompatibility polymorphisms will include genetic inheritance, alleles, typing methodologies, and matching requirements for solid organ and tissue transplantation. The human leukocyte antigen (HLA or MHC) system and its role in transplant rejection will be the major focus, however minor histocompatibility systems will also be examined. Specified and detailed additional CSC courses in the RLS track may be required as prerequisites depending on the nature of the research project. Prereq: Immunology course.

CSC 671 MOLECULAR IMMUNOPATHOGENESIS. (3)
Human immunology with an emphasis on experimental methods, signal transduction, cell-cell interactions, cytokine production and activity, cell marker expression during normal cell development, pathogenic expression of cell markers and their detection, immunotherapy, vaccine production and acquired immunity. Analysis of immunologic systems mediating the response to allogetic foreign molecules such as transplanted tissues and organs will be emphasized. Contemporary issues and trends in immunology, with an emphasis on malignancy and immunodeficiencies, will be examined. Prereq: Immunology course.

CSC 672 TRANSPANTATION SCIENCE. (3)
Course content includes immunological, biochemical and genetic concepts and molecular biology related to the clinical process of transplantation. Cellular and molecular mechanisms will be an intense focus of this course. Solid organ and tissues transplantation, the need for donor organs and tissues, and the role of immunosuppressive therapy and stem cell transplantation of each of these areas will be examined. Prereq: Successful completion of CSD 277. Emphasis will be placed on the role of donor and recipient factors in organ and tissue transplantation, immunosuppressive therapies, and the prevention of rejection and the role of the immune system in maintaining organ function.

CSC 673 FLOW CYTOMETRY. (3)
This course focuses on principles, applications and quality assurance of flow cytometry in research and clinical use in hematology and transplantation. Emphasis is placed on the biological and physical principles underlying flow cytometry, specimen processing, operation and specific application in the identification of various hematopoietic and other cells. The use of flow cytometry to screen transplant recipients, cross-match donor and potential recipient, post-transplant monitoring, identifying HLA antigens, diagnosing hematopoietic disorders, monitoring immunosuppressive therapy and stem cell isolation is presented. Evolving applications in other disciplines such as microbiology and clinical chemistry, will also be explored. Prereq: CSC 670, or CSC 674 and CSC 675, or consent of instructor.

CSC 674 HEMOPHILIA. (3)
Normal and abnormal hemophelia is examined. Special emphasis is placed on understanding the relationship of hemophelia to hemopoietic and immunologic disease; transplantation science, and medical applications. Prereq: Course(s) in hematology and hematologic disease, or consent of instructor.

CSC 675 MYELOPROLIFERATIVE DISORDERS. (3)
Advanced review of hematopoietic disorders, including acute and chronic leukemia, and lymphoma. Current knowledge and theory of disease course, laboratory diagnosis, testing techniques, and treatment are emphasized. Prereq: CSC 674.

CSC 676 ADVANCED HEMOSTASIS. (3)
This course will review current knowledge and hypotheses regarding both hypo and hyper coagulable states, drug induced disorders of hemostasis, treatment regimens, and the present state of the art in laboratory testing for high-risk individuals. Prereq: Consent of instructor.

CSC 677 ERYTHROCYTE DISORDERS. (3)
Advanced review of inherited and acquired disorders of erythrocyte production, destruction, and loss including the hemoglobinopathies. The course will address the pathophysiology, laboratory testing and treatment of each disorder. Prereq: CSC 674.

CSC 690 CLINICAL SCIENCES THESIS RESEARCH. (1-6)
Research, design, protocol development and production of thesis are included. Grade will be reported following evaluation of written products by the thesis committee. Prereq: Successful completion of all comprehensive examinations for the Clinical Sciences graduate program.

CSC 740 DISSERTATION RESEARCH. (0-12)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of CSC 769 residency credit following the successful completion of the qualifying exams.

CSC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters is required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

CSC 789 RESEARCH APPRENTICESHIP. (1-4)
The goal of this course is to ensure that the student understands and can apply research methods to identifying a research problem, developing a proposal, conducting an investigation, and preparing a journal-quality research paper. Students will work closely with a clinical sciences researcher to develop these research skills. The course requirements and format will vary depending on the student’s previous experience. Prereq: Admission to the Clinical Sciences doctoral program.

CSC 790 CLINICAL SCIENCES DISSERTATION RESEARCH. (0-12)
Research design, protocol development and production of written dissertation after completion of the dissertation research. Grade will be issued following evaluation of the dissertationby committee. Candidates for the degree must complete nine credit hours in each of two successive semesters of dissertation research. Prereq: Successful completion of the Clinical Sciences qualifying examinations.

CSD Communication Sciences and Disorders

*CSD 220 AMERICAN SIGN LANGUAGE I AND THE CULTURE OF THE DEAF COMMUNITY IN AMERICA. (3)
An introductory course in American Sign Language (ASL), the native language of the Deaf community in America, this course lays a foundation for effective, respectful, participation in a culturally and linguistically diverse society. The course will employ an immersion approach to develop basic skills in conversational ASL and fingerspelling, as well as an appreciation of the basic grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, and the role of Deaf culture in society.

*CSD 277 INTRODUCTION TO COMMUNICATION DISORDERS. (3)
This course describes disorders of speech, language, and hearing. The course includes definitions, symptomatology, etiologies, and basic intervention principles for these disorders.

*CSD 285 APPLIED PHONETICS. (3)
Study of the phonetic structure of the English language with requirement of mastery of the International Phonetic Alphabet. Emphasis will be placed on phonetic transcription, and application will be made for students interested in communication disorders, communications, telecommunications, and theater.

*CSD 320 AMERICAN SIGN LANGUAGE II AND THE CULTURE OF THE DEAF COMMUNITY IN THE US. (3)
An intermediate level course in American Sign Language (ASL), the native language of the Deaf community in America, this course will use an immersion approach to develop skills in conversational ASL and fingerspelling, as well as an appreciation of the grammatical principles of ASL, the historical and cultural background of the language, linguistic and ethical principles related to use of ASL, appropriate use of interpreters, and the role of Deaf culture in society. Prereq: Successful completion of CSD 220 (ASL I) or permission of instructor.

*CSD 378 ANATOMY AND PHYSIOLOGY OF SPEECH. (3)
A detailed investigation of structures and functions supporting speech production: respiration, phonation, articulation, and resonance. Neurological bases of speech and language will also be introduced. Prereq: CSD major or permission of instructor.

*CSD 402 SPEECH AND HEARING SCIENCE. (3)
Investigation of the physiological and acoustic bases of speech and hearing; the physics of sound and the scientific bases of human speech production. Students will have exposure to instrumentation designed to increase understanding of human communication. Prereq: COI major or permission of instructor.
University of Kentucky

May be repeated for a maximum of 6 credits. A title is assigned each time the course is offered.

In-depth study of a current problem or issue related to the communication disorders profession.

IN COMMUNICATION DISORDERS (Subtitle required). (1-3)

*CSD 481 VARIABLE TOPICS

speech, language, and hearing. Prereq: CSD 378 or permission of the instructor.
of the central nervous system, neurodevelopment, and normal neural substrates involved in hearing from a communication sciences perspective. Emphasis on anatomy and physiology Detailed investigation of the neuroanatomy and neurophysiology of speech, language, and

*CSD 482 CLINICAL EXPERIENCE IN COMMUNICATION DISORDERS.

Introduction to remediation of speech disorders in individuals from birth through adulthood and from culturally and linguistically diverse backgrounds. Emphasis on strategies to deal with disorders in voice, fluency, and articulation. Prereq: CSD 401, CSD 402, and CSD 410 or consent of instructor; CODI majors only.

*CSD 483 CLINICAL MANAGEMENT OF COMMUNICATION DISORDERS.

Introduction to remediation of disorders in individuals from birth through adulthood and from culturally and linguistically diverse backgrounds. Emphasis on strategies to deal with disorders in child language, aphasia, and other language-based disorders, including Alzheimer’s Disease and dementia. Prereq: CSD 401, CSD 402, and CSD 410 or consent of instructor; CODI majors only.

*CSD 484 INTRODUCTION TO DIAGNOSTIC PROCEDURES IN SPEECH-LANGUAGE PATHOLOGY.

Introduction to the principles, techniques, and tools used to develop and implement a diagnostic protocol. Prereq: CSD 401, CSD 402, and CSD 410 or consent of instructor; CODI majors only.

*CSD 491 AUDILOGY.

Introduction to the science and practice of audiology and the various professions involved. This course also emphasizes the study of normal and impaired auditory function in children and adults, and the identification and measurement of hearing loss in a variety of settings. Prereq: CSD 401 or consent of instructor; CODI majors only.

*CSD 500 INTEGRATIVE CARE FOR HEALTH SCIENCES.

Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection and implementation of treatments should be based on good science, and the course will introduce students to complementary and alternative health care providers and the practices and beliefs of these modalities as well as the science evidence in support of these practices. The course integrates content from both the sciences and the practice world, and provides students with an understanding of the best practices in integrative care.

*CSD 520 INTRODUCTION TO MANUAL COMMUNICATION.

An introduction to manual communication systems, including American Sign Language and other commonly-used manual sign systems. Includes study of the characteristics and uses of existing manual communication systems. Students will learn to code and decode sentences using a combination of signs and finger spelling. Lecture: one hour; laboratory: two hours per week.

*CSD 521 NONSPEECH COMMUNICATION.

Addresses the use of nonspeech communication systems with moderately to severely hand-icapped individuals. Topics include: receptive and expressive pragmatics; the relationships between oral language, written language, and academic progress; and cultural differences. Prereq: Undergraduate or master’s level CODI majors only and consent of the instructor.

*CSD 589 INDEPENDENT STUDY IN COMMUNICATION DISORDERS.

Independent study for undergraduate or master’s level graduate students with an interest in a specific problem or issue in communication disorders. May be repeated for a maximum of six credits. Prereq: Undergraduate or master’s level graduate CODI majors only and consent of the instructor.

*CSD 591 AURAL REHABILITATION.

Management strategies for people with hearing loss. Topics include: variables affecting hearing handicap; characteristics, selection, counseling, and orientation in regard to amplification systems; acoustic, perceptual and visual aspects of speech; assessment and management of problems resulting from hearing loss across the lifespan. Prereq: CSD 420 or consent of instructor; undergraduate and graduate CODI majors only.

*CSD 621 ALTERNATIVE AND AUGMENTATIVE COMMUNICATION.

A detailed investigation of the use of augmentative and alternative communication systems with individuals with moderate to severe communication disorders. Participants will examine the teaching communication systems, and the related assessment and intervention considerations. Prereq: EDS 375 or equivalent or graduate status in CODI or RHB, or consent of instructor.

*CSD 647 LANGUAGE DISORDERS IN DEVELOPMENTALLY YOUNG INDIVIDUALS.

A detailed investigation of language disorders and language intervention in developmentally young populations. Includes an in-depth discussion of prevention strategies, service delivery models, assessment tools and paradigms, and intervention strategies. Provides practice in self-directed inquiry. Prereq: Graduate status in CODI or RHB or consent of instructor.

*CSD 648 LANGUAGE DISORDERS IN SCHOOL-AGE POPULATIONS.

A detailed investigation of language disorders and language intervention in school-age populations. Includes an in-depth discussion of prevention strategies, service delivery models, related cultural diversity issues, and assessment and intervention principles and strategies. Prereq: Graduate status in CODI or RHB or consent of instructor.

*CSD 649 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS.

This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as EDS 662.)

*CSD 654 CLINICAL ORIENTATION IN COMMUNICATION DISORDERS.

A lecture-laboratory experience designed to orient the student to the professional activities in speech-language pathology. Lecture: one hour; laboratory: four hours per week. Prereq: Graduate status in CODI or consent of instructor.

*CSD 655 ADVANCED DIAGNOSTIC PROCEDURES IN SPEECH-LANGUAGE PATHOLOGY.

Study of the principles of assessment and a critical review of existing standardized and nonstandardized assessment tools in the field of speech-language pathology. Emphasis on the selection of assessment tools for clients from diverse cultural backgrounds. Includes a variety of adult assessment tools, administration of selected tools, and organization of diagnostic information. Prereq: CSD 384 or permission of instructor; CODI majors only.

*CSD 657 CLINICAL PRACTICUM IN SPEECH-LANGUAGE PATHOLOGY.

Experience with children and adults in the assessment and management of communication and swallowing disorders. Lecture, one hour; practicum, four hours per week. May be repeated to a maximum of 12 credits. Prereq: Graduate status in CODI, CSD 481 or equivalent, and CSD 654.

*CSD 659 CLINICAL ROTATION IN SPEECH-LANGUAGE PATHOLOGY.

Supervised clinical experience in the evaluation and management of children and adults. Up to 30 laboratory hours per week (at site all day). May be repeated up to 36 hours. Prereq: Graduate status in CODI, successful completion of 6 hours of graduate clinical practicum and consent of instructor.
Course Descriptions

CSD 661 PHONOLOGICAL DEVELOPMENT AND DISORDERS. (3)
A comprehensive course in phonological theory, assessment, and treatment. Advanced principles of diagnosis and remediation for patients across the age span and from culturally and linguistically diverse backgrounds. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 670 VOICE DISORDERS. (3)
Assessment and management of adults and children with disorders of voice and resonance. Includes laryngectomy. Prereq: Graduate status in CODI or RHB or consent of instructor.

CSD 674 DISORDERS OF FLUENCY. (3)
Analysis, identification and management of fluency disorders. Prereq: Permission of instructor.

CSD 675 LOW INCIDENCE COMMUNICATION DISORDERS (Subtitle required). (1)
Assessment and management of adults and children with low incidence communication disorders including disorders of fluency, craniofacial anomalies and tracheostomy. Topics may vary depending on current trends in the discipline. Prereq: Graduate status in CODI or consent of instructor.

CSD 677 APHASIA AND RELATED DISORDERS. (3)
Identification, appraisal, diagnosis, and clinical management of persons with aphasia and related disorders. Primary emphasis is given to aphasia and apraxia of speech in adults. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 701 RESEARCH METHODS IN COMMUNICATION DISORDERS. (3)
Principles and methods for designing research in communication sciences and disorders. Topics include: introduction to the scientific method, research designs, measurement techniques, formulating research questions, writing and evaluating research reports, and ethics of research. Prereq: Graduate standing in Communication Disorders.

CSD 710 COGNITIVE COMMUNICATION DISORDERS. (3)
The class will focus on the neuroanatomy and pathology of traumatic brain injury, right hemisphere disorders, and dementia. Students will learn current theory regarding differential diagnosis and treatment of these disorders. Prereq: CSD 571 or permission of instructor.

CSD 744 ADULTS SWALLOWING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of adult neurogenic disorders of speech and swallowing. Emphasis will be placed on clinical management of adult dysarthria and the concomitant communication and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 745 PEDIATRIC FEEDING AND MOTOR SPEECH DISORDERS. (3)
Analysis, identification and management of pediatric disorders of speech, feeding and swallowing. Emphasis will be placed on clinical management of dysarthria and the concomitant communication, feeding and swallowing disorders. Prereq: CSD 571 or permission of instructor.

CSD 747 SEMINAR IN LANGUAGE DEVELOPMENT IN CHILDREN. (3)
A contemporary overview of processes governing language acquisition and their role in atypical language development. Topics include: theories of language acquisition; roles of perception, cognition, social interaction, and genetics on language acquisition; and influence of atypical situations on language. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

CSD 761 APPLIED PHONOLOGY: DEVELOPMENT AND DISORDERS. (3)
Critical review and discussion of clinical and developmental phonology research and phonological theories. Study of the bases for normal and disordered phonological development from birth through age twelve. Study of procedures for assessment and treatment of children with phonological disorders including the development of individualized remediation plans for expediting intelligibility gains. Course will include information regarding second language acquisition and oral and written language as these relate to phonological systems. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

CSD 771 DYSPHAGIA. (3)
This course includes a review of the anatomy and physiology of normal deglutition; the nature and characteristics of swallowing disorders; methods of evaluation and management of dysphagia in adults and children; and consideration of medical conditions such as aspiration pneumonia, tracheostomy, and other complicating factors associated with dysphagia. Also included is a brief review of professional issues relating to efficiency of treatment; third party reimbursement; and roles and responsibilities of other health care professionals in feeding and swallowing. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 772 ADVANCED SEMINAR IN APHASIA. (3)
Critical review of the literature in disturbances in symbolic behavior in adults resulting from a variety of etiologies. The course includes aphasia, as well as adult communication disorders associated with dementia, agnosia, right hemisphere injury, traumatic brain injury, and schizophrenia. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 775 SEMINAR IN LITERATE LANGUAGE. (3)
A review and discussion of the literature concerning literate language. Topics include: 1) characteristics of literate language; 2) differences between literate and oral language; 3) emergent literacy; 4) theories of the reading and writing processes; 5) components, development, strategies, and factors involved in typical reading and writing; 6) literate language and speaking; and 7) issues pertaining to atypical readers and writers. Prereq: Admission to the Communication Disorders graduate program or the Rehabilitation Sciences Ph.D. program or consent of the instructor.

CSD 788 VARIABLE TOPICS IN COMMUNICATION DISORDERS (Subtitle required). (1-3)
In-depth study of a current problem or issue related to the communication disorders profession. May be repeated for a maximum of six credits. Title is assigned each time the course is offered. Prereq: Graduate status in RHB or CODI or consent of instructor.

CSD 789 INDEPENDENT STUDY IN COMMUNICATION DISORDERS. (1-6)
Independent study for graduate students with an interest in a specific problem in communication disorders. May be repeated to a maximum of 12 credits. Lecture, 1-6 hours; laboratory, 2-12 hours per week. Prereq: Graduate status and consent of instructor.

DHN Dietetics and Human Nutrition

DHN 101 HUMAN NUTRITION AND WELLNESS. (3)
Food composition, digestion, absorption and metabolism as related to selection of nutrients essential for human life, growth, reproduction, lactation, wellness and physical activity. Not open to DHN majors except hospitality management students.

DHN 212 INTRODUCTORY NUTRITION. (3)
An elementary study of the principles of nutrition and the application of these principles to providing adequate nutrition to humans. The chemical and physiological approach to nutrition is emphasized. Prereq: CHE 105 or CHE 103 or CHE 108; plus, past or concurrent BIO 103 or BIO 148 or BIO 152 or BIO 208.

DHN 241 FOOD SERVICE SANITATION. (1)
This course covers the principles of food microbiology, important food borne diseases, standards that are enforced by regulatory agencies, and applied measures for the prevention of food borne diseases and other microbiological problems. It leads to certification from the National Restaurant Association.

DHN 301 DIETETICS PRACTICE. (2)
This course provides a study of dietetic practice including professional ethics, standards of practice, scope of practice, educational pathways, credential attainment and maintenance, competencies required for entry level practice, responsibilities as a professional. Experiences include exploration of dietetics practice in medical nutrition therapy, food service management and delivery of nutrition services. Prereq: DHN 212 and completion of dietetics premajor requirements with a cumulative GPA of 2.4

DHN 302 PRINCIPLES OF FOOD PREPARATION. (3)
The physical and chemical principles involved in the preparation of foods and the application of these principles to control for quality outcomes. Laboratory experiences link theory to practice to ensure that the standards of safety and overall quality factors are applied to maximize nutrient retention while maintaining the acceptability and nutritional qualities of foods produced for individuals and groups. Lecture, one hour; laboratory, four hours. Prereq: DHN 241; limited to DHN and Family and Consumer Science (FSC) department majors and with permission of instructor.

DHN 304 EXPERIMENTAL FOODS. (3)
Chemical and physical properties of food and the changes resulting from processing and preparation. Experimental study of variations in ingredients and preparation methods on food quality. Design, execute and report an independent research project. Lecture, two hours; laboratory and discussion, three hours per week. Prereq: DHN 302 and CHE 236.

DHN 311 NUTRITIONAL BIOCHEMISTRY. (3)
An introductory study of the biochemical basis of nutrition-the physiochemical properties of nutrients and other essential biochemicals and their role in physiological and metabolic processes. Prereq: CHE 236; PGY 206 must be taken concurrently or prior to DHN 311.

DHN 312 NUTRITION AND WELLNESS IN THE LIFECYCLE. (3)
A study of the physiological changes occurring in the life cycle with associated nutrient needs. The course focuses on assessment and determination of nutrition issues and nutrition education for individuals from in-utero to geriatrics. Prereq: DHN 212; limited to Dietetics and Human Nutrition majors only.
Course Descriptions

DHN 315 NUTRITION ISSUES IN PHYSICAL ACTIVITY. (3)
This course explores the special nutritional needs of a person engaged in regular physical activity. Emphasis will be placed on selecting diets to achieve optimal performance and overall wellness. Athletic performance enhancing supplements will be examined to determine the efficacy and safety of such products. Prereq: DHN 212 and restricted to Dietetics or Human Nutrition majors.

DHN 340 INSTITUTIONAL PURCHASING. (3)
Fundamental principles and purchasing techniques for the selection of food and nonfood items in a food service system. Prereq: ECO 201 or 202; limited to Dietetics and Hospitality Management and Tourism majors only.

DHN 342 QUANTITY FOOD PRODUCTION. (4)
An introduction to the production and service of food in quantity, to include the application of production techniques and controls, menu planning and service. Lecture, two hours; laboratory, 4.5 hours per week. Prereq: DHN 302 or HMT 308; DHN 241; limited to Dietetics and Hospitality Management and Tourism majors.

DHN 346 HUMAN RESOURCES MANAGEMENT FOR THE FOOD AND HOSPITALITY INDUSTRIES. (3)
Exposes the student to all aspects of human resources management in the hospitality and health care industry context. Topics covered include planning, selection, placement, training, disciplining employees, labor relations and compensation. Prereq: Hospitality and Tourism major or Dietetics major.

DHN 403 COMMUNITY NUTRITION AND WELLNESS. (3)
Study of nutrition education programs on a community level. Experience is provided for presenting nutrition in health clinics, health camps, schools, state institutions, family resource centers, and corporate wellness programs. Attention is paid to special populations, including pregnant women, children, adults, the elderly, and persons with disabilities. Prereq: DHN 312.

DHN 408G SEMINAR IN FOOD AND NUTRITION. (1-3)
Investigation of recent research in food and nutrition. May be repeated to a maximum of three credits. Nutritional sciences graduate students may not enroll for graduate credit. Prereq: DHN 510 or consent of instructor.

DHN 474 RESEARCH IN NUTRITION: THEORY. (1-6)
A required course which allows the student to explore research opportunities in the health field, identify potential funding sources, review institutional review board requirements, and develop a grant proposal based on their own interests in nutrition. Prereq: Human Nutrition majors only. Senior standing. DHN 311 (may be taken concurrently with consent of instructor).

DHN 475 RESEARCH IN NUTRITION: APPLICATION. (1-6)
A required course which allows the student to design a research study, write a grant, prepare a comprehensive literature review, design a survey, conduct statistical analyses on collected data, and prepare a professional article and poster to present at University and regional events. Prereq: Human Nutrition majors only. Grade of C or better in DHN 474. This is a writing-intensive (W) course approved to fulfill the upper tier of the graduation writing requirement (GWR). To receive W credit for this course, you must have successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30 hours of course work.

DHN 480 DIETETICS PRE-PROFESSIONAL PRACTICE. (1-6)
Pre-professional experiences are designed to allow students to apply knowledge and skills in assessing, planning, delivering, and evaluating nutrition care in various health delivery systems. Student experience will include opportunities to link theory and practice while developing the skills and attitudes essential to practice in the dietetics profession. Placement of experiential settings must have the approval of the appropriate Director of Dietetics in Nutrition and Food Science. A minimum of 60 supervised practice hours will constitute one semester credit hour with prior approval. May be repeated to a maximum of six credits. Prereq: Consent of instructor and senior status in the Dietetics Didactic Program.

DHN 510 ADVANCED NUTRITION. (3)
Application of biochemistry, physiology and nutrition to the understanding of the utilization and function of nutrients in the body as related to the structure, function and metabolic needs of cells/organ systems. Prereq: DHN 311 or BCH 401G or equivalent; PGY 206; Dietetics and Human Nutrition Majors or admission to DHN/NS graduate program.

DHN 512 MEDICAL NUTRITION THERAPY. (4)
This course explores changes in nutrient metabolism related to biochemical and physiological alterations in disease conditions and application of the Nutrition Care Process. Content includes case studies, medical nutrition therapies for disease conditions, and current research in the field. Prereq: DHN 311 and 312; plus, past or concurrent DHN 510. Enrollment is restricted to dietetics majors only.

DHN 514 DIETETICS: COUNSELING AND COMMUNICATION THEORIES AND APPLICATIONS. (3)
Counseling and communication theories are combined to study specific applications which include disease prevention, disease management and refinement of communication skills to enhance effective communications among dietitians, patients, and other health professionals. Students will enhance their capacity to motivate others to practice healthy food behaviors. Active learners will develop a conceptual framework for future professional practice in dietetics as ethical counselors and facilitators of behavior change. Three credit hours. Prereq: DHN 312, 403, 510; must be taken concurrently with DHN 515. Enrollment is restricted to Dietetics majors.

DHN 515 MEDICAL NUTRITION THERAPY. (5)
This capstone course explores changes in nutrient metabolism related to biochemical, physiological, and pathophysiological alterations in disease conditions, application of the Nutritional Care Process and Model, and development of medical nutrition therapy intervention. Content includes case study evaluations, nutritional therapies for disease conditions, including enteral and total parenteral nutrition, and current research in the field. Prereq: DHN 311, 312, 403 and 510 and concurrent with DHN 514. Enrollment is limited to dietetics majors.

DHN 516 MATERNAL AND CHILD NUTRITION. (3)
Food selection for optimal nutrition during pregnancy and lactation and for infant and child development through preadolescence. Cultural, social, and psychological aspects of food selection and dietary patterns, as they relate to mental and physical development. Prereq: DHN 312 or consent of instructor.

DHN 517 MEDICAL NUTRITION THERAPY II. (3)
This course continues study of medical nutrition therapy topics, including trauma and enteral and parenteral nutrition. Content includes more advanced case study evaluations, medical nutrition therapies, and current research in the field. Prereq: DHN 512 and concurrent with DHN 514 and enrollment is limited to dietetics majors.

DHN 518 EVALUATION OF DIETETIC ISSUES AND LEADERSHIP. (2)
Course provides opportunities for the development of competencies, attitudes and values expected of the entry level professional. Lectures, presentation of individual case studies and research projects are conducted. Opportunities are provided for transfer of theory to practice, interpretation of research, discussion of professional literature and application of leadership and communication skills in addressing issues of professional dietetic practice. This web enhanced didactic course is taught via distance learning coupled with on campus sessions. Prereq: Admission to the Coordinated Program or Dietetic Internship.

DHN 591 SPECIAL PROBLEMS IN FOODS AND NUTRITION. (1-3)
Intensive work on a specific phase of the field. Senior or graduate standing. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

DHN 603 ADVANCED COMMUNITY PROGRAM DEVELOPMENT. (3)
The course focuses on concepts and theories of program development, use of planned goals and objectives such as Healthy Communities-goals and objectives, use of data from national monitoring, survey and surveillance programs, and community assessment to guide decision making for program development. Program marketing, staffing formulas, and grant writing and grant management, cost analysis and cost effectiveness reporting, and formative and summative evaluation of community programs complete the study. Prereq: Admission to graduate program.

DHN 607 FOOD RELATED BEHAVIORS. (3)
This team-taught course will provide background in topics and methods in food related behaviors to students in Nutritional Sciences and other interested students. The course will follow a problem-based learning approach, and will consist of 3 out of 4 modules in any given year. The four modules will be Social and Cultural Perspectives on Food, Psychological Perspectives on Food and Food Behaviors, Challenges to Community Food Security, and International Issues in Nutrition.

DHN 610 MARKETING IN HOSPITALITY AND DIETETICS. (3)
This course overviews the discipline of marketing as it relates to the hospitality and dietetics professions. Special emphasis will be placed on the analysis of the marketing environment, marketing strategies and the diversity of marketing practices used by the hospitality industry and dietetics profession. This course will provide opportunities for students to develop appropriate marketing approaches in today’s increasingly competitive and complex global marketplace. Prereq: MKT 300 or HMT 320 or equivalent course.

DHN 620 NUTRITION AND AGING. (2)
Emphasis on current research in nutrition and aging, nutrition needs of the elderly and nutrition-related diseases associated with aging. Prereq: DHN 510 and 511 or equivalent. (Same as NS 620.)

DHN 630 ADVANCED COMMUNITY NUTRITION. (3)
Study of nutrition surveys and of bases for judging community nutrition. Experience is given in development of nutrition programs. May be repeated to a maximum of six credits. Prereq: DHN 563. (Same as NS 630.)

DHN 640 HUMAN NUTRITION: ASSESSMENT. (3)
Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: DHN 510, DHN 511 or equivalent. (Same as NS 640.)

DHN 646 ADVANCED INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY. (3)
This course will engage students in the latest technology used by the hospitality industry and the dietetics profession for advancement of human, material and financial resources. Strategies and applications using technology to gain competitive advantage will be investigated. Students and faculty will develop the ability to use appropriate technology and solve problems in the hospitality and dietetics industries and to provide solutions. Students will have the opportunity to do the class completely online or a combination of traditional classroom and on-line teaching. Prereq: Admission to the graduate program.
DHN 648 MANAGEMENT OF HOSPITALITY AND DIETETICS ORGANIZATIONS. (3)
This course will engage students with the theories and their application in the area of leadership and management of people, resources, finances, information and internal and external customers as they relate to dietetics, food service and hospitality professions. Prereq: Admission to graduate program, DHN 346 or equivalent course.

DHN 690 ADVANCED WORK IN DIETETICS. (3)
Evaluation of administrative practices in dietetics. This course will examine topics related to managing dietetics services including medical nutrition therapy protocols, dietetics outcomes research, parental and enteral support, clinical pathways, ICAHO requirements, state and institutional policy controls, reimbursement for dietetics services, in-patient and out-patient quality management, and hospital outreach programs. Prereq: Admission to graduate program; Lecture only course.

DHN 694 STRATEGIC PLANNING IN HOSPITALITY, LODGING AND TOURISM. (3)
This course is designed to shape students’ understanding of strategic planning as it relates to hospitality, lodging, and tourism. The concepts utilized to accomplish this objective represent several discipline areas such as organizational theory, strategic management, and the function of management. Prereq: Admission to graduate program.

DHN 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as CNU/NS 704.)

DHN 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. (Same as NS 748.)

DHN 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. (Same as NS 768.)

DHN 770 SEMINAR IN HOSPITALITY AND DIETETICS ADMINISTRATION. (1)
Investigation of recent research in Hospitality and Dietetics Administration. May be repeated to a maximum of three credits.

DHN 772 CURRENT TOPICS IN HOSPITALITY AND DIETETICS ADMINISTRATION. (2)
Faculty from different disciplines will provide in-depth coverage of selected topics in Hospitality and Dietetics Administration.

DHN 781 ADVANCED TRENDS ANALYSIS IN HOSPITALITY AND TOURISM. (3)
The student will investigate the major trends occurring in the hospitality, lodging, and tourism industry and develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: Admission to graduate program.

DHN 782 SPECIAL PROBLEMS. (1-6)
Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NS 782.)

DHN 784 SPECIAL PROBLEMS IN FINANCIAL MANAGEMENT. (3)
A current events approach to the financial and accounting decision-making process in dietetics and hospitality administration. The course will prepare advanced students in dietetics and hospitality administration to analyze and make sound financial decisions in settings relevant to the dietetics profession and the hospitality industry. Prereq: Admission to graduate program, ACC 201, ECO 201 and either FIN 300 or (DHN 340, DHN 342, and DHN 346).

DHN 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6)
Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NS 790.)

DHN 800 NUTRITION IN THE LIFECYCLE: PRACTICUM. (1)
Course content will provide an introductory supervised practice for Coordinated Program dietetic students. Experiences include nutrition services provided at various stages in the life cycle, including pregnancy, infancy, preschool, elementary and high school, and geriatric. Laboratory, three hours per week. Prereq: Admission to Coordinated Program/AP4.

DHN 808 COMMUNITY NUTRITION II: SUPERVISED PRACTICE. (2)
Supervised practice in community nutrition. Experiences include public and private agencies/organizations that provide food and nutrition services, public policy and program development, and nutrition education for various socioeconomic groups. Prereq: Admission to UK DHN Supervised Practice Program (SPP); concurrent enrollment in DHN 800.

DHN 810 MEDICAL NUTRITION THERAPY: SUPERVISED PRACTICE. (5)
Supervised practice in health care facilities. Course focuses on patient assessment, diet planning, care plan implementation, and nutritional evaluation. Prereq: Admission to UK DHN Supervised Practice Program (SPP); concurrent enrollment in DHN 518 and DHN 812.

DHN 812 FOOD SERVICE SYSTEMS MANAGEMENT: SUPERVISED PRACTICE. (5)
Experience may include participation in management functions including procurement, production, financial and human resources management, marketing, and training. Prereq: Admission to UK DHN Supervised Practice Program (SPP); concurrent enrollment in DHN 810 and DHN 518.

DHN 814 FOOD SERVICE SYSTEMS MANAGEMENT II: SUPERVISED PRACTICE. (3)
In-depth application of food service management in a variety of food service operations. Provides variety of experience in operations, financial, and managerial aspects of food services. Experience based on performance requirements established by the Commission on Accreditation for Dietetics Education for the entry-level generalist dietitian. Prereq: Admission to UK DHN Supervised Practice Program (SPP); concurrent enrollment in DHN 518 and DHN 816.

DHN 816 MEDICAL NUTRITION THERAPY II: SUPERVISED PRACTICE. (3)
In-depth clinical application of the principles of dietetics in a hospital setting. Focuses on the team concept of patient care. Provides a variety of dietetic practice experiences with opportunity to test and evaluate results. Experiences based on performance requirements established by the Commission on Accreditation for Dietetics Education for the entry-level generalist dietitian. Prereq: Admission to UK DHN Supervised Practice Program (SPP); concurrent enrollment in DHN 518 and DHN 814.

DIP 600 SPECIAL TOPICS. (1-3)
This course will vary in content depending on special needs or faculty availability.

DIP 700 DYNAMICS OF DIPLOMACY. (3)
This course explores the historical evolution of diplomacy, then focuses on post WWII diplomatic practice and especially the dynamics of diplomacy since the end of the Cold War. Emphasis will be placed on diplomacy’s role in the international system, new tasks for diplomacy, and enhancing diplomatic skills in a new paradigm. Prereq: Permission of instructor.

DIP 710 GREAT BOOKS OF WORLD POLITICS. (3)
Overview of classic texts on war and statecraft. Prereq: Consent of instructor. (Same as PS 734.)

DIP 712 WEAK STATES AND INTERNATIONAL SECURITY. (3)
This course reviews how the policy community has measured the weak state, revealing discrepancies in the quantifiable parameters, definitions, and categorizations, and analyze the efforts taken to address state weakness, particularly foreign economic and security assistance. It will review the five theoretical approaches to the weak state in the literature, which are informed by the international community’s concerns with state weakness: development, intervention, post-colonialism, globalization and terrorism. The theory will be applied to specific cases of weak states in several regions (e.g., Africa, Asia, the Balkans, Latin America, the Middle East, and the Former Soviet States) and analyzes the threats they pose to international security.

DIP 715 DEMOCRACY AND INTERNATIONAL AFFAIRS. (3)
Discussion of the impact of the global spread of democracy on foreign policy and war. Prereq: Graduate status and consent of instructor. (Same as PS 735.)

DIP 720 ECONOMIC STATECRAFT. (3)
This seminar course will explore how economic values and choices shape economic options, and the techniques used to pursue them in the diplomatic arena. Trade and fiscal techniques, financial policies, and sanctions will be explored in relationship to the interplay between economic and political/international relations theory, and the relevance of economic statecraft to achieving both economic and non-economic goals.

DIP 725 GEO-POLITICAL MODELING. (3)
Course uses large user friendly computer model of world’s political/economic systems to explore topics such as globalization, development, energy security, and political instability from a theoretical and quantitative viewpoint. Prereq: STA 570 or permission of instructor.

DIP 730 CROSS-CULTURAL NEGOTIATION AND BARGAINING. (3)
A multidisciplinary graduate course covering contemporary studies of negotiation and bargaining from the individual to the international level. Uses both public (Diplomatic) and private (Commercial) examples, including case studies and practice negotiations. Group and national differences are explored as well as the context and environment of negotiations. Prereq: Any one graduate course plus consent of instructor.

DIP 734 AFRICA’S DEVELOPMENT CHALLENGES. (3)
Examination of challenges facing sub-saharan African countries in developing economic and politically sustainable societies.
DIP 735 SECURITY.  (3)
This course uses the tools of economic analysis and economic statecraft to examine energy security. It will look at the connection between energy and the economy in both the U.S. and other states and the connections between energy and military security and power. It will include a detailed review of the U.S. energy economy, the international energy market, the economies of the major Middle Eastern states, and the Russian economy. At the end of the course each student will understand the history of energy security, be aware of the data sources for current policy analysis, be able to use the relevant tools of economic analysis including econometrics, and be familiar with the energy security policy debate both in the United States and in key foreign countries. Prereq: DIP 740 or ECO 672 or at least two semesters of undergraduate economic theory with grades of B or better. DIP 720 and DIP 750 recommended.

DIP 740 GLOBALIZATION.  (3)
This course examines the phenomenon of globalization by applying core theories of the international political economy. Subjects to be covered include economic and political definitions of globalization, the technological, economic, and political causes of globalization, and the effects of globalization on national politics and wealth. By the end of the course, students should be able to apply the basic international political economy analysis to both trade and financial issues, giving them the necessary skills to prepare convincing policy analyses, political advocacy programs, and business plans. Lecture/Discussion hours per week. Prereq: Graduate status, a modest undergraduate or graduate background in Foreign Affairs or permission of the instructor.

DIP 742 NATIONAL SECURITY POLICY.  (3)
This course provides a foundation in the major debates on national security policy.

DIP 748 MASTER'S RESEARCH.  (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

DIP 750 DEFENSE STATECRAFT.  (3)
Students will gain familiarity with the key military policy issues that confront government officials, and they will learn to evaluate the claims of journalists and advocacy organizations that confront informed American opinion on a day-to-day basis. Prereq: Graduate status.

DIP 755 POLITICS AND DIPLOMACY OF THE MIDDLE EAST.  (3)
Analyzes the interaction between politics and diplomacy in the Middle East. Prereq: Permission of instructor.

DIP 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE.  (1-6)
May be repeated to a maximum of 12 hours.

DIP 777 RESEARCH PROBLEMS IN INTERNATIONAL RELATIONS.  (3)
This seminar focuses on research strategies that can be utilized in dealing with problems in international relations. May be repeated once with consent of instructor. Prereq: PS 674 or consent of instructor.

DIP 780 INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY.  (3)
A multidisciplinary graduate course that investigates policy questions and the policy process surrounding developments in international sciences and technology. This course will focus on the intersection of scientific research, technological applications and change, and business and governmental activities in these areas that impact international relations. Prereq: Consent of instructor.

DIP 795 SPECIAL PROBLEMS IN DIPLOMACY AND INTERNATIONAL COMMERCE.  (3)
Specially designed independent study course taken under the supervision of various instructors. May be repeated to a maximum of six credits. Prereq: Permission of instructor.

DIS Decision Science and Information Systems

DIS 600 PRODUCTION MANAGEMENT.  (3)
This course exposes the MBA generalist to the functional area of production in both manufacturing and service sectors. Topics include tactical decisions in production and operative relationships with corporate strategy. The course emphasizes operations planning and control. Prereq: Graduate standing: MG 711, ECO 610, ACC 628, DIS 650, ECO 611, FIN 600, DIS 651, MKT 600.

DIS 611 THE MANAGEMENT OF COMPUTER INTEGRATED MANUFACTURING.  (3)
This course is intended to provide a broad introduction to the state of the art developments in computer integrated manufacturing systems and the problems of managing such technologies and systems. Topics dealing with the evolving "factory of the future" such as computer-aided design, computer-aided manufacturing, group technology, flexible manufacturing systems, etc., will be studied. Strategic and managerial implications will be emphasized. Prereq: DIS 600.

DIS 612 SUPPLY CHAIN MANAGEMENT.  (3)
An introduction to the terminology, concepts, and skills related to supply chain management. Students develop an understanding of the complexities associated with the movement of goods and information, and how they affect the mission of the firm. Discussions address the various processes and activities within an organization and how they interface with other members of the supply chain. Prereq: DIS 651; ECO 610.
DR  Diagnostic Radiology

DR815F FIRST-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

DR825F SECOND-YEAR ELECTIVE, DIAGNOSTIC RADIOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Diagnostic Radiology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

DR850F-899F FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the Third and Fourth Year Curriculum and Student Progress Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or by the permission of Third and Fourth Year Curriculum and Student Progress Committee.

Approved electives

DR855F FOURTH-YEAR ELECTIVE IN DIAGNOSTIC RADIOLOGY
DR851F RESEARCH IN DIAGNOSTIC RADIOLOGY
DR855F NUCLEAR MEDICINE
DR856F PEDIATRIC RADIOLOGY
DR890F OFF-SITE CLERKSHIP IN DIAGNOSTIC RADIOLOGY

DSP  Discovery Seminar Program

DSP 110 SOCIAL SCIENCES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the College of Arts and Sciences and the Dean of Undergraduate Studies.

DSP 120 HUMANITIES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP humanities requirement. Each proposal must be approved by the College of Arts and Sciences and the Dean of Undergraduate Studies.

DSP 130 NATURAL SCIENCES: (Subtitle Required). (3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the College of Arts and Sciences and the Dean of Undergraduate Studies.

DSP 200 GENERAL RESEARCH SKILLS: (Subtitle Required). (3)
Course provides the basic skills required to conduct research and other scholarly activities. Prereq: All students must be actively engaged (for an average of at least ten hours per week) in a research or other scholarly activity under the mentorship of a UK faculty member through the UK Undergraduate Research Program (UKURP).

EAP  Education Abroad Program

EAP 400G EDUCATION ABROAD ON UK-SPONSORED PROGRAM. (1-18)
A course designed for undergraduate, graduate and non-degree students who participate in a UK-Sponsored Education Abroad Program. Registration in the course would constitute full-time status of the student in the program in question. Students will be enrolled in the course upon payment of the non-refundable program fee deposit. The balance of the program fee will be charged as an EAP 500 course fee. The suffix indicates the particular UK-sponsored program. Upon completion of the program, Education Abroad at UK will submit to the Registrar the credit and grades given by the Program Director for the approved program courses. Prereq: Approval by each student’s academic advisor, the program director and Education Abroad at UK.

EAP 431G EDUCATION ABROAD ON EXCHANGE PROGRAM: TME. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in the course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TME-Tuition/Meals.

EAP 432G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLO. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in the course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLO-Tuition/Lodging.

EAP 433G EDUCATION ABROAD ON EXCHANGE PROGRAM: TLM. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TLM-Tuition/Lodging/Meals.

EAP 434G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees.

EAP 435G EDUCATION ABROAD ON EXCHANGE PROGRAM: ISEP. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. ISEP.

EAP 436G EDUCATION ABROAD ON EXCHANGE PROGRAM: TPE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TPE-Tuition/Plus Other.

EAP 437G EDUCATION ABROAD ON EXCHANGE PROGRAM: TFE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. TFE-Tuition/Fees.

EAP 438G EDUCATION ABROAD ON EXCHANGE PROGRAM: HSC. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. HSC.

EAP 440G EDUCATION ABROAD ON EXCHANGE PROGRAM: BUS. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BUS.

EAP 441G EDUCATION ABROAD ON EXCHANGE PROGRAM: BAE. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. BAE.

EAP 442G EDUCATION ABROAD ON EXCHANGE PROGRAM: EGR. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. EGR.

EAP 443G EDUCATION ABROAD ON EXCHANGE PROGRAM: CHS. (0-1)
A course designed for undergraduate, graduate and non-degree students who participate in a UK Exchange Program. Students will be enrolled in this course by their Education Abroad advisor upon submission of the required application materials to Education Abroad at UK. Enrollment in this course will generate the appropriate exchange fee depending on the type of exchange. The type of exchange will be indicated by the title suffix. CHS.
ECO Economics

ECO 101 CONTEMPORARY ECONOMIC ISSUES. (3)
A basic course in the analysis of contemporary economic issues with emphasis on current economic topics such as inflation, poverty and affluence, urban congestion, and environmental pollution. (Credit will not be given for this course to students who have received prior credit in ECO 201 and/or 202.)

ECO 201 PRINCIPLES OF ECONOMICS I. (3)
The study of the allocation of scarce resources from the viewpoint of individual economic units. Topics include household and firm behavior, competitive pricing of goods and resources, and monopoly power.

ECO 202 PRINCIPLES OF ECONOMICS II. (3)
A study of how society’s needs are satisfied with the limited resources available. Topics include contemporary issues such as inflation, unemployment, economic growth, international dependencies, and how public policy deals with them. Prereq: ECO 201 or equivalent.

ECO 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY. (3)
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as MA 327.)

ECO 391 ECONOMIC AND BUSINESS STATISTICS. (3)
A survey of statistical techniques relevant to modern economics and business, with major emphasis on correlation and regression, Bayesian decision theory, index numbers, time series analysis, and forecasting models. Prereq: STA 291 or equivalent.

ECO 395 INDIVIDUAL WORK EXPERIENCE. (1-6)
Students confer individually with the instructor. Written paper usually expected and filed in chairperson’s office. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

ECO 401 INTERMEDIATE MICROECONOMIC THEORY. (3)
An analysis of the behavior of consumers and firms, price determination, various market structures, and income distribution. Prereq: ECO 201 or equivalent with a grade of C or higher and ECO 202 or equivalent with a grade of C or higher.

ECO 402 INTERMEDIATE MACROECONOMIC THEORY. (3)
National income concepts, the determination of aggregate income and employment, the theory of money and inflation and problems of economic growth. Prereq: ECO 202 or equivalent and ECO 401 taken previously or permission of instructor.

ECO 410 CURRENT ISSUES IN ECONOMICS (Subtitle required). (3)
The course addresses relevant topics in economics. May be repeated for a maximum of six credits under different subtitle. Prereq: ECO 202 and/or ECO XXX to be identified by instructor upon time of offering.

ECO 411 BUSINESS ECONOMICS. (3)
Applies basic economic principles to the types of problems faced by business decision makers. Particular attention is paid to the economics of organizations and to the economics of firm strategy. Topics covered will include the nature of the firm, the make or buy decision, corporate organization, distribution channels, external market structure, selling decisions, and rivalry and strategy. Prereq: ECO 202 or equivalent.

ECO 412 MONETARY ECONOMICS. (3)
A detailed discussion of the financial sector of basic static macroeconomic models, including views of both the monetarist and new-Keynesian schools. Institutional aspects of the financial system are discussed. The course stresses problems of economic stabilization. Prereq: ECO 202 or equivalent.

ECO 450G THE ECONOMICS OF POVERTY AND WELFARE PROGRAMS. (3)
Examines the economic conditions of the poor in the U.S., theories of poverty, and major redistribution programs in the U.S. The course will study the economic impacts of such programs as Social Security, Medicare, Aid to Families with Dependent Children, Food Stamps, Medicaid, and child care subsidies. Prereq: ECO 401 or equivalent or consent of instructor.

ECO 461 MARKET STRUCTURE AND ANTI-TRUST POLICY. (3)
A study of the relationship between industry performance and market structure, and the role and effects of the government’s anti-trust policies. Prereq: ECO 401 or equivalent.

ECO 465G COMPARATIVE ECONOMIC SYSTEMS. (3)
This course deals with the theoretical underpinnings of the major economic systems in existence today. The classical model of competitive market capitalism is reviewed first, followed by the Marxian and neo-Marxian, and/ or institutional paradigms. Next, the contemporary Keynesian and the neo-Keynesian models are analyzed. This course concludes with a review of the Lange model of decentralized (market) socialism. Prereq: ECO 401 or equivalent or consent of instructor.
ECO 651 INTRODUCTION TO MACROECONOMICS. (3)
This course introduces the basic principles of macroeconomics, including aggregate demand and supply, inflation, unemployment, and business cycles. Prereq: ECO 202 or consent of instructor.

ECO 652 MACROECONOMIC DYNAMICS. (3)
The course covers the basic theory of business cycles, inflation, and unemployment. The objective is to understand how macroeconomic phenomena are caused. Prereq: ECO 651 or consent of instructor.

ECO 653 AGGREGATE DEMAND AND SUPPLY. (3)
This course introduces the macroeconomic model of the aggregate demand and aggregate supply. Topics include the IS-LM model, fiscal and monetary policies, and the role of shocks. Prereq: ECO 651 or consent of instructor.

ECO 654 THIRD QUARTER ECONOMICS. (3)
This course covers the fundamentals of microeconomics, including supply and demand, market structures, and consumer behavior. Prereq: ECO 653 or consent of instructor.

ECO 655 MICROECONOMIC THEORY. (3)
The course focuses on the microeconomic foundations of welfare economics and the theory of the firm. Prereq: ECO 654 or consent of instructor.

ECO 656 MATHEMATICAL ECONOMICS. (3)
The course covers mathematical tools for economic analysis, with focus on optimization. Prereq: ECO 654 or consent of instructor.

ECO 657 ECONOMIC GROWTH. (3)
The course covers the economic theories of economic growth, including factor accumulation, technological change, and institutional change. Prereq: ECO 652 or consent of instructor.

ECO 658 ECONOMIC DEVELOPMENT. (3)
The course covers economic development from a growth perspective, focusing on growth in developing countries. Prereq: ECO 652 or consent of instructor.

ECO 659 ECONOMIC POLICY ANALYSIS. (3)
The course covers the analysis of economic policies, with focus on macroeconomic and microeconomic policies. Prereq: ECO 652 or consent of instructor.

ECO 660 ECONOMIC GROWTH AND DEVELOPMENT. (3)
The course covers the theoretical foundations of economic growth and development, with focus on growth theory, development strategy, and economic transitions. Prereq: ECO 652 or consent of instructor.

ECO 661 MULTIVARIATE ANALYSIS AND REGRESSION. (3)
The course covers the use of multivariate analysis and regression in economic research. Prereq: ECO 652 or consent of instructor.

ECO 662 ECONOMETRIC METHODS. (3)
The course covers the use of econometric methods in economic research. Prereq: ECO 652 or consent of instructor.

ECO 663 ECONOMETRIC THEORY. (3)
The course covers the theoretical foundations of econometrics, with focus on estimation, hypothesis testing, and model selection. Prereq: ECO 652 or consent of instructor.

ECO 664 ECONOMETRIC ANALYSIS. (3)
The course covers the use of econometric analysis in economic research. Prereq: ECO 652 or consent of instructor.

ECO 665 ELEMENTS OF MACROECONOMIC THEORY. (3)
The course covers the basic elements of macroeconomic theory, with focus on the role of shocks. Prereq: ECO 652 or consent of instructor.

ECO 666 ELEMENTS OF MICROECONOMIC THEORY. (3)
The course covers the basic elements of microeconomic theory, with focus on consumer behavior. Prereq: ECO 652 or consent of instructor.

ECO 667 ECONOMIC THEORY AND POLICY ANALYSIS. (3)
The course covers the use of economic theory in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 668 ECONOMIC THEORY AND POLICY THINKING. (3)
The course covers the use of economic theory in policy thinking. Prereq: ECO 652 or consent of instructor.

ECO 669 ECONOMIC THEORY AND POLICY IMPLEMENTATION. (3)
The course covers the use of economic theory in policy implementation. Prereq: ECO 652 or consent of instructor.

ECO 670 ECONOMIC INSTITUTIONS. (3)
The course covers the economic institutions and the role of government in the economy. Prereq: ECO 652 or consent of instructor.

ECO 671 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in economic analysis. Prereq: ECO 652 or consent of instructor.

ECO 672 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 673 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in economic analysis. Prereq: ECO 652 or consent of instructor.

ECO 674 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 675 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 676 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 677 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 678 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 679 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 680 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 681 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 682 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 683 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 684 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 685 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 686 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 687 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 688 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 689 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 690 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 691 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 692 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 693 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 694 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 695 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 696 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 697 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 698 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 699 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 700 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 701 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 702 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 703 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 704 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 705 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 706 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.

ECO 707 ECONOMIC POLICY ANALYSIS. (3)
The course covers the use of economic policy in policy analysis. Prereq: ECO 652 or consent of instructor.
Course Descriptions

ECO 752 ADVANCED TOPICS IN PUBLIC FINANCE. (3)
Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism; international public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as PA 754.)

ECO 753 URBAN AND REGIONAL ECONOMICS. (3)
An intensive study of the theory, evidence and policy concerning urban areas and regions. Topics typically covered include: nature of regions and urban areas, size and distribution of cities, location decisions, housing, transportation, migration and regional growth. Prereq: ECO 601 or consent of instructor.

ECO 761 MACRO AND MONETARY ECONOMICS. (3)
Advanced study of business cycle fluctuations. Theoretical and empirical investigations of the causes of business cycles; evaluating the effectiveness of monetary, fiscal, and other policies to affect inflation, unemployment, and short-run economic goals. Emphasis on current academic research. Prereq: ECO 701, ECO 702 or consent of instructor.

ECO 762 MACRO AND MONETARY ECONOMICS. (3)
Advanced study of long-term macroeconomic issues. Theoretical and empirical examinations of the determinants of economic growth; analysis of government policies, country endowments, and institutional factors in determining growth rates and income levels. Emphasis on current academic research. Prereq: ECO 702 or consent of instructor.

ECO 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters of research is required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ECO 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ECO 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

ECO 771 INTERNATIONAL ECONOMICS: INTERNATIONAL MONEY AND FINANCE. (3)
International finance and open economy macroeconomics; the balance of payments; theory of exchange rate determination; macroeconomic policy issues in open economies. Prereq: ECO 602.

ECO 772 INTERNATIONAL ECONOMICS: TRADE THEORY AND POLICY. (3)
Theory and empirical analysis of the effects of trade and trade policy. Prereq: ECO 601.

ECO 773 OPEN ECONOMY MACROECONOMICS. (3)
Development of rigorous models to enhance knowledge of open economies. Topics include: impact on an economy of changes in trade, the current account balance, exchange rates, and international financial markets. Prereq: ECO 702.

ECO 790 TIME SERIES ANALYSIS. (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, auto-regressive, and mixed auto-regressive-moving average processes; linear nonstationary models, minimum mean square error forecasts and their properties; model identification, estimation and diagnostic checking. Prereq: STA 422G or its equivalent. (Same as STA 626.)

ECO 796 SEMINAR. (1-6)
An extended original investigation of some specific topic with a view to giving training in methods of research and studying intensively a particular subject in the field of economics. May be repeated to a maximum of six credits.

ECO 797 RESEARCH PROBLEMS IN ECONOMICS. (1-9)
Students confer individually with the instructor. May be repeated to a maximum of nine credits. Prereq: Permission of the Director of Graduate Studies is required.

EDC Curriculum and Instruction

EDC 317 INTRODUCTION TO INSTRUCTIONAL MEDIA. (1)
An introductory instructional media experience including basic production and utilization techniques for media materials and operation of commonly used educational equipment. Topics include graphic presentation, transparency production, audio materials, motion pictures, 35mm photographic techniques, and an introduction to videotape television. Prereq: Admission to a Teacher Education Program.

EDC 322 ELEMENTARY PRACTICUM. (1-3)
Planned and supervised practicum in teaching elementary science, reading, social studies, and mathematics. Observation, selecting objectives and materials, questioning strategies, learning centers, instructional units, and assessment techniques will be emphasized. May be repeated to a maximum of three credits. Lecture, one hour; laboratory, six to twelve hours per week. Prereq: Admission to Early Elementary TEP. Concurrent: EDC 323, EDC 326, SEM 328, SEM 337, and EDC 339.

EDC 323 CLASSROOM MANAGEMENT AND DISCIPLINE. (3)
EDC 323 should be taken in conjunction with EDC 329. Prereq: Admission to Teacher Education Program.

EDC 326 TEACHING SOCIAL STUDIES IN THE ELEMENTARY SCHOOL. (3)
A study of methods and materials for teaching social studies at the elementary level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques for elementary social studies. Consideration will be given to addressing the individual needs of a diverse student population. Special emphasis is placed on instruction in grades K-4. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 15 hours of social sciences. Coreq: EDC 322.

EDC 327 READING IN THE CONTENT AREAS. (3)
A study of materials and techniques useful in the diagnostic teaching of reading and other language arts with students in grades K-5. The course will emphasize materials, techniques, and procedures, which diagnose individual strengths and weaknesses, and prescriptive instruction based upon the diagnosis. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to teacher education or permission of instructor.

EDC 329 TEACHING READING AND LANGUAGE ARTS. (3)
Development of competencies for the teaching of reading and other language arts to groups. Course will also provide an overview of the nature of reading and language arts development from grade K-8. Twenty hours of laboratory work in the schools are required. Prereq: Admission to Early Elementary Education TEP or Middle School TEP.

EDC 330 WRITING IN THE CONTENT AREAS. (3)
Development of competencies for the teaching of writing and other language arts, including digital texts and other 21st century platforms, to groups. This course is in conjunction with a four-week field experience, consisting of two-week placements in the candidate's areas of content concentration. Prereq: EDC 327, or permission of instructor.

EDC 334 ORAL AND WRITTEN LANGUAGE DEVELOPMENT IN THE ELEMENTARY SCHOOL. (3)
A study of language differences, methods for teaching children with language differences, ways to integrate oral language instruction with the total curriculum, ways to enhance students' expressive writing abilities, and ways to teach grammar, spelling, and handwriting through functional and creative writing activities. Prereq: EDC 329 and admission to the elementary teacher education program.

EDC 339 DESIGNING A READING AND LANGUAGE ARTS PROGRAM FOR THE ELEMENTARY SCHOOL. (3)
A study of materials and procedures for developing reading and language arts skills with elementary students, with an emphasis on grades K-4. Course will emphasize how to diagnose individual student skill strengths and weaknesses and build a prescriptive program based upon the diagnosis. Prereq: EDC 329; admission to the TEP or permission of instructor. Coreq: EDC 322.

EDC 341 THE EARLY ADOLESCENT LEARNER AND METHODS IN MIDDLE LEVEL EDUCATION. (3)
An examination of the nature of early adolescents as well as the history and characteristics of the schools designed to teach them. Focus is on responsive pedagogy, especially the rationale behind the middle school concept and the generic techniques of teaching as an individual and as a member of an interdisciplinary team. Lecture, three hours; laboratory, one hour. This course is in conjunction with a guest field experience to occur in a 16-week placement at one school site. Prereq: Admission to Teacher Education or permission of instructor.

EDC 342 STUDENT TEACHING IN ART. (3-12)
Designed to give the student practical experience through observation, planning, teaching, and evaluating procedures. The student works with children on all grade levels under the guidance of the supervising teacher. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.

EDC 343 METHODS AND MANAGEMENT IN MIDDLE LEVEL EDUCATION. (3)
A study of classroom management in theory and practice, with a focus on planning and assessment in middle level classrooms. This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: EDC 341, or permission of instructor.

EDC 346 METHODS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)
This course is in conjunction with a four-week field experience, consisting of 2 two-week placements in the candidate's areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in approved social studies courses, or permission of instructor.

EDC 347 METHODS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS. (3)
This course introduces teacher candidates to the fundamentals of theory and practice for teaching English Language Arts at the middle level (grades 5-9) as they develop an understanding of state and national standards. Course work includes current issues and recent developments in curriculum and methodology in the teaching of middle level English Language Arts with emphasis on the integration of reading, writing, listening, speaking, and language use. Course includes a four-week field placement in middle school settings. Prereq: Admission to Teacher Education, 9 hours in English, or permission of instructor.
EDC 377 STUDENT TEACHING IN MUSIC. (3-12)
A course planned for teachers who expect to become either instructors or supervisors of music in the public schools. Observation, teaching, work on research problems, and conferences with the supervising teacher included. Offered on a pass-fail basis only. Prereq: Admission to the Teacher Education Program or permission of instructor.

EDC 421 SURVEY OF SECONDARY MATHEMATICS CURRICULUM. (3)
This course will examine the content of the mathematics curriculum of the secondary school and issues related to that curriculum. Students are expected to demonstrate competency in this content.

EDC 433 STUDENT TEACHING IN THE ELEMENTARY SCHOOL. (3-12)
A course designed to give the student experience with and practice in the program of an elementary school. Actual work with children in all learning situations is the basic part of the course. A required weekly seminar will include sessions on: beginning teacher internship, school law and students’ rights, administrative organization, and professional development. Offered on a pass/fail basis only. Prereq: Must meet the published college requirements for student teaching.

#EDC 446 APPLICATIONS OF TEACHING MIDDLE LEVEL SOCIAL STUDIES. (3)
This course emphasizes analyzing and assessing teaching and learning appropriate to inquiry-based social studies instruction in the middle grades. This course is in conjunction with an eight-week field experience, consisting of approximately 2.5 weeks at the start of the semester and 5.5 weeks during the middle of the semester. Candidates will also attend their field placement at other times (e.g., district pre-planning, flexible Fridays) during the semester. Prereq: EDC 346 or permission of instructor.

#EDC 447 APPLICATIONS OF TEACHING MIDDLE LEVEL ENGLISH LANGUAGE ARTS. (3)
This course promotes the thoughtful examination of writing instruction at the middle level. Throughout the course, students are introduced to strategies and skills they can use to enhance their own writing and the writing of middle level students (grades 5-9). Using a process approach, students learn how to communicate ideas effectively in a variety of genres and for a multitude of purposes. Based on the most current understandings in the field, this course explores such topics as writer’s workshop, conferencing, struggling writers, assessment, reading/writing connections, writing in the disciplines, revision and editing, the use of digital media to support writers, and the management of writing instruction. This course is in conjunction with an eight-week field experience, consisting of approximately 2.5 weeks at the start of the semester and 5.5 weeks during the middle of the semester. Candidates will also attend their field placement at other times (e.g., district pre-planning, flexible Fridays) during the semester. Prereq: EDC 347 or permission of instructor.

EDC 501 TEACHING INTERNSHIP. (1-12)
Supervised practice teaching under competent leadership. Observation, instruction, independent study which parallels field experience, and conferences with supervising instructor included. This course is designed primarily for students in Allied Health Professions, Education, Library and Information Science, Home Economics, and Social Work. May be repeated to a maximum of 12 hours. Prereq: EDC 500 or permission of instructor.

*EDC 509 COMPOSITION FOR TEACHERS. (3)
A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 509.)

*EDC 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 513.)

*EDC 514 TESL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG/LIN 514.)

*EDC 520 ASSESSMENT AND ACCOUNTABILITY IN MIDDLE LEVEL EDUCATION. (3)
This capstone course is taken during the student teaching experience and is taught via an online modality. The purpose of the course is to investigate and document teaching effectiveness. Candidates design an integrated unit of study, pre and post test student learning, analyze learning gains drawing on formative and summative measures, and make modifications and accommodations based on the results. Prereq: Admission to Teacher Education.

*EDC 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)
Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDP/PEP 522.)

EDC 533 TEACHING ADOLESCENT LITERACY ACROSS THE DISCIPLINES. (3)
This course provides an in-depth study of theories and teaching methods for integrating literacy (including digital literacy) instruction into content area classrooms at the middle and high school levels. Instructional strategies, procedures, and assessments designed to increase vocabulary learning and comprehension of expository texts are emphasized. Prereq: Graduate standing or consent of the instructor.

EDC 534 READING AND STUDY SKILLS IN ENGLISH. (3)
An introductory course for teachers of English. The emphasis is on developing competencies necessary for teaching reading and study strategies in the English and humanities curriculum, especially at the junior and senior high school levels. Lecture, three hours; laboratory, one hour. Prereq: Junior standing; admission to the TEP in English education, or consent of instructor.

EDC 543 DIGITAL GAME BASED LEARNING AND INSTRUCTION. (3)
Digital game-based video applications as prominent video-based vehicles for distance education and multimedia development through multi-user and virtual platforms. Classroom exercises and projects develop basic video game production skills including the use of graphical and video assets, flash animations, storytelling, equipment, terminology and systems, message design issues and research on DGBL.

EDC 544 USE AND INTEGRATION OF INSTRUCTIONAL MEDIA. (3)
Students use a range of traditional, interactive, and emerging technological interventions in analog and digital formats. Students gain skill in the operation, production, and integration of basic media such as video, graphics, videodisk, and CD-ROM in a variety of instructional settings (training, exploratory learning, on-line databases, etc.). Students demonstrate skills via the composition and production of several media documents using available tools and resources.

*EDC 547 TECHNOLOGY IN INSTRUCTION PRACTICE. (3)
Students use instructional computing applications and understand the roles and uses of computers in instruction. Students select and use instructional computing hardware and software appropriate to instructional goals and settings. Students use electronic networks for instructional purposes. Students demonstrate skill using basic productivity software through structured assignments and collaborative projects.

*EDC 548 INSTRUCTIONAL TECHNOLOGY LEADERSHIP. (3)
Students develop skill in advanced aspects of the operation and use of the range of instructional technologies from desktop to distributed computing environments. Students use operating systems, learn network administration, do technology planning, and work with basic authoring tools. Skill is demonstrated through a series of projects including development of a technology plan for a specified work setting and authorship of a prototype program.

EDC 549 MIDDLE LEVEL STUDENT TEACHING. (3-15)
This course provides candidates with the opportunity to participate in a full-time, supervised internship in middle grade classrooms. The student teaching experience occurs in a 5-9 school setting. Offered on a pass-fail basis only. Repeated for up to 15 hours. Prereq: Must meet college and department requirements for student teaching.

EDC 550 EDUCATION IN A CULTURALLY DIVERSE SOCIETY. (3)
This course assists future educators in developing strategies to create an equitable teaching/learning environment where all students are validated, stimulated, and nurtured. Course participants explore the rationale for their current belief systems and perceptions of other cultures; investigate how and why their personal attitudes, behaviors, and expectations affect the academic and social development of children and youth, and examine contemporary educational issues. (Same as AAS 550.)

EDC 554 CULTURE, EDUCATION AND TEACHING ABROAD. (3)
Introduction to theory and practice of intercultural communication, cross-cultural (especially international experience), and teaching with a global perspective, plus an opportunity for country-specific research. Required for those wishing to student teach overseas. (Same as EPE 554.)

EDC 556 MODERN EDUCATIONAL PROBLEMS. (GENERAL CURRICULUM). (3)
EDC 575, 576 MODERN EDUCATIONAL PROBLEMS. (UNCLASSIFIED). (3 ea.)
EDC 580 INTRODUCTION TO GIFTED EDUCATION. (3)
This course reviews the historical development of and the theoretical and empirical support for differentiated educational programs for gifted and talented children. Specific issues addressed include defining and identifying giftedness, teacher competencies and training, providing differentiated curriculum and program evaluation. (Same as EDP 580.)

EDC 601 THEORIES, PERSPECTIVES, TRENDS AND ISSUES IN MULTICULTURAL EDUCATION. (3)
This course provides students with a critical analysis of multicultural education theories, perspectives, current issues, and trends. Students will develop the competencies needed to write scholarly literature reviews, identify areas in multicultural education needing further research studies, and submit papers for review and presentation at professional meetings. Prereq: Graduate standing, EDP 557 or consent of instructor. (Same as AAS 601.)
EDC 602 CURRICULA AND PROGRAMMING FOR THE GIFTED. (3)
Students in this course will examine and evaluate curriculum models appropriate of gifted students, and will consider methods for adapting existing curricula to meet the needs of gifted students. The design, implementation and evaluation of program delivery models will be discussed. Prereq: EDC/EDP 580 and teacher certification, or consent of instructor.

EDC 605 DISTANCE LEARNING RESEARCH AND DESIGN. (3)
Study of the design and development of distributed learning systems in education and training. Topics include: foundations of distance education, distance learning research, and the design and development of e-learning courses and workshops. Student involvement in the design of an e-learning course or workshop will be emphasized.

EDC 607 INSTRUCTIONAL DESIGN. (3)
Introduction to the instructional design process from needs assessment and goal definition through evaluation. Each student will design prototype instructional materials based on an instructional design model and/or procedures. The course will also introduce students to the field of instructional design and technology.

EDC 608 INSTRUCTIONAL DESIGN II. (3)
Critical analysis of instructional design models and their theoretical foundations including the impact of various models and perspectives on the practice and the products of instructional design. Prereq: EDC 607 or consent of instructor.

EDC 609 INTERACTIVE MULTIMEDIA AND USER DESIGN. (3)
The goal of this course is to examine the theoretical foundations and best practices involved in multimedia research and interface design. These investigations are anchored in user-centered design and the methodology explored in the course is research to practice in usability testing and iterative program design. Prereq: EDC 544.

EDC 610 DISCIPLINE AND CLASSROOM MANAGEMENT. (3)
The course is designed to examine the causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher. The course content is designed around two approaches: (1) identifying prevalent problems and exploring specific solutions to them; (2) presenting selected strategies and applying them to a variety of problems. In both cases, alternatives are considered in the light of relevant theory, law, research and experience. Prereq: Teacher certification and EDP 203.

EDC 611 AUTHORING APPLICATIONS FOR TECHNOLOGY-BASED INSTRUCTION. (3)
Focuses on individual and collaborative authoring applications for technology based instructional materials. Topics include linear and non-linear information structures, instructional message design, compositional issues related to audience focus, information density, language control, and organization, and prototype production with industry standard authoring software. Prereq: EDC 547 and EDC 607 or consent of instructor.

EDC 612 INSTRUCTIONAL DESIGN AND TECHNOLOGY FOUNDATIONS. (3)
Provides an in-depth survey of the field of instructional design and technology. Topics covered include the history of instructional design and technology, critical issues, current trends and future prospects for the field, instructional development, research, certification, and professional development.

EDC 615 ADVANCED INSTRUCTIONAL APPLICATIONS FOR THE EARLY ADOLESCENT LEARNER. (3)
This course for middle school teachers examines the complex nature of the 10 to 14 year old student. Analysis of current research-based effective instructional strategies to meet the needs, interests, and characteristics of these students will be included. Prereq: Teacher Certification or consent of instructor.

EDC 616 THE MIDDLE SCHOOL. (3)
The purpose of this course is to provide middle school teachers with an in-depth analysis of the characteristics of effective middle school faculties. An examination of current curricular models, issues, trends, and exemplary middle schools will comprise the primary focus of this course. Prereq: EDC 615 or consent of instructor.

EDC 618 ADVANCED STUDY IN THE TEACHING OF READING. (3)
An advanced course for classroom teachers which focuses on selection and implementation of reading assessment and instructional procedures. The theoretical bases of the reading processes and the knowledge of research in reading will be related to the design of classroom instruction. This course is to become an option in Area 7 of both the Elementary and Secondary Standard Certification programs. Prereq: EDC 330 or 339 or 533 or equivalent.

*EDC 619 ASSESSMENT OF READING GROWTH AND DEVELOPMENT. (3)
Clinical techniques for the diagnosis of reading disabilities. A course designed to develop both theoretical understandings and operational skills in clinical diagnosis of reading problems. Classroom application of the techniques is discussed. Prereq: EDC 330, or EDC 533, or EDC 534, or permission of instructor.

*EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)
Clinical techniques used in the remediation of reading problems. It is a course designed to develop individualized procedures related to diagnosis. Classroom applications of the instructional procedures are discussed. This course is a combination of lecture and application with a student client. Prereq: EDC 619, or permission of instructor.

EDC 620 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)
Clinical techniques used in the remediation of reading problems. A course designed to develop individualized procedures related to diagnosis. Classroom application of the instructional procedures is discussed. Lecture, two hours; laboratory, two hours. Prereq: EDC 619, or consent of instructor.

EDC 621 LINGUISTIC AND COGNITIVE FOUNDATIONS OF READING IN EARLY CHILDHOOD. (3)
A study of reading as a language-based process with an emphasis upon developing observational skills to assess the child’s growth in oracy and literacy skills and upon designing a language learning environment to meet these needs. Prereq: EDC 339 or permission of instructor.

EDC 622 SOCIAL STUDIES PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning social studies. Emphasis will be placed on social studies about planning instruction and developing assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDC 623 BUSINESS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning business and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to a maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDC 626 DESIGN AND IMPLEMENTATION OF READING INSTRUCTION. (3)
Clinical techniques used in the remediation of reading problems. A course designed to develop individualized procedures related to diagnosis. Classroom application of the instructional procedures is discussed. Lecture, two hours; laboratory, two hours. Prereq: EDC 619, or consent of instructor.

EDC 627 CLASSROOM MANAGEMENT IN SECONDARY EDUCATION. (1)
The classroom management component of this course is designed to prepare future teachers to effectively manage aspects of their instruction, interactions with students, and student behavior in the secondary classroom. Causes of and solutions to disruptive and noncompliant behavior and classroom management problems that are within the control of the classroom teacher will be examined. Prereq: Admission to the M.A. Education (Secondary Education with Initial Certification).

EDC 628 TECHNOLOGY IN SECONDARY EDUCATION. (1)
This course emphasizes the use of several key interactive technologies for problem-solving—problem solving that occurs on several levels: (1) instructional problem solving (using technology to support various kinds of learning outcomes for students), (2) content problem solving (using games/software/websites to learn to solve problems that reflect the principles and core concepts in your discipline), (3) assessment problem solving (using technologies to support authentic challenging assessments that support evaluation of what students know and are able to do). Prereq: Admission to the M.A. Education (with initial teacher certification).

EDC 630 MULTICULTURALISM IN SECONDARY EDUCATION. (1)
This course explores the influence of self-concepts and past experiences on current attitudes, perceptions and behaviors; investigates the effects of cultural traditions, political mandates, educational trends and school curriculums on student achievement; and develops strategies to create equitable teaching/learning environments in secondary education that validate, stimulate, and nurture all students. Prereq: Admission to M.A. in Education (Secondary Education with Initial Certification).

EDC 641 RESEARCH AND THEORY IN TEACHING READING IN THE ELEMENTARY SCHOOL. (3)
A systematic study of the research and theory and their application to the teaching of reading in the elementary school. Attention will be given to new developments in the field. Prereq: EDC 330 or consent of instructor.

EDC 642 RESEARCH AND THEORY IN TEACHING LANGUAGE ARTS. (3)
A systematic study of research and theory in the teaching of language arts. Prereq: EDC 330 or consent of instructor.
Course Descriptions

EDC 767 PRACTICUM IN GIFTED EDUCATION. (3)
Supervised experience in the instruction of gifted children. Requires placement in an approved program designed for serving gifted children plus participation in a weekly supervisory seminar. Lecture; two hours; laboratory, nine hours per week. Prereq: EDP 580, EDC 602, EDC 612 or consent of instructor. (Same as EDP 676.)

EDC 709 SOCIAL MEDIA AND INTERACTIVE SYSTEMS DESIGN. (3)
The purpose of this course is to examine the growing research and design literature for on-line communities and networked learning groups that support cooperative, collaborative and social instructional activities. Framed by concepts from Activity Theory, Social Networking Theory and Social Learning Models, students will read current books, research articles and be introduced to research methods and tools (such as tracking utilities and on-line data collection) for examining on-line communities. Students will design and collect data for an original research project as part of required course work. Prereq: EDC 608, EDC 612, or consent of instructor.

EDC 710 ADVANCED TOPICS IN INSTRUCTIONAL DESIGN. (3)
An identification and analysis of current theories and programs of research in instructional systems design. Students will develop the skills necessary to conduct and write a scholarly literature review and identify potential areas and questions needing further study. Prereq: EDC 608, EDC 612, or consent of instructor.

EDC 712 THE ELEMENTARY SCHOOL. (3)
Recent research and modern trends in teaching the skills and content subjects in the elementary school. Planned for supervisors, superintendents, principals, and teachers for better understanding of a modern elementary school.

EDC 714 THE SECONDARY SCHOOL. (3)
A course designed to acquaint the secondary teacher and the administrator with the nature and function of the secondary school.

EDC 724 GUIDING AND ANALYZING EFFECTIVE TEACHING. (3)
A course designed for educators who are preparing to supervise teachers and who wish to analyze their own practice. Research, policies, and trends are examined and practiced in the context of how to promote effective teaching. Principles apply to elementary and secondary education.

EDC 726 CURRICULUM INQUIRY: MIXED METHODS FOR RESEARCH. (3)
A mixed methodology conceptual framework is used to examine various approaches for designing, implementing and analyzing practitioner data generated in a variety of instructional settings. Topics include epistemological, methodological and ethical issues involved in action research, classroom discourse analyses and mixed methods curriculum inquiry. Prereq: EDA 651, EPE 621 and EPE 663 or permission of instructor.

EDC 730 PROBLEMS OF THE SCHOOL CURRICULUM. (3)
Problems in the field of the school curriculum and in the preparation of instructional materials. Students enrolling in this course are required to leave on file with the College of Education a complete report of each problem studied. May be repeated once for a maximum of six credits.

EDC 731 SOCIAL STUDIES SEMINAR: HISTORY EDUCATION. (3)
Advanced study of the purposes and practices that characterize K-12 history education in diverse settings, critical analysis of research on the development of children’s and adolescents’ historical thinking and the introduction of classroom-based techniques for assessing students’ historical understanding. Prereq: Graduate standing.

EDC 732 PRINCIPLES OF CURRICULUM CONSTRUCTION. (3)
Study of basic principles of curriculum development. Relationship of social and psychological factors to curriculum change. Survey of current approaches to curriculum organization. Considerations of means of curriculum development in the instructional systems.

EDC 733 LEADERSHIP IN ADVANCED INSTRUCTIONAL PRACTICE. (3)
Course participants will develop leadership skills in curriculum and instruction through a variety of research-based analytic practices such as lesson study, observation, mentoring, dialogic and collaborative work in the context of a school learning community. Clinical/field/practicum experiences provide experience identifying a research problem, planning a course of action, and implementing and evaluating the action plan to improve learning results in K-12 classrooms. This course is designed as a hybrid workshop as follows. The class begins with a one-week intensive summer experience. On-line and distance learning instruction will be conducted throughout the fall semester as students engage in their course work through clinical/field/practicum experiences. During the semester, two on-class meetings will serve as mid-point and final assessments of student progress toward meeting course objectives. Clinical/field work will be conducted in school classrooms. Prereq: Graduate-level curriculum course, graduate-level assessment coursework, and a minimum of two years’ K-12 teaching experience.

EDC 740 PRACTICUM IN TEACHING READING AND RELATED LANGUAGE ARTS. (3)
Supervised practicum in analyzing problems in reading and related language arts and providing remedial work. Requires six hours per week in practicum with individual children or groups, plus two hours per week in seminar. May be repeated to a maximum of six credits. Prereq: EDC 619, 620.

EDC 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL. (0-9)
Students will teach in their subject areas in the schools full-time, meet regularly to discuss teaching effectiveness and strategies for improvement and develop their professional portfolios. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: The appropriate methods course in the subject area (SEM 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-Sec. Education). (Same as SEM 746.)

EDC 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDC 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDC 750 INTERNSHIP IN INSTRUCTIONAL SYSTEMS DESIGN. (3)
Students will apply their knowledge of instructional systems design in a real-life setting. The work setting will be selected based on the professional goals of each student and student work will be supervised and reviewed by the internship coordinator. May be repeated to a maximum of nine credits. Prereq: Consent of program coordinator.

EDC 755 INSTRUCTIONAL SYSTEMS DESIGN RESEARCH COLLOQUIUM. (1)
Students and faculty will discuss current research and related issues in instructional systems design. May be repeated to a maximum of two credits. Prereq or concur: EDC 547 and EDC 608.

EDC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDC 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EDC 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EDC 777 SEMINAR IN CURRICULUM AND INSTRUCTION (Subtitle required). (1-3)
A critical analysis of recently developed materials and techniques in curriculum and instruction for precollege education. Includes analysis of evaluative research related to new materials and techniques. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDC 781 INDEPENDENT STUDY IN CURRICULUM AND INSTRUCTION. (1-3)
An independent study course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDC 791 RESEARCH PROBLEMS IN CURRICULUM AND INSTRUCTION. (1-3)
A research problems course for graduate students who have completed at least half of the program course requirements in clinical and college teaching, curriculum and instruction, early childhood education, elementary education, reading or secondary education. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies.

EDL School Administration

EDL 401 THE PROFESSIONAL TEACHER: LEGAL PERSPECTIVES. (1)
Study of legal concerns of public school teachers. Emphasizes legal rights and responsibilities of teachers and pupils. Lecture, two hours per week for eight weeks. Prereq: Admission to the Teacher Education Program.

EDL 601 INTRODUCTION TO SCHOOL LEADERSHIP AND ADMINISTRATION. (3)
Study of school leadership and administrative responsibilities, with emphasis on understanding schools as complex organizations and facilitating leadership to create a work climate supportive of excellence in teaching and learning.

EDL 610 SCHOOL LEADERSHIP PRACTICUM. (1)
Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed, or consent of instructor.

EDL 611 SCHOOL LEADERSHIP PRACTICUM. (1)
Study and observation of the role and responsibilities of the school principal in practice. Practicum students are required to spend time at school site locations. Prereq: Twelve hours of program course work completed and EDL 610 completed, or consent of instructor.
Course Descriptions

EDL 612 SCHOOL LEADERSHIP PRACTICUM III. (1) Study and observation of the role and responsibilities of the school principal in practice. Prereq: Program status or consent of instructor. Students are required to spend time at school site locations. Prereq: Twelve hours of program core course work completed and EDL 610, EDL 611 completed, or consent of instructor.

EDL 625 SCHOOL SAFETY AND DISCIPLINE LEADERSHIP. (3) Study of processes and programs effective in promoting school wide safety and discipline. Emphasis on school connections to community safety and resources. Prereq: Admission to Department Program or Consent of instructor.

EDL 627 SCHOOL FINANCE AND SUPPORT SERVICES. (3) Study of concepts in school finance and school business management. Attention is given to national, state, and local issues. Emphasis is also given to school support services including transportation, facility planning and maintenance, food service, and risk management. Prereq: Program status or consent of instructor.

EDL 628 SCHOOL LAW AND ETHICS. (3) Study of legal and ethical issues as related to practical problems of school administration. Constitutional provisions and court decisions are examined as they impact education. Prereq: Program status or consent of instructor.

EDL 631 LEADERSHIP FOR SCHOOL PROGRAM COLLABORATION. (3) This course prepared school leaders to administer integrated instructional support programs in schools and districts. Attention is also given to leadership requirements needed to facilitate collaboration among school and community-based programs that provide and support student learning. Prereq: Program status or consent of instructor.

EDL 634 LEADERSHIP FOR HUMAN RESOURCES DEVELOPMENT IN SCHOOLS. (3) Study of human resources development practices in school systems, with emphases on central office and school unit responsibilities for attracting, selecting, developing, evaluating, and retaining competent faculty and staff. Prereq: Program status or consent of instructor.

EDL 638 THE SUPERVISOR OF INSTRUCTION. (3) A study of the role and responsibilities of the supervisor of instruction as a member of the leadership team for the school district. Prereq: Admission to program or consent of instructor.

EDL 646 SCHOOL AND COMMUNITY COLLABORATION LEADERSHIP. (3) Study of issues in administering integrated support programs in schools and districts serving specific student or community populations while increasing school and community collaboration. Prereq: Program status or consent of instructor.

EDL 650 LEADERSHIP FOR SCHOOL PROGRAM IMPROVEMENT. (3) Study focusing on the preparation of school leaders to guide, facilitate and support curriculum, instruction, and assessment and to create a learning environment that promotes student achievement. Prereq: Program status or consent of instructor.

EDL 661 SCHOOL TECHNOLOGY LEADERSHIP. (3) This course provides an introduction to the study of school technology leadership with an emphasis on educational administrators developing a shared vision, planning, and promulgating policies and utilizing resources for the comprehensive integration of technology at the school, district, and state levels. Prereq: Admission to the program or consent of instructor.

EDL 662 DIGITAL AGE LEARNING AND SCHOOL TECHNOLOGY LEADERSHIP. (3) This course focuses on the role of educational administrators in creating and sustaining a culture of learning that ensures all students have access to an academically rigorous, relevant, and engaging education through the use of appropriate digital technologies. Prereq: Admission to the program or consent of instructor.

EDL 664 SCHOOL TECHNOLOGY LEADERSHIP FOR SCHOOL IMPROVEMENT. (3) This course focuses on educational administrators’ use of technology to support data-driven decision-making to support continuous improvement and change at the school, district, and state levels of education. Prereq: Admission to the program or consent of instructor.

EDL 665 SCHOOL TECHNOLOGY LEADERSHIP FOR DIGITAL CITIZENSHIP. (3) This course examines school administrators’ social, ethical, and legal issues and responsibilities all students, including those with disabilities and special needs, for digital citizenship. Facilitating understanding of evolving virtual school environments and modeling digital citizenship at the school, district, and state levels are also addressed. Prereq: Admission to the program or consent of instructor.

EDL 669 LEADERSHIP FOR SCHOOL PROBLEM SOLVING. (3) Principles and methods of systematic site-based problem identification, diagnosis, and solution for the improvement of practice in school settings. Prereq: Program status or consent of instructor.

EDL 676 THE SCHOOL SUPERINTENDENCY. (3) Role of the school district superintendent is studied including: historical and current job responsibilities of the position; knowledge, skills and dispositions necessary to serve successfully in the position; future challenges of the position. Prereq: Admission to the program and consent of instructor.

EDL 677 SCHOOL SYSTEM ADMINISTRATION. (3) Study of overall school district management and operations including administration of auxiliary services, federal programs, financial management, and human resources. Prereq: Admission to program or consent of instructor.

EDL 678 STRATEGIC MANAGEMENT IN EDUCATION. (3) Study of strategic management procedure applications in school administration utilized at both the school district and individual school site levels. Prereq: Admission to program or consent of instructor.

EDL 679 SCHOOL SUPERINTENDENT PRACTICUM. (1) Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program or consent of instructor.

EDL 680 SCHOOL SUPERINTENDENT PRACTICUM. (1) Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program and completion of EDL 679 or consent of instructor.

EDL 681 SCHOOL SUPERINTENDENT PRACTICUM. (1) Study and observation of the role and responsibilities of the school superintendent in practice. Students are required to spend time in field settings. Prereq: Admission to school superintendent certificate program and completion of EDL 679 plus EDL 680, or consent of instructor.

EDL 694 LEADERSHIP IN CAREER AND TECHNICAL EDUCATION. (3) A course designed for superintendents, high school principals, and other leaders. It is possible to prepare administrators and supervisors for leadership in career and technical education. (Same as CLD 694.)

EDL 700 KNOWLEDGE BASE FOR LEADERS. (3) This course reviews the quest for a knowledge base in educational administration. It begins with a survey of the history of education and organizational thought in the United States, examining scientific management, human relations, bureaucracy, and the theory movement. The course also reviews more recent attempts to capture the knowledge base including the University Council of Educational Administration’s article bank, PRIMIS, and the Standards for School Leaders from the Interstate School of Leadership Licensure Consortium. The course emphasizes epistemologies and uses knowledge bases to develop educational administration planning and the evolution of thought and vocabulary within the profession. Prereq: Permission of instructor.

EDL 701 LEADERSHIP IN EDUCATIONAL ORGANIZATIONS. (3) A study of leadership with particular emphasis on understanding the nature, defining characteristics, responsibilities, contextual determinants, and importance of leadership within educational organizations. Prereq: Admission to Department program or consent of instructor.

EDL 702 LEADERSHIP FOR ORGANIZATIONAL LEARNING. (3) This course examines theories associated with organizational learning and change processes that can be used by leaders of 21st century educational systems. Theories are then used to examine prevailing practices within organizations and to inform the development of action plans appropriate for improved organizational performance. Prereq: Admission to Department program or consent of instructor.

EDL 703 LEADING ORGANIZATIONAL CHANGE. (3) This course focuses on understanding the field of organizational change as well as emphasizing the nature, characteristics, responsibilities, and contextual determinants that influence a leader’s role in changing educational organizations. Prereq: Admission to Department program or consent of instructor.

EDL 704 POLITICS OF EDUCATIONAL LEADERSHIP. (3) This course provides a study of the political contexts in which educational leaders must operate. The course explores the roles of policy actors, institutions, ideologies, and competing interests, both internal and external to education institutions. The course places emphasis on the ways that race, class, and income factor into political decision making in education. Prereq: Graduate standing. (Same as EPE 603.)

EDL 705 INTERNATIONAL PERSPECTIVES ON EDUCATIONAL REFORM. (3) The course focuses on international education reform, the functions of schools in national social, economic and political development, as well as emerging perspectives on educational leadership and professional preparation. Prereq: Admission to a doctoral degree program at the University of Kentucky, completion of EPE 555, its equivalent, or consent of the instructor.

EDL 706 LEADERSHIP FOR LEARNING-CENTERED SCHOOLS I. (3) EDL 706 is the first in a two-course series that examines theories associated with learning-centered leadership in P12 educational organizations with emphasis on the roles and responsibilities of a principal in supervising a school’s instructional program to improve student learning and school performance. Prereq: Admission to Ed.D. program or permission of instructor.

EDL 707 LEADERSHIP FOR LEARNING-CENTERED SCHOOLS II. (3) EDL 707 is the second in a two-course series that examines theories associated with learning-centered leadership in P12 educational organizations with emphasis on the roles and responsibilities of principal in monitoring learning assessment, evaluation, and accountability to improve achievement for all students. Prereq: Admission to Ed.D. program or permission of instructor.
EDL 708 ORGANIZATIONAL LEARNING IN P12 SCHOOLS. (3)
EDL 708 examines theories associated with organizational learning and change processes that can be used by principals to create learning-centered schools. Students conduct disciplined inquiry within P12 schools to identify current practices and then develop action plans to improve school performance.

EDL 740 DISSERTATION RESEARCH. (0-12)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of EDL 769 residence credit following the successful completion of the qualifying exams.

EDL 751 FOUNDATIONS OF INQUIRY. (3)
Introductory study of assumptions and procedures of systematic inquiry used to investigate administrative, leadership and supervisory phenomena in education. Issues regarding quantitative, qualitative, and mixed methods models of inquiry are included.

EDL 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDL 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EDL 770 TOPICAL SEMINAR IN EDUCATIONAL LEADERSHIP. (1-3)
Advanced graduate students enroll in this topical seminar to extend their educational leadership through concentrated study of innovations in the specialized functions of leadership. These specializations include, but are not limited to, the study of curriculum and instructional leadership, educational law, personnel administration, school and community relations, education for diverse populations, budgeting and financing of schools. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDL 771 SEMINAR IN LEADERSHIP. (1-3)
A variable topic seminar on selected problems in educational leadership. Activities are designed to improve skill in planning, data-informed decision making, organizing, communicating, evaluating, negotiating, and problem solving will be provided as appropriate. Educational innovations and processes of implementing change may be analyzed. May be repeated to a maximum of nine credits. Prereq: Admission to program or consent of instructor.

EDL 785 INDEPENDENT WORK IN EDUCATIONAL LEADERSHIP. (0-3)
Includes research on a practical problem in educational leadership. Open only to students with at least one semester of graduate work in education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

EDL 792 RESEARCH IN EDUCATIONAL LEADERSHIP. (3)
Critical examination of representative research studies in leadership and related fields. Emphasis upon the students’ defining and delimiting an appropriate problem in educational leadership, generating a design appropriate to the problem and selecting appropriate techniques of analysis. Prereq: Admission to program.

EDP Educational and Counseling Psychology

EDP 202 HUMAN DEVELOPMENT AND LEARNING. (3)
Theories and concepts of human development, learning, and motivation are presented and applied to interpreting and explaining human behavior and interaction in relation to teaching across the developmental span from early childhood to adulthood. A field experience in a school or other educational agency is a required and basic part of the course. Prereq: PSY 100.

EDP 203 TEACHING EXCEPTIONAL LEARNERS IN REGULAR CLASSROOMS. (3)
An introduction to the characteristics and instructional needs of exceptional learners is presented with an overview of principles, procedures, methods, and materials for adapting educational programs to accommodate the integration of exceptional children in regular classrooms, when appropriate. A field experience in a school or other educational agency is a required and basic part of the course. Lecture, three hours per week; laboratory, two hours per week for a maximum of six weeks. Prereq: Successful completion of EDP 202 with an earned grade of C or higher.

EDP 303 TEACHING EXCEPTIONAL LEARNERS IN THE ELEMENTARY CLASSROOM. (2)
This course is designed to introduce students to issues related to classroom instruction to meet the needs of ALL students. We will examine the concept of the “least restrictive environment” (LRE) for learners and will discuss a variety of individual and group differences and exceptionalities, including various disabilities, giftedness, multicultural and diversity issues that teachers encounter in the regular classroom. The emphasis will be on understanding the needs and abilities of exceptional learners in order to make appropriate, reflective decisions about their instruction. Prereq: Admission to the Elementary Teacher Education Program and successful completion of EDP 202, or an equivalent.

EDP 518 CONTEMPORARY TOPICS IN UNIVERSITY RESIDENTIAL LIVING. (3)
An exploration of topics areas such as conflict mediation, crisis management, communication skills, student development theories, and wellness designed to provide new Resident Life Advisors with the skills and knowledge essential for being successful. Prereq: PSY 100, PSY 215, or EDP 202 and must be a Residence Life Advisor.

EDP 522 PSYCHOLOGICAL AND EDUCATIONAL TESTS AND MEASUREMENTS. (3)
Problems of measurement with emphasis on standardized tests. General principles of test construction and evaluation, for standardized assessments and/or teacher-made tests, examinations, criteria for evaluation and marking and other rating systems. (Same as EDC/EP 522.)

EDP 548 EDUCATIONAL PSYCHOLOGY. (3)
An introduction to the application of principles of psychology to classroom learning and teaching problems.

EDP 557 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA. (3)
The course covers applications of statistical and graphical methods for educational and evaluation data. Basic descriptive statistics, correlation, normal distributions and hypothesis testing will be covered. An emphasis is placed on exploratory data analysis and interpretation of results within the broad contexts of education and evaluation. Prereq: MA 109 or equivalent; undergraduate (with permission) or graduate status in the College of Education; or consent of the instructor. (Same as EPE 557.)

EDP 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)
The course covers applications of statistical and graphical methods for educational and evaluation data. Topics to be covered include descriptive statistics, correlation, normal distributions, hypothesis testing, regression, ANOVA, and power. General goals include: developing an understanding of statistical concepts, improving reasoning and critical thinking skills, and to prepare for more advanced quantitative courses. Students will gain valuable statistical computing skills via stats Software. Prereq: EDP/EPE 557 or equivalent. (Same as EPE 558.)

EDP 570 INTRODUCTION TO PSYCHOLOGICAL SERVICES IN SCHOOLS. (3)
A review of the historical development and models of organization and administration in the field of school psychology and the relationship between school psychology and other educational and psychological specialties. Prereq: Admission to School Psychology Program or consent of instructor.

EDP 580 INTRODUCTION TO GIFTED EDUCATION. (3)
This course reviews the historical development of and the theoretical and empirical support for differentiated educational programs for gifted and talented children. Specific issues addressed include: the definition and identification of giftedness, teacher competencies and training, and differentiation across the curriculum and program level. (Same as EDC 580.)

EDP 600 LIFE SPAN HUMAN DEVELOPMENT AND BEHAVIOR. (3)
A survey of human development across the life span of the individual from conception to death. Content includes changes in motor skills, biological growth and decline, learning behavior, language, social, emotional, moral, and intellectual development as well as the roles of the family, the school, peers, and work in relation to individual development. Critical evaluation of current theories which describe human development.

EDP 603 HUMAN COGNITIVE DEVELOPMENT. (3)
Theory and research concerning the development of attitudes, motives, self-concept and other cognitive processes are presented and the educational implications explored. Prereq: EDP 548 or EDP 610 or EDP 600.

EDP 604 LIFE SPAN GENDER DEVELOPMENT. (3)
An in-depth examination of theory, research, and personal attitudes concerning gender development over the lifespan. Interaction of gender with effective personal functioning in family, educational, and work-related settings. Prereq: EDP 600 and 601 or equivalent.

EDP 605 INTRODUCTION TO COUNSELING: TECHNIQUES. (3)
A survey of counseling psychology, philosophy, procedures and practices. Consideration of the roles of the counselor in relation to counseling services in the community and educational settings. In-depth training in initial counseling skills, interviewing (listening) and relationship building skills. Prereq: Consent to the graduate program in counseling psychology with the following major codes: RECO, ECGO, CPEC, ECPS, ECPY, ECPY, CNPS, ESSP, ESPY, ECPP, or consent of instructor via permit.

EDP 606 PROFESSIONAL ISSUES IN COUNSELING PSYCHOLOGY. (3)
A first course in the graduate curriculum in counseling psychology. Addresses professional identity, A.P.A. ethical guidelines, legal aspects of psychological practice including licensing and confidentiality, historical perspectives, training issues, and current topics of professional concern in counseling psychology. Prereq: Enrollment in a post-master’s program in counseling psychology.

EDP 610 THEORIES OF LEARNING IN EDUCATION. (3)
Consideration of the theoretical origins of learning within the context of education. Topics include major theories of learning, physiological bases for learning, relationships between learning theory and instruction, and major applications of learning theories in educational settings.
Course Descriptions

EDP611HUMAN COGNITIVE LEARNING. (3)
Major cognitive learning theories which explain thinking and problem-solving behavior are compared and contrasted, especially as they are applied to arrange for effective instruction. Prereq: EDP 610 or EDP 548 or PSY 507 or equivalent.

EDP612DEVELOPMENT OF CREATIVITY AND CRITICAL THINKING. (3)
Reviews the theoretical and empirical literature related to developing creativity and critical thinking and describes practical and effective methods of measuring and developing these cognitive abilities in gifted and nongifted students. Prereq: EDP 580 or consent of instructor.

*EDP613SOCIAL ASPECTS OF BEHAVIOR. (3)
This course is designed to meet the needs of graduate students in the College of Education, particularly those in educational, school, and counseling psychology, for a course in theory and principles of social psychology. The course will cover the basic concepts and theories in social psychology. The theories of attitude formation, group dynamics, and biases will be surveyed, with an application to the professional fields of psychology. In addition to the theories and principles of social psychology, research paradigms, social change, social influence, system consultation, and community issues as they relate to social psychological considerations will be addressed. Prereq: One course in psychology or consent of instructor.

EDP614MOTIVATION AND LEARNING. (3)
This course will provide a review of current educational and psychological theories of motivation. After examining various theories (e.g., attributions, goals, self efficacy, expectancy X value), the course will examine applications of these theories to contemporary issues such as violence, substance abuse, dropping out of school, health maintenance, etc.

EDP615PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)
A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in department of Psychology or department of Educational and Counseling Psychology. (Same as PSY 620.)

EDP616MULTICULTURAL PSYCHOLOGY. (3)
This course is designed to increase one’s sensitivity to and respect for individual differences. Models, frameworks, techniques and experiential exercises are presented to increase one’s skill level in working with persons from racially and ethnically diverse backgrounds. Prereq: EDP 600 or equivalent or consent of instructor. (Same as AAS 616.)

EDP620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EPE 620/SOC 622.)

EDP621ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative methodology. State of the art ideas and methods of conducting evaluation studies and analyzing data from those studies are presented. The course is designed primarily for those who are conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its equivalent; EDP/EPE/ANT 620; and consent of instructor. (Same as ANT/EPE 621.)

EDP630PRINCIPLES OF PSYCHOLOGICAL ASSESSMENT. (3)
An overview of the principles and methods of psychological assessment including observing, a critical analysis of standardized psychological tests and standardized psychological testing as a means of arriving at a comprehensive individual analysis and of creating a treatment plan for both children and adults. Students develop skills in selection and evaluation of psychological tests (personality, interests, and aptitudes), integration of multi-modal assessment methods, and report writing. Prereq: Acceptance to the graduate programs in Educational and Counseling Psychology with the following major codes: CPEC, ECPY, ECP, CNPS, ECPP, ECP, EEPS, ESF, ECF, ESP, or consent of the instructor or via permit.

*EDP640 INDIVIDUAL ASSESSMENT OF COGNITIVE FUNCTIONING. (3)
This course provides theoretical material and advanced laboratory practice in the measurement of intelligence by individual techniques. Lecture, two hours; laboratory, two hours. May be repeated to a maximum of six credits. Prereq: PSY 535 (with a grade of “B” or better) or equivalent, enrollment in a professional program in Educational, School, and Counseling Psychology or consent of instructor.

*EDP642 INDIVIDUAL ASSESSMENT OF PERSONALITY FUNCTIONING. (3)
An in-depth study of the nature and measurement of human emotion, temperament and personality. Laboratory and field experience in the administration, scoring, and interpretation of tests related to personality functioning and underlying dynamics of personality. May be repeated to a maximum of six credits. Prereq: Successful completion of PSY 535 (or equivalent) with a grade of “B” or better and enrollment in a professional program in Educational, School, and Counseling Psychology.

EDP649GROUP COUNSELING. (3)
An overview of the theoretical bases and practical procedures used in the organization, and effective use of group in the facilitation of psychological and educational goals. Prereq: EDP 605, EDP 652 and EDP 661 (all with grades of “B” or better), or consent of instructor.

*EDP650DIAGNOSIS AND PSYCHOPATHOLOGY IN COUNSELING PSYCHOLOGY. (3)
An integrative seminar in application of theories, techniques and assessment in Counseling Psychology. Special consideration of classification of psychological states and characteristics including DSM-IV temperament, analysis, and other research methods of integrating assessment and treatment alternatives. Prereq: PSY 535 or equivalent, EDP 652, and EDP 661 (all with a “B” or better) and admission to a program in Educational, School, and Counseling Psychology or consent of the instructor.

EDP652 THEORIES OF COUNSELING. (3)
A survey of theories and methods in facilitating personality growth, character maturation, problem solving, decision making, crisis resolutions, and behavior change through individual and group counseling. Prereq: Acceptance to a graduate program in EDP with the following major codes: EGCO, CPEC, ECPY, ECP, ESPP, ECPS, ECP, EEPS, CNPS, EDPS, or consent of instructor via permit.

EDP656 METHODOLOGY OF EDUCATIONAL RESEARCH. (3)
An introduction to research methods applicable to education; the scientific method, research designs, measurement techniques, statistical analysis, and writing the research report. Prereq: EDP 655 or equivalent.

EDP657 MAJOR THEORIES IN LEARNING IN SECONDARY EDUCATION. (1-3)
Selection of major psychological theories of learning applicable to educational practices. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)
This is a statistics-oriented course that focuses on various aspects of regression analysis. Topics to be covered include, but are not limited to, simple correlation and regression, multiple regression (with or without interaction terms), regression diagnostics, logistic regression, etc. The course aims to familiarize students with cleaning data for regression analysis, building regression models, selecting the optimal regression model for the data in hand, gain requisite understanding of knowledge necessary to learn more complex statistical tests and procedures, and become more critical of statistical presentations in academic journals and the mass media. Prereq: EPE/EPE/EDP 558 or consent of instructor. (Same as EPE 660.)

*EDP661 TECHNIQUES OF COUNSELING II. (3)
Practice in interviewing, simulated problems, observational techniques, role of the counselor. Study of films, tapes and transcripts of leading practitioners of several schools of counseling. Supervised practice with selected clients. Lecture, two hours; laboratory, two hours. Prereq: EDP 652, PSY 535 (both with a grade of “B” or better), and consent of instructor.

EDP662 DOCTORAL PRACTICUM SEMINAR. (1)
Preparation for UK Counseling Center Doctoral Level practicum will include starting to develop an integrative understanding of theory, assessment, ethics, and practice as it relates to effective work with university students. The course introduces the application of traditional and group psychotherapy and the provision of effective outreach and consultation on a university campus. Lecture, one hour, fifteen minutes. Prereq: Approval for doctoral-level practicum at UK Counseling & Testing Center.

*EDP664 PRE-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (3-6)
Supervised experience in application of diagnostic and interview techniques in a counseling service. May be repeated to a maximum of 12 credits. Lecture, three hours; laboratory, eight hours per three credit hours. Prereq: All required counseling coursework. EDP 605, PSY 535 or equivalent, EDP 652, EDP 688, and EDP 661 (minimum competency courses with grades of “B” or better), application for practicum the semester prior to practicum placement and permission of CPAC.

*EDP665 POST-MASTERS PRACTICUM IN COUNSELING PSYCHOLOGY. (3-6)
Supervised experience in application of diagnostic and interview techniques in a counseling service. Prereq: PSY 535 or equivalent, EDP 605, EDP 652, EDP 661, EDP 649, and EDP 688 or equivalent (all with grades of “B” or better). Application for practicum the semester prior to practicum placement and permission of CPAC.

*EDP666 PSYCHOLOGY OF CAREER COUNSELING. (3)
A survey of theories and methods used in Career Counseling. Contemporary approaches to career counseling are studied within developmental and decision-making frameworks. Prereq: EDP 652 and PSY 535 or equivalent (both with a grade of “B” or better).
EDP 669 DIAGNOSTIC CLASSIFICATION IN SCHOOL PSYCHOLOGY. (3)
Review of theory and research related to individual differences in physical, intellectual, social, and emotional development of preschool and school-aged children and adolescents. Compares psychological and educational approaches to diagnostic classification of such differences. Prereq: PSY 533 or consent of instructor.

EDP 701 COGNITIVE-BEHAVIORAL COUNSELING. (3)
Theory and applications of cognitive-behavioral techniques. Assessment, intervention, and evaluation procedures are applied to problems treated by cognitive-behavioral counseling. Prereq: EDP 652 and EDP 661 (both with a grade of “B” or better) or consent of instructor.

EDP 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3)
Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multilevel regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EDC 767.)

EDP 748MASTERS THESIS RESEARCH. (0-3)
Full-time work in a dissertation research project. May be repeated to a maximum of 12 credits. Prereq: Completion of a minimum of one year of graduate study in the department and consent of instructor.

EDP 749 DISSERTATION RESEARCH. (0)
Full-time to part-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDP 777 SEMINAR IN SCHOOL PSYCHOLOGY (Subtitle required). (3)
Independent study course for advanced graduate students who desire to investigate special problems in counseling psychology. May be repeated to a maximum of six credits. Prereq: One year of graduate work in counseling psychology and consent of instructor.

EDP 778 SEMINAR IN EDUCATIONAL PSYCHOLOGY. (1-3)
Topics related to the theory, research, and practice of school psychology. This course will provide experiential and problem-based learning in the area of professional standards and ethics for the field of school psychology. Professional standards and ethics will be drawn from the codes of the American Psychological Association, the National Association of School Psychologists, and the Association of State and Provincial Psychology Boards. Students will translate ethical principles and standards into guidelines for decision making and practice. Prereq: Admission to School Psychology graduate program or permission of instructor.

EPE 621, or equivalent. (Same as EDC 676.)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDP 768 RESIDENCE CREDIT FOR THE MASTERS DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EDP 769 RESIDENCE CREDIT FOR THE DOCTOR DEGREE. (0-12)
May be repeated indefinitely.

EDP 770 LEGAL ETHICAL PSYCHOLOGY. (3)
The goal of this course is to provide students with knowledge of ethics and law that pertain to the field of education and practice of school psychology. This course will develop an understanding of the ethical and legal issues related to the practice of psychology. An emphasis is placed on learning the current APA ethical code of conduct for psychologists, mental health laws, and ethical decision-making models. Prereq: EDP 603 and 605, or consent of instructor.

EDP 777 SEMINAR IN ACKNOWLEDGMENT PSYCHOLOGY. (1-3)
Topical consideration of philosophical, technical, professional and theoretical positions in psychology. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EDP 778 SEMINAR IN EDUCATIONAL PSYCHOLOGY (Subtitle required). (3)
Intensive study of selected topics in human learning and development. Particular emphasis on research topics. Students will design sample studies in their areas of interest. May be repeated to a maximum of nine credits under different subtitles. Prereq: Doctoral standing in the College of Education or consent of instructor.
Course Descriptions

EDPS 516 INDEPENDENT STUDY IN EDUCATIONAL PSYCHOLOGY. (1-3)
An independent study course for advanced graduate students who desire to investigate special problems and conduct research in educational psychology. May be repeated to a maximum of 12 credits. Prereq: One year of graduate work in educational psychology and consent of instructor.

EDS 375 INITIAL PRACTICUM IN SPECIAL EDUCATION. (1)
An introductory supervised field experience for special education majors. Students will participate in two special education programs as teacher aides. Placements will include public schools and other agencies serving children with disabilities. May be repeated to a maximum of three credits. Lecture, one hour; field experience, three hours per week. Prereq or concurrent: EDS 375 (may be a co-requisite); restricted to declared majors in Learning and Behavior Disorders (SELB) and Moderate and Severe Disabilities (SEMS).

EDS 375 INTRODUCTION TO EDUCATION OF EXCEPTIONAL CHILDREN. (3)
An introduction to the various contemporary areas of special education. Topics include special education diagnostic categories, programming, service delivery models, career education, child advocacy and litigation affecting public education for students with disabilities.

EDS 395 INDEPENDENT STUDY IN SPECIAL EDUCATION. (1-6)
An independent study course for undergraduate students with an interest in a specific problem in special education. Offered by appointment.

EDS 447 STRATEGIES FOR INCLUDING STUDENTS WITH DISABILITIES IN THE ELEMENTARY CLASSROOM. (2)
This course will focus on inclusion of students with disabilities in all aspects of the elementary classroom. The course will prepare general education elementary teachers to collaborate with special education teachers and other professionals in planning and implementing instruction, behavioral supports, and assessments. Prereq: Elementary Education major, admission to Teacher Education Program, successful completion of EDP 303 and EDC 322, and concurrent enrollment in EDC 433.

EDS 459 STUDENT TEACHING IN SPECIAL EDUCATION. (3-12)
Supervised student teaching experience utilizing the special techniques used in working with individuals with exceptional educational problems such as speech handicaps, physical handicaps, visual impairments, hearing disabilities, neurological impairments (learning disabilities), mental retardation, and the gifted. To be offered only on a pass/fail basis. Prereq: Must complete the published College requirements for admission to student teaching; admission to the Teacher Education Program or permission of instructor.

EDS 513 LEGAL ISSUES IN SPECIAL EDUCATION. (3)
A review of pertinent legislation concerning human and constitutional rights related to persons with disabilities. Teachers’ specific responsibilities and liabilities are described and related to current requirements for development of appropriate educational programs. Emphasis is given to how, through active parent participation, teachers can facilitate each student’s developmental progress. Prereq: EDS 375 or consent of instructor.

EDS 514 INSTRUCTIONAL TECHNOLOGY IN SPECIAL EDUCATION. (3)
An overview of ways technology can be used to facilitate the education of students with disabilities. Topics include personal computer operation, personal productivity tools, instructional software evaluation and integration into the curriculum, multimedia applications, telecommunications, and assistive technologies. Lecture, three hours; laboratory, two hours per week. Prereq: EDS 375 or EDP 203.

EDS 516 PRINCIPLES OF BEHAVIOR MANAGEMENT AND INSTRUCTION. (3)
Basic principles of applied behavior analysis and modification which employ social learning theory and operant conditioning models are taught. Emphasis is placed on designing individualized learning environments, selecting and implementing behavior management strategies, writing behavior objectives, and performing task analyses. Prereq: EDS 375 or permission of the instructor.

EDS 517 ASSISTIVE TECHNOLOGY IN SPECIAL EDUCATION. (3)
A general introduction to the theory, need, and use of assistive devices in the classroom. Review of physical disabilities and basic operation, maintenance, and trouble shooting techniques will be presented. Service personnel typically associated with training in the use of assistive devices will be discussed. Students will be required to simulate a disability and use an assistive device. Prereq: EDS 375 or permission of instructor.

EDS 522 CHILDREN AND FAMILIES. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as IEC 522.)

EDS 528 EDUCATIONAL ASSESSMENT FOR STUDENTS WITH MILD DISABILITIES. (3)
Procedures for administering formal and informal tests to determine specific educationally relevant strengths and deficits of children with learning and behavior disorders. The characteristics of children with learning and behavior disorders are surveyed, as they relate to special education programming. Lecture, three hours; field experience, two hours. Prereq: EDS 375, EDS 516 and admission to the Teacher Education Program; or consent of instructor.

EDS 529 EDUCATIONAL PROGRAMMING FOR STUDENTS WITH MILD DISABILITIES. (3)
Design, implementation, and evaluation of individualized programs based on the educationally relevant characteristics of children with mild disabilities. Includes educational assessment and programming in reading, math, and language. Prereq: Admission to the Teacher Education Program, EDC 329, EDS 513, and 516, or consent of instructor; prerequisite or coreq: EDS 528.

EDS 530 MODERATE AND SEVERE DISABILITIES. (3)
Special education issues with individuals exhibiting moderate to severe intellectual and developmental disabilities. A critical examination of contemporary research with regard to the educational, behavioral, developmental issues of individuals exhibiting moderate to severe intellectual and developmental disabilities. Issues and research describing the full educational inclusion and community integration of persons with moderate to severe intellectual and developmental disabilities will be addressed. Lecture, three hours; field experience, three hours.

EDS 546 TRANSCLUSIVE SERVICES FOR STUDENTS WITH MILD DISABILITIES. (3)
This course will focus on the philosophical issues related to teaching students with deaf-blindness and other multiple disabilities. Professionals will discuss pertinent information related to planning for this population of students, particularly in the areas of communication, physical management, health, sensory input, and vitility. Students will utilize information obtained to plan for a student with deaf-blindness or other multiple disabilities. Strategies presented for planning will include transdisciplinary assessment, person-centered planning, and activity-based instruction. Prereq: EDS 375 or EDS 600.

EDS 547 COLLABORATION AND INCLUSION IN SCHOOL AND COMMUNITY SETTINGS. (3)
This course will focus on inclusion of students with moderate to severe disabilities in all aspects of school and community life, with special consideration given to the individual student planning variables that must be addressed in meeting the needs of each school-age student and for preparing students to function as fully and independently in their communities as possible. The course is designed to meet the needs of those pursuing certification in Moderate and Severe Disabilities and pursuing degrees in Elementary and Secondary Education, Vocational Rehabilitation, School Psychology, Social Work, Physical Therapy, Communication Disorders, and related disciplines. Prereq: Consent of instructor. (Same as RC 547.)

EDS 548 CURRICULUM DESIGN FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)
Educational and adaptive behavior assessment and curriculum prescription for individuals exhibiting moderate intellectual and developmental disabilities. The course participant will acquire skills in the use of current formal and informal educational and adaptive behavior assessment procedures for use in prescribing curriculum, instructional, behavioral intervention with individuals exhibiting moderate intellectual and developmental disabilities. Specific attention will be focused on procedures for using assessment data and curriculum prescription that enhances the full inclusion of school-age individuals with disabilities who are non-disabled peers. Lecture, two hours; field experience, six to eight hours per week. Prereq: EDS 516, 530; or consent of instructor.

EDS 549 METHODS FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (4)
The course participant will serve as a teacher aide in a classroom or other service delivery setting under the supervision of a person certified to teach students with moderate to severe disabilities. Course requirements include application of direct observation, formal and informal assessment of pupil performance, clinical writing and instructional and behavioral intervention in both individualized and small group settings. Practicum settings used by course participants will model best practices with regard to instruction, behavior management, and the full inclusion of persons with moderate to severe disabilities with their non-disabled peers. Lecture, two hours; field experience, six to eight hours per week. Prereq: Admission to the Teacher Education Program, EDS 516, 548, or consent of instructor.

EDS 550 STUDENT TEACHING: MODERATE/SEVERE DISABILITIES. (6-12)
Student teaching in the low-incidence disabilities classroom. Supervised student teaching in a classroom for students identified as having moderate to severe disabilities. To be offered on a letter grade basis only. Prereq: Must complete the published College requirements for admission to student teaching, including admission to the Teacher Education program; or consent of instructor.

EDS 555 ISSUES IN SPECIAL EDUCATION. (1-9)
In-depth study of a current and topical problem or issue in the education of exceptional children and youth. May be repeated to a maximum of nine credits. A title is assigned each time the course is offered.

EDS 570 EMOTIONAL AND BEHAVIORAL DISABILITIES. (3)
The emotional and behavioral problems of exceptional children and youth are considered in the context of normal child development. A survey of the major categories of emotional and behavioral disabilities includes identification, description, and etiology, with material drawn from clinical, theoretical, and research sources. Approaches to remediation cover both community resources and the roles of various professional personnel. Prereq: EDS 375 or equivalent.
EDS 589 FIELD EXPERIENCES: MILD DISABILITIES. (3)
Supervised pre-student teaching experiences with children having learning and behavioral disabilities, including practica experience with public school students in at least two different special education sites. Approximately two hours lecture-discussion and two three-hour observations and/or practica per week. Prereq: EDS 513, 516, admission to the Teacher Education Program; or consent of instructor. Prereq or concur: EDS 528. Must takes EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).

EDS 600 SURVEY OF SPECIAL EDUCATION. (3)
A survey of current status of the field of special education. Emphasis on analysis of the major research literature pertaining to exceptional children and their education. Prereq: Graduate standing.

EDS 601 APPLIED BEHAVIORAL ANALYSIS. (3)
The focus of this course is on the technology of applied behavior analysis, including the functional analysis of children’s behavior and the development, implementation, evaluation of behavior management programs with children and youth. Prereq: Completion of EDS 516 or equivalent, with a grade of “B” or better.

EDS 602 ADMINISTRATION AND PROGRAMS IN SPECIAL EDUCATION. (3)
The organization, management and supervision of programs for exceptional children at the local, state and national levels. Roles and functions of the special education administrator are considered. Experiences drawn from special residential, private and public day schools are studied. Prereq: Certification in special education; six hours of course work in educational administration and supervision.

EDS 603 BEHAVIORAL CONSULTATION IN THE SCHOOLS. (3)
Principles and techniques of behavioral consulting with classroom teachers and other school personnel, with particular focus on supporting handicapped children in mainstream education programs. The consultant’s role in providing indirect service to children, through in-service teacher training and consultation, is emphasized. Lecture, two hours; laboratory, two hours. Prereq: EDS 601, or equivalent; EDP 671 (may be taken concurrently); or permission of instructor.

EDS 604 SPECIAL EDUCATION FOR SECONDARY EDUCATION. (1)
This course is designed for secondary teachers who encounter students who require special education services. As such, it is intended to provide an in-depth examination of issues in the education of individuals with disabilities. The course is organized in a seminar format with the intent of creating a dialogue among the participants and the instructors. Emphasis will be placed on the development of conceptual and the acquisition of a body of knowledge, which relate to issues, processes and procedures to facilitate the inclusion of all student and collaboration across disciplines. The course takes a broad view of inclusion in all aspects of school and community life. Special consideration is given to the individual student planning variables that must be addressed in meeting the needs of each school-age student with a disability in a variety of integrated school and community settings. Prereq: Admission to the M.A. in Education - Secondary with Initial Certification.

EDS 610 ADVANCED EDUCATIONAL ASSESSMENT FOR STUDENTS WITH MILD DISABILITIES. (3)
This course examines factors that contribute to the reliable and valid measurement and diagnosis of students with mild disabilities. Emphasis is placed on evaluating standardized, norm-referenced assessment instruments and interpretive techniques related to their technical characteristics and merits, developing curriculum-based measures for classroom use, and critiquing emerging systems of determining eligibility for special education. Prereq: EDS 528 or consent of instructor.

EDS 611 CONTEMPORARY TRENDS AND ISSUES IN THE EDUCATION OF STUDENTS WITH MILD DISABILITIES. (3)
This course examines trends and issues in the education of students with mild disabilities (e.g., learning disabilities, mild cognitive disability, ADHD, and emotional/behavioral disabilities). The professional literature is examined to identify emerging methods of effective instruction as well as points of controversy in identification, placement, and service. Prereq: EDS 529 and EDS 610 or consent of instructor.

EDS 612 ADVANCED PRACTICUM: SPECIAL EDUCATION. (1-6)
Intensive clinical experience with exceptional children in day and residential schools, hospitals and private agencies. Students engage in prescriptive teaching with persons with disabilities in individualized, small group and special class settings. Laboratory, 6-12 hours per week. Prereq: Graduate standing; major in special education.

EDS 613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION. (3)
This course is designed as a required course for certification in the school administration program or a graduate in graduate or post baccalaureate degree program. Essential course questions will emphasize the delivery of a free and appropriate public education for children with disabilities within a practical application format that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as well as the legal and programmatic implications for children with disabilities and their families. Finally, the course will model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administration preparation program, or received permission of instructor. (Same as RC 613.)

EDS 630 ADVANCED METHODS FOR TEACHING STUDENTS WITH DISABILITIES. (3)
An advanced study of the theories and principles and procedures used in programming learning activities for students with disabilities, including those with autism spectrum disorders. Topics include the acquisition of stimulus control and programming for the generalization and maintenance skills. Lecture, three hours. Prereq: EDS 601 and consent of instructor.

EDS 631 ADVANCED PROGRAMMING FOR STUDENTS WITH MODERATE AND SEVERE DISABILITIES. (3)
Intensive review of instructional programs designed for use with students with moderate and severe disabilities, including autism spectrum disorders. Emphasis is on leadership in assessment and developing individual education programs for students. Lecture, three hours. Prereq: Consent of instructor.

EDS 632 ADVANCED PRACTICUM: MODERATE AND SEVERE DISABILITIES. (1-12)
Intensive educational experience with students with moderate and severe disabilities in educational, residential and hospital settings. Site and practicum responsibilities will be based on students’ competencies and area of interest. May be repeated to a maximum of 21 credits. While enrolled in this course, students will be required to apply for the Teacher Education Program. Prereq: Admission to the Master’s program in Special Education or permission of the instructor.

EDS 633 SINGLE SUBJECT RESEARCH DESIGN. (3)
Principles and methods in designing single subject research, including those involving students with disabilities. Students will be required to design a research proposal. Prereq: EDS 601 or EDS 630 or consent of instructor.

EDS 634 LEADERSHIP IN SPECIAL EDUCATION. (3)
Students will select from a variety of options that demonstrate leadership in the field of education. Between the course instructor and each student’s ‘master’s committee, students will complete a variety of experiences that will assist them in completing the capstone requirement. Prereq: EDS 601, EDS 630, EDS 633.

EDS 640 ADVANCED ASSISTIVE TECHNOLOGY. (3)
This course is designed for secondary teachers who encounter students who require special education services for individuals with learning, cognitive, physical, and sensory disabilities. The course includes lecture, hands-on experiences, and discussions of current trends and issues in assistive technology consideration and implementation for teachers, families, and administrators. Prereq: EDS 601 or equivalent or permission of instructor.

EDS 641 ASSISTIVE TECHNOLOGY ASSESSMENT. (3)
This course will prepare the student to be an expert in the evaluation of students with learning, cognitive, physical, and sensory disabilities for assistive technology devices and services. Students will use assistive technology devices and services as a model for developing an assistive technology plan for students with disabilities, locate assistive technologies through a variety of sources, and develop assistive technology implementation plans for individuals with disabilities. Prereq: EDS 640, or permission of instructor.

EDS 645 HYPERMEDIA DEVELOPMENT FOR SPECIAL EDUCATION. (3)
Students will study web page design and development for use in special education. Students will examine how theories of human learning and principles of universal design, hypermedia/multimedia concepts, interface design guidelines, computer graphics programs, digital scanning of images, accessible text, sound effects, use of digital movies, and multimedia authoring tools. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 647 SEMINAR IN SPECIAL EDUCATION TECHNOLOGY (Variable topic). (1-3)
A topical seminar on technology applications in special education. Seminars will address different topics of timely interest, current issues, and various approaches to providing assistive technology and instructional technology services for people with disabilities. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 648 COORDINATING ASSISTIVE TECHNOLOGY PROGRAMS. (3)
Students will study procedures for planning and implementing assistive technology programs in schools. Topics will include the use of planning models, philosophy and mission development, generating management goals and objectives, policies for preparing strategic plans, establishing policies and procedures, identifying resource requirements, managing program implementation, evaluation of program effectiveness, and development of proposals for funding. Prereq: EDS 640 and EDS 641 or permission of instructor.

EDS 649 ADVANCED PRACTICUM: SPECIAL EDUCATION TECHNOLOGY. (1-9)
Students will engage in supervised practicum activities associated with the delivery of technology services to individuals with disabilities. Practicum settings may include schools, rehabilitation agencies, clinics, hospitals, technology resource centers, administrative offices, and businesses involved in the development or delivery of technology services. May be repeated to a maximum of nine credits. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 651 DISTANCE EDUCATION: DELIVERY. (3)
Students will engage in supervised practicum activities associated with the delivery of technology services to individuals with disabilities. Practicum settings may include schools, rehabilitation agencies, clinics, hospitals, technology resource centers, administrative offices, and businesses involved in the development or delivery of technology services. May be repeated to a maximum of nine credits. Prereq: EDS 514 and EDS 600, or permission of instructor.

EDS 652 FIELD EXPERIENCES: MODERATE DISABILITIES. (3)
Supervised pre-student teaching experiences with children having learning and behavioral disabilities, including practica experience with public school students in at least two different special education sites. Approximately two hours lecture-discussion and two three-hour observations and/or practica per week. Prereq: EDS 513, 516, admission to the Teacher Education Program; or consent of instructor. Prereq. or concur: EDS 528. Must takes EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).

EDS 653 FIELD EXPERIENCES: SEVERE DISABILITIES. (3)
Supervised pre-student teaching experiences with children having learning and behavioral disabilities, including practica experience with public school students in at least two different special education sites. Approximately two hours lecture-discussion and two three-hour observations and/or practica per week. Prereq: EDS 513, 516, admission to the Teacher Education Program; or consent of instructor. Prereq. or concur: EDS 528. Must takes EDS 529 concurrently. Must not take concurrently with the Middle School methods block (EDS 330, EDS 343, and two methods classes).
Course Descriptions

EDS 652 DISTANCE EDUCATION: MANAGEMENT AND SUPPORT. (3)
This course has been designed for those faculty or future faculty who plan to manage or direct programs delivered through distance education technology. The course will focus on current issues and challenges in distance education administration, including such topics as provision of quality support services; policy issues at the local, state, national, and international level; model administrative structures; instruction and technology funding; and virtual institutions. Prereq: Master’s degree.

#EDS 660 OVERVIEW OF CHARACTERISTICS AND INSTRUCTIONAL STRATEGIES FOR INDIVIDUALS WITH ASD. (3)
This course introduces students to the characteristics, classification systems, etiology and research, screening and assessment strategies/issues, approaches, and research-based interventions related to individuals with autism spectrum disorders. Practical classroom strategies, such as visual strategies and environmental arrangements will also be reviewed. The primary goal of the course is to provide students with a foundational knowledge of the strengths and needs characteristic of individuals with ASD, as well as to provide students with a comprehensive array of research-based instructional approaches for individuals with ASD, and to provide the criteria for determining which approach to use. Prereq: EDS 601.

#EDS 661 ADVANCED INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH ASD. (3)
This course builds on topics previously learned in EDS 660. Teachers will learn to critically analyze current trends, issues, and therapies used with individuals with ASDs. Practical classroom strategies detailing what to teach based on assessment results, how to use data-based decisions to guide instruction, and an overview of alignment to state standards based on alternate assessments will also be reviewed. The primary goal of the course is to provide teachers with a comprehensive array of practical research-based instructional approaches for individuals with ASDs, criteria for determining which approaches to use, and planning for access to the general education curricular modifications for students across the spectrum. Completion of this course sequence (in combination with EDS 660, EDS 662, and EDP 671) will prepare teachers for applications in the ASD Institute (EDS 663). Prereq: EDS 601 and EDS 660.

#EDS 662 COMMUNICATION, AAC, AND TECHNOLOGY FOR INDIVIDUALS WITH AUTISM SPECTRUM DISORDERS. (3)
This course prepares persons who will be serving individuals with ASD. The focus of the course is on developing communication in this population, exploring augmentative and alternative communication devices, and using technology to teach individuals with ASD. The course will provide information on (a) typical language development, (b) characteristics of persons with autism and their unique communication needs, (c) assessment of communication needs, (d) development of communication goals, (e) development and delivery of effective strategies for teaching communication, and (f) use of technology to teach individuals with ASD. The objectives of this course are designed to provide students with a comprehensive knowledge of the communication characteristics of persons with autism, the state-of-the-art techniques in providing communication services for this population, and research-based strategies utilizing technology in teaching individuals with ASD. This course will be taught jointly by the Department of Special Education & Rehabilitation Counseling and the Department of Communication Sciences and Disorders. Prereq: EDS 601, EDS 661, EDS 662. (Same as CSD 649.)

#EDS 663 SERVING INDIVIDUALS WITH ASD INSTITUT E. (3)
Students will connect content knowledge with skills from courses taken in the Autism Certificate courses (EDS 660, EDS 661, EDS 662, and EDP 671). Students will demonstrate skills in areas such as implementing research-based strategies and/or behavior supports, collaborating for planning and delivery of instruction, working with diverse families and service providers, and evaluating appropriate technologies based on student needs. Students will demonstrate proficiency via role-play, case studies, video examples, and/or direct observation of individuals with ASD. Students will have an opportunity to learn from one another and experts in the field in a face-to-face format. Prereq: EDS 601 and EDS 660, EDS 661, EDS 662, EDP 671.

EDS 701 SEMINAR FOR SPECIAL EDUCATION LEADERSHIP PERSONNEL. (1)
Study of issues and topics affecting the preparation of special education personnel and of research issues involving persons with disabilities and educational programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 701.)

EDS 710 SEMINAR IN MILD DISABILITIES. (3)
This course will provide communication and intelligence testing for the purpose of diagnosis and intervention. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 711 SEMINAR IN MILD AND SEVERE DISABILITIES. (3)
Advanced study of issues related to mild disabilities in children, including etiology, assessment, intervention, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 712 SEMINAR IN SPECIAL EDUCATION PROFESSIONAL SERVICES. (3)
Study of procedures for identifying and serving individuals with disabilities in the least restrictive environment, understanding current models, and planning for services. May be repeated to a maximum of six credits. Prereq: Admission to Ed.S. or Ed.D. program in Special Education or consent of instructor.

EDS 713 DESIGNING CLASSROOM-BASED INTERVENTION RESEARCH IN SPECIAL EDUCATION. (3)
The purpose of this course is to acquaint students with methods for designing and conducting experimental and quasi-experimental intervention studies in school-based settings. Students will have the opportunity to conceptualize a study based on their interests and propose procedures for implementing it. Although knowledge of basic statistics would increase understanding, the substance of the course focuses primarily on designing studies that test for the presence of a distinct cause-and-effect relationship between variables.

EDS 720 SEMINAR IN SPECIAL EDUCATION TEACHER PREPARATION. (3)
Study of the design and implementation of special education teacher preparation programs, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 720.)

EDS 721 PRACTICUM IN SPECIAL EDUCATION PERSONNEL PREPARATION. (1-9)
Supervised practicum experiences related to the preparation of special education teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising special education student teachers and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 721.)

EDS 730 SEMINAR IN SPECIAL EDUCATION ADMINISTRATION. (3)
Administration of special education programs at the local and state levels. Emphasis is on program planning, staffing, fiscal management and program evaluation. Prereq: EDS 602 and admission to the Ed.S. or Ed.D. program in special education or consent of instructor.

EDS 731 ADVANCED PRACTICUM: SPECIAL EDUCATION ADMINISTRATION. (1-9)
Supervised practicum experiences related to the administration of special education programs at the local and state levels, and project management, including staff management and development, program planning, evaluation, fiscal management, organization, reporting, communications, and coordination. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to the Ed.S. or Ed.D. program in special education administration or in certification program for special education administrators.

EDS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EDS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 research credit following the successful completion of the qualifying exams.

EDS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 767.)

EDS 768 RESIDENCY CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as IEC/RC 767.)

EDS 769 RESIDENCY FOR THE DOCTORAL DEGREE. (0-12)
May be repeated indefinitely.

EDS 779 SEMINAR IN SPECIAL EDUCATION (Variable topic). (1-3)
Study of philosophy, principles, trends and research in education of exceptional children. Study will carry an extensive study of a problem dealing with education of the exceptional child. May be repeated to a maximum of nine credits.

EDS 789 INDEPENDENT STUDY IN SPECIAL EDUCATION. (1-6)
An independent study course for advanced graduate students in an important topic in special education. Class hours by appointment. Prereq: Minimum of 12 semester hours in graduate work and consent of instructor.

EDU

EDU 300 SPECIAL COURSE. (1-3)
This course is being proposed to provide an opportunity for offering experimental, topical or interdisciplinary courses on a one-time or two-time basis without creating a permanent course. The description will be submitted each time the course is offered. Prereq: Permission of instructor.
Course Descriptions

EDV 505 CONTEMPORARY ISSUES FACING THE AT-RISK SCHOOL-AGE/ADOLESCENT CHILD. (3)
To provide background information, experience, and skills for undergraduate students to interact with elementary and middle school children in a consulting role. Special emphasis will address the needs of the “at-risk” student population. The “at-risk” student is associated with families with incomes below the poverty level, as well as other significant problems which plague contemporary society—e.g., homelessness, child abuse/neglect, single parent homes, non-English speaking parents, fetal alcohol or substance abuse syndrome, mentally and/or physically handicapped parents or siblings, and high incidence of academic achievement declines and dropout rates. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

EDU 445 FOUNDATIONS OF PEDAGOGICAL THEORY AND PRACTICE IN THE SECONDARY SCHOOL. (0-9)
Students will participate with other secondary education majors in a variety of disciplines in the reflective study of the context of schooling, classroom management, individual student differences, and professional development. Students will be in the schools applying concepts on a full-time basis. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDU 454 FOUNDATIONS OF PEDAGOGICAL THEORY AND PRACTICE IN THE SECONDARY SCHOOL. (0-9)
Students will participate with other secondary education majors in a variety of disciplines in the reflective study of the context of schooling, classroom management, individual student differences, and professional development. Students will be in the schools applying concepts on a full-time basis. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

EDV Vocational Education

AGRICULTURAL EDUCATION
EDV 580 MATERIALS AND METHODS FOR TEACHING VOCATIONAL AGRICULTURE. (3)
Designed to develop teacher competency in methods of teaching with emphasis on the problem-solving procedure and use of demonstrations, field trips, and audiovisual materials. Evaluation of teaching-learning is emphasized. A study of facilities and instructional materials needed by a department of vocational agriculture is made. Prereq: Admission to the Teacher Education Program or permission of instructor.

BUSINESS EDUCATION
EDV 626 CLASSIFICATION AND POSSIBLE USE OF COMMUNITY RESOURCES IN BUSINESS EDUCATION. (3)
Course provides for community analysis and the development of possible ways and means to supplement the business education course in the secondary school with a study of vital community resources.

DISTRIBUTIVE EDUCATION
EDV 517 DETERMINING TEACHING CONTENT IN MARKETING AND DISTRIBUTIVE EDUCATION. (2-3)
Course construction in the field of marketing education. This course is planned to meet the needs of persons engaged as instructors in the field of marketing education. May be repeated to a maximum of six credits.

EDV 528 TECHNIQUES OF TEACHING MARKETING AND DISTRIBUTIVE EDUCATION. (2-3)
A study of the methods of teaching as applied to marketing education. The purpose of the course is to train prospective teachers to teach in the field of marketing education. May be repeated to a maximum of six credits.

VOCATIONAL EDUCATION
EDV 501 PRACTICUM IN VOCATIONAL EDUCATION. (1-12)
Planned and supervised practicum in teaching agriculture, business, home economics and vocational industrial education at middle and high school levels. Requires the integration of observation skills, application of instructional objectives, teaching strategies, selection of instructional materials, assessment of student progress, and use of student organizations. Regularly scheduled seminars included as an integral part of course. Open only to students in the master’s degree combined with initial teacher certification program. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

EDV 516 PROBLEMS OF THE COORDINATOR IN VOCATIONAL EDUCATION. (2-3)
A course to prepare coordinators of vocational education programs, including planning of local or area programs, use of advisory committees, selection of instructional materials and equipment, organizing instructional programs, and overall planning and operating of the program. May be repeated to a maximum of six credits.

EDV 520 THE ADULT LEARNER IN VOCATIONAL SETTINGS. (3)
An overview of adult education practices and their relevance to adult learning in the work setting. Prereq: EDV 21 or consent of instructor.

EDV 535 PRINCIPLES AND PHILOSOPHY OF VOCATIONAL EDUCATION. (2-3)
Study is made of philosophy, accepted principles, and legislation affecting programs in vocational education. May be repeated to a maximum of six credits.

EDV 749 DISSERTATION RESEARCH. (0-9)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EDV 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EDV 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EE Electrical Engineering

EE 101 CREATIVITY AND DESIGN IN ELECTRICAL AND COMPUTER ENGINEERING. (3)
This course provides an introduction to the process and application of creative design and problem solving within science and engineering. Emphasis is placed on applications and case studies in the areas of electrical and computer engineering. Several laboratory-based engineering problems are used to provide practical settings in which to apply and evaluate constraint- and product-focused strategies for creative design and problem solving. In addition to technical and analytical considerations, ethical and cultural influences on the creative process will also be discussed.

EE 211 CIRCUITS I. (4)
Fundamental laws, principles and analysis techniques for DC and AC linear circuits whose elements consist of passive and active components used in modern engineering practice including the determination of steady state and transient responses. Prereq: MA 114; prereq or concur: PHY 232, 242.

EE 221 CIRCUITS II. (3)
Analysis and design methods for analog linear circuits whose elements consist of passive and active components used in modern engineering practice, including transfer functions, network parameters, and a design project involving modern design practices. Prereq: EE 211. Concur: MA 214.

EE 222 ELECTRICAL ENGINEERING LABORATORY. (2)
Laboratory exercises in the use of measuring instruments. Experiments in R-L-C circuit analysis. Lecture, one hour; laboratory, three hours. Prereq or concur: EE 221.

EE 280 DESIGN OF LOGIC CIRCUITS. (3)
Boolean algebra; combinational logic circuits; synchronous sequential circuits; asynchronous sequential circuits; design problems using standard integrated circuits. Prereq: CS 115.

EE 281 LOGICAL DESIGN LABORATORY. (2)
A laboratory involving the design and implementation of logic circuits. Combinational and sequential (both synchronous) design examples using small and medium scale integrated circuits. Lecture, one hour; laboratory, one three-hour session. Prereq: EE 280.

EE 305 ELECTRICAL CIRCUITS AND ELECTRONICS. (3)
A service course covering electrical engineering principles for engineering or science students with majors outside of electrical engineering. Topics include: circuits analysis, power, electronics, digital logic and instrumentation. Prereq: PHY 232, MA 114.

EE 360 INTRODUCTION TO SEMICONDUCTOR DEVICES. (3)
Electronic properties of solid-state materials and calculation of charge carriers in semiconductors; structure and physical model of p-n junctions and various diode devices, bipolar transistors, field effect transistors; semiconductor fabrication technologies and microelectronics manufacturing issues. Prereq: PHY 232 and CHE 105.

EE 380 MICROCOMPUTER ORGANIZATION. (3)
Hardware and software organization of a typical computer; machine language and assembler language programming, interfacing peripheral devices, and input-output programming; real-time computer applications, laboratory included. Prereq: EE 280 or CS 245. (Same as CS 380.)

EE 383 INTRODUCTION TO EMBEDDED SYSTEMS. (3)
A course in the hardware and software of microprocessors, Assembly language programming, address decoding, hardware interrupts, parallel and serial interfacing with various special purpose integrated circuits. Each student is expected to do homework assignments using microprocessor hardware. Prereq: EE 280 and EE/CS 380. (Same as CS 383.)

EE 395 INDEPENDENT WORK IN ELECTRICAL ENGINEERING. (1-6)
Special research and problems for individual students who are capable of pursuing independent investigations. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
Course Descriptions

**EE 402G ELECTRONIC INSTRUMENTATION AND MEASUREMENTS.** (3)
Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, theory and operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, three hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as PHY 402G.)

**EE 415G ELECTROMECHANICS.** Study of electric machines and electromechanical systems. Prereq: EE 221 with a C or better and PHY 232.

**EE 416G ENERGY CONVERSION LABORATORY.** (2)
Laboratory practice and experimental studies related to EE 415G. Lecture one hour; laboratory, three hours. Prereq or concur: EE 415G.

**EE 421G SIGNALS AND SYSTEMS.** (3)
Introduction to continuous and discrete signal and system models and analyses. Topics include discrete and continuous convolution, Fourier series, Fourier transforms, and Laplace transforms and Z-transforms with application examples including AM modulation and the sampling theorem. Prereq: MA 214 and a C or better in EE 221.

**EE 422G SIGNALS AND SYSTEMS LABORATORY.** (2)
Lectures and laboratory exercises on signal and systems modeling. Topics include noise models and analysis, filter design, modulation techniques, sampling, discrete Fourier Transforms, State Variable Models, and feedback design with an emphasis on using computer software for analysis and simulation. Prereq: EE 421G, MA 320.

**EE 461G INTRODUCTION TO ELECTRONICS.** (3)
Analysis and design of electronic circuits incorporating nonlinear electronic elements such as transistors, FET's, and vacuum tubes. Applications to amplifiers. Prereq: A grade of C or better in EE 221.

**EE 462G ELECTRONIC CIRCUITS LABORATORY.** (2)
Experimental exercises in the design and analysis of useful electronic circuits incorporating semiconductor devices: transistors, tunnel and Zener diodes; also, vacuum tubes, integrated circuits and operational amplifiers. Lecture, one hour; laboratory, three hours. Prereq: EE 222 and EE 461G.

**EE 468G INTRODUCTION TO ENGINEERING ELECTROMAGNETICS.** (4)
Applications of electromagnetic theory; electrostatic and magnetostatic fields; Maxwell's field equations; plane waves; transmission lines and waveguides; antennas and radiation. Prereq: MA 213; prerequisite or concurrence: EE 221.

**EE 490 ELECTRICAL ENGINEERING CAPSTONE DESIGN.** (3)
The first semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Topics important in product design and manufacturing are included, including considerations of economics, safety, and communication. Students are expected to formally propose a design project that includes a problem definition, teams, design, development, and completion. Prereq: MA 320, completed in the previous semester and Engineering standing.

**EE 491 ELECTRICAL ENGINEERING CAPSTONE DESIGN II.** (3)
The second semester of a two-semester design sequence for senior students in electrical engineering with an emphasis on the engineering process. Students work in teams to develop and complete the designs. Topics include electrical engineering design, project management, documentation, and communication. Prereq: EE 490 completed in the previous semester and Engineering standing.

**EE 511 INTRODUCTION TO COMMUNICATION SYSTEMS.** (3)
An introduction to the basic signal processing operations in communications systems. Topics include frequency and time domain signal and system representation, random signals, modulation, sampling, pulse modulation, information theory. Prereq: EE 421G, MA 320, and Engineering standing.

**EE 512 DIGITAL COMMUNICATION SYSTEMS.** (3)
A treatment of the basic signaling concepts involved in the communication of digital information. Topics include transmission requirements and distortion of digital signals, discrete amplitude, frequency, and phase modulation; error control coding. Prereq: EE 421G, EE 422G, and Engineering standing or consent of instructor.

**EE 513 AUDIO SIGNALS AND SYSTEMS.** (3)
An introduction to digital signal processing and classification methods for audio signals. Topics include signal analysis and system design using correlation functions, power spectra, difference equations, and transfer functions; implementations of filters, classifiers, and audio effects; characteristics and modeling of common audio signals such as speech, music, and noise. Prereq: EE 422G, engineering standing.

**EE 517 ADVANCED ELECTROMECHANICS.** (3)

**EE 518 ELECTRIC DRIVES.** (3)
Introduction to common power electronic converters used in electric motor drives. Steady-state analysis methods for electric machines fed by power conditioning converters. Performance prediction of electric machines by electromagnetic field theory and by coupled oil models. Prereq: EE 415G, EE 421G, and Engineering standing.

**EE 521 INTRODUCTION TO WIRELESS COMMUNICATIONS.** (3)
Study of analog RF electronics for wireless communications through a combination of course and laboratory work. Topics covered in the course include: modulation/demodulation, filters, RF transformers, mixers, transistor switches and amplifiers, class A, B, AB, C, D, E, F and amplifiers, quartz crystals, transmission lines, impedance inverters, acousticst, oscillators, audio circuitry, noise and inter-modulation, and antennas. Prereq: Engineering standing.

**EE 522 ANTENNA DESIGN.** (3)
Principles of radiation, potential solution to Maxwell's equations for current in empty space, electrically small antennas, antenna arrays, wire antenna principles, introduction to numerical methods, aperture antennas, frequency scaling antennas, receiving properties of antennas, antenna measurement techniques. Prereq: EE 468G and Engineering standing.

**EE 523 MICROWAVE CIRCUIT DESIGN.** (3)
Physical and mathematical descriptions of wave propagation in guided structures; microstrip lines; microstrip integrated circuits; passive components; microwave devices; S-parameter concept; equivalent circuit concept; solid state microwave amplifiers and oscillators. Prereq: EE 468G and Engineering standing.

**EE 524 SOLID STATE PHYSICS.** (3)
Introductory solid state physics with emphasis on the properties of electrons in crystals; crystal structure, crystal diffraction, reciprocal lattice, lattice vibrations and phonons, free electron theory, energy bands in solids, semiconductors. Prereq: PHY 520, or consent of instructor. Engineering standing required for EE 524. (Same as PHY 524.)

**EE 525 NUMERICAL METHODS AND ELECTROMAGNETICS.** (3)
This course covers the basics of numerical methods and programming with applications in electromagnetics. Examples range from statics to radiation/scattering problems involving numerical solutions to integro-differential and finite difference equations. Prereq: EE 468G and Engineering standing, or consent of instructor.

**EE 527 ELECTROMAGNETIC COMPATIBILITY.** (3)
Design of electronic systems to minimize 1) emission of electromagnetic signals that cause interference in other electronic systems, 2) the susceptibility of that system to electromagnetic signals from other electronic systems, and 3) the susceptibility of that system to its own, internally generated signals. A set of brief laboratory experiments demonstrate the design principles and provide familiarity with modern test equipment. Prereq: EE 468G and Engineering standing.

**EE 531 ALTERNATIVE AND RENEWABLE ENERGY SYSTEMS.** (3)
Study of non-traditional, electric generating systems, and the use of renewable energy sources. Energy sources include solar, wind, hydro, and biomass/biogas. Generating technologies include both inverter based equipment and rotating machinery. Prereq: EE 415G, Engineering Standing or consent of instructor.

**EE 532 SMART GRID: AUTOMATION AND CONTROL OF POWER SYSTEMS.** (3)
This course covers introduction to smart grid, key technologies in transmission and distribution systems enabling smart grid, power market structure, and real time pricing. Prereq: Engineering Standing, or consent of instructor.

**EE 535 POWER SYSTEMS: GENERATION, OPERATION AND CONTROL.** (3)
This course covers essential aspects of the energy management system of power systems. Will cover topics: power system economics, state estimation, power system stability, power quality, and fault location. Prereq: EE 537 or concurrent, and Engineering Standing.

**EE 536 POWER SYSTEM FAULT ANALYSIS AND PROTECTION.** (3)
This course teaches computer based methods for performing fault analysis of power systems, and principles for protecting power systems. Prereq: EE 537, or concurrent, and Engineering Standing.

**EE 537 ELECTRIC POWER SYSTEMS I.** (3)
A study of power flow, elements of power factor correction, the one-line diagram, the per-unit system, transformer modeling, generator modeling, transmission line modeling, transmission line performance calculations from equivalent circuits, and general methods for network calculations. Prereq: EE 468G and Engineering standing.

**EE 538 ELECTRIC POWER SYSTEMS II.** (3)
Introduction to modern power system practices, basic transient and steady-state stability analysis with emphasis on digital techniques. Prereq: Engineering Standing and consent of instructor.
EE 539 POWER DISTRIBUTION SYSTEMS. (3)
Study of electric utility distribution power systems. Topics include configurations, equipment, control, customer class data, load flow, phase balancing, capacitor placement, system protection, power quality, and distributed generation. Prereq: EE 537, engineering standing or consent of instructor.

#EE 546 ELECTRIC POWER SYSTEM FUNDAMENTALS. (3)
Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent.

EE 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3)
This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as ME/MSE 555.)

EE 560 SEMICONDUCTOR DEVICE DESIGN. (3)
Theory, development and discussion of equivalent circuit models of transistor devices, negative resistance, semiconductor devices and p-n heterojunctions based on electronic processes in solid state elements. High and low frequency, as well as the Ebers-Moll and charge control switching models and their application in computerized electronic circuit analysis will be developed. Prereq: EE 461G or equivalent, and engineering standing.

EE 561 ELECTRIC AND MAGNETIC PROPERTIES OF MATERIALS. (3)
Study of dielectric and magnetic materials. Topics include dielectric relaxation, conduction and breakdown mechanisms, liquid crystals, ferroelectrics, magnetic resonance and relaxation measurement techniques. Prereq: MSE 212 and PHY 361 or EE 461G or consent of instructor. (Same as MSE 561.)

EE 562 ANALOG ELECTRONIC CIRCUITS. (3)

EE 564 DIGITAL ELECTRONIC CIRCUITS. (3)
Timing, scanning, trigger logic and pulse circuits; video and broad band R-F amplifiers. Prereq: EE 360, EE 461G and engineering standing.

EE 567 INTRODUCTION TO LASERS AND MASERS. (3)
Basic principles of laser action; atomic transitions; population inversion; two and three level systems; optical resonators; pumping methods; applications. Prereq: EE 360, EE 468G, or PHY 417G, or consent of instructor. (Same as PHY 567.)

EE 568 FIBER OPTICS. (3)
The course presents theory and practice related to (a) fiber optic cable and their fabrication, (b) fiber optic transmitters and detectors, (c) fiber optic communication systems and (d) fiber optic remote sensors. Prereq: EE 468G. (Same as MSE 568.)

EE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)
Study of packaging systems which interconnect, support, power, cool, protect, and maintain electronic components. The course will address systems at the chip, board, and product levels. Topics include design, properties, materials, manufacture, and performance of various packaging systems. Laboratory will provide familiarity with design software and production equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of instructor. (Same as MSE 569.)

EE 570 FUNDAMENTALS OF NANOELECTRONIC DEVICES AND MATERIALS. (3)
Energy bands in crystals; heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostructures; current topics in nanoscale devices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as MSE 570.)

EE 571 FEEDBACK CONTROL DESIGN. (3)
System representation via transfer function and state variables, root locus analysis; Bode plots; compensation by root-locus and frequency response methods; state variable feedback; sensitivity analysis; tracking via output feedback; digital control systems. Prereq: EE 421G, EE 422G, EE 423G, and consent of instructor.

EE 572 DIGITAL CONTROL OF DYNAMIC SYSTEMS. (3)
Zero and first order hold, theory of analog to digital and digital to analog conversion. Z-transform analysis, discrete state variable analysis, discrete estimation techniques, error analysis of discrete systems. Prereq: EE 422G, engineering standing.

EE 575 INDUSTRIAL CONTROL. (3)
Control technologies for industrial and process control systems, including sensors, actuators, PLCs, and hydraulic and pneumatic control elements. Prereq: Engineering standing or graduate standing.

EE 579 NEURAL ENGINEERING: MERGING ENGINEERING WITH NEUROSCIENCE. (3)
A multidisciplinary approach combining engineering principles for systems analysis and control, knowledge of biological control mechanisms, and computational properties of biological neural networks in the development of engineering neural networks for control applications. Topics include: equivalent circuit models for biological neurons and networks, non-linear differential equation representations, biological control strategies for rhythmic movements, design and development of controller for robot function, proposal development and presentation. Prereq: EE 422G and Engineering Standing or consent of instructor. (Same as BME 579.)

EE 581 ADVANCED LOGICAL DESIGN. (3)
Medium-scale and large-scale digital components; register-transfer; bus-structures; controller/processor organizations. Design of arithmetic processors and stored-program computers. Microprogramming. Prereq: EE 280 and EE/CS 380; engineering standing or upper division computer science standing.

EE 592 HARDWARE DESCRIPTION LANGUAGES AND PROGRAMMABLE LOGIC. (3)
A study of hardware description languages including netlists, VHDL and Verilog; their use in digital design methodologies including modeling techniques, design verification, simulation, synthesis, and implementation in programmable and fabricated logic media. Programmable logic topics include CPLD and FPGA architectures, programming technologies and techniques. Prereq: EE/CS 380 and engineering standing.

EE 584 INTRODUCTION OF VLSI DESIGN AND TESTING. (3)
Introduction to the design and layout of Very Large Scale Integrated (VLSI) Circuits for complex digital systems. Fundamentals of the VLSI fabrication process, and introduction to VLSI testing and structured design for testability techniques. Prereq: Engineering standing and EE 360 or CS 215 or consent of instructor.

EE 585 FAULT TOLERANT COMPUTING. (3)
Fault models in logic networks will be developed and then various testing techniques for detection of faults in logic networks will be discussed. Systematic approach for designing logic networks for testability will be introduced. Self testing and fault tolerant design of logic systems using coding theory will be covered. Prereq: EE 581 or consent of the instructor, engineering standing or upper division computer science standing.

EE 586 COMMUNICATION AND SWITCHING NETWORKS. (3)
Fundamentals of modern communication networking and telecommunications, data transmission, multiplexing, circuit switching networks, network topology routing and control, computer communication, packet switching networks, congestion control, frame relay, ATM switching networks, traffic and congestion control. Prereq: EE 280.

EE 587 MICROCOMPUTER SYSTEM DESIGN. (3)
A course in the design of microcomputer systems for hardware engineers which includes the following topics: use of uncommitted logic arrays in instruction set design; hardware support for operating systems and programming languages; customizing microcomputers for specific execution environments; and control of concurrency. Prereq: EE 581 and EE 583, or consent of instructor. Engineering standing or upper division computer science standing. (Same as CS 587.)

EE 588 REAL-TIME DIGITAL SYSTEMS. (3)
This course will cover features typically found in real-time and embedded systems. Topics will include scheduling, synchronization, and architectural features of single and multiple processor real-time and embedded systems. Prereq: EE 380, C programming experience, engineering standing or upper division computer science standing, or consent of instructor.

EE 589 ADVANCED VLSI. (3)
An advanced class in topics related to Very Large Scale Integration. Example topics are advanced simulation, yield impact, memory design, statistical analysis and date reduction. Prereq: EE 584, engineering standing.

EE 595 INDEPENDENT PROBLEMS. (1-3)
For electrical engineers. A problem, approved by the chairperson of the department, provides an objective for study and research. May be repeated to a maximum of six credits. Prereq: 2.5 standing and engineering standing.

EE 599 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required). (2-3)
A detailed investigation of a topic of current significance in electrical engineering such as biomedical instrumentation, digital filter design, advanced microprocessors, advanced electrical devices, digital communications, display of electronics. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the EE 599 number. Prereq: Equivalent of two 400-level courses in electrical engineering, consent of instructor and engineering standing.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics. For major work, a candidate must hold a bachelor's degree in electrical engineering or its equivalent.

EE 601 ELECTROMAGNETIC ENERGY CONVERSION. (3)
Generalized electric machine theory; parameter determination. Energy conversion in continuous media including magnetohydrodynamics. Prereq: Consent of instructor.
Study of solid-state power electronic devices and their applications in power conditioned electric machine drive systems. Examination of control philosophies, steady-state models, and numerical simulation of characterizing differential equations. Current topics of interest from the literature. Prereq: EE 517 and EE 571 or consent of instructor.

**EE 604 SWITCH MODE CONVERTERS.**

Study of analysis techniques for switching mode converters and associated control practices. Boost, buck, buck-boost, flyback, and Cuk topologies in both continuous and discontinuous conduction modes are presented. Numerical solution, state-space averaging, and linearization techniques are applied to predict performance and formulate transfer characteristics. Prereq: EE 517 or consent of instructor.

**EE 605 SYSTEMS FOR FACTORY INFORMATION AND CONTROL.**

System approach to manufacturing. Hardware and software for real-time control and reporting. Sensor and actuators, controllers, networks, databases, hierarchical and distributed control. CAD/CAM systems, flexible manufacturing systems, group technology, modeling and simulation of factory operations. Lecture, two hours; laboratory, two hours. Prereq: MFS 505. (Same as MFS 605.)

**EE 606 SEMINAR AND PROJECT IN MANUFACTURING SYSTEMS ENGINEERING.**

A project course for manufacturing systems. Course consists of seminar presentations by outside professionals and faculty and a course project on a realistic manufacturing systems assignment. Lecture, two hours; laboratory, two hours. (Same as ME/MFS 606.)

**EE 611 DETERMINISTIC SYSTEMS.**

Concepts of linear systems, singularity functions, convolution and superposition integrals, state-variable method for linear systems, relation between transfer function and state-variable equations, fundamental matrix, state-transition matrix, unit-impulse response matrix, and transmission matrix. Prereq: EE 421G.

**EE 613 OPTIMAL CONTROL THEORY.**

State-space modeling of control systems; variational techniques; system optimization by maximum principle, dynamic programming; Hamilton-Jacobi equations design of linear optimal systems; computational methods for solving boundary value problems. Prereq: EE 611.

**EE 614 ADAPTIVE CONTROL.**

Real-time parameter estimation; deterministic self-tuning regulators; stochastic and predictive self-tuning regulators; model-reference systems; auto-tuning; gain scheduling; practical issues; design and simulation projects. Prereq: EE 611.

**EE 619 PROBLEMS SEMINAR IN OPERATIONS RESEARCH.**

In this course, the student is exposed to the art of applying the tools of operations research to real world problems. The seminar is generally conducted by a group of faculty members from the various disciplines to which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor.

**EE 621 ELECTROMAGNETIC FIELDS.**

Development of electromagnetic field theory from the basic postulates of Maxwell’s equations in differential and integral forms, solution to static, quasistatic, and wave-propagation problems. Radiation from dipole antenna elements. Prereq: EE 468G.

**EE 622 ADVANCED ELECTRODYNAMICS.**

Solution methods for applied electromagnetics problems; uniqueness, equivalence, duality, reciprocity; linear space methods; wave solutions in separable coordinate systems; classical problems in cartesian, cylindrical, and spherical coordinates. Prereq: EE 468G.

**EE 624 COMPUTATIONAL ELECTROMAGNETICS: THE FINITE DIFFERENCE TIME-DOMAIN.**

A course on the application of the finite-difference time-domain (FDTD) technique for the full-wave simulation of time-dependent electromagnetic waves in complex media. Representative topics in the course include: The Yee-algorithm, numerical dispersion and stability, physical source models, absorbing boundaries and perfectly matched layered media, near-field to far-field transformations, modeling of microwave wave circuits and antennas, parameter extraction, lumped load models, non-uniform and non-orthogonal grid methods, and current topics in FDTD. Prereq: EE 621 or consent of instructor.

**EE 625 COMPUTATIONAL ELECTROMAGNETICS.**

This advanced course in computational electromagnetics primarily covers moment method and finite element method solutions to scattering problems. Representative topics of the course include surface and volume equivalence principles, scattering by material cylinders, scattering by periodic structures and absorbing boundary condition models. Prereq: EE 525, EE 621, or consent of instructor.

**EE 630 DIGITAL SIGNAL PROCESSING.**

An introductory treatment of the basic concepts of signal processing via time and frequency domain (Z-transform) methods and a survey of procedures for designing, implementing and using digital signal processors. Prereq: EE 512 or consent of instructor.

**EE 635 IMAGE PROCESSING.**

The course outlines applications of image processing and addresses basic operations involved. Topics covered include image perception, transforms, compression, enhancement, restoration, segmentation, and matching. Prereq: Graduate standing and consent of instructor. (Same as CS 635.)

**EE 639 ADVANCED TOPICS IN SIGNAL PROCESSING AND COMMUNICATIONS.**

Advanced topics in signal processing and communications research and design topics of current interests, such as optical processing, pattern recognition, satellite systems, and digital communication networks. A review and extension of current literature and selected papers and reports. May be repeated to a maximum of nine credits. Prereq: Advanced graduate standing.

**EE 640 STOCHASTIC SYSTEMS.**

Random variables, stochastic processes, stationary processes, correlation and power spectrum, mean-square estimation, filter design, decision theory, Markoff processes, simulation. Prereq: EE 421G.

**EE 642 DISCRETE EVENT SYSTEMS.**

The objective of the course is to prepare students for research in the field of supervisory control of discrete event systems (DES’s). Logical models, supervising control. Stability and optimal control of DES, complexity analysis and other related research areas will be covered. Prereq: Graduate standing or consent of instructor. (Same as CS 642.)

**EE 661 SOLID-STATE ELECTRONICS.**

A study of semiconductor fundamentals including crystal structure, basic quantum mechanics, energy-band theory, carrier distributions, carrier transport, and recombination-generation. Analysis of semiconductor devices including PN junction diodes, bipolar-junction transistors, metal-semiconductor diodes, and metal-oxide semiconductor field effect transistors. Prereq: EE 360 and EE 461G or consent of instructor.

**EE 663 OPTOELECTRONIC DEVICES.**

Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting diodes and display devices, nanocystalline structures and organic semiconductors applications in optoelectronic devices. Prereq: EE 360 or MSE 402G, consent of instructor and/ or graduate standing. (Same as MSE 663.)

**EE 664 MULTIDISCIPLINARY SENSORS LABORATORY.**

A multidisciplinary laboratory course with laboratory experiences in areas related to sensors and sensing architectures, typically including chemistry, chemical and materials engineering, and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/CME/MSE 664.)

**EE 668 INTRODUCTION TO COMPUTER AIDED DESIGN OF VLSI CIRCUITS.**

Computer-aided design of Very Large Scale Integration (VLSI) circuits. Topics include: VLSI technologies, CMOS circuit characteristics, computer aids in the design of VLSI circuits, use of various CAD tools for layout, circuit design, logic design, and functional design, and current state of VLSI circuits in the system design. A design project is required. Prereq: EE 581 and EE 461G or consent of instructor.

**EE 665 DIGITAL COMPUTER STRUCTURE.**

Study of fundamental concepts in digital computer system structure and design. Topics include: computer system modeling based on instruction set processor (ISP) and processor-memory-switch (PMS) models, design and algorithms for ALU, processor, control unit and memory system. Special topics include floating-point arithmetic, cache design, pipeline design technologies, and parallel computer architectures. Prereq: EE 380 and EE 581 or consent of instructor.

**EE 668 ADVANCED COMPUTER ARCHITECTURE DESIGN.**

A study of current diverse advanced architectures such as microprogrammed, parallel, array and vector, networked, and distributed architectures; applications and example systems employing these architectures; matching applications to architectures; consideration of architectures of the future. Prereq: EE 685.

**EE 699 TOPICS IN ELECTRICAL ENGINEERING (Subtitle required).**

A detailed study of a topic of current interest in electrical engineering. May be repeated to a maximum of six credits, but only three credits may be earned under the same subtitle. A particular topic may be offered at most twice under the EE 699 number. Prereq: Consent of instructor.

**EE 748 MASTER’S THESIS RESEARCH.**

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**EE 749 DISSERTATION RESEARCH.**

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**EE 767 DISSERTATION RESIDENCY CREDIT.**

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**EE 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**

May be repeated to a maximum of 12 hours.

**EE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.**

May be repeated indefinitely.
Course Descriptions

EE 780 ADVANCED PRACTICE IN ELECTRICAL AND COMPUTER ENGINEERING. (1-3) Apply advanced training in electrical/computer engineering to solve complex practical problems through analysis, design, implementation, experiments, and/or developments subject to approval of the course instructor. This course may be repeated for a maximum of six credit hours in combination with EE 783. Prereq: 18 hours of graduate courses.

EE 783 SPECIAL PROBLEMS IN ELECTRICAL ENGINEERING. (1-3) Open to graduate students only. Individual work on an assignment approved by the chairperson of the department. May be repeated to a maximum of nine credits.

EE 784 RESEARCH PROJECT IN ELECTRICAL ENGINEERING. (3) Individual study related to a special research project supervised by the student's advisor. A final written report on the project is required. This course is open only to and required by students pursuing the MSEE degree with a non-thesis option (Plan B). The course cannot satisfy part of the required 30 hours of course work for Plan B. Prereq: Approval of student's MSEE advisor.

EE 790 RESEARCH IN ELECTRICAL ENGINEERING. (1-9) Research in any field of electrical and/or computer engineering subject to approval of the Director of Graduate Studies. This course can be taken prior to the qualifying examination, but will not count for pre-qualifying examination residency credit. This course may be repeated to a maximum of 18 credit hours. Prereq: Consent of DGS.

EES Earth and Environmental Sciences

1 EES 101 PHYSICAL GEOLOGY. (4) Elementary and intermediate topics in the geologic history of the earth and how the Earth behaves as a self-regulating system that controls the global environment. The effect of human activity on modern Global Change will also be emphasized. Prereq: Consent of DGS.

1 EES 102 HISTORICAL GEOLOGY. (3) An introductory course that applies basic geological concepts to current environmental issues including the availability and use of water and soil resources, pollution causes, effects and solutions, and causes and prediction of environmental hazards including floods, landslides, subsidence, earthquakes and volcanoes. Prereq: Consent of DGS.

EES 111 LABORATORY FOR PHYSICAL GEOLOGY. (1) Lab exercises emphasize identification and interpretation of geologic materials and maps. Prereq: EES 102.

EES 112 LABORATORY FOR HISTORICAL GEOLOGY. (1) Lab exercises emphasize identification and interpretation of geologic materials and maps. Prereq: EES 102.

1 EES 115 INTRODUCTION TO GEOLOGY LABORATORY. (3) An introduction to the geologic and societal controls that govern the distribution and use of geologic resources: minerals, soils, and energy and industrial materials. Topics include the geological processes responsible for forming these resources, controls on their distribution, quality and abundance, economic factors that drive their recovery, and the legal/political arena in which we attempt to utilize them.

1 EES 120 SUSTAINABLE PLANET: THE GEOLOGY OF NATURAL RESOURCES. (3) An introduction to the geologic and societal controls that govern the distribution and use of geologic resources: minerals, soils, and energy and industrial materials. Topics include the geological processes responsible for forming these resources, controls on their distribution, quality and abundance, economic factors that drive their recovery, and the legal/political arena in which we attempt to utilize them.

1 EES 130 DINOSAURS AND DISASTERS. (3) More than 65 million years ago, dinosaurs and their kin dominated the earth and relegated our mammalian ancestors to positions of unimportance for nearly 155 million years. This course traces the history of dinosaurs from early vertebrate ancestors to their final extinction and surveys the evolutionary, paleogeographic, environmental, and possible extraterrestrial causes for the rise to dominance and sudden fall. Along the way and afterwards, dinosaur interactions with other organisms and the environment, as well as their indirect influence on mammals, particularly on the much later evolution of hominids, will be examined.

1 EES 140 GENERAL PHYSICAL GEOLOGY. (3) The basic principles of geologic processes, materials, and history with primary emphasis on inquiry-based laboratory and field activities. The course is designed in conjunction with PHY 160 to provide basic concepts of earth science, astronomy and physics appropriate for elementary and middle school teachers. Both courses are taught with an emphasis on inquiry-based, laboratory activities. Lecture, two hours per week; laboratory, three hours per week. Not available for credit to students who have received credit for EES 220.

1 EES 170 BLUE PLANET: INTRODUCTION TO OCEANOGRAPHY. (3) Survey of oceanography, including the geologic evolution of the ocean floor; composition and dynamics of ocean water; interaction of lithosphere with hydrosphere; ocean-atmosphere interaction and oceanic controls on climate dynamics; marine life and ecosystems; impact of human activity on marine ecosystems.

1 EES 185 QUANTIFYING THE BLUEGRASS WATER SUPPLY. (3) This course develops the ability to locate and identify data, critically evaluate the data, develop probabilistic models, and present the results of their research. Geology provides important information on the origins of natural resources and the amounts available for exploitation and use. Course focuses on the water supply and demand in the central Kentucky Bluegrass region, and the impact of global climate change.

1 EES 210 HABITABLE PLANET: EVOLUTION OF THE EARTH SYSTEM. (3) Earth is a 4.55-billion-year-old planet undergoing continuous evolution. We will explore aspects of Earth's evolutionary changes that have affected both climate and life through time. The chemical and physical interactions between the solid Earth, the atmosphere, the hydrosphere, and the biosphere are investigated, providing the basis for understanding how Earth behaves as a self-regulating system that controls the global environment. The effect of human activity on modern Global Change will also be emphasized.

1 EES 220 PRINCIPLES OF PHYSICAL GEOLOGY. (4) How the Earth Works; an integrated course implying geology, covering the physical, chemical and biological processes that combine to produce geological processes. Attention is focused on plate tectonics, earth surface processes, and properties and formation of earth materials. Lab exercises emphasize identification and interpretation of geologic materials and maps. Lecture/Discussion, three hours per week; laboratory, three hours per week.

1 EES 223 INTRODUCTION TO GEOLOGY IN THE ROCKY MOUNTAINS. (3) Field and laboratory methods for identification and description of rocks and minerals with emphasis on sedimentary rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, three hours per week. Eight days in the field. Prereq: EES 220.

1 EES 235 FUNDAMENTALS OF GEOLOGY I. (3) Laboratory and field methods for identification and description of rocks and minerals with emphasis on sedimentary and metamorphic rocks and rock-forming minerals. Field study of geologic structures. Interpretation of geologic maps. Laboratory, four hours per week. Four days in the field. Prereq: EES 220.

1 EES 295 GEO SCIENCE ORIENTATION. (1) Survey of geoscience disciplines and post-baccalaureate career options for Geology majors. Introduction to the range of geoscience research approaches and means of dissemination of geoscience information. Guest speakers from industry, government, and academia will discuss career issues specific to geology, including consideration of appropriate educational preparation for potential career paths. Pass/Fail only. Prereq: EES 220 and sophomore standing.

1 EES 310 EXPLORATIONS OF THE SOLAR SYSTEM. (3) Fundamental and current topics in the space exploration of our solar system. Topics and examples of themes include: What is a planet; critical evaluation of the evidence for the heliocentric system; electromagnetic waves; the threat of asteroid impact; critical evaluation of the possibilities of extra-terrestrial life; critical evaluation of the evidence for climate change; and other topical items based on the results of on-going space missions. Prereq: Any two university science/math courses or completion of one and concurrent enrollment in another.

1 EES 311 WORKSHOP IN ANALYTICAL METHODS FOR THE GEOSCIENCES. (1) This course is designed for geology majors currently taking calculus. Students will work through geologically relevant analytical problems that draw on the concepts and methods they are learning in their formal calculus courses. Basic problem-solving skills and techniques will also be developed. The course will provide applied, real-life perspectives to help students develop skills and understanding necessary for future success in the study of geology and related geological phenomena. Offered only on a pass/fail basis. May be repeated for a maximum of four credits. Concurrent registration in calculus (MA 113, 114, 213 or 214) is required. Prereq: Concurrent registration in calculus (MA 113, 114, 213 or 214) is required.
EES 323 FIELD WORK IN REGIONAL GEOLOGY. (6)
Geologic mapping in the field for a six-week period. Description, measurement, and mapping of a wide variety of rocks and structures; and analysis of geologic events in mountainous regions of the Rockies or Appalachians. Includes practice in writing geologic field reports. Offered only during the summer session. At least 40 hours of field-related work per week. Special fee. Prereq: EES 230 and EES 235.

EES 341 LANDFORMS. (3)
A study of the origin and distribution of landforms. Lecture, two hours; laboratory, three hours per week. Prereq: EES 220.

EES 350 REGIONAL HISTORICAL GEOLOGY. (3)
Integration of basic rock types, geologic structures, geomorphology, and natural resources in the context of geologic history of the major regions of North America. Global plate tectonics as a framework for the evolution of the North American continent. Prereq: EES 330.

EES 360 MINERALOGY. (4)
The study of mineral structure and composition, and mineral classification through crystallographic and crystal chemical techniques. Laboratory work includes study of minerals via crystallography, X-ray diffraction, mineral chemical analysis, and optical petrographic techniques. Lecture, three hours per week; laboratory, three hours per week. Prereq: CHE 105 and EES 220. Prereq or concur: EES 230 or EES 235.

EES 385 HYDROLOGY AND WATER RESOURCES. (3)
The occurrence, movement, and quality of fresh water in the water cycle, including environmental problems and possible solutions. Case studies are explored through readings, videos, and required field trips. Prereq: EES 220.

EES 395 SPECIAL PROBLEMS IN GEOLOGY. (1-3)
Individual work on a special problem in geology. Report required. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

EES 399 WORK EXPERIENCE IN GEOLOGICAL SCIENCES. (1-6)
Professional-level, pre-planned learning experience in geological sciences in the work place under the supervision of a faculty member. The student will complete work of the type done by professional geoscientists in the same setting. May be repeated to a maximum of six credits. Pass/fail only. Prereq: Approval of learning contract by faculty supervisor, director of undergraduate studies, and department chair.

EES 401 INVERTEBRATE PALEOBIOLGY AND EVOLUTION. (3)
Basic ecologic and evolutionary framework of common fossil invertebrate taxa. Major principles of paleontology, ecology, systematics, and evolution; and the use of fossils in paleoecology and biostratigraphy. Laboratory work in classification of common fossils. Lecture, two hours; laboratory, three hours per week. Prereq: EES 102/112.

EES 420G STRUCTURAL GEOLOGY. (4)

EES 430 ENVIRONMENTAL GEOHYDROLOGY. (3)
A course dealing with the occurrence and movement of water on and beneath the land surface, and its place in the hydrosphere, emphasizing the geologic perspective. Prereq: EES 220.

EES 450G SEDIMENTARY GEOLOGY. (4)
Basic principles and concepts of stratigraphy and sedimentation. Lithologic correlation and the interpretation of geologic history and paleogeography. Field and laboratory analysis of sedimentary rocks including megascopic and microscopic methods. Lecture, three hours per week; laboratory, three hours per week. Prereq: EES 230 and EES 360.

EES 461 IGNEOUS AND METAMORPHIC PETROLOGY. (4)
Classification and origins of the common igneous and metamorphic rocks. Lecture material will emphasize the mineralogical, chemical, and physical equilibria within the earth. Laboratory topics will stress hand-specimen and microscopic petrography. Lecture, three hours; laboratory, three hours per week. Prereq: EES 230 and EES 360.

EES 480 ADVANCED TOPICS IN GEOLOGICAL SCIENCES (Subtitle Required). (1-6)
Advanced topical course in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

EES 490 EARTH DYNAMICS. (3)
Basic planetary changes through geological time, including continental drift, formation of supercontinents, paleoclimate, and the growth of the earth’s crust. Students will be required to take the Fundamentals component of the ASBOG professional geologist certification exam (fee required). Prereq: Senior standing with at least 30 credits in a Geosciences Curriculum.

EES 511 PETROLEUM GEOLOGY. (3)
Survey of the origin, chemical composition, occurrence in the context of stratigraphy, structure, and reservoir types of natural hydrocarbons; exploration methods and production techniques; environmental impacts of exploration and production. Prereq: EES 450G, EES 420G, or equivalent, or consent of instructor.

EES 530 LOW TEMPERATURE GEOCHEMISTRY. (3)
An introduction to environmental and tectonic geochemistry, including carbonate equilibria, coal and petroleum geochemistry, and the geochemistry of aqueous contaminants. Prereq: EES 360, MA 114, or consent of instructor.

EES 550 FUNDAMENTAL GEOPHYSICS. (3)
Survey of active geophysical measurements and passive geophysical observations and their relation to Earth’s structure and composition. Investigation of the relationship between Earth’s elastic, potentialmetric, and thermodynamic properties and traditional geophysical methods for measurement (e.g., gravity, magnetism, seismic, and heat flow). Material will help students improve their quantitative problem-solving abilities, but will also emphasize the visual learning skills commonly developed in the broader geology curriculum. Prereq: MA 113, PHY 211 or 213, or consent of instructor. (MA 114 suggested).

EES 555 STRATIGRAPHY. (3)
Principles of stratigraphy, depositional systems, sequence stratigraphy, and tectonic framework of sedimentation. Prereq: EES 450G.

EES 560 GEOPHYSICAL FIELD METHODS. (4)
An introduction to the principles and applications of geophysics in the field. The course will present the geophysical methods used to assess the configuration and physical properties of the Earth’s subsurface, as well as to explore for natural resources. Designed for students interested in geology students (upper-division or first-year graduate) and other science or engineering students without prior formal instruction in geophysics. To understand the discussions and exercises, the student should be familiar with first-year calculus and physics. Prereq: MA 113, 114; PHY 211, 213 or PHY 231, 232 or consent of instructor. MA 114, PHY 213 or PHY 232 may be taken concurrently.

EES 570 SEMINAR IN GEOLOGICAL SCIENCES (Subtitle required). (1)
A general seminar in a broad range of topics in the geological sciences. May be repeated to a maximum of six credits under different subtitles. Prereq: Senior or graduate standing in Geological Sciences.

EES 579 GROUNDWATER GEOPHYSICS. (3)
Application of geophysical methods to groundwater exploration, emphasis is placed on the use of shallow seismic and potential field methods in the analysis of groundwater aquifers. Lecture, two hours; laboratory, three hours per week. Prereq: MA 114 and PHY 251, or consent of instructor.

EES 585 HYDROGEOLOGY. (3)
A study of the physical aspects of groundwater, including regional flow, well hydraulics, and computer simulation. Prereq: EES 220 and MA 113 or 123.

EES 610 TOPICS IN HYDROGEOLOGY AND SURFICIAL PROCESSES (Subtitle required). (3)
Study of topics in hydrogeology and surficial processes. Recent topics include: models of surface processes; contaminant hydrogeology; modeling in hydrogeology. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 620 TECTONICS. (3)
A study of the structural features of the earth’s crust with an analysis of the mechanics involved. Prereq: PHY 211, 213; EES 420G.

EES 624 ADVANCED STRUCTURAL GEOLOGY. (3)
An advanced study of the theory, principles, and application of structural geology. Prereq: EES 420G.

EES 625 TOPICS IN APPLIED GEOPHYSICS AND ENGINEERING GEOLOGY (Subtitle required). (3)
Study of topics in Applied Geophysics and Engineering Geology. Past topics include: Seismic Processing; Seismic Stratigraphy; Geologic Hazards. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 626 GRAVITY AND MAGNETIC METHODS. (3)
Theory and practice of the gravity and magnetic methods of geophysical exploration as applied to geological, archeological, environmental, and planetary exploration problems. The course includes principles of instrumental surveying, anomaly interpretation, and their interpretation. Prereq: MA 113, MA 114; PHY 211 and PHY 213 or PHY 231 and PHY 232, or consent of instructor. MA 114 and PHY 213 or 232 may be taken concurrently.

EES 645 TOPICS IN PETROLOGY AND GEOCHEMISTRY (Subtitle required). (3)
Study of selected topics in petrology and geochemistry. Past topics include: Carbonate Petrology; Igneous Petrology; Organic Petrology; Isotope Geochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

EES 650 TECTONICS AND STRATIGRAPHY. (3)
Use of stratigraphic data in the interpretation of tectonic framework of sedimentation, tectonic controls on paleogeography, and interactions between sedimentary rocks and geologic structures. Prereq: EES 420G and 450G or equivalent.

EES 703 PALEOECOLOGY/PALEONTOLOGY SEMINAR (Subtitle required). (1-3)
Discussion and study of advanced topics in paleoecology or paleontology and related fields. One or more field trips required. May be repeated to a maximum of six credits. Prereq: EES 602 or equivalent or consent of instructor.

EES 715 COAL GEOLOGY SEMINAR. (2)
Seminars discussion and presentation of current work in coal geology from current literature or ongoing research. May be repeated to a maximum of eight credits. Prereq: EES 515 or 617 or consent of instructor.
**Course Descriptions**

**EES 730 SEMINAR IN TECTONICS AND STRATIGRAPHY (Subtitle required).**
Seminar in Tectonics and Stratigraphy. Past topics include: Tectonics and Stratigraphy of the Appalachians; Tectonics and Sedimentation; Basin Analysis. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**EES 741 ENVIRONMENTAL CLAY MINERALOGY.**
A comprehensive study of the crystal structures of clay minerals commonly found in soils and sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: EES 360 or consent of instructor. (Same as PLS 741.)

**EES 745 SEMINAR IN PETROLOGY AND GEOCHEMISTRY (Subtitle required).**
Seminar in Selected Topics in Petrology and Geochemistry. Past topics include: Carbonate Petrology; Igneous Petrology; Isotope Geochemistry. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

**EES 748 MASTER’S THESIS RESEARCH.**
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**EES 749 DISSERTATION RESEARCH.**
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**EES 767 DISSERTATION RESIDENCY CREDIT.**
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**EES 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**
May be repeated to a maximum of 12 hours. Prereq: Geology major with graduate standing.

**EES 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.**
May be repeated indefinitely.

**EES 782 INDIVIDUAL WORK IN GEOLOGY.**
Problems involving independent laboratory and/or library study conforming to the student’s special interest, under the direction of an appropriate staff member, having proficiency in the area selected. May be repeated to a maximum of nine credits. Prereq: Geology major with graduate standing.

**EES 790 RESEARCH IN GEOLOGICAL SCIENCES.**
Research in the geological sciences. May be repeated to a maximum of twelve credits. Prereq: Approval of instructor and Director of Graduate Studies.

---

**EGR 101 INTRODUCTION TO ENGINEERING.**
This course introduces the engineering profession and the skills and expectations required for success. Engineering applications of calculus are also presented. Lecture, three hours; laboratory, two hours per week.

**EGR 120 TECHNOLOGY: BLESSING OR CURSE.**
Technology has created the world in which we live. Our wealth, our economy, and the way we live each day have come about due to the emergence of technology over the centuries. The course will examine the relationship between technology and society; how technology influenced the development of society; how society influenced the development of technology, and how people in society view technology. Prereq: Acceptance into SEAM Program.

**EGR 199 TOPICS IN ENGINEERING: TITLE TO BE ASSIGNED.**
An experimental, topical or interdisciplinary course devoted to special topics of interest in engineering. Course offerings must be approved by the Deans and Chairpersons of all cosponsoring academic units. A particular title may only be offered twice under the EGR 199 number. Students may not repeat this course under the same title. May be repeated to a maximum of twelve credits. Prereq: Enrollment in the College of Engineering, or permission of the instructor.

**EGR 201 LITERATURE, TECHNOLOGY, AND CULTURE.**
EGR 201 focuses on human endeavors in science as refracted through literature. The course brings together two distinct traditions: the study of literature and the practice of technological communication. The course operates from several assumptions: (1) that imaginative treatments of technological subjects offer powerful, useful, and even needed critical perspectives, (2) that authors and engineers both work from written conventions – genres and other tropes – that frame knowledge, (3) that writers benefit from scrutiny of generic conventions, and (4) that creative play with conventional literary genres can inspire engineers to “think outside the box,” to think creatively about their own designs and projects and about innovative ways of presenting their work. Prereq: Students must have successfully completed the first course in the General Education Communication sequence (or its transfer equivalent) and must have completed at least 30 hours of course work.

**EGR 240 GLOBAL ENERGY ISSUES.**
This is a cross-disciplinary course open to all majors. This course critically examines issues associated with the technical, economic, societal, environmental, and geopolitical aspects of energy. The course is taught through lectures, discussions, and invited speakers.

**EGR 390 EXPERIENTIAL LEARNING IN ENGINEERING OR COMPUTER SCIENCE.**
Project or activity led by an engineering faculty member, designed to provide students the opportunity to apply engineering principles in the context of real-world and multi-disciplinary community-based problems. May be repeated to a maximum of three credits. Prereq: Engineering standing.

**EGR 394 BS/MBA SEMINAR.**
Participation in team development exercises, seminars, company visits, and activities associated with the BS/MBA program. Prereq: Admission to the BS/MBA program.

**EGR 399 COOPERATIVE ENGINEERING EDUCATION.**
A course designed for undergraduate students who, through the engineering cooperative education office, secure full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and may be repeated on a rotational basis to a maximum of six credit hours. Prereq: Approval of Coordinator of Cooperative Engineering Education.

**EGR 401 CAREER PLANNING/EMPLOYMENT SEMINAR.**
This course will introduce students to the various industries involved in obtaining a position in their chosen field of engineering. Prereq: Engineering standing.

**EGR 537 NUMERICAL ANALYSIS.**
Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of common occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent, or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS/MA 537.)

**EGR 540 POWER ECONOMICS AND PUBLIC POLICY.**
This course provides an introduction to the theories and industry practices related to power economics and public policy. Topics studied include: U.S. power markets, electric utility business regulation, electric utility environmental regulation, public policy theory, political science theory, development of new electric generation facilities, utility business engineering, influence on public policy, and engineering economic analysis. Prereq: Engineering standing, graduate standing, or consent of instructor.

**EGR 542 ELECTRIC POWER GENERATION TECHNOLOGIES.**
Overview of technologies used for generating electricity from location, recovery, transportation and storage of fuel to the types of technologies used to convert the fuel to electricity. Included is a discussion of the advantages and disadvantages of each technology and how they must adapt to be viable in the future. Technologies covered include coal, natural gas, nuclear, biomass, wind, solar and advanced technologies. Prereq: Engineering standing or consent of instructor. (Same as CME 542.)

**EGR 546 ELECTRIC POWER SYSTEM FUNDAMENTALS.**
Introduction to power transmission basics, power system components, power flow, fault analysis, and protection, control, stability, and economic operation of power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EE 546.)

**EGR 599 TOPICS IN ENGINEERING (Subtitle required).**
An experimental, interdisciplinary course devoted to a topic of interest to students in several departments of the college. May be repeated to a maximum of six credits, but only three credits may be earned under the same title. A particular topic may be offered at most twice under the EGR 599 number. Prereq: Variable, given when topic is identified.

**EGR 611 BOUNDARY ELEMENT METHODS IN ENGINEERING.**
Introduction of boundary element methods for use in solving common engineering equations, such as the Laplace equation, the Poisson equation, the wave equation, and the diffusion equation. Both the theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: EGR 537 or consent of instructor. (Same as ME 611.)

**EGR 649 POWER AND ENERGY EXPERIENCES.**
This course will provide unique experiences through visit to a variety of energy-related sites and presentations from topical experts. Each week there will be planned full day field trips to selected energy related sites such as: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power operations center, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. More than simply tours, these visits will be prepared for through individual reading assignments and summarized by journals. Prereq: EGR 542, EGR 546, admittance to PEIK Certificate Program, and EGR 540 concurrent; or consent of instructor.
**EGR 101 INTRODUCTION TO ENGINEERING.** (4) This course introduces the engineering profession and the skills and expectations required for success. Engineering applications of calculus are also presented. Lecture, three hours; laboratory, two hours per week.

**EGR 120 TECHNOLOGY: BLESSING OR CURSE.** (3) Technology has created the world in which we live. Our wealth, our economy, and the way we live each day have come about due to the emergence of technology over the centuries. The course will examine the relationship between technology and society; how technology influenced the development of society; how society influenced the development of technology, and how people in society view technology. Prereq: Acceptance into SEAM Program.

**EGR 199 TOPICS IN ENGINEERING: TITLE TO BE ASSIGNED.** (1-6) An experimental, topical or interdisciplinary course devoted to special topics of interest in engineering. Course offerings must be approved by the Deans and Chairpersons of all cosponsoring academic units. A particular topic may only be offered twice under the EGR 199 number. Students may not repeat this course under the same title. May be repeated to a maximum of twelve hours. Prereq: Enrollment in the College of Engineering, or permission of the instructor.

**EGR 201 LITERATURE, TECHNOLOGY, AND CULTURE.** (3) EGR 201 focuses on human endeavors in science as refracted through literature. The course brings together two distinct traditions: the study of literature and the practice of technical communication. The course operates from several assumptions: (1) that imaginative treatments of technological subjects offer powerful, useful, and even needed critical perspectives, (2) that authors and engineers both work from written conventions – genres and other tropes – that frame knowledge, (3) that writers benefit from scrutiny of generic conventions, and (4) that creativity on the part of both authors and engineers is essential in order to think “outside the box.” To think creatively about their own designs and projects and about innovative ways of presenting their work. Prereq: Students must have successfully completed the first course in the General Education Communication sequence (or its transfer equivalent) and must have completed at least 30 hours of course work.

**EGR 240 GLOBAL ENERGY ISSUES.** (3) This is a cross-disciplinary course open to all majors. This course critically examines issues associated with the technical, economic, societal, environmental, and geopolitical aspects of energy. The course is taught through lectures, discussions, and invited speakers.

**EGR 390 EXPERIENTIAL LEARNING ENGINEERING OR COMPUTER SCIENCE.** (0-3) Project or activity led by an engineering faculty member, designed to provide students the opportunity to apply engineering principles in the context of real-world and multi-disciplinary community-based problems. May be repeated to a maximum of three credits. Prereq: Engineering standing.

**EGR 394 BS/MBA SEMINAR.** (0-1) Participation in team development exercises, seminars, company visits, and activities associated with the BS/MBA program. Prereq: Admission to the BS/MBA program.

**EGR 399 COOPERATIVE ENGINEERING EDUCATION.** (1) A course designed for undergraduate students who, through the engineering cooperative education associated with full-time, salaried, career-related positions under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and may be repeated on a rotational basis to a maximum of six credit hours. Prereq: Approval of Coordinator of Cooperative Engineering Education.

**EGR 401 CAREER PLANNING/EMPLOYMENT SEMINAR.** (1) This course will introduce students to the various elements involved in obtaining a position in their chosen field of engineering. Prereq: Engineering standing.

**EGR 537 NUMERICAL ANALYSIS.** (3) Floating point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems. Lecture, three hours; laboratory, two hours per week.

**EGR 540 POWER ECONOMICS AND PUBLIC POLICY.** (3) Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EE 546.)

**EGR 546 ELECTRIC POWER SYSTEM FUNDAMENTALS.** (3) Introduction to power transmission basics, power system components, power flow, fault analysis and protection, control, stability, and economic operation of the power grid. This course will also introduce modern trends such as distributed generation, communications, and cybersecurity. Prereq: Graduate or engineering standing and EE 221, EE 305, or equivalent. (Same as EE 546.)

**EGR 599 TOPICS IN ENGINEERING (Subtitle required).** (1-3) An experimental, interdisciplinary course devoted to a topic of interest to students in several departments of the College. May be repeated to a maximum of six credits, but only three credits may be earned under the same title. A particular topic may be offered at most twice under the EGR 599 number. Prereq: Variable, given when topic is identified.

**EGR 611 BOUNDARY ELEMENT METHODS IN ENGINEERING.** (3) Introduction to the use of methods for solving common engineering equations, such as the Laplace equation, the Poisson equation, the wave equation, and the diffusion equation. Both the theoretical and numerical aspects of the boundary element technique are presented. Application areas include heat conduction, potential flow problems, acoustic wave propagation, general diffusion, and stress analysis. Prereq: EGR 557 or consent of instructor. (Same as ME 611.)

**EGR 640 POWER AND ENERGY EXPERIENCES.** (3) This course will provide unique experiences through visit to a variety of energy-related sites and presentations from technical experts. Each week there will be planned full day field trips to selected energy related sites such as: pumped storage site, coal mine, coal- and gas-fired and nuclear power plants, power operations center, wind farm, hydroelectric generation, landfill gas site, smart grid demonstration center, solar farm, high efficiency building, etc. More than one location will be visited through individual reading assignments and summarized by journals. Prereq: EGR 542, EGR 546, admittance to PEIK Certificate Program, and EGR 540 concurrent; or consent of instructor.

**ELS Teacher Leadership**

**ELS 600 LEADERSHIP IN LEARNING-CENTERED SCHOOLS.** (3) ELS 600 is a study of school leadership responsibilities assumed by teachers working collaboratively with colleagues and principals to create learning-centered schools that assure all students learn at their highest potential.

**ELS 601 BUILDING A PROFESSIONAL LEADERSHIP COMMUNITY.** (1) ELS 601 is the study of characteristics of school-based professional learning communities with emphasis on shared vision, values and goals, collective inquiry, collaborative teams, action orientation for continuous improvement of student-learning.

**ELS 602 LEADERSHIP ROLES IN PROFESSIONAL LEADERSHIP COMMUNITIES.** (1) ELS 602 is the study of professional learning communities with emphasis on essential roles of collaborative leaders (i.e., principals, teachers, students, parents) in creating and sustaining continuous improvement of student-learning.

**ELS 603 LEADERSHIP FOR STUDENT LEARNING.** (1) ELS 603 is the study of professional learning communities with emphasis on understanding strategies used by collaborative leaders to nurture all students learn at high levels, with emphasis on establishing instructional priorities, building capacity, planning, data analysis, resource allocation, monitoring and communicating with stakeholders.

**ELS 604 LEADERSHIP IN PROFESSIONAL LEARNING COMMUNITIES.** (3) ELS 604 is an introduction to the study of professional learning communities and collaborative leadership roles intended to bring about significant school changes that contribute to all students’ learning at high levels.

**ELS 605 LEGAL RIGHTS AND RESPONSIBILITIES OF STUDENTS.** (1) Students have both legal rights and responsibilities within the school environment, which teachers must both respect and enforce. ELS 605 provides an overview of rights and responsibilities of students within classrooms (e.g., student expression, discipline, harassment, discrimination, attendance, instruction and testing, privacy).

**ELS 606 LEGAL RIGHTS AND RESPONSIBILITIES OF TEACHERS.** (1) Teachers are both primary recipients and implementers of educational laws. Given this frontline position, a wealth of legal rights and responsibilities are bestowed on teachers. Likewise, teachers are confronted with myriad policies and procedures to follow (e.g., certification, employment, collective bargaining, termination) and with rights to protect (e.g., expression, privacy, discrimination). An overview of these rights and responsibilities for teachers is examined in ELS 606.

**ELS 607 TEACHER RESPONSIBILITIES IN SCHOOL-BASED DECISION MAKING.** (1) School-Based Decision Making (SBDM) Councils have been an integral part of school governance since passage of the 1990 Kentucky Educational Reform Act. Role and responsibilities of SBDM Council are examined with focus on how teachers can use their local Council to assure successful school improvement efforts.
**Course Descriptions**

**ELS 608 SCHOOL LAW AND GOVERNANCE FOR TEACHERS.** (3)  
ELS 608 is the study of school operations from a legal perspective with particular focus on mandates of the Kentucky Constitution and the Kentucky Board of Education. Prereq: Successful completion of ELS 611 or consent of instructor. Emphasis placed on understanding the legal components of school governance and the state and federal law that regulate the operation of schools and school districts. Emphasis placed on understanding the legal components of school governance and the state and federal law that regulate the operation of schools and school districts.

**ELS 609 TECHNOLOGY LEADERSHIP IN SCHOOLS.** (1)  
The Information Revolution fundamentally changed the way schools operate at the beginning of the 21st century—not only has technology facilitated improved school operations, but it is radially changing how students learn inside and outside of the classroom. ELS 609 emphasizes the role of the teacher leader in improving the school-wide technology integration and use of technology beyond the classroom to link people and resources to integrate more innovation into the school environment.

**ELS 610 DISTRIBUTED LEADERSHIP IN SCHOOLS.** (1)  
ELS 610 is the study of distributed leadership research and related teacher leadership roles and responsibilities through readings, assignments, and colloquial discussion. Emphasis placed on building connections between course concepts and activities and students’ professional work.

**ELS 611 CURRENT ISSUES FOR EDUCATION LEADERSHIP.** (1)  
ELS 611 is a study of selected issues that face school leaders and reflect differences among community citizens about who schools should serve (equity and justice), what curriculum should be taught (knowledge and literacy), and how schools should be organized and governed (environment).

**ELS 612 LEADERSHIP FOR TECHNOLOGY AND INNOVATION.** (3)  
Successful implementation of innovation in schools requires broad-based leadership. ELS 612 explores (a) highlights current issues provoking educational innovation nationally and locally, (b) explores how innovations require students and teachers to become technologically competent, and (c) explores distributed leadership research and concepts for improving leadership practice through distributed roles and responsibilities for teacher leaders and other stakeholders.

**ELS 613 LEADERSHIP IN THE PUBLIC CONTEXT OF EDUCATION.** (1)  
ELS 613 is a study of the role of teacher leader whose influence and responsibility transcends school walls to include community and civic leadership.

**ELS 614 PARTNERSHIPS FOR CLOSING ACHIEVEMENT GAPS.** (1)  
ELS 614 is a study of strategies that teacher leaders may utilize for mobilizing school, community, and family resources toward eliminating achievement gaps among students.

**ELS 615 LEADERSHIP FOR RESPONSE TO INTERVENTION CLASSROOMS.** (1)  
ELS 615 is a study of roles of teacher leaders in the Response to Intervention (RTI) model, which serves as both a strategy for providing assistance to children having learning difficulty, as well as a method for diagnosing learning disabilities.

**ELS 616 LEADERSHIP FOR SCHOOLS AS INCLUSIVE COMMUNITY.** (3)  
ELS 616 is a study of evolving perspectives of the purposes of public education, leadership within and beyond the school building to support family-community partnerships and networks, and leadership to ensure inclusive classrooms. Curriculum includes how diverse personnel ensure school-wide safety.

**ELS 617 TEACHER LEADERSHIP FOR INSTRUCTIONAL TEAMS.** (1)  
ELS 617 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

**ELS 618 INTRODUCTION TO LEADING ACTION RESEARCH FOR SCHOOL RENEWAL.** (1)  
ELS 618 is the study of teacher roles and responsibilities within instructional teams at classroom, school, and district levels. Emphasis is placed on concepts and procedures for creating and sustaining instructional teams, designed to support systemic inquiry and school improvement.

**ELS 619 EVIDENCE-BASED DECISION MAKING.** (1)  
ELS 619 is a study of teacher roles and responsibilities when analyzing evidence of student outcomes at classroom and school levels and examination of a model and tools for data analysis and team-based discussions, reflection, and decision making.

**ELS 620 LEADING ACTION RESEARCH IN SCHOOL RENEWAL.** (3)  
ELS 620 is the first course in a two-part sequence that presents concepts and procedures for conducting systematic inquiry to investigate phenomena in classrooms and schools to improve learning excellence. Emphasis is placed on developing a proposal for disciplined inquiry in classrooms or schools that will be conducted in ELS 621, the second course in the sequence. Prereq: Submission to M.Ed. program or consent of instructor.

**ELS 621 LEADING ACTION RESEARCH IN SCHOOL RENEWAL.** (3)  
ELS 621 is the second course in a two-part sequence in which action research proposed in ELS 620 is conducted. Emphasis is placed on appropriate use of data for making informed decisions about classroom and school practices. Prereq: Successful completion of ELS 620 or consent of instructor.

**ELS 624 LEADERSHIP PRACTICUM: MONITORING LEARNING, ASSESSMENT, AND ACCOUNTABILITY.** (3)  
ELS 624 is a field-based practicum to explore distributed leadership roles and responsibilities for monitoring assessments and accountability results to guide decisions about curricular or instructional modifications. Students work closely with school principal and leadership team at a P-12 school to examine specific site issue and provide recommendations for action. Prereq: Successful completion of ELS 620 or consent of instructor.

**ELS 691 LEGAL PERSPECTIVES FOR TEACHERS.** (1)  
This course introduces legal concerns for public school teachers. It emphasizes legal rights and responsibilities of both teachers and pupils. Course coverage includes an introduction to governance, liability, church and state, instructional issues, student rights, student discipline, student abuse, teacher rights, and teacher discipline.

**EM Engineering Mechanics**

**EM 221 STATICS.** (3)  
Study of forces on bodies at rest. Vector algebra; study of force systems; equivalent force systems; internal forces; principles of equilibrium; application to trusses, frames and beams; friction. Prereq or concur: MA 213.

**EM 302 MECHANICS OF DEFORMABLE SOLIDS.** (3)  
A study of stress and strain in deformable solids with application primarily to linear elastic materials: stress and strain transformations; simple tension and compression of axial members; torsion of shafts; bending of beams; combined loading of members; buckling of columns. Prereq: Registration in the College of Engineering or consent of chairperson, and EM 221; prereq or concur: MA 214.

**EM 313 DYNAMICS.** (3)  
Study of the motion of bodies. Kinematics: cartesian and polar coordinate systems; normal and tangential components; translating and rotating reference frames. Kinetics of particles and rigid bodies: laws of motion; work and energy; impulse and momentum. Prereq: Registration in College of Engineering, EM 221 and MA 214.

**END Endodontics**

**END 820 ANTERIOR ENDODONTICS.** (2)  
This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontics in anterior teeth. Lecture, 10 hours; laboratory, 30 hours. Prereq: RSD 812 and RSD 814, or consent of course director.

**END 821 CLINICAL ENDODONTICS I.** (1)  
In this course, students will treat two clinical endodontic cases, one of which shall be a molar. Thirty hours clinic, total. Prereq: END 820.

**END 822 POSTERIOR ENDODONTICS.** (2)  
This is a lecture-laboratory course which is designed to introduce the student to the diagnostic terminology of pulpal and periapical disease and the techniques of endodontics in posterior teeth. Lecture, 10 hours; laboratory, 30 hours; OSCE, one hour (competency-evaluation of preclinical concepts). Prereq: END 820 and RSD 824, or consent of course director.

**END 830 ENDODONTICS II.** (1)  
This course concerns the diagnosis and treatment of endodontically related problems. Traumatic injuries, controversies in instrumentation and filling procedures, periodontic-endodontic consideration, surgical endodontics and other selected topics are discussed in depth. Lecture, 20 hours. Prereq: END 821.

**END 831 CLINICAL ENDODONTICS II.** (1)  
In this course students will treat routine endodontic cases. Clinic, 54 hours. Prereq: END 821.

**END 841 CLINICAL ENDODONTICS III.** (1)  
This course offers dental students further experience in providing endodontic treatment. Clinic, 40 hours. Prereq: END 831 or consent of instructor.

**END 880 CLINICAL ENDODONTICS SEMINAR.** (1)  
This course is designed to give a more in-depth hands-on view of some of the newest concepts in endodontics. Seminars will be presented including new concepts of instrumentation and root canal obturation. Demonstrations and hands on class participation will supplement the seminars. Note: scheduling for this course will take place outside of regularly scheduled class/clinic time. Prereq: END 830, 831, ranked in the upper half of the class, and consent of instructor.
ENG098 ENGLISH FOR SPEAKERS OF OTHER LANGUAGES. (3)

This course is a writing course designed to provide international undergraduate students with a firm basis in the rhetorical patterns of written English and in the grammatical structures and expressions associated with those patterns. It also serves as an introduction to the analysis and organization of information as found in English paragraphs and essays. Emphasis is placed upon writing beyond the sentence level. Students must attain at least a C in order to enter ENG 099. The course may be repeated up to six credits. Students cannot count this credit toward the Freshman Composition requirement or toward the graduation requirement. Lecture, five hours per week.

ENG 101 WRITING I. (3)

A course in writing emphasizing argument. Instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Includes grammar and mechanics review. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

ENG 102 WRITING II. (3)

Argumentative writing. Emphasis on development of a fluent, precise, and versatile prose style. Continued instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific audiences, expressing ideas in standard and correct English. Includes grammar and mechanics review. Notes: (a) Credit not available by special examination; (b) ENG 101 and ENG 102 may not be taken concurrently.

ENG 104 WRITING: AN ACCELERATED FOUNDATIONAL COURSE. (3)

An intensive course in writing emphasizing critical inquiry and research, formulation of academic writing projects, and orientation to university study. Instruction and practice in reading critically, thinking logically, responding to texts, developing research skills, writing substantial essays through systematic revision, addressing specific consequences, developing a fluent, precise, and versatile prose style, and expressing ideas in standard and correct English. Focus on topics pertinent to university disciplines, activities, and environments. Notes: (a) credit or exemption not available by CLEP or by special departmental examination; (b) exemption possible by ACT, SAT, or AP English Language exam score.

ENG 105 WRITING: AN ACCELERATED COURSE. (3)

An intensive course in writing that combines the content of ENG 101 and ENG 102, emphasizing argumentation and research. ENG 105 satisfies the University Writing Requirement for students who qualify for admission by ACT score and special examination. Note: Credit for this course and for fulfillment of the University Writing Requirement possible by CLEP examination.

"ENG 107 WRITING CRAFT: INTRODUCTION TO IMAGINATIVE WRITING. (3)

An introduction to the genres and craft of imaginative writing, including fiction, nonfiction, and poetry. Students will study and practice writing in various modes through composition, peer critique, and research. Lecture. Offers credit for the UK Core Requirement in Intellectual Inquiry in Arts & Creativity. Fulfills ENG premajor requirement and provides ENG minor credit.

ENG 130 LITERARY ENCOUNTERS (Subtitle required). (3)

A course introducing students to literary works of various genres and styles, from both historical and contemporary authors, that deal with a particular issue or theme. Topics vary by semester and are chosen by faculty to give a broad-based understanding of significant literary works and cultural trends. Intended as a general humanities course for non-majors. Lecture. See departmental listings for different offerings per semester. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 142 SHAKESPEARE: TEXT, PERFORMANCE, FILM. (3)

An introductory course in the works of the greatest dramatist of the English language, covering selected plays of Shakespeare in different periods and media, and tracing changes in their interpretation from his day to our own. Intended as a general humanities course for non-majors. Lecture. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 161 INTRODUCTION TO LITERATURE. (3)

An analytical rather than historical approach to literature, intended to deepen the student's insight into the nature and purpose of literature and to develop literary taste and judgment. Designed especially for nonmajors, this course satisfies no requirements of the English major. (Offered in Community College System only.)

"ENG 171 GLOBAL LITERATURE IN ENGLISH. (3)

A course exploring the diversity and significance of English literature from across the world. To what extent is English now a global language, no longer the property of any national group? How has fiction contributed to the process of internationalizing English? To answer these questions and others, this course examines the idea of global citizenship and cosmopolitan English through the work of some of the language's most compelling international novelists. Lecture. Offers credit for the UK Core requirement in Global Citizenship. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 181.

ENG 180 180 GREAT MOVIES (Subtitle required). (3)

A course introducing students to films of various genres and styles, from both historical and contemporary filmmakers, investigating a particular issue or theme. Topics vary by semester and are chosen by faculty to give a broad-based understanding of important cinematic works and trends. Intended as a general humanities course for non-majors. Lecture. See departmental listings for different offerings per semester. Does not fulfill ENG premajor requirement or provide ENG Major Elective credit. Provides ENG minor credit.

ENG 191 LITERATURE AND THE ARTS OF CITIZENSHIP. (3)

A survey and investigation of contemporary literature of modern American citizenship, with an emphasis on questions of race, religion, gender, sexuality, and socioeconomic class. Lecture. Offers credit for the UK Core requirements in either U.S. Citizenship or Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement or ENG Major Elective credit. Provides ENG minor credit.

ENG 201 ETYMOLOGY. (3)

A study of words and their fundamental values with reference to development of a writing vocabulary. (Same as JOU 250.)

"ENG 207 BEGINNING WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)

A beginning workshop in the craft of writing, teaching students how to read critically and how to revise work in progress. The students provide an audience for each others' work. Exercises involve practice in aspects of craft and promote experimentation with different forms, subjects, and approaches; outside reading provides models and inspiration. May be repeated under different subtitles to a maximum of 6 credits. Does not fulfill ENG premajor requirement. Provides ENG Major Elective credit and ENG minor credit. Required for ENG Imaginative Writing Option.

ENG 209 THE STRUCTURE AND USE OF ENGLISH. (3)

A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversies. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement and ENG minor credit. (Same as LIN 209.)

ENG 210 HISTORY OF THE ENGLISH LANGUAGE. (3)

A survey of the historical development of English from its Indo-European origins to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as LIN 210.)

ENG 211 INTRODUCTION TO LINGUISTICS. (3)

This course is an introduction to the scientific study of human language, with an emphasis on the fundamental principles of linguistic theory, and applications of these principles in the investigation of grammatical structure, language change, language universals and typology, writing systems. The course will also focus on the application of linguistic study to real-world problems, e.g. language and technology. Credit will not be given to students who already have credit for ENG 414G.

ENG 212 INTRODUCTION TO LINGUISTICS. (3)

This course is the second semester of a two-semester sequence introducing the study of Linguistics, the scientific study of human language as a system. This course focuses on the social aspect of human language as a system. Semantics, pragmatics, conversational interaction, language variation and register, dialects, linguistic aspects of sign languages, second language acquisition, and the acquisition of language by children. Prereq: ENG/LIN 211. (Same as LIN 212.)

ENG 221 INTRODUCTION TO LINGUISTICS: THEORETICAL FOUNDATIONS AND ANALYSIS. (3)

First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisite for most 500 level LIN courses. Prereq: Declared major or minor in Linguistics, ENG/LIN 210, ENG/LIN 211, or approval of instructor. (Same as LIN 221.)

ENG 230 INTRODUCTION TO LITERATURE. (3)

An introduction to literary analysis through close reading and argumentative writing. The course involves studying selected texts from several genres and investigating a unified theme or question. Lectures, seminars, discussions, and close reading exercises are designed to relate texts to contexts, and to use basic literary terms and concepts. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG premajor requirement. Provides ENG minor credit. Prereq: Graduation Requirement Course - credit is awarded to students meeting the GWR prerequisite.

ENG 231 LITERATURE AND GENRE. (3)

A course exploring one or two different literary forms or genres, i.e. the formal categories into which literary works are placed. Students will explore the conventions of each genre and their sub-genres. Attention will be paid to student writing.
A survey of British literature from the Anglo-Saxon period to the later seventeenth century, with emphasis on different genres, periods, and themes. Texts and authors covered may include Beowulf and Old English elegiac poetry; Middle English poetry and selections from Geoffrey Chaucer’s Canterbury Tales; Renaissance lyrics, sonnets, and narrative poetry; the drama of Shakespeare; selections from John Milton’s Paradise Lost; and more. Lecture. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 331.

ENG 242 SURVEY OF BRITISH LITERATURE II. (3)
A survey of British literature from the seventeenth century to the present, with emphasis on different genres, periods, and cultural characteristics of the later English literary tradition. Authors covered may include the Augustan poetry of John Dryden and Alexander Pope; the early and later Romantic movements; novelists and poets of the Victorian period such as Charles Dickens, Alfred Tennyson, and Elizabeth B. Browning; the early twentieth-century Modernism of Virginia Woolf and T. S. Eliot; and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 332.

ENG 251 SURVEY OF AMERICAN LITERATURE I. (3)
A survey of American literature from its colonial origins to the Civil War, with emphasis on different genres, periods, and cultural characteristics of the American Colonies and antebellum United States. The course explores both the social conditions in which authors lived and wrote — such as conflicts over land with Native Americans, slavery, and the emergence of women’s rights — as well as the key developments in literary form during this period, such as the rise of the novel, the slave narrative, and the changing shape of poetry. Texts and authors covered may include Susanna Rowson, Herman Melville’s Moby Dick, Frederick Douglass’s Narrative, short stories by Mark Twain and Edgar Allan Poe, the poetry of Walt Whitman and Emily Dickinson, and more. Lecture. Fulfills ENG major Historical Survey Requirement and Early Period requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 334.

ENG 252 SURVEY OF AMERICAN LITERATURE II. (3)
A survey of American literature from the Civil War to the present, with an emphasis on different genres, periods, and cultural characteristics of later periods in U.S. history. The course explores the changing social conditions in which American literature was produced — such as the Roaring 20’s, the Cold War, and the upheaval of the 1960’s — and several key literary movements, such as the Harlem Renaissance, Modernism, and Postmodernism. Texts and authors covered may include Edith Wharton’s House of Mirth, Nella Larsen’s Quicksand, Ernest Hemingway, Toni Morrison, the poetry of Marianne Moore and Elizabeth Bishop, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 334.

ENG 260 INTRODUCTION TO BLACK WRITERS. (3)
An introduction to written and oral works by Black authors of Africa, the Caribbean, and the United States. The course includes writers such as Chinua Achebe (Africa), Wilson Harris (Caribbean), and Toni Morrison (USA), as well as others from the diverse field of literature written by African-American authors and authors of color worldwide. Attention will be paid to student writing, particularly to devising a thesis, crafting an argument, and learning how to use supporting evidence. See departmental listings for different offerings per semester. Offers UK Core Credit for Intellectual Inquiry in the Humanities. Does not fulfill ENG premajor requirement. Can be taken for ENG Major Elective credit. Provides ENG minor credit. Credit will not be given to students who already have credit for ENG 264. Prereq: Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisite. (Same as AAS 264.)

ENG 261 SURVEY OF WESTERN LITERATURE FROM THE GREEKS THROUGH THE RENAISSANCE. (3)
A survey of African-American literature from the mid-eighteenth century to Reconstruction and after, with emphasis on selected genres, periods, and thematic characteristics of the early African-American cultural and literary experience. Topics include colonialism and abolitionism; early black aesthetics, narratives of enslavement, and drama, novels, and poetry. Authors may include Jupiter Hammon, Phillis Wheatley, William Wells Brown, George Moses Horton, Martin Delaney, Frederick Douglass, Harriet Wilson, Ellen Craft, and more. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.

ENG 266 SURVEY OF AFRICAN-AMERICAN LITERATURE. (3)
A survey of African-American literature from post-Reconstruction to the Black Arts Movement and beyond, with emphasis on selected genres, periods, and thematic characteristics of the later African-American cultural and literary experience to the present day. Topics include literature of the Reconstruction; poetry and dialect poetry, the “plantation tradition” and black musical traditions; Black Modernism and the Harlem Renaissance; the Black Power movement and Civil Rights. Authors may include Pauline Hopkins, Frances Harper, Sutton Griggs, Oscar Micheaux, W. E. B. Du Bois, Langston Hughes, Countee Cullen, Zora Neale Hurston, W. E. B. DuBois, Martin Luther King, Jr., Malcolm X, and others. Lecture. Fulfills ENG major Historical Survey Requirement. Provides ENG minor credit.
Course Descriptions

#ENG 330 TEXT AND CONTEXT (Subtitle required).
(3)
The core course in the English Major focusing on the close reading and analysis of a single major literary text, or a focused set of texts, in historical and critical context. Students will develop analytical and interpretive skills that deepen their historical and conceptual understanding of literature, as well as their skills of critical reading, writing, and presentation. See departmental listings for different offerings per semester. ENG major and minor requirement. Prereq: Either ENG 107, or ENG 209, or ENG 230.

†ENG 333 STUDIES IN A BRITISH AUTHOR OR AUTHORS (Subtitle required).

†ENG 336 STUDIES IN AN AMERICAN AUTHOR OR AUTHORS (Subtitle required).

#ENG 337 LITERATURE AND GENRE (Subtitle required).
(3)
An advanced course exploring one or two literary genres or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. the short story; lyric poetry; epic and mock-epic; autobiography; the bildungsroman; protest literature) or a genre specific to a particular period (e.g. mid-century American crime novels; Elizabethan songs and sonnets; Victorian drama). Provides ENG Major Elective credit and ENG minor credit. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 338 TOPICS IN LITERATURE (Subtitle required).
(3)
An advanced course exploring a focused literary topic across various periods, genres, styles, and media. It focuses on the creative connections in literature unified by a shared set of themes or topical concerns (e.g., narratives of travel; the family through history; stories about work and play; ethnic identities, nature and the natural world). Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 339 AUTHOR STUDIES (Subtitle required).
(3)
An advanced course exploring the works of a single important author of English literature, or literature in translation, from any period or nationality. It focuses on developing a strong familiarity with the oeuvre of a specific important writer. Provides ENG Major Elective credit and ENG minor credit. May be repeated to a maximum of 9 hours under different subtitles. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 341 CHAUCER AND HIS CONTEMPORARIES.

A course covering medieval English literature from around the years 1350-1450 and centering on the works of Geoffrey Chaucer (c. 1340-1400), particularly his early dream-visions and The Canterbury Tales. Other authors and texts may include William Langland’s Piers Plowman; the poetry of John Gower; Sir Gawain and the Green Knight and the works of the Pearl-Poet; Thomas Hoccleve; Margery Kempe; anonymous romances and Arthurian narratives; and more. Topics include courtly love and chivalry; Christian spirituality; women and gender roles; feudal politics and rebellion. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 342 SHAKESPEARE.

A course offering advanced study of a representative selection of Shakespeare’s plays across the length of his career. It situates Shakespeare within Renaissance theatre culture: the playhouses and audiences he wrote for, the structure of his acting company, and the patronage system that supported their business. Students will learn how his plays departed from received ideas about the plays of his contemporaries and how specific performances and historical contexts standardized performance as we understand it today. May fulfill ENG Early Period requirement depending on the course: see departmental listings for different offerings per semester. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 343 RENAISSANCE DRAMA AND SOCIETY.

(3)
This course studies Elizabethan and Jacobean drama by Shakespeare’s predecessors and contemporaries. Although most people identify Shakespeare as the representative Renaissance playwright, he was only one member of a distinguished generation. Students will encounter a variety of popular dramatic genres in which Shakespeare either did not work or that he heavily adapted to his own ends: Turk plays, city comedy, unperformed “closet drama,” revenge tragedy, pastoral. Readings may include playwrights such as Thomas Kyd, Christopher Marlowe, Elizabeth Cary, Lady Mary Wroth, Thomas Middleton, John Webster, and others; and topics such as tragedy and comedy, sex and romance, urban life and the value of money, and racial and religious difference. Fulfills the ENG Early Period requirement. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 345 BRITISH POETRY.

(3)
This course provides a selective encounter with the poetry of the British tradition. Texts and topics may be drawn from the later Renaissance (16th c.) through the present day, exploring the history, depth, and continued vitality of British poetry. Particular attention is paid to the formal and stylistic aspects of reading poetry in different periods and styles. Reading may include authors and texts such as the sonnets and songs of Philip Sidney and Shakespeare; the verse of John Milton and other seventeenth-century poets; Alexander Pope and his contemporaries; Victorians and pre-Raphaelites such as E. B. Browning and Christina Rossetti; Modernists such as Ezra Pound, W. B. Yeats, and H.D.; and contemporary British, Irish, and Scottish poets. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 347 THE RISE OF THE BRITISH NOVEL.

What is the novel and how did it begin? Why did it develop at a specific moment in history and what counted as fiction before that time? What makes one novel “literature” and another “trash”? In this course we explore the early decades of the novel to better understand prose fiction from its earliest days to the moment of its acceptance as a major art form. The course also addresses contemporary literature with works by Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Laurence Sterne, Frances Burney, Mary Shelley, Jane Austen (including selected cinematic adaptations), and more. Topics can include the novel in history and the history of the novel; the evolving cultural practices of novel-reading; eighteenth-century fiction and contemporary popular culture. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 348 VICTORIAN NOVELS AND THEIR WORLDS.

This course examines the development of the novel as a literary and cultural form at the moment of its greatest impact during the Victorian era (1837-1901). It focuses on the emergence of the realist novel and other modes that intersected and competed with it (e.g. the gothic, the supernatural, sensation fiction, the New Woman novel), to explore the complex ways that represented different realities. The course also addresses contemporary authors and texts such as Charles Dickens, Mary Elizabeth Braddon, Oscar Wilde, Olive Schreiner, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 349 MODERNISM.

(3)
A course on Modernist Literature: British, Irish and American writing from the first half of the twentieth century. Virginia Woolf once tried to explain modernism by claiming, “On or about December 1910 human character changed.” Much of the writing of the period might be read as an attempt to record and understand that change. Texts include the fiction, poetry, drama, and essays from writers such as Woolf, James Joyce, T. S. Eliot, W. B. Yeats, Ezra Pound, Wyndham Lewis and Gertrude Stein. The literature of the period will be examined in relation to various contexts and backgrounds, including the experience of war, the breakup of empire, and other major events and upheavals. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 352 AMERICAN LITERATURE AND CULTURES TO 1900.

(3)
This course focuses on selected literary movements and their relationships to American culture up through 1900. Authors may include Susanna Rowson, Nathaniel Hawthorne, Herman Melville, Walt Whitman, Harriet Jacobs, and Henry James. Topics may include American imperialism, slavery and abolition, the rise of the historical novel, Sentimentalism, Romanticism, and the emergence of psychological realism. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 353 AMERICAN LITERATURE AND CULTURES POST-1900.

(3)
This course focuses on selected literary movements and their relationships to American culture since 1900. Authors may include Edith Wharton, F. Scott Fitzgerald, Allen Ginsberg, Ralph Ellison, Toni Morrison, Thomas Pynchon, and others. Topics may include the literatures of World War I, the Cold War, the Beat Generation, the New Social Movements of the 1960’s, Postmodernism, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 355 AMERICAN POETIC TRADITIONS.

(3)
A course investigating contrasting traditions of American poetry from the nineteenth and twentieth centuries. Several poets are examined in within historical and literary contexts, and their poems examined in detail through close reading, with attention paid in particular to stylistic/ formal characteristics. Poets studied may include Walt Whitman, Emily Dickinson, William Carlos Williams, Wallace Stevens, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 357 CONTEMPORARY AMERICAN LITERATURE.

(3)
A course examining contemporary American fiction primarily since the 1970s and 1980s, as well as the diverse categories by which its critics and readers have sought to identify it: minimalism, hyperrealism, postmodernism, cyberpunk, the magical real. The class investigates contemporary authors in order to generate the key terms and problems for approaching work in diverse current genres, from science fiction and graphic novels to historical novels and self-consciously “literary” fiction. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

University of Kentucky

Course Descriptions

#ENG 359 THE KENTUCKY LITERARY HERITAGE. (3)
A course exploring the rich literary heritage of the Commonwealth of Kentucky and the greater Appalachian region, surveying its local history and diversity as well as its wider significance for American art. Authors covered may include early figures such as William Wells Brown, the first African-American novelist, and John Fox Jr., the first million-selling novelist; Robert Penn Warren, first Poet Laureate of the United States and author of All the King's Men; Elizabeth Maddox Roberts; Harriette Arnow, winner of the National Book Award in 1954 for The Dollmaker; contemporary novelists of the 60's and 70's such as Hunter S. Thompson, Gurney Norman, and Ed McClanahan; contemporary Kentucky writers such as Wendell Berry, Eric Recee, Bobbie Ann Mason, Sara Jeter Naslund, C. E. Morgan, Kim Edwards, and Gayle Jones; and contemporary award-winning poets such as Frank X Walker, Nikky Finney, and Maurice Manning. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 361 EARLY AFRICAN-AMERICAN LITERATURE. (3)
This course investigates selected writers of the early African-American tradition, primarily from the mid-eighteenth century to post-Reconstruction. Inquiry focuses on the literary modes and genres that were central to the creation of a distinct African-American literary voice and canon, including slave narratives, folklore, poetry, drama, and more. Authors can include Phyllis Wheatley, Frederick Douglass, Harriet Jacobs, William Wells Brown, Frances Harper, Charles Chesnutt, Martin Delany, Sojourner Truth, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 265 or 266 are recommended but not required.

#ENG 362 FLIGHTS TO FREEDOM: LITERATURE OF THE GREAT BLACK MIGRATIONS. (3)
Between 1910 and 1930 more than one million African Americans migrated from the rural South to the urban North. This course focuses on the development of African-American migration narratives from the slave era to the contemporary moment. It examines literary, musical, artistic, and journalistic representations of the Great Migrations that capture the experiences of African-Americans as they moved not only from the South to the North, but also from the South to the Midwest and the West in pursuit of better economic opportunities and political freedom. Readings are drawn from writers such as William and Ellen Craft, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, James Weldon Johnson, Jean Toomer, Nella Larsen, Ann Petry, Dorothy West, Pearl Cleage, August Wilson, Toni Morrison, Ishmael Reed, Colson Whitehead, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 260, 265, or 266 are recommended but not required.

#ENG 368 CONTEMPORARY AFRICAN-AMERICAN VOICES. (3)
Encompassing an array of genres and forms, this course examines black culture, literature, and performance from mid-20th century to present. It engages aesthetic, critical, and political issues related to seminal periods such as the Black Arts Movement of 1960's, the Third Renaissance of 1980's-90's, and the ascent of the first U.S. president of African descent. This course examines how forms of performance such as folklore and work songs, the blues, jazz, and rap, all shape cultural and literary production. Authors may include Lorraine Hansberry, Ernest Gaines, Gloria Naylor, Ice Cube, Cornell West, Marlon Riggs, Tupac, India Arie, Percival Everett, Nikky Finney, Natasha Trethewey, Barack Obama, and others. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 369 AFRICAN AMERICAN WOMEN'S WRITING. (3)
This course analyzes the literary and visual representation of black women from the nineteenth to the twenty-first century. It explores how selected writers, working across different genres, render black female characters in ways that perpetuate, contest, or subvert stereotypical images of women. Authors can include transatlantic political or literary movements, border studies, multinational literatures, or literatures of migration and diaspora. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 370 LITERATURE ACROSS BORDERS. (3)
A course examining literature as a product of multiple regional, national, and international contexts. How do texts, ideas, goods, and people move across borders? How are identities and genres produced through transnational dialogue and exchange? Possible areas of study include transatlantic political or literary movements, border studies, multinational literatures, or literatures of migration and diaspora. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

#ENG 380 FILM AND GENRE (Subtitle required). (3)
An advanced course exploring one or two film genres, styles, or formal categories. It focuses on analyzing the parameters and practices of a broad generic category (e.g. gangster films; documentaries; biographies; war films) or a genre specific to a particular period (e.g. early silent films; twentieth-century horror films). Viewing films outside of class is required. See departmental listings for different offerings per semester. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

#ENG 384 LITERATURE AND FILM. (3)
This course explores the relationship between two creative traditions, literature and film, focusing on film adaptations of literary works for the screen. Subjects can include the adaptations of works by a particular writer such as Shakespeare or Jane Austen, or it may range more widely among the thousands of innovative cinematic reimaginings of literary texts, e.g. Richardson's Tom Jones, Altman's Short Cuts. In some semesters the course may focus on a particular topic or genre and its treatment in both literary and cinematic texts, or on a particular moment when filmmakers asserted strong mutual influence (such as Hollywood in the 1920's). Viewing films outside of class is required. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent. ENG 280, 284, or 285 are recommended but not required.

#ENG 391 LITERARY THEORY. (3)
Since the 1940's "literary theory" has emerged as a vibrant and vital aspect of literary studies. The term covers a wide range of formal, historical, and critical approaches to literature and culture that have changed the ways we read. This course investigates selected trends and schools of modern literary theory in diverse texts and contexts. These can include formalism, Practical Criticism, and the New Criticism; French Structuralism and the various modes of post-structuralism (Semiotics, Deconstruction, Reader-response, Speech-act theory); historicism and the New Historicism; as well as broader modes of cultural critique such as Feminism, Marxism, Critical Theory and the Frankfurt School; Post-colonialism, Critical Race Theory, and more. Provides ENG Major Elective credit and ENG minor credit. Prereq: Completion of UK Core Composition and Communication I-II requirement or equivalent.

*ENG 395 INDEPENDENT WORK. (1-3)
For undergraduate majors in English with high standing. Students pursue an independent course of study, tutorial, or directed project under the guidance of a faculty member, with appropriate assessment and grading (e.g., term papers, examinations, final project). Projects are generally proposed and arranged by students themselves, reflecting individual interests and goals. Prereq: ENG 330 Text and Context, or consent of the instructor. This course may be repeated to a maximum of 6 credits. See departmental listings for different offerings per semester. May be repeated to a maximum of 6 credits. Contact the Director of Undergraduate Studies for information. Provides ENG Major Elective credit.

*ENG 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3)
Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature, cultural critique, and composing law and justice. Topics announced the preceding semester. May be repeated under different subtitles to a maximum of 6 credits. Prereq: Completion of UK Core Composition and Communication I-II requirement and consent of instructor. (Same as WRD 401.)

*ENG 405 EDITING ENGLISH PROSE. (3)
This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student's own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and acquisition of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as WRD 405.)

*ENG 407 INTERMEDIATE WORKSHOP IN IMAGINATIVE WRITING (Subtitle required). (3)
Continued studies in the writer's craft, focusing on student work but with increased emphasis on outside reading. Areas of workshop practice include Poetry, Fiction, and Creative Non-Fiction. Prereq: ENG 207 or consent of instructor. May be repeated to a maximum of 9 credits. Provides ENG Major Elective credit and ENG minor credit. Can count only once for ENG Major 400-level course requirement. Required for ENG Imaginative Writing Option.

*ENG 440 STUDIES IN BRITISH LITERATURE: (Subtitle required). (3)
An advanced British Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

*ENG 450G STUDIES IN AMERICAN LITERATURE: (Subtitle required). (3)
An advanced American Literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major 400-level course requirement. Provides ENG Major Elective credit.

*ENG 460G STUDIES IN AFRICAN-AMERICAN LITERATURE: (Subtitle required). (3)
An advanced African-American literature course on a period, a theme, a genre, or one or more authors. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Provides ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.
**ENG 470G COMPARATIVE AND TRANSNATIONAL STUDIES IN LITERATURE:** (Subtitle required.)
An advanced literature course focusing on comparative or transnational periods, themes, genres, national or ethnic traditions, or one or more authors. Possible areas of study include transatlantic connections, diasporic communities, or comparisons between English language authors and foreign authors in translation. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 480G STUDIES IN FILM (Subtitle required.)
An advanced course in the history, analysis, criticism, and theory of film. Viewing of films outside of class is required. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. ENG 280 strongly recommended. Provides ENG Major Elective credit and ENG minor credit.

**ENG 488G GENDER AND SEXUALITY STUDIES:** (Subtitle required.)
A course on any aspect of gender and sexuality studies, in relation to selected texts. May be repeated to a maximum of 18 hours under different subtitles.†

**ENG 490G STUDIES IN LITERATURE AND GENDER:** (Subtitle required.)
An advanced course focusing on any aspect of gender in literary studies, such as gendered genre, gender issues in a particular literary period, masculinity, minority women writers, or feminist literary theory. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 491G STUDIES IN THEORY:** (Subtitle required.)
An advanced course on any aspect of literary or critical theory, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 492G CULTURAL STUDIES:** (Subtitle required.)
An advanced course on any aspect of cultural studies, in relation to selected texts. See departmental listings for different offerings per semester. May be repeated to a maximum of 9 hours under different subtitles. Prereq: ENG 330 Text and Context or consent of the instructor. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 495 MAJOR HONORS SEMINAR (Subtitle required.)
An advanced undergraduate seminar in literature, film, or cultural study. Honors seminar topics will be announced the preceding year. Required for graduation with Departmental Honors in English. Enrollment limited to junior and senior ENG majors. May be repeated up to 9 hours under different subtitles. Fulfills ENG Major 400-level course requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 507 ADVANCED WORKSHOP IN IMAGINATIVE WRITING (Subtitle required.)
For the student who has shown marked talent and commitment, this course provides a rigorous writing workshop among peers and includes additional attention to outside reading. Each student will produce a chapbook of poems or stories. See departmental listings for different offerings per semester. Prereq: ENG 407, or equivalent, and Consent or consent of the instructor. May be repeated with the same or different subtitle to a maximum of 6 credits. Required for the ENG Imaginative Writing Option under two different subtitles. Provides ENG Major Elective credit and ENG minor credit.

**ENG 509 COMPOSITION FOR TEACHERS.
A course covering the basic studies helpful to teachers of English composition at the secondary level. Focuses on the teaching of grammar, punctuation, usage, etc., and on theme planning, correction, and revision. Students are required to do a bit of writing. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC 509.)**

**ENG 512 ANALYSIS OF ENGLISH SYNTAX.
Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: ENG/LIN 221 or equivalent, or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as LIN 512.)

**ENG 513 TEACHING ENGLISH AS A SECOND LANGUAGE.
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of contrastive analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 513.)

**ENG 514 TEST MATERIALS AND METHODS.
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using their own materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/LIN 514.)

**ENG 515 INTRODUCTION TO OLD ENGLISH.
This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English, culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. (Same as LIN 518.)

**ENG 516 PHONOLOGICAL ANALYSIS.
**

**ENG 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE.
The course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English, culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. (Same as LIN 518.)

**ENG 519 INTRODUCTION TO OLD ENGLISH.
An introduction to the study of the Old English language and its literature from the 8th to the 11th centuries. Emphasis on learning the basic vocabulary and grammar of Old English in the West Saxon standard written dialect. Readings include excerpts from prose and poetry, the basics of Old English verse forms and alliterative poetry, and some historical and cultural background. The course is particularly recommended for students of European languages (especially German) and Linguistics; some basic background in Linguistics is recommended but not required. Fulfills ENG major Early Period Requirement. Provides ENG Major Elective credit and ENG minor credit.

**ENG 570 SELECTED TOPICS FOR ADVANCED STUDIES IN LITERATURE (Subtitle required.)
Study of special topics that cut across the normal divisions of genre or periods, such as the relations of literature to other disciplines; metaphor and symbolism; interpretative theory. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor.

**PROSEMINARS:
The purpose of the proseminars (600 level) is to impart through lectures and discussion both the facts of literary history and the techniques of literary analysis. They are, therefore, designed to provide the more information level to techniques of contemporary literary criticism and scholarship.

**ENG 600 BIBLIOGRAPHY AND METHODS OF RESEARCH.
An introduction to descriptive and enumerative bibliography, textual criticism, and historical scholarship.

**ENG 601 ESSAYS AND CREATIVE NONFICTION.
Study and practice in nonfiction writing, including literary nonfiction, literary journalism, personal essays, and creative nonfiction. May not be repeated for graduate credit. Prereq: Admission to the graduate program or consent of instructor.

**ENG 605 EDITING.
ENG 605 offers instruction in the history of U.S. publishing and extensive practice in verification of sources, fact checking, copy editing, and manuscript preparation. Prereq: Admission to Graduate School or consent of instructor.

**ENG 607 GRADUATE WRITING WORKSHOP (Subtitle Required.)
A course for experienced writers who have some knowledge of contemporary American literature. Each emphasis on students’ original work and outside reading. Each student will produce a chapbook of poems or stories and write a short introduction to it. May be repeated with the same subtitle to a maximum of six credits. Prereq: Consent of instructor.

**ENG 609 COMPOSITION FOR TEACHERS.
A course in the theory and practice of teaching English composition at the college level. Required of first-year teaching assistants in the Department of English, the course is structured to match the ordering of the English 101 so that the practical work of college writing and the theoretical considerations of English 609 will be mutually reinforcing.

**ENG 610 STUDIES IN RHETORIC.
This course extends the theories of rhetoric with readings drawn from major rhetoricians and rhetoricians; applies theory to the practice of teaching college writing, with special emphasis on argumentation, the subject of English 102; and provides an opportunity for teaching assistants to get help from the teacher and from their peers in responding to and evaluating students’ written work. This course, required of second semester teaching assistants in the Department of English, continues the work of English 609. Prereq: ENG 609 or equivalent.

**ENG 611 LITERATURE AND TEACHING SEMINAR.
This seminar prepares graduate students to teach literature classes at the University of Kentucky and elsewhere. It offers instruction and guidance in curriculum design, syllabus creation, reading and work exercises, and more. Students develop a portfolio of course materials and refine their skills for teaching literature and film at the introductory as well as advanced levels of an undergraduate curriculum. This course is not a requirement for completing the Ph.D. degree, but it is required for graduate instructors to be approved to teach their own introductory-level literature and film classes in the University of Kentucky English Department curriculum.

**ENG 612 STRUCTURE AND STYLISTICS OF FRENCH.
A study of the history and structure of French with an emphasis on contemporary features. (Same as FR/LIN 612.)

**ENG 618 HISTORY OF THE ENGLISH LANGUAGE.
An intensive study of the change of English from an Old English to an analytic language, from its origin in Indo-European to its current stage of development. Emphasis is on changes in phonology, morphology, syntax, and semantics, from Old to Early-Modern English.
ENG619 BEOWULF. (3)
Translation and study of Beowulf. ENG 518 or ENG 519 recommended as background courses.

ENG620 STUDIES IN MIDDLE ENGLISH LITERATURE. (3)
A study in depth of selected writers and movements.

ENG621 STUDIES IN CHAUCER. (3)
A study in depth of selected works of Chaucer, especially Troilus, in relation to aspects of the medieval literary tradition.

ENG622 STUDIES IN RENAISSANCE LITERATURE: 1500-1660. (3)
Intensive study of selections from the drama, poetry, and prose of the period.

ENG625 STUDIES IN RENAISSANCE DRAMA EXCLUSIVE OF SHAKESPEARE. (3)
A study in depth of selected writers.

ENG626 STUDIES IN SPENSER, SHAKESPEARE, MILTON. (3)
Intensive study of one or more major authors and the relevant criticism and scholarship. Prereq: ENG 425 or ENG 426 or ENG 428 or equivalent.

ENG630 STUDIES IN ENGLISH LITERATURE: 1660-1720. (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG631 STUDIES IN ENGLISH LITERATURE: 1720-1780. (3)
Comprehensive study of broad topics, normally limited to an intensive survey of the literature and scholarship of the period as a whole.

ENG635 STUDIES IN ROMANTICISM. (3)
Readings in selected authors and relevant scholarship.

ENG638 STUDIES IN VICTORIAN LITERATURE. (3)
Readings in the poetry and prose non-fiction of the period with relevant scholarship.

ENG642 STUDIES IN MODERN BRITISH LITERATURE. (3)
Selected writers, works, and movements in the modern period with concentration on the period from 1890 to 1945.

ENG651 STUDIES IN AMERICAN LITERATURE BEFORE 1860. (3)
A study in depth of selected writers and movements.

ENG652 STUDIES IN AMERICAN LITERATURE: 1860-1900. (3)
A study in depth of selected writers and movements.

ENG653 STUDIES IN AMERICAN LITERATURE SINCE 1900. (3)
A study in depth of selected writers and movements.

ENG656 BLACK AMERICAN LITERATURE. (3)
An in-depth study of black American literature, with concentration on major texts by major black writers. (Same as AAS 656.)

ENG660 MODERN CRITICAL THEORY (Subtitle required). (3)
Detailed examination of one or another topic in contemporary theory of interpretation, such as literature and analytical philosophy, phenomenology and literature, structuralism, Marxism, psychoanalysis. May be repeated up to 6 credit hours under different subtitles.

ENG681 STUDIES IN FILM. (3)
Comprehensive study of the history, theory, and criticism of film, with concentration on a series of major American and foreign films. Viewing of films outside of class is required.

ENG682 STUDIES IN FICTION. (3)
A study in depth of selected types of fiction.

ENG690 STUDIES IN LITERATURE AND GENDER (Subtitle required). (3)
This course focuses on gender as a primary category for literary analysis. Topics will vary, from a group of authors, an historical period or an aesthetic movement, to a genre, a theme, or an aspect of literary theory. May be repeated under different subtitles to a maximum of six credits.

ENG691 READINGS IN RHETORIC (Subtitle required). (1)
This reading course allows graduate students to integrate readings in Rhetoric and Composition scholarship and provides an opportunity to discuss research with faculty associated with Rhetoric and Composition. In addition to readings, students will be expected to keep a reading journal or complete a brief annotated bibliography. May be repeated to a maximum of three credits. Prereq: ENG 609 and ENG 610 or consent of instructor.

ENG700 TUTORIAL FOR PH.D. CANDIDATES. (3)
This course allows Ph.D. candidates who have completed all course work requirements to work together under the direction of a senior faculty member in preparing for and taking the Qualifying Examination. May be repeated to a maximum of twelve credits. Prereq: Admission to the Ph.D. program and instructor’s consent.

ENG720 SEMINAR IN MEDIEVAL LITERATURE. (3)
Recent topics: medieval fiction; Chaucer and the Gothic mind. May be repeated to a maximum of six credits.

ENG722 SEMINAR IN RENAISSANCE STUDIES (Subtitle required). (3)
Advanced work on a specific author or topic. Recent topics: Eco-Milton, Romance narrative. May be repeated to a maximum of nine credits.

ENG730 SEMINAR IN 18th CENTURY LITERATURE. (3)
Recent topics: neoclassic satire. May be repeated to a maximum of six credits.

ENG735 SEMINAR IN ROMANTIC LITERATURE. (3)
Recent topics: Keats; Wordsworth. May be repeated to a maximum of six credits.

ENG738 SEMINAR IN VICTORIAN LITERATURE. (3)
Seminar in Victorian literature. May be repeated to a maximum of six credits.

ENG740 SEMINAR IN 20th CENTURY BRITISH LITERATURE. (3)
Seminar in 20th century British literature. May be repeated to a maximum of six credits.

ENG748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ENG749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

ENG750 SEMINAR IN COLONIAL LITERATURE. (3)
Seminar in Colonial Literature; may be repeated to a maximum of six credits.

ENG751 SEMINAR IN AMERICAN LITERATURE: 1800-1860. (3)
Seminar in American literature 1800-1860. Recent topics: Emerson and Melville; Hawthorne. May be repeated to a maximum of six credits.

ENG752 SEMINAR IN AMERICAN LITERATURE: 1860-1900. (3)
Seminar in American literature 1860-1900. Recent topics: Whitman and Dickinson. May be repeated to a maximum of six credits.

ENG753 SEMINAR IN AMERICAN LITERATURE SINCE 1900. (3)
Seminar in American literature since 1900. Recent topics: Faulkner, Wolfe, and Warren. May be repeated to a maximum of six credits.

ENG767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying exam. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ENG768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ENG769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indeﬁnitely.

ENG771 SEMINAR IN SPECIAL TOPICS (Subtitle required). (1-3)
Seminar in special topics; includes genres and subject matters such as symbolisim which cover more than one period of literature. Recent topics: symbolism and allegory. May be repeated up to 8 credit hours under different subtitles.

ENG780 DIRECTED STUDIES. (1-6)
Independent work devoted to study and research on specific subjects and problems according to the interests and needs of individual students. May be repeated to a maximum of nine credits. Permission of chairperson required.

ENG781 SEMINAR IN FILM (Subtitle required). (3)
Seminar in special topics in film, such as directors, genres, historical periods, film and literature, film theories, and film movements. Viewing of films outside of class is required. May be repeated under different subtitle to a maximum of six credits. Prereq: ENG 681 or consent of instructor.

ENS Environmental Studies

ENS 200 INTRODUCTION TO ENVIRONMENTAL STUDIES. (3)
A broad-ranging multidisciplinary introduction to current environmental issues and problem solving presented through a series of case studies. Case studies incorporate contemporary environmental themes including industrialization, resource use, and pollution; changing land use patterns; global warming and deforestation; biodiversity; political regulation; economic resources; cultural attitudes toward nature. Each case study will present environmental issues as scientific problems with social, political, philosophical, and economic causes and consequences. Emphasis is placed on understanding and combining different approaches to environmental problems and on proposing public policy solutions.
Course Descriptions

University of Kentucky

MINT 300 SPECIAL TOPICS (Subtitle required). (1-4)
Special topics in environmental studies. This course permits the offering of special topics in order to reflect the changing needs of faculty specialties. Course topic must be approved by the Environmental Studies Program Director. Prereq: Variable, when topic is identified.

ENS 395 INDEPENDENT WORK. (1-4)
Under special conditions selected students may investigate specific environmental issues and problems. The instructor and the student will agree on a formal semester plan/learning contract, which will be filed with the Environmental Studies Program Director and include weekly reports to the instructor. Prereq: Environmental Studies minor, 3.0 G.P.A., consent of instructor.

ENS 400 SENIOR SEMINAR (Subtitle required). (3)
This course will draw on your interdisciplinary understanding of environmental issues and your problem-solving capacities developed while fulfilling Environmental Studies Minor requirements. It is a participatory capstone seminar designed to utilize and test your critical ability for independent thinking organized around specific environmental issues. Independent library work and writing assignments will be required in order to prepare for weekly, interactive topical seminars and to culminate in individual term papers/projects on different aspects of the environmental issues under discussion. Specific topics will vary. Prereq: ENS 200 and 12 hours of course work from approved Environmental Studies courses (or instructor’s consent).

ENT Entomology

ENT 110 INSECT BIOLOGY. (3)
Overview of the biology of insects. Emphasizes how this enormously abundant and important group of animals has resolved the basic challenges of survival and reproduction. Principles of physiology, behavior, ecology, and evolution are introduced using insects as examples. The roles of both beneficial and detrimental insects will be discussed.

ENT 300 GENERAL ENTOMOLOGY. (3)
Fundamentals of basic biology and relationships among insects, plants, and other organisms; identification of commonly encountered insects. Beneficial and detrimental effects of insects are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: One course in introductory biology. (Same as BIO 300.)

ENT 310 INSECT PESTS OF FIELD CROPS. (3)
Identification, life histories and control of insects attacking field crops, especially those of importance in Kentucky. The damage that these insects cause, the reasons for their abundance, and alternatives in control practices will also be emphasized. Lecture, two hours per week; laboratory, two hours per week.

ENT 330 AGRICULTURAL ENTOMOLOGY. (3)
A detailed coverage of the insects and mites attacking turf, ornamentals, greenhouse plantings, vegetables and fruits, with emphasis on field recognition of the pests and their damage. Lecture, two hours per week; laboratory, two hours per week.

ENT 340 LIVESTOCK ENTOMOLOGY. (2)
Biological and behavior of insects and other pests attacking livestock, poultry, pets and wildlife. Current control methods are discussed. For students interested in livestock production, farm management, dairy science, poultry science, and pre-veterinary medicine, as well as general agriculture.

ENT 360 GENETICS. (3)
The basic principles of heredity as currently understood from evidence accumulated in classical, cytogenetic, molecular, and quantitative genetic experiments. Emphasis is placed on a thorough understanding of genetic principles and the relationship of genetics to all biological disciplines. Prereq: Six credits in biological sciences and one course in general chemistry. (Same as ABT/ASC 360.)

ENT 395 INDEPENDENT WORK. (1-3)
Special problems for individual students who are capable of pursuing independent investigations in the various areas of entomology. May be repeated to a maximum of six credits. Prereq: ENT 300.

ENT 399 FIELD-BASED COMMUNITY-BASED EDUCATION. (1-6)
Field-based or community-based experience in entomology under supervision of a faculty member. Pass/No Credit. Prereq: Permission of faculty member and department chairperson and completion of a departmental learning agreement before registration.

ENT 402 FOREST ENTOMOLOGY. (3)
The principles of forest entomology, including the detection, collection, identification, appraisal of damage, and control of forest insect pests. Lecture, two hours; laboratory, two hours. Prereq: One year of biology or consent of instructor. (Same as FOR 402.)

ENT 460 INTRODUCTION TO MOLECULAR GENETICS. (3)
Molecular genetics is the study of the biochemical basis of heredity and focuses on the structure and expression of DNA at the molecular and cellular level. The course will provide a detailed understanding of the biochemical events involved in genome replication, prokaryotic and eukaryotic transcription, and translation of DNA, as well as RNA processing, recombination, and the theoretical underpinnings of genetic engineering. Prereq: ABT/ASC/ENT 360 or BIO 304 or consent of instructor. (Same as ABT 460.)

ENT 461 INTRODUCTION TO POPULATION GENETICS. (3)
This survey course examines the population dynamics and equilibria of genes in nuclei, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT 360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/FOR 461.)

ENT 530 INTEGRATED PEST MANAGEMENT. (3)
Principles of insect damage, populations and distributions. Various types of natural and applied control, including problems of insecticide toxicity, resistance and residues. Prereq: ENT 300 or ENT 310 or ENT 320.

ENT 550 SPIDER ECOLOGY AND BEHAVIOR. (3)
Spiders are fascinating in their own right, and also are major predators in terrestrial food webs. This course examines the ecology and behavior of spiders as model predators in systems ranging from undisturbed forests and meadows to agroecosystems and the urban landscape. While focusing on spiders, the course also intertwines two general sub-themes: (1) the advantages of employing diverse approaches (e.g. field and laboratory experiments, non-manipulative observations, and meta-analyses) in ecological and behavioral research; and (2) the strengths, and limitations, of using model organisms to develop and test theory. Prereq: One year of undergraduate biology.

ENT 561 INSECTS AFFECTING HUMAN AND ANIMAL HEALTH. (3)
Discussion of arthropod parasites and disease vectors. Topics include an overview of disease transmission and public health, epidemiology, vector biology, important arthropod groups and their control. Prereq: One year of biology. (Same as BIO 561.)

ENT 563 PARASITOLOGY. (4)
Protozoan, helminth and arthropod parasites of man and domestic animals, emphasis on etiology, epidemiology, methods of diagnosis, control measures, and life histories. Techniques of host examination and preparation of material for study. Prereq: BIO 150, 151, 152, 153 or consent of instructor. (Same as BIO 563.)

ENT 564 INSECT TAXONOMY. (4)
A study of insect taxonomy including the collection, preparation, and identification of adult insect specimens. Prereq: Consent of instructor. (Same as BIO 564.)

ENT 568 INSECT BEHAVIOR. (3)
The principles of animal behavior will be stressed using insects as examples. Physiology, mechanisms, behavioral ecology and evolution of insect behavior will be covered. Prereq: One year of biology. (Same as BIO 568.)

ENT 574 ADVANCED APPLIED ENTOMOLOGY. (4)
The objective of this course is to present the student with advanced concepts of applied entomology in a system-specific context. Each week, the insect problems associated with a different commodity/production system will be presented so as to illustrate a different broadly-based theme. Prereq: An introductory entomology course and consent of instructor.

ENT 605 EMPIRICAL METHODS IN ECOLOGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, chemical ecology, behavioral studies, motion analyses, using high-speed video, image analysis for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/FOR 605.)

ENT 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include: graphical analyses, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/FOR 606.)

Course Descriptions

EPE 558 GATHERING, ANALYZING, AND USING EDUCATIONAL DATA II. (3)
The course covers applications of statistical and graphical methods for educational and
data analysis. Topics to be covered include descriptive statistics, correlation, normal
distribution, hypothesis testing, regression, ANOVA, and power. General goals include:
developing an understanding of statistical concepts, improving reasoning and critical thinking
skills, and to prepare for more advanced quantitative courses. Students will gain valuable
statistical computing skills via statistics software. Prereq: EDP/EPE 557 or equivalent. (Same as
EDP 558.)

EPE 601 PROSEMINAR. (1)
Introductory survey of the bibliographic parameters and research approaches to educational
policy studies and evaluation. Graduate faculty resources and typical research problems are
introduced. Emphasis upon significance and importance of thesis writing and dissertation in
graduate studies. Required, first semester of study, for all degree students in the department.
Prereq: Graduate standing or consent of instructor.

EPE 602 SOCIAL POLICY ISSUES AND EDUCATION. (3)
Study of philosophical, historical, and sociological dimensions of contemporary educational
policy issues. Topical policy controversies, such as equality of educational opportunity, tuition
credits, and religious education, will be examined.

EPE 603 POLITICS OF EDUCATIONAL LEADERSHIP. (3)
This course provides a study of the political contexts in which educational leaders must operate.
The course explores the roles of policy actors, institutions, ideologies, and competing interests,
both internal and external to education institutions. The course places emphasis on the ways
that race, class, and income factor into political decision making in education. Prereq: Graduate
standing. (Same as EDL 704.)

EPE 612 INTRODUCTION TO HIGHER EDUCATION. (3)
This course is intended to give the student a broad overview of contemporary higher education.
The course examines major trends, issues, and problems facing colleges and universities from a
variety of perspectives, including historical, administrative, social, and cultural. The primary objectives of the course are to assist the student in developing an understanding of 1) various components and operations of higher education and 2) the interaction of these components and operations.

EPE 619 SURVEY RESEARCH METHODS IN EDUCATION (Subtitle required). (3)
Survey research is one of the most common and useful methods for gathering data in educational
research. Obtaining valid and reliable research results requires the administration of instruments
that provide valid and reliable measures of the variables selected for observation. This course
will focus on principles of measurement and procedures for developing a variety of survey
instruments and for determining their validity and reliability. It is designed to teach students
both how to improve the questions and design instruments. The theory and practice of survey
research relies on confirmations from disciplines such as psychology, sociology, statistics, and
computer science. The purpose of this course is to familiarize participants with basic features of
the design and implementation of surveys, and acquaint them with some principles and
underlying theory from disciplines that have traditionally used surveys most heavily. The
course will cover major stages of the survey process, including hypothesis and problem
formulation, study design, sampling, questionnaire design, interviewing techniques, pretesting,
modes of data collection, and data cleaning, management, and analysis. The course involves
lectures, readings, and discussions. Students are encouraged to bring materials related to their
own research interests. The course will provide an overview of the theoretical and experimental
literature related to question and questionnaire design as well as focusing on practical issues in
the design and administration of surveys that are not taught in formal courses. There will be exercises both in and outside of class to reinforce both theory and practice.
Prereq: EPE/EDP 557 or an equivalent course; an introductory statistics course.

EPE 620 TOPICS AND METHODS OF EVALUATION. (3)
An examination of a subset of evaluation methods, topics, and problems. An introductory
course in the area with minimal emphasis on quantitative methods. The course is designed to:
provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EDP 620/SOC 622.)

EPE 621 ADVANCED TOPICS AND METHODS OF EVALUATION. (3)
An advanced course in evaluation methods and techniques with an emphasis on quantitative
methodology. State of the art ideas and methods of conducting evaluation studies and analyzing
data from those studies are presented. The course is designed primarily for those who are
conducting or will conduct evaluation studies. Prereq: A basic course in statistics or its
equivalent; EDP/EPE 620/SOC 622; and consent of instructor. (Same as ANT/EDP 621.)

EPE 622 COLLEGE AND UNIVERSITY FACULTY. (3)
This course considers college and university faculty in their roles as researchers, teachers, and
community/institutional servants. The class considers from various theoretical perspectives who faculty are, what they do, and how they relate to the environments and cultures in which
they work. Prereq: EPE 612 or consent of instructor.

EPE 628 ETHICS AND EDUCATIONAL DECISION MAKING. (3)
Examination of ethical theories upon which educational evaluations are based and upon which
they become the basis for educational policies. Theories considered include classical and rule
utilitarianism, Rawlsian social justice, behavioristic, critical, and hermeneutic theories of value.
Prereq: EPE 603 or consent of instructor.

EPE 632 STUDENT SERVICES. (3)
This course focuses on student services (broadly defined) and those who work with college
and university students outside of the academic arena. The course not only surveys the history of
student services but critically examines its theoretical bases and current practices with special
attention paid to the relationship between student services and other segments of campus.
Prereq: EPE 612 or consent of instructor.

EPE 640 PHILOSOPHY OF EDUCATION. (3)
The course is designed to enhance the professional educator’s competence in analyzing and
evaluating educational policies and programs. Theoretical frameworks, philosophical methods,
and current educational debates are examined. May be repeated once to a maximum of six credits.
Prereq: Twelve semester hours in education or permission of instructor.

EPE 651 HISTORY OF EDUCATION IN THE UNITED STATES. (3)
A history of the growth and development of education in the United States from earliest colonial
times to the present, including recent movements and trends.

EPE 652 HISTORY OF EDUCATIONAL THOUGHT. (3)
Description and critical examination of the core ideas of leading educational theorists in the
history of Western culture. Emphasis upon the societal and cultural conditions in which the
ideas emerged, and the relevance of these ideas to contemporary educational policy concerns.

EPE 653 HISTORY OF HIGHER EDUCATION. (3)
Social and institutional history of higher education which will include selected topics in
European culture and education and which will emphasize the development of the American
college and university.

EPE 660 RESEARCH DESIGN AND ANALYSIS IN EDUCATION. (3)
This is a statistics-oriented course that focuses on various aspects of regression analysis.
Topics to be covered include, but are not limited to, simple correlation and regression, multiple
regression (with or without interaction terms), regression diagnostics, logistic regression, etc.
The course aims to familiarize students with cleaning data for regression analysis, building
regression models, selecting the optimal regression model for the data in hand, gain requisite
foundation of knowledge necessary to learn more complex statistical tests and procedures, and
become more critical of statistical presentations in academic journals and the mass media.
Prereq: EPE/EDP 558 or consent of instructor. (Same as EDP 660.)

EPE 661 SOCIOLOGY OF EDUCATION. (3)
A study of schooling and education using basic analytic paradigms of sociology. Emphasis
on schools as formal organizations and education in a changing, technologically oriented and
segmented society. Prereq: SOC 101 or equivalent. (Same as SOC 661.)

EPE 663 FIELD STUDIES IN EDUCATIONAL INSTITUTIONS. (3)
Field research in an educational setting. Questions of theory, method, and application examined.
Students plan and implement a study under faculty supervision. May be repeated to a maximum
of six credits. Prereq: Consent of instructor.

EPE 665 EDUCATION AND CULTURE. (3)
An analysis of the cultural role and function of educational institutions and processes. Topics
considered include schooling as cultural transmission, the community context of education,
cross-narional studies of schools, and implications of anthropological approaches for teacher
training.

EPE 667 EDUCATION AND GENDER. (3)
The course examines the relationships between gender and education in U.S. society. The focus
will be on the formation and enactment of gender within social and educational institutions.
Using a variety of source materials and theories, we will address the following questions: How
and what do educational institutions teach about gender? And how do females and males
respond to these learning contexts? In what ways are social class, race and ethnicity important
to engendering our lives? How does schooling contribute to the differential experiences of
women and men in their transitions to adulthood in the domestic and waged labor forces? How
can education contribute to societal changes in sex equity?

EPE 669 ORAL HISTORY. (3)
This course is an introduction to oral history methodology and theory. It is designed for persons
intending to use oral and life history interviews in historical or other qualitative research. The
course examines how: oral history projects are initiated, projects are administered, interviews
are conducted, and oral history interviews are preserved in archives and libraries. The course
also explores the reliability of memory and the utilization of oral histories in public
presentations. Readings in the course focus on the development of oral history as a research
methodology. Assignments and discussions will provide experience with interviewing,
recording and transcribing, editing and publishing oral histories.

EPE 670 POLICY ISSUES IN HIGHER EDUCATION. (3)
A survey of modern tendencies in higher education: scope and development, objectives,
organization, administration, curricula, finance, faculty and student personnel. Designed
primarily for prospective college administrators, teachers, and registrars.

EPE 672 COLLEGE TEACHING AND LEARNING. (3)
A study of all phases of instruction at the college level. The course will include methods and
principles of teaching, utilization of materials in teaching, a consideration of the teaching-
learning process as it relates to the individual student, and the evaluation of student progress.
A comprehensive course for prospective college teachers.
EPE 674 THEORIES OF STUDENT DEVELOPMENT. (3)
A study of college student behavior, relationship of student personnel to college programs, organization and administration, evaluation, and research of college student personnel.

EPE 676 ORGANIZATION AND ADMINISTRATION OF HIGHER EDUCATION. (3)
Purposes and scope of higher education, organization, general administration, faculty administration, inter-institutional cooperation, allocation of financial resources, state systems of higher education.

EPE 678 ECONOMICS OF HIGHER EDUCATION. (3)
This course addresses issues of equity and efficiency by analyzing 1) how students, faculty and institutions are influenced by markets and incentives, 2) the economic impact of higher education on students and society, and 3) the financial management of institutions.

EPE 679 INTRODUCTION TO MEASUREMENT THEORY AND TECHNIQUES. (3)
This is a measurement-oriented course that focuses on introducing measurement theory and techniques used in education and evaluation. Topics to be covered include, but are not limited to, measurement models, bivariate measures of association, norms, standardized score scales, scaling, reliability, validity, item analysis, factor analysis, confirmatory factor analysis, test construction for affective and cognitive instruments, Item Response Theory, and Rasch. The course aims to familiarize students with measurement terminology, possess a detailed strategy for constructing an instrument suitable for research purposes, become familiar with statistical procedures and software for implementing measurement techniques, gain requisite foundation of knowledge necessary to learn more complex measurement models, and become more critical of measurement presentations in academic journals and the mass media. Prereq: EDP/EPE 660, EPE 621, or equivalent. (Same as EDP 679.)

EPE 680 POLITICS OF HIGHER EDUCATION. (3)
Survey and analysis of the political forces and processes which influence the development and implementation of higher education policies, financing and programs at the federal, state and institutional levels.

EPE 681 HISTORY OF THE UNIVERSITY: GOVERNANCE AND ITS LEGAL CONTEXT. (3)
Identification and analysis of the legal and governance issues in medieval, reformation and American colonial universities and their implications for contemporary issues of governance, autonomy and academic freedom.

EPE 682 HIGHER EDUCATION AND THE LAW. (3)
Case analysis regarding the university as a legal entity, private universities, the constitutionally autonomous university and other public universities, faculty rights, student rights, miscellaneous issues. Prereq: EPE 681 or consent of instructor.

EPE 683 AFFIRMATIVE ACTION AND FEDERAL REGULATION OF HIGHER EDUCATION. (3)
Affirmative Action as a legal concept; history and current application; sexual harassment; special codes; higher education desegregation cases and other miscellaneous issues including copyright, age discrimination, ADA and the Rehabilitation Acts. Prereq: EPE 682 or consent of instructor.

EPE 684 HIGHER EDUCATION AND ATHLETICS: AHISTORICAL ANALYSIS. (3)
Historical analysis of the politics, economics and philosophical implications of intercollegiate athletics programs as part of the American college and university.

EPE 685 THE RESEARCH UNIVERSITY. (3)
Historical analysis of the changing character, missions and roles of research universities in the United States. Emphasis will be on critical examination of large-scale sponsored research and graduate programs.

EPE 686 PHILANTHROPY AND HIGHER EDUCATION. (3)
Social, historical and philosophical perspective on the development of philanthropy as a significant factor in the character of American higher education and non-profit sector.

EPE 690 THE COMMUNITY COLLEGE. (3)
Comprehensive analysis of community colleges: history, current activity and future; demography, budget, administration. Prereq: EPE 612 or consent of instructor.

EPE 703 PREPARING RESEARCH PROPOSALS. (3)
The goal of this seminar is to provide advanced graduate students with individualized guidance and direction on the preparation of successful research proposals. Typically such proposals will involve masters theses, doctoral dissertations, or various forms of sponsored research. Prior to enrolling in the seminar, students will be expected to have successfully completed graduate level courses in research methodology, data collection techniques, and qualitative and/or quantitative data analysis procedures. Prereq: 6 hours graduate level research methods courses.

EPE 707 MULTIVARIATE ANALYSIS IN EDUCATIONAL RESEARCH. (3)
Multivariate statistics will prepare student to understand multivariate statistical methods and draw the link between statistics previously learned. Students will be able to conduct, interpret, and critique procedures such as factorial ANOVA, multiple regression, MANOVA, ANCOVA, MANCOVA, PCA, EFA, discriminant function analysis, logistic regression, canonical correlation, hierarchical linear regression, and multivariate analysis of change. Become familiar with statistical software for implementing multivariate procedures. Develop an understanding of the concepts, terms, and symbols used in multivariate statistics (e.g., Matrix Algebra, effect sizes). Gain an appreciation of the role of multivariate procedures in the research process. Gain requisite knowledge necessary to learn more complex statistical procedures. Prereq: EDP/EPE 660 or equivalent. (Same as EDP 707.)

EPE 711 ADVANCED QUANTITATIVE METHODS. (3)
This course is intended to familiarize students with advanced quantitative techniques. Topics include structural equation modeling, item response theory, Rasch modeling, hierarchical linear modeling, and data mining. Other specific analysis techniques may also be explored. Prereq: Intermediate Statistics. (Same as EDP 711.)

EPE 740 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

EPE 740 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

EPE 763 ADVANCED FIELD STUDIES. (3)
This course continues an exploration of qualitative research methods in the study of education. It focuses on advanced data collection techniques and particularly on methods of data analysis, representation and writing. The course revolves around an experiential core of individual student research projects. May be repeated to a maximum of six credits. Prereq: EPE 663, other introductory qualitative research methods courses or instructor’s permission.

EPE 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

EPE 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

EPE 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

EPE 773 SEMINAR IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Examination of selected problems in educational policy studies and evaluation. May be repeated to a maximum of three credits. Prereq: Consent of instructor.

EPE 778 SEMINAR IN HISTORY OF EDUCATION IN KENTUCKY. (3)
Emphasis upon implications of major trends in national historiography for needed research in education in Kentucky. Prereq: A graduate-level course in the history of education or consent of instructor.

EPE 785 INDEPENDENT STUDIES IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-3)
Independent study experience for advanced graduate students to investigate special problems and conduct research in educational policy studies and evaluation. Prereq: Permission of department chairperson required.

EPE 790 INTERNSHIP IN EDUCATIONAL POLICY STUDIES AND EVALUATION. (1-6)
Fomal assignment to an evaluation and/or policy analysis project in an appropriate educational setting. Student’s work directed and evaluated by both departmental faculty and on-site supervisor. Laboratory, 5-20 hours per week. May be repeated to a maximum of 12 credits. Prereq: Two 6 hours graduate course work in the department and permission of the director of graduate studies.

EPE 797 HISTORICAL RESEARCH ON EDUCATION. (3)
Advanced historical research and writing on issues in the study of education.

EPE 798 SEMINAR IN HIGHER EDUCATION. (3)
A critical study of selected problems in higher education. May be repeated to a maximum of nine credits but no more than three credits may be earned under the same title. Prereq: Consent of instructor.
**EPI** Epidemiology

**EPI 140 EPIDEMIOLOGIC STUDY DESIGN.** (3) This course provides students with advanced course material relevant to the planning and execution of epidemiologic studies in various designs. The course will cover study designs which employ routinely collected data on disease occurrence, such as would be undertaken in government agencies and health departments, and the classic etiologic study designs including the case-control, prospective cohort, retrospective cohort, nested case control, case-cohort and case-crossover designs. The course will focus considerable attention on measurement methods and measurement error, borrowing examples from the subfields of epidemiology including occupational, cardiovascular, and social epidemiology. Given current interest on multilevel methods of analysis, the class will discuss approaches to the incorporation of designing multilevel studies. Finally, we will consider recent advances in experimental epidemiology with consideration of controlled community trials. Prereq: CPH 605 or consent of instructor.

**EPI 150 RESEARCH METHODS IN EPIDEMIOLOGY AND BIOSTATISTICS.** (3) This course builds a broad array of skills that are useful for the design and development of research protocols and funding applications for peer review, and for the analysis of resultant scientific data. Prereq: BST 760, EPI 714, and BST 639.

**EPI 160 INFECTIOUS DISEASE EPIDEMIOLOGY.** (3) This course provides instruction about the epidemiological and microbiological characteristics of bacteria, fungi, prions, rickettsia and viruses causing emerging and infectious diseases. Prereq: Graduate student or consent of instructor.

**EQM** Equine Science and Management

**EQM 101 INTRODUCTION TO THE HORSE AND THE HORSE INDUSTRY.** (2) An introduction to the horse and its basic biology, behavior and conformation. Additional subjects related to breeds, activities, the industry and current issues will also be covered. Prereq: Restricted to Equine Science and Management majors.

**EQM 105 EQUINE BEHAVIOR AND HANDLING.** (2) This course covers basic equine behavior and how to handle horses safely in a variety of management situations. Students will use their understanding of equine behavior to develop management strategies and practices for all classes of horse. Prereq: EQM 101 and restricted to Equine Science and Management majors.

**EQM 351 EQUINE HEALTH AND DISEASES.** (3) This course will focus on health issues affecting the horse industry. Students will learn about the diseases and parasites affecting horses in Kentucky and across the nation. In addition, discussion will focus on management practices used in horse enterprises to reduce incidence of disease and maintain health for breeding horses, performance horses and the recreational horse. Prereq: EQM 105 and major in Equine Science and Management B.S. degree program.

**EQM 399 EQUINE SCIENCE AND MANAGEMENT INTERNSHIP.** (1-6) The equine internship is designed to provide students with experiences in career opportunities related to the horse industry. The internship gives students an educational experience that allows them to see the application of concepts learned in the classroom in an industry setting. Junior standing (minimum of 60 earned credits), at least 12 hours of EQM core courses, 40 hours of verifiable previous work experience in the equine industry, a GPA of 2.0 or above, and an approved learning contract.

**EQM 490 CAPSTONE IN EQUINE SCIENCE AND MANAGEMENT.** (3) Discussion of the major issues impacting today’s equine industry. Students will use concepts from core and discipline related courses to analyze a variety of scenarios related to the industry. The scenarios will range from production to enterprise management, but may also include issues that have the potential to impact all aspects of the industry. Prereq: Senior standing, major in Equine Science and Management degree.

**ER** Emergency Medicine

**ER 815 FIRST-YEAR ELECTIVE, EMERGENCY MEDICINE.** (1-3) With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Emergency Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass/Fail only. Prereq: Admission to first year, College of Medicine.

**ER 825 SECOND-YEAR ELECTIVE, EMERGENCY MEDICINE.** (1-4) With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Emergency Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass/Fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

**ER 843 EMERGENCY MEDICINE.** (4) This course will provide the students with an introduction to the field of Emergency Medicine, Emergency Medical Services (EMS), and the approach to the acutely ill or injured patient. The students will complete an ACLS class during this rotation. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical curriculum. (Same as MD 843.)

**ER 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6) With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine, permission or permission of the Student Progress and Promotions Committee.

**Approved electives: ER 850-899 ELECTIVE EMERGENCY MEDICINE**

---

**ES** Environmental Systems

**ES 600 ENVIRONMENTAL SYSTEMS SEMINAR.** (1) A series of presentations by experts in the field on environmental systems topics including topics from the fields of law, economics, social sciences, medicine, biology, engineering and physical sciences. May be repeated to a maximum of two credits.

**ES 610 ENGINEERING AND PHYSICAL SCIENCES IN ENVIRONMENTAL SYSTEMS.** (3) Earth systems: environmental impacts of natural and human processes; the role of water systems on the earth including surface water systems, groundwater systems, and water quality and contamination systems; the role of atmospheric systems on earth including the nature and source of air pollutants, meteorological principles, radiation balance, climatology and air pollution, and air pollution control methodology; and processes and principles involved in waste producing organizations. Prereq: Freshman chemistry.

**ES 620 ENVIRONMENTAL HEALTH.** (3) An introduction to the theory and practice of assessing, correcting, controlling, and preventing environmental health hazards that may adversely affect the health of current and future generations. Prereq: Undergraduate chemistry and biology, or permission of instructor. (Same as CHP 601.)

**ES 630 LEGAL, SOCIAL AND ECONOMIC SCIENCES IN ENVIRONMENTAL SYSTEMS.** (3) Jurisprudential history, ethics and rule of law, environmental economics, history of science, governmental structures, process for development and enforcement of standards, social/political implications of environmental systems, regulatory schemes for environmental control.

**EXP** Experiential Education

**EXP 396 EXPERIENTIAL EDUCATION.** (1-12) A community-based or field-based learning experience under the supervision of a faculty member. May be repeated to a maximum of 30 credits. Pass/Fail with departmental permission required for letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Career Center prior to course registration.

**EXP 397 EXPERIENTIAL FIELDWORK.** (1) A course designed for undergraduates involved in full-time internship studies. Students will be engaged in preprofessional positions such as internships and cooperative education under the supervision of a faculty member. Enrollment in the course constitutes full-time student status. Pass/Fail only. Laboratory, 20-40 hours per week. May be repeated to a maximum of 4 times. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Career Center prior to course registration.

**EXP 500 INTRODUCTION TO SERVICE-LEARNING.** (3) This interdisciplinary course is designed to introduce students to the theories, concepts, and practices of Service-Learning. Service-Learning is a form of experiential education which engages the students in enhancing the common good through the application of classroom learning to service. Prereq: Upper division status. (Same as MC 500.)

**EXP 650 GRADUATE LEVEL EXPERIENTIAL EDUCATION.** (1-9) A community-based or field-based learning experience under the supervision of a faculty member. Letter grade. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.

**EXP 651 GRADUATE LEVEL EXPERIENTIAL EDUCATION.** (1-9) A community-based or field-based learning experience under the supervision of a faculty member. Pass/Fail. Prereq: Completion of Experiential Education Learning Contract and submission of contract to Stuckert Career Center prior to course registration.
Course Descriptions

FA
Fine Arts

FA 501 ARTS-STUDY TOUR.
Domestic or foreign tour for intensive study of the arts in major cultural centers. Seminars, tours, and performances are planned according to specific itineraries. Attendance at all scheduled seminars on campus and arts events during the tour plus maintenance of a journal and completion of a substantial course project is required. May be repeated to a maximum of six credits.

FAM
Family Sciences

FAM 251 PERSONAL AND FAMILY FINANCE.
Management of personal and family financial resources throughout the lifespan. A study of individual and family finances as related to planning, credit, savings, investment, insurance, taxes, housing costs, transportation costs, retirement and estate planning.

FAM 253 HUMAN SEXUALITY: DEVELOPMENT, BEHAVIOR AND ATTITUDES.
An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexuality orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. FAM 253 is a University Studies Program Course. Prereq: Three hours in social or behavioral science.

FAM 254 LIFE COURSE HUMAN DEVELOPMENT.
An introduction to the basic principles of human development through the life course of the individual from conception to death, common life transitions, and social change shape people's lives from birth to death. Roles of family, school, peers, and work will also be examined in relation to human development. Emphasis will be placed on the general theories of human development and their relation to the life course.

FAM 350 CONSUMER ISSUES.
An in-depth study of consumer issues, rights, and responsibilities. An examination of how individual and societal decisions affect quality of life, including consumer safety, and the interactions of consumption, health, law, government regulations and the economy. Consumer education and financial literacy will also be emphasized.

*FAM 352 ISSUES IN FAMILY SCIENCES.
The scientific study of the family. Topics covered will include the important theoretical frameworks in family sciences, historical trends in marriage and family life, gender role theory, family life cycle theory, parenthood, communication, economics of family life, family wellness, capacity building, resource sustainability, integrative elements in life course development, conflict, divorce, stepfamilies and stepparenting, and family strengths. Students will analyze contemporary family issues and take informed, written positions on these issues. This course is required for all Human Environmental Sciences students and Family Sciences minors, and meets American Association of Family and Consumer Sciences accreditation standards. Prereq: FAM 251, 351, and 360, and junior or senior standing.

FAM 354 THE FAMILY IN CROSS-CULTURAL PERSPECTIVE.
Approaches the study of the family from a comparative perspective, emphasizing cross-cultural variability in the structure and function of family. Kinship, household formation, sex roles, and socialization are examined in the context of the family, as well as patterns of interaction, personality formation, and family pathology. Prereq: Declared majors or minors in Dept. of Family Sciences or SW. (Same as SW 354.)

FAM 357 ADOLESCENT DEVELOPMENT.
This course conducts an in-depth analysis of adolescent development and adjustment using an ecological, multi-contextual framework. The primary focus is on scholarship and empirical evidence from a number of disciplines that have direct bearing on the study of adolescent development, with a particular interest in applying a cross-cultural/national comparative lens. Prereq: Declared majors or minors in Dept. of Family Sciences, CTEED or consent of the instructor.

FAM 360 INTRODUCTION TO FAMILY INTERVENTION: WORKING WITH FAMILIES AND INDIVIDUALS.
Survey course to introduce students to the various skills, strategies and professional ethical issues involved with the family intervention process. Prereq: Consent of instructor.

FAM 390 INTRODUCTION TO RESEARCH METHODS.
An introduction to research design, methodology, instrumentation, and data analysis with emphasis on classical methods and the changing parental role over the life cycle. Prereq: Declared majors or minors in Dept. of Family Sciences.

FAM 402 ISSUES IN FAMILY RESOURCE MANAGEMENT.
Examination of family economics and management issues and analysis of their impact on the well-being of families across the major transitions of the family life-cycle. Particular emphasis will be given to family decision-making. Prereq: FAM 251 and declared majors and minors in Dept. Family Sciences.

FAM 403 MATE SELECTION THEORY AND RESEARCH.
(1-3) This course is designed to develop a basic understanding of mate selection theory and research. Processes in the U. S. and abroad will be explored. Sex, love, culture, values, and how these factors play into the process of mate selection will be covered. Students may enroll for 1, 2, or 3 credits.

FAM 473 FAMILY LIFE EDUCATION.
Historical development, current programs, and emerging trends in family life education with particular emphasis on programs and techniques for teaching sex education, marital relations, parenting and human development. Prereq: Declared majors and minors in Department of Family Sciences and FAM 360.

FAM 474 SPECIAL TOPICS IN FAMILY RESOURCE MANAGEMENT
(Subtitle required).

FAM 475 SPECIAL TOPICS IN FAMILY SCIENCES.
(1-3) Course will focus on selected topics drawn from various areas of family sciences taught by faculty members with special interests and competence. May be repeated to a maximum of six credits under different subtitles. Prereq: Consent of instructor.

FAM 486 FIELD EXPERIENCES IN FAMILY RESOURCE MANAGEMENT.
Field training in community setting. Opportunities for developing competencies in planning and conducting individual and small group experiences related to family resource management. Lecture, one hour; laboratory, seven hours per week. May be repeated to a maximum of six credits. Prereq: Senior standing and consent of instructor.

FAM 494 INDEPENDENT WORK IN FAMILY RESOURCE MANAGEMENT.

FAM 495 INDEPENDENT WORK IN FAMILY SCIENCES.
Intensive independent scholarship or training in family sciences may be repeated to a maximum of 12 credits. Prereq: FAM 251, 351, and 360, and junior or senior standing.

FAM 499 INTERNSHIP IN FAMILY SCIENCES.
Supervised internship, and capstone course for seniors, in a community, educational, Cooperative Extension, and/or research setting. Emphasis on observation, teaching, conceptualizing research problems, and developing competencies in providing service at the individual, family and/or community level. Students will be required to assist in designing, implementing, and evaluating research and programs related to family life. Presentations, research papers, outside speakers, and career guidance will be significant course components along with the laboratory hours. Lecture, two hours bi-weekly; laboratory, eight hours weekly. Prereq: Consent of instructor.

FAM 502 FAMILIES AND CHILDREN UNDER STRESS.
An investigation of the stressors and crises experienced by families and their members and their efforts to cope with them. Special attention is given to prevention, management and enrichment strategies. Implications for practitioners will be drawn from conceptual frameworks and recent research. Prereq: FAM 352 and declared majors or minors in Dept of Family Sciences or consent of instructor.

FAM 509 THE U.S. FAMILY IN HISTORICAL PERSPECTIVE.
A study of American family experience and values from its pre-industrial Anglo-European roots to the present. Using an interdisciplinary focus, the course will examine the shifting boundary between family and community and the interaction between domestic life and demographic, religious, and economic influences in American history. Prereq: FAM 353 or SOC 409 or equivalent, or consent of instructor.

FAM 544 CULTURAL DIVERSITY IN AMERICAN CHILDREN AND FAMILIES.
Study of cultural and linguistic diversity in American children and families, with special emphasis on Kentuckian children and families. Consideration of implications for working with young children and families in educational settings. Study of the variations in beliefs, traditions, values and cultural practices within American society, and their effects on the relationships between child, family, and school. Prereq: FAM 352; declared majors or minors in Dept. of Family Sciences or consent of instructor.

FAM 553 PARENT-CHILD RELATIONSHIPS ACROSS THE LIFE COURSE.
Exploration of the parenting process from a lifespan perspective. Current theory and research, with childrearing application, will be emphasized. Emphasis will be on parent education methods and the changing parental role over the life cycle. Prereq: FAM 352; declared majors and minors in Dept. of Family Sciences or consent of instructor.

FAM 554 WORKING WITH PARENTS.
Principles, techniques, and resources relevant to working with parents as individuals, couples, and families. Survey of related literature on parent effectiveness and parent education is included with relevant field experiences. Lecture, two hours; laboratory, two hours. Prereq: FAM 260 and six hours of 300 level or above in social and behavioral sciences or consent of instructor.

FAM 563 FAMILIES, LEGISLATION, AND PUBLIC POLICY.
A study of the impact of legislation and public policies on the well-being of the family. Emphasis on the involvement of individuals and families with policies and legal resources as a means for realizing satisfying lifestyles. Prereq: FAM 251, 352, and declared majors and minors in Dept. of Family Sciences or consent of instructor.

University of Kentucky 2013-2014 Undergraduate Bulletin 442
Course Descriptions

FAM 585 AGING AND ENVIRONMENT. (3)
Explores the elderly person’s changing experience of environment. Physiological, psychological, and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as GEO/GRN 585.)

FAM 600 WORKING WITH MILITARY FAMILIES. (3)
This course provides an overview of military work and family connections. Students will gain familiarity with the challenges unique to military individuals and families and the resources available to address them. Topics to be covered include: theoretical approaches to understanding the impact of military work on individuals and families; demographic profiles of and organizational demands on military service personnel and their families; military service and outcomes for children and adolescents, roles and challenges of military spouses; family policy in the military (including current formal and informal support structures and emerging trends in serving military families). Prereq: Graduate or advanced undergraduate standing and 6 hours of 300 level or above courses in social and behavioral sciences or consent of instructor.

FAM 601 FAMILY PROCESSES. (3)
Advanced study of typical family functioning across the family life course from a family process perspective, including examination of how “normal” differs according to family culture, structure, and history. Prereq: Family Science major.

FAM 622 THE FAMILY’S ROLE IN EARLY CHILDHOOD EDUCATION. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 622.)

FAM 624 PERSPECTIVES ON HUMAN SEXUALITY. (3)
An examination and study of historical and current perspectives of sexuality as it relates to behavioral patterns, cultural attitudes, social policy and practice. Prereq: Knowledge of human behavior and personality theory highly recommended. (Same as SW 624.)

FAM 640 USING THE DSM IN CFT ASSESSMENT. (3)
Students will be trained to use the Diagnostic and Statistical Manual of Mental Disorders (DSM) in family therapy assessment and practice. This will include a basic understanding of the process and procedures for diagnosing individual and family disorders, with the intent that students working with families in the context of a traditional mental health milieu will be able to make appropriate, basic diagnoses. Emphasis on assessing and treating disorders relating to family violence, child abuse, addictions, and substance abuse will be included.

FAM 652 READINGS IN FAMILY THEORY AND RESEARCH. (3)
Enter level course for graduate study of family theory and research. Conceptual frameworks and theoretical approaches are introduced and applied to an array of contemporary family issues, as identified through extensive readings of the empirical research literature. Prereq: Family Science major.

FAM 654 THE LIFE COURSE PERSPECTIVE ON FAMILIES AND INDIVIDUALS. (3)
Individual, family, and societal growth and change through the life span are examined using a life course perspective. The life course perspective emphasizes the interplay of human development, agency, linked lives, historical context, and timing of events. These five interlocking concepts will be understood through reading life course research and applying life course principles and concepts to issues in family sciences.

FAM 657 FAMILY SYSTEMS THEORY. (3)
An investigation into the evolution and development of family systems theory, beginning with general systems theory and extending into the current applications to family studies. Emphasis is upon evaluation of the theory and its derivatives together with relevant research pertaining to the theory. Prereq: Six hours in family-related social or behavioral sciences or consent of instructor.

FAM 660 ADOLESCENT DEVELOPMENT. (3)
A survey of theory and research in adolescent development with particular emphasis on the role of families and implications for working with adolescents. Prereq: Six hours in social or behavioral science.

FAM 661 AGING ISSUES AND FAMILY RELATIONS. (3)
The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various skin categories. (Same as GRN 660.)

FAM 666 HEALTH AND FINANCIAL ISSUES OF AGING FAMILIES. (3)
This course is designed to discuss health and financial security of older adults and develop empirical research from the perspectives of economics of individual aging and family relations. Emphasis is placed on the following topics: health status of the elderly, economic well-being of older Americans, intergenerational transfers of time and money, family care, giving and receiving, living arrangements, and empirical research for aging and family. Prereq: STA 570 or equivalent, or consent of instructor.

FAM 668 LOCATION OF FAMILY RESOURCES. (3)
Study of the contributors to and the recipients of family resources. Emphasis on the methods of assisting families to better allocate family resources through understanding money beliefs and attitudes and practicing financial planning strategies.

FAM 673 FAMILY LIFE EDUCATION. (3)
Demographic, social, economic, political, and professional issues related to emerging trends in family life education will be examined. Emphasis will be placed on the development, implementation, and evaluation of family life education curriculum materials. Prereq: FAM 690; FAM 652 or FAM 654; or consent of instructor.

FAM 685 PROFESSIONAL ISSUES IN COUPLE AND FAMILY INTERVENTION. (3)
Exploration and definition of the legal, ethical, and professional issues in the practice of couple and family intervention. Emphasis will be on developing professional skills, attitudes, and identity for couple and family intervention.

FAM 688 THEORY AND METHODS IN COUPLE AND FAMILY THERAPY. (3)
A survey of theories and methods used in couple and family therapy. Designed to provide students with a knowledge of the theoretical bases for couple and family therapy, including an introduction to procedures used to assess, diagnose and treat couple and family dysfunctions.

FAM 687 PRE-PRACTICUM: TREATMENT MODALITIES IN COUPLE AND FAMILY THERAPY. (3)
Phases of couple and family therapy process are presented both in theory and in case study analysis. The presenting problem, history of the problem, family history, identification of dysfunctional dynamics, goals, plan of treatment, and outcome/evaluation are emphasized within the context of organizing family therapy and phases of family therapy. Prereq: Admission to the CFT master’s program or consent.

FAM 689 FAMILIES IN CRISIS: INTERVENTION STRATEGIES. (3)
An examination of normative, crisis events experienced by families and appropriate clinical interventions. Both transitional and situational crisis events will be explored along with typical family dynamics. Emphasis will be placed on intervention strategies for clinicians. Prereq: FAM 501 or consent of instructor.

FAM 690 RESEARCH METHODS IN FAMILY SCIENCES. (3)
The study of research techniques and methodological problems involved in research on the family. Emphasis is placed on research concerning interrelations between the family and its environment, development within the family, and family dynamics. Prereq: Consent of instructor.

FAM 699 FIELD EXPERIENCES IN FAMILY SCIENCES. (1-3)
Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

FAM 703 ADVANCED THEORY AND RESEARCH IN FAMILY ECONOMICS AND MANAGEMENT. (3)
Advanced study of research and theories in family economics and management with special emphasis given to current issues. Conceptual frameworks developed by leaders in family economics and management are studied and applied through designing and carrying out an empirical study. Prereq: Graduate work in statistics and research methods.

FAM 740 COUPLE AND SEX THERAPY. (3)
Field training in a community setting related to family sciences to develop competencies in program planning, delivery, and evaluation. Student will work under the supervision of a faculty and a training site supervisor. May be repeated to a maximum of six credits.

FAM 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

FAM 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of FAM 769 residence credit following the successful completion of the qualifying exams.

FAM 752 SEMINAR IN FAMILY THEORY CONSTRUCTION. (3)
An advanced seminar focusing on the definition, evaluation and construction of family theory. Inductive and deductive theory construction strategies are surveyed, evaluated and applied. Prereq: FAM 652. (Same as SOC 752.)

FAM 755 ADVANCED THEORY AND DYNAMICS OF HUMAN DEVELOPMENT ACROSS THE LIFE COURSE. (3)
Critical investigation into the theories, processes, and research of human development across the life course. Prereq: FAM 654 or a graduate course in Human Development.

FAM 759 SPECIAL ADVANCED TOPICS IN FAMILY SCIENCES. (1-3)
Intensive study of advanced family sciences topics. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

FAM 763 PRIMARY PREVENTION IN FAMILY SCIENCES. (3)
Designed to provide students with a background in prevention science with applications in family science. Students will have knowledge of theoretical bases for couple and family therapy, including an introduction to procedures used to assess, diagnose and treat couple and family dysfunctions.
FAM 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

FAM 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

FAM 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

FAM 775 PROFESSIONAL DEVELOPMENT SEMINAR. (1-3)
Orientation to policies, procedures, and possibilities in the family sciences graduate program. Prereq: Consent of instructor.

FAM 776 PROSEMINAR IN COUPLE AND FAMILY THERAPY: (Subtitle required). (1-3)
Intensive study of skills, issues, or treatment procedures in couple and family therapy. May be repeated under different subtitles to a maximum of six credits.

FAM 777 APPLIED STATISTICS IN FAMILY SCIENCE. (3)
Emphasis is on conducting statistical analyses and reporting results. Topics include selection of statistical approach, techniques for conducting analyses, interpretation of output, and writing the results section of a manuscript based on that output. Prereq: STA 570, FAM 690 (or equivalent) and FAM major.

FAM 785 ADVANCED PROBLEMS IN FAMILY SCIENCES. (1-3)
Intensive independent scholarship or training in family sciences. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

*FAM 786 TEACHING PRACTICUM IN FAMILY SCIENCES. (3)
Independent doctoral student teaching experience, under faculty supervision. May be repeated to a maximum of 6 credits. Prereq: Consent of instructor.

FAM 787 SUPERVISED PRACTICE OF COUPLE AND FAMILY THERAPY. (1-6)
Intensive study of skills, issues, or treatment procedures in couple and family therapy. May be repeated under different subtitles to a maximum of six credits. Prereq: Admission to the CFT master’s program.

FAM 790 ADVANCED RESEARCH METHODS IN FAMILY SCIENCES. (3)
Advanced study of quantitative research methods, including but not limited to complex study designs, model building and structural equation modeling, reliability and validity of measures, statistical power and effect size, mediator and moderator variables, and identifying appropriate statistical techniques for specific types of problems. Prereq: FAM 690 and FAM 777, or equivalents.

FAM 796 SPONSORED RESEARCH DEVELOPMENT IN FAMILY SCIENCES. (2)
Application of content knowledge and research skills to the proposal development process. Students will work in teams to respond to state and federal research program announcements. May be repeated to 6 credits. Prereq: Family sciences doctoral student.

FCS Family and Consumer Sciences

FCS 110 INTRODUCTION TO CAREER AND TECHNICAL EDUCATION. (3)
The history, status, philosophy, and objectives of career and technical education in relation to general education. (Same as AED 110.)

FCS 350 DESIGN ISSUES FOR FAMILY AND CONSUMER SCIENCES EDUCATORS. (3)
This course will provide a broad understanding and appreciation of the housing and interior design fields. Topics will cover the many issues faced with selecting and personalizing a home. Various housing and design options are presented to help recognize the wide variety of choices available for addressing different needs and life situations. FCS Education students will design lesson plans to correspond with housing and design topics. Design projects will be completed.

FCS 362 FIELD EXPERIENCES IN CAREER AND TECHNICAL EDUCATION. (1-3)
Supervised experiences in schools and other agencies. Required of all Career and Technical Education Majors. Includes observation, participation, experience, field trips, inspection of programs, and professional organizations. Prereq: Majors only. (Same as AED 362.)

FCS 371 ADVISING A CAREER AND TECHNICAL STUDENT ORGANIZATION. (3)
This course is designed to assist students in developing skills and competencies needed to plan, implement, advise, and evaluate a Career and Technical Student Organization as part of the total CTE program. (Same as AED 371.)

FCS 395 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (1-3)
Directed independent study of a selected problem in the field of career and technical education under the supervision of a faculty member. May be repeated to a maximum of 6 credit hours. Prereq: Consent of appropriate instructor. (Same as AED 395.)

FCS 399 EXPERIENTIAL LEARNING INCAREER AND TECHNICAL EDUCATION. (1-3)
A field based learning experience in career and technical education under the supervision of a faculty member. Student must complete a learning contract which outlines the requirements agreed to by the student for successful completion of the course. Prereq: Consent of appropriate instructor. (Same as AED 399.)

FCS 535 PRINCIPLES AND PHILOSOPHY OF CAREER AND TECHNICAL EDUCATION. (3)
Study is made of philosophy, accepted principles, and legislation affecting programs in career and technical education. (Same as AED 535.)

FCS 580 FOUNDATIONS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Course focuses on the foundation of teacher development including: effective teacher characteristics, principles of teaching and learning, and preparation of lesson plans. Prereq: Admission into the Teacher Education Program. (Same as AED 580.)

FCS 583 DESIGNING CURRICULUM AND ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional methodology course focused on analyzing the principles of teaching and learning to design curriculum, instruction, and assessment for formal and non-formal educational settings. (Same as AED 583.)

FCS 586 METHODS OF TEACHING CAREER AND TECHNICAL EDUCATION. (3)
Develops teaching competencies with emphasis on: discussion, demonstration, problem-solving, cooperative learning, service learning methods. Prereq: Admission into the Teacher Education Program and AED/FCS 580. (Same as AED 586.)

FCS 592 TEACHING EXPERIENCE IN CAREER AND TECHNICAL EDUCATION. (12)
Supervised experience in teaching Career and Technical Education. Requires observation, lesson plan development, and incorporation of effective teaching methods and strategies. Regulated scheduled seminars included as an integral part of course. Prereq: Admission into the Teacher Education Program and successful completion of AED/FCS 580 and AED/FCS 586. (Same as AED 592.)

FCS 670 ADVANCED METHODS IN TEACHING CAREER AND TECHNICAL EDUCATION. (3)
The principles of method applied to teaching in the field of career and technical education. Prereq: Experience in teaching vocational education. (Same as AED 670.)

FCS 671 YOUTH ORGANIZATIONS IN CAREER AND TECHNICAL EDUCATION. (3)
A study of the underlying philosophy and principles for organizing and advising youth organizations in career and technical education. Emphasis on activities that will enrich and motivate the instructional programs, and develop leadership, cooperation and citizenship. (Same as AED 671.)

FCS 673 ADULT EDUCATION IN CAREER AND TECHNICAL EDUCATION. (3)
Preparation for teaching adult classes in career and technical education including organization of classes, development of curriculum, and methods of teaching.

FCS 678 RESEARCH METHODS. (3)
Class work in current trends and significant developments in career and technical education. May be repeated to a maximum of nine credits.

FCS 681 INSTRUCTIONAL ASSESSMENT IN CAREER AND TECHNICAL EDUCATION. (3)
Instructional assessment of learning and achievement in Career and Technical Education middle and high school classrooms is addressed. Focus is placed on test writing, measurement and student achievement. (Same as AED 681.)

This course includes practice in teaching for observation by others, student teaching, and school visits.

FCS 684 SPECIAL PROBLEMS IN CAREER AND TECHNICAL EDUCATION. (3)
An independent work course for students interested in career and technical education. Students make individual investigations and report on special problems. (Same as AED 684.)

FCS 710 COLLEGE TEACHING OF AGRICULTURE, NATURAL RESOURCES AND HUMAN SCIENCES. (3)
A course designed to assist current or future college faculty in agriculture, natural resources or human science disciplines seeking to enhance the teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education. Prereq: Graduate Standing in the College of Agriculture. (Same as AED 710.)
FIN 446 REAL ESTATE FINANCE. (3)
This course surveys the sources and uses of real estate funds. The institutions which provide funds and the various types of financial instruments are described and compared. Likewise, various forms of real estate investment are analyzed and methods of determining value are critiqued. Prereq: A grade of C or better in FIN 410 (formerly FIN 450).

FIN 465 FINANCIAL INSTITUTIONS MANAGEMENT. (3)
A study of the principles and cases in commercial banking practice. Financial institution management practices are studied within the economic, monetary, fiscal and legal framework of the American economy. Prereq: ECO 412 and a grade of C or better in FIN 410 (formerly FIN 450).

FIN 470 FINANCIAL RISK MANAGEMENT. (3)
Financial pricing in the form of unexpected movements in the foreign exchange rates, interest rates, and commodity prices and their impacts on a firm’s earnings, cash flows, value, and competitiveness are the focus of this course. Various financial derivatives such as forwards, futures, options, and swaps and different hedging techniques, principles, and strategies will be studied. The course also includes the design, development, execution, and evaluation of corporate risk management program. Lecture, discussion, readings, case study, and internet access approaches will be employed. Prereq: FIN 405 (formerly FIN 445), FIN 410 (formerly FIN 450).

FIN 480 MONEY AND CAPITAL MARKETS. (3)
A study of the institutional structure and theory of the money and capital markets, including the types of financial claims traded in such markets, the major buyers and sellers, the regulatory environment, capital market theory, and the forces of supply and demand affecting the level and structure of interest rates. Prereq: ECO 412; and a grade of C or better in FIN 410 (formerly FIN 450).

FIN 485 APPLIED INVESTMENT ANALYSIS AND PORTFOLIO MANAGEMENT. (3)
The course gives students a working knowledge of, and experience applying, the basic principles of value-oriented equity investing. Students manage a real-money equity portfolio currently, making all buy/sell decisions. Prereq: Consent of instructor.

FIN 490 SPECIAL TOPICS IN FINANCE (Subtitle required). (3)
Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in finance. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the FIN 490 number. Prereq: Consent of instructor.

FIN 600 CORPORATE FINANCIAL POLICY. (3)
A study of financial management from the viewpoint of the corporate financial officer. Topics studied include capital budgeting, capital structure, financing decisions, working capital management, dividend policy, and mergers and acquisitions. Prereq: Graduate standing; ECO 610, ACC 628, MGT 650.

FIN 623 INTERNATIONAL FINANCIAL MANAGEMENT. (3)
This course provides an overview of financial management at the international level. Topics covered include: The nature and uses of international financial markets, the financial behavior of multinational corporations, exchange rates, and hedging in international business. Prereq: FIN 600 and consent of the instructor.

FIN 637 HEALTH FINANCE. (3)
This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are examined and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635.

FIN 645 CORPORATE INVESTMENT AND FINANCING POLICY. (3)
Emphasizing both theory and practice, this course is an in-depth study of long-term corporate investment and financing decisions. Topics include valuation, capital budgeting, cost of capital, leasing, dividend policy, capital structure, and mergers and acquisitions. Prereq: FIN 600.

FIN 650 INVESTMENTS. (3)
Analysis and valuation of securities and the effects on investment decisions. Prereq: Appropriate undergraduate courses in accounting and finance.

FIN 664 REAL ESTATE FINANCE. (3)
A study of the theory of money, interest and financial intermediation. In addition to the theory, the major financial markets, financial institutions and financial instruments will be examined. Finally, the governmental agencies which regulate the industry will be discussed as will the overlapping nature of the regulatory process. Prereq: Completion of the first year MBA core or consent of instructor.

FIN 680 MONEY, INTEREST AND CAPITAL. (3)
A study of the theory of money, interest and financial intermediation. In addition to the theory, the major financial markets, financial institutions and financial instruments will be examined. Finally, the governmental agencies which regulate the industry will be discussed as will the overlapping nature of the regulatory process. Prereq: Completion of the first year MBA core or consent of instructor.

FIN 691 ADVANCED TOPICS IN FINANCE (Subtitle required). (1-3)
The study of selected topics in finance for graduate students. Special title required. May be repeated for a maximum of nine credits under different subtitles. Prereq: Consent of instructor.
FIN 695 INDIVIDUAL WORK IN FINANCE. (1-6) Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

*FIN 700 SEMINAR IN FINANCIAL THEORY. (3) Primary emphasis on the theory of financial asset valuation. Topics include utility theory, investor reaction to uncertainty, cost of capital theory, dividend theory, portfolio theory, and asset pricing in equilibrium.

*FIN 701 SEMINAR IN FINANCIAL THEORY II. (3) A continuation of FIN 700. Topics covered include state-preference theory, arbitrage pricing theory, agency theory, and the pricing of contingent claims.

*FIN 740 SEMINAR IN THEORETICAL CORPORATE FINANCE. (3) This is an introduction course in theoretical corporate finance for Ph.D. students. This course has the objective of introducing doctoral students to theoretical research in corporate finance. The emphasis will be on incomplete information models, though a few models driven by other considerations will also be studied. The first part of the course will examine the fundamentals of corporate finance theory (e.g., the theory of the firm’s choice of its capital structure and dividend policy under alternative assumptions), as well as various tools in corporate finance (e.g., the theory of moral hazard and agency problems, adverse selection and signaling, various aspects of non-cooperative games with and without incomplete information, and the equilibrium concepts in such games). The second part of the course will focus on a couple of important related topics which are the focus of recent research in corporate finance. Prereq: FIN 600 and 650, or equivalent, or permission of instructor.

FIN 745 SEMINAR IN MANAGERIAL FINANCE. (3) Primary emphasis on the implementation of financial theory for the management of the assets of a business firm. Topics include capital budgeting, working capital planning, financing the firm, cost of capital and the financial structure of the firm, and mergers and acquisitions. Prereq: FIN 700.

FIN 750 SEMINAR IN INVESTMENT Theory. (3) Primary emphasis on the implementation of financial theory for the evaluation and management of financial assets in an efficient capital market. Topics include mean-variance efficiency, development and testing of the capital asset pricing model, stochastic dominance, and option pricing theory as well as other topics in modern capital market theory. Prereq: FIN 700 or equivalent, or consent of instructor.

†FIN 763 RESEARCH, DESIGN AND ANALYSIS. (3) Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

†FIN 763 RESEARCH, DESIGN AND ANALYSIS. (1-3) An examination of the role of financial institutions in the financial system and in the economy, with special emphasis on commercial banks. Topics covered include: theories of financial intermediation, asset-liability management, regulation and deposit insurance, structure of the financial institutions industry, and empirical models of banking. Prereq: FIN 700.

FIN 791 SEMINAR IN FINANCE (Subtitle required). (1-3) An intensive study of current theory and research in a topic in finance as discussed in scholarly journals. Examples of possible topics include: Capital structure, agency theory, market efficiency, contingent claims. May be repeated with a different subtitle for a maximum of 12 credits. Prereq: Consent of the instructor.

FIN 795 INDEPENDENT WORK IN FINANCE. (1-6) Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FM Family and Community Medicine

*FM 815 FIRST-YEAR ELECTIVE, FAMILY MEDICINE. (1-3) With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

*FM 825 SECOND-YEAR ELECTIVE, FAMILY MEDICINE. (1-4) With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Family and Community Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

FM 841 OFF-SITE PRECEPTORSHIP IN FAMILY MEDICINE. (1-6) A senior selective in remote sites designed to acquaint the student with the functions, techniques, and experiences associated with a family physician. Students will function in an office-based practice of family physicians, will live in the community and practice primary health care delivery. One credit per week, not to exceed six weeks. Prereq: Admission to the fourth year, College of Medicine.
FOR 280 FOREST POLICY. (2)
Examine the political processes it relates to formulation, analysis, evaluation, and implementa-
tion of forest policies. Assess the impacts of various policy decisions and employ the policy-
process to address such forestry issues as urbanization, fragmentation, invasive species, global
competition, certification, and climate change.

FOR 310 INTRODUCTION TO FOREST HEALTH AND PROTECTION. (3)
Modular course with one-third devoted to forest entomology, one-third to forest pathology,
and one-third to other topics such as abiotic agents and invasive species. Identify various agents
that affect forest health, assess the impacts of these agents on forest health, and learn different
methods for addressing these impacts. Prereq: BIO 103 or BIO 150.

FOR 320 FOREST EVALUATION AND ECONOMICS. (3)
Apply economic concepts to silvicultural practices, land values, and values affiliated with
various forest uses. Apply supply and demand concepts and financial computations to identify
and quantify economic consequences of silvicultural actions or management practices. Taxation
and monetizing ecosystem services will be discussed. Prereq: MA 109 or Calculus.

FOR 325 ECONOMIC BOTANY: PLANTS AND HUMAN AFFAIRS. (3)
Plants have played a major role in human affairs. Course will relate plant life processes and
chemistry to human uses: food crops, spices, medicinals, and materials. Major units are the
origins agriculture and early domesticates, ethno-botany, and a selection of plants and plant
products with major historical impacts – potato, nutmeg, pepper, chocolate, sugarcane, cotton,
quince, rubber, tobacco. Contemporary themes include herbal medicine and plant-based
pharmaceuticals. Prereq: PLS 104, PLS 210, one year of introductory biology, or permission
of the instructor.

FOR 330 GIS AND SPATIAL ANALYSIS. (3)
Principles and operations of Geographic Information Systems (GIS) applied to forestry and
natural resources. Students will learn to collect necessary field data to create GIS maps and
digital spatial data sets, perform basic spatial analysis, and integrate social and economic data
to solve spatially related natural resource problems. Prereq: MA 109 or Calculus, FOR 150 and
FOR 200.

FOR 340 FOREST ECOLOGY. (4)
The study of the forest as a biological community, covering ecosystem concepts such as energy
flow, forest nutrition, nutrient cycling, and decomposition. Interrelationships between trees
and other organisms comprising the community is also examined through concepts of
disturbance, succession, population dynamics, biological and ecosystem diversity, ecosystem
management, and ecosystem services. Prereq: BIO 103 or BIO 150.

FOR 350 SILVICULTURE. (4)
A study of ecologically based manipulations of forests to achieve desired management
objectives. Develop and apply silvicultural prescriptions and learn the effects of these
prescriptions on timber and non-timber forest benefits, forest health and biodiversity, soil,
and water resources as well as their effect on broader social, economic, and ecological issues.
Prereq: FOR 219 and FOR 250.

FOR 355 FOREST FIRE CONTROL AND USE. (1)
A study of fire related concepts as they relate to trees, soils, landscapes, water quality,
hydrology, wildfire, timber products, ecology and silviculture. In completing this course,
students will become Red Card Certified through the U.S. Forest Service. Prereq: FOR 150,
FOR 219, FOR 250, FOR 370, FOR 330, FOR 340, FOR 350, PLS 366, or consent of the field
semester coordinator.

FOR 356 LANDSCAPE ASSESSMENT. (5)
Students will learn to assess various landscape types through week-long, in-depth studies of
five topic areas, while studying how the topics are interrelated. The topic areas are winter
dendrology, wildlife, soils, hydrology, and health and protection. During the module, students
will visit sites throughout Kentucky and the region. Prereq: FOR 150, FOR 219, FOR 250,
FOR 370, FOR 330, FOR 340, FOR 350, PLS 366, or consent of the field semester coordinator.

FOR 357 INVENTORY AND MEASUREMENTS. (2)
This course teaches students how to conduct forest inventories using a variety of criteria and
measurements. Students will use GPS to establish area boundaries and GIS to construct area
maps. They will learn how to use inventory data to determine economic value. Prereq: FOR
150, FOR 219, FOR 250, FOR 370, FOR 330, FOR 340, FOR 350, PLS 366, or consent of the field
semester coordinator.

FOR 358 SILVICULTURAL PRACTICES. (3)
A study of the silvicultural practices for altering the forest canopy and regenerating the forest.
Students will learn to apply these practices to meet multiple use objectives such as forest
products, wildlife, health and protection, watershed, and recreation and develop silvicultural
prescriptions. Prereq: FOR 150, FOR 219, FOR 250, FOR 370, FOR 330, FOR 340, FOR 350,
PLS 366, or consent of the field semester coordinator.

FOR 359 FOREST OPERATIONS AND UTILIZATION. (3)
Plan and design timber harvests, mark a stand for harvest, and describe the effects of harvesting.
Use herbicides and pesticides to eradicate invasive species, perform tree planting, conduct
thinnings, and participate in prescribed burns. Learn timber utilization technology and
determine value added in converting trees to lumber. Prereq: FOR 150, FOR 219, FOR 250,
FOR 370, FOR 330, FOR 340, FOR 350, PLS 366, or consent of the field semester coordinator.

FOR 370 WILDLIFE BIOLOGY AND MANAGEMENT. (4)
Applications of basic biological concepts such as physiology, energetics, nutrition, digestive
systems, and anatomy to the study of wildlife and wildlife management. In addition to basic
biology, students will also learn taxonomy and identification of wildlife and the principles of wildlife management as well as applied field techniques such as trapping and radio
 telemetry.

FOR 375 TAXONOMY OF FOREST VEGETATION. (1)
Field study of the identification and silvics of forest vegetation. One week summer field course.
Prereq: FOR 205, FOR 219, and FOR 340; grade of C or better required in FOR 205 and FOR 219.

FOR 376 SILVICULTURAL PRACTICES. (2)
Field study of the relationship between specific site characteristics and yield of forest stands
and the application of cultural practices to forest stands. Two week summer field course.
Prereq: FOR 205, FOR 219, FOR 340, and FOR 350; grade of C or better required in FOR 205 and
FOR 219.

FOR 377 FOREST SURVEYING. (1)
The application of surveying principles and techniques to forest land areas. One week summer
field course. Prereq: FOR 200 and FOR 300; grade of C or better required in FOR 200.

FOR 378 FOREST MENSURATION. (2)
The application of mensurational principles and techniques in determining tree and stand
volumes and growth; timber cruising; development of volume and stand tables. Two week
summer field course. Prereq: FOR 200 and FOR 300; grade of C or better required in FOR 200.

FOR 379 HARVEST AND UTILIZATION OF WOOD. (2)
Study and use of harvesting and milling equipment in the harvest and manufacture of wood and
products. Two week summer field course. Prereq: FOR 360.

FOR 399 FIELD-BASED EDUCATION IN FORESTRY. (1-6)
The use of field experience as an educational complement to classroom work. May be repeats
for a maximum of 12 credits which are to be used as electives. Prereq: Permission of instructor
and department chairperson. A departmental learning agreement must be completed prior to
registration.

FOR 400 HUMAN DIMENSIONS OF FOREST AND NATURAL RESOURCES. (3)
In an issues based format, students will study societal trends and their impact on natural
systems, the disconnect between society and nature, wildlife-human interactions, as well as
problems related to globalization and urbanization. Prereq: Senior Standing or consent of the
instructor. This is a writing-intensive (W) course approved to fulfill the upper tier of the
graduation writing requirement (GWR). To receive W credit for this course, you must have
successfully completed the first-year writing requirement (ENG 104 or its equivalent) and have
completed at least 30 hours of course work. Forestry majors must complete this course and
FOR 470 to fulfill upper tier of the GWR.

FOR 402 FOREST ENTOMOLOGY. (3)
The principles of forest entomology, including the detection, collection, identification,
appraisal of damage, and control of forest insect pests. Lecture, two hours; laboratory, two
hours. Prereq: One year of biology or consent of instructor. (Same as ENT 402.)

FOR 425 FOREST MANAGEMENT. (4)
The principles of sustained yield forest management, management objectives, forest
regulation, allowable cut, and timing of timber harvests. Students will identify management objectives from various properties and ownership types and integrate scientific knowledge and both timber and non-timber considerations with landowner objectives to derive management decisions.
Prereq: Completion of the Spring Field Semester (FOR 355, 356, 357, 358, and 359) or consent
of instructor. (Same as AEC 425.)

FOR 430 FOREST HYDROLOGY AND WATERSHED MANAGEMENT. (4)
Principles and techniques involved in watershed management as it relates to the practice of
forestry. Emphasis is placed on understanding the hydrologic cycle, plant-soil interactions
from a land-use and landscape perspective, and the need for implementation of forestry best
management practices. Prereq: CHE 104 or CHE 105, MA 109 or Calculus, FOR 200, and PLS
366.

FOR 461 INTRODUCTION TO POPULATION GENETICS. (3)
This course examines the population dynamics and equilibria of genes in nuclear, chloroplasts and mitochondria. Emphasis will be on biological relevance (in plants, animals, and
micro-organisms), but some theoretical derivations will also be introduced. Prereq: ABT
360 (or equivalent) and one course in probability/statistics. (Same as ABT/BIO/ENT 461.)

FOR 470 INTERDEPENDENT NATURAL RESOURCE ISSUES. (3)
Culmination of the student’s study of public concerns and problems related to natural
resources. Work in teams to find and verify information on diverse topics, listen to and address
public concerns, communicate natural resource information to a wide range of audiences, and
be effective professionals in working toward solutions. Prereq: Senior Standing. This is a
writing-intensive (W) course approved to fulfill the upper tier of the graduation writing
requirement (GWR). To receive W credit for this course, you must have successfully completed
the first-year writing requirement (ENG 104 or its equivalent) and have completed at least 30
hours of course work. Forestry majors must complete this course and FOR 400 to fulfill the
upper tier graduation writing requirements.
FOR 480 INTEGRATED FOREST RESOURCE MANAGEMENT. (5)
Capstone course. Students will be presented with a real-life management scenario in a forested location in Kentucky. Working in teams, students will collect data, determine management objectives, and develop action plans for managing the forest according to the desires of the owner, subject to realistic legal, economic, ethical, and social constraints. Students will be required to produce a professional management plan and present the plan in a public forum at the end of the semester. Prereq: Completion of Field Semester, FOR 425, FOR 460, and Senior Standing.

FOR 599 INDEPENDENT WORK IN FORESTRY. (1-3)
Study and independent work on selected problems related to allocation and utilization of natural resources. May be repeated to a maximum of six credits. Any combination of FOR 599 and FOR 781 cannot exceed six credits. Prereq: Senior or graduate standing and consent of instructor.

FOR 601 RESEARCH METHODS IN FORESTRY. (3)
A study of research methods, procedures, and techniques used in forestry. Major emphasis will be placed on problem analysis and methods of conducting organized research. Prereq: Graduate standing.

FOR 602 RENEWABLE NATURAL RESOURCES IN A GLOBAL PERSPECTIVE. (3)
An advanced course that examines world and transboundary issues related to renewable natural resources. Discussion of international policies and issues, and identify issues for further study. Student research papers related to those issues will be presented and discussed in a seminar format. Prereq: Graduate standing.

FOR 605 EMPIRICAL METHODS IN ECOLGY AND EVOLUTION. (2)
This course provides students with hands-on experience in a diverse array of modern research methods used by ecologists and evolutionary biologists, including techniques used in: molecular genetics, chemical ecology, behavioral studies, motion analyses, high-speed video, image analyses for morphometrics and color, and field techniques in both aquatic and terrestrial systems. Lecture, one hour; laboratory, three hours per week. Prereq: BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 665.)

FOR 606 CONCEPTUAL METHODS IN ECOLOGY AND EVOLUTION. (3)
This course provides students with hands-on experience in a diverse array of conceptual research techniques used by ecologists and evolutionary biologists. The focus will be on optimization methods used for predicting animal and plant behaviors and life histories, and on methods for assessing population trends and dynamics. Mathematical techniques used will include graphical analysis, matrix algebra, calculus, and computer simulations. The latter part of the course will consist of collaborative modeling projects, in which small groups of students will work with the instructor to address an important contemporary research problem and will report their results in a public talk and a project writeup. Prereq: One year of calculus and BIO 325 or FOR 340 or ENT 665, or consent of instructor. (Same as BIO/ENT 606.)

FOR 607 ADVANCED EVOLUTION. (2)
This course covers advanced topics in evolution, concentrating on questions central to the understanding of general evolutionary processes. Phenomena occurring both within populations (e.g., selection, inheritance, population subdivision) and between populations (e.g., gene flow, competition) will be addressed. Special attention will be given to modern research approaches and techniques including quantitative genetics, measurement of selection, phylogenetic analyses of comparative data and molecular systematics. Prereq: One year of calculus, genetics (BIO 304 or BIO 461) and BIO 508 or consent of instructor. (Same as BIO/ENT 667.)

FOR 608 BEHAVIORAL ECOLOGY AND LIFE HISTORIES. (3)
This course uses an evolutionary approach to examine behavior and life histories. Topics addressed include: the optimality approach, constraints on optimality, kin and group selection, predator and prey behaviors, social and mating behaviors, and life history evolution. Prereq: BIO 325 and one semester of calculus; or consent of instructor. (Same as BIO/ENT 608.)

FOR 609 POPULATION AND COMMUNITY ECOLOGY. (3)
This course discusses the processes that determine population distributions and dynamics and community structure for both plants and animals. Topics addressed include: population regulation and population stability, community diversity and stability, ecological succession, population interactions (competition, predation, mutualism), coevolution, and the effects of spatial and temporal heterogeneity on population and community patterns. Prereq: BIO 325 or FOR 340 or consent of instructor. (Same as BIO/ENT 609.)

FOR 612 FOREST ECOSYSTEM DYNAMICS. (3)
The study of ecosystem structure and function with emphasis upon the processes that determine population distributions and dynamic processes in the development of ecosystems. Prereq: FOR 340 or BIO 451 G and consent of instructor.

FOR 620 SPECIAL TOPICS IN FORESTRY (Subtitle required). (1-3)
Special topical or experimental courses in forestry for advanced graduate students. Special title required and approved by the chairman of the Department of Forestry. May be repeated to a maximum of nine credits. Students may not repeat under the same subtitle. Prereq: Consent of instructor.

FOR 622 PHYSIOLOGY OF PLANTS. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430 G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 623.)

FOR 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430 G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/PLS 623.)

FOR 630 WILDLIFE HABITAT ANALYSIS. (3)
The components and structure of wildlife habitats and associated wildlife communities. Univariate and multivariate statistical methods of habitat analysis will be described and applied to data collected during laboratory periods to identify important habitat characteristics for selected wildlife species. The importance of habitat complexity will be demonstrated in laboratory and field situations. Lecture, three hours; laboratory, two hours. Prereq: FOR 430 and basic courses in statistics and ecology.

FOR 662 QUANTITATIVE METHODS IN RENEWABLE AND NONRENEWABLE RESOURCE MANAGEMENT. (3)
Application of dynamic optimization methods to renewable and nonrenewable resource management. Includes problem formulation, mathematical problem solving, Matlab programming, simulations and optimal policies analysis. Case examples are used to demonstrate applicability and problem formulation in finance and general and partial equilibrium. Prereq: MA 113 and MA 162 or equivalent, and AEC 661 or equivalent. (Same as AEC 662.)

FOR 667 INVASIVE SPECIES BIOLOGY. (3)
This course will examine circumstances that allow introduced species to become invasive, how invasive species threaten our resources, and approaches to minimizing the incidence and impact of invasions. Prereq: Graduate standing or consent of instructor. (Same as BIO/ENT 667.)

FOR 695 FIELD RESEARCH IN FORESTRY. (0)
Full-time research that requires the student to remain off-campus for extended periods. Students enrolled in this course remain in full-time academic status. May be repeated to a maximum of two semesters. Prereq: Graduate standing in the Forestry Graduate Program. For students whose research precludes them from taking courses on campus for a semester. Registration requires (a) approval of Research Contract by a committee of at least three Forestry faculty members established to consider a particular student’s Research Contract, (b) approval of Research Contract by Director of Graduate Studies, and (c) approval of Research Contract by Associate Dean for Academic Programs.

FOR 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

FOR 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Consent of adviser and chairperson of the department.

FOR 770 FORESTRY SEMINAR (Subtitle required). (1)
Reports and discussions on recent research and current literature. Credit is given to those who satisfactorily present papers. Required of all graduate students. Can be repeated to a maximum of three credits. Prereq: Graduate standing.

FOR 781 SPECIAL PROBLEMS IN FORESTRY. (1-3)
Advanced study of selected problem areas in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FOR 791 RESEARCH IN FORESTRY. (1-3)
Involves original research in selected areas of interest in forestry. May be repeated for a total of six credits; any combination of FOR 781 and FOR 791 cannot exceed six credits. Prereq: Consent of graduate adviser.

FP Family Practice and Community Medicine

FP 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his/her knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

FR French Language and Literature

FR 011 FRENCH FOR READING KNOWLEDGE. (3)
This course is designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination.

FR 101 ELEMENTARY FRENCH. (4)
The study of basic French through grammar, reading and oral practice.
FR 102 ELEMENTARY FRENCH. (4)

FR 103 FRENCH CINEMA. (3)
A history of the French cinema from the early twentieth century to the present. Emphasis on the primary aesthetic movements of French cinematic expression in social and historical context. Attention given to the formal elements specific to film, techniques of film analysis, and the nature of visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 106 ELEMENTARY FRENCH REVIEW. (5)
A course equivalent in level to FR 102 designed to prepare students with two or three units of high school French for FR 201 who, on the basis of the placement test, appear to lack sufficient skill in French for that course. Prereq: Two years of high school French and the placement test.

FR 201 INTERMEDIATE FRENCH. (3)
Reading, conversation and oral comprehension are the basic aims of this course, which is structured around contemporary texts. Prereq: FR 102 or two years of high school French and placement test.

FR 202 INTERMEDIATE FRENCH. (3)
A continuation of FR 201. Prereq: FR 201 or three years of high school French and placement test.

FR 204 INTRODUCTION TO FRENCH AND FRANCOPHONE STUDIES. (3)
Introduces students to the concepts, questions, and methodologies that inform the study of the Francophone world. Includes an intensive French grammar review. Prereq: FR 202 or equivalent.

FR 205 THE FRENCH GRAPHIC NOVEL. (3)
Examines the rich tradition of graphic narrative in France where the modern comic form was invented in the early nineteenth century. Explores the technical aspects of graphic narrative and considers how the graphic novel has been linked to political questions of national identity in post-war France. Taught in English with no knowledge of French necessary.

FR 214 FRANCE TODAY. (3)
Explores the issues, debates, and conflicts that define culture and society in contemporary France. Emphasis on speaking and listening skills in French. Prereq: FR 202 or equivalent.

FR 215 VISUAL CULTURES. (3)
An interdisciplinary discussion of the centrality of the visual in French and Francophone society and culture. Representative examples of the kinds of visual media encountered might include medieval tapestries as well as twenty-first century web sites. Prereq: FR 202 or equivalent.

FR 225 FRENCH FILM NOIR. (3)
Examines the crime thriller and the “noir” style in French cinema during the 1940s and 50s. Emphasis on the aesthetic, philosophical, and historical origins of the crime film in France, the impact of French cinema on Hollywood film noir, and the role of noir in French visual culture. Viewing of films outside of class required. Taught in English, with no knowledge of French necessary.

FR 235 FRENCH CINEMA. (Subtle required).
An introduction to the analysis of film and to the major movements in the history of French cinema. May be repeated up to 6 hours with different subtitle. Prereq: FR 204.
FR550 FRENCE TODAY. (3)
A contrast between contemporary France and today’s European and the historical image of France. The impact of the “New Quiet French Revolution” and of the new institutions on French Society. Conducted in French. Prereq: FR 306 and consent of instructor.

FR553 TEACHING OF FRENCH. (3)
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on French. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

FR570 SEMINAR IN FRENCH LANGUAGE PEDAGOGY. (1)
A general seminar in a broad range of subjects in the area of French language pedagogy. May be repeated to a maximum of two credits. Prereq: Graduate student standing in French or consent of instructor.

FR601 POETIC VISION (Subtitle required). (3)
Examination of the major trends in French poetics; attention will focus on aesthetic problems, generic concerns, and various approaches to the nature of poetry. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FR604 THE TRAGIC MODE (Subtitle required). (3)
A study of the concept of the tragic mode and its embodiment in French literature and critical theory. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FR605 COMIC FICTION (Subtitle required). (3)
Studies in the development and theory of comic fiction in France. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FR606 LITERATURE OF THE MIDDLE AGES (Subtitle required). (3)
Special topics in French literature from the period 1050-1500. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

FR607 STUDIES IN RENAISSANCE LITERATURE (Subtitle required). (3)
Comprehensive study of selected writers. May be repeated under a different subtitle to a maximum of six credits. Prereq: Consent of instructor.

FR609 SEVENTEENTH-CENTURY STUDIES (Subtitle required). (3)
Study of selected French writers, literary, intellectual and cultural practices of the time. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR612 STRUCTURE AND STYLISTICS OF FRENCH. (3)
A study of the history and structure of French with an emphasis on contemporary features. (Same as ENG/LIN 612.)

FR617 EIGHTEENTH-CENTURY STUDIES (Subtitle required). (3)
Literary, intellectual and social practices and theories of the French Enlightenment. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR619 NINETEENTH-CENTURY STUDIES (Subtitle required). (3)
Study of the intellectual, literary and social practices and theories of the major movements of the century, including Romanticism, Realism, and Symbolism. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR621 TWENTIETH-CENTURY STUDIES (Subtitle required). (3)
Study of the practices and theories of the major intellectual, literary and social movements of the century, such as modernism, existentialism, the novel, post structural and postmodern writing. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR630 FRENCH LANGUAGE, LITERATURE AND CULTURE OUTSIDE FRANCE (Subtitle required). (3)
Study of Francophone writing, currents of thought, and cross-cultural movements in Africa, the Caribbean, Quebec and elsewhere. May be repeated to a maximum of six credits under different subtitle. Prereq: Consent of instructor.

FR768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

FR769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

FR780 SPECIAL STUDIES IN FRENCH. (3)
Selected studies and investigations in the French language and literature, permitting the student to work in areas of special interest, and providing opportunity for original endeavor. May be repeated to a maximum of six hours. Prereq: Consent of instructor.
FSC630 ADVANCED MEAT SCIENCE. (4)
Advanced meat science with special reference to the histological, chemical, physical and microbiological properties as they relate to meat quality, organoleptic acceptability and processing procedures. Lecture, three hours; laboratory, two hours. Prereq: FSC 304, FSC 306 or equivalent; one course in histology or biochemistry or consent of instructor. (Same as ASC 630.)

FSC632 FOODBORNE DISEASE AGENTS. (3)
Discussion of microorganisms, toxins and chemical involved in foodborne illnesses as well as procedures for controlling and investigating foodborne disease outbreaks. Prereq: FSC 530.

FSC636 FOOD PACKAGING. (2)
Detailed description of food packaging materials, composition and resistance to chemical and physical damage and their use in food systems as well as criteria for selection of packaging systems for specific food processing techniques will be presented. Methods of production, e.g., blow mold, casting and extrusion; layering; lamination and co-extrusion; processing; and printing and sealing will be discussed. Prereq: FSC 536, FSC 538 or equivalent or consent of instructor.

FSC638 FOOD PROTEINS. (3)
This course deals with chemical, biochemical, and enzymatic significance of proteins in food systems; physiochemical and functional properties of animal and plant proteins, their interactions with lipids, carbohydrates, flavors, minerals and other food components during processing and storage, and resulting modifications of food quality. Prereq: FSC 434G or consent of instructor.

FSC640 FOOD LIPIDS. (3)
An advanced study of the physical, chemical, and biochemical significance of lipids in foods. Topics include the structure and function of lipids in post-harvest physiology, interaction with other food components, and the effect of lipids on the physical properties of foods during processing and storage. Prereq: One course in Food Chemistry or Biochemistry.

FSC642 FOOD PIGMENTS. (3)
Course deals with the chemistry and biochemistry of color of different food products which influence consumers' purchase decision. Lecture topics include fundamental basis of food color and pigments, manipulation of food color, influence of processing on food color, and regulatory issues related to food pigments. Prereq: FSC 434G.

FSC780 SPECIAL PROBLEMS IN ANIMAL DERIVED FOODS. (1-4)
May be repeated for a maximum of nine credits. Prereq: Consent of graduate advisor. (Same as ASC 780.)

FSC790 RESEARCH IN ANIMAL DERIVED FOODS. (1-6)
Problems involving original investigation. May be repeated for maximum of nine credits. Prereq: Consent of graduate advisor. (Same as ASC 790.)

GEN General Agriculture

GEN 100 ISSUES IN AGRICULTURE. (3)
An introductory course requiring critical analysis of the major social, economic, political and scientific issues in agriculture and related disciplines. An evaluation of the multiple positions taken on such issues as affected by the broad range of societal dynamics. Development of skills in information gathering, critical analysis of issues, and written and oral communication will be emphasized. Satisfies the U.S. Citizenship Category of General Education. Prereq: Students enrolled in the College of Agriculture; freshmen only in fall semesters and transfers only in spring semesters.

GEN 109 SPECIAL INTRODUCTORY COURSE: (Subtitle required). (1-6)
Interdisciplinary, topical or experimental courses offered at the introductory level to be approved by the Dean of the College of Agriculture. A particular title may be offered at most twice under the GEN 109 number. Students may not repeat under the same title; repeatable to a maximum of six credit hours. Prereq: To be set by the instructor.

GEN 200 ISSUES IN AGRICULTURE: CONTEMPORARY PROBLEMS IN AGRICULTURE AND NATURAL RESOURCES. (3)
An intermediate course which extends the critical analysis of selected issues in agriculture and related disciplines begun in GEN 100. Continues the development of skills in information gathering, critical analysis, and written and oral communication. Students will be required to investigate scientific literature germane to the issues covered and develop reviews, reports and position papers. Prereq: Sophomore enrolled in College of Agriculture.

GEN 300 SPECIAL COURSE. (1-3)
Interdisciplinary, topical or experimental courses to be approved by the Dean of the College of Agriculture. A particular course may be offered at most twice under the GEN 300 number, and no GEN 300 course may be given for more than three credits per semester. Open to all University students, subject to such limits or prerequisites as set by the instructor. Hours are variable with each special course. Prereq: As specified by the instructor.

GEN 301 AN INTRODUCTION TO CHINESE CULTURE THROUGH AGRICULTURE. (3)
This course is designed to introduce students to basic culture in China. Students will learn about Chinese agriculture, languages, customs, history, the political and educational system, geography and the economy. The culmination of the course is a three-week trip to China. Only students committed to go on trip to China will be enrolled in the course. First priority for the trip is given to College of Agriculture students.

GEN 302 INTERNATIONAL EXPERIENCE IN AGRICULTURE AND NATURAL RESOURCES. (1-6)
Credit for international experiences and travel abroad related to College of Agriculture degree programs. Students must work with faculty to determine if the experience is appropriate for credit. Credit will be determined by Associate Dean of the College depending on type of activity and requirements to be completed by students. Student may not use more than six hours toward degree requirements.

GEN 305 GOVERNMENT IN AGRICULTURE. (2)
An in-depth study of how state government relates to the agricultural enterprise in Kentucky and the USA. Topics include the development and purpose of the Land Grant University and extension system, development of the modern U.S. agricultural industry, and how government policy, regulations, laws and decision-making affect the agricultural industry.

GEN 401 JOB SEARCH SEMINAR. (1)
This course will address the selection of appropriate career choices, job search activities and the transition to the world of work. It will emphasize the application of communicative and team building skills in the area of career development. Pass/Fail only. Prereq: Junior or senior standing in the College of Agriculture.

GEN 501 AGRICULTURAL AND ENVIRONMENTAL ETHICS. (3)
This course illuminates the major moral considerations of public policy issues concerning agriculture and the environment. The course will provide an overview of major moral theories, as well as opportunities to apply these theories to critical analysis of the major contemporary moral issues associated with agriculture and the environment. Prereq: Senior Standing.

GEO Geography

GEO 109 DIGITAL MAPPING. (3)
This course introduces the concepts, techniques, and histories behind mapping as a creative and artistic practice. It covers the centrality of the map in everyday life and the changing role of maps as society becomes increasingly saturated by digital information technologies such as geographic information systems (GIS) and global positioning systems (GPS). The course introduces principles in cartographic design and geo-visualization culminating in a series of maps created by each student.

GEO 120 EARTH’S PHYSICAL ENVIRONMENT. (3)
A course exploring the fundamental characteristics of earth’s physical environment. Emphasis is placed on identifying interrelationships among physical processes involving energy, pressure, and moisture, weather and climate, and terrestrial processes of vegetative biomes, soils, and landscape formation and change. Fulfills General Education requirements for Inquiry in Natural Sciences, and elementary certification requirements in education.

GEO 135 GLOBAL CLIMATE CHANGE. (3)
This course provides a broad overview of the processes that have shaped the climate in which we live, and of consequences of changes to this climate. The principle functions of climate in relation to the hydrosphere and biosphere are introduced, and climate change over geological time is described. The basic data used by climate science to identify and explain historical climate change, paleoclimate change, and more recent climate trends are examined. The course also considers the differences between climate science and “pseudoscience” and how to evaluate predictions of future climate change. Fulfills the Gen Ed Intellectual Inquiry – Natural Physical/ Mathematical Sciences requirement.

GEO 152 REGIONAL GEOGRAPHY OF THE WORLD. (3)
A geographical study of the world by regions with a focus on the world’s physical and human landscapes. Emphasis on how regions are connected to each other. Also how each region is affected by, and affects, global issues such as economic restructuring, food production, and environmental change, will be examined. Fulfills elementary certification requirement for Education and UASP disciplinary social science requirement.

GEO 160 LANDS AND PEOPLES OF THE NON-WESTERN WORLD. (3)
The geographic study of the conceptual and historical definition of regions of the world as “Non-Western.” Global patterns of social, cultural, economic, and political difference between the West and Non-West as well as the processes key to the making of the Non-Western world (such as colonialism and imperialism) are discussed. In addition, selected current issues of significance to peoples in the Non-Western world, such as sustainable development, environment, human rights, and gender relations, are considered. Fulfills the General Education Global Citizenship requirement.
GEO 161 GLOBAL INEQUALITIES. (3)
This course focuses on basic spatial patterns of wealth and poverty at the global scale, comparing rich and poor countries. Contemporary trends are identified and viewed in their historical context. Inequalities in access to basic human needs – food and water – are investigated through case studies drawn from around the world. The highly unequal world we live in raises serious questions of justice and sustainability, and these are considered in this course. Fulfills General Education requirements for Global Citizenship.

GEO 162 INTRODUCTION TO GLOBAL ENVIRONMENTAL ISSUES. (3)
This course addresses environmental questions of global importance, including population growth, resource consumption, environmental degradation, biodiversity conservation, toxic contamination and environmental justice. Fulfills Gen Ed Global Dynamics requirement.

GEO 163 GLOBAL CONFLICTS. (3)
This course will focus on the dynamics and effects of conflicts over boundaries, territory, environmental resources, and civil and political rights. A geographic lens will be used to understand contemporary world conflicts. This course introduces students to an understanding of conflict as grounded both in localities and an effect of global interconnections – political, economic, and cultural. The course will focus on six major contemporary conflicts. Students will become versed in the debates and possible options for solution of these problems. While lectures will provide students with an understanding of the coordinates of the conflicts, recitations sections provide an opportunity for discussion and debate. The readings are chosen to supplement lecture material, providing a greater depth of understanding of the issues at stake. Fulfills the Global Dynamics requirement of General Education.

GEO 164 WORLD'S GLOBAL INFORMATION GEOGRAPHIES. (3)
This course examines the ways that existing and emerging information technologies are helping to transform how we live and the way in which the world interacts. It covers the intertwining of society and technology, and how different cultures produce distinct technologies and use similar technologies in unique ways. Of particular focus will be the history and evolution of mapping technologies to present days systems such as global positioning systems (GPS), geographic information systems (GIS) and the geoweb. In addition the course will introduce the spatial implications of information technologies and contemporary debates on digital divides, surveillance and privacy, proximity and distance, democracy, and relationships between virtual, real-world and hybridized communities. Fulfills the Global Dynamics Requirement of General Education.

GEO 172 HUMAN GEOGRAPHY. (3)
An introduction to geographic perspectives on human political, economic, social, and cultural activities (such as trade, economic development, empire, colonialism and nation building, agriculture, pollution, urbanization, population dynamics). Emphasis is on spatiality (including concepts of location, scale, globalization, maps, migration, and diffusion), place making and regions (including concepts of the cultural landscape, place meaning, race, class and gender identities, and territoriality), and nature/society relations (including concepts of environmental adaptation and modification, climate change, and sustainability). Fulfills Gen Ed Intellectual Inquiry – Social Science and elementary certification requirement for education.

GEO 200 ORIENTATION TO GEOGRAPHY. (3)
Introduces students to geographic perspectives, theories, research and professional opportunities. Applied quantitative and qualitative approaches to geographic case studies are reviewed and examples from current literature presented and discussed. Prereq: GEO 130, GEO 172.

GEO 220 U.S. CITIES. (3)
This course introduces salient contemporary U.S. urban topics as seen from and analyzed by a geographic perspective. Topics include migration, urban sprawl, city services, gentrification and urban redevelopment, school districts, parks, housing, financing, and others. The course examines key issues, problems, and debates facing diverse U.S. urban communities, and will address the possibilities for citizen engagement in their resolution. Fulfills the Gen Ed U.S. Citizenship requirement.

GEO 221 IMMIGRANT AMERICA: A GEOGRAPHIC PERSPECTIVE. (3)
This course uses a geographic and spatial perspective to introduce students to contemporary immigration to the United States, its origins, adaptation patterns, and long-term effects on American society. Current immigration debates, humanitarian migration, immigrants’ experiences (local and transnational), and questions of citizenship and civic participation of immigrants are central to the course.

GEO 222 CITIES OF THE WORLD. (3)
Focuses on the historical development, contemporary character, and alternative futures of cities in both developed and developing regions. The spatial, social, economic, and political processes of major world cities are studied and contemporary urban problems are discussed. Fulfills Gen Ed Global Dynamics requirement.

GEO 230 WEATHER AND CLIMATE. (3)
A survey of the atmospheric controls associated with local, regional, and global weather and climate variability. Includes fundamental coverage of the physics and chemistry of energy, gasses, pressure and moisture, with a goal of promoting understanding of general weather analysis and forecasting, severe storms, atmospheric pollution, descriptive climatology, and global climate change. Prereq: GEO 130 or consent of instructor.

GEO 231 ENVIRONMENT AND DEVELOPMENT. (3)
This course explores the intertwining of environment, development and sustainability. It analyses the political economy of environmental destruction (at macro and micro levels) to understand its origins and strategies to prevent it.

GEO 235 ENVIRONMENTAL MANAGEMENT AND POLICY. (3)
An introduction to environmental systems such as weather and climate, vegetation, land forms and soils, and how the quality of these systems is modified by human use. Resource issues discussed include: atmospheric pollution and global warming; groundwater, flooding, and floodplain management; volcanic activity and earthquakes; and biophysical processes associated with deforestation and lake eutrophication. Case studies based on important environmental problems illustrate how human activity and environmental systems interrelate. Fulfills the USP Cross-Disciplinary requirement.

GEO 240 GEOGRAPHY AND GENDER. (3)
Adopts a geographic approach to the study of gender relations. The role of space and place in shaping the diversity of gender relations throughout the world will be considered. Through case studies the importance of gender relations in understanding a variety of issues will be stressed. Such issues include: the design and use of urban and rural environments; “Third World” development; regional economic restructuring; changing political geographies; and migration.

GEO 255 GEOGRAPHY OF THE GLOBAL ECONOMY. (3)
This course reviews the globalization of the world economy as a historical process with specific local, regional, and national outcomes. It introduces students to the factors and dynamics of ongoing globalization of the economy. Fulfills General Education requirements for Global Citizenship.

GEO 260 GEOGRAPHIES OF DEVELOPMENT IN THE GLOBAL SOUTH. (3)
The course focuses on differences between the richer global north and the poorer global south – sometimes referred to as the “Third World”. The basic global patterns of "development" are studied and the various explanations for development or lack thereof are examined critically. Differences between regions of the global south are investigated through selected case studies from Latin America, Asia, and Africa. Fulfills the Gen Ed Global Dynamics requirement.

GEO 261 GLOBAL DYNAMICS OF HEALTH AND DISEASE. (3)
This course is an introduction to health and disease from a geographical perspective. It provides an introduction to globalization, global health, epidemiology; the immune system; major pandemics of the 20th and 21st Centuries; and, global attempts to confront current and future pandemics. Connections are made to medicine, nursing, public health and related fields. Fulfills the Global Dynamics requirement of Gen Ed.

GEO 285 INTRODUCTION TO PLANNING. (3)
An introduction to the history, purpose, and objectives of planning with emphasis on urban and regional planning, planning processes, techniques, and legislation.

GEO 300 GEOGRAPHIC RESEARCH. (3)
Provides a detailed examination and discussion of the methods of initiating and executing research projects in human or physical geography. Includes identification of geographic dimensions of research topics, theoretical/conceptual frameworks, conduct of literature reviews, research design, data collection/analysis and presentation. Prereq: GEO 130 or 152, 160 or 172, or consent of instructor.

GEO 305 ELEMENTS OF CARTOGRAPHY. (3)
Fundamental training in map drafting, compilation, symbolization, scales, projections, and map production, including emphasis on the conceptual planning and designing of maps and graphs as a medium for communication. Prereq: Students must be Geography Majors or Minors.

GEO 309 INTRODUCTION TO GIS. (3)
This course introduces students to the use of geographic information systems and their basic principles. Topics addressed include data collection, processing and output. Students will learn about types of geographic information and data: sources, constraints, and uses; the range of secondary spatial data sets available; and the collection of primary spatial data using global positioning systems (GPS) and other technologies.

GEO 310 QUANTITATIVE TECHNIQUES IN GEOGRAPHY. (3)
The application of spatial techniques geographers use to collect, sample, map, and analyze data in human and physical geography. Students will be introduced to automated data processing.

GEO 311 QUALITATIVE METHODS IN GEOGRAPHY. (3)
This course is an introduction to qualitative methods in geographical research. Students will begin by learning the basic principles of research design, as well as ethical and procedural considerations of any research project using qualitative methods. The course primarily will focus on introducing students to basic qualitative methods used in geographic research, but pertaining also to social science research in general, potentially including (but not limited to): participant observation, archival analysis, interviews, surveys, focus groups, participatory action research, data coding and analysis, discourse and textual analysis, visual analysis, and content analysis.

GEO 316 ENVIRONMENT AND DEVELOPMENT. (3)
This is an introductory/intermediate level course on the relationships between environment and economic development. While this course emphasizes environmental concerns of the ‘Global South’, this course will also cover instances of ‘Global Northern’ peoples and places, particularly in less privileged areas such as Appalachia. The course examines the political economy of environmental destruction by asking why, despite much significant research, environmentally destructive development schemes continue. Although we understand at least the main contours of what it will take to become a sustainable society, little progress has been made in implementing even evidently necessary policies.
GEO 320 GEOGRAPHY OF THE UNITED STATES AND CANADA. (3)
A systematic review of the physical context, economic, historic, and cultural diversity that distinguishes U.S. and Canadian regions. Topical emphasis on the geographic aspects of regional problems. Fulfills General Education requirements for U.S. Citizenship. Prereq: GEO 130 or 152 or 172, or consent of instructor.

GEO 321 LAND, PEOPLE, AND DEVELOPMENT IN APPALACHIA. (3)
Major themes revolve around regional diversity and regional development. Major topics examined include physical environmental context, historical development, and economic and population geography. The study region includes the upland areas between southern New York State and central Alabama. Prereq: GEO 130, 152 or 172, or consent of instructor.

GEO 322 GEOGRAPHY OF KENTUCKY. (3)
An examination of the cultural, economic, political, and environmental diversity of Kentucky. In addition to studying the state’s historical evolution, emphasis will be placed on contemporary problems facing the state. Kentucky’s regional, national, and international contexts are discussed. Prereq: GEO 130, 152, 160, or 172.

#GEO 323 MEXICO: ENVIRONMENT, POLITICS AND SOCIETY. (3)
This course examines how politics, the environment, and socio-economic relations have shaped Mexico’s contemporary social and cultural geography. The course examines how historical and contemporary processes such as agrarianism, urbanization (Mexico City), the Mexican Revolution, migration, and development have shaped the politics of identity, community, and geography, with particular attention to questions of gender, indigenous peoples, and popular culture.

GEO 324 GEOGRAPHY OF CENTRAL AND SOUTH AMERICA AND THE CARIBBEAN. (3)
A study of the diversity of physical environments and human societies. The various historical geographies (pre-Columbian and after) of the region are presented as essential to an understanding of contemporary geographical patterns and processes in transport, agricultural, industry and mining, urbanization, and population. Throughout the course case-studies are presented and students are guided as they develop their own case studies. Prereq: GEO 152 or 160 or 172.

GEO 326 GEOGRAPHY OF EUROPE. (3)
This course explores the physical, cultural, and political geography of the European continent. Diversity of populations and physical landscapes is stressed. The geographic context for current events that are changing the face of Europe are presented. Prereq: GEO 152 or 172.

GEO 328 GEOGRAPHY OF THE MIDDLE EAST AND NORTHERN AFRICA. (3)
A comprehensive regional overview, emphasizing cultural adaptation to desert environments. The interplay among religions, cultures, and the physical environment will be examined, along with the region’s position and influence in the global system. Prereq: GEO 152, GEO 160, GEO 172, or consent of instructor. (Same as AAS 328.)

GEO 329 GEOGRAPHY OF THE FORMER SOVIET UNION. (3)
A study of this region’s diverse physical and human landscapes, emphasizing the historical and contemporary interlinkages between the various states. Contemporary problems of the post-Soviet era (such as environmental degradation, economic and regional restructuring, or the international position of the region) will be studied from a geographical perspective. Prereq: GEO 152, 160, or 172.

GEO 330 GEOGRAPHY OF THE INDIAN SUBCONTINENT. (3)
A study of the human, economic, and environmental aspects of India, Pakistan, Bangladesh, Himalayan Nepal and Bhutan, and Sri Lanka. Topics include basic physical and cultural regionalisms, land use and population problems, and patterns of economic development involving urbanization, resources, and industrialization. Prereq: GEO 152 or 160 or 172.

GEO 331 GLOBAL ENVIRONMENTAL CHANGE. (3)
This course focuses on environmental processes (in the atmosphere, hydrosphere, lithosphere and biosphere) and the effects of historic and long-term environmental changes. Climatic change and natural system adjustments will be discussed, but the course will concentrate on human-induced environmental changes. Prereq: GEO 130 or equivalent, or consent of instructor.

GEO 332 GEOGRAPHY OF SOUTHEAST ASIA. (3)
A study of the cultural, economic, and political patterns and processes in mainland and insular Southeast Asia. Major themes examined are how the region’s diverse physical geography, uneven natural resource base, cultural diversity, and colonial heritage provide a background to understanding contemporary development. Prereq: GEO 152 or GEO 160 or GEO 172 or consent of instructor.

GEO 333 GEOGRAPHY OF EAST ASIA. (3)
Provides an understanding of the life and landscapes in East Asian nations, with special focus on China and Japan. Emphasis is placed on contemporary issues of sustainable development, environmental management, minority groups, human rights and gender relations. Prereq: GEO 152, GEO 160, GEO 172 or consent of instructor.

GEO 334 ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN. (3)
This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses Japan’s human and natural environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials, challenges to the management of environment and its resources; and Japan’s role in global economy. (Same as JPN 334.)

GEO 336 GEOGRAPHY OF SUB-SAHARAN AFRICA. (3)
This course focuses on the cultural and environmental geographies of the subcontinent, rural landscapes and ancient and contemporary environmental problems, the historical geography of precolonial and colonial Africa, and the social geography of contemporary economic development. Prereq: GEO 130 and 152, 160, or 172. (Same as AAS 336.)

GEO 351 PHYSICAL LANDSCAPES. (3)
A study of earth surface processes and land forms. The focus is on the analysis and interpretation of earth surface features and topography in terms of process-response mechanisms, and on an understanding of the fundamental physical, chemical, biological, and human processes which create and modify landscapes. The course emphasizes the dynamic nature of land forms and Landscapes, and the interrelationships between land forms and hydrology, climate, soils, and the biosphere. Prereq: GEO 130, or consent of instructor.

GEO 365 SPECIAL TOPICS IN REGIONAL GEOGRAPHY (Subtitle required). (3)
Offers coverage of world regions not usually covered in other geography courses, or in-depth examinations of specific subregions. Topics covered include: elements of climate and physical landscapes; political and economic systems and their historical development and dynamics; social and cultural processes and landscapes. May be repeated to a maximum of six credit hours under different subtitles. Prereq: Any 100-level geography course or consent of instructor.

GEO 399 INTERNSHIP IN GEOGRAPHY. (3)
Provides supervised professional experience in public and private sector positions, and is intended to introduce students to the skills and working environments of careers in geography. Students should consult with a geography faculty member in advance of registering for this class. Prereq: Junior or senior standing in the major.

*GEO 406 FIELD STUDIES IN GEOGRAPHY (Subtitle required). (3)
Field-based, regionally specific study of selected topics in cultural, economic, environmental, physical, political, social, or urban geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: GEO 200.

GEO 409 ADVANCED GIS. (3)
This course is developed to introduce intermediate and advanced topics in geographic information science and spatial analysis including theoretical and applications areas. Building upon a range of GIS software systems this course covers geographic data collection, entry and editing, spatial analysis, interpolation and map development and display. Prereq: GEO 309 or consent of instructor.

GEO 415 MAP INTERPRETATION. (3)
An introduction to reading and interpreting maps. Special attention given to the study of current events that are changing the face of Europe are presented. Prereq: GEO 152 or 172.

GEO 419 INTRODUCTION TO REMOTE SENSING. (3)
This course offers an introduction to remote sensing technologies and their application to land use/land cover analysis, environmental monitoring, natural resources management, and urban planning. This course covers the fundamental remote sensing principles, overview of space/airborne sensors, data acquisition and processing techniques for digital image processing, and applications particular to resource management. Prereq: GEO 309 or consent of instructor.

GEO 422 URBAN GEOGRAPHY. (3)
Examines the relationship between urbanization and the larger social and economic contexts within which city growth occurs. Surveys a range of theoretical perspectives on the internal socio-economic structure and built environment of cities, including the contributions by Chicago School, neoclassical, Marxist, and postmodern theorists. Emphasis also placed on relevant environmental, social, and political problems of cities. Primary focus is on North American cities, but includes cross-cultural comparisons. Prereq: GEO 130 or 172 or consent of instructor.

GEO 430 PHYSICAL GEOGRAPHY FOR TEACHERS. (3)
The basic content of this course is quite similar to GEO 130 Physical Geography, with emphasis on basic content, relevant environmental, social, and cultural landscapes and environments. May be repeated to a maximum of 15 credits with change in field site. Prereq: GEO 200 or consent of instructor.

GEO 431 POLITICAL GEOGRAPHY. (3)
This course examines the relationship between political economics and the biophysical environment and seeks to understand the challenges of development, agriculture, gendered divisions of labor, and the representation of nature in the context of the globalization of economic relations.
Course Descriptions

**GEO442G POLITICAL GEOGRAPHY.** (3)

This course examines how space and political activities are related. Major topics will include: history of political geographic thought; geopolitics; nationalism and identity; the territorial state; regionality; conflicts; borders and frontiers, and electoral geography, at a range of scales.

**GEO451G FLUVIAL FORMS AND PROCESSES.** (3)

An examination of erosion, deposition, and sediment transport processes associated with flowing water, landforms associated with fluvial processes, and landscape evolution in areas dominated by fluvial dissection and deposition. Field trips may be required. Prereq: GEO 351 or GLY 341.

**GEO452G WORLD GEOGRAPHY FOR TEACHERS.** (3)

Approaches to teaching geographic themes and concepts within the context of the world’s major regions and countries in grade levels K-12. Addresses those issues and problems that affect world regions in the context of the following broad themes: location, place, movement, regions, and human-environment interactions. Among those topics discussed are the use and importance of maps and related resource materials in instruction, presentation of themes at different grade levels, and identification and utilization of a broad range of reference materials for student and teacher use. Lecture, ten hours per week for four weeks.

**GEO455 GLOBALIZATION AND THE CHANGING WORLD ECONOMY.** (3)

This course provides an advanced review of the ongoing restructuring of the geography and organization of the capitalist global economy. Emphasis will be placed on contemporary issues (such as industrial restructuring or the financial industry), and specific regions (such as Kentucky or China). Competing theories (classical, neoclassical, and marxian) and empirical and analysis aimed at explaining these patterns and processes are discussed and applied.

**GEO465 SPECIAL TOPICS IN GEOGRAPHY (Subtitle required).** (3)

Offers coverage of issues and themes not covered in other geography courses, or in-depth examinations of specific issues and themes. Topics covered will commonly address emerging national and global issues of both general and scholarly interest. May be repeated for a maximum of six credit hours (under different subtitles). Prereq: Any 100-level geography course or consent of instructor.

**GEO470G AMERICA’S CULTURAL GEOGRAPHIES.** (3)

This course examines the diversity of cultural attributes (both tangible and intangible) in the American landscape through a range of perspectives, e.g., environmental/historical, politics, economic, gender, race, etc., in an understanding of how deeply held values manifest in minds and places. Prereq: GEO 172 or ANT 220.

**GEO475G MEDICAL GEOGRAPHY.** (3)

An examination of the basic principles of the two major traditions of medical geography: disease ecology and medical care. Examined are the etiology, diffusion, and distribution of selected major diseases. Issues pertaining to the spatial-temporal distribution, accessibility and utilization of medical care resources are presented. Prereq: GEO 172 or consent of instructor.

**GEO485G URBAN PLANNING AND SUSTAINABILITY.** (3)

An analysis of urban and regional planning with emphasis on the contemporary urban and regional planning activities. Prereq: GEO 285 or consent of instructor.

**GEO490G AMERICAN LANDSCAPES.** (3)

A review and analysis of America’s vernacular landscapes. Topics include: the history of settlement by Europeans, Africans, and others; evolving political allegiances; and the expansion of agricultural and industrial technologies in the context of diverse physical environments. The role of political philosophy in landscape development and historic preservation will be highlighted. Prereq: GEO 172 or consent of instructor.

**GEO491G JAPANESE LANDSCAPES.** (3)

A study of the landscapes of Japan as a vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as JPN 491G.)

*GEO499G SENIOR RESEARCH SEMINAR.*** (3)

Course is intended to provide a capstone experience in geographical research and problem-solving through demonstrating students’ ability to identify an appropriate research topic in geography; developing and implementing appropriate research strategy; and presenting research results. Prereq: GEO 404G.

**GEO505G PRACTICUM IN CARTOGRAPHY.** (3)

Experience credit in which a small number of advanced students work under the direct supervision of the faculty or staff cartographer and in conjunction with other faculty members on departmental and contracted projects. May be repeated to a maximum of six hours. Prereq: GEO 305 and GEO 506 and consent of instructor.

**GEO506G INTRODUCTION TO COMPUTER CARTOGRAPHY.** (3)

A basic introduction to computer-assisted cartography. Emphasis on basic computer graphics literacy and automated techniques for spatial data acquisition, storage, processing, and output. Introduction to current mainframe, workstation, and desktop mapping programs. Prereq: GEO 305 or permission of instructor.

**GEO509G WORKSHOP IN GEOSPATIAL TECHNOLOGIES.** (3)

This course focuses on the development of applied GIS skills and follows a participatory workshop model with intensive, hands-on collaboration with community partners. The course covers a full range of collaborative GIS: working with team members and project partners to identify project goals, acquiring and preparing spatial data for GIS analyses, communicating with clients to assess progress, managing spatial data, and producing necessary maps and analyses. Prereq: GEO 309 or GEO 609 or consent of instructor.

**GEO530G BIOGEOGRAPHY AND CONSERVATION.** (3)

An introduction to the geographic patterning of biological diversity, exploring its origins, dynamics, and present trends. Examines the interplay among physical conditions, ecological interactions, evolutionary processes, and the historical movements of organisms and land masses as they have combined to affect the distribution of species, with particular attention to the application of biogeographic knowledge to current problems of species loss and conservation. Prereq: Two semesters of introductory biology or physical geography, or consent of the instructor. (Same as BIO 530.)

**GEO531G LANDSCAPE ECOLOGY.** (3)

This course explores the field of landscape ecology—the causes, development, importance of ecological processes, and the interactions of dynamic processes over broad spatial scales that can serve as foundation for decision-making and problem solving. Prereq: Six hours of physical geography or biology.

**GEO544H HUMAN POPULATION DYNAMICS.** (3)

The study of human population distributions, densities, and growth patterns through analyses of the processes of fertility, mortality and mobility. Topical coverage includes the environmental, social, political, economic, and behavioral impacts of populations on human activities. Emphasis is placed on the role of contemporary meanings and influences of population diversity, with special attention given to issues of gender, race, and class.

**GEO545G TRANSPORTATION GEOGRAPHY.** (3)

This course addresses concepts critical to understanding transport systems. Economic, social and political as well as spatial perspectives to transport matters are emphasized. Problems, issues and trends facing the sector in both the developed and developing world along with appropriate responses are paramount. Topics include the bases and impact of transport, communications, mass transit, Third World cities, regional development, shipping, railway policies, and the dynamics of airline survival. Prereq: GEO 445 or consent of instructor.

**GEO546G TOURISM AND RECREATION GEOGRAPHY.** (3)

Tourism is the world’s fastest-growing economic sector, creating and transforming places, regions and broader geographies of travel, movement, and investment. The course will examine concepts, models, and theories in the study of tourism and recreation. Selected themes include major travel flows and patterns; economic, environmental, and socio-cultural impacts; mass “new” (e.g., eco-tourism, adventure tourism, extreme tourism) types of tourism; heritage tourism; marketing; place boosterism; tourism and recreation planning; and the politics of tourism. Local, national, and international examples in both developed and developing countries are discussed. Prereq: GEO 152, 172, 455, or consent of instructor.

**GEO550G SUSTAINABLE RESOURCE DEVELOPMENT AND ENVIRONMENTAL MANAGEMENT.** (3)

A study of the theories and strategies for environmental management and sustainable development of resources. Topics covered include contemporary environmental degradation impacts, resource use and exploitation, environmental change, design of appropriate responses are paramount. Topics include the bases and impact of transport, communications, mass transit, Third World cities, regional development, shipping, railway policies, and the dynamics of airline survival. Prereq: GEO 130 or GEO 210 or consent of instructor.

**GEO551G JAPANESE MULTINATIONAL CORPORATIONS.** (3)

A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinational policies on the environment; and local economy. Prereq: Consent of instructor. (Same as JPN 551.)

**GEO560G INDEPENDENT WORK IN GEOGRAPHY.** (3)

Individualized study and/or research intended to provide opportunities for students to explore topics in more depth than is offered in existing courses, or to address topics not covered in existing courses. Students work with a faculty supervisor in defining a specific area of study, appropriate learning objectives, and suitable evaluation criteria. Course format may range from critical reading of selected literatures to innovative research projects. Students should identify and consult with faculty supervisor well in advance of registration for this course. Prereq: Restricted to Geography majors with GPA of 3.0 or above in the department.

**GEO565G TOPICS IN GEOGRAPHY.** (3)

Discussion, readings, and papers focusing on relevant topics in geography directed by a staff member having specific competence for the topics under study. Current research developments in particular geographic subfields will be stressed. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

**GEO585G AGING AND ENVIRONMENT.** (3)

Explores the elderly person’s changing experience of environment. Physiological, psychological, social, structural, and political changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GRN 585.)
GEO 600 INTRODUCTION TO METHODS IN GEOGRAPHY. (3)
A broad survey of methods and methodological debates of research in human/physical geography. Emphasis on contemporary research examples. Prereq: Graduate standing.

GEO 609 GISCIENCE FUNDAMENTALS. (3)
This course introduces students to the use of geographic information systems and the science behind them. Focus includes an introduction to topics of geographic information and data: the sources, constraints, and uses of data; the techniques for processing and visualizing spatial data and the methodological, epistemological and ontological issues associated with GIScience.

GEO 610 ANALYTICAL METHODS IN GEOGRAPHY. (3)
An introduction to the application of analytical methods to geographic problem solving. Topics cover sampling theory, probability theory and both parametric and nonparametric statistical techniques. Prereq: STA 570 or equivalent or consent of instructor.

GEO 619 REMOTE SENSING FUNDAMENTALS. (3)
This course covers the use of remote sensing technologies and their application in natural resource management, land use/land cover analysis, city and regional planning and environmental monitoring. This course covers the basic remote sensing principles, the range of space/air borne sensors/data, key techniques for digital image processing, and applications particular related to diverse land surfaces including the built environment, water, soil and vegetation.

GEO 655 SPECIAL STUDY OF SYSTEMATIC GEOGRAPHY. (3)
The application of the methods of systematic geography to particular special studies in topical areas, such as conservation, urban areas, climatology, cartography, or others. May be repeated to a maximum of six hours. Prereq: Appropriate 500-level course work in systematic or topical geography (e.g., conservation, urban, climatology, cartography).

GEO 706 ADVANCED ANALYTICAL METHODS IN GEOGRAPHY. (3)
A survey of the application of multivariate statistical techniques to geographic problem solving. Prereq: GEO 600 or consent of instructor.

GEO 702 CONCEPTS IN GEOGRAPHY. (3)
Contemporary geographic concepts and theories are examined with emphasis on concepts within human geography, especially with reference to the economic, urban, cultural, and population subfields within the discipline. Prereq: Graduate student status.

GEO 705 ADVANCED GEOGRAPHIC METHODS (Subtitle required). (3)
In-depth study and application of one or more research methods/techniques (e.g., qualitative methods, ethnography, textual analysis, visual analysis, GIS). Intended to offer M.A. and Ph.D. students advanced methodological specialization in geography. May be repeated to a maximum of six credits under different subtitles. Prereq: GEO 600 or equivalent.

GEO 706 ADVANCED FIELD STUDIES (Subtitle Required). (1-9)
Field-based, regionally specific study of selected topics in cultural, environmental, political, social, or economic geography. May be repeated to a maximum of 18 credits with change in field site. Prereq: Consent of instructor.

GEO 707 DEVELOPMENT OF GEOGRAPHIC THOUGHT. (3)
An analytical review of the evolution of geographic thought, in terms of concepts, methodologies and scholars, emphasizing the basic literature through a series of topics.

GEO 708 GEOGRAPHIC INFORMATION SYSTEMS RESEARCH METHODOLOGIES. (3)
Following a broad overview of GIS, remote sensing, GPS, and other relevant information technologies as information collection, presentation, and analytical aids, this course will consider current developments of geographic information technologies. These include, but are not limited to, field GIS, public participation GIS, participatory information technology, collaborative environments, and spatial decision-making. Discussion of these developments will be complemented by a rigorous examination of the theoretical and methodological issues. Prereq: GEO 409G or its equivalent, or consent of instructor.

GEO 709 ADVANCED GISCIENCE. (3)
This course explores advanced applications and topics within GIScience including data mining, scripting, point pattern analysis, data interpolation, geospatial modeling and network analysis and the methodological, epistemological and ontological issues with the classification requirements and analytical capabilities of GIScience. Prereq: GEO 609 or consent of instructor.

GEO 711 CULTURAL STUDIES AND GEOGRAPHY (Subtitle required). (3)
Seminar in cultural studies and geography, including, for example, interpretation and analysis of the built environment; space and representation; the political economy of landscape production; regional imagery; media studies; popular culture; the social construction of community; historic preservation; recreation; tourism and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 712 DEVELOPMENT STUDIES AND GEOGRAPHY (Subtitle required). (3)
Seminar in selected topics in the policies, practices, and processes of development, including, for example, political economy perspectives on development; anti-development and postcolonial theory; economic restructuring and transition economies; gender and development; the relations between development and migration, transportation and tourism; environmental management and sustainable development. May be repeated to a maximum of nine credits under different subtitles.

GEO 713 ECONOMIC GEOGRAPHY (Subtitle required). (3)
A seminar in economic geography, including, for example, global, regional, and local economic restructuring; global financial systems; foreign direct investment and trade; geography of multinational corporations; geography of labor; spaces of production and spaces of consumption; gender and economic space; space-time convergence; information and communications. May be repeated to a maximum of nine credits under different subtitles.

GEO 714 POLITICAL GEOGRAPHY (Subtitle required). (3)
A seminar in political geography, including, for example, electoral systems; state theory; post-Cold War democratization; the geography of revolutionary change; critical geopolitics; political economy of environmental movements; political economy of globalization discourses and practices. May be repeated to a maximum of nine credits under different subtitles.

GEO 715 GEOGRAPHY AND SOCIAL THEORY (Subtitle required). (3)
Seminar in geography and social theory, including, for example, theories of human spatiality; marxist, neo-marxist, and post-marxist theory; postmodernism and poststructuralism; feminist theory; actor network theory; identity theory; geographic thought and society; technology and society. May be repeated to a maximum of nine credits under different subtitles.

GEO 717 URBAN GEOGRAPHY (Subtitle required). (3)
Seminar in urban geography, including, for example, urban morphology; urban systems; the local state; urban social fragmentation; conflicts over urban growth and development; urban transportation planning; urban historical geography; gender and urban space; race and urban space; urban landscapes. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 718 TOPICAL SEMINAR IN GEOGRAPHY OF ENVIRONMENT AND RESOURCES (Subtitle required). (3)
Study of selected topics on agriculture resource allocation, resource conflict, public land policy, natural hazards, environmental management, energy and biogeography. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 719 GEOSPATIAL TECHNOLOGIES (Subtitle required). (3)
A seminar in the social construction of geospatial technologies and the implications of their use. Topics may include crowd-sourcing, privacy and surveillance, open source software, code/ space, censorship and control, copyright and locative media usage. May be repeated to a maximum of nine credits under different subtitles.

GEO 720 REGIONAL STUDIES (Subtitle required). (3)
Seminar in the study of selected topics in cultural, environmental, political, social, or economic geography, set within a regional context. May be repeated with change in regional focus to a maximum of nine credits under different subtitles.

GEO 721 TOPICAL SEMINAR IN PHYSICAL GEOGRAPHY (Subtitle required). (3)
Examination of selected topics in geomorphology, hydrology, pedology, biogeography, climatology, and earth system science. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 722 SOCIAL GEOGRAPHY (Subtitle required). (3)
Seminar in social geography, including, for example, race and gender, feminist geography, health care, disease and society; the geography of AIDS; the geography of aging and the life course; poverty and social policy; human behavior in space and time; population and migration studies; spatial structure of social networks; transportation of disadvantaged groups. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

GEO 731 EARTH SURFACE SYSTEMS. (3)
A treatment of earth surface systems from the perspective of complex systems theory. The course takes a holistic viewpoint, emphasizing interactions between the atmo-, litho-, hydro- and biospheres and the manifestations of those signatures in soils, landforms, and ecosystems. Prereq: Consent of instructor.

GEO 740 RESEARCH INTERNSHIP (Subtitle required). (1-6)
To provide students with course credit for faculty supervised internships with governmental and non-governmental organizations. May be repeated to a maximum of nine credits.

GEO 741 TEACHING PRACTICUM. (1)
Introduction to teaching, with particular focus on pedagogical issues in geography courses. Intended to provide students with background sufficient to enable them to assume full responsibility for university and college level courses.

GEO 742 PREPARING FUTURE FACULTY IN GEOGRAPHY. (1)
Introduction to the professoriate, with particular focus on geography within the academy. Intended to provide students with background sufficient to assume responsibility as new faculty members in universities and colleges.

GEO 743 RESEARCH PROPOSALS AND GRANT WRITING. (1)
Introduction to basic geographic research proposal design standards, with particular emphasis on the requirements of granting agencies.

GEO 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.
GEO 749 DISserTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

GEO 767 DISsERtATION RESIDENCY CREDIT. (2) Residence credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GEO 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

GEO 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12) May be repeated indefinitely.

GEO 772 SPECIAL RESEARCH PROBLEMS IN GEOGRAPHY. (1-6) Open to doctoral candidates who have the necessary training and ability to conduct research and be placed on skills and vocabulary needed to discuss topics related to German culture. Prereq: GER 202 or equivalent.

GER 101 BASIC GERMAN. (4) Fundamentals of German with development of the four basic skills: reading, writing, listening, and speaking.

GER 102 BASIC GERMAN. (4) Continuation of GER 101. Prereq: GER 101, or one year of high school German, or equivalent.

GER 103 FAIRY TALES IN EUROPEAN CONTEXT. (3) Introduction to major types of fairy tales in European historical and literary context, covering the period from the Renaissance to the present. Taught in English.

GER 104 TURNING POINTS: (Subtitle required). (3) An introductory course exploring the many ways in which art, architecture, literature and film have come to define and represent major urban centers in the German-speaking world. Focus in a given semester will be on a special topic through its origins in European literature to a global film phenomenon in the 21st century.

GER 105 GERMAN FILM TODAY. (3) An introductory course that explores such themes in German literature as Fathers and Daughters, Fathers and Sons, Trials, Judgments and Justice, and Conceptions of the Self. All readings are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 202 or equivalent.

GER 106 POPULAR FORMS. (3) An introductory course that focuses on social, political, anthropological and aesthetic aspects of popular forms of German literature. Readings include fairy tales, folk songs and legends, children’s literature, detective stories, comics and other popular literary forms. Prereq: GER 202 or equivalent.

GER 107 HISTORY OF GERMAN CULTURE. (3) An introduction to German culture with emphasis on the epochs important to the development of modern German-speaking countries. Readings in German from philosophy, the sciences, the arts, history, politics and literature. Visual materials documenting high culture and everyday life. Taught in German. Prereq: GER 205 or 206, or equivalent.

GER 109 INTERMEDIATE GERMAN COMPOSITION AND CONVERSATION II. (3) An introductory course that explores such themes in German literature as Fathers and Daughters, Fathers and Sons, Trials, Judgments and Justice, and Conceptions of the Self. All readings are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 202 or equivalent.

GER 110 HISTORY OF GERMAN CULTURE. (3) An introduction to German culture with emphasis on the epochs important to the development of modern German-speaking countries. Readings in German from philosophy, the sciences, the arts, history, politics and literature. Visual materials documenting high culture and everyday life. Taught in German. Prereq: GER 205 or 206, or equivalent.

GER 111 CONTEMPORARY GERMAN LITERATURE AND CULTURE. (3) Selected works of contemporary German literature by Austrian, German, and Swiss authors are read relative to the economic, social, political, artistic and ideological developments in the three countries of the German-speaking world. Taught in German. Prereq: GER 307.

GER 112 WAR, PEACE, AND TERROR IN GERMANY AND EUROPE. (3) This course explores the topics of war, peace, and terror in the context of Germany, Central Europe, and beyond: in the desire for peace and for war; from depictions of battle to reflections on policy and strategy; and from the logic of terror to its horrifying effects.

GER 113 GLOBAL HORROR. (3) Global Horror is an introduction to the horror film that traces the genre’s development from origins in European literature to a global film phenomenon in the 21st century.

GER 114 GERMAN SPEAKING EUROPE. (Subtitle required). (3) This course will place an important aspect of German culture in the broader context of European cultural and historical developments. Focus in a given semester will be on a special topic through which significant developments in literature and the arts may be considered in relation to the historical context of such developments. Possible topics include Literature of the Holocaust and Terrorism in the German Context, The Culture of Sport, and Children’s Literature. All readings will be in English. Students taking the course for a German major or minor will complete a number of assignments in the German language. May be repeated to a maximum of six credits under different subtitles.
GER 361 GERMAN CINEMA. (3)
A history of the cinema in the German-speaking world from its beginnings to the present, emphasizing the evolution of the production, distribution and reception of film in relation to changing political, social, economic, ideological and literary/artististic contexts. Some consideration of film theory and criticism in conjunction with class discussion of individual films. Viewing of films (silent or German dialogue with English subtitles) outside of class is required. Class taught in English.

GER 363 GERMANIC MYTHOLOGY. (3)
Overview of the mythological traditions of the Germanic peoples and their continuing presence in Western culture. Prereq: MCL 270.

GER 395 INDEPENDENT WORK IN GERMAN. (1-3)
This course is designed for students who wish to do advanced work in German on any subject. May be repeated up to a maximum of six credit hours. Prereq: Major and a standing of 3.0 in the department.

GER 415G MAJOR GERMAN AUTHORS (Subtitle required). (3)
The study of a single author or combination of authors in the social, political and cultural context of their day. Special concerns include the interrelationship between literary production and biography, and author's relation to literary tradition, and his/her historical as well as current relevance. May be repeated once to a maximum of six credits with a new author or complex of authors. Taught in German. Prereq: GER 311 or 312 or equivalent.

GER 416G GENRES OF GERMAN LITERATURE. (3)
The study of a particular genre in German literature with readings of representative examples and with inquiry into concepts of genre in general. May be repeated once to a maximum of six credits with emphasis on a different genre. Taught in German. Prereq: GER 311 or 312 or equivalent.

GER 420G SPECIAL STUDIES IN GERMAN LITERARY AND CULTURAL HISTORY (Subtitle required). (3)
Intensive study of selected topics in German literary and cultural history, such as Fascism, War and Literature, Expressionism in Art and Literature, and German Women Authors: Beyond Kinder, Küche, Kirche. Students are encouraged to propose topics. May be repeated once, if topic changes, for a maximum of six credits. Taught in German. Prereq: Senior standing or consent of instructor.

GER 495 GERMAN STUDIES CAPSTONE. (1-3)
GER 495 German Studies Capstone is designed to provide German Studies majors an opportunity to develop and present a research project in collaboration with a faculty member. In addition, the course facilitates student completion of a language learning portfolio that demonstrates and documents proficiency in German language and culture as well as intercultural skills. This is a 1-3 credit capstone course for German Studies majors. Prereq: Declared German major and 90+ hours of course work.

GER 507 ADVANCED GERMAN COMPOSITION AND CONVERSATION. (3)
Further development of conversational skill and practice in writing stylistically appropriate German. Study of finer points of grammar. Discussion of special topics and theme writing. Prereq: GER 308 or equivalent.

GER 520 SPECIAL TOPICS SEMINAR. (3)
Investigation of a topic pertinent to the advanced study of German language, literature and culture. May be repeated once with new topic. Prereq: GER 415G, 416G, 420G or equivalent.

GER 532 HISTORY OF THE GERMAN LANGUAGE. (3)
A survey tracing the development of German from its earliest stages to the present, with introduction to basic concepts of historical linguistics. Prereq: GER 308 or equivalent.

GER 553 THE TEACHING OF GERMAN. (3)
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on German. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

GER 612 STUDIES IN LITERARY THEORY. (3)
Course will explore such fundamental issues as the definition of literature, interpretation and evaluation, the reading process, and literary life from the perspective of competing theoretical systems.

GER 615 STUDIES IN MAJOR AUTHORS. (3)
Explorations into one or several major figures of German literature. Reading of primary texts and pertinent scholarship together with an investigation of the authors' literary, social, or political significance during contemporary or later periods. May be repeated to a maximum of 12 credits.

GER 616 STUDIES IN GENRE. (3)
One major genre or a group of related genres. Readings in genre theory and in the key texts from various periods; study of the development of forms, techniques, and ideas. May be repeated to a maximum of nine credits.

Note: The series of courses GER 620-630 provides a general framework for the systematic study of German literature in its cultural setting and delimits various issues to be investigated further in more advanced courses, depending on variable 700-level courses. Reading and discussion focus on documents central to the literary life of a given period and to the understanding of its institutional and biographical basis as well as its regional, sociopolitical, motivational, poietological, and ideological diversity. Each course also emphasizes critical methodology and tools of scholarship and identifies new directions for basic research.

GER 620 STUDIES IN THE MIDDLE AGES. (3)
From Carolingian times to the late Middle Ages.

GER 624 STUDIES IN THE EARLY MODERN ERA. (3)
The Age of Renaissance, Reformation, and Baroque.

GER 625 STUDIES IN THE 18TH CENTURY. (3)
Enlightenment to Classicism.

GER 629 STUDIES IN THE 19TH CENTURY. (3)
Romanticism to Naturalism.

GER 630 STUDIES IN THE 20TH CENTURY. (3)
Turn-of-the-century Modernism to the present.

GER 650 MULTIDISCIPLINARY GERMAN STUDIES SEMINAR (Subtitle required.) (3)
A team-taught, multidisciplinary exploration of a set of issues that effect cultural, literary, geographical, historical, political, philosophical or social developments in Germany in relation to surrounding geographical areas. The seminar will foster multidisciplinary perspectives in the study of Germany, its inhabitants, and cultural traditions, in historical, comparative, and constructive context. Seminar readings in German, discussion in English. Seminar foci will vary year to year, including such topics as “Individual and Collective Identity Formations in post-Enlightenment Germany,” “Constructions of German Heimat,” and “Freed, Culture, Society.” May be repeated to a maximum of six credits.

GER 653 RESEARCH AND ISSUES IN TEACHING GERMAN. (1)
This course builds on GER 553, Methods of Teaching German. The course will address a range of educational issues beyond the teaching of foreign language skills as well as acquaint students with research methods in both a theoretical and practical manner. May be repeated to a maximum of four semesters. Coreq: GER 553.

Note: The course series 720-730 offers the opportunity for the more specialized and greater in-depth investigation of various topics encountered in the corresponding, but more broadly conceived, period courses of the 620-630 series. With changes in topic, each course number of the 720-730 series can be repeated a total of three times - thus enabling the student at the more advanced level to specialize within a particular period or periods.

GER 721 SPECIAL TOPICS IN GERMAN LITERARY AND CULTURAL HISTORY. (3)
This course allows for the in-depth study of specific topics in German literary and cultural history encountered in the broadly conceived period courses of the 620-630 series. With changes in topic the course may be repeated to a maximum of nine credits. Prereq: Permission of Director of Graduate Studies.

GER 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GER 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

GER 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

GER 781 INDEPENDENT STUDIES IN GERMAN. (1-3)
Course allows individual students to pursue independent research on a selected aspect of German linguistic, literary or cultural history. May be repeated once if topic changes. Prereq: Permission of Director of Graduate Studies.

SCANDINAVIAN (Offered as required)

GER 141 SWEDISH. (3)
Introduction to Swedish with emphasis on grammar, pronunciation, reading and writing. Basic information on Swedish customs, history, geography, folklore. Students planning to fulfill part of a language requirement should be aware that the scheduling of Swedish III and IV will be subject to student demand and the availability of a qualified instructor.

GER 142 SWEDISH. (3)
Continuation of Swedish I with additional emphasis on conversation. Prereq: GER 141 or equivalent.

GER 610 OLD ICELANDIC. (3)
Permission of Director of Graduate Studies.

GER 620-630
Provides a general framework for the systematic study of German literature in its cultural setting and delimits various issues to be investigated further in more advanced courses, depending on variable 700-level courses. Reading and discussion focus on documents central to the literary life of a given period and to the understanding of its institutional and biographical basis as well as its regional, sociopolitical, motivational, poietological, and ideological diversity. Each course also emphasizes critical methodology and tools of scholarship and identifies new directions for basic research.
GRN Gerontology

**GRN 250 AGING IN TODAY’S WORLD.**
This class explores the processes and meanings of “growing old,” focusing on influences from childhood through adolescence and adulthood, with constant attention to how these processes and meanings are situated in time and space and eventually inform individual and societal conceptions of and actions concerning old age. The many faces of aging are examined from an array of disciplinary perspectives using selected readings, film documentaries, consideration of personal/family histories, and a series of exercises that allow students to place one’s own life experience and thoughts of growing old in a broader societal context.

**GRN 513 GERIATRIC PHARMACY.**
A course designed to educate students in the basic knowledge of attitudes and skills required to meet the pharmacological needs of the elderly. Topics include discussions of the aging process, physiological and psychological changes in the elderly, how these changes influence the patient’s compliance and the responses to drug and nondrug treatments, monitoring drug use in long-term care facilities, and special community services available to the elderly. Prereq: PHR 849, 852, 853, 854 and 856 or permission of instructor. (Same as PPS 813.)

**GRN 585 AGING AND ENVIRONMENT.**
Explores the elderly person’s changing experience of environment. Physiological, psychological, and social changes are related to adjustment within urban and rural community environments, special housing for the elderly, and long-term care environments. Prereq: Graduate or advanced undergraduate standing and consent of instructor. (Same as FAM/GEO 585.)

**GRN 600 A STUDY OF THE OLDER PERSON.**
This didactic/experiential course is designed to give the student an overview of the experience of growing old by focusing on the individual older person. Framed from a cell to society perspective, didactic lectures will focus on historical, demographic, biological, psychological, social, environmental, life course and humanistic dimensions of growing old. Emphasis is placed on the relationship between personal experience and societal context. The experiential component will consist of having each student interact with a healthy older mentor who will provide insight from the perspective of lived experience. Prereq: Admission to the Ph.D. Program in Gerontology.

**GRN 602 CERTIFICATE PRACTICUM IN GERONTOLOGY.**
This is a field experience of approximately 220 hours focused on aging. Content, site, and supervisor may vary; but the student must have an objective-based proposal approved prior to beginning the practicum. Prereq: Acceptance into the Graduate Certificate in Gerontology.

**GRN 610 PSYCHOLOGY OF AGING.**
This is a graduate level seminar on the psychology of aging. The course will focus on many of the major topics and theories relevant to understanding the aging process. It focuses on health behaviors, sensation and perception, cognitive abilities, personality, social interactions, motivation and emotion, psychological disorders, end of life issues, and successful aging. The course examines the topics above from a normal aging perspective, atypical aging, successful aging, and demonstrates the interrelationships between the topics to address the aging individual. The course will also focus on the methods used to conduct psychological research with an aging population.

**GRN 612 BIOLOGY OF AGING.**
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as ANA/BIO/PGY 612.)

**GRN 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MED/SCIENCE TEACHING).**
A two (2) credit seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as PGT 615.)

**GRN 616 TEACHING SEMINAR IN GERONTOLOGY.**
The purpose of this seminar is to prepare doctoral students as classroom instructors, and to enhance instructional skills of those students with teaching experience. Emphasis is placed on developing the fundamental knowledge and skills needed to survive and excel in the classroom. Topics covered include: course development strategies; lecture preparation and delivery; interactive and group learning; writing for learning; student evaluation; student advising; and instructional ethics and responsibilities. Seminar activities include development of instructional materials, thematic discussion, and demonstrations/simulations of classroom experiences. Prereq: GRN 660 and GRN 620, or consent of instructor.

**GRN 617 TEACHING PRACTICUM IN GERONTOLOGY.**
This practicum provides a forum for continued development of teaching skills by concurrently combining classroom instruction experience with formal instructor debriefing sessions. Problematic and successful experiences will be discussed, and specific instructional concepts and issues will be addressed in depth. Prereq: GRN 616 and concurrent classroom teaching.

**GRN 618 EPIDEMIOLOGY OF AGING.**
This course introduces the application of epidemiologic methods to the study of older persons. Prereq: Enrollment in a Public Health degree and SPH 605/PM 620 Intro to Epidemiology and GRN 650, or consent of instructor. (Same as SPH 616.)

**GRN 620 HUMAN AGING AND ADJUSTMENT.**
The intent of GRN 620 is to provide continued development (from GRN 600) of critical interdisciplinary skills in studies of the aging process. Students will, as a group, identify a single central issue associated with aging and conduct comprehensive literature reviews and appropriate research to thoroughly address that issue. Prereq: GRN 660 and admission to the Ph.D. program in gerontology.

**GRN 644 DEMOGRAPHY AND AGING.**
This course examines the dynamics of human population distributions, densities, and growth patterns as they relate to population aging. The essential demographic processes of fertility, mortality, and morbidity are addressed from multiple disciplinary perspectives, and topical coverage includes the environmental, social, political, economic, and cultural impacts on personal demographic behavior and population change. Emphasis is placed on historic and contemporary meanings and influences of population diversity, and how this diversity affects the patterns and consequences of aging across space and time.

**GRN 650 RESEARCH DESIGN IN GERONTOLOGY.**
This course will provide training in research design appropriate for the study of aging and the aged and will critically assess special considerations involved in studying this population. Topics to be covered will include: philosophy of science; data sources for research on aging (including medical informatics and clinical epidemiology sources); the use of animal models in aging research; special design considerations for the study of aging (reconciling age, period, and cohort effects); longitudinal research; measurement tools for assessing the elderly [functional assessment, ADLs, life satisfaction scales, etc.]; issues in interviewing older people; qualitative methods in aging research; the ethics of research on aging and the aged. Prereq: Admission to Gerontology Ph.D. Program.

**GRN 651 QUALITATIVE GERONTOLOGY.**
This course (1) critically evaluates different qualitative epistemologies including biography, phenomenology, grounded theory, ethnography and the case study; (2) assesses the value of alternative qualitative methodologies for gaining deeper understanding of the experience of elders; (3) explores practical issues in employing such methodologies; and (4) provides opportunities for participants to engage in different styles of qualitative research. Prereq: Graduate standing.

**GRN 653 LABORATORY RESEARCH IN GERONTOLOGY.**
Students will be exposed to current biomedical techniques by conducting supervised research in a laboratory setting. Prereq: Permission of instructor.

**GRN 655 INTEGRATIVE STUDIES IN GERONTOLOGY.**
This seminar is designed to provide gerontology doctoral students the opportunity to place individual dissertation topics within the broader field of gerontology, and to broaden the authority with which the students engage in their dissertation work. Although work will largely be independently driven, frequent class meetings provide ongoing feedback from the group on progress and allow all participants to learn from each others work. Prereq: Completion of gerontology core requirements.

**GRN 660 AGING ISSUES AND FAMILY RELATIONS.**
The study of dynamics of family interactions and issues when some family members are elderly. Emphasis is placed on perspectives from multiple generations and across various kin categories. (Same as FAM 660.)

**GRN 704 MENTAL HEALTH AND AGING.**
The aim of this class is to provide some breadth and selected depth in the area of Mental Health and Aging, aimed at research perspectives. Various psychiatric syndromes will be evaluated in lectures and throughout the readings in relation to prevalence, assessment, etiology, and treatment in reference to research in older adults. Prereq: Graduate student status.

**GRN 705 COGNITIVE AGING.**
This is a graduate level seminar on cognitive aging. Topics to be addressed include theories of aging, memory, sensation, and perception, attention, language, social cognition, intelligence, decision-making, and dementia.

**GRN 706 HEALTH PROMOTION AND AGING.**
In this class health promotion in old age will be examined. The theory behind health promotion programs and the status of existing health promotion program for older adults will be reviewed and discussed. Finally, the knowledge acquired in class will be used to develop and demonstrate an innovative health promotion program for older adults. Prereq: Graduate student standing.

**GRN 710 AGING OF THE NERVOUS SYSTEM.**
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease and dementia. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA/PGY/PHA 710.)

**GRN 715 HEALTH POLICY AND AGING.**
This course will present an overview of health policy in the United States as it affects the older population. It will provide an overview of the health care system, allocation of health services across the population and projected impact of the increase in the aging population on health care delivery. Various health policy proposals will be analyzed with a focus on their impact on the older population. (Same as HA 715.)
Course Descriptions

GRN720 GERONTOLOGY/GERIATRIC DENTISTRY. (1)
This course is designed to help students gain an appreciation for the significant opportunities and challenges the aging population will bring to their oral health practice. This course will provide students basic knowledge and information in gerontology/geriatric dentistry. Lecture, 17 hours. May be repeated to a maximum of two credits. Prereq: Permission of course director.

GRN731 ELDER MISTREATMENT. (3)
This course reviews major issues and trends related to elder mistreatment. The course emphasizes individual and systemic issues related to elder abuse, neglect, exploitation, and self-neglect on individual, local, state, and federal levels. Special consideration is given to dynamics that shape past, current, and future issues related to elder mistreatment. Prereq: Graduate student status and/or permission of instructor.

GRN740 DISSERTATION RESEARCH. (0-12)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

GRN767 DISSEMINATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

GRN769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

GRN770 SPECIAL TOPICS IN GERONTOLOGY. (1-3)
This course is designed to present contemporary topics in gerontology in either a lecture or seminar format. It is intended to provide students with opportunities to be informed of current issues in gerontology as well as to explore in-depth studies of particular gerontological topics. May be repeated to a maximum of twelve credits.

GRN771 AGING IN RURAL ENVIRONMENTS. (3)
In the context of a changing rural environment, this seminar explores the life circumstances and life experience of rural elders in relation to the health and well-being of this population.

GRN772 AGING AND THE LIFE COURSE. (3)
This seminar will establish a common foundation of knowledge through examinations of traditional “life courses” influencing individuals as they age through time, including household and family change, education and work, and housing. This foundation will be built upon using critical examinations of such themes as gender roles, spatial experience, cognitive change and memory, and structural effects on life trajectories. Emphasis will be placed on surveys of existing literature and on integrating various life course elements within social and behavioral theory.

GRN773 ETHICS AND AGING. (3)
The focus of this class is on applied ethics and aging. We will address the following topics: mid/late life reproduction; research with older adults; spirituality/seek; legal issues; cultural issues; vulnerable older people; caregiving and community-based care; specific issues related to Alzheimer’s Disease; issues at the end of life, and other timely ethical issues that may arise during the course. The course will make use of provocative readings, case studies, supplementary professional articles, a presentation and paper, lively class discussion, and outside speakers who will share their expertise with you on a variety of ethical issues related to aging.

GRN774 PUBLIC POLICY AND AGING. (3)
This course reviews major issues and trends in the economies of aging and social policy and aging. The course emphasizes health, economic, and welfare policies and considers their implications on federal, state, and local levels. Special consideration is given to dynamics that shape past, current, and future policy in the area of aging. Prereq: Graduate standing.

GRN775 CLINICAL GERIATRICS. (3)
This course provides a perspective of clinical geriatrics. Basic concepts of geriatric care are presented, along with concepts of gerontology as it applies to geriatric medicine. This course is designed for both clinicians and non-clinicians.

GRN778 CURRENT TOPICS IN BRAIN AGING. (3)
Students will learn cellular and molecular changes that occur in the brain through AD progression and implications on federal, state, and local levels. Special consideration is given to dynamics that shape past, current, and future policy in the area of aging. Prereq: Graduate standing.

GRN780 APPLIED GERONTOLOGY PRACTICUM. (1-3)
This course is designed to provide students the opportunity to experience the practical application of gerontology in such domains as government, administration and clinical environments. In addition, the student will gain in-depth experience with the organization and an introduction to problems in applied research. Students will work under the supervision of a gerontology faculty member to coordinate efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of six credits. Approval of the Director of Graduate Studies required.

GRN781 STUDENT DEVELOPMENT PRACTICUM. (1)
This practicum provides an opportunity for students to present and discuss their research findings in a vehicle that promotes skill development in the areas of preparation and delivery of research presentations. Students are required to enroll in GRN 781 during each of the first five semesters in residence. Prereq: Admission to Gerontology Ph.D. program.

GRN782 WOMEN’S HEALTH AND AGING. (3)
This class explores the issues related to health and well-being among older women. Using a multidisciplinary approach that blends humanities, social and medical science and public policy, the course examines social, economic and cultural contexts of chronic physical and mental health. Prereq: Upper level/graduate class in social science. (Same as BSC 782.)

GRN783 PUBLIC HEALTH AND AGING. (3)
Public Health and Aging is an elective course in the Graduate Center for Gerontology and Department of Health Behavior and is offered to students on the graduate level. The focus of the course is to help students identify a public health framework and paradigm for addressing the issues of social, emotional, physical, and mental health in older adults, as well as a keen understanding and awareness of chronic disease prevention, mortality, and quality of life issues that are germane to aging in the United States. Prereq: Graduate standing.

GRN785 INDEPENDENT RESEARCH IN GERONTOLOGY. (1-6)
Open to doctoral students who have the necessary training and ability to conduct research at an advanced level. Students will work under the supervision of a gerontology faculty member to coordinate research efforts, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of nine credits. Approval of the Director of Graduate Studies required.

GRN786 INDEPENDENT READINGS IN GERONTOLOGY. (1-6)
Open to doctoral students who have the necessary training and ability to work independently at an advanced level. Students will work under the supervision of a gerontology faculty member to identify readings appropriate for the student’s chosen topic, establish timelines for completion, and determine grading criteria. May be repeated to a maximum of nine credits. Approval of the Director of Graduate Studies required.

GRN790 PROFESSIONAL DEVELOPMENT IN GERONTOLOGY. (1)
This seminar will cover elements of professional development in the areas of research, teaching and service as students are prepared for obtaining positions and developing careers in gerontology. Participation will be expected of students in the preparation of theses, preparing for job interviews, and working as mentors for first-year students. Prereq: Consent of instructor.

GRN791 INTEGRATIVE RESEARCH SEMINAR II. (1)
This seminar will cover elements of professional development in the areas of research, teaching and service as students are prepared for obtaining positions and developing careers in gerontology. Participation will be expected of students in the preparation of theses, preparing for job interviews, and working as mentors for first-year students. Prereq: Consent of instructor.

GS The Graduate School

GS600 SPECIAL TOPICAL GRADUATE COURSE. (1-3)
An interdisciplinary, topical or experimental course to be approved by the Dean of the Graduate School. A particular course can be offered no more than twice under the number GS 600. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

GS610 COLLEGE TEACHING. (1)
This one-credit-hour seminar addresses teaching and learning issues in the college classroom. It is intended for graduate students who want to prepare for future academic careers and enhance current teaching activities. The seminar will examine pedagogical issues in a general format with opportunities for discipline-specific applications. This course can serve to augment any department-based programs.

GS620 TEACHING IN THE 21ST CENTURY. (1-2)
This seminar, part of the Preparing Future Faculty program, is a rotating series of 1-2 credit hour courses on various aspects of life in institutions of higher education. Participating graduate students from a range of disciplines will have the opportunity for an in-depth exploration of the research and practice surrounding a special topic in college teaching and learning. The seminar will involve both classroom activities and experience-based learning. For example, the course on first-year students will include a study of current research on the first-year experience, interviews with first-year students, and an experiential component where participants serve as mentors for first-year students. Participants will be asked to produce a paper that integrates the theoretical and experiential aspects of the course and develops implications for teaching in their content areas. May be repeated to a maximum of three enrollments.

GS630 INSTRUCTIONAL TECHNOLOGY. (1)
This seminar addresses pedagogically sound and effective applications of instructional technologies (IT) in college teaching. Course goals include examining the impact of IT on learning outcomes, teaching strategies, and instructional assessments; developing proficiency in creating PowerPoint presentations, designing and managing instructional Websites, facilitating Internet dialogue, and conducting distance learning courses; and considering how IT affects faculty roles and responsibilities, the nature of the college classroom, and the future of higher education.

GS640 GRANT WRITING. (3)
This course prepares graduate students to be PI on state, federal, other large competitive grant. Students prepare and critique proposal. Prereq: GS 650.
**GWS 300 GENDER ACROSS THE WORLD (Subtitle required).** (3) Interdisciplinary, comparative and transnational examination of issues of gender focused around particular themes and locations. Thematic focus explicating gender which also illuminates questions of history and political economy in specific locations. Introduces students to research and a variety of analytical questions in the field, as well as the interaction between locales/people and structural processes. May be taken up to 9 credit hours under different subtitles.

**GWS 340 HISTORY OF FEMINIST THOUGHT TO 1975.** (3) This course is designed to provide students with an historical overview of the cultural diversity, creative and theoretical expression, and defining moments in the development of feminist thought up to 1975. Texts will include works, such as that of Hypatia, Christine De Pizan, Sor Juana Ines de la Cruz, and Mary Astell, that pre-date the term “feminist” but that are pioneering statements in the struggle for gender equality. “Thought” will include political manifestos, poetry, and short stories, as well as classic works of feminist theory and cultural criticism.

**GWS 350 INTRODUCTION TO FEMINIST THEORIZING.** (3) An interdisciplinary course that acquaints undergraduate students with the central issues and texts in contemporary feminist theory and philosophy. May be repeated to a maximum of six credits. Prereq: Submission of the GWS 695 Proposal Form one semester in advance.

**GWS 395 UNDERGRADUATE RESEARCH IN GENDER AND WOMEN’S STUDIES.** (1-3) This course provides students the opportunity to engage in independent faculty directed research that addresses the scholarship of original importance. Students will choose a topic of interest, conduct their own research, and be responsible for the academic and intellectual contributions that arise from this research. May be repeated to a maximum of twelve credit hours total. (Three hours can be counted toward the undergraduate Women’s Studies minor requirements.) Prereq: GWS 200 or GWS 201 and written agreement of a Women’s Studies Affiliated faculty member, who will direct the study.

**GWS 399 INTERNSHIP IN GENDER AND WOMEN’S STUDIES.** (1-6) Provides field experiences in women’s studies through work in education, industry, government, or community organizations. Offered on a pass/fail basis only. Maximum six credit hours per semester to a maximum of twelve credit hours total. (Ten seminars can be counted toward the undergraduate Women’s Studies minor requirements.) Prereq: GWS 200 or GWS 201 and declared minor in Women’s Studies and consent of instructor.

**GWS 400 DOING FEMINIST RESEARCH.** (3) In this course, we focus primarily on different kinds of qualitative research. Students will become familiar with a variety of methods used by Gender and Women’s Studies scholars, and reflect on the problems involved in gathering information. But primarily, students will BE the researchers here, using all these methods to teach a variety of approaches to studying Women’s Studies topic of choice. Each week, class participants will discuss the practicalities of conducting particular kinds of research and evaluate the studies; and they will share research findings in a workshop format. Prereq: GWS Major or permission of instructor.

**GWS 410 INTRODUCTION TO QUEER THEORY.** (3) An introduction to theories of how people think about and enact genders and sexualities. Students will learn key scholarly concepts in order to differentiate between queer theory as an interdisciplinary approach to sexuality studies and non-interdisciplinary approaches to the study of sexuality, such as psychological, historical, anthropological, or sociological. We will apply critical theory to political debates, literary texts, and films in order to understand the contributions made by queer theory to the study of humanities, especially issues of human diversity and globalization. Prereq: GWS 201 or GWS 200.

**GWS 430 GENDER, POWER AND VIOLENCE.** (3) This course is organized around three selected but interrelated themes to help us examine the intersections between gender, power, and violence in different cultural settings. We will examine the location of gender-specific violence (including institutional, interpersonal, and institutional) and violence and gender in different cultural settings. We will examine the gender-specific violence and the places in which gender and power are articulated at each of these levels. In our discussions, we will pay special attention to the various forms (physical, psychological, economic, sexual, and symbolic) of violence which take on different social, biochemical, and legal forms. We will analyze the historical and contemporary contexts in which gender and power are articulated at each of these levels. In our discussions, we will pay special attention to the various forms (physical, psychological, economic, sexual, and symbolic) of violence which take on different social, biochemical, and legal forms.

**GWS 506 HISTORY OF SEXUALITY IN THE U.S.** (3) An overview of the history of beliefs about sexuality, sexual cultures and norms, and sexuality’s relationship to power in American society from the colonial period to the present.
University of Kentucky

experiences have differed given the specific contexts in which their lives unravel. This background will also help us understand how women’s identities and spaces created by, and imposed on, women in Latin America and Latinas in the U.S. have been shaped by conquest. Prereq: Graduate standing in GWS, or consent of instructor.

GWS 599 SENIOR SEMINAR (Subtitle required).
This course provides a space for students to synthesize what they have learned about the methods and theories of GWS in a few different ways. Students will reflect on the ways in which one puts together an argument and writes as an interdisciplinary scholar on gender or women. Students will do this by writing a senior thesis and editing the theses of other students, and reading and discussing some materials which deal with research and writing in GWS. Prereq: Must be a declared major or minor in junior or senior year, or have written permission of the Chair in an exceptional circumstance.

GWS 600 TOPICS IN GENDER AND WOMEN’S STUDIES (Subtitle required).
Selected topics of the instructor’s interest in women’s studies with special attention to topics of contemporary relevance. May be repeated to a maximum of nine credits under a different subtitle. Prereq: Graduate standing or permission of instructor.

GWS 610 WOMEN AND “MADNESS”.
This course explores the social construction of mental illness as it pertains to gender. We will consult narratives from different disciplines: Literature, Psychology, Cultural Studies, Anthropology, History and Feminist Theory. Our focus will concern the ways in which all women are made “normal” as well as the perspectives of women who feel a sense of psychic dislocation and disability in their lives. Readings by women of color and lesbians will suggest the particular ways culture defines such women as “abnormal.”

GWS 616 COLONIALISM/POST-COLONIALISM AND GENDER.
This course is designed to expose students to a range of theories and debates centering on or pertinent to women, gender, and sexuality in the field of postcolonial studies. Here, the field is understood in its widest and most interdisciplinary sense, inclusive of studies of Empire, the independence struggles called “Third World”, and diasporas. Topics for study will include classical texts in the field, current postcolonial readings on gender and sexuality in empire, representa- tion, trans/nationalism, and diasporas. Course credit may be used to help satisfy the international component of the Women’s Studies Graduate Certificate requirements.

GWS 620 COMPARATIVE CONSTRUCTIONS OF GENDER AND SEXUALITY.
This course is designed to give students an understanding of an array of diversely situated theories and debates about gender and sexuality mainly outside of mainstream U.S. culture. Countries/communities of focus will vary.

GWS 630 SEMINAR IN FEMINIST RESEARCH METHODS.
This course presents a variety of research methods used by Gender and Women’s Studies scholars. The course examines how research has been conducted in a range of fields within Gender and Women’s Studies, presents basic skills, commonly used methods, ethical issues, and social applications.

GWS 640 HISTORY OF FEMINIST THOUGHT AND ACTION (Subtitle required).
Course provides a historically organized, thematically focused examination of pioneering works of feminist argument and analysis, creative writing, art, memoir, and politics. Theme and time-period vary according to instructor, but time-span covers at least fifty years and content includes at least two national, ethnic, or geographical contexts. May be taken up to six credit hours under different subtitles.

GWS 650 FEMINIST THEORY.
An interdisciplinary course addressing issues in contemporary feminist theory (such as intersections of race and gender, the body, ideology and representation, sexuality, etc.).

GWS 675 ADVANCED FEMINIST THEORY.
An advanced topics course in feminist theory. Prereq: Permission of instructor.

GWS 690 GRADUATE RESEARCH IN GENDER AND WOMEN’S STUDIES.
The purpose of this course is to provide graduate students the opportunity to engage in independent faculty-directed research in Women’s Studies. Prereq: Written agreement of a Women’s Studies Affiliated Faculty Member, who will direct the study.

GWS 700 TOPICAL SEMINAR IN GENDER AND WOMEN’S STUDIES (Subtitle required).
Intensive work in particular topics in Gender and Women’s Studies. May be repeated four times with different subtitles. Prereq: Graduate standing in GWS, or consent of instructor.

GWS 710 LATIN AMERICAN AND U.S. LATIN WOMEN’S LIVES.
This course employs an interdisciplinary perspective to critically examine the various identities and spaces created by, and imposed on, women in Latin America and Latinas in the U.S. We explore connections and divergences within and between these two groups of women, but begin by examining how the legacies of conquest in Latin America and the U.S. have shaped women’s experiences in the past. This background will also help us understand how women’s experiences have differed given the specific contexts in which their lives unrravel.

GWS 748 MASTER’S THESIS RESEARCH.
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

GWS 767 DISSERTATION RESIDENCY CREDIT.
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Successful completion of the qualifying examination.

GWS 775 DOMESTIC VIOLENCE ACROSS CULTURES.
This course focuses on domestic violence cross-culturally and from an interdisciplinary perspective. We discuss theories of domestic violence and how research and popular representations influence ideas regarding this phenomenon. We draw on specific experiences of intimate partner violence in different parts of Latin America, North America, Africa, Asia, and Europe. Topics include the impact of migration on women’s experiences of violence, state responses and law enforcement, women’s use of violence, the role of in-laws in women’s experiences of violence, and women’s resistance.

HA 601 OVERVIEW OF U.S. HEALTHCARE.
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups which work within various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status. (Same as PA 671.)

HA 602 STRATEGIC PLANNING AND MARKETING IN HEALTHCARE.
This course is designed to focus on the future needs of the health care organization as contrasted to day-to-day operational management. Strategies for the design and implementation of organizational change including techniques of quality and process improvement will be addressed. The strategic planning components of needs assessment, demands analysis, generation of alternative, priority setting and evaluation form the basis of the course. Several health care trends such as restructuring, innovation in health care delivery and financing, and performance measurements will be illustrated through case analysis in a variety of provider settings. Prereq: MPA/MHA program status and PA/HA 621.

HA 603 LEGAL ASPECTS OF HEALTHCARE MANAGEMENT.
The course will familiarize students with the application of law to management issues in health care organizations. Skills include terminology, legal reasoning, the tools of law, and topics specific to the health care setting are addressed. Prereq: MHA program status.

HA 604 HEALTHCARE ETHICS AND GOVERNANCE.
This course addresses the basic concepts and principles of healthcare ethics, including the biomedical, managerial, and organizational components and applies them using case studies, role playing, and analytical exercises. The course also examines the roles and responsibilities of healthcare governing boards and factors that influence their effectiveness. Prereq: MHA program status or consent of instructor.

HA 621 QUANTITATIVE METHODS OF RESEARCH.
A survey of behavioral science research methods for the public administrator. Emphasis is placed upon problem selection and identification, research design, and data analytic techniques. Lecture, two hours; laboratory, one hour per week. Prereq: MPA or MHA program status. (Same as PA 621.)

HA 622 MENTAL HEALTH ADMINISTRATION.
The course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

HA 623 DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS.
An introduction to organizational decision making under conditions of certainty, uncertainty, risk and multiple objectives. Concepts of analysis from the areas of economics, mathematics, probability, and statistics will be utilized in terms of administrative decision making in health administration. Course work includes use of various management information systems with a focus on how such systems can be used to support and inform decision making. Lecture, two hours; laboratory, one hour per week. Prereq: MHA program status, PA/HA 621. (Same as PA 623.)

HA 624 INFORMATION SYSTEMS IN HEALTHCARE.
The course will focus on the life cycle approach to information systems development. Phases of this approach include systems analysis, design, implementation, maintenance and evaluation. This approach has a technological, financial, and human factors component. The decision making and planning role of administration as well as the need on how to maximize the utilization of current systems is stressed. Topics include the information needs of the strategic planning process, administrative function and clinical care. The course will involve site visits. Prereq: HA 602 and 642.

HA 628 HUMAN RESOURCES MANAGEMENT IN HEALTHCARE.
The course will present an overview of career development, human resource planning, staffing, and training in the health care sector. Prereq: MHA program status.
HA 635 MANAGEMENT ACCOUNTING FOR HEALTHCARE ORGANIZATIONS. (3)
This course is designed to introduce the use of management accounting techniques to decision making in healthcare organizations. Lectures, problems, and cases will be used to provide an opportunity to focus on the various types of health care providers. Prereq: MHA/MPA program status and HA 601 and HA 621.

HA 636 HEALTH ECONOMICS. (3)
This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefit-cost analysis, and reform health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and HA/PA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as ECO 653/PA 636.)

HA 637 HEALTH FINANCE. (3)
This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are studied and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635. (Same as PA 637.)

HA 642 PUBLIC ORGANIZATION THEORY AND BEHAVIOR. (3)
A course which examines the interaction of both external and internal resources and constraints upon the administrative decision processes in a number of public organizational settings. The objective is an understanding of the practice of administration in public organizations. Prereq: MPA/MHA program status. (Same as PA 642.)

HA 656 MANAGERIAL EPIDEMIOLOGY. (3)
A study of the tools necessary for planning and evaluating health programs; planning systems; needs assessment methodologies, data analysis skills, the epidemiologic method, effectiveness and efficiency evaluation. An overview of trends and requirements leading to increased emphasis on planning and program accountability. Prereq: MHA/MPA program status, HA 601, HA 621, PA 623, and HA 635.

HA 660 DECISION MAKING IN HEALTH CARE ORGANIZATIONS. (3)
This course is designed to build on the concepts and techniques introduced in the MHA curriculum and integrate them with a decision making focus in a variety of health care problems and settings. Case analysis will be used extensively to develop an opportunity for the student to learn to apply the appropriate skills to an unstructured environment. Prereq: MHA program status and completion of first two semesters MHA course work.

HA 673 HEALTH POLICY. (3)
An analysis of the development and implementation of health policy on a national, state, local and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values, and political and community factors affecting policy development and program implementation. Prereq: HA 636, MHA program status or consent of instructor. (Same as PA 673.)

HA 711 PRACTICUM IN HEALTH ADMINISTRATION. (1-3)
Managerial experience in a healthcare setting is an essential component of the health administration educational process. An administrative internship, also referred to as the internship, provides the student with the opportunity to put into practice the knowledge and skills learned in the classroom in healthcare organizations under the guidance of a senior healthcare administrator with faculty oversight. Prereq: MHA program status or permission of instructor.

HA 715 HEALTH POLICY AND AGING. (3)
This course will present an overview of health policy in the United States as it affects the older population. It will provide an overview of the health care system, allocation of health services across the population and projected impact of the increase in the aging population on health care delivery. Various health policy proposals will be analyzed with a focus on their impact on the older population. (Same as GRN 715.)

HA 775 SPECIAL TOPICS IN HEALTH ADMINISTRATION. (1-3)
An analysis of selected issues with special significance for health administration. Prereq: MPA/ MHA program status. (Same as PA 775.)

HA 785 INDEPENDENT STUDY IN HEALTH ADMINISTRATION. (1-3)
Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Consent of instructor. (Same as PA 785.)

HDI Human Development Institute

HDI 600 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS. (2)
This course provides a base of core knowledge and experience in interdisciplinary services and supports for persons with developmental disabilities and/or special health care needs and their families. This course is structured in an interdisciplinary seminar format, illustrating the application of each discipline’s expertise to the needs of persons with disabilities and their families. Lecture, three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 601 INTERDISCIPLINARY APPROACHES TO THE NEEDS OF PERSONS WITH DEVELOPMENTAL DISABILITIES AND SPECIAL HEALTH CARE NEEDS: PRACTICUM. (2)
Participants engage in a wide range of structured site visits at numerous state and other university-based clinical and community-based learning experiences, related to services and supports for persons with developmental disabilities and/or special health care needs and their families. Lecture: one hour; laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HDI 602 INTERDISCIPLINARY SUPPORTS. (2)
This course will build on the disciplinary clinical competence of participating students and enhance their knowledge and skills related to specific issues regarding the needs of persons with developmental disabilities and other special health care needs. Topics covered include: Epidemiology, Prevention of Developmental Disabilities, Micro Environment, Early Childhood, School Age and Adult Issues, Cultural Diversity, the Rural and Underserved Population, Politics, Law and Health Care Reform Issues and Advocacy. Lecture, three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 604 INTERDISCIPLINARY LEADERSHIP SEMINAR. (2)
This course will provide a base of core knowledge and experiences in leadership, systems change, strategic planning, proposal development, group facilitation, conflict resolution, and interagency collaboration principles and strategies. These topical areas effectively represent key leadership functions for those who work in interdisciplinary settings. Participants engage in a wide range of structured site visits at numerous state and other university-based clinical and community-based learning experiences, related to services and supports for persons with developmental disabilities and their families. The course will utilize faculty and Institute staff from a wide range of disciplines. Lecture: three hours per week. Prereq: Graduate standing and consent of instructor.

HDI 605 INTERDISCIPLINARY LEADERSHIP PRACTICUM. (2)
This course will include the trainee’s individually designed leadership project. Options for projects include: research, development and preparation of grant applications, development and delivery of in-service training, or development of evaluation plans. As a final requirement for this course, the student will be required to develop a Leadership Project Summary, and make a class presentation on the Leadership Project. Laboratory: eight hours per week. Prereq: Graduate standing and consent of instructor.

HES Human Environmental Sciences

HES 100 AN INTRODUCTION TO PROFESSIONS IN HUMAN ENVIRONMENTAL SCIENCES. (1)
An orientation to human environmental sciences, its history, contemporary issues and philosophy, discussed through a common body of knowledge, utilizing family systems theory as the overarching conceptual model. Emphasis will be on the interactive, interrelatedness and capacity building opportunities of individuals, families, and communities, using a systems life course approach. Prereq: Declared majors in Human Environmental Sciences.

HES 300 SPECIAL COURSE IN HUMAN ENVIRONMENTAL SCIENCES (Subtitle required). (1-3)
Interdisciplinary, topical or experimental course to be approved by the appropriate department chairperson and by the Dean of the College of Human Environmental Sciences. Open to all University students, subject to limits or prerequisites set by the instructor. May be repeated to a maximum of six credits.

HES 320 SURVEY OF AGRICULTURE AND CONSUMER MEDIA. (3)
An exploration of the social, political, and economic factors that influence how agricultural producers and consumers receive information through the media. In addition, the course will analyze how the general mass media cover agricultural and consumer topics.

HES 400 CONCEPTS IN HUMAN ENVIRONMENTAL SCIENCES: INTEGRATION AND APPLICATION. (2)
Interdisciplinary approach to the solution of family and individual problems. Application of concepts from the developmental, relational, managerial, nutritional, physical, and environmental studies within the college and support disciplines. Prereq: HES 100, senior standing in the College of Human Environmental Sciences, and consent of instructor (via permit).
HHS Human Health Sciences

HHS 101 SURVEY OF HEALTH PROFESSIONS I. (1)
An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HSE 101.)

HHS 102 SURVEY OF HEALTH PROFESSIONS II: SHADOWING EXPERIENCE. (1)
This course provides students with opportunities to explore the health sciences professions. It assists students in developing beginning observation, recording, and reporting skills appropriate to the selected professions by way of an on-the-job shadowing experience.

HHS 240 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)
Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also included is a discussion of major health problems and related health care programs. (Same as CLM/HSIM 240.)

HHS 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)
This course will address the development of past and current U.S. health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media, and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: Student in CLM or HHS program or upper-level undergraduate or professional status. (Same as CLM 350.)

HHS 243 ETHICS IN HEALTHCARE. (2)
The course will include the study of moral reasoning and ethical theories in medical ethics. Ethical issues arising in the practice of health care delivery will be examined. Codes of ethics and the health professional’s obligations to patients, colleagues, employing institutions, and the community will be considered, and relevant case studies will be analyzed. (Same as CLM 335.)

HHS 344 HEALTH LAW. (3)
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HSIM 344.)

HHS 350 HEALTH POLICY AND POLITICS. (3)
This course will address the development of past and current U.S. health policies within the context of historical, economic, cultural, and political environments. The political process and the roles and responsibilities of the executive, legislative, and judicial branches of government will be examined. The power and influence that politics, money, the media, and special interest groups have had, and continue to have, upon the development of national and state health policies will be discussed and analyzed. Prereq: Student in CLM or HHS program or upper-level undergraduate or professional status. (Same as CLM 350.)

HHS 351 INTRODUCTION TO MEDICINE. (2)
This course provides students with an introduction to the fields of medicine. Skills required to complete patient interviews and take the medical history as well as a limited number of physical examination maneuvers will be discussed. The focus will be on gaining an understanding of why a complete and accurate medical history and physical examination are key to quality medical care. The course will cover the scope of practice and ethical codes for physicians and physician assistants. Prereq: Admission to HHS Program or consent of the instructor.

HHS 353 CULTURAL COMPETENCE IN HEALTHCARE. (3)
This course is designed to introduce the student to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias. Factors related to culturally and linguistically appropriate health care will be reviewed. Prereq: HHS Program or consent of instructor.

HHS 354 HEALTH POLICY AND POLITICS. (3)
An introduction to the health sciences professions including an exploration of health sciences careers. (Same as HSE 101.)

HHS 355 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will provide students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level psychology or equivalent. (Same as CNU 400.)

HHS 356 SEMINAR IN INTERPROFESSIONAL HEALTHCARE. (1)
This course provides students with opportunities to explore international issues in health care and within health services organizations and systems. Students will become critical consumers of research by learning how to evaluate and apply the results of health research conducted by others. The course will also assist those who plan to conduct clinical research or program evaluation within health delivery systems. Prereq: Admission to HHS Program or consent of instructor.

HHS 358 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will provide students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level psychology or equivalent. (Same as CNU 400.)

HHS 400 NUTRITION FOR PHYSICAL ACTIVITY, INJURY PREVENTION, AND REHABILITATION. (2)
This course will provide students with general concepts in nutrition that relate to physical activity, injury prevention and rehabilitation. The content of the course is organized in such a way that students can progress logically from knowledge of basic human nutrition processes to the specific nutrition related issues commonly observed in physically active individuals and nutritional needs to prevent injury and aid healing following injury. Prereq: Admission into the Human Health Sciences Undergraduate Program or consent of instructor; 200 level psychology or equivalent. (Same as CNU 400.)

HHS 405 EPIDEMIOLOGY AND BIOSTATISTICS. (3)
This course will provide a foundation in the principles and methods of the epidemiological investigation of disease with special emphasis on the distribution and dynamic behavior of disease in a population. Etiologic factors, modes of transmission and pathogenesis will be examined. Topics to be covered include epidemics and the spread of infectious disease, epidemiological aspects of non-infectious diseases, rates of morbidity and mortality, sensitivity, specificity, and predictive values’ strategies used in epidemiological studies to include measures of disease effect, validity, reliability; sampling methods and computer-based biostatistical analysis that emphasize the generalized linear model and forms of SEM as appropriate for an upper division undergraduate course. Prereq: Admission to the CLM or HHS program or consent of instructor. (Same as CLM 405.)

HHS 443 HEALTH INFORMATION MANAGEMENT. (3)
This course will provide students with an opportunity to understand and address the challenges associated with health care change and improvement intended by the Recovery Act of 2009. Students will focus on clinician and clinical leader roles in the implementation of an Electronic Medical Record. The course includes material relating to Personal Health Record (PHR) models, architectures, market forces, and law. Students will understand the advantages for using the electronic medical record and mechanisms for planning successful implementation. Prereq: Admission to HHS Program or consent of instructor.

HHS 450 INTRODUCTION TO DENTISTRY. (3)
This course is an introduction to the profession of dentistry and provides a brief overview of some pre-clinical dental courses that are taught in the first two years of dental school. The student will become familiar with basic dental terminology, current issues in dentistry and the latest techniques and technology used in clinical settings. The student will have the opportunity to develop manual dexterity and learn basic clinical etiquette and safety procedures. This course serves as a foundation for students interested in pursuing a career in dentistry or for those who want to enhance their knowledge of oral health prior to entering any health field. Prereq: Admission to HHS Program or consent of instructor. Two semesters of Biology with Lab and Human Anatomy recommended, but not required.

HHS 451 INTRODUCTION TO MEDICINE. (2)
This course will provide students with an introduction to the field of medicine. Skills required to complete patient interviews and take the medical history as well as a limited number of physical examination maneuvers will be discussed. The focus will be on gaining an understanding of why a complete and accurate medical history and physical examination are key to quality medical care. The course will cover the scope of practice and ethical codes for physicians and physician assistants. Prereq: Admission to HHS Program or consent of the instructor.

HHS 453 CULTURAL COMPETENCE IN HEALTHCARE. (3)
This course is designed to introduce the student to concepts of culture, race, ethnicity, and competence. Emphasis will be placed on identifying individual characteristics and their influence on bias. Factors related to culturally and linguistically appropriate health care will be reviewed. Prereq: HHS Program or consent of instructor.

HHS 454 RESEARCH EXPERIENCE IN HUMAN HEALTH SCIENCES. (1-3)
An introduction to basic methods for undertaking research on issues related to health, health care, and within health services organizations and systems. Students will become critical consumers of research by learning how to evaluate and apply the results of health research conducted by others. The course will also assist those who plan to conduct clinical research or program evaluation within health delivery systems. Prereq: Admission to HHS Program or consent of instructor.

HHS 455 RESEARCH EXPERIENCE IN HUMAN HEALTH SCIENCES. (1-3)
Students complete a mentored, self-directed research experience. Students work with faculty to develop an experience of mutual scientific interest. The nature of the experience and the subsequent activities and expected outcomes are defined and outlined in the research contract between the student and mentor. Prereq: Consent of instructor.

HHS 470 INTERNATIONAL EXPERIENCE IN HEALTH SCIENCES (Variable topic). (1-6)
This course provides students with opportunities to explore international issues in health care through study and international travel. Course content and organization will depend on the topic to be studied and the structure of the course. Prereq: Admission to the HHS Program or consent of instructor.

HHS 480 SEMINAR IN HUMAN HEALTH SCIENCES (Variable topic). (1-3)
Study and analysis of current and topical problems and issues regarding the roles, trends and research for health care professionals. May be repeated to a maximum of six credits. Prereq: Admission to CLM or HHS program or consent of instructor. (Same as CLM 480.)
HIS 104A HISTORY OF EUROPE THROUGH THE MID-SEVENTEENTH CENTURY. (3)
This course is a survey of the development of European politics, society, and culture through the Age of Religious Conflict.

HIS 105A HISTORY OF EUROPE FROM THE MID-SEVENTEENTH CENTURY TO THE PRESENT. (3)
This course is a survey of the development of European politics, society, and culture from the Age of Absolutism to the present. It is a continuation of HIS 104.

HIS 106 WESTERN CULTURE: SCIENCE AND TECHNOLOGY I. (3)
Presents the intersections of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period to the Industrial Revolution.

HIS 107 WESTERN CULTURE: SCIENCE AND TECHNOLOGY II. (3)
Presents the intersections of science and technology with the social and cultural development of Western civilization; the values in scientific inquiry as compared with other kinds of inquiry; the importance of science and technology in modifying social organization and human expectations. Emphasizes the period since the Industrial Revolution.

HIS 108 HISTORY OF THE UNITED STATES THROUGH 1876. (3)
This course is a survey of American history from the first British settlements c. 1585 to the end of Reconstruction in 1876 and explores the most important events, ideas, and people that created the foundations of the American nation. This course fulfills the requirements for the elementary teachers' certificate.

HIS 109 HISTORY OF THE UNITED STATES SINCE 1877. (3)
This course examines American History from 1877 to the present: political, economic and social – Gilded Age, Progressive Era, New Deal, Age of Affluence and Limits, Great Society and two Great Wars. You will find out how much, how little, America has lived up to its ideals; how it grew from a nation of farms and cotton mills to an industrial giant; how it became a world power (Top Nation) and what problems this created.

HIS 112 THE MAKING OF MODERN KENTUCKY. (3)
An examination of the political, social, economic, environmental, and cultural dynamics that have shaped modern Kentucky.

HIS 120 THE WORLD AT WAR, 1939-45. (3)
A global overview of the events of the Second World War, including consideration of the conflict’s military, diplomatic, political, social and economic dimensions.

HIS 121 WAR AND SOCIETY, 1914-1945. (3)
“Total war” in the 20th century exerted a profound impact on social relations in a great many ways. This course provides you with the opportunity to think long and hard about the social impact of “total” warfare, from a transnational perspective. We will explore a number of social and cultural themes as they relate to the two World Wars, such as: the impact of total war on gender relations; military technology and ethics; the demonization of the enemy; war-time propaganda; the roots of the welfare state within the warfare state; and the postwar efforts to come to terms with the atrocities of total war.

HIS 122 WAR AND SOCIETY SINCE 1945. (3)
Historical studies of warfare around the world and their impact on society since 1945.

HIS 130 DRUGS AND ALCOHOL IN WESTERN CIVILIZATION, 1492 TO THE PRESENT. (3)
“Alcohol and Drugs in Western Civilization” is an overview of the history of drugs and alcohol, and the individual and social problems that surround their use. The course begins when new or newly-wide-spread stimulants like coffee, tea, tobacco, chocolate, sugar, and distilled spirits joined beer and wine as European consumer goods. The course then goes on to the more modern problems of increasingly potent drugs like heroin, cocaine, and cigarettes, and responses to them such as regulation, taxation, Prohibition, Alcoholics Anonymous, and the “War on Drugs.” No prerequisites.

HIS 191 A HISTORY OF WORLD RELIGIONS (Substitute required). (3)
A historical introduction to the development of Christianity from social, cultural, and institutional perspectives which demonstrates the evolution of the religion.

HIS 202 HISTORY OF BRITISH PEOPLE TO THE RESTORATION. (3)
From the Roman period to the Stuart period. A general survey of the various epochs and phases of the English people at home and abroad.

HIS 203 HISTORY OF THE BRITISH PEOPLE SINCE THE RESTORATION. (3)
From the Stuart period to the present. A continuation of HIS 202.

HIS 206 HISTORY OF COLONIAL LATIN AMERICA, 1492 TO 1810. (3)
A broad survey of the social, economic, political and cultural development of Latin America from the fifteenth century to 1810. Includes analysis of such topics as pre-Columbian societies on the eve of conquest, the Iberian kingdoms in the Age of Exploitation, the conquest and colonization of the indigenous cultures of the New World, the establishment of Spanish and Portuguese institutions, the relations between the Church and State, the encomienda and the hacienda, slavery and the impact of the Bourbon Reforms on America.

HIS 207 HISTORY OF MODERN LATIN AMERICA, 1810 TO PRESENT. (3)
A broad survey of the Latin American nations focusing on their social, economic, political and cultural development. Traces the history of the Independence movements, nation building, the struggle for modernization, dependency and the phenomenon of revolution in the twentieth century.

HIS 208 HISTORY OF THE ATLANTIC WORLD. (3)
Examines the connections between Europe, Africa, and the Americas from 1492 to the present day, focusing especially on the legacies of slavery, race, and imperialism in Central America and the Caribbean.

HIS 229 THE ANCIENT NEAR EAST AND GREECE TO THE DEATH OF ALEXANDER THE GREAT. (3)
Covers the birth of civilization in Egypt and Mesopotamia, and the history of the ancient Near East and Greece to the conquest of Greece by Philip of Macedon. (Same as CLA 229.)

HIS 230 THE HELLENISTIC WORLD AND ROME TO THE DEATH OF CONSTANTINE. (3)
Covers the conquests of Alexander the Great, and the main features of the Hellenistic world, the Roman Republic, and the Roman Empire to the death of Constantine. (Same as CLA 230.)

HIS 240 HISTORY OF KENTUCKY. (3)
A general survey of the chief periods of Kentucky’s growth and development from 1750 to the present.

HIS 247 HISTORY OF ISLAM AND MIDDLE EAST PEOPLES, 500-1250, A.D. (3)
A survey of the origins and development of the Islamic civilization from the time of the Prophet Muhammad to 1250, with special concentration on the role of the Arab, Iranian and Turkish peoples.

HIS 248 HISTORY OF ISLAM AND MIDDLE EAST PEOPLES, 1250 TO THE PRESENT. (3)
A continuation of HIS 247. A survey of the religion and institutions of the Islamic world in the Middle East with special emphasis on the Mongol, Ottoman, Safavid and Qajar empires. The demise of these empires, the response of the Middle East peoples to European imperialism, and their national development up to the present will be considered.

HIS 254 HISTORY OF SUB-SAHARAN AFRICA. (3)
A survey of the social institutions, value systems and political organization of Sub-Saharan Africans since the 16th century but with particular emphasis on the 19th and 20th centuries. (Same as AAS 254.)

HIS 260 AFRICAN AMERICAN HISTORY TO 1865. (3)
A study of the Black experience in America through the Civil War. An examination of the African heritage, slavery, and the growth of Black institutions. (Same as AAS 260.)

HIS 261 AFRICAN AMERICAN HISTORY 1865-PRESENT. (3)
This course traces the Black experience from Reconstruction to the Civil Rights Movement of the 1960’s. The rise of segregation and the ghetto and aspects of race relations are examined. (Same as AAS 261.)

HIS 265 HISTORY OF WOMEN IN AMERICA. (3)
History of American women, with particular emphasis on the mid-19th through the mid-20th centuries. Major themes include the family, work, social ideas about women, and feminism. Prereq: HIS 109 or consent of instructor.

HIS 295 EAST ASIA TO 1800. (3)
A survey of Chinese, Japanese and Korean history from earliest times to 1800. Emphasis on political, economic, social and intellectual developments.

HIS 296 EAST ASIA SINCE 1800. (3)
What we think of today as East Asia has a long history of both shared culture and separate experiences. In premodern East Asia, cultural contacts led to commonalities including systems of writing and ways of thought such as Confucianism, Daoism, and Buddhism. In modern times and in becoming nations, China, Japan, and Korea each sought their own identity. The reforms and revolutions that Asia has experienced since 1800 can be viewed both in the context of the region and through the experience of each nation. This is an introductory course in the cultural, social, and political history of East Asia.

HIS 301 HISTORY WORKSHOP: INTRODUCTION TO THE STUDY OF HISTORY. (3)
An introduction to the skills of historical research writing. Preferably to be taken during the sophomore year. Required of all history majors. Prereq: Sophomore standing.

HIS 310 HISTORY THROUGH FICTION AND NON-FICTION. (3)
Texts contrast fictional (novels) and non-fictional accounts of events in U.S. History dealing with major themes and institutions since the American Revolution.
HIS 320 ADVANCED STUDIES IN AMERICAN MILITARY HISTORY. (3)
This course will furnish upper level UK ROTC Cadets, and qualified History majors or minors with the methodological tools and materials needed to gain a more detailed understanding of American Military History and to put together a major research paper. AMS/HIS 320 will emphasize basic research skills: understanding historiographical debates within a military framework, developing effective note-taking, outlining techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, examining American military campaigns and leaders in order to complete a battle analysis, and short research assignments. Prereq: Consent of instructor (Same as AMS 320.)

HIS 323 THE HOLOCAUST. (3)
This course will attempt to help students understand the events that resulted in the virtual destruction of Europe’s Jews during the Second World War. Topics will include the history of anti-semitism, the ways in which Nazi policy against the Jews was implemented, Jewish resistance, response of non-Jews and other governments to the Holocaust.

HIS 330A HISTORY OF WESTERN RELIGIOUS THOUGHT I. (3)
A history of Judeo-Christian religious thought from the rise of Judaism through the Protestant Reformation.

HIS 350 TOPICS IN U.S. HISTORY BEFORE 1789. (3)
Readings, research, and discussions in seminar format to illuminate problems of historical and contemporary significance, in areas of special faculty competence. May be repeated once. Lecture, two hours; conference, one hour.

HIS 351 TOPICS IN U.S. HISTORY SINCE 1789. (3)
Same as HIS 350.

HIS 352 TOPICS IN EUROPEAN HISTORY BEFORE 1789. (3)
Same as HIS 350.

HIS 353 TOPICS IN EUROPEAN HISTORY SINCE 1789. (3)
Same as HIS 350.

HIS 355 TOPICS IN NON-WESTERN HISTORY SINCE 1789. (3)
Same as HIS 350.

HIS 360 RACE AND SPORTS IN AMERICA. (3)
This reading seminar examines the history of race and sport in America. (Same as AAS 360.)

HIS 361 AMERICAN INDIAN HISTORY TO 1838. (3)
This course will examine the principle economic, social, and political structures of indigenous communities prior to European colonization of North America, as well as the impact of European contact on American Indian societies. Students will also study the relationships that emerged between American Indians and European colonists (later Americans) from the colonial period to the forced removal of tribes living east of the Mississippi River to the Indian Territory.

HIS 362 AMERICAN INDIAN HISTORY SINCE 1838. (3)
This course considers the continuing evolution of the relationship between indigenous people in North America and the federal government from 1838 to the present. Students will also explore the changing legal status and identity of indigenous peoples in American society.

HIS 370 EARLY MIDDLE AGES. (3)
A survey of European history from the fourth through the mid-10th centuries.

HIS 371 LATER MIDDLE AGES. (3)
A survey of European history from the mid-10th through the 15th centuries.

HIS 385 HISTORY OF RUSSIA TO 1825. (3)
A broad survey of the life of the Russian people and the development of the state from the ninth century through the reign of Alexander I. Although emphasis will be placed on political, economic, and social trends, cultural and intellectual achievements will also be discussed.

HIS 386 HISTORY OF RUSSIA SINCE 1825. (3)
A continuation of HIS 285, this course covers the last century of the Tsarist regime (1825-1917) and the evolution of the Soviet system that followed. Emphasis will be placed on the problems that led to the collapse of the monarchy, on the revolutionary movement, and on the Communist state and society under Lenin and Stalin.

HIS 390 BACKGROUND TO AND EARLY HISTORY OF CHRISTIANITY TO 1500 CE. (3)
This course examines the origins of Christianity from its Jewish, Greek, and Roman influences and charts its development through the first one hundred years of its existence. Special emphases are placed on understanding the diversity of Judaic religious identity as well as the influence of Greek philosophy and religion. The world of Jesus, Paul, and the evolution of this new view of one’s relationship to God are analyzed historically through a close examination of the texts of this time in the nexus of Jewish, Greek, and Roman cultural interaction. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 390.)

HIS 391 CHRISTIANS IN THE ROMAN EMPIRE. (3)
This course discusses the changing status of Christians in the Roman Empire between 100 and 500 CE. An underlying theme of this course is: What is it to be a Christian? Students will read and discuss both primary and secondary sources and analyze how the answer to the above-mentioned question changed during the Roman Empire. Topics to be discussed include: heresies, persecution, definitions of doctrines and practices, the relationship to the Roman Empire, and more. All students will write a book review, take two essay exams, and participate in regular discussion. Class participation is an expected component of this class and contributes 25% to the final grade for the course. (Same as CLA 391.)

HIS 395 INDEPENDENT WORK. (1-3)
Under special conditions selected students may investigate problems with weekly reports to the instructor. May be repeated to a maximum of six credits. Prereq: Major and a standing of 3.0 in the department.

HIS 404 U.S. WOMEN’S HISTORY TO 1900. (3)
U.S. women’s lives and experiences across cultures and regions from pre-settlement to 1900. Addresses current debates and scholarship in the field.

HIS 405 U.S. WOMEN’S HISTORY SINCE 1900. (3)
U.S. women’s lives and experiences across cultures and regions from 1900 to the present. Addresses current debates and scholarship in the field.

HIS 460 COLONIAL AMERICA TO 1763. (3)
This course explores a number of important themes in early America: the comparative view of Western European colonization efforts; the dynamics of a multiracial environment; the character of family, community and religious life; regional distinctiveness in social-economic life; and the maturation of the colonies in the 18th century.

HIS 461 THE AMERICAN REVOLUTION, 1763-1789. (3)
A study of the disagreement between Great Britain and the 13 colonies, the decision for independence, and the progress of revolutionary change through the ratification of the Federal Constitution.

HIS 462 THE NEW REPUBLIC, 1789-1820. (3)
An intensive study of the launching of the federal government, the rise of America’s first parties, and the conflict over the completion of the revolutionary experiment.

HIS 463 EXPANSION AND CONFLICT, 1820-1860. (3)
A social and political study of the United States from 1820 to 1860, with special attention to the growth of Jacksonian democracy, territorial expansion, and the rise of the sectional controversy over slavery.

HIS 464 CIVIL WAR AND RECONSTRUCTION, 1860 TO 1877. (3)
A study of events immediately preceding the outbreak of conflict, of the military campaigns, and of the social, economic, and political developments during the periods of war and reconstruction.

HIS 465 EMERGENCE OF MODERN AMERICA, 1877-1917. (3)
A study of the transformation of the U.S. from an agrarian society into an industrial nation covering the years from the Gilded Age to the American entry into World War I. This course emphasizes the growth of corporate capitalism, the emergence of modern political institutions, and the development of modern American foreign policy. It also explores how various Americans- workers, farmers, immigrants, women- responded to and were affected by industrialization.

HIS 466 MODERN AMERICAN HISTORY FROM WWI TO PEARL HARBOR, 1917-1941. (3)
A study of America in World War I and the interwar era, emphasizing political, economic, diplomatic, and social developments. The course examines the impact of the first world war and the great depression on America and the nature of the New Era and the New Deal.

HIS 467 MODERN AMERICA: 1941-1974. (3)
An intensive study of the United States from 1941 to 1974, emphasizing America’s emergence as a global power and political, economic, and social developments.

HIS 468 CONTEMPORARY AMERICA: 1974 TO THE PRESENT. (3)
Examines the history of the United States since 1974 with particular emphasis on political, social, and economic developments.

HIS 470 HONORS SEMINAR IN HISTORICAL METHODS. (3)
This course will furnish qualified History majors with the methodological tools that they will need to put together an Honors thesis. It thus serves as the prerequisite to HIS 471 (Honors Seminar in Historical Research). Eligible students will have to complete both courses in order to graduate with departmental honors. HIS 470 will emphasize the honing of basic research skills: understanding historiographical debates, generating detailed bibliographies, developing effective note-taking and outline techniques, picking a feasible research topic, finding useful primary sources and drawing inferences from them, and constructing historiographical arguments in a series of short research assignments. Prereq: The course is open to History majors with a departmental GPA of 3.5 after at least 15 hours of history; successful completion of HIS 301; and upon recommendation of a faculty member.
Course Descriptions

HIS 471 HONORS SEMINAR IN HISTORICAL RESEARCH. (3)
This course will furnish qualified History majors with the faculty supervision that they will need to draft and complete an Honors thesis. It thus serves as the sequel to HIS 470 (Honors Seminar in Historical Methods). Eligible students will have to complete both courses in order to graduate with departmental honors. HIS 471 will emphasize the mechanics of historical research and writing; learning how to skim and take notes with a particular research goal in mind; asking thematically pertinent questions of one’s evidence; turning that evidence into a compelling argument; preparing a detailed “script” before writing a rough draft; drafting an effective introduction; advancing an argument by pruning irrelevant material; writing with clarity and precision; criticizing the work of other students; and making a persuasive oral presentation of one’s own research. Prereq: The course is open to History majors with a departmental GPA of at least 3.5 after 15 credit hours of history; successful completion of HIS 470; and upon recommendation of a faculty member.

HIS 499 SENIOR SEMINAR FOR HISTORY MAJORS (Subtitle required). (3)
All History majors must complete a senior seminar with a grade of C or better. Topics will vary, but a major is required. Prereq: HIS 301 or permission of instructor. Graduation Writing Requirement Course – credit is awarded to students meeting the GWR prerequisites.

HIS 500 PRECLASSICAL AND CLASSICAL GREECE. (3)
A history of Greece from earliest times to the death of Alexander the Great.

HIS 501 FOURTH-CENTURY GREECE AND THE HELLENISTIC WORLD. (3)
A history of Greece and the Greek world from the death of Alexander to the Roman conquest of Egypt.

HIS 502 A HISTORY OF THE ROMAN REPUBLIC. (3)
A history of Rome from earliest times to the fall of the Republic. Emphasis will be placed upon the territorial expansion of Rome and the effects of this expansion on republican institutions.

HIS 503 A HISTORY OF THE ROMAN EMPIRE. (3)
A study of the foundation of the Roman Empire, the development of Imperial institutions, social and intellectual developments of the Graeco-Roman world. The decline of Rome and the barbarian invasions of the fourth century.

HIS 504 GREEK AND ROMAN MEDICINE. (3)
An historical introduction to the development of Greek and Roman medicine, from the pre-Socratic philosophers through Oribasius and early medieval influences. Prereq: A course in ancient history, or classics, or ancient philosophy, or consent of instructor.

HIS 506 HISTORY OF SEXUALITY IN THE U.S. (3)
A survey of the history of beliefs about sexuality, sexual cultures and norms, and sexuality’s relationship to power in American society from the colonial period to the present.

HIS 507 U.S. LABOR HISTORY. (3)
Provides a background in the history of labor organizations and working class history in the United States from the colonial period to the present.

HIS 509 ROMAN LAW. (3)
An historical introduction to the development of Roman law, from the Twelve Tables through the Codex Justinianus. (Same as CLA 509.)

HIS 510 MEDIEVAL LAW. (3)
This course examines the development of the various legal systems to which people in western Europe had recourse between the fourth century and the fourteenth century. Topics to be covered include the shift from oral to written law, the problems small communities faced in dealing with this growing complexity, the role of the church, and the emergence of written authorities for jurisdiction, for example, in the courts of Rome. Prereq: An introductory course in European history.

HIS 511 BARBARIANS. (3)
This course examines the peoples known to historians of Western Europe as the “Barbarians” who took up residence on the continent of Europe and whose polities replaced the central government of imperial Rome in the fifth and subsequent centuries, as well as those of the northern realms of the British Isles and Scandinavia. Topics to be studied include the ethnic and cultural identities of the Barbarians, their role in redefining the social and political institutions of Europe, the reasons for their political and military successes, and their hold on the imaginations of both sympathetic and unsympathetic historians.

HIS 512 CAROLINGIAN EMPIRE. (3)
This course examines the reconstitution of much of the former Roman empire in the western provinces under the hegemony of the Carolingian rulers of the eighth and ninth centuries. Among the topics to be studied are the dynastic interactions between powerful ecclesiastical and secular leaders that produced a distinctive vision of a Christian empire, the relations between the Carolingian, Byzantine, and Islamic polities, the means of building royal legislative and judicial power in an environment of fragmented authority, the role of literary and artistic activity in creating a “Carolingian Civilization”, the military activities that consolidated the empire, and the fragility of the imperial enterprise.

HIS 513 MEDIEVAL INSTITUTIONS SINCE THE MID-10TH CENTURY. (3)
A survey of medieval political, social, economic and ecclesiastical institutions from the beginning of the High Middle Ages to the middle of the 15th century.

HIS 514 SPAIN: FROM RECONQUEST TO EMPIRE, 1200-1700. (3)
This course focuses on the expansion of the Christian kingdoms (Portugal, Castile, and Aragon) in the Iberian peninsula and across the Atlantic. Special attention will be paid to the interaction of Judaism, Christianity, and Islam: cultural transformations, including developments in music, literature, and the arts; political developments in Iberia and the emergence of Spain and Portugal; and the spread of Iberia’s trans-Atlantic empires.

HIS 516 SCIENTIFIC WORLDVIEWS BEFORE 1650. (3)
Ideas of natural order and man’s place in the cosmos, the interactions of man and environment, the relationship of scientific thought and cultural values, from the ancients to the 16th century.

HIS 519 THE ERA OF THE RENAISSANCE. (3)
An historical description and analysis of the development of political, economic, social, religious, intellectual and cultural institutions of Europe from Petrarch to Erasmus.

HIS 520 THE ERA OF THE REFORMATION. (3)
An historical description and analysis of the development of the religious, intellectual, cultural, political, economic and social institutions of Europe from Luther to the Treaty of Westphalia.

HIS 521 EUROPEAN SOCIAL HISTORY, 1400-1800. (3)
Survey of European social history in the early modern period, including analysis of demographic patterns, family and social structures, rural and urban economic patterns, and cultural and religious attitudes.

HIS 522 EUROPE AND THE WORLD IN THE AGE OF REVOLUTION (1760-1815). (3)
A study of the political, social, economic and cultural changes that transformed Europe during the age of the French Revolution and Napoleon, with special emphasis on the relations between Europe and the non-European world during this period.

HIS 524 MODERN EUROPE: 1890-1939. (3)
This course examines European history from 1890-1939, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

HIS 525 MODERN EUROPE: 1939-1989. (3)
This course examines the major cultural, social, and political developments that have shaped Europe, European history, and Europe’s relationships with the world since the outbreak of World War II. Prereq: HIS 105 or consent of instructor.

HIS 526 EUROPE SINCE 1939. (3)
This course examines the major cultural, social, and political developments that have shaped Europe, European history, and Europe’s relationships with the world since the outbreak of World War II. Prereq: HIS 105 or consent of instructor.

HIS 527 WOMEN IN MODERN EUROPE. (3)
A study of Russian culture from 1800 to the present emphasizing the conservative as well as the revolutionary tradition, the Russian avant-garde, Stalinist culture, and the Dissident Movement.

HIS 528 RUSSIAN IN THE 19TH CENTURY. (3)
This course examines the social, political, and cultural history of 19th Century Russia in depth, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

HIS 529 RUSSIA IN THE 20TH CENTURY. (3)
This course explores the political, social, and cultural history of 20th century Russia, focusing on the social conditions that caused the Revolution, the formation of the Soviet Union and its decline.

HIS 536 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA TO 1800. (3)
A study of Russian culture to 1800 emphasizing Slavic paganism, Orthodox Christian culture in Kiev, Novgorod, and Muscovy, and the impact of the West in the Seventeenth and Eighteenth Centuries.

HIS 537 INTELLECTUAL AND CULTURAL HISTORY OF RUSSIA FROM 1800 TO THE PRESENT. (3)
A survey of Russian culture from 1800 to the present emphasizing the conservative as well as the revolutionary tradition, the Russian avant-garde, Stalinist culture, and the Dissident Movement.

HIS 540 HISTORY OF MODERN FRANCE TO 1815. (3)
The course of French history to 1815, including the development of French political, administrative, legal, social, economic and cultural achievements and institutions and their contribution to the modern world.

HIS 541 HISTORY OF MODERN FRANCE SINCE 1815. (3)
Continuation of HIS 540.

HIS 542 GERMAN HISTORY, 1789-1918. (3)
This course examines European history from 1890-1939, focusing on the social conditions of serfdom and its abolition, the causes of social tension in late Imperial Russia, and the long term causes of the Russian Revolution of 1917.

HIS 543 GERMAN HISTORY SINCE 1918. (3)
This course examines the political, social, and cultural history of Germany during the century when it arose from utter defeat by Napoleon to become the strongest economic and military power in Europe, then concludes with Germany’s fate in World War I.
**HIS 546 THE BYZANTINE EMPIRE.** (3)
A study of Byzantine history from the time of Constantine the Great to the capture of Constantinople by the Turks in 1453. Prereq: HIS 104 or 247.

**HIS 548 HISTORY OF THE MIDDLE EAST: 1453-1920.** (3)
Emphasis is on the history of the Middle East and Balkans from the conquest of Istanbul by the Ottomans in 1453 to the end of WWI (1920) covering the Ottoman (1453-1920), Sa`udi (1501-1924), Qajar (1795-1925) empires. This course focuses on the rise and disintegration of empires, theories of empire building and the reasons for their transformation and demise. Stress is placed on the institutions -military, legal, bureaucratic, religious- of Islamic imperial governance. The origins of Balkan and Middle Eastern nationalisms, including Jewish nationalism, the origins of the modern states and the role that British, French and Russian imperialism played in their creation as well as in their demise during WWI is stressed.

**HIS 549 HISTORY OF THE MIDDLE EAST: 1925 TO THE PRESENT.** (3)
A continuation of HIS 548. Emphasis is on the politics of Middle Eastern nationalism, Pan-Arabism and its demise, the Arab-Israeli conflict, the politics of oil and nuclear weapons, the Islamic revolution in Iran, and the development of the Islamic movement since 1967.

**HIS 550 STUDIES IN MID-EAST HISTORY AND POLITICS: (Subtitle required).** (3)
Selected topics on the history of the Middle East and its politics. The specific topics for a given semester will be listed in the class schedule book and the department’s website.

**HIS 551 FOREIGN POLICIES OF MIDDLE-EAST STATES.** (3)
This course focuses on the foreign policies of Turkey, Iran, Israel, and the major Arab countries: Egypt, Iraq, Syria and Saudi Arabia. It will also examine the foreign policies of the smaller Arab countries such as Lebanon, Yemen and the UAE. The emphasis is on the major trends of the foreign policies of these countries since WW II.

**HIS 552 TUDOR-STUART BRITAIN, 1485-1714.** (3)
An analysis of political, religious, cultural, and economic changes in Britain during the reign of the Tudor and Stuart kings and queens, a period when Britain became increasingly prominent in world affairs.

**HIS 553 EIGHTEENTH CENTURY BRITAIN.** (3)
An analysis of English society and politics in an important transition period when the country was transformed by the Industrial Revolution and challenged by the French Revolution.

**HIS 554 BRITISH HISTORY 1815-1901.** (3)
A detailed study of Britain’s political, social, diplomatic and industrial development in the 19th century.

**HIS 555 BRITISH HISTORY SINCE 1901.** (3)
A detailed study of Britain in the 20th century with special consideration of Britain in World War I and World War II, and her position in the contemporary world.

**HIS 556 THE BRITISH EMPIRE, 1322-1879.** (3)
This course covers the rise, fall, and rise of the British empire from its extension into Scotland and Ireland till the beginning of the age of “New Imperialism,” explaining the means by which Britain came to dominate one-third of the globe, and its impact on the many cultures, economics, and geopolitical entities of the third world. It will further discuss how those cultures transformed Britain itself. Prereq: Prior experience in HIS 105 strongly recommended.

**HIS 557 THE BRITISH EMPIRE AND COMMONWEALTH, 1880-2000.** (3)
This course will trace the imperial theme, and the gradual decline and decolonization of Britain’s empire from Victoria’s day to the present; it will examine decolonization and the blending and clash of cultures, the effect of technology and western ideas on the subject peoples, and their impact on western civilization. Prereq: Prior experience in HIS 105 strongly recommended.

**HIS 561 CULTURE, IDEAS, AND SOCIETY IN LATIN AMERICA.** (3)
This course explores the interplay of culture, ideas, and society in the history of Latin America from Independence (1825) to the present. It takes an interdisciplinary approach and is attentive to issues of class, gender and sexuality, ethnicity and race, power, domination and resistance. Major themes to be developed in the course are history of ideas, popular and elite cultures; material and visual culture; work, leisure, and consumption; and the politics of representation. Prereq: HIS 207 or LAS 201 are suggested.

**HIS 562 MODERN MEXICO.** (3)
Following a brief survey of Mexican political history from Independence to the present, this course will examine topical major historical themes, such as landholding and agrarian problems, church and state, and assessment of the 1910 Revolution.

**HIS 563 THE HISTORY OF WOMEN IN LATIN AMERICA.** (3)
This course will survey the history of women in Latin America from pre-Columbian period to the present. The emphasis will be mainly on the late nineteenth and twentieth centuries in order to understand the situation of women in Latin America today.

**HIS 564 HISTORY OF BRAZIL.** (3)
Study of Brazilian history from 1500 to the present, stressing the multietnic dynamics of colonial society, the political consequences of independence, and the contemporary legacies of race, slavery, abolition, and gender.

**HIS 572 AMERICAN LEGAL HISTORY.** (3)
A history of law in the United States, emphasizing interrelationship of law and society. Particular attention given to law and economic growth, the criminal justice system, legal reform, the bar, and minorities and the law.

**HIS 573 AMERICAN CONSTITUTIONAL HISTORY.** (3)
A study of constitutional development in the United States from the colonial period to current times, with emphasis on the Supreme Court.

**HIS 574 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES TO 1919.** (3)
A survey designed to acquaint the student with the principles of American foreign policy and its historical evolution. Prereq: HIS 108 or equivalent.

**HIS 575 THE DIPLOMACY AND FOREIGN POLICY OF THE UNITED STATES SINCE 1919.** (3)
A continuation of HIS 574. Foreign policy after the United States became a world power. Prereq: HIS 109 or equivalent.

**HIS 576 FRONTIER AMERICA, 1400-1869.** (3)
A study of the ways in which America’s people shaped and were transformed by the frontier; how they wrestled with the problems of nationhood, democracy, sacrifice, and innovation; and how the idealism and promise were fulfilled and betrayed, from the first settlers to the driving of the Golden Spike.

**HIS 577 FRONTIER AMERICA, 1869-PRESENT.** (3)
A survey of the many Westerners, women as well as men, Native Americans, Chinese, and Hispanics as well as whites, soldiers as well as six-shooters, and of the many Wests, wild and not-so-wild, from the prairie homesteaders to the Sagebrush Rebellion; and how they made, inherited, and were imprisoned by the frontier heritage.

**HIS 578 HISTORY OF THE OLD SOUTH.** (3)
A study of the colonial beginnings and expansion of southern life, economics, and society. The growth of slavery, staple agriculture, and sectional politics will constitute the major interest. Prereq: HIS 108.

**HIS 579 HISTORY OF THE NEW SOUTH.** (3)
The evolution of southern life and society, agrarian politics, relationships with other sections, industrial growth, and new leadership.

**HIS 580 HISTORY OF APPALACHIA.** (3)
A survey of the social, economic, and cultural history of Appalachia from the colonial period to the present with emphasis on the interaction of this social state region with the broader forces of social change at work in modern America. Prereq: HIS 108, 109 or consent of instructor.

**HIS 581 U.S. URBAN HISTORY SINCE 1865.** (3)
A study of urban America since 1865, emphasizing the impact of cities in the development of the United States, the processes by which cities grew and the effects of urbanization on city dwellers.

**HIS 582 IMMIGRATION AND AMERICAN HISTORY, 1815 TO THE PRESENT.** (3)
A study of the role of the immigrant in American history, emphasizing the impact of large scale immigration upon the receiving society and changes effected by the migration upon the new arrivals themselves, in the century after 1815, and the consequences of restriction in the decades since World War I.

**HIS 584 HEALTH AND DISEASE IN THE U.S.** (3)
Examines the emergence of modern medicine and the allied health professions, from colonial times to the present. Emphasis will be placed on the social, institutional, and scientific contexts of medical thought, education, and practice. It also explores how social and professional thought and action shape the meaning of health and disease.

**HIS 587 THE CIVIL RIGHTS MOVEMENT IN THE U.S. SINCE 1930.** (3)
This course will focus on the struggle for African American equality in the U.S. during the mid twentieth century. It will examine key civil rights issues, events, strategies, leaders and organizations on both the local and national levels. Using historical documents and documentary film presentations this course will discuss the status of race relations in America over the past fifty years. (Same as AAS 587.)

**HIS 593 EAST ASIAN HISTORY SINCE WORLD WAR II.** (3)
A study of the revolutionary political, economic and social changes occurring in China, Japan, and Korea in the aftermath of World War II. Important political and institutional developments and their relations to pre-war trends will be emphasized.

**HIS 594 USES OF THE PAST IN MODERN CHINA.** (3)
The twentieth century has brought great change to the cultural landscape of China. This change is marked by a paradox: New China ‘s claim to political legitimacy has been based on both revolution and historical continuity. How is the past adapted for the present? This course will examine this dilemma through cultural relics: architecture, art, and artifact. Considering changes to the Chinese city as well as museum history, we will study how cultural relics have been understood in modern China. Prereq: Any course in Chinese history or consent of instructor.

**HIS 595 STUDIES IN HISTORY.** (3)
Professors will offer lecture and discussion courses in areas in which they have special teaching interest. May be repeated to a maximum of six credits. Prereq: To be denoted by the instructor.
HIS 596 THE U.S. FAMILY IN HISTORICAL PERSPECTIVE. (3) A study of American family experience and values from its pre-industrial Anglo-European roots to the present. Using an interdisciplinary focus, the course will examine the shifting boundary between family and community and the interaction between domestic life and demographic, religious, and economic influences in American history. Prereq: FAM 353 or SOC 409 or equivalent, or consent of instructor. (Same as FAM 509.)

HIS 597 WESTERNERS IN EAST ASIA, 1839 TO THE PRESENT. (3) The history of interactions between the peoples of East Asia and those of Europe and North America in the nineteenth and twentieth centuries. The actions and goals of merchants, diplomats, missionaries, journalists, and soldiers will be examined, and such concepts as colonialism, imperialism, and cultural change will be discussed.

HIS 598 CHINA IN REVOLUTION, 1895-1976. (3) This course provides an overview of the major themes and events that have shaped Modern Chinese history from the late 19th century to the present. It will focus on such issues as the impact of the Industrial Revolution on Chinese society, the growth of nationalism, and the political and cultural changes in China.

HIS 606 HISTORICAL CRITICISM. (3) Required of every entering graduate student in history. For history graduate students only.

HIS 613 READINGS IN EARLY MEDIEVAL HISTORY. (3) The problems, major sources and secondary literature in the period from the beginning of the fifth century to the end of the 10th century will be covered. Prerequisite: permission of instructor.

HIS 615 MANUSCRIPT CULTURES. (3) This course examines the relationship between the production of manuscript culture and the formation of the European nation-state. The course will include an intensive study of the language of the materials. (Same as CLA 615.)

HIS 616 PALEOGRAPHY. (3) This course provides skills needed to read the handwritten materials that constitute evidence for historical investigation. Students will learn to read and transcribe manuscripts, to evaluate the potential of manuscripts as sources for historical research.

HIS 621 READINGS IN EARLY MODERN EUROPE, 1450-1648. (3) This course is designed to give graduate students a grounding in the historiography of Europe from 1450 to 1648. Students should expect to familiarize themselves with the major debates in political, social, cultural, religious, economic, and intellectual history of the period.

HIS 622 READINGS IN EARLY MODERN EUROPE, 1648-1815. (3) This course is designed to give graduate students a grounding in the historiography of Europe from 1648 to 1815. Students should expect to familiarize themselves with the major debates in political, social, cultural, religious, economic, and intellectual history of the period.

HIS 623 READINGS IN 19TH CENTURY EUROPEAN HISTORY. (3) Intensive survey of the literature in the political, social, and cultural history of 19th-century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another.

HIS 624 READINGS IN EUROPEAN HISTORY OF THE TWENTIETH CENTURY. (3) A critical survey of problems and literature in the political, social, and cultural history of Twentieth Century Europe. May be repeated to a maximum of six credits when topical coverage is sufficiently different from one semester to another.

HIS 626 BRITAIN, 1792-1914. (3) This course will provide graduate students with a detailed overview of the history of Britain in the “long” nineteenth century. It will focus on such issues as the impact of the Industrial Revolution, the formation of a recognizably modern class society, the growth of working-class political consciousness, and the politics of class and gender. Prereq: Permission of instructor.

HIS 627 THE BRITISH EMPIRE, 1763-1914. (3) This course provides graduate students with a detailed overview of several broad themes pertaining to the history of the British empire. 1763-1914: the first imperial crisis, slavery and the slave trade, race as a category of imperial knowledge/power, women’s emancipation and the problem of empire, the post-colonial challenge to the “imperial mindset,” and the intensification of imperial awareness within Britain itself, c. 1880-1914. Prereq: Permission of the instructor.

HIS 628 COLLOQUIUM ON MODERN EUROPEAN HISTORY. (3) This course will provide an overview of the major themes and events that have shaped Modern European History from the late 18th century to the present. We will analyze the various ways in which particular historical topics have been interpreted and reinterpreted over time, as well as by historians’ different methodologies, underlying assumptions, and use of evidence. The major goal of the course, however, is to introduce graduate students to significant works and historical debates in Modern European History.

HIS 637 READINGS IN COLONIAL LATIN AMERICAN HISTORY. (3) Intensive survey of major themes and debates in colonial Latin American history from 1492 to the early nineteenth century. Includes political, economic, social, and cultural topics.

HIS 638 READINGS IN LATIN AMERICAN HISTORY. (3) Intensive survey of the major themes and debates in Latin American history from 1850 to the present. Includes political, economic, social and cultural topics. Prereq: Consent of instructor.

HIS 640 READINGS IN AMERICAN HISTORY TO 1877. (3) Course will examine major scholarly debates in American history to 1877.

HIS 641 READINGS IN AMERICAN HISTORY SINCE 1877. (3) Course will examine major scholarly debates in American history since 1877.

HIS 650 READINGS IN SPECIAL TOPICS IN HISTORY. (3) Supervised reading at the graduate level of a selected bibliography of the essential literature of various special topics. May be repeated to a maximum of nine credits with different topics. Prereq: Consent of instructor.

HIS 651 READINGS IN U.S. FOREIGN RELATIONS SINCE 1900. (3) This course will involve intensive reading in the history of United States foreign relations in the twentieth century. It will examine various theoretical approaches to the subject. It will analyze the sources and consequences of America’s global expansion as well as the historiography of important events such as World War I and II, Korea and Vietnam.

HIS 653 READINGS IN U.S. WOMEN’S HISTORY. (3) This course will introduce students to the main currents in U.S. women’s history in four broad chronological units: Traditional America, 1600-1820; Industrializing America-Part I, 1820-1880; Industrializing America-Part II, 1880-1920; and Modern America, 1920-present. Within this framework, the course will explore such topics as: work, communities and public life; gender, families and sexuality; race and African-American experiences; and religion, reform and political culture. The course will also familiarize students with the ongoing theoretical debates within women’s history.

HIS 654 READINGS IN MODERNAFRICA-MERICAN HISTORY. (3) Introduces graduate students to the historical literature on 20th century African-American history and major historiographical issues. (Same as AAS 654.)

HIS 655 READINGS IN ANTEBELLUM SOUTHERN HISTORY. (3) Introduces graduate students to the historical literature on the antebellum South and the major historiographical issues.

HIS 656 READINGS IN NEW SOUTH HISTORY. (3) Introduces graduate students to the historical literature on the New South and the major historiographical issues.

HIS 657 RACE RELATIONS IN THE UNITED STATES. (3) This seminar focuses on the African American experience in the United States from Reconstruction to the present. Using primary documents and secondary readings, this course will examine the construction of race relations and the individuals, organizations, events, and issues significant to the shaping of the black experience. (Same as AAS 657.)

HIS 695 INDEPENDENT WORK. (1-3) Under special conditions selected students may investigate problems, with weekly reports to instructor. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

HIS 700 SPECIAL PROBLEMS IN HISTORY. (3) Professors will conduct research seminars in topics or problems in which they have special research interests. May be repeated to a maximum of 12 credits. Prereq: Consent of instructor.

HIS 701 RESEARCH SEMINAR IN AMERICAN HISTORY. (3) Graduate research seminar in American history. May be repeated to a maximum of 12 credits.
An investigation of the history, literature, and situation of Jewish life in America.

HJS 326 THE JEWISH EXPERIENCE IN AMERICA. (3)
To the destruction of European Jewry in the Holocaust and the re-establishment of Israel.

HJS 325 JEWISH THOUGHT AND CULTURE II: FROM ANCIENT ISRAEL TO THE MIDDLE AGES. (3)
A survey of Jewish intellectual and material civilization from its beginnings in ancient Israel
to the efflorescence in the medieval period.

HJS 324 JEWISH THOUGHT AND CULTURE I: FROM ANCENT ISRAEL TO THE MIDDLE AGES. (3)
A survey of Jewish intellectual and material civilization from its beginnings in ancient Israel
to its efflorescence in the medieval period.

HJS 325 JEWISH THOUGHT AND CULTURE II: FROM THE EXPULSION FROM SPAIN TO THE PRESENT. (3)
A survey of Jewish intellectual and material civilization from the expulsion from Spain in 1492
to the destruction of European Jewry in the Holocaust and the re-establishment of Israel.

HJS 326 THE JEWISH EXPERIENCE IN AMERICA. (3)
An investigation of the history, literature, and situation of Jewish life in America.

HJS 327 WOMEN IN JUDAISM. (3)
An investigation of the history, literature, and experiences of women in Judaism.

HJS 495 INDEPENDENT STUDY IN JUDAIC STUDIES. (3)
Independent study on a topic mutually acceptable to instructor and student in Judaic Studies.
PreReq: Declared minor in Judaic Studies.

HJS 425 TOPICS IN JUDAIC STUDIES (Subtitle required). (3)
Variable in content, this course focuses on important texts and issues in Jewish history, religion,
literature, and philosophy. May be repeated to a maximum of six credits under different subtitles.

HMN 301 GAINES SEMINAR IN THE HUMANITIES I. (4)
A multidisciplinary seminar directed to topics of major concern in humanistic studies and to
include consideration of culture, literature, history and landscape. Prereq: Gaines Fellowship Program; junior status.

HMN 302 GAINES SEMINAR IN THE HUMANITIES II. (4)
Continuation of HMN 301. A multidisciplinary seminar directed to topics of major concern in humanistic studies and to include consideration of culture, literature, history and landscape.
Prereq: Gaines Fellowship Program; HMN 301.

HMN 303 CONTEMPORARY ISSUES CONCERNING THE HUMANITIES. (1-3)
An interdisciplinary seminar in the humanities which will focus on contemporary issues. Open
to all University students, subject to such limits or prerequisites as set by the instructor.
May be repeated to a maximum of six credits under different subtitles. Prereq: Set by individual instructors.

HMN 497 GAINES SENIOR THESIS. (3-15)
An independent research course leading to an undergraduate thesis in the humanities, to be supervised by three faculty members, to be a minimum of 50 pages in length, and to be defended in an oral examination. A minimum of six credit hours must be taken in the fall semester. May be repeated to a maximum of 15 credits. Prereq: Gaines Fellowship Program; HMN 302.

HMT 120 INTRODUCTION TO HOSPITALITY MANAGEMENT AND TOURISM. (3)
A survey of the historical development and management structure of organizations that comprise the hospitality and tourism industry. The course format includes presentation by industry representatives, lectures and student led discussions.

HMT 270 PRINCIPLES OF TRAVEL AND TOURISM. (3)
An introduction to the structure, operation and characteristics of domestic and international tourism. Topics include transportation modes, destination planning and marketing, wholesale and retail travel agent agreements, geographic, social and cultural aspects of tourism. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 308 PRINCIPLES OF FOOD AND BEVERAGE. (3)
This course provides an overview of the principles of food and beverage concepts, menu
development and food service operations in various segments of the hospitality and tourism industries. Food and beverage demonstrations and labs are included. A fee to cover materials and activities may be assessed from students. Lecture, two hours; laboratory, two hours per week. Prereq: HMT 120; NFS 241; Hospitality and Tourism majors only.

HMT 310 HOTEL ROOMS DIVISION MANAGEMENT. (3)
A comprehensive study of the management principles which apply to the rooms division of a hotel property that includes front desk and housekeeper operations, reservations and billing, accounting procedures and public relations. Prereq: HMT 120. For Hospitality Management and Tourism majors only.

HMT 320 HOSPITALITY AND TOURISM MARKETING. (3)
This course concentrates on the principles of marketing as they are applied to the hospitality industry. Problems and characteristics specific to the industry will be examined. Additionally this course will be a starting point for the development of a marketing feasibility study and comprehensive plan and strategy for marketing a hospitality operation. Prereq: HMT 120, HMT 270, HMT 308 and MKT 300. For Hospitality Management and Tourism majors only.

HMT 330 MEETINGS AND CONVENTION MANAGEMENT. (3)
This course highlights the importance, growth, and economic impacts associated with convention/trade shows to hotels, restaurants, visitors and convention centers, museums, airlines and local governments. Prereq: HMT 120, HMT 210, HMT 270, MKT 300. For Hospitality Management and Tourism majors only.
HMT 345 INFORMATION TECHNOLOGY IN THE HOSPITALITY INDUSTRY. (3)
This course assesses the strategic impact of information technology on the hospitality industry, describes basic functions found in IT applications in the hospitality industry, and devotes time to learning industry-specific applications as well as the Internet. Prereq: CS 101, HMT 120. For Hospitality Management and Tourism majors only.

HMT 350 HOSPITALITY MANAGEMENT ACCOUNTING. (3)
Theoretical and practical investigation of the principles and applications of accounting systems and accounting data for hotels, restaurants, and other organizations in the hospitality industry. Prereq: HMT 120, ACC 201. For Hospitality Management and Tourism and Dietetics majors only.

HMT 359 HOSPITALITY AND TOURISM SPECIAL TOPICS (Subtitle Required) (1-3)
New issues or the in-depth study of issues relevant to hospitality and/or tourism will be offered through this course. Credit hours will vary. May be repeated a maximum of six credit hours under different subtitles. Prereq: Consent of instructor.

HMT 360 TOURISM PLANNING AND DEVELOPMENT. (3)
This course is designed to provide students with a thorough overview of tourism planning at the local, regional, national and international levels. It provides a variety of practical planning theories, procedures and guidelines to meet the diverse needs of travelers, destination communities, tourism and hospitality organizations, public, non-governmental organizations, and the private sector. The course will concentrate on developing student’s competencies in the basic techniques of planning and developing sustainable tourism plans as well as procedures and guidelines to enable students to understand the tourism planning process and general surveys, tourism, services and infrastructure; planning analysis and policy formulation; development of design standards; environmental and socio-economic considerations in tourism planning and tourism plan implementation. Prereq: HMT 120, HMT 210, HMT 270, MKT 300 and MGT 301 or consent of instructor.

HMT 370 EVENT PLANNING AND COORDINATION. (3)
This course will provide the theoretical and practical foundations for effective twenty-first century event management. Students will learn how to research, design, plan, coordinate, and evaluate professional events. Specifically, this course deals with the leisure industry activities in the state of Kentucky. Prereq: HMT 120, HMT 200 and HMT 210 or consent of instructor.

HMT 395 HOSPITALITY AND TOURISM INDEPENDENT STUDY. (1-3)
Independent intensive work on specific topics in hospitality management or tourism. May be repeated a maximum of six credits. Prereq: Consent of instructor.

HMT 460 ADVANCED SEMINAR IN LODGING AND TOURISM. (3)
This course is a review and application of the principles of hospitality (specifically lodging) and tourism learned in pre-requisite courses. Theory and principles will be applied to decision-making in the hospitality and tourism industry while emphasizing features and characteristics of the industry. Current issues of relevance pertaining to the industry will be discussed to highlight their importance to the industry. Prereq: HMT 120, HMT 210, HMT 270, MKT 300, MGT 301. For Hospitality Management and Tourism majors only.

HMT 470 HOSPITALITY AND TOURISM LAW AND ETHICS. (3)
Students are introduced to the principles of law and their application in the hospitality industry. The focus of the course is on the rights and obligations of hotel, restaurant and travel business managers and professionals in their dealings with customers and other business. Prereq: HMT 120, HMT 210, HMT 270. For Hospitality Management and Tourism majors only.

HMT 480 TRENDS ANALYSIS FOR THE HOSPITALITY INDUSTRY. (3)
The course is designed to acquaint the student with the major trends occurring in the hospitality industry and to develop analytical skills required to interpret them. Throughout the course, the student should be able to identify trends; their timing; the causal effects they have on organizations; the actual probability of their occurrence; and impact they will have on the organization. Prereq: HMT 120, 208, 210, and 270. For Hospitality Management and Tourism majors only.

HMT 488 STRATEGIC MANAGEMENT IN THE HOSPITALITY AND FOOD SERVICE INDUSTRY. (3)
A course requiring students to use integrative skills to evaluate theories and applications regarding decision making, strategic planning and management concepts specific to hospitality and food service organizations. Prereq: HMT 120, 308, 210, 270, MGT 301, and MGT 300. For Hospitality Management and Tourism majors only.

HMT 499 HOSPITALITY AND TOURISM INTERNSHIP. (3)
This capstone course for HMT majors is a planned work experience focusing on development of defined management skills and problem solving experiences. A minimum of 400 hours must be completed in an approved hospitality or tourism organization. The experience is coordinated by the faculty internship coordinator, the student, and the on-site supervisor. Written progress reports must be submitted by the student and the on-site supervisor. Prereq: 400 hours of verifiable work experience in the hospitality and tourism industry in the last two years; specifying a “period-to-date” accumulations of hours worked, HMT 120, 208 (or NFS 204), 210, 270 with a grade of C or above, at least 60 hours of earned credits and at least 15 hours of major HMT required courses (i.e., NBS 342, HMT 345, HMT 350, FIN 300, MGT 301, MKT 300).

HON 100 ACADEMIC ORIENTATION AND SERVICE LEARNING FOR SINGLETARY SCHOLARS. (1)
This course is designed to introduce first-semester Singletary Scholarship recipients to the scholarly life at the University and also to organize and execute community service as a cohort. Through guest lectures, discussions, and out-of-class assignments, HON 100 helps first-year Singletary scholars: gain an early understanding of opportunities at a research university; increase awareness and use of campus resources; reflect on community issues that they can address using the skills and talents specific to their cohort, and form beneficial relationships with students, faculty, and staff. Prereq: Must be a first-year recipient of the Singletary Scholarship.

HON 101 THE ANCIENT WORLD. (3)
From Greek and Roman antiquity to the early Christian centuries: an interdisciplinary course in intellectual history. Readings vary at the discretion of the faculty. Prereq: Membership in the Honors Program.

HON 105 THE MEDIEVAL AND RENAISSANCE WORLD. (3)
From the Middle Ages through the Reformation: an interdisciplinary course in intellectual history. Readings vary at the discretion of the faculty. Written assignments required. Prereq: Membership in the Honors Program.

HON 111 WORLD FOOD ISSUES I: SEEDS AND HARVESTS. (3)
In this foundational course you will start from the human past, explore the role of the Agricultural Revolution 10,000 years ago, and address the impacts of those historical influences on current world food issues. Prereq: Admission to the Honors Program.

HON 115 WORLD FOOD ISSUES II: YOUR DAILY BREAD. (3)
In this course, you will learn about basic human nutrition, critically consider the basis of your own food choices, and evaluate how individual food choices are made in the context of cultural relationships. Prereq: HON 111.

HON 121 HISTORY OF EMERGING TECHNOLOGIES IMPACT ON SOCIETY: A TIME TRAVEL. (3)
The objective of this course is to examine the short and long term impacts of emerging technologies on the society at large. We will have, in a sense, a time travel to explore how some of the major inventions such as steam engine, compass, and roman aqueducts influenced the society during their times as well as centuries later. We will discuss the technological expectations of a society and the overall mind set prior and after a given technology was introduced. Finally, we will have a speculative study of nanotechnology to explore its potential impact on science, engineering, and the society. Prereq: Membership in the Nanotechnology Track of the Honors Program.

HON 125 THE SCIENCE & ART OF SMALL: INTRODUCTION TO NANOTECHNOLOGY. (3)
Nanotechnology is a highly interdisciplinary emerging field involving scientists from physics, chemistry, biology, engineering, information technology, metrology, and other fields. This course will define the terminology, promises, and challenges of nanotechnology by exploring the development of the National Nanotechnology Initiative (NNI) and related enterprises. Prereq: Membership in the Nanotechnology Track of the Honors Program (HON 121) or consent of instructor.

HON 131 SPACE, PLACE, AND CULTURE: AN INTRODUCTION. (3)
A multidisciplinary introduction to the concepts of space and place in culture. Through readings in social and critical theory, as well as analyses of literary texts, film, music, architecture, urban design, and other forms of cultural expression, students explore how places develop meaning for those who inhabit them. Special attention is given to the issue of belonging, the geographies of gender and race, the problem of nationalism in the era of globalization, the fate of the city, and the spatial politics of resistance. Prereq: Membership in the Space, Place, and Culture Track of the Honors Program.

HON 135 SPACE, PLACE, AND CULTURE: TOPICAL SEMINAR II (Subtitle required). (3)
This course provides an in-depth multidisciplinary study of a specialized topic within the broader area of space, place, and culture. Course topics, which change from year to year, explore cultures of the Middle East, Western Europe, and the Americas by asking how cultural identity is grounded in and shaped by human encounters with geographic place. Prereq: HON 131 and membership in the Space, Place, and Culture Track of the Honors Program.

HON 141 THE SELF AND OTHERS. (3)
This course is designed to give students a multidisciplinary perspective on the social sciences. Specifically, it seeks to introduce students to representative disciplines, guiding themes and salient theories, and paradigmatic social science thinkers and researchers within the broad domain of the social sciences. This interdisciplinary Honors course will provide an intellectual base from which to begin the study of the social sciences. The topics cover the self and others, and they are examined from various Social Science disciplines including Anthropology, Communications, Education, Family Studies, Geography, Political Science, Psychology, Social Work, Sociology, and Statistics. Prereq: Membership in the Social Science Track of the Honors Program.
Course Descriptions

HON 145 THE SOCIAL CONSTRUCTION OF HUMAN IDENTITY. (3)
This course is designed to give students a multidisciplinary perspective on the social sciences. Specifically, it is focused on the study of how and why social categories are constructed, identified, and represented in social discourse. Course topics in this interdisciplinary Honors course will continue to provide an intellectual base from which to begin the study of the social sciences. This course is designed to give students a multidisciplinary perspective on the social sciences, and it will be presented and discussed. Methodological arguments and techniques from sampling, experimental design, inference, and regression will be illustrated. Prereq: HON 141 and membership in the Social Science track of the Honors Program.

*HON 151 HONORS IN HUMANITIES (Subtitle required). (3)
Honors Humanities topics offered by various professors (topics announced the preceding semester). Whatever the topic, the Honors Humanities courses reflect on the human condition through works of art and literature (including folklore and film), philosophical and religious contemplation and argumentation, and historical narrative. Students will undertake interdisciplinary investigations of significant intellectual and cultural issues of our past and present (and thus of our future) and are designed to stimulate individual thought as well as develop writing, critical thinking, and small-group discussion skills. Prereq: Membership in Honors.

*HON 152 HONORS IN NATURAL, PHYSICAL, AND MATHEMATICAL SCIENCES (Subtitle required). (3)
This hands-on, science course for Honors students in which they ask a question requiring scientific analysis, develop a related experimentation regimen, collect data, do the experimentation, analyze the results, draw conclusions and appropriately disseminate the results. Students will directly experience the scientific process to learn how scientists work. Prereq: Membership in Honors.

HON 153 THE WORLD AS HUMAN NETWORK AND AFFAIRS. (3)
The World as Human Network and Affairs: Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. Prereq: Membership in Honors.

HON 201 THE EARLY MODERN WORLD. (3)
From the development of the modern scientific method through mid-19th century industrialism: an interdisciplinary course in intellectual history. Readings vary at the discretion of the faculty. Prereq: Membership in the Honors Program.

HON 205 THE CONTEMPORARY WORLD. (3)
The contemporary world: an interdisciplinary course in intellectual history. Readings vary at the discretion of the faculty. Prereq: Membership in the Honors Program.

HON 211 WORLD FOOD ISSUES III: LIVING WITH LIMITS. (3)
In this course, you will evaluate the availability of resources to sustain human societies in the future, and consider the prospects of changing food expectations in order to achieve sustainability. Prereq: HON 115.

HON 221 SOCIAL IMPLICATIONS OF EMERGING TECHNOLOGY. (3)
This course explores the social implications of technology and the production of scientific knowledge in educational, legal, ethical, cultural, and industrial contexts. Prereq: HON 121 (formerly HON 101B), HON 125.

HON 231 SPACE, PLACE, AND CULTURE: TOPICAL SEMINAR II (Subtitle required). (3)
This course provides an in-depth multidisciplinary study of a specialized topic within the broader area of space, place, and culture. Course topics, which change from year to year, explore cultures of the Middle East, Western Europe, and the Americas by asking how cultural identity is grounded in and shaped by human encounters with geographic place. Prereq: HON 131, HON 135 and membership in the Space, Place, and Culture track of the Honors Program.

HON 241 TOPICAL SEMINAR IN SOCIAL SCIENCES (Subtitle required). (3)
This course is designed to provide an in-depth multidisciplinary study of a specialized topic within the social sciences. Topics will vary from year to year, providing students with a diversity of material in the social sciences. The topics are examined from various Social Science disciplines, including Anthropology, Communications, Education, Family Studies, Geography, Political Science, Psychology, Social Work, and Sociology. Prereq: HON 141, HON 145 and membership in the Social Science track of the Honors Program.

HON 242 A SCIENTIFIC APPROACH TO UNCERTAINTY. (3)
This course is designed to give students a multidisciplinary perspective on the interaction of the science and art of statistics in the world around us. Particular attention will be focused on how this interaction has influenced the notion of quantitative argument in the social sciences. Although the course will emphasize ideas of mathematical computations, both will be encountered and explored in depth. Case studies and current social science controversies will be presented and discussed. Methodological arguments and techniques from sampling, experimental design, inference, and regression will be illustrated. Prereq: HON 141, HON 145, and membership in the Social Science track of the Honors Program.

*HON 251 HONORS IN SOCIAL SCIENCES (Subtitle required). (3)
The World as Human Network and Affairs: Courses in this category promote the understanding of individuals in the context of social interactions, groups and societies. The courses will focus on the subjective, intersubjective, and structural aspects of society, with the goal of helping students to enhance their understanding of the phenomenon that is human society. Prereq: Membership in Honors.

*HON 252 HONORS IN ARTS AND CREATIVITY (Subtitle required). (3)
The creative process and its products and results are the focus of these Honors courses, and include but are not limited to, visual, verbal, musical, spatial, or kinesthetic forms of expression. Readings and final projects vary at the discretion of the faculty. Prereq: Membership in Honors.

HON 301 PROSEMINAR. (3)
An interdisciplinary seminar in the history of culture; topics will vary from semester to semester, but a substantial research essay is always required. This course will satisfy the Honors program requirement for Independent Study. May be repeated to a maximum of six hours. Prereq: At least two Honors colloquia and membership in good standing in Honors Program or consent of instructor.

HON 333 JOURNAL/JOURNEY PROJECT. (1-3)
Special credit for Honors Program students who keep an intellectual journal for both fall and spring semesters, receiving one credit during the spring semester. Regular consultation with an assigned advisor, several group meetings during the year. May be repeated to a maximum of five credits. Pass/Fail only. Prereq: Membership in the Honors Program.

HON 352 STUDY AND TRAVEL ABROAD (Subtitle required). (3)
An experiential, travel-abroad course that requires pre-travel class preparation followed by travel abroad that will provide students with multi-cultural exposure, leadership, and a new frame of reference for understanding the world and their role in it. Prereq: Sophomore status and any two of the following: HON 151, 152, 251, 252, or departmental Honors course, section or option in the Inquiry areas, or permission of the Honors Program.

HON 395 HONORS RESEARCH AND CREATIVITY. (3-15)
Independent research or creative projects supervised by a faculty member in the field. Work must result in a report or publication evaluated by supervising faculty member and Honors Director. Prereq: Upper division standing, membership in Honors Program, consent of Honors Director.

HON 398 UNDERGRADUATE THESIS. (6-15)
A formal thesis or creative project of the student’s ‘student’s choosing, to be directed by a professor in the student’s major department with the assistance of the two other faculty members, one of whom must be from the Honors Program instructional faculty. Student must present this research in an appropriate public or professional venue. Prereq: Students of junior-senior status, good standing in Honors Program and written permission from the Director of the Honors Program.

HON 399 HONORS SERVICE LEARNING AND COMMUNITY ENGAGEMENT. (1-15)
A service- or community-based learning experience in the field under the supervision of a faculty member. May be repeated a maximum of 30 credits. Prereq: Consent of supervising faculty member and Honors Director, completion of an Honors Learning agreement and membership in the Honors Program.

HP Historic Preservation

HP 501 SELECTED TOPICS IN HISTORIC PRESERVATION (Subtitle required). (3)
Seminars for investigations of selected topics in historic preservation. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

HP 601 INTRODUCTION TO HISTORIC PRESERVATION. (3)
HP 601 is an introduction to the field of historic preservation, focusing on the policies and practices of preservation in the United States. It covers preservation legislation and public and private preservation practice at local, state, and national levels. It emphasizes preservation as a publicly supported endeavor, and presents information about the workings of standard preservation program areas. The National Register of Historic Places, a program marking a threshold for preservation decisions in the United States, receives special attention in this course. Students in the course will experience the process of evaluating a property for listing in the National Register of Historic Places as a class project.

HP 602 DYNAMICS OF HISTORIC PRESERVATION: LAW, LAND USE PLANNING AND ECONOMICS. (3)
A sequel to HP 601, this course is an advanced examination of the history, theory, and legal and economic aspects of architectural preservation. Course readings and discussions will address issues on preservation legislation, the planning process, historic districts and landmarks, tax and economic incentives for preservation/restoration, and rural and urban real estate. Practicing professionals to serve as guest speakers. Prereq: HP 601 or consent of instructor.
University of Kentucky

**Course Descriptions**

HP 610 AMERICAN ARCHITECTURE I. (3)
This course will trace architectural developments in America from colonial settlement until the middle of the 19th century. Examples will come from vernacular, professional and monumental contexts so that students become familiar with various design processes and types of architecture. The course will both survey the features of buildings constructed in different times in various American places and consider their historical and social contexts.

HP 611 AMERICAN ARCHITECTURE II. (3)
This course is a sequel to HP 610: American Architecture I. It will examine architectural developments in America from the middle of the 19th century to the present, with a focus upon the intersection of American architecture with the emergence of modern architecture in the rest of the world. There will be special emphasis upon architectural professionalization and its impact on processes of design in all contexts. Prereq: HP 610 or consent of instructor.

HP 612 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES. (3)
This course introduces students to basic research methods and techniques for gathering, recording, and interpreting information about historic buildings and sites. Class discussions and practical exercises focus on the National Register system’s documentation requirements, HABS conventions for drawing, and recording for survey and compliance purposes (e.g., Section 106). While engaging in field research to investigate historic buildings and sites, students will learn how, when, and why to apply the everyday research and recording techniques used by preservation professionals including fundamental methods for conducting archival research; evaluating physical evidence; developing building descriptions and historical narratives; producing measured drawings (plans); photographing buildings for reporting or archival purposes; and organizing results.

HP 613 HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS. (3)
An introduction to basic principles of traditional construction in stone, masonry, wood, and cast iron. The student will gain an understanding of the structural systems used with each of these building materials by preparing drawings and/or studying such details as floor and roof framing, window and stair construction, and finishes. The course concludes with a discussion of traditional mechanical systems and strategies for integrating modern systems in older buildings.

HP 614 DOCUMENTATION OF HISTORIC BUILDINGS AND SITES. (3)
This course introduces students to the tools and techniques needed to conduct architectural historical research as a profession. Topics include the history of architectural documentation; the use of architectural drawing in the documentation process; basic photographic techniques; and the documentation of historic sites and structures. Students work through practical exercises and field work at a historic site. This course is designed to provide the student with the skills necessary to document and interpret historic structures and sites for both research and preservation purposes. Prereq: Consent of instructor.

HP 616 PRESERVATION DESIGN STUDIO. (6)
An introductory studio in architectural preservation, using sites in Kentucky. Design projects in restoration/preservation and adaptive reuse of historic structures, new urban infill structures within historic urban and rural contexts. Individual and team projects, involving interaction with local preservation and planning groups to place projects into the context of broad preservation planning and community goals. Lecture, two hours; studio, six hours per week. Prereq: Enrollment in program or consent of instructor.

HP 690 SUMMER INTERNSHIP. (1-6)
Summer internship either in or out of Kentucky, providing intensive, practical experience in historic preservation. Internships for which the student can apply in other states or countries will be encouraged to provide practical experience outside of Kentucky, and work at several sites is possible. Possible internship programs include those offered by the Smithsonian Institution, National Park Service, or in various foreign countries, depending on the student’s interest and subject to approval of the Director. Prereq: Two semesters of course work or consent of the Director.

HP 720 CASE STUDIES IN PRESERVATION. (3)
An elective seminar in which case studies of significant local, regional, national and international preservation projects will be presented, analyzed and evaluated. Site visits, lectures by preservationists, architects, developers, and agency officials. Case studies will vary each semester, focusing upon preservation projects of current interest, including individual structures, rural land urban preservation, and community preservation planning, interaction with groups, analysis projects, student presentations. Prereq: HP 601 and HP 602 or consent of instructor.

HP 721 INTERPRETATION OF HISTORIC BUILDINGS AND SITES. (3)
This course addresses the issues and problems involved in documenting and establishing historic buildings and sites as local/national museums. Students will examine museum types, such as house museums, living history, and battlefield sites, methods of interpretation, and concerns for the handling and displaying of historic materials. Students will discuss specific museum types within a larger context, including social and political history and the issues associated with heritage tourism. Prereq: Consent of instructor.

HP 722 HISTORIC PROPERTIES MANAGEMENT AND ADMINISTRATION. (3)
A practical introduction to the management of cultural resource based organizations. Particular emphasis will be placed on administrative tasks such as planning, budgeting, grant writing, regulatory compliance, risk management, collections, curatorship, and conservation. Case studies will be utilized. Much of this course will apply to the operation of any not-for-profit organizations.

HP 723 TOPICAL SEMINAR IN KENTUCKY ARCHITECTURE AND CULTURAL LANDSCAPES. (3)
This course is a topical seminar with a subtitle each time it is offered. It emphasizes an understanding of how the built and physical landscapes combine to generate locally characteristic cultural landscapes. Class readings and discussions will provide background, contextual and comparative information for class investigation of a research, design or policy problem concerning Kentucky architecture and cultural landscapes. Students will each research an aspect of the topic problem, and present their findings both orally and in written form. Prereq: Consent of instructor.

HP 724 ADVANCED HISTORICAL STRUCTURAL SYSTEMS AND BUILDING MATERIALS CONSERVATION. (3)
A practical discussion of the most effective methods for conserving buildings, organized by building material - wood, masonry, metals, and glass. Readings will be supplemented by site visits and discussion of actual projects. Prereq: HP 613 or consent of instructor.

HP 725 PRESERVATION PRACTICUM. (3)
An in-course practicum with a state or local agency, private firm or university research unit to provide the student with intensive, practical experience in historic preservation. Students will execute a learning contract with the Preservation Program Director and prospective employer detailing the work they will carry out, identifying achievable, measurable learning objectives, specifying the criteria by which their work will be evaluated, and setting meetings dates with the participating parties to chart their progress. Prereq: Two semesters of course work or consent of the Director.

HP 726 AMERICAN MATERIAL CULTURE. (3)
Survey of approaches to the study of American material culture by various academic disciplines such as literature, geography, anthropology, interior design, folklore and architecture. First half of course will review how the various disciplines study material culture. Second half will present ways in which various approaches can be combined to restore, interpret, furnish, and landscape historic structures and sites. Specific examples will be provided on a case study basis.

HP 728 HISTORIC LANDSCAPE AND GARDEN RESTORATION AND INTERPRETATION. (3)
Building on the discussion of rural preservation and landscape analysis found in earlier courses, this course will expand on this subject by focusing on principles and techniques of landscape restoration and interpretation at various scales from restoration of previously existing gardens to documentation of entire landscapes. Prereq: HP 601, 610, and 611; or consent of instructor.

HP 748 MASTER’S PROJECT RESEARCH. (0)
Half-time to full-time work on master’s project. May be repeated for a maximum of six semesters. Prereq: All course work toward the degree must be completed.

HP 750 ARCHITECTURE DESIGN STUDIO. (6)
An advanced studio in architectural design for students with academic preparation in design who intend to specialize in preservation. Projects include adaptive reuse of historic structures and the design of new structures within historic contexts, using sites in Kentucky as foci for investigations. Individual and team projects of public interest, involving interaction with local preservation and planning groups and other professional and academic disciplines. Lecture, two hours; studio, 12 hours per week. Prereq: Consent of instructor or HP 616.

HP 772 SEMINAR IN HISTORIC PRESERVATION (Subtitle required). (3)
Seminar for the investigation of selected topics in historic preservation. The course requires a subtitle each time it is offered. May be repeated for a maximum of six credits. Prereq: Consent of instructor.

HP 785 INDEPENDENT STUDY IN HISTORIC PRESERVATION. (3)
Independent investigation of selected topics in historic preservation under the supervision of a faculty member with proficiency in the investigation area. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, written consent of instructor, and contractual agreement approved by Department Chair.

HP 798 RESEARCH DESIGN. (3)
This course will provide students with the basic tools needed for an in-depth investigation of a preservation design project, policy issue, or scholarly question. This course, which must be taken prior to enrollment in HP 799, assists students in designing their Master’s Project and results in a Master’s Project proposal and selection of a Master’s Project Committee. Through readings and class discussions, this course will familiarize students with grounding their research within the literature, formulating research questions or hypotheses, research design, advanced methodologies, critical assessment of methodologies, and data analysis. Prereq: Completion of 9 credits of graduate study or consent of the instructor.

HP 799 MASTER’S PROJECT. (3)
Students work independently, but under the direction of a committee chair and Master’s Project committee suggested by the student and chosen in consultation with the department chair or DGs to complete the Master’s Project proposed in HP 798. Must be repeated to a maximum of six hours. Prereq: HP 798.
HSM Health Services Management

HSM 241 HEALTH AND MEDICAL CARE DELIVERY SYSTEMS. (3)
Review of the wellness-illness spectrum and the societal response in terms of health services. Topics to be covered include the nature and functions of health services agencies and professionals, and the impact of social, political, economic, regulatory, and technological forces. Also included is a discussion of major health problems and related health care programs. (Same as CLM/HHS 241.)

HSM 250 INTRODUCTORY EPIDEMIOLOGY. (1)

HSM 260 INTRODUCTION TO HEALTH ADMINISTRATION. (1)
Introduction to administrative roles, functions, settings and requirements through interviews with practicing administrators, site visits, discussion, and case studies.

HSM 351 HEALTH SERVICES ADMINISTRATION. (3)
Theories and principles of administration in health care institutions with special emphasis on organizational behavior and analyses of various administrative processes and techniques. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HHS 351.)

HSM 353 HEALTH ADMINISTRATION, PLANNING AND MANAGEMENT TECHNIQUES. (3)
Review of quantitative and nonquantitative techniques used in health care settings for planning, implementation and control. Emphasis will be placed on the role of health care service area delineation, patient origin studies, research methods, management information systems such as PAS, HAS, I.C.D.A., and quality assessment systems. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HHS 353.)

HSM 354 HEALTH LAW. (3)
Introduction to concepts of administrative and tort law applicable to health care settings. Topics to be considered include governance, patient rights, informed consent, medical/moral problems, malpractice, tax laws, contracts, labor law, regulation and institutional liability. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM/HHS 354.)

HSM 355 FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS. (3)
A review of financial management practices in health care institutions. Course will analyze regulatory and third party reimbursement for financial management, financial management practices, impact of financing mechanisms and practices on health services decision making. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM 355.)

HSM 450 HOSPITAL AND HEALTH SERVICES: INTERORGANIZATIONAL RELATIONSHIPS. (3)
Environment of interacting organizations in the health industry is considered. Attention given to multi-hospital organizations and other forms of interorganizational relationships. Prereqs: HSM 351 and HSM 843.

HSM 451 TOPICS IN HEALTH ADMINISTRATION (Subtitle required). (1-6)
Readings, projects, lecture and/or discussion in seminar format to illuminate current topics of special interest, or concern in health administration. May be repeated to a maximum of six hours. Prereq: Consent of department.

HSM 452 COMMUNITY AND INSTITUTIONAL PLANNING FOR HEALTH SERVICES DELIVERY. (3)
The theoretical foundations for health planning. History of health planning and regulation. Specific attention will be given to integration of institutional planning with community health planning. Prereq: Professional program status (which includes an earned Associate Degree in a health care discipline and one year of post-degree work in a health care setting) or consent of instructor. (Same as CLM 452.)

HSM 510 ORGANIZATION OF THE LONG-TERM CARE SECTOR. (3)
This course examines the structure and function of the long-term care sector with emphasis on nursing homes and the role of noninstitutional alternatives. Analysis focuses on the impact of changes in reimbursement and regulatory policy, interorganizational relations, newly emerging treatment modalities, and the influence of the external organizational, economic, and political environment. Prereq: A course in health care delivery systems or permission of instructor. (Same as CLM 510.)

HSM 511 INDEPENDENT STUDY IN HEALTH SERVICES ADMINISTRATION. (1-3)
Directed independent library and/or community health study. May be repeated to a maximum of six hours. Prereq: Major in health administration and/or consent of department chairperson.

HSM 601 OVERVIEW OF U.S. HEALTHCARE. (3)
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status.

HSM 602 ORGANIZATIONAL CHANGE AND STRATEGIC PLANNING. (3)
This course is designed to focus on the future needs of the health care organization as contrasted to day-to-day operational management. Strategies for the design and implementation of organizational change including techniques of quality and process improvement will be addressed. The strategic planning components of needs assessment, demands analysis, generation of alternative, priority setting and evaluation form the basis of the course. Several health care trends such as restructuring, innovation in health care delivery and financing, and performance measurements will be illustrated through case analysis in a variety of provider settings. Prereqs: HA 601 and HA 621.

HSM 603 LEGAL ASPECTS OF HEALTH ADMINISTRATION. (2)
The course will familiarize students with the application of law to management issues in health care organizations. Skills including terminology, legal reasoning, the tools of law, and topics specific to the health care setting are addressed. Prereqs: MHA program status and HA 601.

HSM 622 MENTAL HEALTH ADMINISTRATION. (3)
This course focuses upon the administration of local mental health agencies, facilities and coordination of deinstitutionalization programs, e.g., group houses, halfway houses. The course will focus upon system coordination, finance and communication. Prereq: MHA/MPA program status.

HSM 624 INFORMATION SYSTEMS IN HEALTH CARE. (3)
This course will focus on the life cycle approach to information systems development. Phases of this approach include systems analysis, design, implementation, maintenance and evaluation. This approach has a technological, financial, and human factors component. The decision making and planning role of administration as well as the need on how to maximize the utilization of current systems is stressed. Topics include the information needs of the strategic planning process, administrative function and clinical care. The course will involve site visits. Prereq: HA 602 and 642.

HSM 637 HEALTH FINANCE. (3)
This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are studied and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635.
**HSM 660 DECISION MAKING IN HEALTH CARE ORGANIZATIONS.** (3)
This course is designed to build on the concepts and techniques introduced in the MHA curriculum and integrate them with decision making focuses in a variety of health care problems and settings. Case analysis will be used extensively to develop an opportunity for the student to learn to apply the appropriate skills to an unstructured environment. Prereq: MHA program status and must be taken in last semester of MHA program studies.

**HSM 775 SPECIAL TOPICS IN HEALTH ADMINISTRATION.** (1-3)
An analysis of selected issues with special significance for health administration. Prereq: MPA/ MHA program status.

**HSM 785 INDEPENDENT STUDY IN HEALTH ADMINISTRATION.** (1-3)
Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

**HSM 842 SEMINAR IN HEALTH ADMINISTRATION: PRE-PRACTICUM.** (1)
Preparatory seminar for the field practicum in health administration. Will cover such topics as self assessment, interview skills, forms of organizational behavior, consultation skills, time management, and documentation. Prereq: CH 351, 355; Majors only with permission of department.

**HSM 843 HEALTH ADMINISTRATION PRACTICUM.** (1-12)
Application of theoretical concepts in practice settings selected by faculty under the supervision of a preceptor and on-campus faculty. Includes in-depth study of an applied problem in health administration. Must be repeated to a maximum of 12 credits. Laboratory: one 40-hour week equals one credit hour. Prereq: Majors only - with permission of department.

**HSM 844 SEMINAR IN HEALTH ADMINISTRATION: POST-PRACTICUM.** (1)
Review of practicum experiences and an integration of theoretical concepts of health administration with the practice environment. Prereq: CH 843 - majors only - with permission of department.

**IAS Interdisciplinary American Studies**

**IAS 301 TOPICS IN AMERICAN STUDIES.** (3)
A team-taught seminar on a selected topic in American Studies, emphasizing approaches to interdisciplinary study in this field and the ways that different disciplines, when integrated, better complement an understanding of the topic. Possible topics include: slavery, racism, women’s rights, Native Americans, the West, the South, the city and industrialization. May be repeated to a maximum of six credits.

**IAS 401 PERSPECTIVES IN AMERICAN STUDIES.** (3)
A team-taught seminar on a selected period in American history, emphasizing how different disciplines complement and illuminate a perspective on that period. Possible periods for study: Colonial America, the Enlightenment Age in America, the Age of Jackson, Ante-bellum America, Civil War and Reconstruction, the Gilded Age, America between the Two Wars, and Contemporary America. May be repeated to a maximum of six credits.

**IBS Integrated Biomedical Sciences**

**IBS 601 BIOMOLECULES AND METABOLISM.** (3)
An introductory graduate-level biochemistry course designed to provide a basic knowledge of molecular and biochemical principles necessary for advanced graduate study. Protein structure and function, enzyme catalysis, the generation and storage of metabolic energy, amino acid, nucleotide, and lipid metabolism and biological membranes and transport will be covered. Prereq: CHE 105, 107, 230, and 232; BIO 150 and 152; or equivalents. (Same as BCH 607.)

**IBS 602 MOLECULAR BIOLOGY AND GENETICS.** (3)
In introductory graduate-level course focused on molecular biology and genetics (concepts and techniques) necessary for advanced graduate courses. The course will emphasize basic genetic principles and the molecular mechanisms that underlie the regulated expression of genes, including transcription, mRNA processing and translation, as well as mechanisms of DNA replication/repair and recombination. Genetic engineering and other experimental approaches that are critical to molecular biology research will be covered. Prereq: CHE 105, 107, 230, and 232; BIO 150 and 152; or equivalents.

**IBS 603 CELL BIOLOGY AND SIGNALING.** (3)
An introduction to cell biology and signaling focused on cell types and architecture, membrane structure, cytoskeleton, mitochondria, cellular mechanisms of development, cell division, cell cycle, apoptosis, necrosis and cancer. Emphasis will also be placed upon the signaling pathways controlling these processes. Prereq: CHE 105, 107, 230, and 232; BIO 150 and 152; or equivalents.

**IBS 604 CELL SIGNALING.** (3)
**IBS 605 EXPERIMENTAL GENETICS.** (3)
This course will consider the function of the mammalian organism from a perspective ranging from cells to organs, with an emphasis on physiological communication between organ systems. It will build upon the Integrated Biomedical Sciences (IBS) series of courses to allow the student to develop a truly integrative appreciation of biologic function. Prereq: IBS 601 and IBS 602.

**IBS 607 SEMINAR IN INTEGRATED BIOMEDICAL SCIENCES.** (0)
Weekly seminar devoted to the presentation and discussion of classic and new research. May be repeated to a maximum of four times; two semesters are required as part of the IBS curriculum. Prereq: Admission to IBS curriculum.

**IBS 608 SPECIAL TOPICS IN INTEGRATED BIOMEDICAL SCIENCES.** (2)
IBS 608 is comprised of a series of 1/2 credit minicourses, each meeting for one hour/week for 7 weeks, that will be taught during the Spring semester. Each minicourse will focus on a specific topic or area of research that is ongoing at UK or is particularly timely/exciting. Each student is required to participate in 4 of these minicourses for a total of 2 credit hours during the semester. Up to ten minicourses will be offered each semester. The particular topics (and participating faculty) may vary from year to year. Students will be expected to sign up for 6 courses in order to meet information needs throughout their lifetimes. Students will gain a better understanding of how taken IBS601 and IBS602 can participate in this course. Non-IBS students can participate with permission of the Course Director. A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended.

**IBS 609 RESEARCH IN INTEGRATED BIOMEDICAL SCIENCES.** (1)
Individualized laboratory and research experience under the supervision of a faculty member. May be repeated to a maximum of two credit hours. Two semesters required as part of IBS curriculum. Prereq: Admission to IBS curriculum and consent of instructor.

**IBS 610 CRITICAL SCIENTIFIC READINGS.** (1)
The major emphasis of this course is to develop within students the ability to critically read, evaluate and critique papers in the areas of biochemistry, molecular biology, and genetics. Students will meet weekly for two hours in a small group setting to discuss papers, with all groups reading the same set of papers. Each group of students (5-6/group) will meet weekly with one faculty member during the course of the semester. Grading will be based on attendance, participation, mock manuscript reviews, and student-led classes. Prereq: Students are required to have taken IBS601 and IBS602 or to take IBS601 and IBS602 concurrently with this course.

**IBS 611 PRACTICAL STATISTICS.** (1)
Practical Statistics will introduce students to basic statistical concepts and applications that are used in a majority of biomedical and translational research studies. The emphasis will be on “how” and “why” certain basic statistical applications are used rather than the theory behind various statistical methods. Students will cover materials using didactic lectures, examples of data from the primary literature, and homework problems. Prereq: A strong background in molecular biology, biochemistry and chemistry (including organic chemistry) is highly recommended. It is also highly recommended that students have taken IBS601 and IBS602 or are taking IBS601 and IBS602 concurrently with this course.

**ICT Information Communication Technology**

**ICT 200 INFORMATION LITERACY AND CRITICAL THINKING.** (3)
This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term “information literacy.” Students will apply this theory into practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of how information and knowledge function in society and will discover methods of finding, accessing, evaluating, and using different information sources in an effective and ethical manner. (Same as IS 200.)

**ICT 201 GENERAL INFORMATION SOURCES.** (3)
Information professionals play a major role in the information life cycle by facilitating the process of finding what others have created and accumulated. Their role is to: array collections of information resources; to develop services to help people identify and articulate their information needs; and to enable people to find, evaluate and use items of relevance. This course provides students with a basic understanding of the information environment, as well as an understanding of the differences in the information behavior, needs, and uses of various user groups. Upon completion of this course, students will be able to critically evaluate and employ information sources in different formats, and be able to communicate with users to identify and address their information needs. (Same as IS 201.)

**ICT 202 TECHNOLOGIES FOR INFORMATION SERVICES.** (3)
This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computer technologies and networks to information problems. Included are features of hardware, types of software, commercial systems and search engines. (Same as IS 202.)

**Course Descriptions**

### ICT 205: ISSUES IN INFORMATION AND COMMUNICATION TECHNOLOGY POLICY

This course introduces students to the legal, political, and ethical issues confronting today's information professionals and the subsequent impact of these issues on information and communication technology (ICT) policy and law development. The rapidly evolving ICT infrastructure and the global shift to an information society will provide the context for the course. Emphasis will be placed on: organizational policy development, information ethics, computer ethics, freedom of speech and expression online, information filtering, intellectual property, cyber law, and pertinent legal and political acts related to the present information and communication infrastructure.

### ICT 300: ICT IN SOCIETY

This course studies the impacts of information and communication technology (ICT) on individuals and society. It examines current issues related to the flow of information in society, including the impact of technology and the development of the information economy. The role of the information profession within the context of information society issues is also explored.

### ICT 301: INTRODUCTION TO DATABASES

This course is intended to give students a solid background in databases, with a focus on relational database management systems. Topics include data modeling, database design theory, data definition and manipulation languages, storage and indexing techniques, query processing and optimization, and database programming interfaces.

### ICT 303: SYSTEMS ANALYSIS

This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system lifecycle, which starts with the conception of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scope information system.

### ICT 307: COPYRIGHT

In the age of digital information, the technology, economics, and law of intellectual property are constantly in flux. In order to continue to effectively provide access to information, ICT professionals need to keep up-to-date in managing these changes. This introductory course examines the basic conceptual elements of copyright protection, and its adaptation and application to new media and information communication technologies.

### ICT 351: TECHNOLOGY SECURITY

An introduction to the various technical and administrative aspects of information security and assurance. This course provides the foundation for understanding the key issues associated with protecting information assets, determining the levels of protection and response to security incidents, and designing a consistent, reasonable information security system with appropriate intrusion detection and reporting features.

### ICT 406: E-COMMERCE REGULATION

Business and commercial transactions conducted via electronic means are subject to complex legislation and regulation that changes frequently. The relevant legislation and regulatory mechanisms govern commercial transactions as well as any electronic marketing, such as promotional emails or online newsletters. This course provides an overview of the regulatory framework governing e-commerce transactions, relevant standards and ethical considerations, protocols to ensure consumer protection, and emergent issues relating to compliance and enforcement.

### ICT 410: PRIVACY

As new information and communication technologies are developed, they increasingly raise concerns about the collection, use, storage, and sharing of personally identifiable information. This course provides an overview of privacy, privacy laws, privacy-related technologies, and self-regulatory efforts to mitigate potential privacy risks. The study of privacy will be approached from philosophical, historical, legal, policy, and technical perspectives.

### ICT 550: SECURITY INFORMATICS

This course introduces students to policy concerns relating to security informatics, and highlights theoretical and practical approaches to designing secure information and communication technology (ICT) systems. It addresses key issues such as authentication, risk analysis, access control, database and network security, and information assurance.

### ICT 552: CYBERCRIME AND DIGITAL LAW ENFORCEMENT

The global reach of the Internet, the low marginal cost of online activity, and the relative anonymity of users have contributed to a wide escalation in cybercrimes. Consequently, information and communications technologies (ICT) are being increasingly employed to instigate threats to global civil society. This course provides an overview of cybercrime and the digital law enforcement practices put in place to respond to them. The course will focus on the types and extent of current cybercrimes, how the justice system responds to these crimes, the various constitutional protections afforded to computer users, the law and policies that govern cybercrime detection and prosecution, and related technologies.

---

**ID School of Interiors**

### ID 101: INTRODUCTION TO INTERIOR DESIGN

An introduction to the profession of Interior Design: historical perspective, career specializations, and career opportunities.

### ID 102: THE INTERIOR DESIGN PROFESSION

An examination of the Interior Design profession focusing on professional practice, current issues, and future directions.

### ID 121: INTERIOR DESIGN, PLANNING AND PROGRAMMING I

An introduction to the interior design process and creative problem solving. Class assignments and discussions focus on theories of two- and three-dimensional design, spatial definition and organization and provide a context for analyses of how design interacts with ecological, social, economic and cultural contexts. The course is comprised of daily instruction periods and weekly lectures. Weekly lectures will introduce interior design ideas, case studies and the interior design profession. Students also are introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components.

### ID 122: INTERIOR DESIGN, PLANNING AND PROGRAMMING II

A continuation of ID 121. Emphasis is on application of the interior design process to a variety of design problems focusing on color, light, sustainability and global perspectives. Projects also focus on design decisions within the parameters of ecological, socio-economic, and cultural contexts. Weekly lectures focus on contemporary interior design issues and case studies. Students also are introduced to concepts of design communication and teamwork structures and dynamics. Studio, lecture, research, drawings, models, sketches, written components. Prereq: ID 121.

### ID 161: HISTORY AND THEORY OF INTERIOR ENVIRONMENTS I

A historical survey of the development of interior design and the decorative arts from pre-history to the 19th century. Emphasis is on the principles of aesthetic philosophy and design theory and the socio-economic, political, and environmental influences affecting the design of the built environment. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

### ID 162: HISTORY AND THEORY OF INTERIOR ENVIRONMENTS II

A historical survey of the development of interior design and the decorative arts from the 19th century to the present. Emphasis is on the principles of aesthetic philosophy and design theory and the socio-economic, political, and environmental influences affecting the design of the built environment. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

### ID 221: INTERIOR DESIGN STUDIO I

Investigation into how human experience and behavior are influenced by interior spaces. The focus is on design of spaces of multiple scales and exploration of how manipulation of spatial aspects such as scale, color, texture, proportion, light and spatial orientation alter human experience. Field trips are integrated into the studio experience and students are required to do research and evaluation of existing spaces. Interior spaces are created and investigations of interior spaces are recorded using a variety of communication methods including digital media, sketching, and narratives. Research, use of digital media, sketching, analyses, discussions, critiques, field trips. Prereq: ID 122.

### ID 222: INTERIOR DESIGN STUDIO II

The application of design thinking to studio problems in interior design. Scenario-building with emphasis on human response to the interior environment. Interior modeling in various media and drawing skills required. Studio experiences, analyses, discussions, readings and field trips. Prereq: ID 221.

### ID 234: ENVIRONMENTAL THEORY

An exploration of the relationship between the built environment and people, with special emphasis on understanding how varying social and cultural norms are relevant to design decision-making. Topics include human factor issues that relate to the design of interior spaces such as: foundational theories of environmental psychology; the psychology of behavior; human perception and environmental design; personality and design; preference; culture; symbolism; universal design; and the use of behavioral research in design programming. Concur: ID 274 or consent of instructor.

### ID 263: INTRODUCTION TO DIGITAL MEDIA

An introduction to various digital media used as a tool within the design professions. Lecture, studio, readings, problem solving, research, field trips. Concur: ID 274.

### ID 264: COLOR THEORY AND INTERIOR SPACE

The study of color theory and its application to the interior environment: the interactive aspects of color, light, and texture within an interior application will be emphasized. The psychological and functional aspects of color application will be explored. The articulation and graphic communication of color concepts applied to an interior space will be stressed. Prereq: Concurrent enrollment in ID 274 or consent of instructor.
ID 275 INTERIOR CONSTRUCTION SYSTEMS. (3) A survey of interior construction and building systems with emphasis on structural systems and methods and non-structural systems including ceilings, flooring and interior walls. Focus is on case study analysis and problem-solving related to the integration of construction systems and interior environments. Subject matter includes code analysis and interpretation. Lectures, visuals, readings, discussions, historical analysis, research and field trips.

ID 321 INTERIOR DESIGN INTEGRATED STUDIO. (5) Continuation of the studio sequence with particular focus on interior design projects at varying levels of complexity. Design problems will correspond to real-world design opportunities in differing areas of interior design specialization (i.e., corporate, hospitality, retail, residential, etc.). Sustainable design issues will be explored. Course is offered for a total of 10 hours. Prereq: ID 222.

ID 346 PROFESSIONAL PRACTICE PREPARATION. (3) A comprehensive review of professional career development needed in preparation for an interior design work experience or internship (CIDA II-10). Prereq: ID 222.

ID 359 SPECIAL TOPIC IN INTERIOR DESIGN (Subtitle required). (1-3) Exploration of specific topics in the profession of interior design. May be offered as a studio or lecture. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor prior to registration.

ID 364 INTERIOR ENVIRONMENTAL CONTROL SYSTEMS. (3) An introduction and overview of electrical, lighting, mechanical, thermal and acoustical systems of buildings and how they enhance the health, safety, welfare, and performance of building occupants. Emphasis is on case study analysis and problem-solving related to the interaction of building systems and interior environments. Subject matter includes code analysis and interpretation. Lectures, discussions, readings, research and field trips. Prereq: ID 275.

ID 365 INTERIOR DESIGN FINISH MATERIALS. (3) An analysis and evaluation of interior design finish materials and production methods. Emphasis on health safety and wellness factors; performance attributes; site/user requirements; and sustainability. Lectures, discussions, field trips, research, and analyses. Concur: ID 321.

ID 366 LIGHTING DESIGN AND THEORY. (3) An in-depth study of principles, design requirements and equipment for ambient, task and decorative illumination as utilized in the interior environment. Emphasis is on methods of light generation, light controls, product analysis, high performance lighting selection, and specification. Lectures, discussion, related readings, calculations and field trips. Prereq: ID 274 or consent of instructor.

ID 370 VERTICAL STUDIO. (5) Continuation of Interior Design Studio sequence with particular focus on design projects at varying levels of complexity. Design problems will correspond to real-world design opportunities in differing areas of interior design specialization (i.e., corporate, hospitality, retail, residential, etc.). Sustainable design issues will be explored. Course shall be repeated for a total of 15 hours. Prereq: ID 274 and concurrent enrollment in ID 365 and ID 366 during first enrollment in the ID 370 Vertical Studio sequence.

ID 375 INTERIOR MATERIAL AND CONSTRUCTION: DETAILING. (3) A continuation of ID 365 with emphasis on specification and graphic detailing of interior space including architectural finish materials, furniture, fixtures, and equipment. Prereq: ID 275 and ID 365.

ID 395 INDEPENDENT STUDY IN INTERIOR DESIGN. (1-3) Problems involving independent study/library study conformity to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

ID 421 INTERIOR DESIGN SENIOR THESIS I. (5) Detailed research and programming for a comprehensive interior design studio project focusing on the workplace and wellness. Development of a strong conceptual proposal with both written and graphic presentation. Studio experiences, modeling, analyses, discussions, readings, and field trips. Prereq: 10 credit hours of ID 321.

ID 422 INTERIOR DESIGN SENIOR THESIS II. (5) A continuation of Senior Thesis I with emphasis on comprehensive and integrative interior design studio projects focusing on the workplace and wellness. Includes custom design specifications, and working drawings. Studio experiences, analyses, discussions, readings, and field trips. Prereq: ID 421.

ID 427 INTERIOR DESIGN OUTREACH EXPERIENCE: INTERNSHIP. (9-12) A supervised full-time work experience with a professional interior design studio in a metropolitan area preferably outside Lexington. Specific work assignment is to be defined by faculty/employer/student contract with a minimum of 450 working hours required during the summer term (nine credits) or 600 working hours required during an academic semester (twelve credits). Prereq: ID 326 and successful completion of two ID 370 studios.

ID 428 INTERIOR DESIGN OUTREACH EXPERIENCE: TRAVEL SEMINAR. (9-12) A study abroad program that investigates design in a foreign culture. Studio experience in combination with on-site lectures and discussions provide opportunity for exploring and solving design problems considering contextual factors and design theories in relation to the locale and precedent. Nine credits earned during summer semester. Twelve credits earned during fall semester. Prereq: ID 326 and successful completion of two vertical studios (ID 370) and faculty consent.

ID 466 INTERIOR DESIGN PROFESSIONAL PRACTICE. (3) The development of custom design elements and studies within the framework of professional business practices and documentations. Lectures, discussions, guest speakers, field trips and design exercises, including developmental sketches, material selection, shop drawings, and scaled prototypes. Prereq: Senior standing.

ID 470 INTERIOR DESIGN ADVANCED PROBLEM SOLVING: DESIGNER AS CREATOR AND PRAGMATIST. (5) Studio problems in interior design related to institutional facilities and/or specialized populations, such as education, healthcare and the elderly. Includes custom design, specifications, models and working drawings. Studio experiences, analyses, discussions, readings and field trips. Prereq: ID 427 or ID 428 and three semesters of ID 370.

ID 471 COMPREHENSIVE INTERIOR DESIGN STUDIO. (6) Comprehensive and integrative solution to a selected design problem in the community. Prereq: ID 466.

ID 480 INTERIOR DESIGN STUDY TOUR. (1-3) A domestic or foreign study tour to include investigation of interests related to interior design. Professional visits are planned according to particular itineraries. Application and payment dates are determined each semester by the instructor. May be repeated one time if tour destinations are different. Prereq: Priority is given to majors and upperclassmen majors.

ID 559 SPECIAL TOPIC IN INTERIOR DESIGN (Subtitle required). (1-3) Advanced exploration of a specific topic in the profession of interior design. May be offered as a studio and lecture. May be repeated to a maximum of six credits. Prereq: Senior standing or consent of instructor prior to registration.

ID 589 RES/PRES1: INTRODUCTORY CONCEPTS OF RESTORATION AND PRESERVATION. (3) An introduction to the separate and definable qualities of restoration and preservation as employed by the client/designer. A survey of 18th and 19th century architectural characteristics, related government agencies, local and national case studies. Class emphasis on readings, discussions, visuals, site visitations, and guest speakers. Prereq: Senior standing or consent of instructor.

ID 595 INDEPENDENT STUDY IN INTERIOR DESIGN. (1-3) Problems involving independent studio and/or library study conforming to the student’s special interest under the direction of an appropriate faculty member. May be repeated to a maximum of six credits. Prereq: Senior standing or consent of instructor and contractual agreement.

ID 641 REGIONAL VARIATIONS IN COLONIAL AMERICAN DESIGN. (3) An analysis of regional variations in American furnishings, interior finishes, and architecture from colonization to 1783; consideration will be given to historical, economic, social, political, and religious influences on design. Prereq: DMT 142 or consent of instructor.

ID 650 SURVEY OF CURRENT THEORIES AND LITERATURE. (3) An intensive survey of the theoretical and empirical literature related to the student’s desired area of design specialization. Emphasis will be placed on conducting a literature search and theory building as they relate to a programming document. Prereq: ID 655.

ID 655 ISSUES IN CREATIVITY AND THE DESIGN PROCESS. (3) This course will focus on creativity and the design process with emphasis on programming and different types of methodological inquiry used for problem solving in the built environment design professions. Throughout the course, emphasis will be given to theoretical frameworks and methodological procedures necessary to advance understanding of creativity to help students form a knowledge base for developing an in-depth research topic. Prereq: Graduate standing.

ID 669 INTERIOR DESIGN GRADUATE STUDIO. (6) Advanced graduate-level studio problems in an aspect of the human environment. Emphasis is placed on the application of research and programming to a design solution. Studio experiences, analyses, discussions, readings, and field trips. Studio, twelve hours per week. May be repeated to a maximum of twelve hours. Prereq: Graduate student standing.

ID 669 ADVANCED COLOR THEORY AND APPLICATION. (3) Advanced color theory will examine the physical, psychological, historical and technical perspectives. Application of color theory to the built environment. Includes color forecasting, technical processes, color specifications, and quality control. Prereq: Graduate standing.

ID 700 RESEARCH APPLICATIONS IN INTERIOR DESIGN. (1-6) Independent research for the exploration of a specific problem in interior design. May be repeated to a maximum of six credits. Prereq: Eighteen credit hours of graduate work.
### Course Descriptions

#### IEC 411 STUDENT TEACHING IN EARLY CHILDHOOD EDUCATION. (1-6)
Investigation of current topics in interior design. May be repeated to a maximum of six credits.

#### IEC 412 INTRODUCTION TO EARLY CHILDHOOD EDUCATION. (3)
An introduction to the history of early childhood education and an overview of current laws and best practices. Discussions will include issues impacting families and current research in early childhood education.

#### IEC 255 CHILD DEVELOPMENT. (3)
An overview of the various aspects of development (physical, social, emotional, intellectual) in the social context for children prenatally through adolescence. Course will emphasize techniques of directed observation. Lecture, three hours; laboratory, one hour per week.

#### IEC 256 GUIDANCE STRATEGIES FOR WORKING WITH YOUNG CHILDREN. (3)
Examination of effective guidance strategies for use with young children in an early childhood setting; modifications of experiences for age level; ability, group and individual needs. Application and evaluation of guidance skills in laboratory experience. Prereq: PSY 223 (for FAM 254) or FAM 255.

#### IEC 260 CURRICULUM PLANNING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (4)
Theories, research and strategies for planning, implementing and evaluating learning experiences for young children (birth - five years). Application in practicum in an early childhood setting. Lecture, two hours; field work, four hours per week. Prereq: IEC 120, FAM 255, and IEC/FAM 256.

#### IEC 411 STUDENT TEACHING IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (12)
Course designed to give students experience with supervised teaching at the preprimary level. Emphasis will be placed on observation and teaching individual, small and large group methods. One afternoon per week will be devoted to a discussion and analysis of problems in student teaching. Discussion, two hours; laboratory, 22 hours per week. To be offered pass-fail only. Prereq: Completion of professional sequence and formal admission to student teaching, admission to the Teacher Education Program or permission of instructor.

#### IEC 507 ASSESSMENT OF YOUNG CHILDREN. (3)
In-depth study of a current and topical problem or issue in early care and education. May be repeated under a different subtitle for a maximum of nine credits. A title is assigned each time the course is offered and reflects current topics in the field.

#### IEC 510 PRACTICUM IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
This course is the field based component of the Early Childhood block (IEC 507, 508 and 509) and is taught concurrently with these courses. This course provides an opportunity for students to demonstrate application of readings and content from the Early Childhood block courses. Prereq: Admission to Teacher Education Program or enrollment as required/elective course for IEC graduate students. Co-requisite: IEC 507, 508, and 509.

#### IEC 512 LANGUAGE AND LITERACY FOR YOUNG CHILDREN. (3)
An overview of early language and merging literacy skills in young children. Will prepare future early childhood service providers to evaluate and plan developmentally appropriate environments to promote oral and written language and literacy. Prereq: Admission to TEP or enrollment as required/elective course for IEC graduate students.

#### IEC 522 CHILDREN AND FAMILIES. (3)
The purpose of this course is to provide students with information related to working with young children with and without disabilities and their families. This course will focus both on presenting new information and providing opportunities for students to practice skills necessary for working with families. (Same as EDS 522.)

#### IEC 523 PRACTICUM IN EARLY CHILDHOOD ADMINISTRATION AND SUPERVISION. (3)
Field training in a community setting related to early childhood administration and supervision. Opportunities for developing competencies in program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding will be provided. Prereq: IEC 552 or consent of instructor.

#### IEC 546 TRANSDISCIPLINARY SERVICES FOR YOUNG CHILDREN. (3)
This course will focus on the philosophical issues related to teaching young children with multiple disabilities. Topics related to planning for the population of children, participants in the areas of communication, physical and motor development, health, vitality and sensory input will be presented. Strategies presented for planning will include transdisciplinary assessment persons centered planning and activity based instruction. Prereq: EDS 375 or EDS 600. (Same as RC 546.)

#### IEC 552 ADMINISTRATION AND SUPERVISION IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION PROGRAMS. (3)
A course designed for students preparing to become administrators and supervisors in Early Childhood Education Programs. Consideration is given to program evaluation, personnel training and supervision, appropriate curriculum materials, parent involvement and education, program management and funding. Prereq: IEC 260 or consent of instructor.

#### IEC 557 INFANT DEVELOPMENT. (3)
The development of the young child during the prenatal period, infancy and toddlerhood. Care and guidance of the child during the first two years of life. Lecture, two hours; laboratory, two hours per week. Prereq: Six hours of child development, psychology or equivalent.

#### IEC 558 SPECIAL TOPICS IN INTERDISCIPLINARY EARLY CHILDHOOD. (1-9)
In-depth study of a current and topical problem or issue in early care and education. May be repeated under a different subtitle for a maximum of nine credits. A title is assigned each time the course is offered and reflects current topics in the field.

#### IEC 620 ASSESSMENT IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Reviews policy and research implications that promote recommended practice in assessment and evaluation. A wide variety of formal and informal assessment instruments and strategies in the education of young children will be presented, used and discussed. Prepares students to provide leadership in the selection, development, and implementation of unbiased assessment and evaluation procedures. Prereq: EDS 375 or EDS 600 and IEC 659 or permission of instructor.

#### IEC 621 ISSUES IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Students will review, discuss and participate in issues related to early childhood education and learning experiences related to the preparation and leadership of early care and education teachers. Discussions will include issues in blended early care and education programs. Local, state, and federal initiatives related to early care and education will be explored. Students will explore socio-cultural, historical, and political forces in early childhood education. Prereq: EDS 375 or EDS 600 and IEC 659 or permission of instructor.

#### IEC 623 ADVANCED PRACTICUM: INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
This course is designed to provide students with field experiences to bridge professional preparation and professional practice. During the practicum experiences, students will have opportunities to practice, demonstrate, and reflect upon methods and leadership content taught in the IEC lecture courses. Graduate students working towards the IEC initial certification must apply for the Teacher Education Program. May be repeated to a maximum of nine credit hours.

---

**KEY:** 
* # = new course  * = course changed  † = course dropped
Course Descriptions

IEC 659 ADVANCED CHILD DEVELOPMENT. (3)
Advanced survey of theoretically and professionally important topics in child development. Prereq: six hours in social or behavioral sciences, including one course in child or human development, or consent of instructor. (Same as EDS/RC 701.)

IEC 701 SEMINAR FOR SPECIAL EDUCATION/LEADERSHIP PERSONNEL. (1)
Study of issues and topics affecting the preparation of special education personnel and of research issues involving persons with disabilities and educational programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 701.)

IEC 709 SEMINAR IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
Advanced study of issues related to inclusive programs for all young children and their families including etiology of disabilities, developmentally appropriate practice, assessment, intervention and instruction, theories, and contemporary research findings. Prereq: Admission to Ed.S. or Ph.D. in Special Education.

IEC 710 ADVANCED INSTRUCTIONAL METHODS IN INTERDISCIPLINARY EARLY CHILDHOOD EDUCATION. (3)
A study of how to design, implement, and evaluate a curriculum framework in blended early childhood education environments using principles of universal design, tiered instruction, and responsive learning environments. Students will support curriculum design with evidence from empirically validated practices. Prereq: IEC 659 or consent of instructor.

IEC 712 SEMINAR IN SPECIAL EDUCATION/PROFESSIONAL SERVICES. (3)
Study of procedures for providing special education professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership training, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 712.)

IEC 720 SEMINAR IN SPECIAL EDUCATION TEACHER PREPARATION. (3)
Study of the design and implementation of special education teacher preparation programs, including syllabus development, organization of class presentations, instructional alternatives, scheduling, student assessment, professor-student interactions, student advising, resource identification and utilization and program evaluation. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 720.)

IEC 721 PRACTICUM IN SPECIAL EDUCATION PERSONNEL PREPARATION. (1-9)
Supervised practicum experiences related to the preparation of special education teachers, including practice in delivering lectures, conducting class discussions, leading seminars, directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising special education student teachers and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 721.)

IEC 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/RC 721.)

IEC 768 RESIDENCY CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

INT International Studies

INT 395 INTERNSHIP IN INTERNATIONAL STUDIES. (1-3)
May be repeated up to a maximum of 12 credits under different subtitles.

INT 399 INTERNSHIP IN INTERNATIONAL STUDIES. (1-3)
An individual community-based or field-based experience and/or internship with a corporation or government institution with a global international focus under the supervision of a faculty member. This course is designed for undergraduates to gain first-hand experience of preprofessional positions such as internships, cooperative education, or business related experience in an area of international expertise. INT 399 may count toward either the Thematic Concentration or World Area of IS major, but not both. May count for IS minor. To take the course, the student must have approval of the program director, negotiate a learning contract with an academic supervisor, and provide the program with a report on the internship. Pass-fail only. May be repeated for a maximum of 9 credits. Prereq: Approval by the International Studies Director.

INT 495 CAPSTONE SEMINAR FOR INTERNATIONAL STUDIES MAJORS. (Subtitle required) (3)
This capstone seminar students have to write a 20-25 page research paper. Each seminar has a subtitle to a broad theme to allow students working in different world areas and thematic concentrations to work on their projects. The class works both as a seminar where students learn different theoretical and methodological approaches to a broad topic and as a space where they learn to write their own research paper. Students will be required to present their paper in a power point presentation or another type of creative project. Prereq: Senior status.

IPS Integrated Plant and Soil Sciences

IPS 610 TRANS-DISCIPLINARY COMMUNICATION IN INTEGRATED PLANT AND SOIL SCIENCES. (1)
A one-credit companion course to IPS 625 specific for graduate students in the Integrated Plant and Soil Sciences program. This course exposes IPS students to critical skills in publication, grantsmanship, and public presentation. It requires IPS students to systematically evaluate research presentations from multiple disciplines, present a synthesis of the research topic addressed in IPS 625, and interact with other members of the college and the university on topics related to plant and soil science issues. The course may be repeated twice. Prereq: Graduate student status.

IPS 625 TRANS-DISCIPLINARY RESEARCH IN INTEGRATED PLANT AND SOIL SCIENCES. (2)
A two-credit course specific to students in the Integrated Plant and Soil Sciences Program. This course is designed to explore the foundations, principles, and philosophies of scientific research in a truly integrative manner with strong emphasis on the value of multidisciplinary approaches to a significant issue in plant and soil sciences. The course may be repeated twice. Prereq: Graduate student standing.

IS Information Studies

IS 200 INFORMATION LITERACY AND CRITICAL THINKING. (3)
This course provides an introduction to the concepts and practices of information literacy. It explores how to effectively and ethically find, evaluate, analyze, and use information resources in academic and everyday-life situations. Emphasizing critical inquiry and critical thinking, this course will explore the theories and definitions surrounding the term “information literacy.” Students will put this theory into practice by developing problem-solving skills that allow them to meet information needs throughout their lifetimes. Students will gain a better understanding of the role of information and knowledge in society and will develop methods of finding, accessing, evaluating, and using different information sources in an effective and ethical manner. (Same as ICT 200.)

IS 201 GENERAL INFORMATION SOURCES. (3)
Information professionals play a major role in the information life cycle by facilitating the process of finding what others have created and accumulated. Their role is to: (a) mass collections of information resources; to develop services to help people identify and articulate their information needs; and to enable people to find, evaluate, and use information. This course provides students with a basic understanding of the information environment, as well as an understanding of the differences in the information behavior, needs, and uses of various user groups. Upon completion of this course, students will be able to critically evaluate and employ information sources in different formats, and be able to communicate with users to identify and address their information needs. (Same as ICT 201.)
### Course Descriptions

**ISC 202 TECHNOLOGIES FOR INFORMATION SERVICES.** (3)
This course is designed to teach the fundamental concepts of information technology in ways relevant to professional practice in informatics and the information professions. It explores applications of computers and networks to information problems. Included are features of hardware, types of software, commercial systems and search engines. (Same as ICT 202.)

**ISC 303 SYSTEMS ANALYSIS.** (3)
This course examines and applies the principles of information systems analysis. It surveys project management, feasibility and analysis, systems requirement definition and resource allocation. It utilizes a structured systems development methodology that spans the entirety of the information system lifecycle, which starts with the conception of the need for a specific information system and ends with the implementation of that system. The course utilizes a case study approach in which students initiate the analysis and logical design of a limited-scale information system. Prereq: IS 202. (Same as ICT 303.)

**ISC 402 COMPETITIVE INTELLIGENCE.** (3)
This course examines competitive intelligence models, functions, and practices; the roles of information professionals in CI, and the management of CI. Discussion and practice topics include: intelligence ethical and legal considerations; identifying intelligence needs; intelligence project management, research methods, analysis, production, and dissemination; the uses of intelligence; intelligence sources and tools; managing the intelligence function; and the evolution of CI. Prereq: IS 303.

**ISC 404 HEALTH INFORMATICS.** (3)
Provides an overview of health care information systems, legal and ethical issues in health care, compliance and regulatory requirements, coding of health care data, quality management, HL7, data security, and HIPAA. Explores major applications and commercial vendors, decision support methods, evaluation of health-care information systems; and new opportunities and emerging trends. Prereq: IS 201, IS 202.

**ISC Integrated Strategic Communication**

**ISC 161 INTRODUCTION TO INTEGRATED STRATEGIC COMMUNICATION.** (3)
An introductory course in all phases of integrated strategic communication and its role in contemporary business and society. Includes an historical and socio-cultural overview of advertising, public relations, sales promotion and direct response marketing as well as an exploration of their interrelationships. Covers strategic planning for integrated communication, message approaches and their foundations in theories of persuasion and information processing, and characteristics of message delivery systems. Provides a discussion of ethics and regulation, and the economic and social impact of the industries. Prereq: ISC pre-majors only or consent of instructor.

**ISC 261 STRATEGIC PLANNING AND WRITING.** (3)
Introduces students to the systematic planning processes and techniques of creative and persuasive message preparation for integrated strategic communication. Extensive practice in writing and visual communication for print and electronic vehicles in the disciplines of advertising, public relations, sales promotion and direct marketing. Lecture, two hours; laboratory, two hours per week. Prereq: ISC pre-major status; ISC 161; keyboarding 30 wpm.

**ISC 311 ETHICAL, LEGAL AND SOCIAL ISSUES IN ISC.** (3)
Course will focus upon the legal, ethical and social issues faced by ISC professionals. The course will examine government regulation of direct response communications, advertising, and public relations practices as well as the industry’s ethical standards and self-regulation efforts. Emphasis will also be placed upon gaining an understanding of ISC’s role in society’s economic, social, and cultural systems. Topics will include potential societal consequences of persuasive communication practices and the ethical responsibilities of professionals in each of the ISC disciplines. Prereq: ISC majors only or consent of instructor.

**ISC 319 WORLD MEDIA SYSTEMS.** (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as JOU/MAS 319.)

**ISC 321 RESEARCH METHODS FOR THE INTEGRATED STRATEGIC COMMUNICATION PROFESSIONAL.** (3)
Introduces students to applied research as a decision making tool for the integrated communications professional. Students acquire basic skills in: identification of information needs, stating of research objectives, selection of appropriate research techniques(s), sample selection, questionnaire design, analysis procedures, report writing, and budget management. Topics prepare students to conduct small-scale survey research and to buy and evaluate studies from custom and/or syndicated research suppliers. Legal and ethical issues are also examined. Prereq: Major standing; one course in statistics.

**ISC 331 ADVERTISING CREATIVE STRATEGY AND EXECUTION.** (3)
Ideas and their translation into words and images which inform and persuade. Emphasis is on a disciplined, strategic approach to creative decision-making across all media. Topics include setting objectives, selection of appeal, copy structure demands of different media, design principles, layout and storyboarding, and regulations affecting messages. Lecture, two hours; laboratory, two hours per week. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321.

**ISC 341 STRATEGIC PUBLIC RELATIONS.** (3)
A course introducing students to the basic concepts of public relations, including its theory and practices, professional history, function in organizations, and role in society. This course meets the needs of those planning or currently involved in professional and managerial careers which require an understanding of public relations. Prereq: For ISC majors, concurrent or previous enrollment in ISC 311 and ISC 321; for all others, admission to upper-division in the College of Communications and Information Studies.

**ISC 351 INTEGRATED STRATEGIC COMMUNICATION ACCOUNT MANAGEMENT.** (3)
Development and management of ISC programs that coordinate advertising, public relations, direct/interactive marketing, and sales promotion tactics. Topics include structure of the strategic communication management function, planning, strategy, leadership, operations, evaluating the effectiveness of communications, company-agency relationships, and career development. Practical knowledge and fundamental management concepts are integrated to enhance understanding of communication management’s role and challenges in the business environment. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321; cannot be taken concurrently with ISC 451.

**ISC 361 DIRECT RESPONSE TARGETING: MEDIA AND DATABASE MANAGEMENT.** (3)
This course will introduce students to direct marketing practices with emphasis on data base marketing, strategic business planning, importance of the offer, selection and selling merchandise, business-to-business direct marketing, fund raising, mailing lists, print and electronic media, co-ops, telemarketing, production lead generation, direct marketing math, idea development, research and integrating direct marketing into the overall marketing mix. The course will be practical rather than theoretical in nature. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321; cannot be taken concurrently with ISC 461.

**ISC 371 SPECIALIZED PUBLIC RELATIONS WRITING.** (3)
Audience and purposes of writing are assessed as students develop a formal strategy to guide - and to evaluate - their writing. Strategic writing tasks include writing of position papers, speech writing, and writing for brochures, media releases, letters and newsletters. Societal impact and ethical considerations are examined across all writing tasks. Lecture, two hours; laboratory, two hours per week. Prereq: ISC 341.

**ISC 431 ADVERTISING CREATIVE STRATEGY AND EXECUTION II.** (3)
Students refine their ability to meet strategic goals through creative message executions. Media options and their impact on message structure and preparation are explored more fully. Application is made of pertinent theoretical principles such as source credibility, selective exposure/perception, and learning theory. Presentation skills stressed. Portfolio preparation and review. Prereq: ISC 331.

**ISC 441 CASE STUDIES IN PUBLIC RELATIONS.** (3)
This course is designed to reinforce and expand the knowledge learned in the introductory public relations course, ISC 341. The course will provide students with an opportunity to apply public relations principles and approaches to institutional experiences. Emphasis will be placed on actual case studies, and students are expected to demonstrate a high level of proficiency in written and oral communication skills. Prereq: ISC 341.

**ISC 451 INTEGRATED STRATEGIC MEDIA MANAGEMENT.** (3)
An overview of the strategic use of media in integrated promotional campaigns is provided. Students will integrate basic skills in quantitative and qualitative evaluation of media; choice of target audience, use of secondary research on products and audiences; development of media objectives, strategies and tactics; and the oral and written presentation of media plans. The basic structure of media organizations is discussed. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321; cannot be taken concurrently with ISC 351.

**ISC 461 DIRECT RESPONSE MESSAGE STRATEGIES.** (3)
Examines the purpose, range, social and economic impact, and techniques of direct response messages. Students review type and role of suppliers as well as legal considerations. Based on a strategic plan, students frame messages for print, broadcast, and computer-mediated media that guide and facilitate response from prime prospects. Examines methods to evaluate message effectiveness. Prereq: Concurrent or previous enrollment in ISC 311 and ISC 321; cannot be taken concurrently with ISC 361.

**ISC 471 EVENT PLANNING.** (3)
This course will introduce students to special event planning processes and strategies. Emphasis is on creating, organizing, and managing both physical and virtual events. Topics will include research and planning, attracting sponsors and exhibitors, using integrated strategic communication to generate publicity and awareness, and evaluating event effectiveness toward reaching client objectives. Prereq: Major status and senior standing.

**ISC 489 TOPICAL STUDIES IN MASS MEDIA PROFESSIONS (Subtitle required).** (1)
Each course module offers advanced, pinpoint study of a topic central to the mass media professions. Depending on the topic, the course format may include lectures, seminars, and/or small group work. May be repeated a maximum of three credits when identified by different subtitles. Prereq: Variable, given when topic is identified.
ISC 491 INTEGRATED STRATEGIC COMMUNICATION CAMPAIGNS. (3)
An advanced course which enables students to unify strategic and tactical abilities developed in their research, creative, account management, public relations, and/or direct response courses. The format for this synthesis requires students to establish strategy, develop, execute, and present a multimedia integrated campaign. Student teams compete for client approval on national, regional, or local accounts. Prereq: Completion of Major Path.

ISC 497 SPECIAL TOPICS IN ISC (Subtitle required). (3)
This course will focus on selected topics of industry practice associated with the integrated fields of strategic communication. Title assigned each time the course is offered. May be repeated with different subtitles to a maximum of six credits. Prereq: Variable, given when topic is identified.

ISC 541 CRITICAL TOPICS IN INTEGRATED STRATEGIC COMMUNICATION (Subtitle required). (3)
Students will use psychological or sociological perspectives to analyze one or more important aspects of the interaction between integrated strategic communication and society. Topics that may be considered include behavioral, political, economic, and/or international issues. The course may be repeated to a maximum of six credits when identified by different subtitles. Prereq: Senior/graduate standing; ISC 161.

ISC 543 REGULATION OF STRATEGIC COMMUNICATION. (3)
Course examines regulation of strategic, persuasive communication by federal, state, and local agencies as well as self-regulation. Privacy, copyright, and deception are among featured issues. Prereq: Major standing.

ISP International Studies Program

ISP 599 STUDY ABROAD. (1)
A course designed for undergraduate and graduate students who go abroad for study following a plan developed as part of their academic program and who are not otherwise registered at the University during the period overseas. Registration in the course would constitute full-time status. The course may be taken on a pass-fail basis for undergraduate students and audited by graduate students. Evaluation by the academic advisor will be an element of the plan. May be repeated to a maximum of three credits. Prereq: Approval by each student’s academic department, the Registrar, and the Office for International Programs.

ITA Italian

ITA 011 ITALIAN FOR READING. (3)
Designed to meet the needs of upper division and graduate students who are preparing for the graduate reading examination or who need reading knowledge of Italian in their minor.

ITA 101 ELEMENTARY ITALIAN. (4)
Fundamentals of Italian with development of the four basic skills: listening, speaking, reading, writing.

ITA 102 ELEMENTARY ITALIAN. (4)
A continuation of ITA 101. Prereq: ITA 101, or one year of high school Italian, or equivalent.

ITA 201 INTERMEDIATE ITALIAN. (3)
Review of grammatical principles and readings of selected Italian works. Prereq: ITA 102.

ITA 202 INTERMEDIATE ITALIAN. (3)
A continuation of ITA 201. Prereq: ITA 201.

*ITA 263 INTRODUCTION TO ITALIAN LITERATURE, CULTURE OR FILM (Subtitle required). (3)
A study of Italian literature, culture or film according to period, genre or theme. Taught in English. May be repeated once with a different subtitle.

ITA 295 ITALIAN CONVERSATION AND COMPOSITION. (3)
Italian conversation and composition. Prereq: ITA 202 or equivalent.

*ITA 395 INDEPENDENT STUDIES IN ITALIAN. (3)
Directed study in Italian literature, culture or film. Student’s topic to be approved by director. May be repeated once. Prereq: Successful completion of ITA 202 and consent of instructor.

*ITA 417 ADVANCED ITALIAN LANGUAGE. (3)
A course designed to practice language skills at an advanced level. Both oral and written presentations are required. Readings of contemporary Italian prose will be selected to illustrate grammatical and stylistic concerns and to stimulate discussion. Prereq: ITA 295 or ITA 296.

ITA 443G SURVEY OF ITALIAN LITERATURE I. (3)
A survey of Italian literature from its beginnings to the 17th century. Prereq: ITA 202.

ITA 563 STUDIES IN DANTE. (3)
Either the Vita Nuova and the Divina Commedia, Inferno or the Divina Commedia, Purgatorio and Paradiso. Prereq: ITA 443G.

ITA 566 LITERATURE OF THE ITALIAN RENAISSANCE. (3)
A study of the major literary trends and figures of the Italian Renaissance, from the literary and humanistic successors of Petrarch and Boccaccio to the writers of the Cinquecento. Prereq: ITA 543 or 544 or consent of instructor.

ITA 569 TOPICS IN ITALIAN LANGUAGE, LITERATURE, OR CULTURE (Subtitle required). (3)
Intensive study of an author, genre, period or movement of Italian literature or an aspect of Italian language or culture. May be repeated once under a different subtitle. Prereq: Variable; given when topic is identified.

JAT Journalism, Advertising, Telecommunications

JAT 241 COMMUNICATIONS PRACTICUM. (1-4)
Supervised laboratory work in the media of mass communications, with meetings for evaluation of work, study of techniques, analyses of problems, and reports. May be repeated to a maximum of four credits. (Offered in Community College System only.)

JAT 395 INDEPENDENT STUDY. (1-3)
Designed for advanced students with research or special study problems. Regular consultation with the instructor. May be repeated to a maximum of six credits. Enrollment normally limited to seniors and with a 3.0 standing in the major. These requirements may be waived by the department in exceptional circumstances. Prereq: Consent of instructor.

JAT 399 INTERNSHIP (Subtitle required). (1-3)
Qualified students enter the professional sector to refine skills and knowledge. Supervised internships approved by the School allow placements in industry, government, radio, television, print media, research agencies, etc. A signed contract must be completed prior to the start of the internship. Pass/Fail only. Prereq: admission to upper-division, fulfillment of internship prerequisites for the major, and approval of internship director for the major.

JOU Journalism

*JOU 101 INTRODUCTION TO JOURNALISM. (3)
This course surveys the history and social theories of journalism and introduces students to contemporary journalistic practice. Students will learn about the function and operation of print, electronic and on-line news media. Issues and concepts to be covered include the relationship of government to media, press freedom and controls; media ethics, and the impact of global communications. The course also covers the relationship of journalism to advertising, public relations and telecommunications, particularly with regard to new technologies. Prereq: JOU pre-majors in primary window; all others in secondary window.

*JOU 204 WRITING FOR THE MASS MEDIA. (3)
An introduction to the concepts and techniques of media writing. This course offers hands-on instruction in information gathering, organization, and writing for print, broadcast and on-line media. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 101; JOU pre-major status; ISC pre-majors may enroll if they’ve completed ISC 161.

JOU 250 ETYMOLOGY. (3)
A study of words and their fundamental values with reference to development of a writing vocabulary. (Same as ENG 250.)

*JOU 301 NEWS REPORTING. (3)
A course designed to develop skills in information gathering, news judgment, organization and writing. Students will learn to cover breaking news and write features. Lecture; two hours; laboratory, two hours per week. Prereq: JOU 204.

JOU 302 RADIO AND TV NEWS REPORTING. (3)
An introduction to the principles of broadcasting and reporting. Students will complete assignments in class and at WUKY-FM, where they will prepare segments for newscasts under the supervision of the station’s news director. Students also will learn to shoot and edit videotape and to prepare TV news reports. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 204.

JOU 303 NEWS EDITING. (3)
Instruction and practice in copy desk operation and the duties and ethics of copy editors. Topics include techniques for editing stories, handling wire copy, writing headlines and news judgment. Emphasis on electronic editing. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 204.

JOU 304 BROADCAST NEWS DECISION MAKING. (3)
This class is designed to sharpen students’ news judgment and teach them the skills they will need to become assignment editors and producers of radio and television newscasts. Students will study the content and selection of news stories, using audio materials from such sources as National Public Radio, and visual materials from CNN NewsSource. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 302.
Course Descriptions

**JOU 319 WORLD MEDIA SYSTEMS.** (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TELE 101. (Same as ISC/MAS 319.)

*JOU 330 WEB PUBLISHING AND DESIGN.* (3)
This course is designed to teach students to code and display text and visual information effectively on the Internet and to understand the application of professional practices in Web site analytics and management. Visual communication theory and practice for photographs, illustrations, graphical and text elements will be taught and highlighted, in addition to the basics of HTML and CSS. Students will use industry-standard software and work flow as they are introduced to basic techniques and strategies for publishing, designing and managing a Web site for a newspaper, magazine, television station, advertising agency, public relations firm or media start-up. Social media and geolocation for news and other media purposes will be highlighted. Lecture: two hours, laboratory: two hours per week. Prereq: JOU major.

**JOU 387 PHOTOJOURNALISM.** (3)
A hands-on introduction to the use of cameras and laboratory equipment in contemporary news photography. Selected readings on photographic methods and the ethics of photojournalism. Lecture, two hours; laboratory, two hours per week.

**JOU 403 TV NEWSCAST PRODUCING.** (3)
This class is designed to train students to become television newscast producers. Students will prepare TV newscasts with consideration of news story placement as it relates to audience, viewing trends, and journalistic judgment. Students will learn critical thinking skills in producing as it relates to newscast and story promotion, reacting to major news events and their coverage, and talent and time management. Students will be required to write news stories in different formats for different newscasts and address ethical and legal concerns of news stories.

*JOU 404 ADVANCED TV NEWS.** (3)
Students in this class produce a half-hour, TV newscast shown on a cable channel to homes in the Lexington-Fayette County DMA. Students will hone their writing skills and their proficiency in shooting and editing video, serving as producers, writers, videographers, reporters and anchors. May be repeated for up to six hours credit, with permission of instructor. Lecture, one hour per week; laboratory, four hours per week. Prereq: JOU 302.

**JOU 409 MAGAZINE ARTICLE WRITING.** (3)
An advanced writing course designed to teach students to generate, report and write feature stories for magazines and to market free-lance articles. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 301.

*JOU 410 PUBLICATIONS PRODUCTION.** (3)
Study of theory and practice in the techniques of effective communication through print and/ or the Web. Starting with typography, this course will cover design for newsletters, newspapers and news magazines, but other publications may be considered. Instruction in the processes of defining the purpose of, designing and producing a publication. These include: planning, design, article and photo selection, page layout, headline and title writing. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 301 and 303.

**JOU 415 DESIGN AND LAYOUT: (Subtitle Required).** (1)
This course will familiarize students with computer programs used in publication design. Students develop their skills through hands-on exercises and projects. May be repeated to a maximum of three credits under different subtitles. Prereq: Will be determined by topic of course.

**JOU 430 MEDIA MANAGEMENT AND ENTREPRENEURSHIP.** (3)
An introduction to media management focusing on start-up, design and operation of newspapers and magazines. This course takes an intensive look at the editorial content, advertising, business and management side of journalism. Lecture, two hours per week; laboratory, two hours per week.

**JOU 455 MASS MEDIA AND DIVERSITY: (Subtitle Required).** (3)
This course will examine gender and minority issues in the media. The course will focus on selected topics drawn from journalism and related fields. Title assigned each time course is offered. May be repeated with different subtitles to a maximum of six credits.

**JOU 497 SPECIAL TOPICS IN JOURNALISM: (Subtitle required).** (1-3)
Course will focus on selected topics drawn from journalism and related fields. Title assigned each time course is offered. May be repeated with different subtitles to a maximum of six credits.

**JOU 498 MULTIMEDIA STORYTELLING.** (3)
A course designed to provide journalism majors advanced training in reporting and writing articles on current events, public issues, personalities, culture and entertainment on multiple publishing platforms. Students will cultivate a platform-agnostic view of publication as they maintain a daily multimedia news outlet. Lecture, two hours; laboratory, two hours per week. Prereq: Print/multimedia students: JOU 301 and JOU 303; JOU 330. Broadcast/multimedia students: JOU 302 and JOU 304; JOU 330.

**JOU 499 ADVANCED WRITING FOR THE MASS MEDIA: (Subtitle Required).** (3)
A course designed to provide journalism majors advanced training in reporting and writing articles on current events, public issues, personalities, culture and entertainment for the print and electronic media. Areas of emphasis will vary each semester. These include reporting on business, the arts, government and sports. May be repeated to a total of nine credits with different subtitles. Lecture, two hours; laboratory, two hours per week. Prereq: JOU 301 or JOU 302.

*JOU 531 MEDIA LAW.** (3)
A study of the legal issues facing the news media. The course will focus on the rights, constraints and responsibilities under the U.S. Constitution, federal and state statutes, administrative law and common law. Specific topics include prior restraint, libel, privacy, student media, copyright, broadcast regulation, the court systems, commercial speech and access to courts and public records.

*JOU 532 ETHICS OF JOURNALISM AND MASS COMMUNICATION.** (3)
An examination of ethical challenges facing journalists on different platforms – print, online, broadcast and in social media. Students will reason through issues of value that arise in the practice of journalism.

**JOU 533 HISTORY OF JOURNALISM.** (3)
A study of the development of American journalism, with emphasis on the evolution of newspapers and electronic news media. Examination of principles and social theory underlying the practice of journalism.

**JOU 541 THE FIRST AMENDMENT, INTERNET, AND SOCIETY.** (3)
The course will focus on the legal and policy environment of the Internet. Particular attention will be paid to social media, libel, privacy, hate speech, obscurity, and copyright issues. How the First Amendment has been adapted to new media technology is a central part of the class. The course also provides an introduction to the legal system and the basics of legal research. Prereq: JOU 541 will be restricted to JOU majors in primary window; open to other majors in the School in secondary window; open to other students during add/drop.

**JPN Japan Studies**

**JPN 101 BEGINNING JAPANESE.** (4)
A course in first semester Japanese language.

**JPN 102 BEGINNING JAPANESE.** (4)
A course in second semester Japanese language. Prereq: JPN 101 or equivalent.

**JPN 201 INTERMEDIATE JAPANESE I.** (4)
A course in third semester Japanese language. Prereq: JPN 102 or equivalent.

**JPN 202 INTERMEDIATE JAPANESE II.** (4)
A course in fourth semester Japanese language. Prereq: JPN 201 or equivalent.

**JPN 283 JAPANESE FILM.** (3)
Study of Japanese films as an expression of Japanese culture. Viewing of films outside of class required. (Same as ENG 283.)

**JPN 301 ADVANCED JAPANESE.** (3)
This course is primarily a course in contemporary Japanese culture, but serves as a third year language course. The “texts” will consist of contemporary written materials (books, magazines, newspapers) and visual materials (tv programs, movies) and will exercise the four skills (reading, writing, listening, speaking) studied in the first four semesters of the language. By building on the skills learned in the initial semesters, this course will continue and strengthen the oral and aural, written and reading skills in Japanese, for students who have studied the equivalent of two years of Japanese language. Further, this course will emphasize the speaking and listening skills. It is paired with JPN 302, a course emphasizing reading and writing skills. Thus, students who complete this course will be able to communicate at a rather sophisticated level of Japanese on a variety of contemporary topics within Japanese society. Prereq: JPN 202 or permission of instructor.

**JOU 478 PHOTOJOURNALISM.** (3)
An in-depth study of the many facets of photojournalism from the photo editor’s perspective. Students will shoot assignments and will probe the legal and ethical aspects of news photography. Lecture, one hour; laboratory, four hours per week. Prereq: JOU 387.

<tr>
<td>JPN 320</td>
<td>INTRODUCTION TO JAPANESE CULTURE, PRE-MODERN TO 1868.</td>
<td>This course, taught in English, is designed as a general introduction to the culture of pre-modern Japan (up to the Meiji Restoration of 1868). Topics include: Shinto, Buddhism, and Confucianism in ancient Japan; feminine sensibilities in ancient literature; canons of medieval art; the culture of military strife; Christianity in pre-modern Japan; and encounters with the West.</td>
<td></td>
</tr>
<tr>
<td>JPN 321</td>
<td>INTRODUCTION TO JAPANESE CULTURE, MEIJI (1868) TO PRESENT.</td>
<td>General introduction to Japanese culture from Meiji Restoration (1868) to the present. Topics include: nationalism-building, the Western influence on Japan and Asia (for the Meiji period 1868-1912); gender construction and class formation, urbanization and mass culture (for the Taisho period 1912-1926); and Japanese colonialism, WWII, A-bomb, the U.S. occupation, postwar recovery, popular culture, and globalization (for the Showa period 1926-1989 and beyond). (Same as ANT 321.)</td>
<td></td>
</tr>
<tr>
<td>JPN 322</td>
<td>ENVIRONMENT, SOCIETY AND ECONOMY OF JAPAN.</td>
<td>This course examines some of the major aspects of the society, culture, and economy of Japan. It discusses Japan's human and natural environments; natural hazards and disasters; cultural history and geography; economic and technological developments, their prospects and potentials; challenges to the management of environment and its resources; and Japan's role in global economy. (Same as GEO 334.)</td>
<td></td>
</tr>
<tr>
<td>JPN 351</td>
<td>THE JAPANESE EXPERIENCE OF THE TWENTIETH CENTURY.</td>
<td>General introduction to Japanese culture from Meiji Restoration (1868) to the present, focusing mainly on the literary arts, but also including film, architecture and the fine arts.</td>
<td></td>
</tr>
<tr>
<td>JPN 395</td>
<td>INDEPENDENT WORK IN JAPANESE.</td>
<td>Independent work to pursue special problems in reading and research. May be repeated to a maximum of six credits. Prereq: Instructor approval.</td>
<td></td>
</tr>
<tr>
<td>JPN 400</td>
<td>TOPICS IN JAPAN STUDIES (Subtitle required).</td>
<td>Variable in content, this course focuses on important texts and issues in Japanese history, religion, literature, and philosophy. May be repeated to a maximum of six credits under different subtitles. To be taught in English.</td>
<td></td>
</tr>
<tr>
<td>JPN 401</td>
<td>ADVANCED JAPANESE III.</td>
<td>This course will further develop skills in sophisticated Japanese language use by exercising the four skills of language (reading, writing, listening, speaking). The course will include readings in authentic materials in a wide variety of writing styles, student writing for a variety of occasions, and development of speaking and listening fluency. Prereq: JPN 302 or equivalent.</td>
<td></td>
</tr>
<tr>
<td>JPN 402</td>
<td>ADVANCED JAPANESE IV.</td>
<td>This course will further develop skills in sophisticated Japanese language use by exercising the four skills of language (reading, writing, listening, speaking). The course will include readings in authentic materials in a wide variety of writing styles, student writing for a variety of occasions, and development of speaking and listening fluency. Prereq: JPN 401 or equivalent.</td>
<td></td>
</tr>
<tr>
<td>JPN 405</td>
<td>SEMINAR IN JAPANESE AND ASIAN STUDIES (Subtitle required).</td>
<td>An interdisciplinary seminar focusing on a topic in Japanese and Asian Studies. May be repeated to a maximum of six credits. Prereq: Instructor approval.</td>
<td></td>
</tr>
<tr>
<td>JPN 420</td>
<td>PRE-MODERN LITERARY AND VISUAL ARTS OF JAPAN.</td>
<td>This course will introduce representative literary and visual arts of Japan, from antiquity until the mid-nineteenth century. This serves as an introduction to intellectual and societal undercurrents foundational to understanding Japanese society.</td>
<td></td>
</tr>
<tr>
<td>JPN 421</td>
<td>CONTEMPORARY LITERARY AND VISUAL ARTS OF JAPAN.</td>
<td>This course will introduce the literary and visual arts of the last 150 years (since the Meiji period) of Japan. This serves as an introduction to intellectual questions that have enlivened Japanese society in the last century and a half. Key to understanding contemporary Japanese culture.</td>
<td></td>
</tr>
<tr>
<td>JPN 430</td>
<td>SELF AND OTHER: THE POLITICS OF CULTURE IN JAPAN-U.S. RELATIONSHIP.</td>
<td>This course explores changing images and ideas that America (the West) and Japan (the East) have had of one another during the modern century (roughly 1850s - 1980s) and in the more recent period of post-modernity (1990s - present) of their interactions. It examines the cultural politics of images - images, ideas, and discourses - between Self and Other by viewing mutual constructions of “America” and “Japan” as its paradigmatic example.</td>
<td></td>
</tr>
<tr>
<td>JPN 451</td>
<td>SOCIAL MOVEMENTS IN MODERN JAPAN.</td>
<td>This course will explore selected movements within Japan that have arisen in the last one hundred and fifty years. This course will ask questions about the specific nature of these movements, the context of these movements within Japan, and within the context of other movements around the world, whether contemporary in time or theme.</td>
<td></td>
</tr>
<tr>
<td>JPN 461</td>
<td>JAPANESE COLONIALISM AND ITS LEGACIES.</td>
<td>This course will explore the making and unmaking of Japanese colonialism and its postwar legacies via a number of media. Geopolitically, the course will be organized in terms of the changing boundaries, and their representations, of the Japanese empire. We will also incorporate the following related perspectives in order to examine some of the basic problems of Japanese colonialism which contemporary Japan has not completely left behind.</td>
<td></td>
</tr>
<tr>
<td>JPN 491</td>
<td>JAPANESE LANDSCAPES.</td>
<td>This course will introduce a wide range of topics in Japanese linguistics, including phonetics, phonology, morphology, syntax, semantics, and sociolinguistics. In this course, you will (1) learn the basic notions and terminology used in linguistics, (2) study major issues in Japanese linguistics, and (3) apply theoretical knowledge to the hands-on analysis of Japanese data.</td>
<td>Prereq: JPN 102.</td>
</tr>
<tr>
<td>JPN 520</td>
<td>JAPANESE LINGUISTICS AND SOCIETY.</td>
<td>A study of the landscapes of Japan as vivid portrayal of Japanese culture and their value system, including review and analysis of major primary and secondary components of the Japanese landscape. Prereq: JPN 334 or GEO 334 or consent of instructor. (Same as GEO 491G.)</td>
<td></td>
</tr>
<tr>
<td>JPN 551</td>
<td>JAPANESE MULTINATIONAL CORPORATIONS.</td>
<td>A study of the giant Japanese multinational corporations in the world economy and their impact on development and environment of selected countries. Topics include: geographical organization of multinational corporate system; their locational decisions; affect of multinationals policies on the environment; and local economy. Prereq: Consent of instructor. (Same as GEO 551.)</td>
<td></td>

<tr>
<td>KHP 100</td>
<td>100-KHP 135 SERVICE COURSES.</td>
<td>Instruction in a variety of motor skills activities. Courses are designed for students at a beginner level. Up to six hours credit may be earned in service courses; however, the same activity may not be repeated for credit.</td>
<td></td>
</tr>
<tr>
<td>KHP 136</td>
<td>144 ADVANCED SERVICE COURSES.</td>
<td>Instruction in a variety of motor skills activities. The courses are designed for students who already possess intermediate skill in the activity. Instructors will assess skill at start of course. Up to six hours credit may be earned in service courses; however, the same activity may not be repeated for credit. Assignment of specific titles will occur internally in the department. Laboratory, three hours per week. Prereq: Completion of comparable service course or demonstrated competency.</td>
<td></td>
</tr>
<tr>
<td>KHP 150</td>
<td>SOCCER.</td>
<td>Designed to familiarize the professional physical education student with the skills, practices, techniques, and theory of soccer. Development of at least an intermediate skill level is expected of the students. The primary goal of the course is to equip the student with the skills necessary to effectively teach soccer. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: PHED and KINE majors only.</td>
<td></td>
</tr>
<tr>
<td>KHP 152</td>
<td>TECHNIQUES OF SWIMMING.</td>
<td>Acquisition of intermediate and advanced swimming skills. Includes techniques of teaching beginning and intermediate swimming and diving. Other topics include mechanical analysis of strokes, skin diving, survival swimming, basic first aid, rescue and safety in the aquatic environment. Laboratory, three hours per week. Prereq: Intermediate skill test first day of class and PHED, KINE majors only.</td>
<td></td>
</tr>
<tr>
<td>KHP 153</td>
<td>VOLLEYBALL.</td>
<td>Designed to familiarize the professional physical education student with the skills, practices, techniques, and theory of volleyball. Development of at least an intermediate skill level is expected of the students. The primary goal of the course is to equip the student with the skills necessary to effectively teach volleyball. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: PHED and KINE majors only.</td>
<td></td>
</tr>
<tr>
<td>KHP 155</td>
<td>PRINCIPLES OF CONDITIONING.</td>
<td>Designed to familiarize the professional physical education student with the theory, techniques, and practices of conditioning. Understanding of the basic principles, and an attainment of at least average personal physical fitness status is expected of the students. The primary goal of the course is to equip students with knowledge and skill to design and carry out safe and meaningful physical conditioning programs. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester.</td>
<td></td>

</table>
Course Descriptions

KHP 156 EDUCATIONAL GYMNASTICS. (1)

The primary goal of the course is to equip the student with the skills necessary to effectively teach gymnastics and tumbling skills in the schools. Students will learn safety procedures, skill sequencing, and progressions that are recommended for students in pre-school through middle school. Students will learn to analyze skills and prepare appropriate lesson plans. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: Demonstrated competence and PHED, KINE majors only.

KHP 157 TRACK AND FIELD. (1)

Designed to familiarize the professional physical education student with the skills, practices, techniques, and theory of track and field. Development of at least an intermediate skill level is expected of the students. The primary goal of the course is to equip the student with the skills necessary to effectively teach track and field. Laboratory, three hours per week.

KHP 159 TENNIS. (1)

Designed to familiarize the professional physical education student with the skills, practices, techniques, and theory of tennis. Development of at least an intermediate skill level is expected of the students. The primary goal of the course is to equip the student with the skills necessary to effectively teach tennis. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: PHED and KINE majors only.

KHP 160 BADMINTON. (1)

Designed to familiarize the professional physical education student with the skills, practices, techniques, and theory of badminton. Development of at least an intermediate skill level is expected of the students. The primary goal of the course is to equip the student with the skills necessary to effectively teach badminton. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: PHED and KINE majors only.

KHP 161 GOLF. (1)

Designed to familiarize the professional physical education student with the skills, strategies, rules and teaching techniques of golf. Development of at least an intermediate skill level is expected. The primary goal of the course is to equip the student with skills necessary to effectively teach golf. Laboratory: Six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: PHED and KINE majors only.

KHP 162 OUTDOOR EDUCATION THROUGH ACTIVITIES. (1)

An overview of outdoor educational skills and wilderness related activities for use by physical education majors in the school and/or recreational setting. Laboratory, two hours per week. Prereq: PHED and KINE majors only.

KHP 163 TEAM HANDBALL/NEW GAMES. (1)

This course is designed to familiarize the physical education student with the skills, practices, techniques, and theory of team handball and new games. Development of at least an intermediate skill level in team handball and a knowledge base of at least 20 new games is expected of the students. The primary goal of this course is to equip students with the skills necessary to effectively teach handball and new games. Laboratory, six hours per week for one-half semester or three laboratory hours per week per semester. Prereq: KINE/HEPR/KHPR majors only.

KHP 200 THE HISTORY AND PHILOSOPHY OF PHYSICAL EDUCATION AND SPORT. (3)

An introduction to the history and philosophy of physical education. Emphasis will be on: (1) the role of philosophy, educational philosophy, and the philosophy of physical education and (2) the major historical influences in the development of existing physical education programs in the United States.

KHP 210 INTRODUCTION TO FITNESS: (Subtitle required). (2)

Designed to familiarize the professional physical education student with the theory, techniques, and practices of physical fitness and conditioning. Understanding of the basic principles and an attainment of above average personal fitness status is expected of the students. The primary goal of the course is to equip students with knowledge and skill to design and carry out safe and meaningful physical conditioning programs. Prereq: PHED, KINE-majors only.

KHP 220 SEXUALITY EDUCATION. (2)

This course is designed to prepare educators to offer sexuality education in the schools. Emphasis is placed on justification of sexuality education, relevant content, appropriate teaching techniques, and precautions to take when teaching sexuality education.

KHP 222 DRUG EDUCATION. (2)

This course is designed to prepare educators to offer drug education in the schools. Emphasis is placed on the prevalence of drug use by youth; physiological, psychological, and social effects of various drugs; effective and ineffective approaches to drug abuse prevention; appropriate teaching strategies; and evaluating drug curricula.

KHP 240 NUTRITION AND PHYSICAL FITNESS. (3)

Course focuses on the interrelationship between nutrition and physical fitness. The intent is to provide the student with the information necessary to formulate an individualized plan for the achievement and maintenance of adequate nutrition and physical fitness. Weight control will be discussed in this content. Team taught by nutrition faculty and health, physical education and recreation faculty. Lecture, two hours; laboratory, two hours.

KHP 250 TEAM SPORTS: (Subtitle required). (2)

This course is designed to familiarize the professional physical education student with the skills, practices, techniques, rules, and strategies of the sports of: golf, tennis, and badminton. The primary goal of the course is to equip the student with the skills necessary to effectively teach these three sports in both the upper elementary and secondary schools. Development of at least an intermediate skill level is expected of the students. Laboratory: Six hours per week for one semester. Prereq: KINE or PHED major.

KHP 252 WATER SAFETY LEADERSHIP. (2)

Leadership training in the teaching of swimming, lifesaving, diving, synchronized swimming, competitive swimming, camp waterfront, beach and pool operation and exhibition. Laboratory, four hours. Prereq: Current lifesaving certificate or equivalent.

KHP 260 INDIVIDUAL SPORTS: (Subtitle required). (2)

This course is designed to familiarize the professional physical education student with the skills, practices, techniques, rules, and strategies of the sports of: golf, tennis, and badminton. The primary goal of the course is to equip the student with the skills necessary to effectively teach these three sports in both the upper elementary, middle, and secondary schools. Development of at least an intermediate skill level is expected of the students. Laboratory: six hours per week for one semester. Prereq: KINE or HEPR major.

KHP 263 CURRICULUM DESIGN AND DEVELOPMENT OF SPORTS SKILLS IN THE ELEMENTARY SCHOOL. (3)

The study of sports skills development and their inclusion in the elementary programs of games of low organization, lead-up games, and refined sports skills. Lecture, two hours; laboratory, two hours per week. Prereq: KINE/HEPR/KHPR majors or permission of the instructor.

KHP 300 PSYCHOLOGY AND SOCIOLOGY OF PHYSICAL EDUCATION AND SPORT. (3)

A survey course in the social science foundation of sport. Study of the sociological and psychological concepts which are relevant in understanding of sport in this country and the world. After the successful completion of this course, the student should be able to define, discuss, and identify the basic social and psychological factors which are related to the pursuit of movement through sport.

KHP 319 SPORTS OFFICIATING. (1)

This course will provide students with introductory knowledge, interpretations skills, and mechanical techniques of officiating. Prereq: KHP major or permission of instructor.

KHP 340 ATHLETIC TRAINING. (2)

Consideration is given to the prevention, treatment and rehabilitation of injuries. Films and other visuals, visiting physicians and team trainers will be used to supplement instruction. The student will have an opportunity to gain practical experience. Lecture, one hour; laboratory, three hours.

KHP 344 PHYSICAL EDUCATION IN THE SECONDARY SCHOOL. (3)

Required for teacher certification in physical education. Theory and practice in methods of teaching physical education activities and supervising programs in the secondary school. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to KHP Teacher Education Program.

KHP 360 PHYSICAL EDUCATION IN THE ELEMENTARY SCHOOL. (3)

An introduction to the necessary skills needed for the planning and conduct of modern elementary physical education programs. Emphasis is placed on teaching basic movement skills, fundamental rhythmic and sports skills. Lecture, two hours; laboratory, two hours per week. Prereq: Admission to KHP Teacher Education Program.

KHP 361 FIELD EXPERIENCES. (1)

Field experiences with elementary school age children, P-12. Prereq: Admission to the KHP Teacher Education Program.

KHP 362 FIELD EXPERIENCES IN SECONDARY EDUCATION. (1)

Supervised experiences in school, agency, and recreation department programs of secondary education. Required of all majors in Secondary Teacher Education Programs in the Department of Health, Physical Education and Recreation. Includes field trip, inspection of programs and professional organizations. Prereq: Admission to the Teacher Education Program.

KHP 369 STUDENT TEACHING IN PHYSICAL EDUCATION. (3-12)

For students who expect to teach and who meet the requirements for a major in physical education. Experience in working with children in physical education activity comprises basic part of course. Safety education also included. To be offered only on a pass-fail basis. Prereq: Admission to the Teacher Education Program or permission of instructor.

KHP 382 PHYSICAL EDUCATION FOR ELEMENTARY SCHOOL TEACHERS. (2)

Provides physical education concepts and content to be taught to the elementary students. Includes instructional methods and management techniques appropriate for physical education programs at the elementary school level. Lecture, one hour; laboratory, two hours per week. Prereq: Admission to elementary or early childhood teacher education program or consent of instructor.

KHP 390 DANCE ACTIVITIES FOR SCHOOLS. (2)

Designed to familiarize physical education preservice students with the skills, practices, techniques, theory of creative movement expression, and structured dance appropriate for K-12 physical education. State and national standards will be the foundation for the lesson plans developed in this course.
KHP 395 INDEPENDENT STUDY IN KINESIOLOGY AND HEALTH PROMOTION. (3) May be repeated to a maximum of 12 credits. Prereq: Major and 3.0 standing in area or consent of instructor.

KHP 396 DANCE PEDAGOGY FOR MIDDLE AND HIGH SCHOOL. (3) This is a comprehensive study of teaching methods and materials for teachers of middle and high school students. Prereq: KHP 390 and/or KHP 393.

KHP 415 BIOMECHANICS OF HUMAN MOVEMENT. (4) The application of mechanical principles to the study of the internal and external forces acting on the human body and the effects produced by those forces. Prereq: ANA 209, PGY 206, Math ACT of 23 or above (or Math placement test), or MA 109, or MA 110.

KHP 420 PHYSIOLOGY OF EXERCISE. (3) An in-depth study of the immediate and long-term effects of exercise on the human organism. Lecture, two hours; laboratory, two hours. Prereq: ANA 209, PGY 206 or equivalent. Junior, senior or graduate standing.

KHP 430 METHODS OF TEACHING HEALTH EDUCATION. (3) A variety of contemporary teaching methods appropriate for use in grades K-12 will be presented. Students will be exposed to these methods through textbook and outside readings and through observation of the instructor, public school teachers, and peer teachers. Methods will be critically examined for effectiveness in the cognitive, affective, and behavioral areas. Prereq: KHP 220, 230, or equivalent, or consent of instructor via permit; and admission to Teacher Education Program or consent of instructor via permit.

KHP 445 INTRODUCTION TO TESTS AND MEASUREMENTS. (3) An analysis of written and motor performance tests in health, safety, physical education, and recreation. Laboratory evaluation in the administration, scoring, and interpretation of motor performance tests are provided. Lecture, two hours; laboratory, two hours.

KHP 450 INTRODUCTION TO EXERCISE TESTING AND PRESCRIPTION. (3) The course addresses fundamental principles of Exercise Science specifically as they relate to the testing and exercise prescription of apparently healthy individuals with controlled disease. The class will review concepts essential for successful completion of the American College of Sports Medicine Certified Personal Trainer and Health Fitness Instructor exams. Prereq: ANA 209, PGY 206.

KHP 485 SPORT IN AMERICA. (3) An overview of the history and development of sport in the United States from colonial times to the present with emphasis on the scope and diversity of modern day sport and its impact on society.

KHP 546 PHYSICAL EDUCATION WORKSHOP. (1-3) A concentrated study in a specific sport or activity or field of emphasis in physical education. May be repeated to a maximum of six credits.

KHP 547 PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY. (3) An analysis of research findings in the psychology of teaching and coaching with emphasis placed on those factors which influence the acquisition of motor skills as well as on the psychological benefits of exercise and sport. Prereq: Undergraduate psychology course and basic statistics or consent of instructor.

KHP 560 MOTOR DEVELOPMENT IN INFANTS AND YOUNG CHILDREN. (3) An analysis of the processes of learning to move and moving to learn in infants and young children. Emerging interrelationships among the motor, social, emotional, and cognitive forms of behavior are explored. Laboratory experiences are provided in early childhood education programs. Prereq: PSY 100.

KHP 579 ADAPTED PHYSICAL EDUCATION. (3) A study of programs of adapted and developmental physical education for individuals with disabilities. Experiences will include the appraisal of psychomotor functioning, design of instructional intervention, and program implementation and evaluation. Lecture, two hours; laboratory, two hours. Prereq: KHP 515 or consent of instructor.

GRADUATE COURSES

KHP 601 TEACHING EFFECTIVENESS AND LEADERSHIP IN KINESIOLOGY AND HEALTH EDUCATION. (3) This course will examine the current research relevant to teacher effectiveness. The development and implementation of practical methods for improving teacher effectiveness in Kinesiology constitute the primary emphasis of the course. The Kentucky Teacher Standards will be emphasized and used to guide this course.

KHP 644 RESEARCH TECHNIQUES APPLIED TO KINESIOLOGY AND HEALTH PROMOTION. (3) A critique of research procedures for purposes of developing more efficient research designs applicable to problems in kinesiology and health promotion. Should be preceded or accompanied by basic statistics and introduction to measurement.

KHP 676 CURRENT ISSUES AND PROBLEMS IN SPORT MANAGEMENT. (3) An in-depth analysis of pertinent issues and problems affecting the management of sport and fitness programs.

KHP 680 SPORT AND FITNESS MARKETING. (3) An introduction to the broad area of sport and fitness marketing to include a focus on marketing management as it applies to sport, the general nature of the sport and fitness consumer, pricing strategies and promotions, forecasting, and the role of research in sport marketing.

KHP 681 FINANCIAL ASPECTS OF SPORT. (3) Course focuses on principles, practices and theories associated with financial planning and management of enterprises engaged in the provision of sport related services and/or products. Topics include budget planning and preparation, preparing and analyzing financial statements, revenue sources, money management, preparation of business plans and feasibility studies. Prereq: ACC 201 and 202 and HPER, KHPR majors or consent of instructor.

KHP 685 SUPERVISION OF SPORT AND FITNESS PERSONNEL. (3) A study of the three major functions of the supervisor: planning, directing and controlling and their application to the area of organized sport. Prereq: KHP 580 or consent of instructor.

KHP 685 SPORT MANAGER'S LABORATORY. (3) A combination of lectures and laboratory experiences which enable the student to demonstrate competence in the application of various applied management skills learned in KHP 685. Skills such as delegation, performance appraisal, coaching and counseling employees will be covered. Students will be videotaped as a method of providing feedback. Prereq: KHP 685 or consent of instructor.

KHP 687 PRACTICUM IN SPORT MANAGEMENT. (3-9) Extensive work experiences under the immediate supervision of qualified managers and sport management faculty coordinator. May be repeated to a maximum of nine credits. Prereq: HPER, KHPR majors (Sport Management) or consent of advisor.

KHP 695 INDEPENDENT STUDY IN KINESIOLOGY AND HEALTH PROMOTION. (1-3) A specific topic in physical education related to the student’s interests and program needs is selected for intensive study. Work to be supervised by a graduate faculty member proficient in the area under investigation. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

KHP 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

KHP 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

KHP 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

KHP 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

KHP 769 RESIDENCE CREDIT FOR THE DOCTORAL DEGREE. (0-12) May be repeated indefinitely.

KHP 781 PRO SEMINAR IN KHP (Subtitle required). (1-3) Advanced study of topics of current importance in health education, physical education and recreation. May be repeated under a different subtitle to a maximum of nine credits. Prereq: Consent of instructor.

KHP 782 INDEPENDENT RESEARCH IN KINESIOLOGY AND HEALTH PROMOTION. (3) Systematic investigation of a problem selected from the areas of kinesiology and health promotion. May be repeated to a maximum of nine credits.

SPORT MANAGEMENT

KHP 550 PRINCIPLES OF RESISTANCE TRAINING. (3) This course will provide students with the knowledge to design strength and conditioning programs for athletes. In addition, students will learn how to teach strength training, flexibility, and plyometric exercises. This class prepares students for the National Strength and Conditioning Association’s certifications. Prereq: KHP 120, ANA 209, PGY 206.

KHP 570 PLANNING AND MANAGEMENT OF FACILITIES FOR SPORT. (3) An introduction to the planning and management of sports facilities. The course will focus on elements of planning, design and management while examining functions related to maintenance, security, operations budgeting and evaluation. The course will be presented primarily in lecture format utilizing guest speakers but will also include facility visits as integral parts of the course. Prereq: Upper division KHP major or consent of instructor.

KHP 573 MANAGEMENT OF SPORT. (3) An introduction to the five functions of management: planning, organizing, staffing, directing and controlling, and their application to organized sport settings. Prereq: Upper division PHED, KINE majors or HPER, KHPR majors or consent of instructor.
Course Descriptions

KHP 577 PRACTICUM IN KINESIOLOGY AND HEALTH PROMOTION. (3-6)
Extensive practical work experiences with qualified practitioners and KHP faculty. Prereq: KINE, HPER, KHPR majors only.

KHP 580 INTRODUCTION TO TEAM DEVELOPMENT. (3)
An introduction to the concept of teams to include an overview of group theory, dynamics and properties as they apply to the team development in sport and non-sport settings. Students may be required to participate in a low ropes/challenge course as part of course requirements. Prereq: Upper division PHED, KINE majors or HPER, KHPR majors or consent of instructor.

KHP 585 FOUNDATIONS OF SPORT MANAGEMENT. (3)
An overview of the broad field of sport management with an emphasis on (1) the historical, political, sociological and economic parameters that influence sport; and (2) the issues related to sport and business in society and their application to sport organizations. Prereq: Sport Management graduate student or permission of instructor.

HEALTH PROMOTION

KHP 190 FIRST AID AND EMERGENCY CARE. (2)
This course is a study of the human body with first aid subject matter, demonstrations, and skill training in the event of sudden illness or injury. The course is delivered in a hybrid manner with the lecture material being taught on-line and first aid skills being taught once a week in face-to-face laboratory sessions. American Red Cross Certifications for CPR, AED, and Responding to Emergencies First Aid are awarded to those who meet the criteria.

KHP 220 SEXUALITY EDUCATION. (2)
This course is designed to prepare educators to offer sexuality education in the schools. Emphasis is placed on justification of sexuality education, relevant content, appropriate teaching techniques, and precautions to take when teaching sexuality education.

KHP 222 DRUG EDUCATION. (2)
This course is designed to prepare educators to offer drug education in the schools. Emphasis is placed on the prevalence of drug use by youth, physiological, psychological, and social effects of various drugs, effective and ineffective approaches to drug abuse prevention; appropriate teaching strategies; and evaluating drug curricula.

KHP 230 HUMAN HEALTH AND WELLNESS. (3)
The study of health promotion, wellness, and disease prevention concepts as applied to individual, familial, and community health.

KHP 270 INTRODUCTION TO HEALTH EDUCATION AND HEALTH PROMOTION. (3)
This course is designed to provide students with an overview of the emerging professions of health education and health promotion. This course will focus on the history of health, future trends in health, increasing students’ knowledge and skill development in health, and improving the students’ ability to make applications in the areas of health education and health promotion.

KHP 310 APPLIED HEALTH EDUCATION PRACTICE. (3)
This course is designed to enhance the skills of students who will be health education teachers. The emphasis will be on increasing awareness of how schools operate and identifying the characteristics of effective teaching. In addition, emphasis will be placed on developing skills among students so that they will be effective teachers.

KHP 330 PLANNING AND IMPLEMENTING SCHOOL HEALTH EDUCATION PROGRAMS. (3)
A study of the foundations of school health education and the various factors that are involved in the processes of conceptualizing, planning, drafting, and implementing effective health education programs. Prereq: KHP 220 and KHP 230 or equivalents or permission of instructor.

KHP 371 STUDENT TEACHING IN HEALTH EDUCATION. (3-12)
For students who expect to teach and who meet the requirements for a teaching certificate in Health Education. Includes objectives, courses of study, methods, materials, and testing in Health Education. The course includes observation, practice, safety education, audio-visual aids and planning conferences with supervising teacher. Six-24 lab hours per week. May be taken on a pass/fail basis only. Prereq: Admission to the Teacher Education Program in Health.

KHP 380 HEALTH EDUCATION IN THE ELEMENTARY SCHOOL. (2)
Presents health concepts to be taught in the elementary school. A brief discussion of the school health program and a review of instructional methods appropriate to health education in the elementary school are presented. Prereq: Admission to elementary or early childhood teacher education program or consent of instructor.

KHP 430 METHODS OF TEACHING HEALTH EDUCATION. (3)
A variety of contemporary teaching methods appropriate for use in grades K-12 will be presented. Students will be exposed to these methods through textbook and outside readings and through observation of the instructor, public school teachers, and peer teachers. Methods will be critically examined for effectiveness in the cognitive, affective, and behavioral areas. Prereq: KHP 220, 230, or equivalent or consent or instructor via permit; and admission to Teacher Education Program or consent of instructor via permit.

KHP 509 WORKSHOP IN HEALTH AND SAFETY. (1-3)
Designed as a variable topic course including aspects of school health or safety education with emphasis upon the needs of teachers. May be repeated to a maximum of six credits.

KHP 590 ADVANCED HEALTH CONCEPTS. (3)
An advanced, in-depth health education class examining current and major health issues. Special topics will include the following and others as time permits: major non-communicable diseases, communicable diseases, intentional and unintentional injury, and stress. Prereq: KHP 230 or permission of instructor.

KHP 602 PROMOTING PHYSICAL ACTIVITY FOR YOUTH. (3)
The purpose of this course is to provide educators and other professionals with the knowledge and skills necessary to promote physical activity for youth. Current research and philosophies will be presented in a manner that provides a sound philosophical and factual basis for promoting physical activity for youth primarily through schools. Topics such as motivation, health benefits of regular physical activity, physical activity guidelines, and assessment of physical activity will be covered. Students will also be exposed to strategies for increasing physical activity both during the school day and outside of school.

KHP 609 SEMINAR IN HEALTH AND SAFETY EDUCATION. (3)
Overview of the problems confronting persons in these fields and selected research findings applicable to these areas. Emphasis is given to gaining a better understanding of research data and to a greater utilization of research findings in both school and community health and safety education. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

KHP 673 HEALTH PROMOTION AND BEHAVIOR CHANGE. (3)
This course focuses on health promotion and behavior change strategies: individual, interpersonal, organizational, community, and public policy will be considered as potential factors that can inhibit or promote behavior change.

KHP 674 FOUNDATIONS OF HEALTH PROMOTION. (3)
This course is designed to provide students with the foundations of health promotion and education including history, philosophy, and ethics in the field. Prereq: Health-related background and/or course work. Consent of the instructor.

KHP 675 HEALTH ASSESSMENTS. (3)
This course presents concepts and skills related to assessing health status at the individual and community level in a wellness environment. Emphasis is placed on, but not limited to, physical, psychological, and sociocultural components of health. Prereq: Completion of or in concurrent enrollment in KHP 674 or equivalent. Consent of the instructor.

*KHP 677 PLANNING HEALTH PROMOTION PROGRAMS. (3)
This course addresses principles of planning, designing, implementing, and evaluating health promotion and education programs. Prereq: KHP 673 or instructor’s permission.

EXERCISE SCIENCE

KHP 350 STRENGTH AND CONDITIONING FOR SPORTS. (3)
The course addresses the fundamental principles of Exercise Science specifically as they relate to the conditioning of athletes. The course will also review concepts essential for successful completion of the National Strength and Conditioning Association’s CSCS exam. Prereq: ANA 209, PGY 206, KHP 120.

KHP 450 INTRODUCTION TO EXERCISE TESTING AND PRESCRIPTION. (3)
The course addresses fundamental principles of Exercise Science specifically as they relate to the testing and exercise prescription of apparently healthy individuals and individuals with controlled disease. The class will review concepts essential for successful completion of the American College of Sports Medicine Certified Personal Trainer and Health Fitness Instructor exams. Prereq: ANA 209, PGY 206.

KHP 600 EXERCISE STRESS TESTING AND PRESCRIPTION. (3)
Knowledge required for the administration of an exercise stress test with implications for writing an exercise prescription. Content covers healthy individuals as well as those with various health problems such as heart disease, hypertension, mental illness and diabetes. Course implements the Guidelines of the American College of Sports Medicine in preparing a specialist in exercise stress testing. Lecture, two hours; laboratory, two hours per week. Prereq: PGY 206, KHP 420G, consent of instructor.

KHP 610 MOTOR CONTROL I: MUSCLES, STRENGTH AND MOVEMENT. (3)
This course will teach the relationship between muscle forces and movement control, understanding of neuromuscular and musculoskeletal interactions. Prereq: Anatomy, Physiology

KHP 615 BIOMECHANICS OF FUNDAMENTAL MOVEMENTS. (3)
A research oriented, qualitative and quantitative investigation into the fundamental human movement patterns of ambulation, jumping, throwing, and striking. Lecture, two hours; laboratory, two hours. Prereq: An introductory course in physics, KHP 515, and consent of instructor.

KHP 616 SPORTS BIOMECHANICS. (3)
Applications of fundamental concepts in biomechanics to analysis of sports skills. Class will examine how motions are created and controlled to enable specific sport performances. Mechanics related to injury will also be investigated. Prereq: Undergraduate course in biomechanics or consent of instructor.

KHP 617 GAIT ANALYSIS. (3)
This course is a graduate level experience into the analysis of human gait. Walking, running, and pathological gait will be studied. Prereq: KHP 615 or similar course.
LA 685 DIGITAL REPRESENTATION.
This course provides students with a basic knowledge of computer-aided methodologies and recent developments in design simulation and visualization. It focuses on utilizing Autocad as a tool for producing the sequence of drawings commonly used in professional design offices. The interface of Autocad with various other digital applications to produce representations of site information is also emphasized. Lecture, 2 hours; laboratory, 2 hours per week. Prereq: LA 805.

LA 831 LANDSCAPE ARCHITECTURE DESIGN STUDIO I.
Design studio emphasizing design process applied to site programming, landscape analysis, and site planning. Use of actual sites to emphasize relationships between landscape analysis processes and landscape topology. Project presentation and public speaking sessions are videotaped and critiqued. Required field trip. Lecture, three hours; studio, nine hours per week. Prereq: LA 822 with a minimum grade of "C", LA 105, LA 205 and LA 825 or equivalent CAD course.

LA 834 LANDSCAPE ARCHITECTURE DESIGN STUDIO IV.
Design studio emphasizing design process applied to site design and integration of design theories. Investigation and application of context, composition, typology, landscape ecology and other theoretical constructs as design determinants. Expression of design using two and three dimensional communications media. Required field trip. Lecture, three hours; studio, nine hours per week. Prereq: LA 833 with a minimum grade of "C", PLS 320 and GLY 110 or 120.

LA 841 LANDSCAPE ARCHITECTURE DESIGN STUDIO VI.
Studio design course emphasizing design process and principles in the development of design solutions for a variety of projects. Lecture, three hours; studio, nine hours per week. Prereq: LA 834 with a minimum grade of "C". PLS 320 and PLS 366 or FOR 205.

LA 842 LANDSCAPE ARCHITECTURE DESIGN STUDIO VII.
Studio design course with emphasis on project-type design and an introduction to large scale site planning. Lecture, three hours; studio, nine hours per week. Prereq: LA 841 with minimum grade of "C".

LA 851 DESIGN WITH PLANTS.
The application of design principles to the functional and aesthetic use of plant materials in the landscape. Lecture, two hours; studio two hours per week. Prereq: LA 205, LA 805 and PLS 320, or permission of instructor.

LA 854 CULTURAL LANDSCAPE PRESERVATION.
An introduction to cultural landscape preservation philosophy, strategies and methods. Exploration of regional landscape preservation case studies and application of preservation principles and methods to solve landscape preservation problems with an emphasis on research and process. Lecture, two hours; studio, two hours per week. Graduate credit will be limited to master's students enrolled in the Historic Preservation graduate program and the awarding of graduate credit in each case requires the approval of the Director of Graduate Studies in Historic Preservation.

LA 855 INTRODUCTORY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS.
An introduction to the concepts and methods of compilation, management, analysis, and display of spatially-referenced and tabular data utilizing vector and raster data models. Lecture, two hours; laboratory, four hours per week. Prereq: Third year or above LA major, junior/senior NRES major, or permission of instructor. (Same as NRE 355.)

LA 856 ADVANCED APPLICATIONS FOR LAND ANALYSIS.
Advance concepts in data base analysis, model development, and ancillary functions in geographic information systems. Lecture, two hours; laboratory, four hours per week. Prereq: LA 855/NRE 355 and either STA 291 or STA 570. (Same as NRE 556.)

LA 857 DESIGN THEORIES IN LANDSCAPE ARCHITECTURE.
This course will act as an introduction to some of the conceptual design issues integral to the studio experience. The objective of the course is to develop a theoretical and philosophical foundation for our actions and interventions in the environment. Prereq: LA 834 or permission of instructor.

LA 858 REGIONAL LAND USE PLANNING SYSTEMS.
An introduction to regional land use planning and its relationship to environmental, social, and economic systems. Students will develop an understanding of how land use decisions have impacted the development of the United States and how they are used to determine future development directions. Prereq: LA 822 major or permission of instructor.

LA 862 GRAPHICS II.
Study and application of advanced level graphic communication methods with emphasis on integration of multiple media and technologies. Lecture, two hours; laboratory, two hours per week. Prereq: LA 825.

LA 863 DIGITAL REPRESENTATION.
Digital Representation II introduces students to the representation of essential elements of the landscape (structures, landform, water, vegetation, and atmosphere) in three dimensions utilizing Autodesk and Sketch Up software. Students learn about basic 3D modeling tools that will prepare them later in the course to experiment with a variety of visualization methods. Students will test the appropriateness of visualization methods in search of a balance between realistic representations and software limitations. Lecture, 2 hours; studio, 2 hours per week. Prereq: LA 862.
LA 869 ADVANCED REGIONAL LAND USE PLANNING APPLICATIONS. (3)
This course builds on the systems learned in LA 858 and applies them, through GIS technology, to real world situations. In this course we will deal with rural development, decision making, and comprehensive land use within the context of the physical environment. Lecture, two hours; studio, three hours per week. Prereq: LA 858 or LA 855, or permission of the instructor.

LA 871 DESIGN IMPLEMENTATION I. (4)
An introductory study of landscape architecture design implementation; construction materials, including wood, paving types and wall types, along with their applications; development of surface grading and drainage; and preparation of working drawings and materials specifications. Lecture, two hours; studio, six hours per week. Prereq: LA 825 or permission of the instructor.

LA 872 DESIGN IMPLEMENTATION II. (4)
A continuation of design implementation to develop competency in solving problems relating to subsurface drainage systems, road alignment, and detailed site engineering. Lecture, two hours; studio, six hours per week. Prereq: LA 871 with a minimum grade of “C”.

LA 890 INTERNATIONAL STUDY. (3)
Advanced topical studies in landscape architecture allowing for individual research or a work/travel experience coordinated with an academic pursuit. May be repeated to a maximum of six credits.

LA 895 INDEPENDENT STUDY IN LANDSCAPE ARCHITECTURE. (1-6)
Advanced topical studies in landscape architecture allowing for individual research on a work/travel experience coordinated with academic pursuits. May be repeated to a maximum of six credits. Prereq: Permission of faculty.

LA 897 SPECIAL TOPICS IN LANDSCAPE ARCHITECTURE (Subtitle required). (3)
Topical seminars on current issues of significance to landscape architecture. May be repeated to a maximum of six credits under different subtitles.

LA 899 INTERNSHIP IN LANDSCAPE ARCHITECTURE. (3)
This is a self-directed course that provides academic credit for a pre-approved internship relating to the practice of landscape architecture. Such an internship involves working for a minimum of eight weeks (320 hours) in a private or public landscape architecture office or in another professional experience associated with landscape architecture. Other experiences could include conservation work, research projects, or community engagement work. While engaged in the internship is required that a Practice Portfolio and a daily journal of professional engagement be kept. Prereq: LAAR major and Third-Year standing or higher.

LA 973 DESIGN IMPLEMENTATION III. (6)
Advanced instruction and practicum in the design phase of design drawings. Students will produce a comprehensive set of working drawings that apply the principles and techniques commonly used in the landscape architecture profession. Lecture, three hours; studio, nine hours per week. Prereq: LA 872 with a minimum grade of “C”.

LA 975 LANDSCAPE ARCHITECTURE DESIGN STUDIO VII. (6)
Application of landscape architecture design principles to solve problems at a variety of scales emphasizing process as well as form generation in a creative and historic context. Lecture, three hours; studio, nine hours per week. Prereq: LA 842 with a minimum grade of “C”.

LA 990 CAPSTONE SEMINAR. (2)
A capstone course in which students will formally document their competency relative to knowledge, skills and abilities developed while in this program. In addition, this course will help students prepare to become practicing landscape architects and/or pursue advanced education. Seminar, three hours per week; Field trip(s). Prereq: LA 842 or permission of instructor.

LAS Latin American Studies

LAS 201 INTRODUCTION TO LATIN AMERICA. (3)
An interdisciplinary approach to the people, culture and development of the Latin American republics. Attention will be concentrated on significant aspects of the indigenous peoples, geography, economic processes, gender roles, social structures and politics of Latin America, with special attention paid to value structures and value conflicts. Musical, literary and artistic expression in Latin America will also be introduced. Team taught, with a course coordinator from the LAS faculty.

LAS 361 LATIN AMERICAN LITERATURE IN TRANSLATION (Subtitle required). (3)
This course examines particular authors, periods, regions, cultural events, or movements from Latin America. Special attention will be paid to links between literature and culture, politics and society through reading, discussion, and writing assignments to be conducted in English. Course may be repeated under different titles to a maximum of six credits. (Same as SPA 361.)

LAS 395 INDEPENDENT WORK IN LATIN AMERICAN STUDIES. (3)
Directed study for students wishing to do specialized work on a topic related to the Latin American Studies area. May be repeated to a maximum of six credits. Prereq: LAS 201 and six hours course work from approved LAS courses.

LAS 401 DIRECTED RESEARCH IN LATIN AMERICAN STUDIES. (3)
Research on an interdisciplinary topic approved by the LAS Advisory Committee in the area of Latin American Studies. Prereq: Major in Latin American Studies; senior standing.

LAS 601 INTERDISCIPLINARY SEMINAR IN LATIN AMERICAN, CARIBBEAN, AND LATINO STUDIES. (3)
This course introduces graduate students to Latin American Studies. It is a topical seminar, which engages a series of fundamental issues or problems of importance to scholars of Latin America. Coordinated by a LACLAS affiliated faculty member, it addresses these issues of current scholarly interest from multiple disciplinary perspectives and examines the philosophy and methods of interdisciplinary research. The Interdisciplinary Seminar features guest appearances in the classroom by LACLAS affiliated faculty. Prereq: Graduate status or approval by professor.

LAW Law

LAW 801 CONTRACTS/SALES I. (3)

LAW 802 CONTRACTS/SALES II. (3)
Continuation of Contracts/Sales I - Statute of Frauds, performance, express and implied conditions, repudiation, impossibility.

LAW 804 LEGAL RESEARCH AND WRITING SKILLS. (4)
Instruction in the use of research materials, in legal writing, in the fundamentals of legal analysis and in the solution of selected legal problems.

LAW 805 TORTS. (4)
Intentional torts and defenses, negligence, causation, duties of occupants of land and manufacturers and vendors of chattels, contributory negligence, strict liability, deceit, defamation, malicious prosecution, interference with advantageous relations.

LAW 807 PROPERTY. (4)
Basic course in property; possession, gifts, bona fide purchasers of personality. Estates, uses, easements, and rights incident to ownership.

LAW 809 FEDERAL CRIMINAL LAW. (2-3)
This course will cover federal white collar criminal issues, including RICO, mail and wire fraud, political corruption, bank secrecy laws, and false statement laws.

LAW 810 CRIMINAL LAW. (3)
Jurisdiction; the criminal act; complete and incomplete; criminal intent, actual and constructive; duress and mistake of fact, of law; justification; parties in crime; crimes against the person and crimes against property.

LAW 811 CRIMINAL PROCEDURE. (3)
This course will cover search and seizure, the privilege against self-incrimination, confessions and identification procedures—in general, the constitutional cases arising out of the conflict between police practices and the Bill of Rights.

LAW 812 RACE, RACISM AND THE CRIMINAL LAW. (3)
This course examines, through an interdisciplinary approach, the effects race has had and continues to have on the administration of criminal justice in the United States. The course begins by exploring the concept of race from different perspectives: biological; anthropological; sociological; psychological; and legal. The course then examines how these legal constructs shaped the role race played in American culture. The course then delves into how race and the criminal justice system have interacted from historical and contemporary perspectives. Accomplishing this requires probing critical issues encountered at key stages in the process governing the administration of criminal justice. These issues include: the existence of offenses based on racial status (crimes such as rape, capital murder, drug offenses, racial profiling (driving and flying while black)); victimology; pre-trial practices (bail); trial practices (misconduct by prosecutors and defense attorneys, urban rage defense, evidentiary issues, such as cross-racial identification and jury deliberations); and post-conviction (incarceration rates, loss of franchise) consequences.

LAW 813 CAPITAL PUNISHMENT. (3)
This course provides an examination of history, purpose and constitutionality of capital punishment. The course will also discuss death penalty eligibility/offenses and will provide an international perspective.

LAW 814 CRIMINAL TRIAL PROCESS. (3)
This course will cover in-depth the criminal trial process from the initial court appearance: grand jury proceedings, pretrial motions, discovery, trial, plea, sentencing, appeals, double jeopardy and habeas corpus. Students who have taken LAW 813, Criminal Procedure II, may not take this course.

LAW 815 CIVIL PROCEDURE I. (3)
Introduction to the civil action; personal and in rem jurisdiction; service or process and notice; subject matter jurisdiction; venue; choice of law; pleading.

LAW 817 CIVIL PROCEDURE II. (2-3)
Joinder of claims and parties; discovery; summary judgment; right to jury trial; trials and posttrial motions; res judicata and collateral estoppel.
LAW 818 REMEDIES. (3) Nature of damages; nature of specific relief; personal interests; contractual interests; property interests; specific relief and the government.

LAW 819 THE FEDERAL COURTS AND THE FEDERAL SYSTEM. (3) The nature of the federal judicial function and its development, distribution of power among federal and state courts, Supreme Court review of state court decisions, the law applied in federal district courts, federal question and diversity jurisdiction, federal habeas corpus, removal jurisdiction and procedure.

LAW 820 CONSTITUTIONAL LAW. (3) Judicial interpretation of the Constitution; the federal system; powers of the national government; limitations on the exercise of state powers.

LAW 821 LITIGATION SKILLS. (3) The skills of litigation, including trial advocacy, interviewing and counseling, negotiation and pleading. Lecture, one hour; laboratory, five hours. Prereq or concur: LAW 890.

LAW 822 CONSTITUTIONAL LAW II. (3) Protection of individuals and organizations by the Bill of Rights, the fourteenth amendment, and other provisions of the Constitution.

LAW 824 ALTERNATE DISPUTE RESOLUTION. (3) Methods of dispute resolution other than trial; statutory and judicial regulation; presenting a claim in different formats of ADR.

LAW 825 THE NEGOTIATING PROCESS. (2) Analysis of the elements of bargaining power; exercises in the negotiating process in various contexts; basic techniques of negotiation; ethical norms of the lawyer-investigator. Lecture, one hour; laboratory, two hours per week.

LAW 826 LEGAL DRAFTING. (2-3) This course systematically explores drafting process and technique and provides drafting practice. Students complete drafting-related exercises which become the focus of class discussions. Students also complete major drafting projects. These may consist of a will, a contract, a piece of legislation or other common lawyer work product. Major drafting projects are the focus of class discussions and individual or small group meetings with the instructor.

LAW 828 STATUTORY CIVIL RIGHTS. (3) This is a survey course designed to cover the entire field of federal antidiscrimination law. Topics to be covered may include employment discrimination (primarily focusing on race, sex, age, and disability issues and possibly affirmative action); housing discrimination (primarily focusing on race, disability, and family issues); other disability discrimination issues under the Americans with Disabilities Act; discrimination in public accommodations and government programs; voting rights litigation issues involving proof (e.g., how cases based on direct evidence of intent, circumstantial evidence of intent, and disparate impact differ from one another), special defenses, and remedies; and a brief survey of the more important questions that arose in Section 1983 litigation. Prereq: LAW 822.

LAW 830 HEALTH LAW. (3) This course examines the regulation of health care access, cost and quality. It will cover public and private market rules controlling access to health care, cost containment rules, and regulations regarding the quality of health care.

LAW 831 BIOETHICAL ISSUES IN THE LAW. (2-3) This course will cover topics such as legal reasoning in bioethical situations, determination of death, issues in human experimentation, organ transplantation, genetic testing, clinical research with human subjects, and end-of-life decision-making. This second survey course in the health law area will provide students who take this course and Healthcare Organizations and Finance (LAW 830) with a broad understanding of this increasingly important area of the law. Neither class is a prerequisite for the other class. They may be taken concurrently or in any order chosen by the student. Students must take either this course or LAW 830 in order to enroll in the seminar entitled Healthcare Law and Policy Seminar.

LAW 832 MEDICAL LIABILITY. (3) This course examines the liability issues that arise from the provision of medical care. The course studies the physician/patient relationship, when it begins and how it can be terminated. It examines the extent of the duties owed by providers to patients, including requirements relating to confidentiality, informed consent and records disclosure. The course also provides a detailed treatment of the common law of provider liability, focusing on medical malpractice. The course also provides a detailed treatment of the common law of provider liability, focusing on medical malpractice. The course also provides a detailed treatment of the common law of provider liability, focusing on medical malpractice. The course also provides a detailed treatment of the common law of provider liability, focusing on medical malpractice.

LAW 835 PROFESSIONAL RESPONSIBILITY. (2-3) An examination of the varying roles played by lawyers in society and the conflicting pressures created to each role. Special attention is paid to the Code of Professional Responsibility as a guide and control in the lawyer-client relationship. Also considered at length is the role of law in society and the place of the legal profession in society. Guest speakers are used to bring into focus employment options for lawyers and the viewpoints of varying types of practicing lawyers to the pervasive problems of the legal profession.

LAW 836 LAW AND ECONOMICS. (2) This course applies neoclassic economics concepts to the law. It offers economic explanations of legal rules (for example, explaining how legal rules tend to move society toward or away from economic efficiency). The course also explores normative issues, such as whether the pursuit of economic efficiency is morally attractive. The course looks at the following areas of the law: property, contracts, torts, family law, criminal law, employment law, corporate law, and securities law.

LAW 838 LAW AND RELIGION. (3) The relationship of law to religion with emphasis on the establishment and free exercise clauses of the First Amendment. Prereq: LAW 822.

LAW 839 GENDER DISCRIMINATION. (2-3) Constitutional aspects of sex discrimination, employment discrimination. A criminal law unit covering women as victims and as offenders.

LAW 842 SPORTS LAW. (3) Survey of the regulatory and contractual aspects of the multi-million dollar industry. Includes issues related to intercollegiate athletics; professional recruiting and contracting; labor and anti-trust issues; liability issues and other related topics.

LAW 845 JURISPRUDENCE. (3) This course presents a survey of the various schools of legal philosophical thought, with an emphasis on exploring how these intellectual “value systems” necessarily inform judges’ decisions, and how they might therefore influence one’s choice of legal argument in a given case. The course will include readings from formalism, legal positivism, process theory, legal realism, law and economics, critical legal studies, feminist legal theory, and critical race theory, among others.

LAW 850 LEGAL ACCOUNTING. (2-3) This course is designed to introduce students to general bookkeeping and accounting principles. Class discussion will concentrate on the relevance of accounting judgments to legal issues rather than focusing on technical problems. Students will examine income statements, balance sheets, and other accounting documents. Emphasis will be placed on an understanding of accepted accounting principles (GAAP) and the abuses of GAAP. Students with undergraduate financial accounting can take this course only with permission of the professor.

LAW 851 BUSINESS ASSOCIATIONS. (4) Legal introduction to business organization; emphasis on nature and structure under modern American business corporation law. Areas: partnership planning (formation, property rights, dissolution and liquidation rights); steps for corporate organizing (including legal consequences of defective incorporation); nature of corporate entity concept; corporate control and management (including problems of close corporation); fiduciary duties of directors and controlling shareholders under state law; nature and characteristics of shareholders’ derivative suit. Prereq: Completion of first year of law study generally is expected.

LAW 855 CORPORATION FINANCE LAW. (3) A study of selected problems in advanced corporation law, including corporate promotion and capitalization (with special emphasis on senior securities and their characteristics); corporate distributions (dividends); recapitalizations (elimination of accrued dividends); public regulation of security issues (Securities Act of 1933 and state Blue Sky laws).

LAW 856 BUSINESS PLANNING. (3) This course involves the planning of business transactions and combines the applicable corporate, tax, and securities considerations of such transactions in a single course. Emphasis will be on some of the more important types of corporate transactions, such as the organization of a private corporation and a public corporation, conflicts between stockholders of a close corporation, and corporate combinations. Course is limited to third-year students who have had a background in corporations and income tax. Knowledge of securities regulation and corporate tax is desired.

LAW 858 NONPROFIT ORGANIZATIONS. (3) This course introduces students to the laws and policies governing the formation, operation, and dissolution or conversion of nonprofit organizations, including charities, foundations, associations, and clubs. The general substantive coverage of the course is approximately one-half “organizational” law – the state law governing the formation and operation of the entity – and approximately one-half federal income tax law. Prereq: LAW 851 and LAW 860.

LAW 860 TAXATION I. (3-4) Problems in federal and state income taxation.

LAW 861 TAXATION OF BUSINESS ENTERPRISES I. (2) Federal income taxation of transactions between partners and their partnership and shareholders and their corporation; organization of partnerships and corporations; taxation of distributions of operating profits, liquidations, and sales of interests. Prereq: LAW 860.

LAW 862 TAXATION OF BUSINESS ENTERPRISES II. (3) Advanced problems of federal income taxation of corporations and partnerships; mergers and acquisitions; reorganizations, recapitalizations, affiliated corporations; consolidated returns. Prereq: LAW 860 and LAW 861.

LAW 864 REAL ESTATE TRANSACTIONS. (3) This course covers numerous issues related to real estate conveying, including contractual issues, title assurance, and financing the transactions. Prereq: Property.
LAW 850 ESTATE AND GIFT TAXATION AND PLANNING. (3) Donative transfers of property, including intestate transfers and wills; income, estate, and gift tax consequences of the various methods of disposition; administration of estates.

LAW 866 ADVANCED ESTATE PLANNING. (2-3) This is a two-hour, problem-oriented, skills course. Problems will be distributed to the class involving the federal estate tax code, e.g., owners of a small, closely held business; a middle income family with three minor children and a fiancé seeking a prenuptial agreement. Students will be expected to draft appropriate wills, trusts, and other legal documents for their clients. Role playing will be used to better simulate realistic situations. Students will learn some of the more sophisticated estate planning techniques, e.g., revocable trust agreements; trusts utilizing unified credit exemptions of both spouses; charitable remainder trusts; prenuptial agreements; post-nuptial agreements; planning for qualified pension plans; etc. Emphasis will be placed on teaching interviewing skills, communicating with clients, ethical considerations, financial planning and drafting skills. Enrollment is limited to a maximum of 16 students. Prereq: Estate and Gift Taxation and Planning (LAW 865) and Trusts and Estates (LAW 876).

LAW 872 LAND USE PLANNING. (2-3) A comprehensive survey of the basic legal devices to control the use of land, theories of land use planning, nuisance, private agreements, zoning and zoning procedure, the role of the federal government in land planning, exercise of eminent domain, and selected Kentucky problems, such as rural zoning and proposed New Towns for Appalachia.

LAW 874 BANKING LAW. (2-3) History of banking; overview of agencies which regulate bank activities; formation and regulation of bank holding companies; bank mergers and acquisitions; branch banking; antitrust considerations; trust operations conducted by banks; impact of securities legislation on bank loans and bank financing; the FDIC and its impact on a failing bank.

LAW 875 SECURITIES REGULATION. (3) The law governing the issuance, distribution and trading of securities under the Securities Act of 1933 and the Securities Exchange Act of 1934; the obligation to register securities; public offerings by issuers; secondary distributions; and registration requirements growing out of mergers, definition of a “security” and the exemptions from registration requirements; insider trading prohibitions; antifraud provisions in tender offers, self tenders, proxy solicitations and tender solicitations; antitrust considerations; the “Blue Sky” laws, the rule against piercing the corporate veil and the specific requirements of the Securities Act of 1934.

LAW 876 TRUSTS AND ESTATES. (4) An elective course for second-year law students. Examination of rules governing intestate distribution of property; formal requirements governing execution, alteration and revocation of wills; requisite elements of express trusts and requirements for their creation; special rules relating to charitable trusts and spendthrift trusts; rules concerning construction of wills and trusts and general rules governing administration of decedents’ estates and trusts.

LAW 877 FUTURE INTERESTS. (2) An advanced elective course for third-year law students treating in-depth future interests of ownership in property, including the kind of future interests, rules as to class gifts, the rule against perpetuities, and powers of appointment with emphasis on the lawyer’s use of future interests in estate planning and the pitfalls relating thereto.

LAW 880 BASIC UNIFORM COMMERCIAL CODE. (4) A study of problems involved in secured transactions and the exchange of commercial paper as governed by the Uniform Commercial Code.

LAW 881 PAYMENT SYSTEMS. (2-3) This course focuses on the basics of payment transactions using check and other negotiable instruments. In the longer version of this course, coverage will also include the regulatory structure governing modern electronic payment systems. Prereq: Basic Uniform Commercial Code.

LAW 882 SECURED TRANSACTIONS. (3) This course focuses on secured credit transactions and will include an examination of contemporary bank lending practices.

LAW 885 COMMERCIAL DEBTOR-CREDITOR RELATIONS. (2-3) Minimizing risk of loss through bankruptcy by business creditors and debtors; Uniform Commercial Code, Uniform Bankruptcy Code, the Federal Bankruptcy Act; nonbankruptcy creditors’ and debtors’ remedies in commercial context, including assignments and arrangements under state law; commercial bankruptcy; rehabilitation under Bankruptcy Act.

LAW 887 INSURANCE. (2-3) Nature of contract, insurable interest, making the contract, concealment, representations, warranties, implied conditions of forfeiture, waiver and estoppel, rights under the contract, and construction of the policy.

LAW 888 CONSTRUCTION LAW. (2-3) This course covers particular legal issues relating to construction designs, procurement, contract interpretation, performance subcontracts, bonds and insurance, and conflict resolution approaches.

LAW 890 EVIDENCE. (4) Rules of admissibility; real, circumstantial, testimonial and documentary evidence, witness, hearsay rule and its exceptions, procedure of admissibility, law and fact, judge and jury, burden of proof and presumption, judicial notice, and parole evidence rule.

LAW 895 EQUINE LAW. (2-3) This course is directed at students with an interest in developing an in-depth knowledge of current issues in equine law. Equine law is an amalgamation of various laws that were employed specifically in the advancement of the equine industry. The industry is founded on a tradition of handshake deals (which still take place at the highest level) but is increasingly sophisticated. This course will take a multi-disciplinary approach and investigate current topics, including account wagering, simulcasting, stallion syndications, multiple ownership vehicles, intellectual property, and other emerging topics. The course will investigate the legal relationships (rights, duties, and obligations) among and between the constituent parties in horse racing, breeding, ownership and sport horse activities and the laws that to a greater or lesser degree define those relationships. Prereq: LAW 851 and LAW 860; concurrent enrollment in LAW 851 is permitted.

LAW 896 RESEARCH PROBLEMS. (2) This is the law school’s independent research course. Students must have the approval of a sponsoring professor and the Associate Dean for Academic Affairs. Forms are available on the law school’s web site or from the Dean’s Office. Students must present a completed prospectus about their research and a signed approval form before they will be allowed to sign up for the course. The Associate Dean will normally approve proposals submitted after the first day of class. A paper 25 pages or more in length, exclusive of footnotes, is required. This course may not be used to satisfy the Upperclass Writing Requirement.

LAW 898 ENVIRONMENTAL LAW. (3) The role of the legal system in regulating the interrelated subsystems within the physical environment, including water and air pollution, solid waste disposal, and strip mining. Emphasis on: constitutional limitations on the public’s power to implement planning proposals; relationships between federal, state and local governments; structure of agencies regulating environmental quality; standards for administrative discretion; the openness of administrative hearing procedures; and the scope of judicial review of administrative decisions. Prereq: None directly, although completion of first-year law courses is expected for second- and third-year elective courses.

LAW 900 LAW SPECIAL COURSE. (2 or 3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. A particular course may be offered no more than twice under the LAW 900 number.

LAW 901 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 902 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 903 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 904 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 905 CONFLICT OF LAWS. (3) Nature of the subject, penal laws, procedure, judgments, domicile, capacity, form, particular subjects, litigation, family law, inheritance, foreign administrators.

LAW 906 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 907 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 908 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 909 SPECIAL TOPICS IN LAW. (2-3) Interdisciplinary, topical or experimental courses to be approved by the faculty and Dean of the College of Law. Prereq: Varies with course.

LAW 910 LABOR LAW. (3) History, organization, and structure of American labor unions; obligations and prerogatives of employers; questions of representation; privileges and obligations of unions; collective bargaining and dispute settlement.

LAW 911 EDUCATION LAW. (3) This course provides a comprehensive overview of the law as it impacts the American primary and secondary education system. Course topics include education as an individual right and a state duty; campus safety; student and teacher rights relating to expression, religion, and privacy; educational policy development; copyright issues; education of students with disabilities; educational funding and accountability; and other topics as they timely emerge in the ongoing public debates over education policy and law. Students planning to take the Education Law Seminar are strongly recommended to take this course first. Recommended: Constitutional Law II (LAW 822).
Course Descriptions

**LAW 912 EMPLOYMENT LAW.** (3)
This course surveys and examines that multitude of important legal doctrines, statutes and rules that regulate the rights and responsibilities of employers and workers which are not controlled by collectively bargained agreements. The structures for administering the more important areas of such regulation are also studied. The subject matter of this course affects most dimensions of the manner in which over three quarters of our Gross National Income is distributed. Course coverage includes: the law of individual employment contracts, special employment relationships, civil service, the employer’s responsibility to various forms of work products, the employer’s responsibility for job health and safety, protection of the worker’s property, worker responsibility for wrong-doing, wage-hour laws, vacation benefits, bonuses, retirement benefits, health insurance benefits, and unemployment compensation.

**LAW 913 ADVANCED LEGAL RESEARCH.** (2)
This two credit course is designed to assist third-year law students improve their legal research skills by introducing them to a number of research tools not covered in first-year legal research instruction. Besides exposure to legal research material, students will apply research strategies to in-class and out-of-class assignments.

Topics covered include: review of basics; secondary authority; international, foreign and transnational law; statutory and legislative history research; administrative law; tax research; securities law; environmental and criminal law; banking and labor law; family and employment law; and looseleaf, trial practice and ALR materials. These topics will be examined using traditional legal research methodology, as well as CD-ROM, INTERNET and on-line databases. Prereq: Open only to third year students.

**LAW 914 PRODUCT LIABILITY.** (2-3)
This course will focus on the laws of product liability. It will cover all the causes of action for products liability, negligence, strict liability, and warranty, with detailed treatment of some or all of the following issues: design defects, failure to warn, hybrid transactions, federal preemption, comparative fault and assumption of risk, negligent marketing, causation, punitive damages, toxic tort and class action litigation.

**LAW 915 FAMILY LAW.** (2-3)
Contracts to marry; the marriage status; annulment, divorce and separation; parent and child; infants and incompetent persons.

**LAW 916 CHILDREN AND THE LAW.** (2-3)
When offered for two credit hours: allocation of rights between the state and parents, management and control of minor’s property, child protective services (abuse, dependency, and neglect), status offenses, termination of parental rights, foster care, and adoption. When offered for three credit hours: allocation of rights between the state and parents, management and control of minor’s property, child protective services (abuse, dependency, and neglect), status offenses, termination of parental rights, foster care, adoption, medical decision-making, education rights, and juvenile justice (transfer hearings, and sanctions).

**LAW 917 ECONOMIC AND DIGNITARY TORTS.** (2-3)
This course is designed to cover in depth some of the important topics of tort law that often are not covered in basic Torts. Those topics include economic torts such as tortious interference with contractual or economic advantage and the economic loss rule. The major dignitary torts of Defamation and Right to Privacy are also covered.

**LAW 919 IMMIGRATION LAW.** (2-3)
This course is designed to examine and interpret federal immigration legislation and policy. The course will include such topics as the constitutional origins of immigration legislation, definitions of immigrants and non-immigrant categories, grounds for exclusion and deportation, and refugee and asylum law.

**LAW 920 ADMINISTRATIVE LAW.** (3)
Establishment of administrative tribunals, limits on discretion. Notice and hearing, orders, methods of judicial review, scope of judicial review.

**LAW 921 ELECTION LAW.** (3)
This course covers a wide range of substantive areas of election law, with particular emphasis on the U.S. presidential election of 2012. The course covers the structure of the American electoral system and the role of the national government in overseeing the election process. It also examines various aspects of election law, including primary elections, general elections, campaign finance, voter registration, and the administration of elections. The course will emphasize the constitutional and legal perspectives of election law, and will involve analysis of recent election cases and debates.

**LAW 922 ENVIRONMENTAL LAW.** (3)
This course will cover the basic legal structure regulating international trade. Topics covered include: international sales contracts, international finance, international civil litigation and arbitration (jurisdiction, choice of law, enforcement of foreign judgments and arbitration awards), tariff and non-tariff trade barriers, export licensing, international aspects of intellectual property (patents, trademarks and copyrights), regulation of foreign investment, trade-related aspects of intellectual property with emphasis on the EEC and North American Free Trade Area and fundamentals of taxation of international transactions.

**LAW 923 INTERNET LAW.** (3)
This course is designed to provide an introduction to the basic legal concepts and principles that govern the use of the Internet. The course covers a wide range of topics, including the legal implications of the rapid expansion of Internet use, cybercrime, intellectual property, and privacy.

**LAW 924 INTERNATIONAL TRADE LAW.** (2)
This course will cover the basic legal structure regulating international trade. Topics covered include: international sales contracts, international finance, international civil litigation and arbitration (jurisdiction, choice of law, enforcement of foreign judgments and arbitration awards), tariff and non-tariff trade barriers, export licensing, international aspects of intellectual property (patents, trademarks and copyrights), regulation of foreign investment, trade-related aspects of intellectual property with emphasis on the EEC and North American Free Trade Area and fundamentals of taxation of international transactions.

**LAW 925 INTERNATIONAL LAW.** (3)
This course provides an introduction to international law. It will cover the basic principles and concepts of international law, including the sources and development of international law, the role of international organizations, and the role of international law in the global economy. The course will also cover the legal framework governing international trade and investment, and the role of international law in protecting human rights.

**LAW 926 INTERNATIONAL BUSINESS TRANSACTIONS COURSE.** (3)
This course will cover the basic legal structure regulating international trade. Topics covered include: international sales contracts, international finance, international civil litigation and arbitration (jurisdiction, choice of law, enforcement of foreign judgments and arbitration awards), tariff and non-tariff trade barriers, export licensing, international aspects of intellectual property (patents, trademarks and copyrights), regulation of foreign investment, trade-related aspects of intellectual property with emphasis on the EEC and North American Free Trade Area and fundamentals of taxation of international transactions.

**LAW 927 LEGISLATION.** (3)
This course provides an introduction to legislative and the legislative process, with an emphasis on federal legislation. Among the subjects considered are theories of representation by the legislature, includes one person-one vote, legal process theory and the roles that judicial review and separation of powers play in that theory; and statutory construction, including the rules and canons of statutory construction and the use of legislative history in interpreting statutes.

**LAW 928 EMPLOYEE BENEFITS LAW.** (3)
This course provides an overview of federal law governing employee benefits. Topics covered include: origins and fundamentals of the pension system, origins of ERISA, taxation of employee benefits, fiduciary rules, and preemption. Students who take this course should have completed a basic tax course.

**LAW 929 COPYRIGHT LAW.** (3)
This course provides a broad understanding of most aspects of this branch of intellectual property including copyrightable subject matter, standards for protection, registration and deposit requirements, the bundle of rights, remedies, standards for infringement, defenses to infringement including fair use, and a variety of other concepts. Intellectual Property is not a prerequisite. Grades will be based on three writing projects assigned during the semester.

**LAW 930 ANTITRUST LAW.** (2-3)
The body of law structuring economic organization and activities in a free enterprise national system. Major matters considered in the course are government creation and regulation of the legal monopolies, controls over collaborative conduct of competing economic entities, and legal control over the vertical distributive relationship of suppliers, dealers, and customers.

**LAW 931 STATE AND LOCAL TAXATION.** (2-3)
This course provides an introduction to the fundamentals of state and local taxation. Topics covered include: property taxation, sales taxation, corporate taxation, and constitutional limitations on state and local taxation.

**LAW 933 INTERNET LAW.** (3)
This is a survey course on the legal regime(s) governing the Internet. In a short period of time, the Internet has assumed a prominent place in the global economy, facilitating hundreds of billions of dollars worth of business-to-business and business-to-consumer transactions annually. At the same time, the Internet has become an important means of person-to-person and intra-organizational communication. This course will focus on many of the important legal questions that have arisen as a consequence of the rapid expansion of Internet use. Topics to be covered will include jurisdiction over, and choice of law in, the electronic marketplace; cybercrime; protection of domain names; regulation of indecent or pornographic content; protection of personal information online; electronic contracting and electronic signatures; digital piracy and protection of intellectual property on the Internet, including the Napster case and the debate about open-source software; and electronic-payment systems. Wherever possible, we will focus on international and comparative legal perspectives on the problems posed by Internet regulation.

**LAW 934 PATENT LAW.** (3)
The course in patent law covers aspects of patent procurement with particular attention directed to the statutory requirements faced by an applicant including considerations of patent eligibility of the subject matter and its utility, novelty and nonobviousness; the specification and claims including disclosure requirements of the written description, such as enablement and definiteness; post-grant procedures of reissue, reexamination, and disclaimer; patent enforcement and affirmative defenses against a charge of infringement; remedies; and international prosecution and patenting.

**LAW 935 INTELLECTUAL PROPERTY.** (2-3)
Analysis of the various common law unfair competition areas; examination of statutory relief in areas of trademarks, copyright, and misleading advertising; survey and analysis of various portions of Federal Trade Commission Act and Robinson-Patman Act.

**LAW 936 INTELLECTUAL PROPERTY TRANSACTIONS.** (2 or 3)
Intellectual Property Transactions deals with legal problems in the commercialization of intellectual property. It covers, among other things, license, confidentiality agreements, and intellectual property financing. Prereq: LAW 935 or permission of the instructor.

**LAW 937 INTERNATIONAL TAX.** (3)
This course examines the U.S. federal income tax implications of international transactions, covering both inbound and outbound transactions. Prereq: LAW 860.

**Course Descriptions**

**LAW940 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW941 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW942 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW943 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW944 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW945 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW946 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW947 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW948 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW949 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW950 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW951 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW952 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW953 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW954 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW955 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW956 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW957 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW958 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW959 SEMINAR**
Seminar in selected legal problems, as designated by the faculty.

**LAW960 TRIAL ADVOCACY BOARD**
Seminar in selected legal problems, as designated by the faculty.

**LAW961 MOOT COURT/BOARD**
Seminar in selected legal problems, as designated by the faculty.

**LAW962 KENTUCKY LAW JOURNAL**
Seminar in selected legal problems, as designated by the faculty.

**LAW963 JOURNAL OF NATURAL RESOURCES AND ENVIRONMENTAL LAW**
Seminar in selected legal problems, as designated by the faculty.

**LAW964 JUDICIAL EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW965 PROSECUTORIAL EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW966 MOOT COURT NATIONAL TEAM**
Seminar in selected legal problems, as designated by the faculty.

**LAW967 PRISON EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW970 U.S. ATTORNEY APPELLATE DIVISION EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW971 DEPARTMENT OF PUBLIC ADVOCACY INNOCENCE PROJECT EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW972 LEGAL CLINIC**
Seminar in selected legal problems, as designated by the faculty.

**LAW973 CHILDREN'S LAW CENTER EXternship**
Seminar in selected legal problems, as designated by the faculty.

**LAW974 PUBLIC DEFENDER EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW975 UK HEALTHCARE EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.

**LAW976 KENTUCKY ENERGY AND ENVIRONMENT CABINET EXTERNSHIP**
Seminar in selected legal problems, as designated by the faculty.
Course Descriptions

LAW981 LONDON LAW: BRITISH LEGAL METHODS/SEMINAR. (3)
Students will be assigned a London barrister and will spend each Monday accompanying that barrister to court. They will maintain journals describing their experiences and will meet individually throughout the semester with their faculty supervisor. In addition, they will participate in a weekly seminar class, in which they will discuss legal ethics issues, British legal research methods, and the training of barristers and solicitors. The seminar will also feature guest speakers from the British legal profession, and students will take field trips to various local legal institutions. After the seminar, students will give oral presentations and submit seminar papers of legal topics growing out of their experiences. Successful completion of these requirements will result in a grade of “Pass”. Enrollment in the British Legal Methods/Seminar is limited to 16 students per semester. Students participating in the British Legal Methods/ Seminar are required to enroll in the one credit English Legal System course.

LAW982 LONDON LAW: ENGLISH LEGAL SYSTEM. (1)
This course will provide an introduction to the history and practice of the English legal system. The course will deal with the following topics: court structure, costs and legal aid, the judiciary, criminal procedure, the legal profession, structure of the U.K. Constitution, human rights in the U.K., justice, and the doctrine of precedent.

LAW983 LONDON LAW: LAW OF THE EUROPEAN UNION. (3)
The purpose of this course is to provide an introduction to the European Union Law. The course is divided into three parts, which examine the constitutional framework and constitutional principles of the EU, and some areas of substantive law. The first part of the course (constitutional framework) will consider the historical development of the EU, its institutions and law-making processes. The second part will examine the constitutional principles governing the EU, such as the supremacy of EU law over national law and mechanisms for its enforcement in the Member States (direct effect and liability of Member States for breach of the Community law). The third part will deal with some substantive areas of Union law, such as freedom of movement of goods, persons, establishment and services, non-discrimination, and antitrust, as well as the protection of intellectual rights.

LAW984 LONDON LAW: INTERNATIONAL HUMAN RIGHTS. (3)
This course will introduce the student to the established and developing legal rules, procedures, and enforcement mechanisms governing the protection of international human rights. It will address both liberal western and developing world notions of human rights as well as highlight recent examples of human rights controversies in all regions of the world. Special emphasis will be placed on the international human rights of women.

LAW985 LONDON LAW: CROSS-BORDER FINANCE. (3)
This will be an introductory course providing students with an understanding of how corporate finance transactions such as syndicated loans, derivatives, repos and securities lending are structured, negotiated and documented. Students will gain experience parsing and analyzing market standard documentation. It is intended for students that have an interest in a transactional practice, but little experience. After the course, students will appreciate how each of these transactions can be broken into common building blocks that most finance transactions share. Although large cross-border finance transactions will be studied, the concepts and principles discussed are applicable to any transactional practice.

LAW986 LONDON LAW: THE GLOBAL FINANCIAL CRISIS. (3)
This course will discuss the origins of the financial crisis, focusing primarily on the United States and the European Union. In particular, the efforts of regulators and policymakers will be explored in detail. Students will also explore the importance of international harmonization of regulatory regimes as capital markets become increasingly global. Finally, the course will discuss key principles and goals that should be guiding regulators and policymakers in their decisions.

LAW987 LONDON LAW: INTERNATIONAL EMPLOYMENT LAW. (3)
This course will include a study of individual employee rights in the workplace, as distinguished from the regulation of collective bargaining between management and unions. Coverage will include laws governing wages and hours, family and medical leave, fringe benefits, employee privacy, and protection from arbitrary firing. The course will compare approaches to these issues taken by the United States and selected countries. This course may be taken instead of, but not in addition to, LAW 910: Employment Law.

LAW988 LONDON LAW: COMPARATIVE LABOR LAW. (3)
This course will survey the legal regulation of union-employee relationships. Subjects include employee organizational rights, union collective action, the duty to bargain, enforcement of the collective bargaining agreement, grievance procedures and arbitration, and the union’s duty of fair representation. The course will compare approaches to these issues taken by the United States and selected other countries. This course may be taken instead of, but not in addition to, LAW 910: Labor Law.

LAW989 LONDON LAW: INTERNATIONAL AND COMPARATIVE INTELLECTUAL PROPERTY. (3)
This course will survey international law related to the international protection of intellectual property. The course will survey various international agreements and treaties for copyright, patent, and trademark, focusing on the Agreement on Trade Related Aspects of Intellectual Property (TRIPS) of the World Trade Organization. In addition to exploring the basic concepts of territoriality, national treatment, and minimum standards, we will consider political and policy concerns related to efforts to secure and strengthen protection of intellectual property around the world.

LAW990 LONDON LAW: LAW AND HUMAN BEHAVIOR. (3)
This course will explore the implications of recent social science research on human behavior for legal and legal decision-making. In the past few decades, new discoveries in psychology, cognitive science, neuroscience, and economics have challenged fundamental ideas about how people think and decide. We will consider their application to a variety of areas of law including criminal and civil law and jury decision-making. Topics will include happiness and hedonic psychology, the role of emotion and reason in decision-making, creativity, risk and prospect theory, and heuristics and biases. Throughout this course, we will explore the implications of recent efforts by the governments of France and Bhutan to encouragegreater domestic happiness. Students will write a series of short (2-3 page) analysis papers.

#LAW991 LONDON LAW: COMPLEX LITIGATION IN A COMPARATIVE CONTEXT. (3)
This course will examine principles and practical techniques relevant to complex civil cases. Building on Civil Procedure, the course will focus on litigation involving multiple parties and/or multiple jurisdictions. Among the topics to be considered will be complex joiner, multiparty, and multiplicity and causes of action, as well as the use of different forums for the resolution of disputes.

#LAW992 LONDON LAW: INTERNATIONAL AND COMPARATIVE FAMILY LAW. (3)
The objective of this course is to introduce students to the family law system in the United Kingdom, England, to issues of international legal practice and international human rights in family cases, and to legal instruments for the protection of children, including the U.N. Convention on the Rights of the Child, the Hague Convention on Intercountry Adoption. Classroom sessions will be supplemented by meetings with British barristers and solicitors practicing in these areas.

#LAW993 INTERNATIONAL ECONOMIC LAW AND INSTITUTIONS. (1)
The course will provide a survey of the three principal “global economic organizations”—that is, the International Monetary Fund, the World Bank, and the World Trade Organization—along with the key features of the international legal regime in which they operate. Building on that foundation, the course will examine several “legal practice problem sets” focusing on issues that legal professionals encounter in advising a range of clients. In addition, students will meet with local practitioners and visit legal institutions.

LIN Linguistics

#LIN209 THE STRUCTURE AND USE OF ENGLISH. (3)
A general survey of the history, structure, and use of the English language. Topics investigated include: the history of the English language; elements of the structure of English; the distinctive characteristics of spoken and written English and the varied registers of English; the diversity of the English lexicon; regional and social dialects of English and their representation in literature; and the ideological dimensions of English language use, especially those relating to social and political issues and controversies. Offers UK Core credit for Intellectual Inquiry in the Humanities. Fulfills ENG pre-major requirement and ENG minor credit. (Same as ENG 209.)

LIN210 HISTORY OF THE ENGLISH LANGUAGE. (3)
A survey of the historical development of English from its Indo-European origins to the present. Includes an investigation of the principal changes which have affected English phonology, morphology, syntax, semantics, and vocabulary, and of the ways in which these changes are reflected in contemporary English usage; and an examination of the socio-historical factors that have shaped the evolution of the English language. (Same as ENG 210.)

#LIN211 INTRODUCTION TO THE STUDY OF LANGUAGE. (3)
Designed to give students a broad introduction to the field of linguistics, the scientific study of human language. Part 1 offers a basic foundation in the study of grammar, introducing the five core components of human grammar: syntax, morphology, phonology and semantics. Part 2 builds upon this knowledge by surveying a number of subfields of linguistics, including historical linguistics, sociolinguistics, language acquisition, and language and the brain.

LIN212 INTRODUCTION TO LINGUISTICS II. (3)
This course is the second semester of a two-semester sequence introducing the study of Linguistics, the scientific study of human language as a system. This course focuses on the social aspects of linguistic study: Semantics, pragmatics, conversational interaction, language variation and register, dialects, linguistic aspects of sign languages, second language acquisition, and the acquisition of language by children. Prereq: ENG/LIN 211. (Same as ENG 212.)

#LIN221 INTRODUCTION TO LINGUISTICS: THEORETICAL FOUNDATIONS AND ANALYSIS. (3)
First of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Provides an intense and thorough introduction to the fundamental concepts of the field, including but not limited to: phonetics, phonology, morphology, syntax, and semantics. May be of use to students in other disciplines. Prerequisite for most 500 level LIN courses. Prereq: Declared major or minor in Linguistics, ENG/LIN 210, ENG/LIN 211, or approval of instructor. (Same as ENG 221.)
Course Descriptions

LIN 222 INTRODUCTION TO LINGUISTICS II: LANGUAGE IN CONTEXT. (3)
Second of two courses offered in the introductory linguistics sequence, designed for majors and minors in Linguistics. Builds upon the theoretical knowledge gained in LIN 221. Intense introduction to a number of branches of linguistics including historical linguistics, pragmatics, sociolinguistics, language acquisition, psycholinguistics. May be of use to students in other disciplines. Prereq: LIN 221 or ENG 221 or approval of instructor.

*LIN 310 AMERICAN ENGLISH. (3)
The study of the varieties of modern American English: regional, social, and ethnic varieties, gender differences in communication, creoles and pidgins, stylistic variation. History and methods of American dialect study. No prerequisites. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 310.)

LIN 317 LANGUAGE AND SOCIETY I (Subtitle required). (3)
This course will introduce students to various topics concerning the interaction between language use and social and cultural phenomena, including topics of language and cultural meaning, social segmentation and linguistic variation, bi- and multi-lingual communities, and the ethnography of communication. Course may be repeated under different subtitles to a maximum of six credits.

LIN 325 LANGUAGE AND CULTURE. (3)
This course is an introduction to linguistic anthropology. The course reviews the basic principles of linguistic analysis and examines the ways in which linguistic structures interact with and reflect cultural variation. (Same as ANT 325.)

*LIN 331 LANGUAGE IN U.S. SOCIETY. (3)
This course is an introduction to the linguistic diversity of the United States and the role of language in the production and negotiation of various forms of social difference (e.g., ethnicity, gender, region, etc.). Topics include, the role of language is the formation of social identity categories, social issues related to non-standard English dialects, and multilingualism in American society. Emphasis will be given to questions of power and resistance related to language use in the contexts of government, education and business.

LIN 395 INDEPENDENT WORK. (3)
Study of special problems in linguistics under the direction of an instructor in the linguistics program. Prereq: LIN 211; major and 3.0 in linguistics or consent of instructor.

LIN 500 PHONOETICS. (3)
This course examines the phonetics of natural language, including both the articulation and acoustics of speech sounds and suprasegmental units. Discussion includes extensive reference to languages other than English. Prereq: LIN 211 or equivalent.

LIN 505 LINGUISTIC MORPHOLOGY. (3)
This course examines word structure in natural language. It compares current theoretical approaches to the analysis of inflection, derivation, and compounding, and identifies the dimensions of typological variation in each of these domains. Discussion includes extensive reference to languages other than English. Prereq: LIN 211 or equivalent.

LIN 506 SOCIOLINGUISTICS. (3)
This course is an advanced survey of current areas of research in sociolinguistics. Topics include dialectology, language variation and change, interactional sociolinguistics, language and gender, bilingualism, and language contact. Prereq: LIN/ENG 211, ANT 220, SOC 101 or graduate standing. (Same as ANT/SOC 506.)

LIN 507 LINGUISTIC ANTHROPOLOGY. (3)
This course is an advanced survey of current areas of research in linguistic anthropology. Topics include language and thought, cultural differences in linguistic interaction, the ethnography of communication, ritual uses of language, language and identity and cultural poetics. Prereq: LIN/ENG 211, or ANT 220, or consent of instructor. (Same as ANT 507.)

LIN 508 DISCOURSE ANALYSIS. (3)
This course is an introduction to the methods used in various approaches to discourse and textual analysis. The approaches examined include Speech Act Theory, Conversation Analysis, Ethnographic Discourse Analysis, Discourse Pragmatics, Interactional Sociolinguistics, Variation Analysis, and Critical Discourse Analysis. Special attention is given to practical experience analyzing both spoken and written discourse. Prereq: LIN/ENG 211 or consent of instructor. (Same as SOC 508.)

LIN 509 SEMANTICS AND PRAGMATICS. (3)
This course will explore the concepts and range of meaning in language. We will study the nature of meaning in words, how we convey meaning in sentences and what factors, other than lexical definitions, play a role in how we intend and interpret meanings. We will trace the study of meaning as it developed over the 20th and 21st centuries. The course begins with an introduction to word and sentence meaning followed by a detailed study of seminal approaches to sentence semantics. We will also examine pragmatics, meaning in language use, to explore how it varies from the semantic content of the sentence. Prereq: LIN 211.

LIN 510 COMPUTATIONAL LINGUISTICS. (3)
Computational linguistics addresses the problem of ‘information overload’, the result of huge advances in processing speeds and memory size. This course shows the methods and techniques for automatically analyzing and modeling natural language data in order to redress the balance of information acquisition and information analysis, turning information into knowledge. The focus will be word-based, sentence-based and meaning-based computational approaches. Students will have the opportunity to practically apply their theoretical knowledge to a computer environment. Computer languages used will be Python and DART, as well as some basic UNIX-based scripting languages. No experience with computers is necessary. By the end of the course students will have acquired a host of transferable skills for an increasingly digitally dominated job market. Prereq: LIN/ENG 211.

*LIN 512 ANALYSIS OF ENGLISH SYNTAX. (3)
Contemporary approaches to the syntactic analysis of Modern English; particular attention is devoted to Chomskyan syntactic theory. Prereq: ENG/LIN 221 or equivalent, or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as ENG 512.)

*LIN 513 TEACHING ENGLISH AS A SECOND LANGUAGE. (3)
The course examines the current theories and methods of teaching English as a second language. The course will include (1) language learning theory as it relates to other disciplines; (2) methods and techniques of comparative analysis. Prereq: One course in linguistics or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/ENG 513.)

LIN 514 TESL MATERIALS AND METHODS. (3)
An extension to ENG/EDC 513, this course will include examination and evaluation of published materials designed for teaching English to speakers of other languages. Students will create individualized teaching materials and gain practical experience in applying the methods and using the materials. Prereq: ENG/EDC 513 or consent of instructor. Provides ENG Major Elective credit and ENG minor credit. (Same as EDC/ENG 514.)

LIN 515 PHONOLOGICAL ANALYSIS. (3)
This course is an investigation of the systematic properties of speech sounds in natural languages. It compares current theoretical approaches to the analysis of individual features and sounds as well as larger prosodic units, and identifies the dimensions of typological variation in the phonological domain. Discussion includes extensive reference to languages other than English. Prereq: ENG/LIN 211 or equivalent. (Same as ANT 515.)

LIN 516 GRAMMATICAL TYPOLÓGY. (3)
This course examines the typological classification of languages according to their morphological and syntactic characteristics. Course work includes practical training in the writing of grammatical descriptions and in the elicitation, transcription, and analysis of data from a non-Western language. Discussion includes extensive reference to languages other than English. Prereq: ENG/LIN 211 or equivalent. (Same as ANT 516.)

LIN 517 SPECIAL TOPICS IN LINGUISTICS (Subtitle required). (3)
The focus will be on intensive study of problems and issues that do not fall under linguistics course headings. These may have an interdisciplinary emphasis, or they may concentrate on some special topics of current research. All topics will be subject to review by the director of the program. May be repeated under different subtitles to a maximum of six credits. Prereq: Consent of instructor.

LIN 518 ADVANCED HISTORY OF THE ENGLISH LANGUAGE. (3)
This course explores the development of English from its roots in Indo-European, through Old, Middle, and Early Modern English(es), culminating with a review of the English languages of today. It focuses on the phonological, grammatical, and lexical changes of the language, as well as on the social contexts of the rise and spread of English as a contemporary world language. Special emphasis is given to a linguistically informed understanding of how the language has changed in response to political and historical pressures. (Same as ENG 518.)

LIN 519 HISTORICAL LINGUISTICS. (3)
This course studies the historical development of language through time and space, examining the internal mechanisms and external influences involved in language change. Change will be examined at all levels: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The course will also investigate a variety of topics related to the phenomena of language change: language classification; comparative linguistics; the reconstruction of linguistic systems; the social context of language change. Through study of these issues, students will gain insights into historical language varieties and writing systems; relationships among the world’s languages; and the origins of the sounds, words, and structures of the languages we speak today. Prereq: LIN 211. (Same as ANT 519.)

LIN 520 SANSKRITI. (3)
An introduction to the Sanskriti language. Includes a historical survey of the language; detailed study of the devanagari writing system and of Sanskriti phonology and grammar; a recitation component; and the reading of Sanskriti texts. Prereq: Completion of the fourth semester of a foreign language.

LIN 521 SANSKRITI. (3)
A continuation of LIN 520. Includes intensive study of the relationship of Sanskriti to other early Indic languages (especially Vedic and Pali), discussion of the Indo-European ancestry of these languages; and the reading of selected texts in these languages. Prereq: LIN 520.
LIN601 RESEARCH METHODS IN LINGUISTICS. (3) Students pursuing an MA degree in Linguistic Theory & Typology (MALTT) must be equipped with a toolbox of suitable methods for gathering, analyzing, and modeling linguistic data. This course introduces a range of research methods which are widely applicable in scientific investigation but whose linguistic relevance we shall emphasize here. The methods are (1) statistical analysis, (2) computational modeling, (3) field work and (4) experimental techniques. Overarching all these methods is the scientific method of enquiry, a recursive and cumulative process of gathering data and building, testing, and refining hypotheses, and interpreting all results. Some of the questions that students will learn how to answer are: Are my data collection methods sufficiently rigorous? Are the results of my data analysis statistically significant? Does my hypothesis control for variables? Is my hypothesis computationally tractable? Are my methods and their results replicable? The course also introduces students to major primary and secondary resources for linguistic research, including the principal bibliographic and indexing services, leading professional journals, major disciplinary organizations, significant traditional and online collections of linguistic data, etc. These resources will be discussed for each of the disciplinary strengths represented in the MALTT program. Prereq: LIN 211 or equivalent.

LIN612 STRUCTURE AND STYLISTICS OF FRENCH. (3) A study of the history and structure of French with an emphasis on contemporary features. (Same as ENG/FR 612.)

LIN617 ADVANCED TOPICS IN LINGUISTICS. (3) Advanced investigation into a designated topic in linguistic theory and typology. May be repeated to a maximum of twelve credits under different subtitles. Prereq: A course in cognitive field at the LIN 500 level or equivalent, or by discretion of the DGS.

#LIN619 HISTORICAL SOCIOLINGUISTICS. (3) This course investigates language variation and change in its socio-historical context, focusing on the effects of such parameters as age, gender, education, social class, and region on the historical development of language through time and space. The effects of socio-historical variables will be examined at all levels of historical language variation and change: orthographic, phonetic, phonological, morphological, syntactic, semantic, and lexical. The notions of “standard language” and “language standardization” will also be addressed from a historical sociolinguistic perspective. Prereq: LIN 221 and LIN 222 or equivalent, or consent of instructor, (LIN 506 and 519 recommended).

LIN701 RESEARCH SEMINAR IN LINGUISTIC THEORY AND TYPOLOGY. (3) Students are trained in research and professionalization related to the discipline of linguistics. To that end students will create a 20-30 page research report as a culmination of a set of training milestones that include (1) producing an annotated bibliography, (2) writing an abstract, (3) reflecting on good practice in linguistics research, (4) publicly presenting research, and (5) reflecting on professional aspects of linguistics. Prereq: Second-year standing in the MA program in Linguistic Theory & Typology, LIN 601.

LIN748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work towards the degree must be completed.

LIS Library and Information Science

LIS510 CHILDREN’S LITERATURE AND RELATED MATERIALS. (3) A survey of children’s literature, traditional and modern. Reading and evaluation of books with multimedia materials with emphasis on the needs and interests of children. Covers media for use by and with children from preschool through grade six.

LIS514 LITERATURE AND RELATED MEDIA FOR YOUNG ADULTS. (3) A study of literature and related materials for use with young people in grades 6-12. Emphasis is placed on the special characteristics and needs of young people and the evaluation of materials for this age group.

LIS600 INFORMATION IN SOCIETY. (3) An introduction to the nature of information (both utilitarian and aesthetic) in contemporary society, and to the role played by libraries and other information organizations in disseminating that information. Emphasis is on developing perspective.

LIS601 INFORMATION SEEKING. (3) This course provides an overview of the theory and practices of human information seeking behavior, including both basic models to understand user behavior, and techniques to effectively select, locate, evaluate, and use information to meet diverse information needs and facilitate human-computer interaction.

LIS602 INFORMATION REPRESENTATION AND ACCESS. (3) This course provides an introduction to principles and practices of information description, organization, access, and retrieval by examining the representation of information through metadata records, indexes, and abstracts, as well as the operations, standards, tools, systems of categorization, bibliographic systems and methods of organizing and retrieving information sources.

LIS603 MANAGEMENT IN LIBRARY AND INFORMATION SCIENCE. (3) An introduction to the basic elements of management and how these are applied to the effective administration of information systems. Focus will be placed on two major roles in a system, the person who is supervised as well as the manager or supervisor. Examination of the functions of planning, organization, staffing and controlling as well as the theories of management and the effective use of these in an information system.

LIS604 LIBRARY AND BOOK HISTORY. (3) Development of libraries and books from earliest time to the present with special reference to their relationship to contemporary social, economic, cultural and political trends. Emphasis is given to American library and book history.

LIS605 INFORMATION POLICY AND TECHNOLOGY REGULATION. (3) This course explores the socio-cultural, economic and political issues confronting communication and information professionals and the transformative impact of these issues on information policy development. The rapidly evolving communication and information infrastructure and the global shift to an information society will provide the context for the course. Within this context, emphasis will be placed on issues of access, which includes, universal service, intellectual freedom, intellectual property rights, privacy, security, advocacy, equity, and the role of library and information professionals and organizations in policy formulation.

LIS608 METHODS OF RESEARCH IN LIBRARY AND INFORMATION SCIENCE. (3) Basic tools, techniques and methods of research. Consideration is given to the role and purpose of research in library and information science and its relationship to research in other disciplines. Includes critical evaluation of current research in library and information science and the development of a research proposal. Prereq: LIS 601, LIS 602 or consent of instructor.

LIS609 CURRENT PROBLEMS IN LIBRARY AND INFORMATION SCIENCE. (3) A seminar which examines current philosophical and managerial issues in library and information science. Focus is on the analysis, origins, evaluation and current status of these issues. Prereq: Eighteen hours of graduate study in LIS or consent of instructor.

LIS610 LIBRARY MATERIALS AND LITERATURE FOR CHILDREN. (3) A survey and historical study of library materials and literature for children up to grade 6. Students will engage in extensive reading, and in the evaluation of books and some multimedia materials. Basic programming will be explored.

LIS611 CRITICAL ANALYSIS OF CHILDREN’S LITERATURE. (3) Advanced study of book evaluation, literary criticism, children’s book publishing, awards, and current trends in the field. Individual projects require extensive critical reading. Prereq: LIS 610 or LIS 614 or consent of instructor.

LIS613 INFORMATION RESOURCES AND SERVICES FOR CHILDREN. (3) A study of effective programming for children and young adults. Emphasis is placed on oral presentations. Literature-based activities and community outreach. Prereq: LIS 510 or consent of instructor.

LIS614 LIBRARY MATERIALS AND LITERATURE FOR YOUNG ADULTS. (3) A study of library and related materials for use with young people in grades 7-12. Emphasis is placed on the special characteristics and needs of young adults and the evaluation of materials for this age group.

LIS615 PROSEMINAR IN COMMUNICATION AND INFORMATION SYSTEMS. (3) This course is an introductory graduate-level survey of theory and research on human communication mediated by communication and information technologies. The course is designed to cover the areas not typically addressed in traditional courses of mass or interpersonal communication, including theory and research on the use of computers and electronic communication over a variety of communication and information systems. Prereq: Graduate standing or consent of instructor. (Same as CJT 615.)

LIS622 SOCIAL SCIENCE INFORMATION. (3) Examination of important issues and developments relating to creation, packaging, dissemination and use of social science information by various segments of society. Emphasis on understanding information needs of those who use social science information and information systems, source and services available to satisfy those needs. Prereq: LIS 601 or consent of instructor.

*LIS623 ADVANCED REFERENCE SERVICES. (3) This course provides advanced study of the theory and practice of information services, which are defined broadly as the activities in which information professionals engage to connect people to the information they need, including information needs assessment, direct information provision, information literacy instruction, and intermediation for all stages of the information search process. Emphasis is placed on the structure of information, information seeking, and information sources within disciplines. Students will be prepared to help advanced users define and negotiate their information needs, navigate user-system interfaces, formulate effective search strategies for information retrieval, and evaluate and select information. Ethical issues in information services are also considered. Prereq: LIS 601, LIS 622.
University of Kentucky

Healthcare community and their information needs, information resources in the health sciences, and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and can use this as a foundation for further education, training, and work in health information professions. (Same as CJT 639.)

LIS 630 INFORMATION RETRIEVAL. (3)
This course reviews important information retrieval (IR) theories and models; explores a brief history of IR research; and examines various IR applications. Students will get familiar with IR foundations such as document indexing or query expansion/optimization strategies, as well as some IR architectures for IR systems. Students will explore how to analyze and compare IR systems, how to select the best IR systems for particular tasks and how to design a prototype for an efficient IR system. Prereq or concur: LIS 636 or LIS 637 or LIS 638.

LIS 631 INFORMATION ARCHITECTURE. (3)
The course introduces the concepts and practices of information architectures (IA) for a Web site within the context of the organization it serves. It aims to acquaint students with principles and processes of an information architecture for use in the design of websites. It also provide students the opportunity to develop practical skills related to the design of information organization and navigation systems. The course prepares students for the companion technical course of “content management systems” where they will apply the theories and techniques studied in this course to the implementation of a fully functional website.

LIS 632 FOUNDATIONS OF INFORMATION TECHNOLOGY. (3)
A study of the computing fundamentals necessary for the understanding and use of information technology. Focus is on examining computer systems in concept and practice, which is essential to information professionals. Topics include how computers represent and retrieve information; how operating systems control these processes, interpret commands, present the user interface, and run applications; how databases are designed and created; how general understanding of programming processes and productivity software skills is important in a variety of professional contexts. Productivity applications include the Office suite, Internet applications and web publishing, and database management systems.

LIS 637 INFORMATION TECHNOLOGY. (3)
Study of computer and communication technology used in modern information storage and retrieval systems. Consideration also given to managing microcomputer services, hardware development and evaluation, and system security. Prereq: Consent of instructor. (Same as CJT 637.)

LIS 638 INTERNET TECHNOLOGIES AND INFORMATION SERVICES. (3)
A course examining the structure, development and evolution of the Internet; network protocols and client/server architecture issues, Web page design, authoring, and evaluation; the use of the Internet as an information storage and retrieval system; recent advances in HTML and scripting languages; and Internet related social issues such as censorship and copyright. Prereq: LIS 636 or consent of instructor. (Same as CJT 638.)

LIS 639 INTRODUCTION TO MEDICAL INFORMATICS. (3)
This course is designed to introduce the interdisciplinary field of medical informatics to health information professionals. Medical Informatics is a developing field that essentially seeks to apply information and computing technologies to improve all aspects of healthcare, including patient care, research, and education. During the semester we will explore a number of topics central to understanding the field, including: the nature of biomedical information, the electronic medical record, the role of information and computing technologies to support clinical decision making, healthcare and informatics standards, information retrieval, system analysis and technology assessment, and essential issues of information technology in medical education and medical ethics. By the end of this Web-based course, students are expected to be able to understand broad aspects of the field and can use this as a foundation for further education, training, and work in health information professions. (Same as CJT 639.)

LIS 640 HEALTH INFORMATION RESOURCE SERVICES. (3)
A survey of information agencies and health science libraries, including topics related to: the healthcare community and their information needs, information resources in the health sciences, controlled medical terminologies and classification systems, search and retrieval of information resources, issues in the management of collections and access to health libraries. (Same as CJT 640.)

LIS 641 LAW LIBRARIANSHIP. (3)
A study of the materials of legal research and reference work. Emphasis is placed on the methods of legal research and the actual use of legal materials in the solution of practical reference problems. The selection, cataloging, classification, and storage of materials in a law collection are considered. The specialized requirements of law librarianship and law library administration are treated. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 642 ORAL HISTORY. (3)
This course is an introduction to oral history as a research methodology and its role in library and archives collections. It is designed for persons intending to conduct oral history interviews to expand library and archival collections. It is also for persons responsible for the archival management of oral history collections. The course examines how oral history projects are initiated, how projects are administered, how interviews are conducted, and how oral history interviews are preserved and made available to researchers. The course will also explore the use of technology in making oral histories available to researchers on the Web. Students will gain practical experience in oral history interviewing and related aspects of oral history, such as transcribing, editing, and publishing oral histories. Taught essentially same as EPF 669.

LIS 643 ARCHIVES AND MANUSCRIPTS MANAGEMENT. (3)
This course is designed to cover the management, care, and servicing of manuscript and archival material. Attention will also be given to criteria for building an archival/manuscript collection in a repository and to the description and interpretation of its holdings in guides and catalogs for the use of researchers. Prereq: LIS 602 or consent of instructor.

LIS 644 ADMINISTRATION OF SCHOOL LIBRARY MEDIA CENTERS. (3)
Examines the philosophy behind current national and state guidelines for library media programs and addresses the roles of library media professionals in program and resource management in the K-12 school setting. Students will work on their individual exit portfolios and plan a practicum experience to meet requirements for performance-based certification by the Kentucky Department of Education. Prereq: May be taken concurrently with last requirements or following completion of all requirements (with the exception of LIS 676) for certification as school media librarian.

LIS 645 PUBLIC LIBRARIES. (3)
Examines historical development of the public library and its roles in society. Topics considered include the environment of public library organizations and management; information needs of client groups; information resources and services provided to clients; and trends developments in public libraries. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 646 ACADEMIC LIBRARIES. (3)
Examines historical development of academic libraries and their roles in higher education. Topics considered include the environment of academic libraries, organization and management needs of client groups, information resources and services provided clients; and issues, trends, and developments in academic libraries. Prereq: LIS 601 and LIS 602 or consent of instructor.

LIS 647 CURRENT TRENDS IN SCHOOL MEDIA CENTERS. (3)
An intensive study of trends in school media centers with emphasis on research, technology, and the role of the school media specialist in the school curriculum.

LIS 648 TECHNOLOGY IN THE SCHOOL MEDIA CENTER. (3)
Consideration of new and emerging educational technologies that could be integrated into school curriculum and classroom hands-on experiences as well as critical reading and discussion on current issues relating to educational technology and the role of the media specialist in technology integration.

LIS 650 TECHNICAL PROCESSING SYSTEMS. (3)
A survey of manual and computer-based technical processing systems in libraries. Consideration given to circulation, acquisitions, cataloging and serial control systems. Trends and developments in technical processing, files and records management, and technical processing procedures and activities are examined. Prereq: LIS 602 or consent of instructor.

LIS 653 PRESERVATION MANAGEMENT. (3)
Considers the many facets of paper, non-print, and digital preservation with the aim of expanding library and archival collections. The course examines how oral history projects are initiated, how projects are administered, how interviews are conducted, and how oral history interviews are preserved and made available to researchers. The course will also explore the use of technology in making oral histories available to researchers on the Web. Students will gain practical experience in oral history interviewing and related aspects of oral history, such as transcribing, editing, and publishing oral histories. Taught essentially same as EPF 669.

LIS 655 ORGANIZATION OF KNOWLEDGE. (3)
Theories and practice of bibliographic description and subject analysis. Covers the organization of both print and electronic information, including use of Anglo-American Cataloging Rules, Dewey Decimal Classification, Library of Congress Classification and Library of Congress Subject Headings. Prereq: LIS 602 or consent of instructor.

LIS 656 ORGANIZATION OF KNOWLEDGE. (3)
In-depth coverage of the theories and practice of bibliographic description and subject analysis. Covers the organization of both print and electronic information and authority control. Emphasis is on problems in practice, special case studies, current issues and future trends of description, subject analysis and online authority control. Prereq: LIS 655, or consent of instructor.
**Course Descriptions**

**LIS 658K KNOWLEDGE MANAGEMENT.** (3)
Organizational knowledge is a valuable strategic asset. Knowledge management refers to the systematic management of an organization's knowledge assets so that they can be leveraged for sustainable advantage. This course examines how knowledge is created, captured, organized, diffused, and implemented in an organization. Topics covered include knowledge management processes and practices, corresponding technologies, collaboration tools, and people and cultural issues.

**LIS 659 COLLECTION DEVELOPMENT.** (3)
Intelectual and administrative aspects of building, maintaining and evaluating library collections. Topics include: library cooperation; national standards; the writing and implementation of collection policies; strategies of selection and evaluation; contemporary publishing and the book trade.

**LIS 665 INTRODUCTION TO DIGITAL LIBRARIES.** (3)
This course focuses on the theoretical, technological, human factors and evaluative components of digital library (DL) research and practice. Students will read and discuss literature on DLs, review existing technologies and proof-of-concepts implementation projects, and work as a group to develop a prototype but operational DL. This course is foundational for students wishing to engage seriously in the world of digital librarianship. Prereq: LIS 602, LIS 636.

**LIS 668 INFORMATION SYSTEMS DESIGN.** (3)
Study of concepts and methods of information system design and development with particular relevance to library and information center applications. Emphasis is given to modeling of system functions, data, and processes of computer-based information systems including the development of small scale information systems. Prereq: LIS 636 or consent of instructor. (Same as CJT 668.)

**LIS 672PRACTICUM.**
Practicum in a library or other information related organization. Student assumes entry level professional duties and responsibilities in an operational setting under the close supervision of an information professional. Requires minimum of 160 hours of experiential learning, and the completion of a multimedia presentation/portfolio under the direction of the course coordinator. Prereq: Completion of 18 hours of graduate work in library and information science and consent of course coordinator.

**LIS 676 SCHOOL MEDIA PRACTICUM.** (1-12)
Supervised experience at the elementary and secondary levels in school library media centers. Required for students seeking certification as school media librarians in Kentucky. Experience will be under the joint supervision of college faculty and cooperating media librarians. Prereq: Admission to Teacher Education Program and consent of instructor.

**LIS 690 SPECIAL TOPICS IN LIBRARY AND INFORMATION SCIENCE.** (1-3)
Intensive study of one aspect of library and information science under the leadership of an authority in the area.

**LIS 695INDEPENDENT STUDY IN LIBRARY AND INFORMATION SCIENCE.** (3)
Opportunities for directed study in subjects or problems of interest to a student. Observation and research required, and a written report describing the work accomplished. Prereq: Consent of instructor.

**LIS 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**LIS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.** (1-6)
May be repeated to a maximum of 12 hours.

### MA Mathematics

**MA 108R INTERMEDIATE ALGEBRA.** (3)
This course is remedial in nature and covers material commonly found in second year high school algebra. Specific topics to be discussed include numbers, fractions, algebraic expression, simplifying, factoring, laws of exponents, linear equations, simple graphs and polynomial algebra. This course is not available for degree credit toward a bachelor’s degree. Credit not available on the basis of special examination. Prereq: One year of high school algebra. Recommended for students with a Math ACT score of 18 or less, or consent of department.

**MA 109 COLLEGE ALGEBRA.** (3)
Selected topics in algebra. Develops manipulative algebraic skills and mathematical reasoning required for further study in mathematics. Includes brief review of basic algebra, quadratic formula, systems of linear equations and inequalities, introduction to functions and graphing. This course is not available for credit to persons who have received credit in advanced high school mathematics. Prereq: Two years of high school algebra and a Math ACT score of 21 or above or a Math SAT score of 510 or above; or MA 108R, or appropriate score on the math placement test or grade C or better in MA 111.

**MA 110A ALGEBRA AND TRIGONOMETRY FOR CALCULUS.** (4)
This is a course specifically designed for students intending to enroll in a calculus sequence. Topics will include trigonometric functions, exponentials and logarithms, graphs, polar coordinates, and conic sections. Students may not receive credit for MA 110 or MA 112. This course is not available for credit to students who have received credit in any higher numbered mathematics course except for MA 123, 162, 201 or 202. Credit is not available by special examination. Note: Math placement exam recommended. Lecture, three hours; recitation, two hours per week. Prereq: Two years of high school algebra and a Math ACT score of 23 or above, or appropriate score on math placement exam, or consent of department.

**MA 111 INTRODUCTION TO CONTEMPORARY MATHEMATICS.** (3)
An introduction to concepts and applications of mathematics, with examples drawn from such areas as voting methods, apportionment, consumer finance, graph theory, tilings, polyhedra, number theory, and game theory. This course is not available for credit to persons who have received credit in any mathematics course of a higher number with the exceptions of MA 112, 123, 162, 201 and 202. This course does not serve as a prerequisite for any calculus course. Credit is not available on the basis of special examination. Prereq: Two years of high school algebra and a Math ACT score of 19 or above, or MA 108R, or math placement test.

**MA 112 TRIGONOMETRY.** (2)
A standard course. Includes trigonometric functions, identities, multiple-angle formulas, laws of sines and cosines, and graphs of trigonometric functions. This course is not available to persons who have received credit for any mathematics course of a higher number with the exception of MA 112, 123, 162, 201 and 202. Prereq: MA 110 and MA 112, or MA 110, or consent of the department. Students who enroll in MA 113 based on their test scores should have completed a year of pre-calculus study in high school that includes the study of the trigonometric function. Note: Math placement test recommended.

**MA 114 CALCULUS I.** (4)
A second course in Calculus. Applications of the integral, techniques of integration, convergence of sequence and series, Taylor series, polar coordinates. Lecture, two hours; recitation, two hours per week. Prereq: A grade of C or better in MA 113, MA 137 or MA 132.

**MA 123 ELEMENTARY CALCULUS AND ITS APPLICATIONS.** (4)
An introduction to differential and integral calculus, with applications to business and the biological and physical sciences. Not open to students who have credit in MA 113 or MA 137. Note: Math placement test recommended. Prereq: Math ACT score of 26 or above, or Math SAT of 600 or above, or MA 109, or appropriate math placement score, or consent of department.

**MA 132 CALCULUS FOR THE LIFE SCIENCES.** (3)
Introduction to integral calculus, integration of logarithmic and exponential functions. Applications to the life sciences including biochemical rates and reactions and radioactive decay. An introduction to biological models and their associated differential equations. Prereq: MA 123 or consent of instructor.

**MA 137 CALCULUS WITH LIFE SCIENCE APPLICATIONS.** (4)
A first course in one-variable calculus. Derivatives and integrals of elementary functions (including the trigonometric functions) with applications to the life sciences. Lecture, three hours; recitation, two hours per week. Prereq: MA 113 and MA 137. Note: Math placement test recommended. Prereq: Math ACT score of 27 or above, or Math SAT of 620 or above, or MA 109, or MA 110, or consent of the department. Students who enroll in MA 137 based on their test scores should have completed a year of pre-calculus study in high school that includes the study of trigonometric function.

**MA 138 CALCULUS WITH LIFE SCIENCE APPLICATIONS.** (4)
A second course in calculus. Techniques of integration, introduction to differential equations, geometry and differential calculus in several dimensions. Students may not receive credit for MA 114 and MA 138. Prereq: Grade of “C” or better in MA 113, MA 132 or MA 137.

**MA 162 FINE MATHEMATICS AND ITS APPLICATIONS.** (4)
Finite mathematics with applications to business, biology, and the social sciences. Linear functions and inequalities, matrix algebra, linear programming, probability. Emphasis on setting up mathematical models from stated problems. Prereq: MA 109 or equivalent.

**MA 193 SUPPLEMENTARY MATHEMATICS WORKSHOP I: (Subtitle required).** (1-2)
Laboratory offered (only) as an adjunct to certain mathematics lecture courses. Offered only on a pass/fail basis. Coreq: Set by instructor.

**MA 194 SUPPLEMENTARY MATHEMATICS WORKSHOP II: (Subtitle required).** (1-2)
Laboratory offered (only) as an adjunct to certain mathematics lecture courses. Offered only on a pass/fail basis. Coreq: Set by instructor.
MA 201 MATHEMATICS FOR ELEMENTARY TEACHERS. (3)
Sets, numbers and operations, problem solving and number theory. Recommended only for majors in elementary and middle school education. Prereq: MA 109 or MA 111 or consent of department.

MA 202 MATHEMATICS FOR ELEMENTARY TEACHERS. (3)
Algebraic reasoning, introduction to statistics and probability, geometry, and measurement. Prereq: A grade of "C" or better in MA 201. Also recommended: a course in logic (e.g. PHI 120) or a course in calculus (e.g. MA 123).

MA 213 CALCULUS III. (4)
A course in multi-variable calculus. Topics include vectors and geometry of space, three-dimensional vector calculus, partial derivatives, double and triple integrals, integration on surfaces, Green's theorem. Optional topics include Stokes' theorem and the Gauss' divergence theorem. Lecture, three hours; recitation, two hours per week. Prereq. MA 114 or 138 or equivalent.

MA 214 CALCULUS IV. (3)
MA 214 is a course in ordinary differential equations. Emphasis is on first and second order equations and applications. The course includes series solutions of second order equations and Laplace transform methods. Prereq: MA 213 or equivalent.

MA 241 GEOMETRY FOR MIDDLE SCHOOL TEACHERS. (3)
A course in plane and solid geometry designed to give middle school mathematics teachers the knowledge needed to teach a beginning geometry course. Cannot be counted toward the mathematics minor or major. Prereq: One semester of calculus or MA 201 with a grade of C or better.

MA 261 INTRODUCTION TO NUMBER THEORY. (3)
Topics from classical number theory, including discussions of mathematical induction, prime numbers, division algorithms, congruences, and quadratic reciprocity. Prereq: Grade of C or better in MA 114 or consent of instructor.

MA 280 MATHEMATICAL PROBLEM SOLVING FOR MIDDLE SCHOOL TEACHERS. (3)
Heuristics of problem solving. Practice in solving problems from algebra, number theory, geometry, calculus, combinatorics, and other areas. Primarily for middle school teachers. This course may not be counted towards a mathematics major or minor. Prereq: MA 123 or MA 113 or MA 137 or consent of the instructor.

MA 310 MATHEMATICAL PROBLEM SOLVING FOR TEACHERS. (3)

MA 320 INTRODUCTORY PROBABILITY. (3)
Set theory; fundamental concepts of probability, including conditional and marginal probability; random variables and probability distributions (discrete and continuous); expected values and moments; moment-generating and characteristic functions; random experiments; distributions of random variables and functions of random variables; limit theorems. Prereq. MA 213 or equivalent. (Same as STA 320.)

MA 321 INTRODUCTION TO NUMERICAL METHODS. (3)

MA 322 MATRIX ALGEBRA AND ITS APPLICATIONS. (3)

MA 327 STRATEGIC DECISION MAKING: AN INTRODUCTION TO GAME THEORY. (3)
The course is an introduction to strategic decision making and game theory. Ideas such as Nash equilibrium, dominant strategies, evolutionary stability, and asymmetric information are applied to a variety of strategic decision making problems taken from economics, computer science, politics, and biology. Prereq: A grade of B or better in MA 113 or MA 132 or MA 137 or consent of department. Students should have a strong background in first semester calculus. (Same as ECO 327.)

MA 330 HISTORY OF MATHEMATICS. (3)
A survey of the development of mathematics. Topics may include: the Egyptians and Babylonians, mathematics of the Greek Classical Age, Euclid and the Alexandrian School, the Renaissance, Fermat and the beginning of calculus, the work of Newton and Leibniz, nineteenth century geometry, analysis and set theory. Prereq. MA 114.

MA 340 APPLICABLE ALGEBRA. (3)
Topics include: Euclid's algorithm, unique factorization moduli arithmetic, Fermat's and Euler's theorems, Chinese remainder theorem, RSA public key encryption, Pollard rho factoring, pseudo primes, error correcting codes, Hamming codes, polynomial rings and quotient rings, field extensions, finite fields and BCH codes. Prereq. MA 322 or MA 213. (Same as CS 340.)
MA 481G DIFFERENTIAL EQUATIONS. (3)

The fundamental goal is to cover those mathematical theories essential to the study of quantum mechanics (physics and mathematics students) and the qualitative and quantitative study of partial differential equations, especially the partial differential equations of mathematical physics (engineering graduate students). The course encompasses the following topics: uniform convergence, Picard’s existence proof, Power series techniques, regular singular point theory, Bessel’s equation, Legendre, Hermite and Chebychev polynomials, Orthogonal Functions, completeness, convergence in the mean, Sturm-Liouville theory, eigenvalues, eigenfunction expansions, Sturm comparison and oscillation theorems. Separation of variable techniques for the heat, wave, and Laplace’s equation. Prereq: One of MA 432G, MA 471G or equivalent, or consent of instructor.

MA 483G INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS. (3)

MA 483G is essentially an introductory course in partial differential equations designed to prepare undergraduate mathematics majors for serious work in partial differential equations and to provide Ph.D. candidates in engineering and science with an introduction to partial differential equations which will serve as a foundation for their advanced numerical and qualitative work (e.g., in computational fluid dynamics.) The course encompasses the following topics: first order linear equations, characteristics, Laplace’s equation, wave equation and heat equation, boundary value problems, Fourier series, Green’s identities and Green’s functions, general eigenvalue problems. Prereq: One of MA 432G, MA 471G, MA 481G, or equivalent, or consent of instructor.

MA 485G FOURIER SERIES AND BOUNDARY VALUE PROBLEMS. (3)

An introductory treatment of Fourier series and its application to the solution of boundary value problems in the partial differential equations of physics and engineering. Orthogonal sets of functions, Fourier series and integrals, solution of boundary value problems, theory and application of Bessel functions and Legendre polynomials. Prereq: MA 432G or equivalent. (Same as EM/ME 585.)

MA 501, 502 SEMINAR IN SELECTED TOPICS. (3 ea.)

Various topics from the basic graduate courses. Designed as a course for teachers of lower division mathematics and usually offered in combination with a summer institute. May be repeated to a maximum of six credits. Prereq: Teaching experience in the field of mathematics and consent of instructor.

MA 506 METHODS OF THEORETICAL PHYSICS I. (3)

The course and its sequel (MA/PHY 507) are designed to provide, for first-year graduate students, familiarity with the mathematical tools useful in physics. Topics include curvilinear coordinates, infinite series, integrating and solving differential equations of physics, and methods of complex variables. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included as a part of MA/PHY 506 and 507. Prereq: PHY 404G or equivalent. (Same as PHY 506.)

MA 507 METHODS OF THEORETICAL PHYSICS II. (3)

Continuation of MA/PHY 506. Fourier and Laplace Transforms, the special functions (Bessel, Elliptic, Gamma, etc.) are described. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included as a part of MA/PHY 506 and 507. Prereq: MA/PHY 506. (Same as PHY 507.)

MA 514 COMBINATORIAL STRUCTURES AND TECHNIQUES. (3)

An introduction to fundamental structures and techniques in combinatorics, including such topics as graphs, trees, matchings, matchings, hypergraphs, partially ordered sets, extremal set theory, flows in networks, and the principle of inclusion/exclusion. Prereq: MA 322 and one additional upper division math course or consent of instructor.

MA 515 LINEAR AND COMBINATORIAL OPTIMIZATION. (3)

Mathematical and computational aspects of linear programming and combinatorial optimization. Linear optimization is introduced by presenting solution techniques (primal and dual simplex) and studying geometric properties and duality for linear systems of inequalities. Aspects of combinatorial optimization, including trees, paths, flows, matchings, and matroids, and the corresponding algorithms are presented. Prereq: A course in linear algebra or consent of instructor. (Same as STA 515.)

MA 522 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA. (3)

MA 533 PARTIAL DIFFERENTIAL EQUATIONS. (3)

Elementary existence theorems, equations of first order, classification of linear second order equations, the Cauchy and Dirichlet problems, potential theory, the heat and wave equations, Green’s and Riemann functions, separation of variables, systems of equations. Prereq: MA 532 and MA 472G or equivalent.

MA 537 NUMERICAL ANALYSIS. (3)

Fitting point arithmetic. Direct methods for the solution of systems of linear algebraic equations. Polynomial and piecewise polynomial approximation, orthogonal polynomials. Numerical integration: Newton Cotes formulas and Gaussian quadrature. Basic methods for initial value problems for ordinary differential equations. The emphasis throughout is on the understanding and use of software packages for the solution of commonly occurring problems in science and engineering. Prereq: CS/MA 321 or equivalent or graduate standing or consent of instructor. Knowledge of a procedural computer language is required. (Same as CS/EGR 537.)

MA 551 TOPOLOGY I. (3)

Topological spaces, products, quotients, subspaces, connectedness, compactness, local compactness, separation axioms, convergence. Prereq: Consent of instructor.

MA 561 MODERN ALGEBRA I. (3)

Algebraic structures, quotient structures, substructures, product structures, groups, permutation groups, groups with operators, and the Jordan-Holder theorem. Prereq: Consent of instructor.

MA 565 LINEAR ALGEBRA. (3)

Review of finite dimensional linear algebra, the rank of a matrix, systems of linear equations, determinants, characteristic and minimal polynomials of a matrix, canonical forms for matrices, the simplicity of the ring of linear mappings of a finite dimensional vector space, the decomposition of a vector space relative to a group of linear mappings and selected topics of a more advanced nature. Prereq: MA 322 or consent of instructor.

MA 570 MULTIVARIATE CALCULUS. (3)

A self-contained course in n-dimensional analysis, including the general form of Stokes’ theorem. Prereq: MA 432G or equivalent.

MA 575 PRINCIPLES OF ANALYSIS. (3)

Real and complex numbers, sequences and series, continuity, differentiation, integration, and uniform convergence. Prereq: MA 471G or equivalent or consent of instructor.

MA 601 TEACHING COLLEGE MATHEMATICS. (3)

A seminar for teaching assistants on the basics of teaching mathematics at the college level as well as use of appropriate technology. Includes topics such as syllabus construction, lesson planning, grading assignments, web pages, typesetting mathematics with LaTeX. Required of all new graduate teaching assistants in mathematics. Prereq: Must hold teaching assistantship in mathematics or consent of instructor.

MA 611 INDEPENDENT WORK IN MATHEMATICS. (3-9)

Reading course for graduate students in mathematics. May be repeated to a maximum of nine credits. Prereq: Major in mathematics, a standing of at least 3.0 and consent of instructor.

MA 613 PROBLEMS SEMINAR IN OPERATIONS RESEARCH. (3)

In this course the student is exposed to the art of applying the tools of operations research to “real world” problems. The seminar is generally conducted by a group of faculty members from the various disciplines of business and engineering for which operations research is applicable. Prereq: MA 617 and STA 525 or consent of instructor. (Same as EE/STA 619.)

MA 614 ENUMERATIVE COMBINATORICS. (3)

An introduction to the basic notions and techniques in enumerative combinatorics. The material has applications to topological theory, hyperplane arrangements, computational commutative algebra, representation theory and symmetric functions. Topics include generating functions, the principle of inclusion and exclusion, bijections, recurrence relations, partially ordered sets, the Mobius function and Mobius algebra, the Lagrange inversion formula, the exponential formula and tree enumeration. Prereq: A graduate course in linear algebra or consent of instructor.

MA 618 COMBINATORICS AND NETWORKS. (3)

Graphs, networks, min flow-max cut theorem and applications; transportation problems, shortest route algorithms, critical path analysis, multi-commodity networks, covering and packing problems; integer programming, branch-and-bounding techniques, cutting plane algorithms, computational complexity. Prereq: MA 515, can be taken concurrently with MA 516.

MA 622 MATRIX THEORY AND NUMERICAL LINEAR ALGEBRA. (3)

MA 625 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS. (3)

Solution numerical techniques for boundary value problems for ordinary differential equations, and for parabolic and elliptic partial differential equations. Prereq: CS/MA/EGR 537 or consent of instructor.
MA 628 APPLIED MATHEMATICS IN THE NATURAL SCIENCES II. (3)
Continuation of MA/EM 527 with emphasis on special topics and techniques applied to partial differential equations that occur in various physical field theories. Field equations of continuum mechanics of solids and fluids are reviewed. The method of characteristics, elliptic functions and integrals, Legendre polynomials, Mathieu functions, integral equations and transforms, and the methods of potential theory are examples of selected topics studied in introductory applications. Prereq: for students in applied mathematics, science and engineering. Prereq: MA/EM 527.

MA 630 MATHEMATICAL FOUNDATIONS OF STOCHASTIC PROCESSES AND CONTROL THEORY. (3)
A modern treatment of stochastic processes from the measure theoretic point of view with applications to control theory; the basic notions of probability theory, independence, conditional expectations, separable stochastic processes, martingales, Markov processes, second order stochastic processes. Prereq: MA 432G and 670.

MA 633 THEORY OF PARTIAL DIFFERENTIAL EQUATIONS. (3)
A continuation of MA 533. Topics may include hypoelliptic operators and interior regularity of solutions; P(D)-convexity and existence theorems; regularity up to the boundary; applications of the maximum principle; semi-group theory for evolution equations; perturbation methods; well-posed and improperly posed problems; equations with analytic coefficients; a symptotic behavior of solutions; nonlinear problems. Prereq: MA 533.

MA 641, 642 DIFFERENTIAL GEOMETRY. (3 ea.)
Tensor products, exterior algebra, differentiable maps, manifolds, geodesics, metric properties of curves in Euclidean fundamental forms, surfaces. Prereq: Consent of instructor.

MA 651 TOPOLOGY II. (3)
Embedding and metrization, compact spaces, uniform spaces and function spaces. Prereq: MA 551.

MA 654 ALGEBRAIC TOPOLOGY I. (3)
Homotopy and homology theories, complexes and applications. Prereq: MA 551, 561, 651 or equivalent.

MA 655 ALGEBRAIC TOPOLOGY II. (3)
Singlar homology theory and applications, homology of products, singular and Cech cohomology with applications. Prereq: MA 654.

MA 661 MODERN ALGEBRA II. (3)
Rings, fields of quotients, rings of polynomials, formal power series, modules, exact sequences, groups of homomorphisms, natural isomorphisms, algebras and tensor algebras. Prereq: MA 561 or consent of instructor.

MA 667 GROUP THEORY. (3)
A study of homomorphisms for groups, finite groups, solvable groups, nilpotent groups, free groups, and abelian groups. Prereq: MA 661.

MA 671 FUNCTIONS OF A COMPLEX VARIABLE I. (3)
Differentiation and integration, contour integration, poles and residues. Taylor and Laurent series, and conformal mapping. Prereq: MA 575 or consent of instructor.

MA 672 FUNCTIONS OF A COMPLEX VARIABLE II. (3)
A continuation of MA 671 to include the Riemann Mapping theorem, Dirichlet problem, multiple valued functions, Riemann surfaces and applications. Prereq: MA 671.

MA 676 ANALYSIS I. (3)
Sequences and series of real and complex numbers, sequences of functions. Riemann-Stieltjes integration, Lebesque measure and integration. Prereq: MA 575 or consent of instructor.

MA 677 ANALYSIS II. (3)
Continuation of MA 676. Absolutely continuous functions on the real line, Lebesque spaces, beginning theory of Banach spaces including the Hahn-Banach, closed graph, and open mapping theorems. Prereq: MA 676 or consent of instructor.

MA 681 FUNCTIONAL ANALYSIS I. (3)
General theory of normed linear spaces including the Hahn-Banach separation theorems, principle of uniform boundedness and closed graph theorem. Dual spaces and representation theorems for linear functionals. Abstract measure theory and Riesz representation theorem for C(X). Prereq: MA 677 or consent of instructor.

MA 714 TOPICS IN DISCRETE MATHEMATICS (Subtitle Required). (3)
Review of recent research in discrete mathematics. May be repeated to a maximum of nine credits. Prereq: Consent of the instructor.

MA 715 SELECTED TOPICS IN OPTIMIZATION. (3)
Topics will be selected from the areas of mathematical control theory, integer programming, combinatorial optimization, large scale optimization, nonlinear programming, dynamic optimization, etc. May be repeated to a maximum of nine credits.

MA 721 SELECTED TOPICS IN NUMERICAL ANALYSIS. (3)
Review of current research in numerical analysis. May be repeated to a maximum of nine credits. Prereq: Consent of instructor.

MA 732 SELECTED TOPICS IN DIFFERENTIAL AND INTEGRAL EQUATIONS. (3)
Advanced topics in theory of differential (ordinary of partial) and integral equations such as topological dynamics, almost periodic solutions, stochastic differential equations, integro-differential and differential-difference equations, generalized functions as solutions, non-linear partial differential equations, singular integral equations.

MA 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

MA 751, 752 SELECTED TOPICS IN TOPOLOGY. (3 ea.)
Prereq: MA 651.

MA 761 HOMOLOGICAL ALGEBRA. (3)
Homological algebra, modules, exact sequences, functors, homological dimension, extension problems. Prereq: Consent of instructor.

MA 764, 765 SELECTED TOPICS IN ALGEBRA. (3 ea.)
Reports and discussion on recent advances in group theory, ring theory, and homological algebra. Prereq: MA 661 and consent of instructor.

MA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MA 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MA 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

MA 772 SELECTED TOPICS IN THE THEORY OF COMPLEX VARIABLES. (3)
Prereq: Consent of instructor.

MA 773 SELECTED TOPICS IN ANALYSIS. (3)
May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MA 777 MATHEMATICAL SEMINAR. (3)
May be repeated once to a total of six credits. Prereq: Consent of instructor.

MA 778 MATHEMATICAL SEMINAR. (3)
May be repeated once to a total of six credits. Prereq: Consent of instructor.

MAS Media Arts and Studies

MAS 101 INTRODUCTION TO MEDIA AND CULTURE. (3)
This course focuses on the study of electronic mass media. It surveys the cultural industries from multiple perspectives, including history, economics, production processes, content, social effects, diversity, and globalization. It emphasizes the relationships among the electronic mass media, culture, and power.

MAS 201 COMMUNICATION TECHNOLOGIES AND SOCIETY. (3)
Historical survey of broadcasting, common carrier, and related electronic media technologies, including the Internet. This course focuses on the social, political, and policy dimensions of the adoption and use of communication technologies. Special attention is paid to significant issues in contemporary public policy and practice, such as protection of privacy and personal information, information ownership, free speech, and censorship.

*MAS 300 MEDIA STUDIES RESEARCH METHODS. (3)
An introduction to quantitative and qualitative social science research relating to media studies, including survey and experimental methods. Prereq: Media Arts & Studies major or minor status or consent of instructor.

*MAS 310 MEDIA POLICY AND REGULATION. (3)
A study of policy and regulation of media in the U.S., primarily broadcasting, cable, telephony, and the Internet. This includes traditional issues in the regulation of content, such as freedom of speech, copyright, obscenity, and privacy. It also includes traditional areas in the regulation of the industry structure including monopolies, licensing, cross ownership rules, mergers, and illegal practices. Prereq: Media Arts & Studies major status.

MAS 312 VIDEO PRODUCTION I. (3)
An introduction to the fundamentals of studio video production, from conception to completion product. Practical training with essential production equipment will be offered. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.
Course Descriptions

MAS 319 WORLD MEDIA SYSTEMS. (3)
A comparison of the communications media in different countries of the world and the theories used to justify them. How various political and social systems affect the media and how the media affect the societies in which they exist. Prereq: JOU 101 or ISC 161 or MAS 101 or TEL 101. (Same as ISC/JOU 319.)

MAS 322 MULTIMEDIA I. (3)
Introduction to techniques of multimedia production and the basic principles of communication via multimedia. Practical, hands-on experience with various media used in computer-based multimedia including: text, still graphics, motion graphics, animation, sound, and hyperlinking. Includes stand-alone computer- and Web-based applications. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 355 COMMUNICATION AND INFORMATION SYSTEMS IN ORGANIZATIONS. (3)
An examination of the role of a variety of communication and information systems used in organizations. This includes the study of communication processes across a variety of systems, including the telephone, e-mail, voice mail, and audio- and video-conferencing. It also includes an examination of the uses for a variety of information systems and technologies, including computer networks, integrated voice response systems, computer-telephone integration, call centers, automated attendants, voice recognition, and synthesis, database management systems, and a variety of additional hardware and software tools used in business today. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 390 SPECIAL TOPICS IN MEDIA PRODUCTION (Subtitle required). (3)
Course will focus on selected topics in the practice and theory of electronic media production. Course will be offered on demand. May be repeated to a maximum of six credits under a different subtitle. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 404 MEDIA ORGANIZATIONS. (3)
An examination of the structure of video entertainment and on-line communications organizations and industries. Includes the organization and management of various types of telecommunications properties, as well as their traditional and new competitors. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 412 VIDEO PRODUCTION II. (3)
A follow-up to MAS 312, this course is an advanced video production course focusing on electronic field production (EFP). This course features technical and creative aspects of directing, camera work, editing, and lighting. Lecture, three hours; laboratory, one hour per week. Prereq: MAS 312 or TEL 312 or consent of instructor.

MAS 420 ELECTRONIC MEDIA CRITICISM. (3)
Examination of each of several critical theories and approaches to the criticism of telecommunications program content. Practical experience in evaluating critical writing and in the writing of critical pieces. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 422 MULTIMEDIA II. (3)
This is an advanced course in computer-based interactive multimedia design and development. The course is designed to expand the student’s knowledge of, and ability to author, Web applications. Prereq: MAS 322 or EDU 322 or consent of instructor.

MAS 432 AUDIO PRODUCTION. (3)
Elements of audio production, including basic machines, microphones, patch panels, the production mixing. Different audio products are discussed. Lecture, two hours; laboratory, two hours per week. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 453 MASS COMMUNICATION AND SOCIAL ISSUES. (3)
A course devoted to the examination of the relations of mass communication to contemporary social issues. Prereq: MAS 300 or TEL 300; or COM 249, COM 351 and COM 365, or consent of instructor.

MAS 482 ELECTRONIC MEDIA SALES MANAGEMENT. (3)
The data and techniques of radio and television advertising, including problems of coverage and circulation, spot campaigns, testing, time buying, the agency, measuring broadcast effectiveness, merchandising radio and television advertising and time selling. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 490 SPECIAL TOPICS IN MEDIA INDUSTRY STUDIES (Subtitle required). (3)
The primary focus of this course is to provide an overview of the various telecommunications industries and segments and how they are related more specifically to the development of a business plan, model, or project that entails a solid understanding of marketing and management skills, career development and opportunities, and human and organizational factors for specific industries. By focusing on the structures and processes of each industry segment, students will gain a comprehensive understanding of different aspects and approaches to industry management and will examine some of the key issues facing each industry today. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 520 SOCIAL EFFECTS OF THE MASS MEDIA. (3)
An examination of the political, social, cultural and behavioral effects of telecommunications systems in American society. Focus on theory and empirical research generated since 1940. Prereq: MAS 300 or TEL 300 or consent of instructor.

MAS 530 PRO-SEMINAR IN TELECOMMUNICATIONS. (3)
Discussion and reports on current trends in telecommunications industries and the behavioral, political and regulatory implications attending such trends. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 535 TELECOMMUNICATIONS NETWORK MANAGEMENT. (3)
The primary focus of this course is the design and management of telecommunications networks and resources. In a framework that includes both the technical and business aspects of telecommunications, the course examines the capabilities and limitations of a wide range of data network technologies in the context of needs assessments, design, implementation, and evaluation; the relative advantages and disadvantages of various technological configurations for specific business purposes; and the impact of human and organizational factors in network design. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAS 555 THE INTERNET AND SOCIAL CHANGE. (3)
An critical examination of the political, cultural, technological, social, and behavioral aspects of Internet-mediated communication. Emphasis on research literature and theory on emerging platforms of new media technologies and applications. Prereq: MAS 300 or TEL 300 or consent of instructor.

MAS 590 SPECIAL TOPICS IN SOCIAL-CULTURAL MEDIA STUDIES (Subtitle required). (3)
Course will focus on a single topical issue in the theory, research, and criticism of electronic media. Course will be offered on demand. May be repeated to a maximum of six credits under a different subtitle. Prereq: Media Arts & Studies major or minor status or consent of instructor.

MAT Merchandising, Apparel and Textiles

MAT 114 INTRODUCTION TO MERCHANDISING. (3)
An introduction to merchandising with emphasis on apparel and textiles. Examination of industry structures which facilitate the development, manufacturing, marketing and merchandising of goods and services in the domestic and international marketplace.

MAT 120 TEXTILES FOR CONSUMERS. (3)
A study of textiles with emphasis on consumer applications. Properties of fibers, yarns, fabric structures, colors, and finishes related to end use. Survey of legislation and of maintenance requirements.

MAT 122 TEXTILES LAB. (1)
Laboratory analysis of the relationship between the properties and performance characteristics of fibers, yarns, fabric structures and finishes. Laboratory: two hours per week. Prereq: MAT 120 or may be taken concurrently.

MAT 222 APPAREL PRODUCTION STUDIO. (3)
Principles of apparel production for men, women and children. Development of basic construction skills. Studio, six hours. Prereq: MAT 120.

MAT 237 AESTHETIC EXPERIENCE IN RETAIL. (3)
An introduction to design and aesthetic principles as they are applied to promotional procedures of retail and wholesale organizations including methods of visual merchandising, special event promotion and public relations. Prereq: MAT 120 or consent of instructor.

MAT 247 DRESS AND CULTURE. (3)
A study of the social, cultural, physical, and psychological factors which influence apparel and apparel use in contemporary society. Prereq: Three hours in sociology or anthropology, three hours in psychology.

MAT 355 MERCHANDISE PLANNING AND CONTROL. (3)

*MAT 340 PROFESSIONAL PRACTICE (1)
Self-assessment of student’s strengths, limitations, and career aspirations. Preparation of reference files, letters, and resumes. Identification of, application to, and acceptance by department-approved agencies for completion of internship experience. Prereq: “C” or above in HMT 120 or MAT 114, HMT 210 or MAT 120, and HMT 270 or MAT 237.

MAT 350 PROBLEM SOLVING IN MERCHANDISING. (3)
Study and application of research and creative problem solving in merchandising, apparel and textiles. Problem identification and evaluation of proposed solutions. Prereq: MAT 114, MAT 120, MAT 237, MAT 247.

MAT 359 SPECIAL TOPIC IN MERCHANDISING, APPAREL AND TEXTILES (Subtitle required). (1-3)
Exploration of topics in the field of merchandising, apparel and textiles. May be repeated to a maximum of six credits. Prereq: Junior standing or consent of instructor prior to registration.
### Course Descriptions

#### MAT 395 INDEPENDENT STUDY IN MERCHANDISING, APPAREL AND TEXTILES. (1-3)  
Problems involving independent laboratory, studio, and/or library study conforming to the student's special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Consent of instructor and contractual agreement.

#### MAT 414 MERCHANDISING STRATEGY ANALYSIS. (3)  
The analysis of environmental, individual, and psychological factors of consumer consumption and their impact on apparel retailer strategic planning. Prereq: MAT 114, ACC 201, MAT 315, MAT 350.

#### MAT 425 ECONOMICS OF MERCHANDISE SOURCING. (3)  
Examination of global sourcing strategies in retail merchandising. Includes assessment of political, social, economic and cultural influences critical to the sourcing process. Prereq: MAT 114, MAT 350, ECO 201, ECO 202, MKT 300, MAT 315.

#### MAT 470 INTERNATIONAL MERCHANDISING. (3)  

#### MAT 480 MERCHANDISING, APPAREL AND TEXTILES STUDY TOUR. (1-3)  
A domestic or foreign study tour to include investigation of interests related to merchandising, apparel and textiles. Professional visits are planned according to particular itineraries. Application and payment dates are determined each semester by the instructor. This course may be repeated one time if four destinations are different. Prereq: Priority is given to majors and upperclassmen. All students are subject to instructor approval.

#### MAT 490 INTERNSHIP. (6 or 9)  
Supervised experience with a cooperative retail, design, or industrial establishment. Fall and summer semesters. Applications must be submitted spring semester according to a designated schedule established by the department. Prereq: Junior or senior standing with the completion of MAT 114, MAT 120, MAT 237, MAT 350 and approval of department.

#### MAT 510 BRAND MANAGEMENT. (3)  
Examination of the important issues in planning and evaluating brand strategies with special emphasis on why brands are important, what they represent to consumers and what firms should do to manage them properly. Prereq: MAT 114 or consent of instructor.

#### MAT 514 RETAIL ENTREPRENEURSHIP. (3)  
Concepts of entrepreneurship within single ownership and other business organizations; development of a business plan; management of a small business; current issues and problems. Prereq: MAT 114 or consent of instructor.

#### MAT 515 SPECIFICATION AND EVALUATION OF TEXTILES AND APPAREL. (3)  
The course will focus on product development and quality control in textile products (Apparel and Interiors), by developing specifications and evaluating the quality of a textile product. Prereq: MAT 120, MAT 237.

#### MAT 520 TEXTILES FOR INTERIORS. (3)  
Selection, cost, expected performance and care of textiles used in residential and commercial interiors. Prereq: MAT 120.

#### MAT 522 HISTORY OF TEXTILES. (3)  
Survey of the development of textiles from ancient to modern times. Emphasis on social, economic, technological and political effects on the evolution of textile fibers, fabric structures, color and design. Field trips. Prereq: MAT 120, MAT 247, open to seniors and graduate students only.

#### MAT 533 HISTORY OF COSTUME. (3)  
Development of costume from ancient to modern times with consideration of historic, social, and economic setting. Field trips. Prereq: Open to seniors and graduate students only.

#### MAT 547 SOCIAL AND PSYCHOLOGICAL ASPECTS OF APPAREL. (3)  
An advanced study of the social, psychological factors which influence apparel and apparel use with particular emphasis on research. Prereq: Open to seniors and graduate students only.

#### MAT 559 SPECIAL TOPIC IN MERCHANDISING, APPAREL AND TEXTILES. (Subtitle required). (1-3)  
Advanced in-depth study of merchandising, apparel and textiles. May be repeated to a maximum of six credits. Prereq: Open to seniors and graduate students only.

#### MAT 570 ELECTRONIC RETAILING (E-TAILING). (3)  
An educational foundation in e-tail development as a medium for food, apparel, and textile distribution and sales. Prereq: MAT 114, 120, 237, 247, STA 200, MKT 300.

#### MAT 595 INDEPENDENT STUDY IN MERCHANDISING, APPAREL AND TEXTILES. (1-3)  
Problems involving independent laboratory, studio, and/or library study conforming to the student's special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Restricted to seniors and graduate students with contractual agreement.

#### MAT 600 RESEARCH METHODOLOGY IN HUMAN ENVIRONMENTAL SCIENCES. (3)  
Students will study scientific techniques and accepted research methodologies in human environmental science research. Emphasis is placed on understanding the research process and developing the skills necessary to evaluate and implement research methods and design procedures. Prereq: Graduate standing. (Same as HES 600.)

#### MAT 650 SURVEY OF CURRENT THEORIES AND LITERATURE. (3)  
An intensive survey of the theoretical and empirical literature related to areas of merchandising, apparel, and textiles. Emphasis will be placed on research literature and theory building.

#### MAT 700 RESEARCH PROBLEMS IN INTERIOR DESIGN, MERCHANDISING AND TEXTILES. (3)  
Independent research for the exploration of a specific problem in interior design, merchandising and textiles. May be repeated to a maximum of six credits.

#### MAT 748 MASTER'S THESIS RESEARCH. (6)  
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters.

#### MAT 759 SPECIAL TOPICS IN MERCHANDISING, APPAREL AND TEXTILES. (Subtitle required). (3)  
Advanced work on a specific topic in merchandising, apparel, and textiles. May be repeated under different topics to a maximum of 12 credits. Prereq: Graduate Standing or consent of instructor.

#### MAT 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)  
May be repeated to a maximum of 12 credit hours. Prereq: All course work must be completed before registration for the course.

#### MAT 772 SEMINAR IN INTERIOR DESIGN, MERCHANDISING AND TEXTILES. (3)  
Current investigation of merchandising, apparel and textiles. May be repeated to a maximum of six credit hours.

#### MAT 785 INDEPENDENT STUDY IN MERCHANDISING, APPAREL AND TEXTILES. (1-3)  
Problems involving independent laboratory, studio and/or library student conforming to the student’s special interest under the direction of an appropriate faculty member having proficiency in the area selected. May be repeated to a maximum of six credits. Prereq: Nine credit hours of graduate study, consent of instructor, and contractual agreement.

#### MAT 790 RESEARCH PROBLEMS IN INTERIOR DESIGN, MERCHANDISING, AND TEXTILES. (3)  
Independent research for the exploration of a specific problem in interior design, merchandising, and textiles. May be repeated to a maximum of six credits.

### Microbiology

#### MB 749 DISSERTATION RESEARCH. (0)  
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams. (Same as MI 749.)

#### MB 767 DISSERTATION RESIDENCY CREDIT. (2)  
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

#### MB 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)  
May be repeated to a maximum of 12 hours. (Same as MI 768.)

#### MB 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (1-12)  
May be repeated indefinitely. (Same as MI 769.)

### MBA

#### MASTER OF BUSINESS ADMINISTRATION

#### MBA 600 RAPID IMMERSION IN ACCOUNTING. (3)  
An immersive four-week introduction to the use of key financial and managerial accounting statements in analyzing business problems. Open only to students in the daytime MBA track.

#### MBA 601 RAPID IMMERSION IN DECISION MAKING. (3)  
An immersive four-week introduction to the use of key financial and managerial accounting statements in analyzing business problems. Open only to students in the daytime MBA track.

#### MBA 602 LEADERSHIP. (3)  
This course focuses on helping students develop leadership, communication and team building skills. The course is taught throughout the one-year accelerated MBA program and is open only to students in the program.
**Course Descriptions**

**MBA 603 MARKETS—STRUCTURE AND DYNAMICS.** (1) An immersive one-week course that explore how markets work. Open only to students in the daytime MBA track. Prereq: MBA 600, MBA 601 and MBA 602.

**MBA 604 FINANCE.** (2) This course is designed to increase understanding of the role of information systems in organizations and how they are used by managers. Open only to one year MBA students. Prereq: MBA 600, 601, 602.

**MBA 605 ORGANIZATIONAL STRUCTURES AND STRATEGIES.** (1) An immersive course that explores organizational structures, internal allocation decisions and outsourcing decisions from a variety of social science perspectives. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602 and 603.

**MBA 606 MANAGEMENT INFORMATION SYSTEMS.** (1) This course is designed to increase understanding of the role of information systems in organizations and how they are used by managers. Open only to One Year MBA students. Prereq: MBA 600, 601, 602 and 603.

**MBA 607 MARKETING.** (1) An immersive course introducing students to the role of marketing within the firm and overviews the components of a marketing plan. Open only to One Year MBA students. Prereq: MBA 600, 601 and 602.

**MBA 608 HUMAN RESOURCES MANAGEMENT.** (1) An immersive course to familiarize students with topics in Human Resource Management including topics on legal environment, recruitment, selection and compensation. Open only to One Year MBA students. Prereq: MBA 600, 601 and 602.

**MBA 609 MANAGEMENT.** (1) An experiential-based course that places students in teams that compete in a complex business simulation. Open only to one year students. Prereq: Acceptance in MBA program.

**MBA 610 NEW PRODUCT DEVELOPMENT MARKETING.** (3) An immersive course examining how market research and marketing strategy aid firms in their management of new product development. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 611 NEW PRODUCT DEVELOPMENT MANAGEMENT.** (3) An immersive course which examines how firms manage the new product development or service process. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 612 BUSINESS FINANCE STRATEGIES.** (5) An extensive, multidisciplinary examination of the mergers and acquisitions process from the role of the mergers in firm strategy to target identification, acquisition, and absorption issues. Also, covers the basic fundamentals of financial concepts in banking. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610 and 611.

**MBA 613 FINANCE IN NEW PRODUCT DEVELOPMENT.** (1) This course is designed to provide the concepts and techniques used to evaluate products and services in New Product Development. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 614 STRATEGIC INNOVATION, COMPETITIVE RIVALRY AND GLOBAL STRATEGY.** (3) This course introduces students to the fundamental concepts, analytical tools, and framework related to the twin challenges of strategic management of innovation and competitive rivalry in the context of the global economy. As such, it serves as a complement to the study of new product development and supply chain management. Prereq: MBA 600 through MBA 609.

**MBA 615 SUPPLY CHAIN STRATEGY.** (3) An immersive study of the supply chain management involving the management of key business processes, the flow of goods and information, and relationships with fellow members of the supply chain. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

**MBA 616 SUPPLY CHAIN OPERATIONS.** (3) An immersive study of supply chain operations and the discipline of managing and directing physical/technical functions of an organization involving the plan, source, make, deliver and returns function. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

**MBA 617 NEGOTIATIONS IN THE SUPPLY CHAIN.** (1) This course focuses on developing negotiation skills in the supply chain involving the ability to diagnose situations, strategize, plan and engage in fruitful negotiations. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

**MBA 618 GLOBAL STRATEGY.** (1) This course introduces students to the fundamental concepts, analytical tools, and frameworks related to the challenges of globalization and international strategy. Open only to One Year MBA students. Prereq: MBA 600 through MBA 614.

**MBA 619 MANAGERIAL ACCOUNTING IN NEW PRODUCT DEVELOPMENT.** (1) This course will examine how managerial accounting is employed in the new product development stage. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 620 RISK MANAGEMENT.** (2) An examination of financial decision-making about the management of risk by corporations, recognizing the relationship between risk management and the overall goals of the firm. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 621 NEW VENTURE FINANCE.** (1) The advantages and disadvantages of the sources of new venture capital are studied from the entrepreneur’s and the provider’s viewpoints. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 622 INTERNATIONAL FINANCIAL MANAGEMENT.** (2) Overview of financial management at the international level. Topics include the structure of international trade and foreign direct investment, foreign exchange markets, and managing currency risk. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 611 and 612.

**MBA 623 INTERNATIONAL MARKETING.** (2) An examination of the factors that shape international marketing decisions, including entry strategies, marketing mix decisions and product policies. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 624 ENTREPRENEURIAL MARKETING AND MANAGEMENT.** (2) An examination of how to market creatively on limited resources. Hands on experience in how to develop a marketing plan for a small firm. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 625 SALES MANAGEMENT.** (1) An examination of managerial approaches to the planning, implementation and control of personal contact programs. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 626 E-COMMERCE.** (2) A thorough examination of the major issues associated with the development of e-commerce solutions and applications. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 627 GLOBAL BUSINESS MANAGEMENT.** (2) Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 628 TECHNOLOGY MANAGEMENT.** (2) An examination of the management of technology, especially the critical role of technology as a strategic resource to enable management to achieve firm objectives. Topics include the technology life-cycle, technology forecasting, and emerging technologies. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 630 ADVANCED SKILL ENHANCEMENT.** (1) Students complete five short modules to enhance their interpersonal, implementation or analytic skills. Topics vary by year. Open only to students in the daytime MBA track. Prereq: MBA 600, 601, 602, 603, 604, 605, 606, 610, 611 and 612.

**MBA 640 PROJECT CONNECT IN NEW PRODUCT DEVELOPMENT.** (2) An immersive nine week internship with a Project Connect Partner where the student will work on a new product or service project. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 642 PROJECT CONNECT IN SUPPLY CHAIN MANAGEMENT.** (2) An immersive nine week internship with a Project Connect Partner where the student will work on a new product or service project. Open only to One Year MBA students. Prereq: MBA 600 through MBA 609.

**MBA 644 PROJECT CONNECT IN MERGERS AND ACQUISITIONS.** (1) An immersive five week internship with a Project Connect Partner where the student will work on an M&A project. Open only to One Year MBA students. Prereq: MBA 600 through MBA 618.

**MBA 650 MBA CAPSTONE COURSE.** (2) This course is designed to culminate the one-year MBA program. The course is themed to cover a current, critical topic incorporating knowledge gained throughout the program. Prereq: MBA 600 through MBA 612.

**MC 500 INTRODUCTION TO SERVICE-LEARNING.** (3) This interdisciplinary course is designed to introduce students to the theories, concepts, and practices of Service-Learning. Service-Learning is a form of experiential education which engages the students in enhancing the common good through the application of classroom learning to service. Prereq: Upper division status. (Same as EXP 500.)
**MCL 100 THE WORLD OF LANGUAGE.** (3) This course introduces students to some of the objects and methods of inquiry common to the different language areas and fields of study in the Department of Modern and Classical Languages, Literatures and Cultures. Students will examine the structure and use of spoken language and written language as well as their sociocultural aspects and explore basic linguistic principles, the roles and function of language, and issues involved in first- and second-language acquisition. In the process they will develop a facility and vocabulary for the examination of the principal structures involved in systems of spoken and written language.

#MCL 200 GLOBAL LITERACY. (3) This course is an introduction to textual analysis from a global, transcultural perspective.

*MCL 270 INTRODUCTION TO FOLKLORE AND MYTHOLOGY. (3) This course introduces the forms and functions of folklore and mythology, with particular emphasis on the Americas. Folklore opens up questions about the relationship of tradition to modernization, individualism, and community. The course explains how folklore is fundamental to human lives and relates these cultural traditions to identities and values in contemporary society. We give attention to genres (e.g., storytelling and riddles) and to themes (e.g., the use of animals in literature and rituals) and/or mythology with emphasis on a specific topic within a single cultural context. The course is guided by the concept of “contact zones,” zones of exchange that divide but simultaneously connect “us” and “them”; and (2) have each student conduct a semester-long ethnographic project concerning the contact zone. (Same as SPA 300.)

MCL 300 CONTACT ZONES: CULTIVATING INTERCULTURAL COMPETENCE. (3) This course aims to help students acquire skills and knowledge needed to promote understanding of individuals/groups from diverse backgrounds, without reinforcing stereotypes in the name of “cultural difference.” Toward this end, this course will (1) utilize, as a guide, the concept of “contact zones,” zones of exchange that divide but simultaneously connect “us” and “them”; and (2) have each student conduct a semester-long ethnographic project concerning the contact zone. (Same as SPA 300.)

MCL 324 THE CITY IN THE TWENTIETH-CENTURY: TOKYO, SHANGHAI, PARIS. (3) What does it mean to live somewhere else? This course examines three of the world’s greatest cities. These cities share a rich history of mutual influence and imagination, with artists from each city creating work that represents the other. We will look at the three different distinct languages and culture to examine how city life and urbanity has been discussed, in general, and then how it has been imagined in the Japanese, Chinese, and French traditions.

*MCL 510 TEACHING METHODS: YOUNG LEARNERS AND BEGINNING LEVEL STUDENTS. (3) The primary purpose of this course is to acquaint pre- and in-service teachers with the theoretical background and instructional strategies to effective instruct second language learners who are younger (ages K - 6) and/or beginning level proficiency. The course is guided by the national standards for the five areas of second language acquisition for elementary learners as defined by the National Standards for Language Learning. Prereq: Admission into MATWL or TESL Programs.

#MCL 517 SECOND LANGUAGE ACQUISITION. (3) This course will offer students a survey of the primary concepts and phenomena that relate to the study of Second Language Acquisition (SLA) where second has reference to languages acquired after the first, native language. This course will provide a survey look at the number of linguistic, psycholinguistic, and sociolinguistic issues at the heart of second language learning, as well as an overview of the complex processes and mechanisms that drive that learning. However, findings from SLA research may inform practices in second and foreign language education and, thus, will be included in class discussions when appropriate.

*MCL 575 INTRODUCTION TO LINGUISTICS FOR TEACHERS. (3) This course provides an introduction to the field of linguistics, with a focus on the major subfields of linguistics: phonetics (the sounds of language), phonology (the sound structure of language), morphology (the structure of words), and syntax (the structure of sentences). The course explores the relevance of linguistics for language teaching and careers in education. The English language will be the primary, but not exclusive, focus of this class.

MCL 595 TOPICS IN FOLKLORE AND MYTH (Subtitle required). (3) An in-depth investigation of some aspect of folk culture (including artifacts, oral literature or rituals) and/or mythology with emphasis on a specific topic within a single cultural context or across cultures, e.g., the legend in European society, Chinese folklore in contemporary film, etc. MCL majors and graduate students will be expected to conduct part of their research in the target language. May be repeated up to six credits with different subtitles. Prereq: MCL 270.

MCL 601 WORLD LANGUAGE TEACHING INTERNSHIP P-12. (12) Three-credit hour Seminar taught in conjunction with a 14-week P-12 teaching Internship. Students will be interning in local schools and meeting one a week to discuss various aspects of their teaching needs and progress as well as issues encountered during their teaching experience. Prereq: EDP 500/600, EDC 610, EDS 600, MCL 510, and MCL 610.

**MCL 610 L2 TEACHING METHODS: 9-12, ADULT AND ADVANCED LEARNERS.** (3) This course is focused on current approaches, strategies and techniques in second language teaching, with a particular emphasis on intermediate and advanced language learners and adolescent or adult students. It is also a practicum course, so all students must have access to a second language classroom and learners in order to engage course concepts in an actual classroom setting.

MCL 650 TOPICS IN INTERCULTURAL TEACHING: (Subtitle required). (3) Seminar on teaching intercultural topics from the perspective of world languages and cultures. The course will provide based in depth analysis of one area of intercultural teaching. Topics may include how to teach arts and humanities courses and/or units using folk and fairy tale traditions, multicultural and world cinema, comparative art and architecture, or musical and theatrical traditions. Focus will be on methods of teaching in primary and secondary schools. Taught in English. May be repeated to a maximum of six credits. Prereq: Enrollment in the Master’s in Teaching World Languages program, a world languages program, or permission of the instructor.

MCL 665 SECOND LANGUAGE CURRICULUM AND ASSESSMENT. (3) This course is designed for second language teachers who would like to learn more about curriculum design and assessment. The course will prepare students to analyze differing models of second language (L2) curriculum and standards and design their own curriculum appropriate for particular educational context. A variety of assessment instruments are studied including standardized proficiency exams and formative and summative assessment instruments as well as alternative assessments such as portfolios.

MCL 690 CULTURE, COGNITION AND SECOND LANGUAGE LEARNING. (3) This course is designed to engage class participants in the study of learning and teaching in the second language classroom through the study of sociocultural perspectives on second language learning and an exploration of current theories of human cognition and learning. At the heart of the course lies a field-based research project in which students investigate their own teaching practices, with the primary focus of their inquiry on direct student-teacher interaction and its impact on learning (micro genesis) The goal is to help students examine their own teaching practices and generate new teaching strategies and techniques.

**MD Medicine (M.D. Program)**

MD 800 SPECIAL TOPICS COURSE. (0-4) This special topics course will be used for students who must complete activities outside of the medical curriculum in order to meet graduation requirements. In particular, students who must complete prescribed remediation that does not involve repeating a formal course or who must complete licensing exams in order to graduate would use this mechanism. Additionally, this course could be used for student research activities. Prereq: Permission of the Dean of the College of Medicine.

MD 810 FOUNDATIONS OF DISEASE AND THERAPEUTICS. (9) Through lecture, small group, and laboratory exercises, this course teaches the core principles of microbiology, immunology, pharmacology, pathology, and some physiology. It provides a framework for understanding the relationship between these disciplines and how they contribute to clinical systems. This course prepares students for the second year organ systems courses, clinical rotations and the national medical licensing exam. 20 hours per week. Prereq: Admission to Medical School (first year).

MD 811 INTRODUCTION TO CLINICAL MEDICINE. (10) Introduction to Clinical Medicine 1 is a year-long course for first-year medical students, designed to develop applied behavioral and professional skills relevant to the practice of medicine and in preparation for clinical rotations, to build a foundation of behavioral science knowledge relevant to medical practice, and to develop an awareness of professionalism and ethical issues foundational to the practice of medicine. Prereq: Admission to the College of Medicine.

MD 813 BEHAVIORAL BASIS OF MEDICINE. (3) The Behavioral Basis of Medicine delivers key concepts from Psychiatry, Pharmacology and Behavioral Science in a mostly lecture-based format. Students are introduced to psychiatric conditions, to the observations that lead to a psychiatric diagnosis, and to some of the pharmacologic, psychosocial and psychosocial modes of treatment. Prereq: Admission to Medical School (first year).

MD 814 ANATOMY. (9) The course consists of lecture, small group, laboratory, and palpation exercises that provide a basic understanding of anatomical principles, organization and development as well as the core principles of histology. Anatomical structures are introduced as a basis for future functional correlates and principles are taught via laboratory discussions, procedures, dissections, films and skeletal materials. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

MD 816 CELLULAR STRUCTURE AND FUNCTION GENETICS. (3)
**MD817 NEUROSCIENCES. (6)**
The course is an integrated presentation of relevant topics in human neuroanatomy, neurophysiology, neuropathology, neuropharmacology and some microbiology, as well as introduc- 
tory correlations with neurology and psychiatry. Teaching methodology includes lecture, small 
group discussion, laboratory and self-study units. Lecture, 20 hours per week. Prereq: 
Admission to Medical School (first year).

**MD819 CELLULAR STRUCTURE AND FUNCTION: BIOCHEMISTRY AND GENETICS. (11)**
This course provides students with the knowledge and understanding of human biochemistry, 
molecular biology, and genetics and their relationships to human health and disease states. The 
course also integrates relevant aspects of biochemistry, molecular biology, and genetics with 
an emphasis on problem solving and clinical situations, with the goal of equipping students to 
be outstanding physicians. Prereq: Admission to Medical School (first year).

**MD821 INTRODUCTION TO CLINICAL MEDICINE II. (12)**
This course serves as a bridge between the basic and clinical sciences by teaching students the 
knowledge and skills necessary to develop into excellent diagnosticians. The course focuses on 
the following skills: the ability to perform a history and physical examination, integration of 
basic laboratory and radiographic data, and differential diagnosis formulation. Learning 
activities include: formal lectures, textbook readings, small group tutorials, preceptorships, 
workshops, online modules, and written and practical testing. Prereq: Promotion to the second 
year of the M.D. program.

**MD822 MUSCULOSKELETAL AND INTEGUMENTARY SYSTEMS. (6)**
As part of the second-year organ system-based curriculum, this course covers the normal 
physiology and histology of the musculoskeletal/in tegumentary systems, the pathophysiolo-
gy of diseases and disorders of these systems, and the medical and pharmacologic approaches 
to diagnosis and treatment. Learning activities include lecture, dissection laboratory, panel 
discussion, small groups/team based learning, and clinical correlations. Prereq: Promotion to 
the second year of the M.D. program.

**MD823 HEMATOLOGIC AND LYMPHATIC SYSTEMS. (3)**
As part of the second-year organ system-based curriculum, this course covers the normal 
structure, development, and function of the components of the hematopoietic and lympho-
oreticular systems; the pathophysiology of hematologic and lymphoid diseases and disorders; and the medical and pharmacologic approaches to diagnosis and treatment. Learning activities include lectures, labs, self-directed study, workshops and small groups. Prereq: Promotion to the second year of the M.D. program.

**MD824 ENDOCRINE AND REPRODUCTIVE SYSTEMS. (5)**
As part of the second-year organ system-based curriculum, this team-taught course covers the 
normal physiology and histology of the endocrine and reproductive systems, the pathophysi-
ology of diseases and disorders of these systems, and the medical and pharmacologic approaches 
to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

**MD825 RENAL AND URINARY SYSTEMS. (4)**
As part of the second-year organ system-based curriculum, this team-taught course covers the 
normal physiology and histology of the kidney and urinary system, the pathophysiology of renal 
and urinary diseases and disorders, and the medical and pharmacologic approaches to 
diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

**MD826 CARDIOVASCULAR SYSTEM. (5)**
As part of the second-year organ system-based curriculum, this course will cover the normal 
structure and physiologic function of the cardiovascular system, the pathophysiology of com-
mon disorders and diseases of the heart and vascular system, and the medical and 
pharmacologic approaches to diagnosis and treatment. Prereq: Promotion to the second year of the M.D. program.

**MD827 RESPIRATORY SYSTEM. (5)**
As part of the second-year organ system-based curriculum, this course covers the normal 
structure and function of the respiratory system, the immunology and pathophysiology of respira-
tory diseases and disorders, and the medical and pharmacologic approaches to diagnosis and 
treatment. Prereq: Promotion to the second year of the M.D. program.

**MD828 GASTROINTESTINAL SYSTEM AND NUTRITION. (4)**
As part of the second-year organ system-based curriculum, this course covers the normal 
histology and physiology of the gastrointestinal system, the pathophysiology of gastrointes-
tinal diseases and disorders, and the medical and pharmacologic approaches to diagnosis and treatment. The course also includes instruction on the principles of nutrition. Prereq: 
Promotion to the second year of the M.D. program.

**MD829 MULTISYSTEMAND INTEGRATIVE CONCEPTS. (3)**
This course serves as the capstone course for the first- and second-year organ system-based 
curriculum. Students synthesize and apply the knowledge and concepts learned on an organ-
based level to the multisystems level. Prereq: Promotion to the second year of the M.D. program.

**MD830 PEDIATRICS. (8)**
This clinical course would provide an opportunity for students to care for the pediatric patient 
in multiple settings, including patient wards, newborn nursery and in the primary care setting. 
Students participate in patient-centered teaching. Students interview, examine, and formulate 
treatment plans for patient problems under the direct supervision of their residents and faculty 
preceptors. Laboratory, 40 hours per week. Prereq: Admission to third year of medical 
curriculum.

**MD831 INTERNAL MED/EMED INTEGRATED CLERKSHIP. (4)**
This course will provide students with an introduction to the field of Emergency Medicine, 
Emergency Medical Services (EMS), and the approach to the acutely ill or injured patient. The 
students will complete an ACLS class during this rotation. Clinical, 40 hours per week. Prereq: 
Admission to third year of medical curriculum.

**MD832 CLINICAL NEUROSCIENCE: NEUROLOGY. (4)**
The course will diagnose the common, acute, and emergency problems of disease of the central 
nervous system. Prereq: Completion of 2nd year of medical school.

**MD833 CLINICAL NEUROSCIENCES/PSYCHIATRY. (4)**
This course provides opportunity for third year medical students to recognize, treat, and 
understand the etiology and pathology of common psychiatric disorders and emergencies. 
Laboratory, forty hours per week. Prereq: Admission to third year of medical curriculum.

**MD834 PRIMARY CARE/FAMILY AND COMMUNITY MEDICINE. (4)**
This course introduces third year medical students to primary care family practice in rural and 
urban settings. Students interview, examine, and formulate treatment plans for patient 
problems under the direct supervision of faculty preceptors. Prereq: Admission to third year of 
medical curriculum.

**MD835 INTERNAL MEDICINE/EMERGENCY MEDICINE INTEGRATED CLERKSHIP. (12)**
This course is an introduction to the concepts of internal medicine in both inpatient and 
outpatient settings. Students interview, examine and formulate treatment plans for patient 
problems under the direct supervision of faculty preceptors. The course will use didactics, 
computer simulated problems as well as clinical material and experiences to integrate basic 
sciences into the practice of medicine. Clinical, 40 hours per week. Prereq: Admission to third 
year of medical curriculum.

**MD837 MEDICAL SURGICAL CARE/SURGERY. (8)**
This course is an introduction to the concepts in surgery. It is designed around the principles 
of Problem Based Learning to help students solve complex surgical problems. The course will 
use didactic exercises, computer simulated problems and clinical material and experiences to 
integrate basic sciences into the practice of medicine and surgery. Laboratory, 40 hours per 
week. Prereq: Admission to third year of medical curriculum.

**MD838 OBSTETRICS AND GYNECOLOGY. (4)**
The clerkship will provide an opportunity for students to see the cycle of birth and neonatal 
care and to observe the mother/infant relationship through the outpatient clinic, labor and 
delivery, the newborn nursery, and the follow-up examination. Laboratory, 40 hours per week. 
Prereq: Admission to third year of medical curriculum.

**MD840 INTERNSHIP 101. (1)**
This course is designed to provide the student with practical knowledge of the role of the intern 
by review and practice in lab (COMLC) and simulation center of specific generic skills 
necessary for the successful navigation of the PGY 1 year. Prereq: Successful completion of 
all M1-M4 requirements.

**MD841 GERONTOLOGY. (4)**
This course combines several teaching techniques to provide students with basic skills 
necessary to care for elderly patients in a variety of clinical settings. Fourth year students 
participate in a four-week block rotating at locations in Lexington, with emphasis on assessment 
and rehabilitation. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical 
curriculum.

**MD842 ADVANCED CLINICAL PHARMACOLOGY AND ANESTHESIOLOGY. (4)**
This course uses lectures, interactive small groups, and firsthand experience to introduce 
anesthesia as it relates to pharmacology and physiology. The course also teaches pharmacology 
and therapeutics utilizing clinical cases. Students develop their own personal 
formularies during the course. Laboratory, 40 hours per week. Prereq: Admission to fourth year of medical 
curriculum.

**MD843 EMERGENCY MEDICINE. (4)**
This course will provide the students with an introduction to the field of Emergency Medicine, 
Emergency Medical Services (EMS), and the approach to the acutely ill or injured patient. The 
students will complete an ACLS class during this rotation. Laboratory, 40 hours per week. 
Prereq: Admission to fourth year of medical curriculum. (Same as ER 843.)
Course Descriptions

#MD 855 RURAL PHYSICIAN LEADERSHIP PROGRAM (RPLP) COMMUNITY ENGAGEMENT SELECTIVE. (4)
Students are matched with a community partner based on experience, career goals, and agency needs. Students work with the program and the partner sites to develop a project plan that details clinical leadership, scholarly and administrative activities, which are determined based upon learning outcome goals and agency initiatives. Primary responsibilities include clinical service with individuals, families, and groups, assessment/testing, clinical consultation, student supervision, and administrative duties. In addition, students may participate in program design and development, grant writing, training, or scholarly projects that are intended to improve services within the community agency. Prereq: 4th year medical students in the RPLP Program.

MD 860 CLINICAL DERMATOLOGY. (4)
Students will spend mornings in the outpatient dermatology clinic and two afternoons per week with inpatient dermatology consultations. Each student will have the opportunity to evaluate and treat patients under the supervision of the attending physician. s/he will be able to observe and assist in minor surgical procedures. Students will attend and participate in didactic interactive sessions once or twice a week, and complete a required on-line dermatology module. Prereq: Successful completion of third year rotations.

ME Mechanical Engineering

ME 101 INTRODUCTION TO MECHANICAL ENGINEERING. (3)
This course introduces the Mechanical Engineering profession including the skills and expectations required for success. Engineering applications of calculus are also presented. Prereq or concur: MA 113.

ME 151 MANUFACTURING ENGINEERING. (3)
A background course in the area of manufacturing processes and systems. Includes a study of machining operations, foundry mechanization, forging, sheet metal work, powder metal products, production molding and production machines and processes.

ME 205 COMPUTER AIDED ENGINEERING GRAPHICS. (3)
Combines freehand sketching techniques, both orthographic and pictorial, and the use of a solid modeling program to describe and define mechanical objects using current industrial standards. An introduction to basic dimensioning and tolerancing techniques is included.

ME 220 ENGINEERING THERMODYNAMICS I. (3)
Fundamental principles of thermodynamics. Prereq: PHY 231. Prereq or concur: MA 214.

ME 301 ENGINEERING EXPERIMENTATION I. (3)
An introductory course in measurement and instrumentation emphasizing measurement errors, elementary statistics, uncertainty analysis, sensors, time and frequency response of instrumentation components, signal conditioning circuitry, and digital data acquisition. Applications include the measurement of strain, pressure, temperature, flow, force, torque, and vibration. Lecture, two hours; laboratory, three hours. Prereq: ME 101, ME 330, EE 305 and engineering standing. Prereq or Co-req: ME 340.

ME 311 ENGINEERING EXPERIMENTATION II. (3)
A laboratory to instruct the student in the performance of basic mechanical engineering components and systems. Performance of experiments, application of theory and reporting. Introduction to error analysis, and design and planning of experiments. Lecture, one hour; laboratory, four hours. Prereq: ME 310, 321, 325 and engineering standing.

ME 321 ENGINEERING THERMODYNAMICS II. (3)

ME 325 ELEMENTS OF HEAT TRANSFER. (3)
Fundamental principles of conduction, convection, radiation heat transfer. Numerical methods for heat transfer problems. Design and applications of heat transfer equipment such as fins and heat exchangers. Prereq: ME 330, MA 214, and engineering standing.

ME 330 FLUID MECHANICS. (3)
Introduction to the physical properties of fluids, fluid statics. Equations of conservation of mass, momentum and energy for systems and control volumes. Dimensional analysis and similarity. Principles of inviscid and real fluid flows; flow through pipes and around bodies. Application and design of fluid handling systems. Prereq: Engineering standing, ME 220, and MA 214.

ME 340 INTRODUCTION TO MECHANICAL SYSTEMS. (3)
Modeling of mechanical, thermal, hydraulic and electrical systems, and other phenomena from a systems viewpoint. Analysis of continuous-time models for free and forced response. Laplace transforms and transfer functions. Introduction to numerical simulation. Analysis of higher-order systems. Prereq: EM 313 and engineering standing.

ME 344 MECHANICAL DESIGN. (3)
Fundamentals of design with methods of approximation. Introduction to optimum design considerations. Synthesis and problems on the design of various mechanical elements. Prereq: ME 151, EM 302, engineering standing; concur: EM 313.

ME 358 ECONOMIC ANALYSIS OF MECHANICAL SYSTEMS. (3)
Formulation of economic relationships. Familiarization with alternate mechanical systems and application of economic principles of selection of alternates. Prereq: ME 321, engineering standing or consent of instructor.

ME 380 TOPICS IN MECHANICAL ENGINEERING (Variable topics). (3)
A lecture-recitation course on a topic of current interest. Modern developments in mechanical engineering will be offered. As a technical elective in mechanical engineering. May be repeated to a maximum of nine credits. Prereq: Variable, given when topic identified and engineering standing.

ME 395 INDEPENDENT WORK IN MECHANICAL ENGINEERING. (1-6)
Special research and problems for individual students who wish to pursue independent investigations. May be repeated to a maximum of six credits. Prereq: Consent of department chairperson via permit.

ME 407 ENGINEERING ETHICS. (1)
Review of the growth and development of the profession, engineering ethics, obligations to employers and peers, limits of professional responsibility, codes of ethics and enforcement, and case studies. Prereq: Registration in the College of Engineering and engineering standing.

ME 408 SAFETY ENGINEERING. (2)
Review of general safety hazards, system engineering safety, fault free analysis, reliability, accident reconstruction and investigation. Case studies will be included. Prereq: Engineering standing and concur: ME 344.

ME 411 ME CAPSTONE DESIGN I. (3)
The first semester of the capstone design sequence in mechanical engineering. Topics important in product design and manufacturing are included, including consideration of economics, safety, and communication. Students will develop a project plan concerned with the design of a complex system of current interest to mechanical engineers. Students will work in small groups and emphasis will be on original work. Lecture, two hours; laboratory/independent team work, three hours per week. Prereq: Engineering standing; prerequisite: ME 310, ME 325, ME 340, ME 344.

ME 412 ME CAPSTONE DESIGN II. (3)
Second semester of the capstone design sequence in mechanical engineering. Students will complete a project concerned with the design of a complex system of current interest to mechanical engineers. Students will work in small groups and emphasis will be on original work. Topics include engineering ethics, design and communication. Lecture, 1 hour; lab 4 hours per week. Prereq: ME 411 and engineering design. Course is to be taken semester immediately following ME 411.

ME 440 DESIGN OF CONTROL SYSTEMS. (3)

ME 480G HEATING, VENTILATING AND AIR-CONDITIONING. (3)
An introductory course emphasizing the engineering systems aspects of thermal environmental design. Principles and applications of building energy requirements and thermal comfort criteria. Prereq: ME 325 and Engineering standing or consent of instructor. (Same as AEN 480G.)

ME 501 MECHANICAL DESIGN WITH FINITE ELEMENT METHODS. (3)
Mechanical design techniques based on the finite element method, using machine design background as the starting point. Techniques for modeling machine elements will be shown in relation to the basic FEM theory. Emphasis will be on quantifying loads, the resulting stress and deflection, and relating them to design allowable, leading to an acceptable design solution. Prereq or concur: Engineering standing, ME 344 and ME 205; or graduate standing.

ME 503 LEAN MANUFACTURING PRINCIPLES AND PRACTICES. (3)
Introduction of the fundamental concepts for production improvement utilizing lean manufacturing principles and practices. This course will consist of lectures, manufacturing simulation laboratory, plant tours, design projects, and assigned problems drawn from industry. Prereq: Enrollment restricted to junior-level or above students. (Same as MFS 503.)

ME 505 MODELING OF MANUFACTURING PROCESSES AND MACHINES. (3)
A study of the major manufacturing processes and equipment. Emphasis on mathematical and computer models of these processes, as used in automated manufacturing and control of these processes. Lecture, two hours; laboratory, two hours. Prereq: EM 302, EM 313, and engineering standing; or graduate standing with instructor consent. (Same as MFS 505.)

ME 506 MECHANICS OF COMPOSITE MATERIALS. (3)
A study of the structural advantages of composite materials over conventional materials, considering high-strength-to-weight and stiffness-to-weight ratios. Fiber reinforced, laminated and particulate materials are analyzed. Response of composite structures to static and dynamic loads, thermal and environmental effects, and failure criteria are studied. Prereq: EM 302, engineering standing or consent of instructor. (Same as EM/MS 506.)
ME 507 DESIGN FOR MANUFACTURING. (3) The topics will include fundamentals of concurrent engineering, product life cycle, product specification, standardization, functional requirements and datum features, selection of materials and manufacturing processes, cost analysis, case studies on designing for quality, economy, manufacturability and productivity. Prereq: ME 344 and engineering standing. (Same as MFS 507.)

ME 510 VIBRO-ACOUSTIC DESIGN IN MECHANICAL SYSTEMS. (3) Application of basic acoustics and vibrations to engineering problems in vibro-acoustic design. The objective is to acquaint the student with the tools used in industry for noise and vibration control and to make the student aware of the major applications of such tools in the automotive, aerospace, and consumer product industries. Prereq: ME 310, ME 340.

ME 512 MANUFACTURING SYSTEMS. (3) This course introduces students to fundamentals of design, planning and control of manufacturing systems aided by computers. Concepts of control hardware, NC programming languages, software aspects related to NC manufacturing, programmable controllers, performance modeling of automated manufacturing systems, group technology and flexible manufacturing systems, etc. will be addressed. Prereq: Engineering standing. (Same as MFS 512.)

ME 513 MECHANICAL VIBRATIONS. (3) The analysis of vibrational motion of structural and mechanical systems. Single-degree-of-freedom systems; forced vibrations; nonperiodic excitation; harmonic excitation. Modal analysis of multiple-degree-of-freedom systems. Vibration of continuous bodies, including strings and bars (axial, torsional and flexural modes). Energy methods. Prereq: EM 313 and EM 302, engineering standing or consent of instructor. (Same as EM 513.)

ME 514 COMPUTATIONAL TECHNIQUES IN MECHANICAL SYSTEM ANALYSIS. (3) Computer-based methods of analyzing mechanical systems are studied. The studies include the numerical solution techniques on which the analyses are based. Linear and nonlinear static and dynamic systems are analyzed. Finite element and other engineering software packages are used. Prereq: ME 340 or graduate standing.

ME 527 APPLIED MATHEMATICS IN THE NATURAL SCIENCES I. (3) Construction, analysis and interpretation of mathematical models applied to problems in the natural sciences. Physical problems whose solutions involve special topics in applied mathematics are formulated, various solution techniques are introduced, and the mathematical results are interpreted. Fourier analysis, dimensional analysis and scaling rules, regular and singular perturbation theory, random processes and diffusion are samples of selected topics studied in the applications. Intended for students in applied mathematics, science and engineering. Prereq: MA 432G or three hours in an equivalent junior/senior level mathematics course or consent of the instructor. (Same as EM/MA 527.)

ME 530 GAS DYNAMICS. (3) Consideration of the mass, energy and force balances applied to compressible fluids. Isentropic flow, diabatic flow, flow with friction, wave phenomena and one-dimensional gas dynamics. Applications to rockets and jet and rocket propulsion engines. Prereq: ME 321, ME 330 and Engineering standing.

ME 531 FLUID DYNAMICS I. (3) Stress at a point (introduced as a tensor of rank two). Equation of conservation of mass, rate of strain tensor, derivation of Navier-Stokes equation, source-sink flows, motion due to a doublet, vortex flow, two- and three-dimensional irrotational flow due to a moving cylinder with circulation, two-dimensional airfoils. Prereq: ME 330, MA 432G and Engineering standing.

ME 532 ADVANCED STRENGTH OF MATERIALS. (3) Unsymmetrical bending of beams, thin plates, stress analysis of thick-walled cylinders, and rotating discs. Theory of elastic energy, curved beams, stress concentration, and fatigue. Prereq: ME 302 and engineering standing. (Same as EM 531.)

ME 548 AERODYNAMICS OF TURBOMACHINERY. (3) Aerodynamic analysis and design of turbomachines (pumps, compressors and turbines). Blade element performance (deflection and losses), and models for performance prediction are present. Special topics - rotating stall and surge, and aeromechanical considerations. Prereq: ME 321 and ME 330.

ME 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMERSYSTEMS. (3) Theory and practice as related to the chemical and physical processing of polymer systems. Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425 or ME 325; or consent of instructor. (Same as CME/MFS/MSE 554.)

ME 555 INTRODUCTION TO MICRO-/NANO-ELECTROMECHANICAL SYSTEMS. (3) This course provides an overview of micromachined structures with an emphasis on operational theory and fabrication technology. Prereq: Engineering standing or consent of instructor. (Same as E/E/MSE 555.)

ME 556 INTRODUCTION TO COMPOSITE MATERIALS. (3) Applications, materials selection and design of materials. Relation between properties of constituent materials and those of composite. Processing methods for materials and for some structures. Lab focuses on preparation and testing of composite materials and their constituents. Prereq: MSE 201, 301, CHE 236, and Engineering Standing, or consent of instructor. (Same as CME/MSE 556.)

ME 560 ENGINEERING OPTICS. (3) Fundamentals of geometrical and physical optics; applications as related to problems in engineering design and research; details of some optical measurement techniques; introduction to lasers and their applications to heat transfer and combustion research; inverse analytical techniques for determining optical properties of small particles from light scattering and extinction measurements. Prereq: Engineering standing.

ME 563 BASIC COMBUSTION PHENOMENA. (3) Simultaneous application of fluid mechanics, heat and mass transfer, chemical kinetics and thermodynamics to combustion. Topics covered include chemical kinetics, chain and thermal explosions, detonation and deflagration, flammability limits, stirred reactors. Flame stabilization in high and low velocity streams, laminar and turbulent diffusion flames, droplet burning, and metal combustion. Prereq: ME 321, ME 330, ME 329 and engineering standing, or graduate standing.

ME 565 SCALE MODELING IN ENGINEERING. (3) A study of concepts of scale modeling in engineering applications. The course will include dimensionless numbers, scaling laws, and their application in engineering design and research. Prereq: ME 310, ME 321, ME 325.

ME 570 FUNDAMENTALS OF NONDESTRUCTIVE EVALUATION. (3) Energy bonds in crystals; heterostructures; quantum wells and low dimensional systems; the two-dimensional electron gas and MODFET; transmission in nanostructures; current topics and nanodevices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as EE/MSE 570.)

ME 580 HEATING, VENTILATING AND AIR CONDITIONING. (3) A course emphasizing the use of thermodynamics, fluid mechanics, and heat transfer principles in thermal environmental design. Building energy requirements will be computed and thermal comfort criteria will be studied. Prereq: BAE 427 or ME 321 or consent of instructor. (Same as BAE 580.)

ME 585 FOURIER SERIES AND BOUNDARY VALUE PROBLEMS. (3) An introductory treatment of Fourier series and its application to the solution of boundary value problems in the partial differential equations of physics and engineering. Orthogonal sets of functions, Fourier series and integrals, solution of boundary value problems, theory and application of Bessel functions and Legendre polynomials. Prereq: MA 432G or equivalent. (Same as MA 485G/EM 585.)

ME 599 TOPICS IN MECHANICAL ENGINEERING (Subtitle required). (3) A detailed investigation of a topic of current significance in mechanical engineering such as: computer-aided manufacturing, special topics in robotics, and current topics in heat transfer. May be repeated under different subtitles to a maximum of nine credits. A particular topic may be offered at most twice under the ME 599 number. Prereq. Variable, given when topic is identified.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following courses should have a thorough working knowledge of chemistry, physics and mathematics.

ME 601 ADVANCED CAE APPLICATIONS. (3) This course will include development of theory for application to several topics in advanced engineering applications of computers in design. Typical topics include rolling element bearings, fluid film bearings, rotor dynamics, and elastoplastic analysis. When appropriate, specialized computer programs will be introduced and utilized to illustrate the application of theory and numerical techniques in the areas covered. Prereq: ME 501.

ME 602 DYNAMICS OF DISTRIBUTED MECHANICAL SYSTEMS. (3) Applications of small-oscillation shell theory to continuous mechanical systems modeled by shells, plates, rings, arches, membranes, beams, etc. Study of natural frequencies, modeshapes, forced-vibration characteristics, system damped, dynamic influence function, combination of subsystems, active and passive vibration controls and dampsings. Prereq: ME 540 or EM 513, or consent of instructor.

ME 603 MECHANICS OF PLASTIC SOLIDS. (3) Permanent changes in shape of solid materials occurs as plastic deformations in many engineering applications, such as extrusion, forging and rolling. This course examines the experimental basis and fundamental theoretical framework for plastic materials. The analysis of plastic deformations in simple bending, torsion, tension and compression, and some two-dimensional problems are presented. Connection between mechanics parameters, design variables and metallurgical phenomena are discussed. Limit analysis is studied. Prereq: EM 601/ME 641, or EM/ME 651 or consent of instructor.

ME 606 SEMINAR AND PROJECT IN MANUFACTURING SYSTEMS ENGINEERING. (3) A project course for manufacturing systems. Course consists of seminar presentations by outside professionals and faculty and a course project on a realistic manufacturing systems assignment. Lecture, two hours; laboratory, two hours. (Same as EE/MSE 606.)
The motions utilize the concept of reference frames. The inertia properties of rigid bodies, and many physical systems in engineering involve rigid bodies in translation and rotation. Such equations of motion and the energy equation. Entropy, the principles of material frame deformation and strain. Continuum balance principles of mass, momentum and energy. The solution of the scalar velocity wave potential; numerical methods. Prereq: EGR 537 or consent of instructor.

**ME 610 ENGINEERING ACOUSTICS.** (3)

A comprehensive study of wave propagation in fluids; derivation of the scalar wave equation and a study of its elementary solutions for time harmonic and transient waves in one, two and three dimensions. Radiation and scattering of waves at fluid and solid boundaries. Integral equation solution of the scalar wave equation in potential field problems. Many physical systems exhibit some non-linear behavior. This course presents some methods of analyzing discrete, non-linear, dynamical systems and applies the methods to typical mechanical systems. Various kinds of non-linear behavior, including resonance phenomena such as harmonics, parametric excitation, and discontinuous jumps in amplitude are considered. Lyapunov stability criteria and Floquet and Routhian procedures for performing stability analyses of systems are introduced, and their physical interpretations for various systems are studied. Prereq: E&M/ME 513.

**ME 620 ADVANCED ENGINEERING THERMODYNAMICS.** (3)

Critical treatment of the laws of thermodynamics, relations among thermodynamic properties; stability of systems; thermodynamic processes; selected special topics. Prereq: ME 321.

**ME 626 ADVANCED HEAT CONVECTION.** (3)

Comprehensive study of heat convection; derivation of equations of convection of mass, momentum, and energy; boundary layer equations; classical solutions of laminar convection problems; turbulent convection; analogies between momentum and energy. Prereq: ME 325, MA 432G or concurrent.

**ME 627 RADIATION HEAT TRANSFER.** (3)

Principles of thermal radiation, the determination of radiation properties, and the analysis of radiation heat transfer. Results of recent radiation researches are included in the discussions. Prereq: ME 325, MA 432G or concurrent.

**ME 628 BOILING AND CONDENSATION.** (3)

**ME 631 FLUID DYNAMICS II.** (3)

A continuation of ME 531 with emphasis on viscous flow. Exact and approximate solutions, boundary layer theory. Jets, wakes, rotating systems, compressible boundary layer and hydrodynamic stability. Prereq: ME 531 or consent of instructor.

**ME 634 TURBULENT FLOWS.** (3)

Physical and analytical description of turbulent flows, isotropic turbulence, boundary layers and shear flows, free turbulence in jets and wakes. Measurement techniques. Prereq: ME 531; prereq or concur: ME 631.

**ME 640 ADVANCED ANALYSIS AND SIMULATION OF DYNAMIC SYSTEMS.** (3)

An extension of ME 540 emphasizing advanced techniques. The concept of random processes in mechanical engineering problems; nonparametric and parametric models. The use of correlation, spectral analysis and digital filtering in data analysis and model building. Prereq: ME 540.

**ME 641 FOUNDATIONS OF SOLID MECHANICS.** (3)

A brief review of vectors and an in-depth discussion of tensors and tensor calculus. Stress, deformation and strain. Continuum balance principles of mass, momentum and energy, the fundamental equations of motion and the energy equation. Entropy, the principles of material frame indifference and material symmetry. Various constitutive models, including elasticity (linear and/or non-linear), plasticity and viscoelasticity. Thermoelasticity, hyperelasticity, hypoelasticity, and electroelasticity may also be addressed. Prereq: EM 531 or ME 532 or consent of instructor.

**ME 644 ADVANCED DYNAMICS.** (3)

Many physical systems in engineering involve rigid bodies in translation and rotation. Such motion is analyzed by the use of Euler’s “Law”. The kinematical description of the motions utilizes the concept of reference frames. The inertia properties of rigid bodies, and the energy functions for rigid bodies are covered. Analytical and numerical solutions of dynamical systems of engineering interest are considered. Prereq: EM 313; prereq or concur: MA 432G.

**ME 645 ADVANCED CONTROL SYSTEM ANALYSIS.** (3)

Conceptual development and study of complex systems; their synthesis and design; analysis and optimization of system parameters. Input-output relationships; formulation of mathematical models, parameters and constraints on physical systems. Prereq: ME 440 or instructor consent.

**ME 647 SYSTEM OPTIMIZATION I.** (3)

Introduction to linear and nonlinear optimization and their use in engineering design. Emphasis on numerical approaches and use of optimization methods for engineering systems (e.g., biological, mechanical, structural). Prereq: CS 221 or equivalent; one mathematics course beyond MA 214 or equivalent. (Same as BAE 647.)

**ME 651 MECHANICS OF ELASTIC SOLIDS I.** (3)

Many engineering applications involve the use of materials that behave elastically when performing their desired function. This course concerns the general analysis of small deformations, stresses, and stress-deformation relations for elastic bodies. The solution of typical problems frequently encountered in engineering applications, e.g., extension, bending, and torsion of elastic bars, stress concentrations and thermoelastic behavior, are studied. Some modern computational methods currently used in engineering practice are introduced. Prereq: MA 432G or consent of instructor.

**ME 652 MECHANICS OF ELASTIC SOLIDS II.** (3)

Continuation of EM 651 with more attention to the fundamental structure of and important historical and contemporary contributions to elastic theory. Extensive use of modern computational methods that were introduced in the first course will provide familiarity with the solution of larger scale, industrially important elasticity problems. Application of the boundary integral equation method (BIE) will be emphasized. Some use also will be made of the finite element method, primarily for comparison with BIE. Instruction will include “hands-on” experience with digital-computer program packages. Prereq: EM 651 or consent of instructor.

**ME 653 METHODS OF APPLIED DIFFERENTIAL EQUATIONS.** (3)

Integrals of non-linear partial differential equations; similarity variables and other transformations; perturbation methods; weighted residual methods; numerical methods; selected topics. Prereq: MA 432G or consent of instructor.

**ME 659 ADVANCED ALGORITHMS FOR COMPUTATIONAL FLUID DYNAMICS.** (4)

Theory and implementation of main algorithms widely used for solving multi-dimensional partial differential equations arising in engineering applications such as fluid dynamics, heat and mass transfer, semiconductor simulation, etc. Numerical solution of steady and time-dependent Eulerian and Lagrangian partial differential equations on rectangular domains via finite difference techniques. Linearization methods for treatment of nonlinear problems. Numerical grid generation for transforming irregular domains into rectangular computational grids. Prereq: MA 537, or consent of instructor, and competence with a high-level programming language.

**ME 691 CFD I - INCOMPRESSIBLE FLOWS.** (3)

This course will cover a control-volume CFD approach for the conservation of momentum, heat and mass transfer. The emphasis will be on the discretization of the transport equations in general coordinates and its application in both structured and unstructured grid arrangements. Modern numerical schemes and pressure solution algorithms will also be covered. An introduction to turbulence modeling will be provided. At the end of the lecture, the students must be able to understand the basic approach to commercial software and also be able to write a general coordinate code for fluid flow, heat and mass transfer applications. Prereq: ME 531.

**ME 692 CFD II - COMPRESSIBLE FLOWS.** (3)

This second course shall focus on the solution of the compressible Navier-Stokes equations. The Van-Leer’s and Roe’s approaches will be discussed to derive the discretization equations. Modern shock capturing schemes, such as FCT, TVD and ENO will be introduced. The solution techniques such as ADI, DDAI and line-relaxation will be used to solve the system of equations. Multi-grid acceleration techniques will be introduced to speed up the rate of convergence. Finally, the parallelization of CFD codes using shared and distributed computers will be discussed. Prereq: ME 531 and ME 691.

**ME 699 TOPICS IN MECHANICAL ENGINEERING (Subtitle required).** (3)

A detailed investigation of a topic of current significance in mechanical engineering. May be repeated to a maximum of nine credits under different subtitles. A particular topic may be offered at most twice under the ME 699 number. Prereq: Variable; given when topic is identified.

**ME 748 MASTER’S THESIS RESEARCH.** (0-12)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**ME 749 DISSERTATION RESEARCH.** (0-12)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying examination. A particular topic may be offered at most twice under the ME 769 number. Prereq: Variable; given when topic is identified.
ME 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

ME 769 RESIDENCE CREDIT FOR DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

ME 780 SPECIAL PROBLEMS IN MECHANICAL ENGINEERING. (3)
This course consists of individual work in one of the various fields of mechanical engineering.
May be repeated three times for a maximum of 12 credits. Prereq: Approval of instructor.

ME 790 RESEARCH IN MECHANICAL ENGINEERING. (1-9)
Work may be taken in any field of mechanical engineering, subject to the approval of the director
of graduate studies. May be used to satisfy pre-qualifying examination residency credit. May be
repeated to a maximum of 18 hours.

MED 616 BIOLOGY AND THERAPY OF CANCER. (3)
Biology of cancer will be discussed at the molecular, cellular and organismic level. Emphasis will
be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects
tumor cell behavior and its interactions with the host immune system. The biology of hematopoetic
cells will also be included. Clinicians active in treatment and research of various types of cancer
will be invited to participate in the lectures. Prereq: BCH 501, 502, BIO 685. (Same as MU/PHA 616.)

MED 815 FIRST-YEAR ELECTIVE, MEDICINE. (1-3)
With the approval of his or her faculty adviser, the first-year student may choose approved
 electives offered by the Department of Medicine. The intent is to provide the student
an opportunity for exploration and study in an area which supplements and/or complements
required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first
year, College of Medicine.

MED 825 SECOND-YEAR ELECTIVE, MEDICINE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose
approved electives offered by the Department of Medicine. The intent is to provide the student
an opportunity for exploration and study in an area which supplements and/or complements
required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-
year medical curriculum and approval of adviser.

MED 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions
Committee, the fourth-year student may choose approved electives offered by the various
departments in the College of Medicine. The intent is to provide the student an opportunity
to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth-
year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:

MED 850 CLINICAL ENDOCRINOLOGY AND METABOLISM, ADULT
MED 851 GASTROINTESTINAL DISEASE, UK AND VAH
MED 852 DERMATOLOGY-SECTION 1
MED 856 NEPHROLOGY, BONE AND MINERAL METABOLISM
MED 857 PULMONARY MEDICINE
MED 858 CARDIOLOGY-UK
MED 860 INFECTIOUS DISEASES
MED 862 CARDIOLOGY-VAH
MED 863 RESEARCH IN MEDICINE
MED 865 SLEEP MEDICINE
MED 867 PATIENT SAFETY AND SYSTEMS ANALYSIS
MED 870 ACTING INTERNSHIP IN MEDICINE
MED 872 ACTING INTERNSHIP IN MED-PEDS
MED 873 MEDICAL SPECIALTIES AND GENERAL MEDICINE CLINICS
MED 874 STUDENT HEALTH SERVICE
MED 875 MEDS-PEDS AMBULATORY ELECTIVE
MED 876 HEMATOLOGY-ONCOLOGY, UK
MED 879 GENERAL MEDICAL CONSULTING SERVICE
MED 890 INTERNAL MEDICINE OFF-SITE

MFS 503 LEAN MANUFACTURING PRINCIPLES AND PRACTICES. (3)
Introduction of the fundamental concepts for production improvement utilizing lean manu-
facturing principles and practices. This course will consist of lectures, manufacturing simulation
laboratory, plant tours, design projects, and assigned problems drawn from industry. Prereq: Enrollment restricted to junior-level or above students. (Same as ME 503.)

MFS 505 MODELING OF MANUFACTURING PROCESSES AND MACHINES. (3)
A study of the major manufacturing processes and equipment. Emphasis on mathematical and
computer models of these processes, as used in automated manufacturing and control of these
processes. Lecture, two hours; laboratory, two hours. Prereq: EM 302, EM 313, and
engineering standing; or graduate standing with instructor consent. (Same as ME 505.)

MFS 507 DESIGN FOR MANUFACTURING. (3)
The topics will include fundamentals of concurrent engineering, product life cycle, product
specification, standardization, functional requirements and datum features, selection of
materials and manufacturing processes, cost analysis, case studies on designing for quality,
economy, manufacturability and productivity. Prereq: ME 344 and engineering standing.
(Same as ME 507.)

MFS 512 MANUFACTURING SYSTEMS. (3)
This course introduces students to fundamentals of design, planning and control of manufac-
turing systems aided by computers. Concepts of control hardware, NC programming
languages, software aspects related to NC manufacturing, programmable controllers, perfor-
mance modeling of automated manufacturing systems, group technology and flexible manu-
facturing systems, etc. will be addressed. Prereq: Engineering standing. (Same as ME 512.)

MFS 525 ORGANIZATIONAL LEARNING FOR LEAN MANUFACTURING. (3)
Learning organizations are skilled at creating, acquiring, and transferring knowledge, and at
modifying their behavior to reflect the new knowledge and insights. In this context, this course
will discuss leadership styles, adult learning principles, communication, organizational
behaviors, and a structure for learning. Prereq: MFS 503 or consent of instructor.

MFS 526 OPERATIONS MANAGEMENT IN LEAN MANUFACTURING. (3)
Principles and practices of lean manufacturing operations management. The focus is on
manufacturing as a sociotechnical system and how to limit variability through various methods
of control of basic processes. Emphasis is on managing an effective and efficient technical
system. Prereq: Enrollment restricted to junior-level or above students.

MFS 554 CHEMICAL AND PHYSICAL PROCESSING OF POLYMER SYSTEMS. (3)
Theory and practice as related to the chemical and physical processing of polymer systems.
Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer
processing operations and materials selection, flow instabilities. Prereq: CME 330, CME 425
or ME 325; or consent of instructor. (Same as CME/ME/MSE 554.)

MFS 563 SIMULATION OF INDUSTRIAL PRODUCTION SYSTEMS. (3)
Discrete event simulation and its application to performance analysis of industrial production
systems. Topics include concepts for characterizing production systems, approaches to
structuring simulation models, instruction in a simulation language, and techniques for
comparing alternative system designs and control strategies. Applications to manufacturing,
commercial and mining production systems are considered. Prereq: CS 221 or 270, STA 2381
or 381, engineering standing. (Same as MNG 563.)

MFS 599 TOPICS IN MANUFACTURING SYSTEMS ENGINEERING (Subtitle required). (3)
A detailed investigation of a topic of current significance in manufacturing systems engineering
such as: computer-aided manufacturing, special topics in robotics, and lean/ailequality
manufacturing. May be repeated under different subtitles to a maximum of six credits. A particular topic may be offered at most twice under the MFS 599 number. Prereq: Variable; given when topic is
identified.

MFS 603 MANAGEMENT FOR LEAN SYSTEM. (3)
This course provides the MFS student an opportunity to develop skills in managing a lean
system at the ‘shop floor’ level.

MFS 605 SYSTEMS FOR FACTORY INFORMATION AND CONTROL. (3)
Systems approach to manufacturing, hardware and software for real-time control and reporting.
Sensor and actuators, controllers, networks, databases, hierarchical and distributed control,
CAD/CAM systems, flexible manufacturing systems, group technology, modeling and
simulation of factory operations. Lecture, two hours; laboratory, two hours. Prereq: MFS 505.
(Same as EE 605.)

MFS 606 SEMINAR AND PROJECT IN MANUFACTURING SYSTEMS ENGINEERING. (3)
A project course for manufacturing systems. Course consists of seminar presentations by
outside professionals and faculty and a course project on a realistic manufacturing systems
assignment. Lecture, two hours; laboratory, two hours. (Same as EE/ME 606.)

MFS 607 ANALYSIS OF METAL CUTTING PROCESSES. (3)
Advanced study of metal cutting involving the mechanics of metal cutting including cutting
forces, tool-wear/tool-life and temperature analysis, surface finish and integrity, chip control,
machinability assessments and advances in cutting tool technology. Prereq: ME 505. (Same
as ME/MSE 607.)

MFS 609 LEADERSHIP FOR LEAN SYSTEM. (3)
Leadership competencies presented in this course are: Design of infrastructure; Toyota model
for developing leaders; Importance of matrix structures; Organization behavior dimensions;
resource management; Procurement systems dynamics; Operations dynamics; distribution
logistics; and customer relations. Course presentation will utilize lecture and case study.
Prereq: MFS 503.

MFS 611 ORGANIZATIONAL BEHAVIOR. (3)
A critical examination of behavior and performance within organizations and between
organizations. Special attention is paid to the problem of performance at the individual, group,
and formal organizational level. Prereq: Enrollment in Manufacturing Systems Engineering
Program. (Same as MGT 611.)
MFS612 DESIGN OF LEAN MANUFACTURING SYSTEMS. (3)
Technical design of manufacturing systems in accordance with lean manufacturing principles. Topics include models for characterization and analysis of factory flow dynamics, production flow analysis, work cell design, and design of pull-based production control systems. Prereq: MFS 503 Lean Manufacturing Principles and Practices.

MFS681 SUSTAINABLE QUALITY SYSTEMS DESIGN. (3)
This course provides the theory and principles of sustainable quality production systems as originally developed by Shewhart and Deming. The course will focus on statistical methods from the viewpoint of quality control: at the product specification level; at the product production level; and at the judgment of quality at the inspection level. Prereq: Basic statistics.

MFS699 TOPICS IN MANUFACTURING SYSTEMS ENGINEERING (Subtitle required). (1-3)
A detailed investigation of a topic of current significance in manufacturing systems engineering such as: computer-aided manufacturing, special topics in robotics, and lean and agile manufacturing. May be repeated under different subtitles to a maximum of six credits. A particular topic may be offered at most twice under the MFS 699 number. Prereq: Variable; given when topic is identified.

MGT748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MGT768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MGT780 SPECIAL PROBLEMS IN MANUFACTURING SYSTEMS ENGINEERING. (3)
Course consists of specialized individual work in manufacturing systems engineering. Laboratory, nine hours. May be repeated to a maximum of nine credits. Prereq: Approval of instructor.

MGT784 RESEARCH PROJECT IN MANUFACTURING SYSTEMS ENGINEERING. (3)
Individual study related to a special research project supervised by the student’s advisor. A final written report on the project is required. This course is open only to and required by students pursuing the M.S. in MGT’s degree with a non-thesis option (Plan B). The course cannot satisfy part of the required thirty hours of course work for Plan B. Prereq: Approval of student’s advisor.

MGT301 BUSINESS MANAGEMENT. (3)
A study of planning, organizing and controlling; an interdisciplinary approach, actual decision-making cases. Prereq: STA 291, ECO 201, 202 and ACC 202, or consent of instructor.

MGT309 INTRODUCTION TO INTERNATIONAL BUSINESS. (3)
The course focuses on the management of international businesses, investigating the effects of differences in national requirements, and cultural expectations on management. Prereq: MGT 301.

MGT320 SURVEY OF HUMAN RESOURCE MANAGEMENT. (3)
Survey of the field of Human Resource Management. Includes an introduction to the topics of labor law, workforce planning, recruitment, selection, training, performance management, compensation, and labor relations. Prereq: MGT 301.

MGT340 ETHICAL AND REGULATORY ENVIRONMENT. (3)
This course focuses on ethical principles, the nature of the capitalist-collectivist continuum, government influence on business, and the responsibility of business to society. Topics to be considered include major approaches to ethical reasoning, antitrust law, social regulation, and the economic and social theories that undergird the concept of the social responsibility of business. Prereq: Junior standing or consent of instructor.

MGT341 BUSINESS LAW. (3)
An introduction to the United States legal system and its application to the business community. Topics to be considered include: contracts, agency, commercial paper, and real property. Prereq: Junior standing or consent of instructor.

MGT390 SPECIAL TOPICS IN MANAGEMENT (Subtitle required). (3)
Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in management. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most three times under the MGT 390 number. Prereq: Consent of instructor.

MGT395 INDEPENDENT STUDY IN MANAGEMENT. (1-6)
Course designed to accommodate students’ independent exploration of specific topics within management. Course must be under the supervision of an instructor. May be repeated to a maximum of six credits. Prereq: GPA of 3.0, upper division status, approval of instructor and chairperson.

MGT410 ANALYSIS OF ORGANIZATIONAL BEHAVIOR. (3)
This course draws on a variety of pedagogical sources – ranging from social psychological theories to in-depth case analyses and organizational simulations – to help students better manage the human and interpersonal challenges they confront in the contemporary workplace.

MGT430 SERVICES MARKETING MANAGEMENT. (3)
This course addresses marketing and management issues and problems faced by service organizations. Marketing and management concepts are broadened and applied to the service organizations. Topics related to service quality, the marketing mix, and service delivery are covered. Prereq. MKT 300, MGT 301. (Same as MKT 430.)

MGT450 NEGOTIATIONS AND CONFLICT RESOLUTION. (3)
This course focuses on developing your negotiating skills and making you a more confident negotiator. Topics covered include: diagnosing negotiation situations, strategizing and planning upcoming negotiations, learning your preferred negotiating style, dealing with difficult negotiation partners, buying cars and houses, negotiating job offers, dealing with vendors, multi-issue negotiations, multi-party negotiations, ethical considerations in negotiation, and global negotiations. The course emphasizes in-class role playing as a learning tool; thus, class attendance is mandatory. Prereq: MGT 301.

MGT491 SMALL BUSINESS MANAGEMENT. (3)
An examination of the problems and decisions inherent in the establishment, financing, and management of small business firms. Prereq: MKT 300, MGT 301, MGT 340 and FIN 300.

MGT492 ENTREPRENEURSHIP AND VENTURE CREATION. (3)
This course examines the key issues that are associated with the discovery and development of entrepreneurial opportunities as it applies to venture creation. Some emphasis is placed on the role of the entrepreneur in society as it pertains to increasing economic and social welfare for others. Students will develop an understanding of entrepreneurship as it relates to the people, opportunity, context and deal aspects of the new venture creation process. Prereq: Senior standing and MGT 300, MGT 340 or MGT 341 and FIN 300.

MGT499 STRATEGIC MANAGEMENT. (3)
This course focuses on the unique challenges of managing the full range of business functions and processes in single-business and diversified companies. It actively involves students in the exploration of current strategic management concepts, frameworks, and techniques commonly used by top-level managers to gain competitive advantage over rival companies. Prereq. MKT 300, MGT 301, MGT 340, FIN 300 and senior standing.

MGT608 COMPARATIVE INTERNATIONAL MANAGEMENT. (3)
A comparison of management concepts and practices in different countries and the role of management in economic development; an interdisciplinary approach emphasizing the impact of sociological-cultural factors, legal-political factors and education on management development. Prereq: MGT 301 or consent of instructor.

MGT610 GLOBAL MANAGEMENT. (3)
This course examines the problems of managing a business enterprise which spans international boundaries. Students will develop an understanding of the political, social, economic, and technological factors driving globalization and will consider the impact of these forces on competition, markets, industry structure, and organization.

MGT611 ORGANIZATIONAL BEHAVIOR. (3)
A critical examination of behavior and performance within organizations and between organizations. Special attention is paid to the problem of performance at the individual, group, and formal organizational level. Prereq: Enrollment in Manufacturing Systems Engineering Program. (Same as MFS 611.)

MGT612 STRUCTURED PROBLEM SOLVING IN BUSINESS. (3)
An action learning course devoted to developing the project management and business process analysis skills necessary to diagnose and solve real-world business problems. Prereq: DIS 651; ECO 610; DIS 620.

MGT620 PERSONNEL AND INDUSTRIAL RELATIONS. (3)
Critical examination of theory, research, and managerial practice in the management of human resources. Particular attention is paid to the processes of human resource planning, staffing, compensation, and the management of employer-relation. Prereq: MGT 611, ECO 610, ACC 628, MGT 650, MGT 650, ECO 611, FIN 600, MGT 651.

MGT640 LEGAL AND REGULATORY ENVIRONMENT. (3)
The purposes of this course are: 1) to establish an introductory understanding of the nature, dimensions, and impact of government regulation of business, 2) to explore, in summary fashion, the rudiments of the capitalist-collectivist continuum, 3) to intro the student to ethical dilemmas in the decision process, and 4) to exercise the student’s skills in analysis, writing, and speaking. Prereq: Graduate standing: MGT 611, ECO 610, ACC 628, MGT 650, MGT 600, ECO 611, FIN 600, MGT 651.

MGT641 LEGAL ISSUES IN THE ACCOUNTING PROFESSION. (3)
A study of various legal issues in the accounting profession. Among the topics covered are accountant’s liability, commercial transactions, business organizations, property concepts and other issues in the legal environment that will be encountered in accounting practice. Prereq: Admission to MSACC program or consent of DGSS.
MGT 695 INDIVIDUAL WORK IN MANAGEMENT. (1-6)

Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of the instructor.

MGT 697 TOP MANAGEMENT LEADERSHIP IN THE CONTEMPORARY BUSINESS ENVIRONMENT. (3)

Political, historical and philosophical perspectives on the meaning and processes of top management leadership. Applications of leadership perspective to the development of organizational culture, ethics and values, stakeholder relations, business-government relations, and competitiveness. Prereq: Third semester MBA standing.

MGT 699 BUSINESS POLICY AND STRATEGY II. (3)

Strategic issues associated with multi-industry, multi-national, multi-business and start-up management; strategy implementation and institutionalization; planning systems. Prereq: MGT 698 or the equivalent.

MGT 700 ADMINISTRATIVE SCIENCE. (3)

Primary emphasis upon the identification and investigation of the schools of thought concerning the field of administration. Analysis of various theory bases for purposes of integration and generalization will also make up a major portion of the course. Prereq: MGT 301 or consent of instructor.

MGT 712 ORGANIZATIONS AND INDIVIDUAL BEHAVIOR. (3)

Examination of current theory and empirical research regarding the behavior of individuals within organizations. Topics are divided into three phases: major behavioral processes, applied models of individual choice behavior, and specific areas of individual choice and decision.

MGT 713 SEMINAR IN ADVANCED ORGANIZATION THEORY. (3)

Seminar will examine broad range of organization theory and research from a multiple paradigm perspective. Interpretive and critique views and research literature will be among those examined. Prereq: MGT 700 and MGT 711, or equivalent and consent of instructor.

MGT 714 SEMINAR IN MANAGEMENT THEORY AND POLICY. (3)

A broad range of literature on organization strategy and structure is examined. Conceptual frameworks and research relating to the Business Policy decision processes are reviewed and critiqued. Prereq: Permission of instructor.

MGT 763 RESEARCH, DESIGN AND ANALYSIS. (3)

This course deals with the design and analysis of business research. Emphasizes the practical application of analysis of variance and correlation techniques to problems in business research. Focus will be on design, implementation, and interpretation of research. Prereq: MGT/MKT/FIN 762. (Same as MKT 763.)

MGT 780 ADVANCED SOCIAL NETWORK ANALYSIS. (3)

The focus of this course is on the theoretical concepts and methodology of social network analysis, both from a research and applied perspective. The course involves in-depth training in the hands on analysis of social networking data using specialized social network analysis software. Prereq: Consent of instructor. (Same as SOC 682.)

MGT 781 INDEPENDENT WORK IN MANAGEMENT. (1-6)

Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a total of six credit hours. Prereq: Consent of instructor.

MGT 790 DOCTORAL COLLOQUIUM. (1-2)

The doctoral colloquium is intended to be a professional socialization course for the Ph.D. students in Management. The course features a mix of topics related to the Management Ph.D. program, including research, teaching and service, major transitions in the program, preparation for the professoriate, as well as special research topics such as philosophy of science and guest research lectures.

MGT 795 SPECIAL TOPICS IN MANAGEMENT (Subtitle Required). (3)

Analysis of a specialized topic in management. May be repeated to a maximum of 12 credits when taken under different subtitles. Prereq: Consent of instructor.

MI Microbiology and Immunology

MI 494G IMMUNOLOGY. (3)

A survey of theories and mechanisms of immunity, including: nature of antigens and antibodies, antigen-antibody reactions, immune competent cells, immunogenetics, allergic reactions, tumor immunology and transplantation immunology. Prereq: BCH 401G (may be taken concurrently) and BIO 208 or BIO 308 or consent of instructor. (Same as BIO 494G.)

MI 590 CELLULAR AND MOLECULAR PHYSIOLOGY. (4)

This course will focus on the cellular and molecular physiology of inter-and intracellular communication. In particular, it will provide an overview of established and emerging intracellular signaling mechanisms which utilize i) cyclic nucleotides (cAMP; cGMP), ii) calcium (phosphatidylinositol metabolism; cyclic ADP-ribose), iii) transmembrane ion fluxes (voltage- and receptor-operated channels), iv) tyrosine kinases, and v) nuclear transcription factors. The material will be presented in a number of formats including didactic lecture and group discussions of selected readings. Prereq: PGY 412G, PGY 502 or consent of instructor. (Same as PGY 590.)

MI 595 IMMUNOLOGY LABORATORY. (2)

Laboratory in immunology and serology. Preparation, standardization, and uses of biological products; serology. Laboratory; four hours. Prereq: BIO/MI 494G or concurrently; or consent of instructor. (Same as BIO 595.)

MI 598 CLINICAL MICROBIOLOGY. (3)

An introduction to the concepts of clinical microbiology through a survey of the microbial diseases of man using an organ system approach. Prereq: BIO 208 and 209, BIO 476G recommended, CHE 230 or 236, or consent of instructor. (Same as PAT 598.)

MI 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)

Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/BIOL/PLS/PPA 601.)

MI 604 EXPERIMENTAL GENETICS. (1)

MI 611 BIOPHYSIOLOGY. (3)

The course will examine the mechanisms by which various biological, chemical and physical agents injure susceptible hosts and the complex biochemical and immunological reactions which occur in response to injury. The host defense mechanisms will be illustrated by an analysis of selected human diseases and animal model systems with particular emphasis on the events at the molecular and cellular level. Prereq: BCH 502 or concurrent, BIO/MI 494G or equivalents and consent of instructor. (Same as BIO 611.)

MI 615 MOLECULAR BIOLOGY. (3)

This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 595 or equivalent or consent of the course director. (Same as BIO 615.)

MI 616 BIOLGY AND THERAPY OF CANCER. (3)

Biology of cancer will be discussed at the molecular, cellular and organismic level. Emphasis will be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects tumor cell behavior and its interactions with the host immune system. The biology of hematopoietic cells will also be included. Clinicians active in treatment and research of various types of cancer will be invited to participate in the lectures. Prereq: BCH 502, 502, BIO 685. (Same as MED/PHA 616.)

MI 618 MOLECULAR NEUROBIOLOGY. (4)

This course provides knowledge base and analytical skills in the field of molecular neurobiology. An in-depth introduction to current technologies, their rationale and limitations, will be the focus to address normal brain function and neuropathological conditions. Prereq: BCH 501, 502, NEU 605, or consent of instructor. (Same as ANA/BIO/PSY 618.)

MI 685 IMMUNOLOGY, INFECTION AND INFLAMMATION. (3)

An introductory level graduate course surveying current trends in immunology including the organization of the immune system, cells important for immunity and inflammation; types of immune responses, cellular immunology, molecular immunology, self-nonself discrimination, vaccines and immune mediated diseases. Prereq: BCH 401G, or BCH 501 or 502, IBS 501 or equivalent or consent of the course director. (Same as BIO 685.)

MI 707 CONTEMPORARY TOPICS IN IMMUNOLOGY. (3)

This course will deal with controversial and evolving areas of immunology. Lectures in a given topic will be accompanied by student discussion of contemporary literature. Prereq: MI 685 or equivalent or consent of instructor. (Same as BIO 707.)

MI 710 SPECIAL TOPICS IN MICROBIOLOGY. (2)

A variety of topics relating to modern molecular and cell biology. Prereq: Consent of instructor.

MI 720 MICROBIAL STRUCTURE AND FUNCTION. (3)

Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture, growth, division, and differentiation. Prereq: (to reflect appropriate IBS course). (Same as BCH/BIO/PLS/PPA 601.)

MI 748 MASTER’S THESIS RESEARCH. (0)

Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MI 749D DISSERTATION RESEARCH. (0)

Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 research credit following the successful completion of the qualifying exams. (Same as MB 749.)

MI 776 DISSERTATION RESIDENCY CREDIT. (2)

Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MI 768 RESIDENCE CREDIT FOR MASTER’S DEGREE. (1-6)

May be repeated to a maximum of 12 hours. (Same as MB 768.)
Department of Medical Microbiology and Immunology. The intent is to provide the student an opportunity for exploration and study in an area which approved electives offered by the Department of Medical Microbiology and Immunology. The intent is to provide the student an opportunity for exploration and study in an area which human genetics to human health and disease. Close integration with biochemistry topics provides a better picture of how biochemistry, genetics and molecular biology contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

MI 822 IMMUNITY, INFECTION, AND DISEASE. (9) The course provides basic concepts of immunology and of bacterial, viral, fungal and protozoal biology. It focuses on mechanisms of human immunity, immunologically mediated disease, and pathogenesis in infectious disease. The material covered includes relevant pathology associated with both immunologic and infectious diseases, and a brief summary of infectious diseases from an organ system perspective. Lecture, 20 hours per week. Prereq: Admission to second year of medical curriculum.

MI 825 SECOND-YEAR ELECTIVE, MEDICAL MICROBIOLOGY AND IMMUNOLOGY. (1-3) With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Medical Microbiology and Immunology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

MI 861 CELLULAR STRUCTURE AND FUNCTION/GENETICS. (4) The course combines small group meetings, lecture, clinical correlations, problem-based learning, and problem-solving sessions in providing an understanding of the relationship of human genetics to human health and disease. Close integration with biochemistry topics provides a better picture of how biochemistry, genetics and molecular biology contribute to normal human development and medicine. Lecture, 20 hours per week. Prereq: Admission to Medical School (first year).

MKT 390 SPECIAL TOPICS IN MARKETING (Subtitle required). (1-3) Readings, projects, lecture and/or discussion to illuminate current topics of special interest or concern in marketing. May be repeated to a maximum of six credits. May not be repeated under the same title. A particular topic may be offered at most twice under the MKT 390 number. Prereq: Consent of instructor.

MKT 395 INDIVIDUAL WORK IN MARKETING. (1-6) Student develops a specific program with instructor. One or more papers is typically expected. May be repeated to a maximum of six credits. Prereq: GPA of 3.0 in major, approval of instructor and chairperson.

MKT 410 PERSONAL SELLING. (3) A detailed exposure to personal selling techniques. Emphasis placed on sales process, especially planning and delivery of sales presentations. Selected sales management topics include recruiting, training, motivating and evaluating salespeople, as well as ethical and legal issues. Prereq: MKT 300 and marketing majors only.

MKT 430 SERVICES MARKETING MANAGEMENT. (3) This course addresses marketing and management issues and problems faced by service organizations. Marketing and management concepts are broadened and applied to the service organizations. Topics related to service quality, the marketing mix, and service delivery are covered. Prereq: MKT 300, MGT 301. (Same as MGT 430.)

MKT 435 INTERNATIONAL MARKETING. (3) The primary objectives of this course are to: 1) familiarize the student with selected strategic marketing issues in a multinational environment, 2) examine alternative ways by which a firm can expand internationally, and 3) help the student develop a systematic approach for dealing with global and international marketing issues. Prereq: MKT 300.

MKT 445 SPORTS MARKETING. (3) The purpose of the course is to develop an understanding of strategic marketing concepts and activities as they apply to the context of sports. Marketing concepts and activities related to the marketing mix, consumer/fan behavior, and business organization-sport organization relationships will be examined. Prereq: MKT 300 and Marketing majors only.

MKT 450 MARKETING STRATEGY AND PLANNING. (3) As the capstone course for marketing majors, this class examines analytical processes for managerial marketing decisions. Topics will include such problem areas as product planning, distribution systems, advertising strategies, information systems, pricing decisions and buying behavior. Prereq: MKT 300, MKT 310, MKT 340 and one other marketing elective.

MKT 600 MARKETING MANAGEMENT. (3) This course is designed to provide students with an understanding of: the role of marketing function in an organization; the types of marketing decisions and analytical procedures involved in making each decision; the overall marketing planning process; and, the impact of the social, economic, and legal environment on marketing decisions. Prereq: Completion of first semester of MBA program, graduate standing. MKT 611, ECO 610, ACC 628, MGT 650.

MKT 601 MARKETING RESEARCH. (3) An examination of how firms manage the new product development or service process. Topics covered include ideation, screening, design and prototyping, product portfolio management, new product launch and product acceptance. Prereq: DIS 651; ECO 610, MKT 600.

MKT 622 SALES MANAGEMENT. (3) MKT 622 entails a comprehensive examination of the planning, implementing, and control of personal contact programs designed to achieve the sales objectives of the firm. Managerial decision-making is emphasized through the application of lecture material, readings, and case studies. Prereq: Completion of first year of MBA program or permission of instructor.

MKT 623 MARKETING IN SERVICE AND NONPROFIT ORGANIZATIONS. (3) The purpose of the course is to broaden and apply the conceptual system of marketing to the marketing problems of service and nonprofit organizations. Concepts such as marketing mix, marketing segmentation, market positioning, channels of distribution and others will be applied to the problems of service and nonprofit organizations. Prereq: MKT 600 or permission of the instructor.

MKT 624 INTERNATIONAL MARKETING MANAGEMENT. (3) Examines the broad implications for marketing strategy and decision-making of the firm in an international context. Addresses comprehensive survey of firm entry strategies, marketing mix decisions, product policies, and environmental factors in a global context. Context-based problems such as implicit barriers to entry through distribution channel management will also be addressed. Prereq: MKT 600 or permission of instructor.

MKT 695 INDIVIDUAL WORK IN MARKETING. (1-6) Students confer individually with the instructor. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
Course Descriptions

2013-2014 Undergraduate Bulletin

MLT700 SEMINAR IN MARKETING MANAGEMENT. (3)
A doctoral seminar directed toward the basic decision areas of marketing management. Emphasis is on traditional, classic, and contemporary literature that presents important conceptualizations of marketing practices and empirical research in marketing management. Prereq.: Consent of instructor.

MLT710 SEMINAR IN CONSUMER BEHAVIOR. (3)
The seminar is specifically designed for the needs of doctoral students in marketing in that it emphasizes empirical research, theory and methodology as they relate to consumer behavior. The objectives of the seminars are (1) to familiarize the students with the literature of consumer behavior, (2) to stimulate critical thinking about existing research, and (3) to evaluate existing theories, conceptualizations, and models of buyer behavior. Prereq.: Consent of instructor.

MLT720 SEMINAR IN MARKETING THEORY. (3)
A survey, analysis and evaluation of the current research in marketing theory. Detailed attention is given to problems of determining the meaning and boundaries of marketing theory. Emphasis is placed on introducing the student to the substantive content of marketing theories and their methodologies. Prereq.: MKT 600 or consent of instructor.

MLT763 RESEARCH, DESIGN AND ANALYSIS. (3)
This course deals with the design and analysis of business research. Emphasizes the practical application of analysis of variance and correlational techniques to problems in business research. Focus will be on design, implementation, and interpretation of research. Prereq.: MGT/MKT/FIN 762. (Same as MGT 763.)

MLT771 SEMINAR IN BUSINESS ADMINISTRATION. (3)
Each semester some topic currently discussed in scholarly journals in business administration will be studied intensively. May be repeated to a maximum of nine credits. Prereq.: Consent of instructor.

MLT781 INDEPENDENT WORK IN MARKETING. (1-6)
Designed for advanced students who undertake research problems to be conducted in regular consultation with the instructor. May be repeated to a maximum of six credits. Prereq.: Consent of instructor.

MLS Medical Laboratory Science

MLS 120 MEDICAL LABORATORY SCIENCE AS A CAREER. (1)
Medical Laboratory Science encompasses multiple major and minor discipline areas thus offering various career opportunities. In this course, we will explore these discipline areas and career opportunities as well as discuss the changing roles of laboratory practitioners.

MLS 400 LABORATORY TECHNIQUES AND PHLEBOTONY. (2)
Students will be introduced to basic clinical laboratory principles and techniques and provided an opportunity to learn and practice the skills necessary for obtaining a blood specimen by venipuncture and dermal puncture. This course includes a mandatory clinical phlebotomy training opportunity that provides the student with experience collecting venous blood specimens for laboratory testing. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 410 MEDICAL LABORATORY BIOCHEMISTRY. (3)
This course provides the student with an understanding of biochemical systems in the body. During this course, the student will be able to describe how these systems work, the interaction between the systems and understand the consequences that occur when there is a disruption of a system. At the completion of this course, the journey through these metabolic pathways will provide a relevant and informative experience. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 420 CLINICAL IMMUNOLOGY AND SEROLOGY. (3)
This course is designed to provide students with a comprehensive study of the immune system including principles of immunological and serological procedures, immunological disorders and diseases, and significance of laboratory methods used for diagnosis. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 430 CLINICAL MYCOLOGY, PARASITOLOGY, AND VIROLOGY. (3)
The study of clinically significant fungi, parasites and viruses. Included are the morphological characteristics, pathogenicity, epidemiological characteristics, laboratory testing and treatment. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 440 MOLECULAR TECHNIQUES. (3)
This course focuses on the newest medical laboratory discipline known as molecular diagnostics. The content will include principles of molecular diagnostics, principles and procedures of molecular techniques, and the application of these techniques that aid in identification and diagnosis of conditions and disease states. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 450 MLS EDUCATION AND MANAGEMENT. (3)
This course will focus on concepts of laboratory organization, principles of laboratory management, and fundamental instructional skills necessary for the entry-level medical laboratory scientist. Additional course topics include leadership, career planning, and professionalism. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 460 CLINICAL HEMATOLOGY. (3)
This course is a study of the formed elements of the blood including the practice of routine and specialized test procedures. Anemias, leukemias and non-malignant disorders are discussed and emphasis is placed on the correlation of hematology test results with these diseases and disorders. Prereq.: Admission to the Medical Laboratory Science Program or consent of instructor.

MLS 461 CLINICAL MICROBIOLOGY. (3)
The study of medically significant microbiology, including normal flora and pathogens. Lectures also cover microbial physiology, interactions between host and pathogenic microorganisms, and the clinical and epidemiological consequences of these interactions. Clinical bacteriology knowledge will be applied through case studies. Prereq.: Admission to the Medical Laboratory Science Program or consent of instructor.

MLS 462 CLINICAL CHEMISTRY. (3)
This course focuses on the study of the theory and practice of routine and specialized clinical chemistry laboratory testing. This will include discussion of quality assurance issues and instrumentation principles, problem-solving scenarios, and an emphasis on accuracy and confidentiality of patient laboratory findings. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 463 IMMUNOHEMATOLOGY. (3)
This course consists of the primary principles and practices of blood banking which include blood group systems, antibody detection and identification, compatibility testing, quality control requirements, instrumentation, blood transfusion, donor selection, and component preparation. In addition, the course will focus on advanced immunohematology topics including transfusion therapy, apheresis and component therapy, hemolytic diseases, histo compatibility (HLA), testing, and federal regulation of blood banking. Prereq.: Admission to the Medical Laboratory Science Program or consent of instructor.

MLS 464 BODY FLUIDS AND HEMOSTASIS. (2)
This course is a combination of three minor medical laboratory disciplines including Urinalysis, Body Fluid Analysis, and Hemostasis. Urinalysis will include a comprehensive study of the urinary system, principles and methods of testing urine, and urinary disorders or diseases. Body Fluid Analysis will include a study of the various fluids analyzed in the laboratory, principles and methods of testing these fluids, and any associated diseases. Hemostasis is the study of blood coagulation and will include the study of this process, principles and methods of testing, and hemostatic disorders and diseases. Prereq.: Admission to the Medical Laboratory Science Program or consent of instructor.

MLS 465 CLINICAL HEMATOLOGY LABORATORY. (2)
Laboratory experiences will provide students with the practice of clinical hematology testing. Experiences will include testing with manual and automated procedures, instrumentation principles, role of quality assurance, and the promotion of problem-solving skills. Special emphasis will be placed on the relationship of clinical hematology test results and associated disease states. Prereq.: Enrollment in or successful completion of MLS 460.

MLS 466 CLINICAL MICROBIOLOGY LABORATORY. (2)
Basic techniques will be practiced in the student laboratory and conventional microscopic, cultural and immunologic techniques used for the isolation and identification of microorganisms, that are pathogenic to humans, will be reviewed. Prereq.: Enrollment in or successful completion of MLS 461.

MLS 467 CLINICAL CHEMISTRY LABORATORY. (2)
This laboratory course includes various basic laboratory associated with the study of clinical chemistry theory and problem-solving. Laboratories will include the study of cases for routine clinical chemistry testing as well as more specialized testing. Students will perform theses assays under simulated conditions and will abide by best laboratory practices. Safety and quality control of all procedures will be expected from students. Prereq.: Enrollment in or successful completion of MLS 462.

MLS 468 IMMUNOHEMATOLOGY LABORATORY. (2)
Clinical laboratory practice in blood banking procedures and testing. Laboratories will include blood group system identification, antibody detection and identification, compatibility testing, quality control testing, and an introduction to immunohematology (blood bank) instrumentation. Prereq.: Enrollment in or successful completion of MLS 463.

MLS 469 BODY FLUIDS AND HEMOSTASIS LABORATORY. (2)
Laboratory experiences will provide students with the practice of urinalysis and other body fluid analysis, and hemostasis testing. Experiences will include testing with manual and automated procedures, instrumentation principles, role of quality assurance, and the promotion of problem-solving skills. Special emphasis will be placed on the relationship of test results and associated disease states. Prereq.: Enrollment in or successful completion of MLS 464.

MLS 470 CLINICAL CORRELATIONS. (3)
A comprehensive review of the medical laboratory science profession using clinical and multi-disciplinary case studies. In addition, students will take mock certification exams and present a multi-disciplinary case study. Prereq.: Admission into the Medical Laboratory Science Program or consent of instructor.

MLS 475 ADVANCED TOPICS IN MEDICAL LABORATORY SCIENCE (INDEPENDENT STUDY). (1-3)
Independent study for undergraduate students with an interest in a specific problem, topic, or issue in Medical Laboratory Science. Prereq.: Admission into the Medical Laboratory Science Program and consent of instructor.
MNG 301 MINERAL PROCESSING. (3)
Software packages commonly used by mining engineers. Projects will cover the areas of
sequence of development, cycle of operations, and method application and variation. Prereq:
Successful completion of MNG 460 and MNG 465.

MNG 302 MINERAL PROCESSING LABORATORY. (1)
In-depth study of a current problem or issue related to the medical laboratory science
profession. Prereq: Admission into the Medical Laboratory Science Program or consent of
instructor.

MNG 320 DEFORMABLE SOLIDS LABORATORY. (1)
Experimental studies of the mechanical properties of materials and structural elements.
Laboratory, four hours per week for three-fourths of the semester. Prereq or concur: EM 302.

MNG 322 MINE SAFETY AND HEALTH MANAGEMENT AND PROCESSES. (2)
In-depth study of current problem or issue related to mine safety and health; effective health and safety management systems; building a health and safety culture; hazard anticipation and identification, risk
management and hazard control; Federal processes for health and safety system management;
mine safety and health resources; mine laws, including safety regulations and interpretations
for mining engineers and supervisors; and contemporary issues in mine safety. Prereq: MNG 101; concur: MNG 264 or consent of instructor.

MNG 331 EXPLOSIVES AND BLASTING. (2)
Drilling and blast performance analysis and properties of commercial explosives, initiation and
priming, explosives selection, blast design, explosives applications, environmental effects,
and safety and regulatory compliance. Prereq: MNG 264 or consent of instructor.

MNG 332 MINE PLANT MACHINERY. (3)
Theory and practice of mine haulage, hoisting, and drainage and pumping. Application of
engineering principles to the analysis and selection of materials handling mediums for the
minerals industry. Prereq: MNG 264, PHY 231; concur: EM 221 and ME 330 or CME 330.

MNG 335 INTRODUCTION TO MINE SYSTEMS ANALYSIS. (3)
Descriptive statistics; random variables & probability distributions; point estimation; hypothesis
testing; linear regression; time and motion study; introduction to geostatistics. Prereq: MA 114, MNG 264.

MNG 341 MINE VENTILATION. (3)
Hazards of dust and gaseous contamination of mine atmosphere, air dilution requirements, flow
distribution in mine network, computer analysis of the ventilation network, natural ventilation
and fans. Lecture, two hours; laboratory, three hours. Prereq: Engineering standing and prerequisite or concurrent ME 330.

MNG 371 PROFESSIONAL DEVELOPMENT OF MINING ENGINEERS. (3)
Development of professional skills important to the practice of mining engineering. Topics
include written and oral communication skills, understanding ethical responsibility and
appropriate ethical conduct, real world problem formulation and solution skills, exercise of
abilities important to lifelong learning, knowledge of contemporary issues important to mining
engineering. Concurs: COM 199; prerequisite engineering standing.

MNG 395 INDEPENDENT WORK IN MINING ENGINEERING. (1-6)
Individual work on some selected problem in the field of mining engineering. May be repeated
for a maximum of six credits. Prereq: Consent of department chairperson and the instructor,
engineering standing.

MNG 431 MINING ENGINEERING ECONOMICS. (2)
Economics engineering including discounted cash flow, opportunity cost of capital, cost
(incremental, sunk, etc.), net present value and rate of return, and uncertainty; topics in mineral
economics. Prereq: Engineering standing.

MNG 435 MINE SYSTEMS ENGINEERING AND ECONOMICS. (4)
Optimization of mine systems and investment decisions based on the time value of money
and the application of deterministic and stochastic models. Application of advanced features
in spread-sheet programming for solving mine systems problems. Prereq: MNG 335 and
Engineering Standing.

MNG 463 SURFACE MINE DESIGN AND ENVIRONMENTAL ISSUES. (3)
Pit layout and design of excess spoil disposal areas including stability of the slopes. Design
of sediment control systems to satisfy surface mine regulations. Use of design standards for
various reclamation alternatives. Prereq: MNG 264, Engineering Standing.

MNG 511 MINE POWER SYSTEM DESIGN. (3)
A study of mine power distribution systems, major power system components, and techniques
of power system analysis. Topics include per-unit analysis; symmetrical component analysis;
grounding, including ground-bed design, ground-resistor sizing, and ground wire monitoring;
cable and transformer sizing; and load-flow analysis. Course may not be used to satisfy degree
requirements in electrical engineering if credit is earned in EE 538. Prereq: EE 305 or equivalent
and engineering standing.

MNG 531 ADVANCED BLAST DESIGN AND TECHNOLOGY. (3)
Advanced theory and application of explosives in excavation; detailed underground blast
design; specialized blasting including blast casting, construction and pre-splitting. Bulk
systems for blasting, electronic detonators, and introduction to demolition blasting. Introduc-
tion to blasting research. Examination of field applications. Prereq: MNG 331, engineering
standing.

MNG 541 COMPUTER DESIGN OF MINE VENTILATION SYSTEMS. (3)
Computer methods applied to the design and analysis of mine ventilation networks; flow
distribution, location and size of regulators and fans; evaluation of existing ventilation systems
and application of correction methods to improve effectiveness of ventilation system. Prereq:
MNG 341 with a C or higher.
Course Descriptions

MNG 551 ROCK MECHANICS. (4)
Determination of the physical properties of rocks, rock mass classification, stress around mine openings, strain and displacement of the rock mass, rock reinforcement and support, stress interaction and subsidence, strata control. Lecture, three hours; laboratory, three hours per week. Prereq: EM 302, MNG 303, GLY 220, and engineering standing.

MNG 561 MINING CONSTRUCTION ENGINEERING. (3)

MNG 563 SIMULATION OF INDUSTRIAL PRODUCTION SYSTEMS. (3)
Discrete event simulation and its application to performance analysis of industrial production systems. Topics include concepts for characterizing production systems, approaches to structuring simulation models, instruction in a simulation language, and techniques for comparing alternative system designs and control strategies. Applications to manufacturing, commercial and mining production systems are considered. Prereq: CS 221 or 270, STA 281 or 381, engineering standing. (Same as MFS 563.)

MNG 575 COAL PREPARATION DESIGN. (3)
Design a coal preparation plant by integrating unit operations preceded by certain back-up laboratory experiments. Cost sensitivity analysis of competing design schemes will be determined on a selected coal. Lecture: two hours; laboratory: three hours per week. Prereq: MNG 301 or equivalent, engineering standing.

MNG 580 MINERAL PROCESSING PLANT DESIGN. (3)
Design of mineral processing plants including the associated unit operations; flowsheet development, unit selection, sizing and number, water/mass flow balancing. Prereq: MNG 301, 302; engineering standing.

MNG 589 MINE DESIGN PROJECT I. (2-3)
First course of a two-part capstone design project. Emphasis is on ore reserve evaluation, development of a preliminary mine plan, design of auxiliary processes, teamwork, and oral and written communication. Minable reserves will be quantified and quality distribution assessed. An appropriate mining technique will be identified and implemented into a proposed mine design. Lecture, one hour; laboratory, three hours per week. Prereq: MNG 211, MNG 291, and engineering standing.

MNG 591 MINE DESIGN PROJECT II. (3)
Students will undertake a major design project such as the overall design of a mining system, including design of major components of the system and economic evaluation. Students will write reports documenting this design, which will also be presented orally before a group of peers and invited experts. Prereq: MNG 332, MNG 341, MNG 551, MNG 591, and engineering standing.

MNG 599 TOPIC IN MINING ENGINEERING. (2-3)
A detailed investigation of a topic of current significance in mining engineering. May be repeated to a maximum of six credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the MNG 599 number. Prereq: Engineering standing and consent of instructor.

MNG 611 MINE POWER SYSTEM PROTECTION. (3)
A study of components and methods for providing protection to mine electrical systems. Review topics include power distribution arrangements, per-unit system, and symmetrical components. Course topics include sources of transients and faults, protective equipment, phase Overcurrent relaying, and ground fault protection. Prereq: MNG 511.

MNG 621 INSTRUMENTATION FOR BLASTING AND BLAST MITIGATION. (3)
In depth coverage of instrumentation utilized for commercial/mine blast analysis as well as instrumentation used in blast mitigation testing. The course includes hands on operation of advanced instrumentation systems in a laboratory setting. Prereq: MNG 331 or MNG 531.

MNG 641 ADVANCED MINE VENTILATION. (3)
Planning, designing and redesigning the ventilation systems using computers; data acquisition (ventilation survey); non-steady state flow in mine openings; influence of the ventilation conditions upon the dynamics of the methane concentration; automation of the ventilation system. Lecture: two hours; laboratory, two hours. Prereq: MNG 341.

MNG 650 ADVANCED MINERAL BENEFICIATION ENGINEERING. (3)
State of the art techniques in mineral beneficiation and their application in coal and mineral processing industry. Prereq: MNG 301 and MNG 572.

MNG 691 SIMULATION OF MINERAL PROCESSING CIRCUITS. (3)
Flowsheet modeling and analysis for coal preparation and ore dressing plants. Topics include unit models for comminution, gravity separation, and froth flotation; relevant techniques for solving systems of nonlinear equations; convergence acceleration techniques; sequential modular, simultaneous modular, and equation-solving flowsheeting frameworks; flowgraph techniques for analysis of certain classes of mineral processing circuits. Prereq: MNG 573.

MNG 699 TOPICS IN MINING ENGINEERING (Subtitle required). (3)
A detailed investigation of a topic of current interest in mining engineering. May be repeated to a maximum of six credits, but only three credits can be earned under the same subtitle. A particular topic may be offered only twice under the MNG 699 number. Prereq: Consent of instructor.

MNG 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MNG 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

MNG 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MNG 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MNG 769 RESIDENCE CREDIT FOR DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

MNG 771 SEMINAR IN MINING ENGINEERING. (1)
Review of current research in specific areas of mining engineering. Required of all graduate students. Prereq: Graduate classification.

MNG 780 SPECIAL PROBLEMS IN MINING ENGINEERING. (1-6)
Individual work on some selected design problems in one area of mining engineering. May be repeated to a maximum of six credits. Prereq: Approval of the chairperson of the department.

MNG 790 SPECIAL RESEARCH PROBLEMS IN MINING ENGINEERING. (1-9)
Individual work on some selected problems in one of the various fields of mining engineering. Laboratory and field measurements, six hours. May be repeated to a maximum of nine credits. Prereq: Approval of the Director of Graduate Studies.

MSE 101 MATERIALS ENGINEERING. (3)
An introduction to the materials engineering profession. Professional growth, conduct, ethics and organizations. Introduction to the techniques of materials engineering.

MSE 201 MATERIALS SCIENCE. (3)
Microscopic and macroscopic structure as related to the properties of materials with engineering applications. Prereq or concur: MA 114 and freshman chemistry.

MSE 202 MATERIALS SCIENCE LABORATORY. (1)
To teach students the basic materials characterization laboratory techniques and demonstrate the difference in properties between different types of materials. Prereq: Concurrent enrollment in MSE 201.

MSE 212 ELECTRONIC PROPERTIES OF MATERIALS. (3)
Modern ideas on the engineering properties of solids, crystallographic properties; relationship of properties to structure and electronic properties of materials. Prereq: PHY 232 and 242, MA 214 concurrent.

MSE 301 MATERIALS SCIENCE II. (3)
Introduction to processing of ceramic, polymer and composite materials; relating the structure and bonding in these materials to their properties; considerations in choosing appropriate materials for engineering applications. Prereq: MSE 201, or consent of instructor.

MSE 351 MATERIALS THERMODYNAMICS. (3)
Solution thermodynamics; partial molar quantities; ideal and non-ideal solutions; application of thermodynamics to phase equilibria, heterogeneous equilibria; free energy-composition relationships; temperature-pressure relationships. Prereq: MSE 201, MA 213 or concurrent.

MSE 395 INDEPENDENT WORK IN MATERIALS ENGINEERING. (1-3)
Research for undergraduate departmental students. May be repeated to a maximum of 12 credits. Prereq: Department major and approval of chairperson.

MSE 401 METAL AND ALLOYS. (3)
Crystal structures, phase diagrams, diffusion, nucleation and growth, deformation, recovery, recrystallization and grain growth are discussed to understand the structure-property relations in metals and alloys. Prereq: MSE 201, 301 and Engineering Standing.

MSE 402 ELECTRONIC MATERIALS AND PROCESSING. (3)
This course will examine electron behavior in a variety of materials and the processing methods used for integrated device production. Additional topics will include thin film growth, diffusion, oxidation, electronic device principals, defect control, and a survey of current challenges to the semiconductor industry. Prereq: MSE 201, MSE 301 or related engineering/science senior/graduate level classes with instructor permission.

MSE 403 CERAMIC ENGINEERING AND PROCESSING. (3)
Microstructure of crystalline ceramics and glasses, and role of thermodynamics and kinetics in its formation. Effect of microstructure on mechanical and physical properties. Prereq: MSE 201, MSE 301 or consent of instructor, Engineering standing.
MSE 404G POLYMERIC MATERIALS. (3)
Synthesis, structure, and processing of polymers, useful geometric forms, mechanical and
thermal properties. Properties in transparent, solid, crystalline, polymer blends, evaluation of polymers for specific
applications (aerospace, automotive, biomedical), laboratory activities for each of the above.
Prereq: Engineering standing. CHE 230 or CHE 236. MSE 301 or consent of instructor. (Same as CME 404G.)

*MSE 407 MATERIALS LABORATORY I. (3)
Various laboratory experiments that demonstrate behavior of polymers, metals, ceramics, and
electronic materials. Includes instruction and practice in use of numerous instruments and equipment,
typical of the materials engineering discipline. Data reduction, analysis, and
interpretation is covered, as well as correct writing of reports. Prereq: MSE 202, MSE 301,
MSE 351, Engineering standing.

*MSE 408 MATERIALS LABORATORY II. (3)
Various laboratory experiments that illustrate crystal structure, behavior of multi-component
systems, and failure modes. Provides hands-on experience with some more advanced
characterization methods of polymers, metals, and ceramics. Includes data reduction, analysis,
and interpretation, as well as correct writing of reports. Prereq: MSE 407.

MSE 436 MATERIAL FAILURE ANALYSIS. (3)
A review of common engineering materials, their potential failure mechanisms and correspond-
ing technology developed to avoid these failures. This course illustrates applications of current
technology to practical industrial problems and is designed for engineers of all disciplines.
Prereq: MSE 201 and EM 302 and Engineering standing.

*MSE 480 MATERIALS DESIGN. (3)
A capstone engineering design experience involving analysis, with some treatments of
engineering economics of real processes, design of materials, fabrication problems and
techniques, and prediction of model material systems. Prereq: MSE 408.

MSE 506 MECHANICS OF COMPOSITE MATERIALS. (3)
A study of structural advantages of composites over conventional materials, considering high strength-to-weight and stiffness-to-weight ratios. Fiber reinforced, laminated
and particulate materials are analyzed. Response of composite structures to static and dynamic
loads, thermal and environmental effects, and failure criteria are studied. Prereq: EM 302,
engineering standing or consent of instructor. (Same as EM/ME 506.)

MSE 531 POWDER METALLURGY. (3)
Study of the principles of powder metallurgy relating to alloys of unusual compositions, metal
and nonmetal combinations, porous and laminated products, composite metals, and high-
melting alloys. Prereq: Consent of instructor.

MSE 535 MECHANICAL PROPERTIES OF MATERIALS. (3)
Introductory elasticity and plasticity theory; crystallographic nature of slip and twinning;
fracture. Prereq: MSE 201, EM 302 and engineering standing or consent of instructor.

MSE 538 METALS PROCESSING. (3)
Solidification of molten alloys; fundamentals of metal working; application of metal working
theories to forging, rolling, extrusion, drawing and sheet forming. Prereq: Engineering standing.

MSE 554 CHEMICAL AND PHYSICAL
PROCESSING OF POLYMER SYSTEMS. (3)
Theory and practice as related to the chemical and physical processing of polymer systems.
Polymer rheology, heat transfer in polymer flows, polymer engineering properties. Polymer
processing operations and materials selection; flow instabilities. Prereq: CME 330, CME 425
or ME 325; or consent of instructor. (Same as CME/ME/MFS 554.)

MSE 555 INTRODUCTION TO MICRO-/ NANO-ELECTROMECHANICAL SYSTEMS. (3)
This course provides an overview of micromachined structures with an emphasis on
operational theory and fabrication technology. Prereq: Engineering standing or consent of
instructor. (Same as EE/ME 555.)

MSE 556 INTRODUCTION TO COMPOSITE MATERIALS. (3)
Applications, materials selection and design of materials. Relation between properties of
constituent materials and those of composite. Processing methods for materials and for some
structures. Lab focuses on preparation and testing of composite materials and their constitu-
ents. Prereq: MSE 201, 301, CHE 236, and Engineering Standing, or consent of instructor. (Same as CME/ME 556.)

MSE 561 ELECTRIC AND MAGNETIC PROPERTIES OF MATERIALS. (3)
Study of dielectric and magnetic materials. Topics include dielectric relaxation, conduction and
decomposition mechanisms, liquid crystals, ferroelectrics, magnetic resonance and relaxation,
measurement techniques. Prereq: MSE 212 and PHY 361 or EE 461G or consent of instructor.
(Same as EE 561.)

MSE 569 ELECTRONIC PACKAGING SYSTEMS AND MANUFACTURING PROCESSES. (3)
Study of packaging systems which interconnect, support, power, cool, protect, and maintain
electronic components. The course will address systems at the chip, board, and product levels.
Topics include design, properties, materials, manufacture, and performance of various
packaging systems. Laboratory will provide familiarity with design software and production
equipment and processes. Prereq: EE 211 or EE 305, EE 360 or MSE 402G, or consent of
instructor. (Same as EE 569.)

MSE 570 FUNDAMENTALS OF NANOELECTRONIC DEVICES AND MATERIALS. (3)
Energy bonds in crystals; heterostructures; quantum wells and low-dimensional systems; the
two-dimensional electron gas and MODFET; transmission in nanstructures; current topics in
nanoscale devices. Prereq: EE 360 and engineering standing, or consent of instructor. (Same as EE/ME 570.)

MSE 585 MATERIALS CHARACTERIZATION TECHNIQUES. (3)
This course will present the fundamentals of x-ray and electron beam interactions with solid-
state materials. Both elastic and inelastic interactions will be treated, with emphasis on elastic
diffraction effects. Prereq: MSE 301 and Engineering standing, or graduate status or consent of
instructor.

MSE 599 TOPICS IN MATERIALS SCIENCE AND ENGINEERING (Subtitle required). (1-4)
A detailed investigation of a topic of current significance in engineering and materials science
such as: biomedicals, synthetic, electronic properties of materials, advances in metal working,
history of materials technology, quantitative metallography. Theory of disclinations, scanning
electron microscopy. May be repeated to a maximum of eight credits, but only four credits can
be earned under the same title. A particular topic may be offered at most twice under the MSE
599 number. Prereq: Variable; given when topic identified.

PREREQUISITE FOR GRADUATE WORK: Students desiring to take any of the following
courses should have a thorough working knowledge of chemistry, physics and mathematics.

MSE 607 ANALYSIS OF METAL CUTTING PROCESSES. (3)
Advanced study of metal cutting involving the mechanics of metal cutting including cutting
forces, tool-wear/tool-life and temperature analysis, surface finish and integrity, chip control,
machinability assessments and advances in cutting tool technology. Prereq: ME 505. (Same as
ME/MFS 607.)

MSE 620 COMPUTATIONAL MATERIALS SCIENCE ENGINEERING. (3)
The effective use of existing computer software in the area of materials science engineering.
Use of computers to model processes and examine and predict materials properties at the
macroscopic and atomistic level. Prereq: Graduate standing in physical sciences and engineer-
ing, strong background in material properties and structure similar to the material covered in
MSE 401G, MSE 403G, and MSE 404G, and some programming experience in C or
FORTRAN; or consent of instructor.

MSE 622 PHYSICS OF POLYMERS. (3)
An in-depth look at the physical and mathematical descriptions of polymer behavior.
Comparison of diverse approaches to modeling the same behavior. Study of isolated polymer
chain and how it relates to polymers in rigid, rubbery, melt, and solution states. Prereq: Graduate
standing and undergraduate degree in the physical sciences or engineering that includes advanced
calculus, differential equations, and matrix algebra. (Same as CME 622.)

MSE 632 ADVANCED MATERIALS SCIENCE. (3)
Classification of solids, atomic structure and bonding, relation of structure to properties,
deformation behavior and failure. Prereq: Consent of instructor.

MSE 635 ADVANCED MECHANICAL METALLURGY. (3)
Theory of dislocations in crystals and their role in strength, plasticity, work hardening and
fracture of crystalline solids. Prereq: Consent of instructor.

MSE 636 DISLOCATION THEORY. (3)
Fundamentals of elastic theory of dislocations and the kinematics of dislocation motion:
straight dislocations, curved dislocation, self-energies, interactions with other crystal defects,
dislocation multiplication. Prereq: MSE 535 or EM 531 or equivalent.

MSE 650 ADVANCED MATERIALS THERMODYNAMICS. (3)
Study of reactions of materials with chemical environments. Introduction to irreversible
thermodynamics. Emphasis on current literature. Prereq: Consent of instructor.

MSE 661 ADVANCED PHYSICAL METALLURGY I. (3)
Study of the theory of phase transformations in metallic systems. Analysis of rate controlling
processes for nucleation and growth controlled phase changes and for order-disorder reactions.
Prereq: MSE 362 and 412 or consent of instructor.

MSE 662 ADVANCED PHYSICAL METALLURGY II. (3)
Solidification theory and mechanisms. Diffusion in solids. Prereq: MSE 661 or consent of
instructor.

MSE 663 OPTOELECTRONIC DEVICES. (3)
Theory and applications of photodetectors, solar cells, semiconductor lasers, light emitting
diodes and display devices, nanocrystalline structures and organic semiconductors applica-
tions in optoelectronic devices. Prereq: EE 360 or MSE 402G, consent of instructor and/or
graduate standing. (Same as EE 663.)

MSE 664 MULTIDISCIPLINARY SENSORS LABORATORY. (3)
A multidisciplinary laboratory course with laboratory experiences in areas related to sensors
and sensing architectures, typically including chemistry, chemical and materials engineering,
and electrical engineering. Lecture, 1 hour; laboratory, 2 hours. Prereq: One year of college
chemistry, calculus and physics. GS 660 or by consent of instructor. (Same as CHE/CME/EE
664.)
MSE 699: ADVANCED TOPICS IN MATERIALS SCIENCE AND ENGINEERING. (Subtitle required) (3)
A detailed investigation of an advanced topic of current significance in materials science and engineering such as (1) nanometer materials, (2) structures of superconductors and (3) materials characterization under high rates of deformation. May be repeated under different subtitles to a maximum of nine credits, but only three credits can be earned under the same title. A particular topic may be offered at most twice under the MSE 699 number. Prereq: Variable, given when topic is identified.

MSE 748: MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

MSE 749: DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

MSE 767: DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MSE 768: RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

MSE 769: RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

MSE 771: SEMINAR. (0)
Review of current literature in the field of metallurgical engineering and presentation of papers thereon. Presentation of talks on departmental research. Group and panel discussions. Required of all graduate students every semester. Lecture, one hour per week.

MSE 781: SPECIAL PROBLEMS, LITERATURE AND LABORATORY. (1-3)
Literature research and planning of research programs; shop problems and technical writing, including a term paper, are required. Consultation and lecture by appointment. May be repeated to a maximum of nine credits.

MSE 782: SPECIAL PROBLEMS, LITERATURE AND LABORATORY. (3)
A continuation of MSE 781. Laboratory, six hours; consultation and lecture by appointment. May be repeated to a maximum of nine credits.

MSE 790: RESEARCH IN MATERIALS SCIENCE. (3-9)
Active research (experiments, library work, theory) toward Ph.D. degree. May be repeated indefinitely.

MUC Class Instruction in Music

MUC 110: DOUBLE REED MAKING LAB. (1)
This lab is designed for double reed players to learn how to make and adjust the reeds used to play the oboe and bassoon. May be repeated to a maximum of eight semesters. Prereq: Concurrent registration in MUP oboe or bassoon, or with consent of the instructor.

MUC 150: CLASS INSTRUCTION IN PIANO. (1)
A beginning course in the fundamentals of playing the piano. Lecture, two hours. Prereq: For music majors; other students by consent of instructor.

MUC 151: CLASS INSTRUCTION IN PIANO. (1)
A beginning course in the fundamentals of playing the piano. For music majors; other students by consent of instructor. Lecture, two hours. Prereq: MUC 150.

MUC 152: CLASS INSTRUCTION IN PIANO. (1)
A course in the fundamentals of playing the piano. For music majors; others by consent of instructor. Lecture, two hours. Prereq: MUC 151.

MUC 153: CLASS INSTRUCTION IN PIANO. (1)
A course in the fundamentals of playing the piano. For music majors; others by consent of instructor. Instruction, two hours. Prereq: MUC 151.

MUC 155: VOICE CLASS FOR NON-MUSIC MAJORS. (1)
Applied voice group instruction for non-music majors with emphasis on basic breathing and vocal technique, elements of music notation, and diction. May be repeated to a maximum of two credits. Laboratory, two hours per week. Prereq: Consent of instructor.

MUC 157: CLASS INSTRUCTION IN PERCUSSION INSTRUMENTS. (1)
A beginning course in the fundamentals of playing and teaching percussion instruments. Instruction, three hours. Prereq: For music majors only; others by consent of instructor.

MUC 158: CLASS INSTRUCTION IN WOODWIND INSTRUMENTS. (1)
A beginning course in the fundamentals of playing and teaching woodwind instruments. May be repeated to a maximum of two credits. Prereq: For music majors; others by consent of instructor.

MUC 161: CLASS INSTRUCTION IN STRING INSTRUMENTS. (1)
A beginning course in the fundamentals of playing and teaching violin, viola, cello and string bass. May be repeated to a maximum of two credits. Prereq: For music majors; others by permission of instructor. For non-stringing majors who take this course for two semesters, it must be taken sequentially beginning in the fall semester.

MUC 163: CLASS INSTRUCTION IN BRASS INSTRUMENTS. (1)
A beginning course in the fundamentals of playing and teaching brass instruments. Lecture, three hours per week. May be repeated to a maximum of two credits. Prereq: For music majors; others by consent of instructor.

MUC 170: STRING ENSEMBLE. (1)
The study of string instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 171: BRASS ENSEMBLE. (1)
The study of brass instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 172: WOODWIND ENSEMBLE. (1)
The study of woodwind instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 173: PERCUSSION ENSEMBLE. (1)
The study of percussion instrument chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 174: UNIVERSITY CHORALE. (1)
An auditioned choral ensemble for the study of choral literature through performance. Class will meet for five hourly rehearsals per week. May be repeated to a maximum of eight credits. Prereq: Audition and consent of instructor.

MUC 176: PIANO ENSEMBLE. (1)
Study of piano ensemble chamber music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 177: GUITAR ENSEMBLE. (1)
The study of guitar ensemble music through performance. May be repeated to a maximum of eight credits. Laboratory, two hours. Prereq: Consent of instructor.

LARGE MUSICAL ORGANIZATIONS

MUC 175: JAZZ ENSEMBLE. (1)
Study of jazz through performance. May be repeated to a maximum of eight credits. Laboratory, three hours. Prereq: Consent of instructor.

MUC 187: CONCERT BAND. (1)
A large concert band primarily for the general student desiring continuation of instrumental music experience. Laboratory, three hours. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

MUC 188: SYMPHONIC BAND. (1)
A select band engaged in preparation and performance of a variety of music composed for this medium. May be repeated to a maximum of four credits. Laboratory, four hours. Prereq: Audition and consent of instructor.

MUC 189: WIND ENSEMBLE. (1)
The University’s select band for performance of challenging literature in the wind repertoire. May be repeated to a maximum of eight credits. Prereq: Audition and consent of instructor.

MUC 190: MARCHING BAND. (1)
Preparation for and performance at University athletic functions, primarily football games. May be repeated to a maximum of four credits. Prereq: Audition and consent of instructor.

MUC 191: ORCHESTRA. (1)
Students who have demonstrated the required ability are given an opportunity to study and perform standard orchestral literature. May be repeated seven times for a total of eight credits. Prereq: Audition and consent of instructor.

MUC 192: UNIVERSITY CHORISTERS. (1)
Ordinarily for music majors only. Three one-hour meetings per week. May be repeated seven times for a total of eight credits. Prereq: Audition and consent of instructor.

MUC 196: OPERA WORKSHOP. (1)
Study of the principles and techniques of opera production through class presentation of scenes and complete works. May be repeated to a maximum of four credits. Prereq: Consent of instructor.

MUC 197: MOVEMENT FOR SINGERS. (1)
A course to teach movement and coordination of the body for singers. Course will also introduce and complete works. May be repeated to a maximum of four credits. Laboratory, two hours. Prereq: Consent of instructor.
MUC 198 OPERA PRODUCTION PRACTICUM. (1)
The study and practice of production techniques through rehearsal and performance participation. May be repeated to a maximum of 4 credit hours (1 credit hour per semester). Prereq: Consent of instructor.

MUC 570 ADVANCED CHAMBER MUSIC ENSEMBLE. (1)
Study of chamber music through performance. May be repeated to a maximum of six credits. Laboratory, two hours. Prereq: Consent of instructor.

MUC 596 OPERA WORKSHOP. (1-3)
Study of the principles and techniques of opera production and direction through class presentation of scenes and complete works. May be repeated to a maximum of six hours. Prereq: Consent of instructor.

MUC 675 JAZZ ENSEMBLE. (1)
Study of jazz through performance. Laboratory, two hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MUC 689 WIND ENSEMBLE. (1)
The University’s select band for performance of challenging literature in the wind repertoire. Laboratory, three hours per week. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MUC 691 ORCHESTRA. (1)
Students who have demonstrated the required ability are given an opportunity to study and perform standard orchestral literature. Laboratory, five hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

MUC 692 UNIVERSITY CHORISTERS. (1)
The course offers students the opportunity to learn and perform the best choral literature in the repertoire. Laboratory, three hours per week. May be repeated to a maximum of six credits. Prereq: Audition and consent of instructor.

MUP 100-499 (1-3)
Numbered 100-499 (1-3)
Numbered 500 and above (1-4)
Piano

Consult the School of Music before enrolling.

MUP 330 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Prereq: Audition and consent of instructor.

MUP 430 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Prereq: Audition and consent of instructor.

MUP 530 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Prereq: Audition and consent of instructor.

MUP 588 CONDUCTING. (1-4)
Private instruction in advanced conducting. Prereq: MUP 330 or MUP 430 or consent of instructor.

MUP 630 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Prereq: Audition and consent of instructor.

MUP 660 GRADUATE DEGREE RECRITAL. (0)
This course provides capstone experience for M.M. and D.M.A. in Performance majors who must present full recitals and lecture-recitals that consist of a minimum of 50 minutes and consists mainly of solo and chamber compositions. Prereq: Approval of applied professor and passing of pre-recital hearing.

MUP 668 CONDUCTING. (1-4)
Private instruction in advanced conducting. Prereq: MUP 330 or MUP 430 or consent of instructor.

MUP 730 VOCAL COACHING FOR SINGERS. (1-3)
A course to prepare the vocal student for performance in concert, recital, and opera. Materials to be covered include style, performance practices, diction, interpretation, and audition preparation. Prereq: Audition and consent of instructor.

MUP 758 CONDUCTING. (1-4)
Private instruction in advanced conducting. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
Course Descriptions

One-Hour Credit
The following may register for one-hour credit performance courses:

1) Music majors electing a secondary instrument or a major instrument credit by direction of the adviser to fulfill degree performance requirements.

2) Students from other divisions of the University desiring elective credit but only upon approval of the School of Music.

Students in one-hour credit performance courses for secondary instrument credit may be taught in studio groups of four or less. Each undergraduate one-hour course may be repeated twice for credit. Each graduate one-hour course may be repeated three times for credit.

Two-Hour Credit
The following may register for two-hour credit performance courses:

1) Music majors in the Music Education or B.A. in Music degree programs;

2) Music minors;

3) Graduate students by direction of the adviser.

Each undergraduate two-hour course may be repeated twice for credit. Each graduate two-hour course may be repeated three times for credit.

Three-Hour Credit
The following may register for three-hour credit performance courses:

1) Music majors in the B.M. or M.M. in performance degree programs;

2) D.M.A. students by direction of the adviser.

Each undergraduate three-hour course may be repeated twice for credit. Each graduate three-hour course may be repeated three times for credit. Not offered during the summer session.

Four-Hour Credit
Only graduate students in the music performance programs may register for four-hour courses. These courses are available only at the 600- and 700-levels. Doctoral students only may register for 700-level courses. Four-hour credit courses may be repeated three times for credit. Not offered during the summer session.

MUS Music

MUS001 RECITAL ATTENDANCE. (0)
The course will consist of attendance at recitals. Each freshman and sophomore student must attend a minimum of 16 concerts per semester (for a total of four semesters), to be chosen from faculty recitals, senior or graduate recitals, concerts by UK ensembles, Tuesday noon student recitals, Chamber Music series, Central Kentucky Concert and Lecture Association, and Gallery Series. One-hour lab per week. Grade: P or F.

MUS 100 INTRODUCTION TO MUSIC. (3)
A study of elements of music as they apply to the listening experience; designed for the nonmusic major with no prior knowledge of music. Emphasis will be placed upon developing an awareness and understanding of musical styles from the Renaissance to the present. Music majors may not use this course to fulfill either General Studies, University Studies, or Music history requirements.

MUS 120 FOREIGN LANGUAGE VOCAL DICTION. (1)
A study of diction factors in Italian, German, and French vocal music. Lecture, two hours. May be repeated to a maximum of three hours. Prereq: Consent of instructor.

MUS 123 BEGINNING CLASSROOM GUITAR. (3)
MUS 123 will be an introductory course for guitar playing as well as a study of the history and repertoire of the guitar. Included will be assigned reading on the different manifestations of the guitar through history and cross-cultural studies. Prereq: Students must have little or no knowledge of classical/guitar playing. If students have some experience, ask about MUP 123, Guitar Lessons.

#MUS 130 PERFORMING WORLD MUSIC (Subtitle required) (3)
This course fulfills three Arts and Creativity credit hours in the UK Core curricular framework. Through lectures, class discussions, and participation in ensemble rehearsals, students will be introduced to the musical traditions and performance practice of several world cultures. The class will also introduce elements of ethnomusicological study, and promote a better understanding of the way creativity and the arts (music, dance, theater) function within each society.

MUS 170 THEORY I—ELEMENTARY AURAL THEORY. (2)
A survey of music in America from 1620 to the present. Will include developing and understanding of the role of music in life and culture within our own lives and society through assignments and a collaborative creative project. Prereq: Sophomore standing.

MUS 201 MUSIC IN WESTERN CULTURE TO 1700. (3)
Music from Ancient Greece to the end of the 17th century, as seen against a background of artistic, cultural, religious, and political change in Western Europe. Music majors may not use this course to fulfill either the University Studies or music history requirements.

MUS 202 MUSIC IN WESTERN CULTURE, 1700-PRESENT. (3)
A survey of music from 1700 (Vivaldi, Bach, Handel) to the present, in the context of artistic, cultural, political, and social changes in the Western cultural community. Music majors may not use this course to fulfill either University Studies or degree requirements.

MUS 203 HISTORY OF MUSIC. (3)
A survey of the symphonic repertoire from the Classical through the Contemporary Periods. Emphasis will include the development of listening skills and an awareness of musical styles. Music majors may not use this course to fulfill University Studies or degree requirements.

MUS 204 SYMPHONIC MUSIC. (3)
A survey of the symphonic repertoire from the Classical through the Contemporary Periods. Emphasis will include the development of listening skills and an awareness of musical styles. Music majors may not use this course to fulfill University Studies or degree requirements.

MUS 211 SURVEY OF VOCAL MUSIC: OPERA, ART SONG, CHORAL MUSIC. (3)
A survey of vocal genres: opera from the Baroque; the Art Song from the Renaissance; and choral music from the Baroque to the present. Significant attention will be given to texts set and to poets and playwrights. Music majors may not use this course to fulfill University Studies or major requirements.

MUS 222 HISTORY AND SOCIOLOGY OF ROCK MUSIC. (3)
A listening survey course, with a chronological approach, covering the years 1950–present. Emphasis will be on both the music and the sociological climate reflected and advocated by the music.

MUS 262 VOCAL MUSIC METHODS AND MATERIALS SEMINAR I. (3)
Development of personal philosophy of music education. Elements of singing posture, breathing, diction, and choral tone. Demonstration of effective choral warm-ups. Beginning conducting and rehearsal keyboard skills. Prereq: MUS 172, 173, or consent of instructor.

MUS 263 INSTRUMENTAL MUSIC METHODS AND MATERIALS SEMINAR I. (3)
Historical and philosophical foundations of music education. Comprehensive study of teaching methods and materials for instrumental music in the elementary and early middle schools. Secondary instrument performance and group teaching. Observations in the public schools with emphasis on the elementary and middle school levels. Prereq: MUS 172 and 173 or consent of instructor.

MUS 264 VOCAL MUSIC METHODS AND MATERIALS SEMINAR II. (3)
Comprehensive study of teaching methods and materials for choral music in the middle school and high school. Study of the changing voice and supervised experimental teaching in middle school. Observation procedures, placement of voices, sight-reading methods and evaluation of repertoire. Beginning to intermediate choral conducting, keyboarding skills. Prereq: MUS 262.
MU360 GENERAL MUSIC I. (3) A study of the philosophy, the curriculum, and the process involved in promoting musical development of children in the elementary, middle, and high school environment. A field experience is required. Prereq: Junior standing in music.

MU361 GENERAL MUSIC II. (3) Methods, materials and techniques of teaching general music with an emphasis on activities for the early childhood and elementary children. A field experience is required. Prereq: MU360.

MU366 MARCHING BAND TECHNIQUES. (2) A study of techniques, styles and trends with emphasis on drill writing, music arranging, and administrative/instructional methods as they relate to the contemporary marching band. A combination of lecture and laboratory instruction will be utilized. Prereq. Consent of instructor.

MU370 THEORY III - ADVANCED HARMONY AND COUNTERPOINT. (2) A study of the 19th century harmonic idioms through projects in analysis and composition. Lecture, three hours. Prereq: MU273.

MU371 INSTRUMENTATION AND ARRANGING. (2) A basic course in instrumentation and arranging for typical school instrumental and vocal ensembles. Prereq: MU273.

MU372 MUSICAL ANALYSIS. (2) A study of musical style through structural, harmonic and melodic analyses. Prereq: MU273.

MU390 TOPICS IN MUSIC HISTORY (Subtitle required). (3) Studies of a specific composer, genre, school of composers, or a topic crossing the traditional boundaries of music history. May be repeated to a maximum of six credits when identified by different course subtitles. Prereq: MU203, 302, and 303, or consent of instructor.

MU395 INDEPENDENT WORK IN MUSIC. (1-3) May be repeated to a maximum of six credits. Prereq: Major in music and a standing of 3.0 or consent of instructor.

MU400 MUSIC HISTORY REVIEW. (3) A review of music history from the Medieval period through the twentieth century. May not be used to satisfy major requirements for Bachelors degrees in the College of Fine Arts. Prereq. Provisional graduate standing.

MU430G MUSIC THERAPY FOUNDATIONS AND PRINCIPLES I. (3) This course is directed toward developing entry-level competencies needed in the field of music therapy. Prereq: Permission of instructor.

MU431G MUSIC THERAPY FOUNDATIONS AND PRINCIPLES II. (3) This course is a continuation of Music Therapy Foundations and Principles I and is directed toward developing entry-level competencies needed in the field of music therapy. Prereq. MU430G or permission of instructor.

MU432G MUSIC THERAPY APPLICATIONS. (3) This course is directed toward developing entry-level competencies needed in the field of music therapy. Prereq. MU430G and 431G, specifically focusing on professional applications. Prereq. MU430G and MU431G or permission of instructor.

MU433G MUSIC THERAPY CLINICAL INTERNSHIP. (3) This course involves off-site clinical experiences in a student-selected area of interest. Students will complete a minimum of 900 hours and a maximum of 1044 hours of internship-based clinical training in medical, psychiatric, special education, geriatric or other clinical music therapy setting. Prereq. All music therapy equivalency course work must be completed prior to internship.

MU470G REVIEW OF HARMONY. (1) A review of common practice diatonic and chromatic harmony, through written work and analysis. May not be used to satisfy major requirements for Bachelors degrees in the College of Fine Arts. Lecture, two hours per week. Prereq. Provisional graduate standing.
MUS 471G REVIEW OF AURAL SKILLS. (1)
A review and continued development of basic listening skills, and the ability to comprehend aurally harmonic function within a tonal framework and musical structures, both micro-structures and macro-structures. May not be used to satisfy major requirements for Bachelors degrees in the College of Fine Arts. Lecture, two hours per week. Prereq: Provisional graduate standing.

MUS 500 MUSIC OF THE MIDDLE AGES. (3)
The development of Western music through the 14th century. Prereq: MUS 203 or consent of instructor.

MUS 501 MUSIC OF THE RENAISSANCE. (3)
A survey of vocal and instrumental music of the 15th and 16th centuries. Prereq: MUS 203 or consent of instructor.

MUS 502 MUSIC OF THE BAROQUE ERA. (3)
The history of vocal and instrumental music in the Baroque style from 1600 to 1750. Prereq: MUS 302 or consent of instructor.

MUS 503 MUSIC OF THE CLASSIC PERIOD. (3)
The development of music in the Classic style from the early 18th century to 1800. Prereq: MUS 302 or consent of instructor.

MUS 504 MUSIC OF THE 19TH CENTURY. (3)
A study of master works of music composed in the 19th century. Prereq: MUS 303 or consent of instructor.

MUS 505 MUSIC OF THE 20TH CENTURY. (3)
A stylistic study of representative compositions of the 20th century. Prereq: MUS 303 or consent of instructor.

MUS 506 HISTORY OF AMERICAN MUSIC. (3)
A survey of cultivated and vernacular musical styles in America from Colonial times to the present. Prereq: MUS 302 and 303 or consent of instructor.

MUS 520 VOCAL SOLO LITERATURE. (3)
A stylistic study of solo vocal music from the Baroque to the present. Prereq: MUS 302 and 303 or consent of instructor.

MUS 521 ORGAN LITERATURE. (3)
A course of study designed to give the organ student a practical knowledge of the development of the organ, its construction, the standard literature, and teaching materials. Prereq: MUS 302 and 303 or consent of instructor.

MUS 522 PIANO LITERATURE TO 1830. (3)
An historical and analytical study of music for piano to 1830, including discussion of the development of the instrument and the emergence of the idiomatic piano writing. Prereq: MUS 302 or consent of instructor.

MUS 523 PIANO LITERATURE SINCE 1830. (3)
A historical and analytical study of music written for the piano from the inception of the Romantic period to the present, from the parallel perspectives of changes in the approach to the instrument and stylistic developments as they are reflected in piano writing. Prereq: MUS 303 or permission of instructor.

MUS 540 APPLICATIONS OF MUSIC TECHNOLOGY. (3)
Applications of music technology hardware and software, including but not limited to MIDI systems, sequencing, notation software, and MIDI code. Emphasis will be on use of technology as tools for creativity and productivity. Content will be continually updated. No prior computer or MIDI experience assumed; space preference given to music majors. Prereq: Nonmusic majors must obtain permission of instructor; ability to read music required.

MUS 550 TOPICS IN MUSIC EDUCATION (Subtitle required). (1-3)
In-depth study of a designated topic, special issue, philosophy, or methodology of music education. May be repeated to a maximum of nine credits when identified by different course subtitles. Prereq: Junior standing in music.

MUS 560 ORFF SCHULWERK. (1-3)
The study of the philosophy and the pedagogy of the Orff Schulwerk method through movement, discussion, performance, improvisation, composition, and demonstration. Number of credits awarded will depend on total number of hours of participation and the amount of work in musical arrangement, orchestration, and composition. May be repeated to a maximum of six credits. Prereq: Junior standing in music or approval of instructor.

MUS 561 ORFF CERTIFICATION: LEVEL I, II, OR III. (2)
An intensive and systematic study of the philosophy and the pedagogy of the Orff Schulwerk method based on the curriculum recommended by the American Orff Schulwerk Association. The three main components are ensemble, recorder, and movement. Participants must demonstrate competency in orchestration, recorder, and pedagogy in order to obtain certification. Lecture, two hours; laboratory, two hours per week. May be repeated in sequence to a maximum of six credits. Prereq: Junior standing in music or approval of instructor.

MUS 566 PIANO PEDAGOGY. (3)
Investigation of techniques and materials for teaching piano in groups and to individual students, both children and adults. Prereq: Consent of instructor.

MUS 570 ORCHESTRATION. (2)
This course includes a study of the individual instruments of the orchestra and band with practice in scoring for these instruments. Prereq: MUS 371.

MUS 571 ORCHESTRATION. (2)
A continuation of MUS 570. Prereq: MUS 570.

MUS 572 COUNTERPOINT. (3)
A study of 16th century contrapuntal techniques and of contrapuntal influences in common-practice music. Prereq: MUS 273 or equivalent.

MUS 573 COUNTERPOINT. (3)
A study of 18th century contrapuntal techniques and of contrapuntal influences in Romantic and 20th century music. Prereq: MUS 273 or equivalent.

MUS 574 COMPOSITION. (2)
A basic course in original composition and orchestration. Prereq: MUS 371.

MUS 575 COMPOSITION. (2)
A continuation of MUS 574. Prereq: MUS 574.

MUS 578 ANALYSIS AND STYLE SURVEY. (3)
Studies in analytical terminology and methodology; survey of major stylistic practices of Western music. Prereq: MUS 372 or equivalent.

MUS 580 RESEARCH. (3)
A course designed to acquaint students with basic techniques and tools used in music education research.

MUS 581 FOUNDATIONS IN MUSIC EDUCATION. (3)
An historical survey of thought concerning the place and significance of music in the education of the individual and the group.

MUS 618 RESEARCH METHODS. (3)
A survey of basic research techniques and materials in musicology and theory. Prereq: A reading knowledge of French or German.

MUS 620 ADVANCED VOCAL REPERTORY (Subtitle required). (3)
An intensive study of the stylistic and interpretive characteristics of solo vocal literature of a specified repertory. May be repeated as desired with different subtitles. Prereq: Graduate standing or consent of instructor.

MUS 622 SYMPHONIC LITERATURE. (3)
An intensive study of orchestral literature from the classical period to the present. Prereq: Graduate standing in music or consent of instructor.

MUS 623 OPERA LITERATURE I. (3)
An intensive study of the history and literature of opera from its origins around 1600 through the early Romantic period. Prereq: Graduate standing in music or consent of instructor.

MUS 624 CHAMBER MUSIC LITERATURE. (3)
An intensive study of the development of instrumental chamber music. Prereq: Graduate standing in music or consent of instructor.

MUS 625 CHORAL LITERATURE. (3)
An intensive study of choral literature from the Renaissance period to the present. Prereq: Graduate standing or consent of instructor.

MUS 627 ORCHESTRA LITERATURE II. (3)
An intensive study of the history and literature of opera from the early Romantic period through the present. Prereq: Graduate standing in music or consent of instructor.

MUS 630 MEDICAL MUSIC THERAPY. (3)
This course is directed toward developing advanced competencies in medical music therapy objectives. Current research related to medical music therapy, current laws and regulations governing medical practice, and current music therapy theory related to the practice of music therapy in a medical setting will be addressed. Prereq: Permission of the instructor.

MUS 631 MUSIC IN COUNSELING. (3)
This course is directed toward developing advanced competencies in music therapy theory and clinical skills. Specifically, the use of music in counseling and the development of counseling techniques appropriate in music therapy will be addressed. Prereq: Permission of the instructor.

MUS 633 GRADUATE CLINICAL PLACEMENT IN MUSIC THERAPY. (1)
This course includes a study of the individual instruments of the orchestra and band with practice in scoring for these instruments. Prereq: MUS 371.

MUS 650 MUSIC EDUCATION WORKSHOP. (1-4)
Intensive study of advanced methods and materials in one of the following areas of music education: elementary and general music, the school orchestra, the school band, choral music. May be repeated once for a total of two, three or four credits.
 COURSE DESCRIPTIONS

MUS 660 ADVANCED MUSIC EDUCATION METHODS AND MATERIALS. (3)
An in-depth study and analysis of the methodology and materials and their development in music education. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: Graduate standing or consent of instructor.

MUS 664 MUSIC AND SPECIAL LEARNERS. (3)
This course is directed toward developing competencies and understandings relating to non-music and music educational objectives in therapy and education. Prereq: Consent of instructor.

MUS 665 PHYSIOLOGY AND FUNCTIONING OF THE SINGING VOICE. (3)
Detailed study of vocal physiology and acoustics of the singing voice. Major historical sources and recent scientific research form the basis of the course. Designed for professional voice teachers and music educators who work with singers. Prereq: Study of acoustics recommended.

MUS 666 ADVANCED ORFF SCHULWERK. (1-3)
For experienced music teachers who already had basic Orff Schulwerk training. This course enables students to advance their musicianship, refine pedagogic techniques, and/or do research in Orff Schulwerk. Prereq: MUS 561—equivalent to Level Two Orff Schulwerk Teacher Training or permission of the instructor.

MUS 667 MATERIALS, TECHNIQUES AND LITERATURE OF VOICE TRAINING. (3)
Survey of currently published books, anthologies, and other materials for voice teaching. Various approaches to teaching vocal technique will be examined; other pertinent literature explored. Prereq: MUS 665.

MUS 670 ANALYSIS OF TONAL MUSIC I. (3)
An introduction to and exploration of analytical techniques and issues relevant to music before 1900, addressing as well the performance implications of analytical decisions, as far as possible. Various musical dimensions will be studied including motivic structure, meter, rhythm, harmonic syntax, formal processes and text/music relationships. Prereq: MUS 578 or equivalent.

MUS 671 ANALYSIS OF TONAL MUSIC II. (3)
Introduction to the theories of Heinrich Schenker, their application to the analysis of tonal music, and to performance. Intensive analytical work and selected readings. Prereq: MUS 578 or equivalent.

MUS 672 ANALYSIS OF MUSIC SINCE 1900 I. (3)
An introduction to and exploration of analytical techniques and issues relevant to the literature since 1900, addressing as well the performance implications of analytical decisions as far as possible. Various musical dimensions will be studied, including motivic structure, meter, rhythm, harmonic syntax, formal processes and text/music relationships. Prereq: MUS 578 or equivalent.

MUS 673 ADVANCED COMPOSITION. (2)
May be repeated to a maximum of six credits. Prereq: MUS 575.

MUS 674 PEDAGOGY OF THEORY. (3)
Examination of the resources and techniques of teaching undergraduate music theory (aural and written components). Extensive review of the textbook literature, study of the application of contrasting theoretical approaches, and the examination of relevant Computer Assisted Instruction materials. Requirements to include practice teaching and observation of undergraduate music theory classes (MUS 171-173; 271-273; 170-172; 270-272). Prereq: MUS 578 or equivalent.

MUS 675 INTERNSHIP IN THEORY PEDAGOGY. (1)
An internship providing pedagogical experience in undergraduate music theory (written and aural). Internship is conducted under the supervision of a faculty member who is teaching an undergraduate music theory course (MUS 170, 171, 172, 173, 270, 271, 272, or 273). May be repeated to a maximum of four credits.

MUS 676 ADVANCED ANALYTICAL TECHNIQUES. (3)
Study of the most significant approaches to music analysis in the 20th century, including Schenkerian analysis, Forte set theory, and others. Prereq: MUS 578 or equivalent.

MUS 677 CONTEMPORARY MUSIC DIOMS. (3)
Survey, with intensive study of representative works, of musical trends since 1935. Prereq: MUS 578 or 671 or 672.

MUS 678 HISTORY OF THEORY. (3)
A survey of theoretical ideas from the Greeks through 19th century English and German theorists. Prereq: MUS 578 or equivalent.

MUS 680 BAND HISTORY AND LITERATURE. (3)
A study of the heritage of the wind band through its leaders and literature, from its earliest roots to the present, with emphasis on the period from 1950 to the present. Prereq: Consent of instructor.

MUS 681 ADVANCED REHEARSAL TECHNIQUES—BAND. (3)
The development of effective rehearsal skills in the secondary school and university band settings, with emphasis on performance orientation, the development of aural concepts and advanced rehearsal analysis and techniques. Prereq: MUS 365, teaching experience or permission of instructor.

MUS 684 ADVANCED STRING METHODS AND MATERIALS. (3)
The study of string pedagogy through historical perspectives as it relates to the individual instruments as well as to class instruction. Prereq: Graduate standing in music or approval of instructor.

MUS 690 TOPICS IN MUSICOGIOLOGY (Subtitle required). (3)
Investigation of critical and historical problems in musicology; intensive study of a specific composer, genre, or school of composers. May be repeated to a maximum of six credits when identified by different course subtitles. Prereq: Graduate standing and consent of instructor.

MUS 693 WORLD MUSIC FOR TEACHERS. (3)
This course provides a comprehensive survey of world music for teachers, an introduction to theories and methodologies of ethnomusicology and preparation for developing a more in-depth knowledge of a given musical region. Prereq: Graduate standing or consent of instructor.

MUS 694 INTERNSHIP IN SACRED MUSIC. (1)
An internship to provide students in the Master of Music in Sacred Music program with a practical field experience in a sacred setting. The internship is identified and conducted under the supervision of a UK School of Music faculty supervisor and on-site coordinator. Students must file a Learning Contract with the School of Music DGS. May be repeated to a maximum of three credits. Prereq: Completion of 12 hours in the M.M. in Sacred Music program or by consent of instructor.

MUS 695 INDEPENDENT WORK IN MUSIC. (1-3)
Study of an individually selected topic relevant to a student’s academic development. For work in musicology, theory, music education, or vocal literature, students should enroll in the designated independent work courses listed separately. May be repeated to a maximum of six credits. Prereq: Graduate standing in music and consent of instructor.

MUS 700 MEDIEVAL AND RENAISSANCE NOTATION. (3)
The study and transcription of the notation of medieval and Renaissance polyphony, and of the various keyboard and lute tablatures of the 16th and 17th centuries. Prereq: Consent of instructor.

MUS 702 SEMINAR IN MUSICIOLOGY. (3)
Study and research in specific musicological problems. May be repeated to a maximum of eighteen hours. Prereq: Consent of instructor.

MUS 703 PROSEMINAR IN MUSICOLOGICAL METHODS. (3)
An introductory exploration into the methodologies currently utilized in the field of musicology. Prereq: Consent of instructor.

MUS 705 RESEARCH II. (3)
A course designed to lead the student in music education to do experimental research in the area of music education. Prereq: MUS 600.

MUS 706 MUSIC LEARNING AND BEHAVIOR. (3)
This course is intended for graduate students in music education with the major focus of the class involved in learning behavioral principles, learning observational categories pertaining to classroom reinforcement and role playing and practicing techniques to be employed later in the classroom. Prereq: Graduate standing in music.

MUS 707 TESTS AND MEASUREMENTS IN MUSIC. (3)
This course is designed to provide students with knowledge in measurements and evaluation in the field of music education and research. Topics include principles of measurement, administration and evaluation of published standardized and teacher-made tests, interpretation of test results, and test construction. Prereq: MUS 600.

MUS 710 INTRODUCTION TO ETHNOMUSICOLOGY. (3)
An introduction to the materials and methodologies of the field of ethnomusicology. Prereq: Graduate standing in music.

MUS 711 SEMINAR IN ETHNOMUSICOLOGY (Subtitle required). (3)
Intensive research-based study of specific problems and topics in ethnomusicology. May be repeated under a different subtitle to a maximum of twelve credits. Prereq: Graduate standing in music.

MUS 719 INDEPENDENT WORK IN MUSICOLOGY. (1-3)
May be repeated to a maximum of six hours. Prereq: Four to six hours of graduate credit in the area of specialization and consent of instructor.

MUS 730 INDEPENDENT WORK IN MUSIC THERAPY. (1)
This course is directed toward developing individualized advanced competencies in music therapy in one of the following areas: Music Therapy Theory, Research, Musical Development and Personal Growth, and Clinical Administration. Prereq: Permission of instructor.

MUS 732 SEMINAR: TOPICS IN MUSIC THERAPY. (3)
This course is directed toward developing advanced competencies in music therapy in various topics and related to music therapy. Topics will include supervision, leadership skills, research, current theories of practice and clinical administration. Prereq: Permission of instructor.

MUS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.
MUS 749 DISERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residency credit following the successful completion of the qualifying exams.

MUS 750 INDEPENDENT WORK IN MUSIC EDUCATION. (1-3) May be repeated to a maximum of six hours. Prereq: Four to six hours of graduate credit in area of specialization and consent of instructor.

MUS 762 MUSIC IN HIGHER EDUCATION. (3) Historical and comparative studies in the teaching and administration of music in colleges and universities. Includes case studies in administration, music in European higher education and the relationship of music to all other elements of the academic program. Prereq: MUS 751.

MUS 766 SEMINAR IN MUSIC EDUCATION. (3) Advanced professional study in the theory and practice of music education. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

MUS 767 DISERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters is required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

MUS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

MUS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

MUS 770 PSYCHOLOGY OF MUSIC. (3) A study of the processes of musical thinking and the effects of music on human behavior.

MUS 772 SEMINAR IN THEORY. (3) Individual and group study of theoretical problems and areas of inquiry. May be repeated to a maximum of nine credits. Prereq: Graduate standing in Theory, or consent of instructor.

MUS 780 DIRECTED RESEARCH IN VOCAL LITERATURE. (1-3) Individual directed research. Elective course for master’s degree students. Required for doctoral voice majors; topics assigned at discretion of instructor in proportion to credits undertaken. May be repeated to a maximum of 12 credits. Prereq: MUS 618 and MUS 620 or permission of instructor.

MUS 799 INDEPENDENT WORK IN MUSIC THEORY. (1-3) May be repeated to a maximum of six hours. Prereq: Four to six hours of credit in area of specialization and consent of instructor.

NEU 815 FIRST-YEAR ELECTIVE, NEUROLOGY. (1-3) With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Neurology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

NEU 825 SECOND-YEAR ELECTIVE, NEUROLOGY. (1-4) With the advice and approval of his or her adviser, the second-year student may choose approved electives offered by the Department of Neurology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

NEU 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6) With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth-year College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
- NEU 851 CLINICAL NEUROLOGY I
- NEU 852 CLINICAL NEUROLOGY II
- NEU 853 CLINICAL NEUROLOGY III
- NEU 854 CLINICAL NEUROLOGY IV
- NEU 855 CLINICAL NEUROLOGY V
- NEU 856 CLINICAL NEUROLOGY VI
- NEU 857 CLINICAL NEUROLOGY VII
- NEU 858 CLINICAL NEUROLOGY VIII
- NEU 859 CLINICAL NEUROLOGY IX
- NEU 860 CLINICAL NEUROLOGY X
- NEU 861 CLINICAL NEUROLOGY XI
- NEU 862 CLINICAL NEUROLOGY XII
- NEU 863 CLINICAL NEUROLOGY XIII
- NEU 864 CLINICAL NEUROLOGY XIV
- NEU 865 CLINICAL NEUROLOGY XV
- NEU 866 CLINICAL NEUROLOGY XVI
- NEU 867 CLINICAL NEUROLOGY XVII
- NEU 868 CLINICAL NEUROLOGY XVIII
- NEU 869 CLINICAL NEUROLOGY XIX
- NEU 870 CLINICAL NEUROLOGY XX
- NEU 871 CLINICAL NEUROLOGY XXI
- NEU 872 CLINICAL NEUROLOGY XXII
- NEU 873 CLINICAL NEUROLOGY XXIII
- NEU 874 CLINICAL NEUROLOGY XXIV
- NEU 875 CLINICAL NEUROLOGY XXV
- NEU 876 CLINICAL NEUROLOGY XXVI
- NEU 877 CLINICAL NEUROLOGY XXVII
- NEU 878 CLINICAL NEUROLOGY XXVIII
- NEU 879 CLINICAL NEUROLOGY XXIX
- NEU 880 CLINICAL NEUROLOGY XXX
- NEU 881 CLINICAL NEUROLOGY XXXI
- NEU 882 CLINICAL NEUROLOGY XXXII
- NEU 883 CLINICAL NEUROLOGY XXXIII
- NEU 884 CLINICAL NEUROLOGY XXXIV
- NEU 885 CLINICAL NEUROLOGY XXXV
- NEU 886 CLINICAL NEUROLOGY XXXVI
- NEU 887 CLINICAL NEUROLOGY XXXVII
- NEU 888 CLINICAL NEUROLOGY XXXVIII
- NEU 889 CLINICAL NEUROLOGY XXXIX
- NEU 890 CLINICAL NEUROLOGY XL
- NEU 891 CLINICAL NEUROLOGY XLI
- NEU 892 CLINICAL NEUROLOGY XLII
- NEU 893 CLINICAL NEUROLOGY XLIII
- NEU 894 CLINICAL NEUROLOGY XLIV
- NEU 895 CLINICAL NEUROLOGY XLV
- NEU 896 CLINICAL NEUROLOGY XLVI
- NEU 897 CLINICAL NEUROLOGY XLVII
- NEU 898 CLINICAL NEUROLOGY XLVIII
- NEU 899 CLINICAL NEUROLOGY XLIX

NRE Natural Resources and Environmental Science

NRE 301 NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (3) An introductory course in management of natural resources as supported by environmental science at an ecosystem level. Students will write a range of papers about natural resource issues. An overnight field trip is required. Prereq: ENG 104 and sophomore standing.

NRE 320 NATURAL RESOURCE AND ENVIRONMENTAL ANALYSIS. (3) A field-oriented course taught off campus as a three-week summer camp in August. Emphasis is placed on methodologies for field data collection necessary to evaluate a variety of natural resources on forest, agricultural, and surface mined lands. Students will become familiar with sampling instrumentation, collection, preservation, analysis and data interpretation. Lecture, 10 hours; laboratory, 30 hours per week (Monday–Friday) for three weeks. Prereq: BIO 150/152 and CHE 105.

NRE 355 INTRODUCTORY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS. (3) An introduction to the concepts and methods of compilation, management, analysis, and display of spatially-referenced and tabular data utilizing vector and raster data models. Lecture will be complemented with computer based laboratory exercises. Lecture, two hours; laboratory, four hours per week. Prereq: Third year and above LA major, junior/senior NRES major, or permission of instructor. (Same as LA 855.)

NRE 381 NATURAL RESOURCE AND ENVIRONMENTAL POLICY ANALYSIS. (3) This course examines the historical development of natural resource and environmental policies, provides an overview of the policy process and key federal agencies which manage natural resources or implement environmental regulations, and introduces basic policy analysis techniques so students can prepare and present a case-specific analysis of existing resource or environmental policy.

NRE 390 SPECIAL TOPICS IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (1-3) This course focuses on unique and timely topics in natural resources and environmental science. May be repeated under a different subtitle for a maximum of six credits. Prereq: NRE 301 or consent of instructor.

NRE 395 INDEPENDENT STUDY IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (1-3) Study and independent work on selected problems related to natural resources and environmental science conducted under the supervision of a faculty member and with clear relevance to the student’s Environmental Systems Emphasis Area. The goal of NRE 395 is for students interested in research to have an authentic research experience, working directly with a faculty member, meeting the student in data collection and analysis, as well as conducting a portion of the research independently. Prereq: Consent of appropriate faculty and a plan of learning objectives approved by the NRCM Internship Coordinator.

NRE 399 EXPERIENTIAL EDUCATION IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (3) A learning experience in natural resources and environmental sciences conducted under the supervision of a faculty member and with clear relevance to the student’s Environmental Systems Emphasis Area. The goal of this requirement is to provide the student a professional experiential learning experience in their chosen emphasis area within natural resources and environmental science. Prereq: Consent of appropriate faculty and approval by NRCM Internship Coordinator.

NRE 420G TAxonomy OF Vascular Plants. (4) A survey of the evolutionary relationships among the major of vascular plant groups, concentrating heavily on important families flowering plants. Issues in contemporary systematics, including cladistic methods, will be covered. Students will gain practical experience learning the language of descriptive botany and using botanical keys in technical manuals for species identification. Field trips highlight the local spring flora. Lecture, three hours; laboratory, three hours; plus two Saturday field trips. Prereq: Junior standing; BIO 150, 152 or one course in introductory botany, or consent of instructor. (Same as BIO 420G.)

NRE 450G BIOGEOCHEMISTRY. (3) A lecture and lab course emphasizing the role of microbial processes on elemental and pollutant cycling in terrestrial soils and aquatic sediments. Soils and sediments from different ecosystems are evaluated for microbial community composition and biogeochemical cycling of organic and inorganic nutrients and pollutants using advanced molecular and laboratory techniques. Several all day field trips and laboratory exercises required. Limited to eight students at the senior or higher level standing. Prereq: CHE 103, 107, 111, 113. (Same as PLS 450G.)

NRE 455G WETLAND DELINEATION. (3) Basic concepts of natural wetland ecosystems, their importance, functions, and major features used for their identification and classification. Application of basic hydrology, hydrophytic vegetation and hydric soil indicators for identification of jurisdictional wetlands utilizing documentation and analysis of field collected data. Three laboratory exercises and four short field trips required. Prereq: PLS 366 or consent of instructor. (Same as PLS 455G.)
NRE 456G CONSTRUCTED WETLANDS. (3)
Important aspects of the functions of natural and constructed wetlands as water purifiers. Principles and mechanics of the purification process, design, construction, operation and management criteria for efficient usage. Case studies and design problems of constructed wetlands on mining, agricultural, industrial and municipal wastewater treatment applications. Two all day field trips are required. Prereq: PLS 366 or consent of instructor. (Same as PLS 456G.)

NRE 470G SOIL NUTRIENT MANAGEMENT. (3)
Soil reaction; cycling of elements essential for plant growth; rates, timing and placement of nutrient sources in modern crop/soil management systems; plant and soil sampling and analysis to diagnose plant nutrient problems. Prereq: CHE 105, PLS 366 and PLS 386 or consent of instructor. (Same as PLS 470G.)

NRE 471 SENIOR PROBLEM IN NATURAL RESOURCES AND ENVIRONMENTAL SCIENCE. (3)
This course is designed to provide students with the opportunity to apply the skills and information acquired in previous courses to a real world problem in natural resources and environmental science. The class will focus on a single current issue in Kentucky and will research that issue in depth, using a variety of techniques, including library research, interviews, and data collection and analysis. In addition to research and problem-solving skills, written and oral skills will be emphasized. Lecture, two hours; laboratory, two hours per week. Prereq: NRE 301, NRE 320, and NRE 381 and senior standing.

NRE 477G LAND TREATMENT OF WASTE. (3)
Resource management with emphasis on principles and methods of soil application of wastes. (agricultural, industrial, and municipal.) Topics include chemical and biological soils; soil and plant management; development, monitoring, and record keeping. Prereq: PLS 366. (Same as PLS 477G.)*

*NRE 545 RESOURCE AND ENVIRONMENTAL ECONOMICS. (3)
This is an advanced level course focused on economic analysis. It will help students frame natural resource and environmental problems so that they can be analyzed and solved. Major topic areas include water resources, fisheries, energy (and other non-renewable resources), agriculture, and pollution. Policy instruments such as pricing, emission fees, and tradeable permits will be covered in detail. Prereq: AEC 303 or AEC 445G or consent of instructor. (Same as AEC 545.)

NRE 556 CONTEMPORARY GEOSPATIAL APPLICATIONS FOR LAND ANALYSIS. (3)
Advance concepts in data base analysis, model development, and ancillary functions in geographic information systems. Lecture, two hours; laboratory, four hours per week. Prereq: LA 855/NRE 355 and either STA 291 or STA 570. (Same as LA 856.)

** NS 601 INTEGRATED NUTRITIONAL SCIENCES I. (3)
The material covered in CNU/NS 601 consists of three major emphasis areas: (1) review of carbohydrate, lipid, and protein structure, synthesis, absorption, and metabolism, (2) the impact of nutritional influences on macronutrient metabolism to health and disease, (3) the influence of macronutrient metabolism on the regulation of energy balance. Prereq: IBS 601, PGY 206. (Same as CNU 601.)

NS 602 INTEGRATED NUTRITIONAL SCIENCES II. (3)
Integrates study of the properties, metabolism, biochemical and physiological reactions and interactions of vitamins and minerals, and their relationships to chronic diseases, deficiency symptoms and toxicity. Prereq: IBS 601, PGY 206. (Same as ASC/CNU 602.)

NS 603 INTEGRATED NUTRITIONAL SCIENCES III. (2)
This course is aimed at providing medical and health professional students with a working knowledge of dietary requirements and guidelines, nutritional assessment and nutritional requirements, food safety issues and nutritional needs throughout the lifecycle. Prereq: Health Professional Graduate Status. (Same as CNU/FSC 603.)

NS 604 LIPID METABOLISM. (3)
Emphasis on factors influencing the absorption of fats and fatty acids, distribution and incorporation of fatty acids into body tissues, the biosynthesis of and catabolism of fatty acids, as well as cholesterol, bioactive eicosanoid production and the involvement of fats in the disease process. Lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: NS/CUN 601, BCH 401G and PGY 412G or consent of instructor. (Same as CNU 604.)

NS 605 WELLNESS AND SPORTS NUTRITION. (3)
Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas are: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutrition-strength and performance enhancement. Prereq: PGY 412G, and BCH 401 G or equivalent or consent of instructor. (Same as CNU/PT 605.)

NS 606 MOLECULAR BIOLOGY APPLICATIONS IN NUTRITION. (2)
Focus will be on the use of the most recently developed techniques and model systems in nutritional sciences as related to health and disease. Faculty from different disciplines will provide in-depth coverage of selected topics in nutrition science as related to health and disease, e.g. nutrition and gastrointestinal diseases, diabetes, cancer, cardiovascular disease. Prereq or concur: Six credit hours from ASC 681, 683, 687, ASC/NFS 685, NFS 610, CNS 601 or consent of instructor.

NS 607 CLINICAL/WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3)
A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer opportunities in therapeutic nutrition, and health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services such as surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CUN 601, NS/AEC 602, NS/CUN 701, NS/NFS 610 and graduate status or consent of instructor. (Same as CNU 702.)

NS 608 NUTRITIONAL IMMUNOLOGY. (3)
Theories and mechanisms of immunity will be introduced. The effects of nutrition on immunity will be discussed from both an immunological and clinical perspectives. A lecture and problem-based learning approach with incorporation of student presentations, three hours per week. Prereq: PGY 412G and CNS 601, or consent of instructor. (Same as CNS 608.)

NS 609 ETHICS IN CLINICAL SCIENCES RESEARCH. (1)
Students will examine ethical issues in experimental research using a case-study approach. Representative issues addressed may include animal care and use, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as CNS 609.)

NS 620 NUTRITION AND AGING. (2)
Emphasis on current research in nutrition and aging, nutrition needs of the elderly and nutrition-related diseases associated with aging. Prereq: NFS 510 and 511 or equivalent. (Same as NFS 620.)

NS 630 ADVANCED COMMUNITY NUTRITION. (3)
Study of nutrition surveys and of bases for judging community nutrition. Emphasis is placed upon economic, geographic, social and educational causes of malnutrition. Experience is given in development of nutrition programs. May be repeated to a maximum of six credits. Prereq: NFS 503. (Same as NFS 630.)

NS 640 HUMAN NUTRITION ASSESSMENT. (3)
Assessment of dietary, anthropometric and biochemical parameters of nutritional status in health and disease. Lecture, two hours; laboratory, three hours per week. Prereq: NFS 510, NFS 511 or equivalent. (Same as NFS 640.)

NS 651 TOPICS IN NUTRITIONAL SCIENCES I. (2)
Faculty from different disciplines will provide in-depth coverage of selected topics in nutritional sciences as related to health and disease, e.g. nutrition and gastrointestinal diseases, diabetes, cancer, cardiovascular disease. Prereq or concur: Six credit hours from ASC 681, 683, 687, ASC/NFS 685, NFS 610, CNS 601 or consent of instructor.

NS 652 TOPICS IN NUTRITIONAL SCIENCES II. (2)
Faculty from different disciplines will provide in-depth coverage of selected topics in nutritional sciences as related to health and biological functions (e.g. nutrition and exercise, stress, and environmental interactions). Prereq or concur: Six credit hours from ASC 681, 683, 687, ASC/NFS 685, NFS 610, CNS 601 or consent of instructor.

NS 701 NUTRITION AND CHRONIC DISEASES. (4)
Selected topics in nutritional sciences as related to health and chronic diseases, e.g., gastrointestinal disease, cancer, AIDS, diabetes, cardiovascular disease, obesity, including drug-nutrient interactions. Prereq or concur: NS/CUN 601, NS/AEC 602. (Same as CNS 701.)

NS 702 CLINICAL/WELLNESS NUTRITION PROBLEM-BASED CASE STUDIES. (1-3)
A problem-based learning approach to case studies is integrated with a traditional didactic approach to offer opportunities in therapeutic nutrition, and health promotion. Efforts are directed toward patient, worksite and laboratory data interpretation as well as patient education. Students are directed to develop independent critical thinking related to class presentations including case studies regarding rotations through various medical or health services such as surgery, pediatrics, nutrition support and health promotion. Prereq: NS/CUN 601, NS/AEC 602, NS/CUN 701, NS/NFS 610 and graduate status or consent of instructor. (Same as CNS 702.)

NS 704 CURRENT TOPICS IN NUTRITIONAL SCIENCES. (1)
This course is designed to develop the student’s independent thinking and critical analysis related to various nutritional sciences issues. These skills will be developed through reading assignments and group discussion related to current topics in nutrition. Prereq: Consent of instructor. (Same as CNS 704.)

NS 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed. (Same as CNS 748.)

NS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 760 residence credit following the successful completion of the qualifying exams.

NS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.
NS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours. (Same as NFS 768.)

NS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

NS 771 GRADUATE SEMINAR IN NUTRITIONAL SCIENCES. (0-1) Reports and discussion on recent research and current literature in nutritional sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing and consent of instructor for non-NS students enrolled for one credit.

NS 782 SPECIAL PROBLEMS. (1-6) Independent advanced work on a special problem in nutritional sciences. Prereq: Consent of graduate advisor. (Same as CNU/NFS 782.)

NS 790 RESEARCH IN NUTRITIONAL SCIENCES. (0-6) Research work involving original investigation. May be repeated to a maximum of 18 credits. Prereq: Consent of graduate advisor. (Same as CNU/NFS 790.)

NSG Neurosurgery

NSG 644 ACTING INTERNSHIP IN NEUROSURGERY. (4) These are surgical acting internship rotations and students will fulfill the general objectives as given, in addition to the more specific goals and objectives for all AIs as outlined in the AI syllabus. Prereq: Promoted without reservation from third to fourth year. Approval of faculty advisor. Approval of course coordinator.

NUR Nursing

NUR 101 ACADEMIC ORIENTATION AND INTRODUCTION TO NURSING. (1) Designed to help pre-nursing freshmen make the transition to college and understand while exploring their potential in the health care system and profession. Lectures, discussions, exercises, and out of class assignments will introduce the students to the University’s expectations of its students, the history and mission and traditions. Attention will also be given to honing academic skills. Prereq: Pre-Nursing Majors only.

NUR 200 FOUNDATIONS FOR PROFESSIONAL NURSING. (2) Enable nursing students to develop skills for student success. Discover nursing as a discipline in historical and emerging contexts of today’s health care delivery system. Prereq: Admission to the professional Nursing program. Coreq: NUR 201.

NUR 201 ASSESSMENT AND HEALTH PROMOTION ACROSS THE LIFESPAN. (8) This course introduces the baccalaureate student to the concepts of health and physical assessment, health promotion, and therapeutic communication skills as they are applied with diverse populations in a variety of clinical settings. In addition, students will develop critical thinking skills useful to the nurse in promoting health in individuals and families across the life span. Lecture, five hours; laboratory nine hours per week. Prereq: Admission to the professional Nursing program, completion of Certified Nurse Assistant Program, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations, completion of HIPPA. Coreq: NUR 200.

NUR 210 INTRODUCTION TO PROFESSIONAL NURSING ACROSS THE LIFESPAN FOR SECOND DEGREE STUDENTS. (8) This course introduces the baccalaureate student to the concepts of health and physical assessment, growth and development, health promotion and therapeutic communication skills as they are applied with diverse populations in a variety of clinical settings. The course will provide didactic and clinical experiences that enable the students to provide beginning professional nursing care with adults requiring intervention. Students will use the key concepts of safety, patient-centered care, nursing process, teaching-learning, and physical and psychosocial assessment in the care of adults with basic alterations in ability to meet human needs. Content related to providing a safe care environment, such as administering and monitoring medications, aseptic technique, and psychomotor skills will be addressed. Prereq: NUR 200, NUR 201, BIO 208, DHI 212 with grade of C or higher.

NUR 213 INTRODUCTION TO PROFESSIONAL NURSING ACROSS THE LIFESPAN FOR NON-TRADITIONAL STUDENTS. (8) This course introduces the beginning professional nursing student to the concepts of health and physical assessment, growth and development, health promotion and therapeutic communication skills as they are applied with diverse populations in a variety of clinical settings. The course will provide didactic and clinical experiences that enable the students to provide beginning professional nursing care with adults requiring intervention. Students will use the key concepts of nursing process, teaching-learning, and physical and psychosocial assessment in the care of people with basic alterations in ability to meet human needs. Content related to providing a safe care environment, such as administering and monitoring medications and aseptic technique will be addressed. In addition, students will develop critical thinking skills useful to the nurse in promoting health in individuals and families across the lifespan. Prereq: Admission to the College of Nursing Second Degree Option; NUR 212, BIO 208 with a grade of C or higher; completion of Certified Nurse Assistant Program; current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations, completion of HIPPA. *NUR 350 CONCEPTS IN PROFESSIONAL NURSING. (5) This course will provide students with an opportunity to explore and understand theories from other disciplines and to apply these theories in nursing practice. Student learning will be facilitated with the use of case studies, scholarly journal articles, peer review of classmates’ writing and informatics. Additionally this course will focus on client education that encompasses the assessment of the learner and consideration of the learner’s needs in various health care situations. The student will learn how to develop a teaching plan and will demonstrate effective teaching strategies in the classroom setting. Students will expand their knowledge of cultural diversity and evidence based practice to promote quality and safe patient care. This course is taught in a distributed learning format, meaning that 1/3 of the class is online, 1/3 of the class is independent study, and 1/3 of the class is in the classroom. Students must be active, self-directed learners to be successful in this class. Students will practice skills of critical thinking and writing within the discipline. Prereq: Admission to College of Nursing RN-BSN option.

NUR 351 HEALTH ASSESSMENT. (2) This health assessment course offers essential assessment and skill development opportunities for nursing. It includes intensive work on the principles and techniques of performing a health assessment in the context of developmental, physiological, psychological, and environmental parameters. Individual and family models will be analyzed and utilized for use with diverse populations; case studies will be used to analyze family assessment models. Clinical emphasis will be placed on the assessment of individual clients. Prereq: Admission to College of Nursing RN-BSN option.

NUR 352 PHARMACOLOGY. (3) This is a general introductory course to drugs and drug therapy. Various drugs will be studied and categorized in the context of clinical pathological disorders or problems. The general approach will involve a review of the pathophysiology of specific disorders and the categories of drugs currently employed in the treatment of these problems. The students will learn mechanisms of action, therapeutic effect, side effects, drug interactions, and toxicities of these drugs, and will be provided with examples of commonly used drugs in each category of drugs discussed. RN-BSN prereq or coreq: NUR 364.

NUR 354 PATHOPHYSIOLOGY. (3) This course addresses pathophysiological concepts basic to nursing practice. Concepts essential for understanding major health problems which occur across the life span and that are encountered in multiple care settings are discussed. Emphasis is on understanding how and why various pathophysiological signs and symptoms occur. RN-BSN coreq: NUR 352.

NUR 510 OLDER WOMEN AND THEIR HEALTH. (3) This course is designed to increase the awareness and understanding of the relationships among gender, health status and the aging process among older women. Such issues as changing social and cultural mores, public policies and utilization of health care resources are discussed as they impact women. Prereq: Upper division or graduate standing. (Same as HSE 510.)

NUR 511 END OF LIFE CARE IN THE ACUTE CARE SETTING. (3) This course is designed to provide insight into the special needs of adult and pediatric patients in the acute care setting who are near the end of life. This course will cover pain and symptom management, ethical issues in end-of-life care, cultural considerations in end-of-life care, communication, loss, grief, and bereavement; achievement of quality care at end-of-life; and preparation for and care at the time of death. Prereq: Admitted to Nursing Program or consent of instructor.

NUR 512 COMPLEMENTARY/ALTERNATIVE APPROACHES TO HEALTHCARE. (3) Using a holistic approach to wellness, this course is an overview of alternative ways of conceptualizing health and illness. Non-traditional methods of managing illness and promoting health and well-being will be discussed. Practitioners of these methods will participate in discussions and involve students in experiencing some of these practices. Alternative methods that reflect use in a number of other cultures will be explored as complementary to the traditional western style of medicine which is used almost exclusively in this country. Prereq: Junior level. Consent of instructor for students outside the health professions.

NUR 520 SPECIAL TOPICS IN NURSING (Subtitle required). (2-4) Exploration of selected topics or issues in nursing. Directed by a faculty member with expertise in the topic under study. Lecture, 0-4 hours; laboratory, 0-12 hours per week. May be repeated with different topics to a maximum of nine credits. Prereq: Variable, specified when topic identified.

NUR 530 EXPLORING MEDICAL MISSIONS: A MULTIDISCIPLINARY PERSPECTIVE. (3) This seminar is designed to provide information on: (1) historical perspectives of mission work; (2) health, political, economic, and cultural diversities of mission sites in selected countries; and (3) eligibility and funding criteria for selected sites. This course provides an opportunity to learn about short-term humanitarian medical missions (sponsored by independent non-governmental and multi-denominational religious organizations). Health care professionals who have participated in medical missions will share their experiences. Prereq: Available to graduate or senior level undergraduate students.
NUR 601 THEORETICAL BASIS FOR ADVANCED PRACTICE NURSING. (2) Selected concepts and theories useful for guiding advanced practice nursing are examined. The concepts and theories are drawn from nursing science as well as from other disciplines. All are discussed within the context of the nature of nursing knowledge and the expanding scientific basis for advanced practice nursing. Prereq: Enrollment in graduate program in Nursing or consent of instructor.

NUR 602 RESEARCH METHODS IN ADVANCED PRACTICE NURSING. (3) This course provides the knowledge and skills essential for using research to support clinical and organizational decision-making. The strengths and limitations of various research designs and methods are reviewed for their utility in answering clinical questions, evaluating care delivery and patient outcomes, and making clinical decisions. Prereq: Graduate statistics course and NUR 924, admission to DNP program, graduate programs in nursing, or consent of instructor. (Same as NUR 925.)

NUR 603 CLINICAL REASONING IN ADVANCED PRACTICE NURSING. (3) The intent of this course is for students to enhance their abilities to think logically, use clinical evidence and research findings in making clinical decisions. Concepts and principles from the biopsychosocial sciences, clinical epidemiology, informatics, and ethics will be used in developing ways for defining problems; managing the health care of individuals, groups, and populations; and measuring and monitoring the outcomes of care. Strategies for organizing, managing, and using clinical data in decision making will be addressed. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students enrolled in graduate program in Nursing; or consent of instructor.

NUR 604 LEADERSHIP IN ADVANCED PRACTICE NURSING. (3) This course focuses on leadership and management of health care delivery by advanced practice nurses. Emphasis will be placed on leadership roles related to improving health care, especially in relation to those areas targeted by national health care objectives. Students will critically analyze theory and research from nursing and related sciences to understand social, cultural, economic, and political issues in the health care environment. Legislative and regulatory requirements related to the practice of advanced nursing will be appraised, with an emphasis on understanding how to promote the health of the public within appropriate legal boundaries and within the context of interdisciplinary practice. Students will use selected frameworks for evaluating organizational and public policies affecting health. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 603 for students admitted to graduate nursing program; or consent of instructor.

NUR 605 EVIDENCE-BASED NURSING PRACTICE. (3) This course provides the opportunity to apply knowledge of the research process, research utilization and evaluation, and evidence-based clinical practice to address a clinical problem. Under the guidance of a faculty advisor, students are expected to work with clinical staff to identify and address a clinical problem. A written scholarly report reflecting the process and outcomes of the activity is the final product. Prereq: NUR 602, enrollment in graduate program in Nursing or consent of instructor. Co-req: NUR 708, NUR 714, NUR 724, NUR 727, or NUR 734 (depending on student’s specialty area.)

NUR 613 RESEARCH APPLICATIONS IN NURSING. (3) This course provides an opportunity for application of selected aspects of the research process to clinical nursing problems. Students work individually or in small groups. The specific nature of the research effort is negotiated with the faculty advisor and is under the direction of that advisor. A written scholarly report is the final product. May be repeated to a maximum of six credits. Prereq: NUR 612.

NUR 614 PRACTICUM IN CLINICAL NURSING. (4) Conceptual frameworks, theories, and research findings are applied in clinical practice. The testing of theoretical concepts related to nursing management of clients in an area of clinical concentration is emphasized. Collaborative practice with other disciplines is an expectation. Prereq: Kentucky licensure and relevant post-baccalaureate experience, NUR 610; or coreq: NUR 700, 710, 715 or 720.)

NUR 615 PRACTICUM IN CLINICAL NURSING. (5) Advanced knowledge, research, leadership, and clinical skills are integrated in managing nursing care with individuals, families, and groups or communities. Evaluation strategies to promote change and resolve problems in nursing care delivery are analyzed. Multidisciplinary strategies to promote and resolve problems in health care delivery are emphasized. Prereq: NUR 614, 701, 711, 716, 717 or 720.

NUR 620 PROBLEMS IN CLINICAL NURSING. (2-6) This course provides opportunity for the study of nursing problems in particular clinical areas and for the further development of techniques of nursing intervention. Ratio of discussion laboratory hours will vary according to designated clinical problems. May be repeated to a maximum of 12 credits. Prereq: Admission in graduate program in nursing or consent of instructor.

NUR 627 ISSUES IN RURAL NURSING AND HEALTH CARE DELIVERY. (2) This course will focus on the exploration of models for providing preventive, primary health care, acute care, and chronic health care services in rural communities. Model standards for implementing the national health objectives in rural communities will be the primary focus. Demographic characteristics and organization of the community will be considered in assessing appropriateness and effectiveness of models for improving access to service and reducing disparity among subpopulations. Prereq: Enrollment in graduate program in nursing or consent of instructor.

NUR 629 EPIDEMIOLOGICAL PRINCIPLES APPLIED TO HEALTHCARE AND NURSING PRACTICE. (3) This course reviews the basic concepts and methods of epidemiology applied to population focused health care and nursing practice. Emphasis is placed on the use of epidemiologic reasoning in deriving inferences about the etiology of health outcomes from population data, and in guiding the design of health service programs. Prereq: STA 570 or equivalent.

NUR 631 APPLICATIONS OF ADVANCED HEALTH ASSESSMENT. (3) This advanced health assessment course offers comprehensive assessment of the individual within the context of the family and community. It includes comprehensive (systemic) history, physical, and psychological assessment of signs and symptoms, pathophysiologic changes, and psychosocial variations of the individual patient. Assessment performances are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Emphasis is placed on developing a thorough understanding of the individual patient and differentiating normal and abnormal findings to determine current health status. Course requires four hours per week clinical laboratory. Prereq: Admission to DNP program, or consent of instructor. NUR 921 or consent of instructor. (Same as NUR 923.)

NUR 632 COMPREHENSIVE PATIENT MANAGEMENT. (2) This clinical course places an emphasis on the role of the advanced practice nurse as a member of the health care team across a variety of settings. The clinical experience focuses on comprehensive patient assessment, diagnosis and management of health problems for individuals and their families. Prereq: NUR 631, NUR 706 or NUR 726 or NUR 722 (depending on the student’s specialty track).

NUR 633 COMPREHENSIVE PATIENT MANAGEMENT II. (2-4) This clinical experience focuses on synthesis of theoretical, scientific, and clinical knowledge in the provision of comprehensive, comprehensive assessment and management of existing and potential health problems based on appropriate standards of care. Emphasis will be placed on the collaborative and leadership roles of the advanced practice nurse in health care delivery. Prereq: NUR 707, 726 or 723.

NUR 635 FOCUSED ADVANCED HEALTH ASSESSMENT. (1) This advanced health assessment course offers focused health assessment techniques that are commonly used in specialty areas of advanced nursing practice. Assessments are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Prereq: NUR 633 or coreq: NUR 635.

NUR 640 BEST PRACTICES IN NURSING INSTRUCTION. (3) This course is designed to assist graduate nursing students to develop the abilities to teach in educational institutions or healthcare agencies. Using a variety of learning theories and teaching methods students will learn how to develop a course syllabus and design appropriate learning activities, develop and deliver a lecture using a variety of active learning techniques, use simulation, teach on-line, work with students in the clinical setting, and assess student performance. The legal aspects of teaching will be addressed along with advantages and disadvantages of distributed learning, use of multimedia, and strategies design to actively engage students in the learning process. Prereq: Six credit hours of elective courses in education, Admission to Certificate in teaching nursing or consent of instructor.

NUR 641 BEST PRACTICES IN CLINICAL TEACHING. (3) This course will give students the opportunity to plan, initiate, and evaluate learning activities within the profession of nursing. These activities may include lecture, seminar, simulation, on-line teaching, evaluating clinical placements, and evaluating and teaching online. Students who plan to teach nursing in an academic setting will have a mentor who is a faculty member in a nursing program. Students who plan to teach nursing in other health care settings will have a mentor appropriate to their field. Prereq: Six credit hours of elective courses in education, NUR 640, Admission to Certificate in teaching nursing.

NUR 652 PHARMACOLOGIC APPLICATIONS IN PRIMARY CARE. (3) This course is designed to prepare nurse practitioners, nurse midwives, and other health professionals for prescribing drugs within their scope of practice. Basic pharmacologic principles and the pharmacologic actions of the major drug classes will be discussed in relation to physiologic systems with emphasis on the application of these agents to primary care, nurse midwifery practice, and other health professions. Prereq: Graduate level pathophysiology course, admission to DNP program, graduate programs in nursing or consent of instructor.

NUR 653 PATHOPHYSIOLOGY. (3) This course is designed to present an orientation to disease as disordered physiology. It is intended to enable the nurse practitioner to understand how and why the symptoms and signs of various conditions appear. In approaching disease as disordered physiology, this course analyzes the mechanism(s) of production of the symptoms and signs of different disease syndromes. In doing so, it recognizes the practitioner’s need to understand the mechanism(s) underlying the disease and its clinical manifestations so that rational therapies can be devised. Thus, appropriate screening and diagnostic laboratory evaluative methods will also be included. Prereq: Admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 921.)

NUR 655 RISKY BEHAVIORS AND HEALTH. (3) This course examines the epidemiological, psychological, and theoretical perspectives of risk-taking behavior and its health consequences. Fundamental risk concepts about individual and group risk taking behaviors, and models and practices that reduce risky behaviors are discussed. Selected topics include stress, tobacco, drug, alcohol, and medication abuse, unplanned pregnancy, sexually transmitted diseases, eating disorders, occupational and sports activities, and violence. Prereq: Graduating standing.
Course Descriptions

NUR 662 CLINICAL NURSING PRACTICE IN EXPANDED ROLES I. (1-4)
Clinical practicum focusing on assessment of health status of individuals, families, and/or aggregates; identification of needs and planning for care with emphasis on prevention and health maintenance. Laboratory, three to 12 hours per week. May be repeated to a maximum of four credits. Prereq: Kentucky licensure and relevant post-baccalaureate experience; NUR 654; prereq or coreq: NUR 740 or NUR 741.

NUR 672 CLINICAL NURSING PRACTICE IN EXPANDED ROLES II. (3-4)
Second clinical practicum which focuses on continued assessment of health needs of individuals, families, and/or aggregates which emphasizes planning, implementation, monitoring, and evaluation of nursing services. Laboratory, nine to 12 hours per week. Prereq or coreq: NUR 655 or NUR 656; coreq: NUR 642 or NUR 643.

NUR 682 CLINICAL NURSING PRACTICE IN EXPANDED ROLES III. (3-4)
Individually arranged in-depth clinical practicum focusing on the development of leadership and clinical management skills and the application, refining, and synthesis of knowledge and skills developed in didactic and clinical courses. May be repeated to a maximum of eight credits. Laboratory, nine to 24 hours per week. Prereq or coreq: NUR 672; coreq: NUR 743, 744, or 745.

NUR 704 THE ADULT-GERONTOLOGY CLINICAL NURSE SPECIALIST IN CONTEMPORARY HEALTH CARE SYSTEMS. (3)
This course deals with the roles of the Adult-Gerontology Clinical Nurse Specialist (CNS) in the advanced practice nursing care for patients with acute and chronic illnesses and their families. The patient population of the Adult-Gerontology CNS practice includes young adults (including late adolescents and emancipated minors), adults and older adults (including young-old, old, and old-old adults) in all contexts of care. Conditions that influence patients’ and family’s health and wellness, diagnoses, responses to interventions for potential health and wellness problems, and lifestyle changes are examined. Students will analyze the role of the Adult-Gerontology CNS in empowering clients and families during health transitions. Prereq: Graduate level pathophysiology; NUR 601 or NUR 924. Pre- or corequisite: NUR 922, NUR 925, NUR 923 and admission to DNP program, graduate nursing programs, or consent of instructor. (Same as NUR 945.)

NUR 705 ACUTE AND CHRONIC ILLNESS AND NURSING THERAPEUTICS. (3)
This course deals with advanced practice nursing care for adults with acute and chronic illnesses and their families. Emphasis on understanding the conditions influencing patient/family quality of health and the consequences of disease and its treatment continues. Symptom interpretation and management are explored. Nursing therapeutics are examined for their effectiveness in managing symptoms and enhancing quality of health. The clinical experience provides opportunities to analyze selected roles in APN by working with other healthcare professionals. Under the guidance of a faculty advisor and preceptor, the student will assist patients and their families in promoting health across a spectrum of health care transitions. (Course requires 2 hours per week didactic and 16 hours per week clinical.) Prereq: NUR 704, enrollment in graduate program in Nursing or consent of instructor. Pre- or coreq: NUR 604.

NUR 706 ADVANCED PRACTICE NURSING CARE OF ACUTELY ILL ADULTS. (2)
This course focuses on the role of the acute care nurse practitioner in assessing, diagnosing, and managing acute episodes in the critically ill adult. Emphasis is placed on the use of research and theories from biological, behavioral, and advanced practice nursing to facilitate the comprehensive care of critically ill patients and their families. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 725. Prereq or coreq: NUR 631 and 652 for students enrolled in graduate program in Nursing; or consent of instructor.

NUR 707 ADVANCED PRACTICE NURSING CARE OF CRITICALLY ILL ADULTS. (6)
The didactic portion of this course focuses on the assessment, differential diagnosis and management of critically ill adults. Emphasis is placed upon biological, behavioral and advanced nursing concepts and research in order to facilitate the management and evaluation of therapies for critically ill adults and their families. The clinical portion of this course focuses on the care of critically ill adults in high acuity environments. The emphasis is placed upon students becoming a collaborative member of the health care team and incorporating both medical and advanced nursing concepts in the care of critically ill adults and their families. Prereq: NUR 632, NUR 706.

NUR 708 MEASURING AND DOCUMENTING NURSING PRACTICE. (4)
This course provides the knowledge and skills essential for advanced practice nurses to evaluate patient care. A systematic approach to collecting information related to nursing practice provides nurses with opportunities to substantiate their contributions to advanced practice. Measuring, documenting, and reporting patient, family, and organizational outcomes will be addressed. Mechanisms for evaluating nursing practices with regard to available resources are also examined. Clinical experience provides opportunities for continued work with adults with acute and chronic illnesses. In addition, students will focus on the use of practice evaluation methods to make evidence-based inferences about the effectiveness of interventions. Prereq: NUR 705 or NUR 707 (depending on the student’s specialty area). Coreq: NUR 605.

NUR 712 ADVANCED PARENT-CHILD SEMINAR. (3)
The student will focus on evaluation of relevant beliefs, concepts, and theories related to maximizing the health of the family from pre-conception through adolescence. Using evidence-based literature, the student will explore physiologic, pathophysiologic, cognitive, behavioral, and psychosocial concepts, theories, and issues for their relevance in providing innovative approaches to family healthcare. Attention will be directed toward economic, ethical, cultural, legal, political and geographic factors that influence health behavior and care delivery. Family and child developmental theories will be used as an integrating framework. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students admitted to graduate nursing program; NUR 924 and NUR 925 for students admitted to the DNP program; or consent of instructor. (Same as NUR 955.)

NUR 713 ADVANCED NURSING CARE FOR FAMILIES, PRE-CONCEPTION THROUGH ADOLESCENCE. (4-6)
The students in this course will test concepts and theories relevant to families. Collaboration with the family and other health care disciplines related to clinical decision making is expected. Students will apply knowledge with a variety of populations. Prereq: NUR 712, enrollment in graduate program in Nursing or consent of instructor. Pre- or coreq: NUR 604.

NUR 722 ROLE AND PRACTICE ISSUES FOR THE ADVANCED PRACTICE PSYCHIATRIC NURSE. (3)
The focus of this course is on concepts, theories and research underling advanced practice psychiatric nursing (APPN). The scope and standards of psychiatric-mental health nursing practice frame study of APPN functions—psychotherapy, psychopharmacology intervention, community interventions, case management activities and consultation-liaison activities. Empirical data supporting derivation of models for mental health and mental illness diagnosis and treatment is explored as a basis for clinical, decision making in advanced psychiatric nursing practice. Psychological, biological, social and cultural influences on coping responses of individuals and families across the lifespan for groups and communities of people/populations at risk are explored. Intervention models including prevention are introduced. Prereq: Pathophysiology and Health Assessment, admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 965.)

NUR 723 ADVANCED PRACTICE PSYCHIATRIC NURSING I. (6)
This course provides the opportunity for study of conceptual frameworks, theories, and research findings in clinical practice. The course focuses on the psychotherapy, psychobiological and supervision functions of the Advanced Practice Psychiatric Nurse. Expansion of practice, the scope of primary prevention, biological and pharmacological theories, and psychotherapy model for interventions with clients, families, and the community are emphasized. Clinical experiences and sites will reflect multicultural concerns and emerging trends in the delivery of psychiatric care. During clinical experiences, comprehensive psychiatric assessments, diagnosis of psychiatric illnesses, and co-occurring physical and substance abuse problems, and interventions will be practiced. Supervision as a function of the Advanced Practice Psychiatric Nurse is incorporated in clinical work. Prereq: NUR 723, enrollment in the graduate program in nursing or consent of instructor. Co-requisite: NUR 631.

NUR 724 ADVANCED PRACTICE PSYCHIATRIC NURSING II. (4)
This course builds on knowledge and skills acquired in NUR 723 (Practicum I) and provides the student with the opportunity to integrate and apply knowledge acquired in other coursework. Theory of group therapy structure and process, practice models, and collaboration with mental health consumer/advocacy groups are introduced and emphasized to fit with emerging health care delivery systems. Mental health policy and practice implications are reviewed as well as these processes in application to mental health service delivery. Diagnosis of common physical illnesses that mimic psychiatric illness and common psychiatric symptoms that occur in physical illness are studied. Ethical dilemmas in practice are studied. Prereq: NUR 723, NUR 652, enrollment in the graduate program or consent of the instructor. Co-requisite: NUR 605.

NUR 725 ADVANCED PRACTICE NURSING SEMINAR FOR NURSE PRACTITIONERS. (3)
This course provides an overview of advanced practice nursing. Select physical, pathophysiological, social, mental health, and behavioral concepts will be discussed as a basis for clinical decision-making. Trends in health and nursing at national and state levels will be analyzed, as well as issues of professionalism. Emphasis will be on the role of the nurse practitioner as a collaborative member of the health care team, and on the nurse practitioner’s contributions to health, wellness, and health promotion. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; NUR 601 and 602 for students enrolled in graduate program in Nursing; or consent of instructor.

NUR 726 PRIMARY CARE ADVANCED PRACTICE NURSING SEMINAR. (1-3)
This course focuses on the advanced practice nurse’s management of common, acute health problems of individuals across the lifespan and determining the effect of the illness on families. Emphasis is on the interpretation of test results and the use of diagnostic reasoning in the formulation of possible diagnoses. Students will demonstrate proficiency in assessing, diagnosing, managing, and evaluating common, acute health problems. Emphasis is on analysis of the role of the nurse practitioner as a collaborative member of the health care team. Prereq: NUR 722 or NUR 722. Pre- or co-requisites: NUR 652, 631, 603.
NUR 727 PRIMARY CARE ADVANCED PRACTICE NURSING SEMINAR. (2-5) Seminar (2 credits). This course focuses on the advanced practice nurse’s management of common and stable chronic health problems of individuals across the lifespan. Emphasis will be placed on differentiating signs and symptoms to formulate possible diagnoses and determining the effect of the illness on the family. In addition, the nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Practicum (3 credits): Students will demonstrate nursing, diagnosing, managing, and evaluating selected chronic health problems based on appropriate standards of care. Prereq: NUR 632 and NUR 726 or NUR 722. Co-requisite: NUR 723 (psychiatric nurse practitioner students only).

NUR 732 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING ASSESSMENT SPECIALTY SEMINAR. (3) The community health nurse in advanced practice completes a three course sequence. Each course builds upon one of the three core functions of public health and nursing as identified by the Public Health Service of the U.S. This seminar addresses the first core function of assessment in advanced nursing practice in public health including the collecting, analyzing and dissemination of information about the health conditions, risks and resources in communities, or a population in targeted health care environments, such as home health or managed care. Advanced community level assessment concepts, models, theories and research findings are used. Assessing vulnerable and minority populations, using informatics in the assessment process, and distinguishing between decisions based on individual and aggregate data are emphasized. Prereq: MHA students admitted to Graduate Certificate in Nursing Studies; prereq or coreq: NUR 629 and 653 or students enrolled in graduate program in Nursing; or consent of instructor.

NUR 733 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING: PRACTICUM: POLICY. (3 or 6) This course addresses the second public health core function: the use of assessment data in the analysis and development of policy and program plans to meet the health, illness and health resource needs of communities. Students will evaluate the use of policy as an aggregate-level intervention strategy and determine the extent to which a nursing intervention classification can be used to categorize policy strategies. Policies will be evaluated in relation to current national and state health objectives for special populations. Students will evaluate the potential impact of policies affecting communities and populations in targeted health care environments such as home health or managed care. They will use evidence from the literature to develop and implement policy recommendations designed to improve health outcomes. Working with vulnerable and multicultural communities and using informatics in policy and planning are emphasized. Prereq: NUR 732; enrollment in the graduate program in Nursing; enrollment in graduate certificate in Public Health Nursing; or consent of instructor.

NUR 734 ADVANCED PRACTICE IN PUBLIC HEALTH NURSING: PRACTICUM: ASSURANCE. (3-4) This course focuses on the third core public health function of monitoring health services to communities, collaborating with other health disciplines in the development and delivery of needed services, and using quality assurance activities to improve health, illness and health resources to communities. Students will learn the use of surveillance, evaluation, and performance improvement techniques in assuring cost-effective health services for communities and targeted health care environments such as home health or managed care. They will evaluate the use of nursing taxonomies for classification of aggregate level outcomes. Culturally competent care in vulnerable and multicultural communities and the use of informatics in assurance are emphasized. Prereq: NUR 733; enrollment in the graduate program in Nursing; enrollment in graduate certificate in Public Health Nursing; or consent of instructor.

NUR 735 FAMILY AND COMMUNITY HEALTH PROMOTION. (3) Focus is on concepts, theories, and techniques for assessing families and communities and assisting individuals, families, and groups to maximize their health status. The evaluation of community resources to meet health care needs is emphasized. Research related to the influence of lifestyle, health habits, and coping with developmental and situational crises on health is reviewed. Selected field of observational experiences are included. Prereq: Admission to graduate program in nursing or consent of instructor.

NUR 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on the thesis may be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

NUR 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

NUR 750 CLINICAL MODELS FOR PROFESSIONAL AND ADVANCED NURSING CARE. (4) Students will learn concepts underpinning clinical and business modeling. They will conduct integrated literature reviews around a particular clinical problem and develop evidence-based clinical models. Students will use the evidence to develop and validate research findings and best practices. Each will prepare a business plan for adoption of a clinical model by a nursing unit, clinical department, or clinical program that is fiscally and organizationally feasible. Students will incorporate concepts of teamwork and interdisciplinary collaboration into the plans, including evaluation and supervision. Prereq: NUR 604; enrollment in graduate program in nursing or consent of instructor.

NUR 751 RURAL HEALTH NURSING MANAGEMENT PRACTICUM. (3) This course provides students with in-depth clinical experience in nursing management of an interdisciplinary team, a clinic, or a community program. The focus is on use of clinical research in designing, implementing and evaluating an innovative model of care for a defined rural population. Students integrate knowledge of nursing research, leadership, management of personnel and financial management of clinical services in the application of their practice models. Prereq: NUR 704, 712, 722, 725, or 732; and NUR 740; or consent of instructor.

NUR 752 CULTURALLY COMPETENT HEALTHCARE: CLIENT, CLINICIAN, AND ORGANIZATIONAL PERSPECTIVES. (3) This interprofessional course will increase students’ multicultural awareness, knowledge, and skills in the assessment and provision of healthcare. Models will be evaluated that aim to enhance the assessment and provision of culturally competent care, from the clinician to the organizational levels. Students will learn how to integrate evidence-based decision-making competencies to maximize attention to the needs of a diverse healthcare workforce. Prereq: Completion of applicable theory and research course (e.g., NUR 601 and 602); enrollment in graduate program or consent of instructor.

NUR 760 OCCUPATIONAL/ENVIRONMENTAL HEALTH NURSING (OEHN): PRINCIPLES AND PRACTICE. (3) This course is designed to provide a basic understanding of occupational/environmental health nursing (OEHN). The history and value of OEHN will be explored. Standards and scope of OEHN practice will be examined. The roles of OEHNs within the framework of interdisciplin ary professionals will be presented. Concepts and principles will be applied through field work and topic specific assignments. Legal and ethical issues are discussed. The students will also develop the knowledge and skills necessary to appraise research and apply to evidence-based nursing practice, including up-to-date electronic resources. Students learn to apply this knowledge through field experiences. Prereq: Admission to the PhD or DNP program or consent of instructor.

NUR 761 OCCUPATIONAL/ENVIRONMENTAL HEALTH NURSING & OEHN: RESEARCH AND POLICY. (3) This course will provide graduate students with knowledge and skills needed to improve health outcomes of populations in occupational environments. Emphasis will be placed on research and policy development using nursing and interdisciplinary lenses. Further, this course will prepare the student to be proficient in the knowledge, skills, and abilities to effectively work with complex organizational systems and occupational settings. Students will learn how to utilize occupational data sets for the development of workplace research and policies at the local, state, national and global levels. Prereq: Admission to the PhD or DNP program or consent of the instructor and successful completion of NUR 760.

NUR 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

NUR 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours.

NUR 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely.

NUR 770 PHILOSOPHICAL FOUNDATIONS OF NURSING SCIENCE. (3) The study of science as a way of reasoning and knowing, as it is influenced by the social, political, and gender contexts of scientists; the exploration of the philosophical foundations of nursing as a science and a historical evaluation of significant contributions to nursing science. Prereq: Admission to the graduate program in nursing or consent of instructor.

NUR 771 RESEARCH EXPERIENCE. (1-3) Students work closely with a faculty research mentor to develop specific research skills by actively participating in a research study. Emphasis is placed on obtaining skills or research experiences needed to begin a sustained program of research. Prereq: Admission to the Ph.D. program in nursing or consent of instructor.

NUR 776 SPECIAL TOPICS SEMINAR (Subtitle required). (2-4) A seminar on selected topics in nursing, with emphasis on knowledge development and application. Examples of topics are: examples of topics are: comprehensive health surveillance at home, prevention of drug use in young children, support systems for the mentally ill, rehabilitation of injured farmers. May be repeated to a maximum of eight credits. Prereq: Consent of instructor.

NUR 778 PROSEMINAR IN CONTEMPORARY HEALTH AND NURSING POLICY ISSUES. (3) A critical analysis of the development of policy related to health and nursing is emphasized. Attention is focused on the formation of a policy strategy to address a major policy issue affecting health care and the discipline of nursing.

NUR 779 DOCTORAL SEMINAR. (1-3) A series of two-hour colloquia held every other week focusing on issues relative to the development of nursing science, the dissertation, and the role of the nurse scientist. The topics are selected by the students who are at various points of doctoral study in nursing. Included are topics on scientific integrity, the ethical conduct of research, and federal guidelines for inclusion of research subjects. The seminar is required for three semesters, one-credit hour each semester. Prereq: Enrollment in the doctoral program in nursing.
NUR 781 INDEPENDENT STUDY IN NURSING. (1-3)
An elective course which gives the student an opportunity to explore a topic of special interest. May be repeated to a maximum of eight credits. Prereq: Admission to graduate program in nursing or consent of instructor.

NUR 790 KNOWLEDGE DEVELOPMENT IN NURSING. (3)
This course focuses on the nature of nursing science and on approaches to the development of knowledge for use in nursing practice. Concepts and theories from philosophy of science and methods of theory development are used to critically examine the process of knowledge development in nursing. Emphasis is placed on the role of logical analysis and critical thinking in the development of theory for nursing practice. Prereq: Consent of instructor or enrollment in the doctoral program in nursing.

NUR 791 QUALITATIVE METHODS IN NURSING RESEARCH. (3)
The focus of this course is an exploration of qualitative approaches to developing clinical nursing research. The relationship of data production and analysis strategies to underlying assumptions, theories, and research goals are considered. Applications of qualitative methods to research questions relevant to nursing science are explored. Prereq: NUR 790 or consent of instructor.

NUR 792 QUANTITATIVE METHODS IN NURSING RESEARCH. (3)
This course focuses on the application of quantitative research designs and methods for testing hypotheses in clinical nursing research. Students develop skills in critical evaluation of both intervention and nonintervention studies. Emphasis is placed on the identification and control of competing hypotheses in quantitative research. Prereq: STA 570 or consent of instructor.

NUR 793 MEASUREMENT OF NURSING PHENOMENA. (4)
This course focuses on measurement issues in conducting nursing research. Methods of instrument development and assessment of reliability and validity are discussed. The psychometric properties of instruments and measurement methods used in research are analyzed. Students conduct pilot psychometric research related to their dissertation topic. Prereq: NUR 790, 791, 792.

NUR 794 ANALYSIS, INTERPRETATION, AND PRESENTATION OF QUANTITATIVE DATA. (3)
This course provides opportunities for skill development in the application of a variety of analysis strategies to existing datasets. Students will identify hypotheses and/or research questions, test them using appropriate statistical methods, and interpret the results of their secondary analyses. Students also will gain experience in the presentation of findings via narrative, tabular, and oral formats. Prereq: STA 671 or equivalent, doctoral standing, and consent of instructor.

NUR 824 CLINICAL DECISION MAKING IN PROFESSIONAL NURSING. (6)
The focus of this course is methods for making clinical decisions. Emphasis will be on how to collect and utilize data in formulating judgments about patient states and in choosing nursing actions for patients with health problems with predictable outcomes. Lecture, four hours; laboratory, six hours per week. Prereq: Junior standing in the RN-BSN curriculum in the College of Nursing; Prereq or coreq: NUR 831 and NUR 833.

NUR 826 CLINICAL DECISION MAKING IN PROFESSIONAL NURSING II. (6)
This course emphasizes clinical decision making with clients, families or groups experiencing complex or multiple health problems with unpredictable outcomes. The emphasis is on interpreting and using complex patterns of data in making decisions about patient care. Lecture, four hours; laboratory, six hours per week. Prereq: NUR 824. Prereq or coreq: NUR 835, NUR 837.

NUR 831 BIOLOGICAL CONCEPTS: THREATS TO HUMAN HEALTH. (2)
This course addresses biological concepts basic to nursing practice. Concepts essential for understanding major health problems which occur across the life span and that are encountered in multiple health care settings are discussed. Prereq: Junior year standing in the College of Nursing; coreq: NUR 832, NUR 834 for non-RN students.

NUR 833 EPIDEMIOLOGIC CONCEPTS FOR HEALTHCARE. (2)
This course is an introduction to epidemiologic concepts and interdisciplinary applications to health care of aggregates; structure of the community as it relates to access and utilization of available resources; structure of the health care system; levels of prevention; levels of care and economic factors affecting health. Field assignments will allow students to explore data sources. Prereq: Junior standing in the College of Nursing; STA 200.

NUR 835 FAMILY HEALTH CONCEPTS. (2)
This course provides theoretical perspectives on family functioning throughout the lifespan. The focus will be on the developmental stages of families as influenced by social, cultural, economic, and political forces. Family assessment, promotion of health in families, and resources for referral will be emphasized. Prereq: Junior year standing in the College of Nursing; coreq: NUR 834 and NUR 836.

NUR 837 MENTAL HEALTH CONCEPTS. (2)
This course presents concepts which are foundational to psychiatric-mental health nursing and are fundamental to professional nursing practice. Prereq: Junior year standing in the College of Nursing.

NUR 839 NURSING RESEARCH. (3)
This course provides a theoretical and methodological basis for applying nursing research to clinical practice. Skills necessary for participating in the use of nursing research are addressed. Legal and ethical ramifications of research are discussed. Prereq: Junior year standing in the College of Nursing; coreq: STA 200.

NUR 841 ISSUES IN NURSING. (2)
This course involves a critical analysis of the emerging issues and problems affecting nursing and their impact on health care. The responsibilities of the individual practitioner and of the professional are emphasized. Prereq: Senior year standing in the College of Nursing or consent of the instructor.

NUR 843 NURSING ETHICS. (1)
A variety of vignettes/case studies will be used to enable students to use decision-making processes to explore viable options to ethical dilemmas confronted in nursing practice. Delineation of facts and principles involved in each case will be prepared by the student in advance of each class in order for them to select a particular stance which they will then be prepared to defend. Prereq: Senior standing in the College of Nursing.

NUR 846 LEADERSHIP/MANAGEMENT IN NURSING. (5)
This course is designed for the student to demonstrate management and leadership skills as they relate to human and material resource management and clinical decision-making. Lecture, three hours; laboratory, six hours per week. Prereq: Senior standing in the College of Nursing; coreq: NUR 844.

NUR 870 PATHOPHARMACOLOGY. (2)
This course is the second of a two-semester course sequence that addresses pathophysiological and pharmacologic concepts basic to nursing practice. Prereq: NUR 863 or NUR 869, and NUR 866 with a minimum grade of C in each. Coreq: NUR 871 or consent of instructor.

NUR 871 FAMILY CENTERED CARE OF ADULTS WITH COMMON HEALTH PROBLEMS. (7)
This course will provide classroom and clinical experiences to enable the student to provide continuity of nursing care for adult populations with a variety of common health problems across settings. Lecture, three hours; clinic, 12 hours per week. Prereq: Junior year standing in nursing, NUR 861 and NUR 866 or NUR 869, NUR 866 with a minimum grade of C in each course; current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child, and adult, current TB screening and required immunizations. Coreq: NUR 870.

NUR 872 RESEARCH FOR EVIDENCE-BASED NURSING PRACTICE. (3)
This course provides an introduction to the research methodology essential to providing evidence-based nursing care. Students will acquire the fundamental basics in quantitative and qualitative nursing research. Legal and ethical issues are discussed. The students will also develop the knowledge and skills necessary to appraise research and apply to evidence-based nursing practice, including up-to-date electronic resources. Students learn to apply this knowledge through evidence-based practice processes. Students will then communicate an evidence-based project to their peers. Prereq: STA 210 or equivalent, or consent of instructor. RN-BSN prereq: NUR 854, STA 210 or equivalent, or consent of instructor.

NUR 873 NURSING CARE OF CHILDBEARING FAMILIES. (5)
This course is designed to provide classroom and clinical experiences to enable the student to provide continuity of nursing care for families during uncomplicated labor and delivery, postpartum and neonatal periods. Lecture, two credits; clinical, two credits (six hours per week). Prereq: NUR 871, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 875.

NUR 875 NURSING CARE OF CHILDBEARING FAMILIES. (4)
This course is designed to provide classroom and clinical experiences to enable the student to provide continuity of nursing care for families during uncomplicated labor and delivery, postpartum and neonatal periods. Lecture, two credits; clinical, two credits (six hours per week). Prereq: NUR 871, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 875.

NUR 880 LEADERSHIP/MANAGEMENT IN NURSING CARE DELIVERY. (3)
This course is designed to advance the student’s ability to use leadership and management theory in nursing practice within current and emerging organizational systems. The professional nurse’s role in management of care will be examined. Responsibilities for resource management and management of legal and ethical dilemmas in various organizational systems also will be addressed. Prereq: HSM 241, NUR 870, NUR 872, NUR 873, NUR 875 with a minimum grade of C in each; and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 873.

NUR 881 PSYCHIATRIC-MENTAL HEALTH NURSING. (5)
This course is designed to develop students’ skill in the use of psychiatric/mental health concepts to provide nursing care to clients across the lifespan and in a variety of settings. Lecture; three hours; clinic, six hours per week. Prereq: HSM 241, NUR 870, NUR 872, NUR 873, NUR 875 with a minimum grade of C in each; and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Coreq: NUR 883.

NUR 882 SPECIAL TOPICS IN NURSING. (1-3)
Study and analysis of current and topical problems and issues in nursing. Directed by a faculty member with expertise in the topic under study. May be repeated to a maximum of 18 credits.
NUR 883 PUBLIC HEALTH NURSING. (5) This course is designed to develop students’ skills in applying health promotion and disease prevention frameworks and in using epidemiological and public health concepts to deliver nursing care with diverse populations in a variety of settings. Emphasis will be placed on the effect of changing health care delivery systems on nursing practice. Lecture, three hours; clinic, six hours per week. Prereq: NUR 870, NUR 872, NUR 873, NUR 875, HSM 241 with a minimum grade of C in each, and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child, and adult, current TB screening and required immunizations. Coreq: NUR 881. RN-BSN prereq: NUR 854, NUR 872 or consent of instructor and current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations.

NUR 884 CAREER MANAGEMENT IN NURSING. (2) The course provides students with the skills for ongoing professional development and success in nursing. Prereq: NUR 880, NUR 881, NUR 883 or consent of instructor. Coreq: NUR 885, NUR 886.

NUR 885 HIGH ACUITY NURSING. (5) The course emphasizes critical thinking and data analysis skills in the nursing management of patients with complex health problems with and unpredictable outcomes. Students will collaborate with other health care professionals to plan, implement, and evaluate family-centered nursing care across the lifespan in high-acuity settings. Lecture, four hours; clinic, three hours per week. Prereq: All University and College of Nursing course requirements except NUR 884, NUR 885, and NUR 886, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Completion of NUR 886 seminars and NUR 885 before beginning the clinical component of NUR 886. Coreq: NUR 884 and NUR 885 for the first half of the semester. RN-BSN prereq: All other courses in the RN-BSN curriculum, current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations.

NUR 890 ENERGY HEALING LAB. (1) This course is designed to introduce students to the use of self as a healing force and to a variety of biofield energy healing techniques from the modalities of Therapeutic Touch, Reiki, Pranic Healing, Healing Touch, Bowen Therapy, Polarity Therapy, and from the work of Rosalyn Bruyere. The format of this course will be a controlled, laboratory setting for the demonstration and practice of these techniques; students will practice the techniques on each other and on volunteers from the community. Research involving these techniques will be read and discussed and faculty will share clinical experiences in the use of these techniques. Prereq: Admission to the College of Nursing or consent of instructor.

NUR 894 NURSING PRACTICE INTERNSHIP. (1) This seminar is designed to enhance the nursing knowledge gained throughout the nursing curriculum. Students will study major nursing concepts in-depth, roles of the professional nurse and apply them to their clinical practice experiences. Prereq: NUR 866 and NUR 863 or NUR 869.

NUR 895 ELECTIVE STUDY IN NURSING. (1-4) An independent study project investigating an area of interest under the guidance of faculty. May encompass library study or patient care utilizing aspects of scientific approach. May be repeated to a maximum of four credits.

NUR 896 STUDENT NURSE ACADEMIC PRACTICUM. (3) A 10 week clinical practicum (summer only) that allows students nurses to apply in clinical setting what they have learned to date. Emphasis will be placed on critical thinking, management of responsibilities, and professionalism in the clinical setting. Prereq: Currently enrolled in an accredited school of nursing within two semesters of graduation with either BSN or ADN Cumulative GPA of 2.75 and GPA of 2.75 in all NUR courses; current certification in Basic Life Support for Healthcare Providers (CPR and AED) for infant, child and adult, current TB screening and required immunizations. Students must meet the employment requirements of UK HealthCare Enterprise.

NUR 897 NURSING RESEARCH INTERNSHIP. (1-3) This nursing research internship is an independent study elective designed to provide students with experience in conducting nursing research. Students will work with a nursing research faculty member as a research mentor. Prereq: Admission to the professional nursing program.

NUR 899 NURSING SKILLS LAB. (1-3) This nursing skills laboratory internship is an independent study elective designed to provide students with experience in implementing the teaching learning process. Students will work with nursing skills laboratory instructors as mentors as they assist beginning nursing students in learning clinical nursing and med math skills. Prereq: NUR 863 or NUR 869.

NUR 900 PROCESS OF NURSING LEADERSHIP. (3) Students synthesize theoretical leadership concepts with personal and professional values and prior knowledge of leadership for the changing socio-cultural context in which clinical leadership is practiced. Issues of power, creativity, innovation, ethics and gender concerns are addressed. Self-reflection and self-mastery are two themes that underpin the entire course of study and support interpersonal skills that enhance leadership. Prereq: Admission to DNP program or consent of instructor.

NUR 902 NURSING LEADERSHIP IN HEALTH CARE SYSTEMS. (3) Students use theories of leadership, motivation, power and influence to evaluate interpersonal relationships within health care organizations and, in particular, the impact of these relationships on clinical care delivery. Shared visions, advocacy and change management are addressed. Students study the change process in health care systems by critically analyzing demographic and cultural trends that affect health care choices, examining current trends in the health care delivery system and assessing readiness for change in select health care systems. Prereq: Enrollment in Doctor of Nursing Practice program, NUR 900 or awarded MSN degree, or consent of instructor.

NUR 903 APPLIED BIOSTATISTICS FOR OUTCOMES EVALUATION. (4) This course provides opportunities for the application of a variety of quantitative analysis strategies in the evaluation of clinical outcomes. Statistical and other quantitative methods, including bivariate analysis, multiple regression, logistic regression, survival analysis and cost-benefit analysis are discussed. Students will apply these methods in the analysis of existing outcome data. Students also will gain experience in the presentation of findings via narrative, tabular, and oral formats. Prereq: Enrollment in DNP program, approved graduate level statistics course, STA 570 or STA 569 or equivalent within the past 3 years or consent of instructor.

NUR 904 EPILOGUE APPLIED TO THE DESIGN AND EVALUATION OF NURSING AND HEALTH SERVICES. (3) This course applies and integrates the principles and tools of epidemiology to the decision-making in a health care environment. It is intended for epidemiologists, managers, and clinical nurse executives and leaders who want to understand the value of epidemiology and population based health care to the process of rational decision-making. The course builds upon fundamental epidemiologic principles and theory, with specific applications to nursing and public health services. Prereq: Enrollment in DNP program, approved graduate level statistics course, or consent of instructor.

NUR 910 CLINICAL RESIDENCY. (3) This course provides the tools to evaluate and improve health care programs and clinical outcomes. Students develop feasible and reliable protocols for outcomes evaluation design. Students analyze the nature of, and explanations for variations in clinical practice patterns and clinical outcomes. Emphasis is on the use of program evaluation for improvements in clinical outcomes, efficiency, resource allocation, and cost reduction. Requires 12 hours per week residency time. Course must be repeated to a minimum of six credits. Graded pass/fail. Prereq: Completion of all DNP required course work with the exception of NUR 930.

NUR 914 ECONOMIC AND FINANCIAL ASPECTS OF CLINICAL AND POPULATION-BASED HEALTH CARE DELIVERY SYSTEMS. (4) This course focuses on the application of economic and financial theories to understanding the strategic impact of market dynamics, utilities, incentive structures, and driving and restraining forces in health care change. The emphasis will be on critically analyzing the actual and potential impact of these dynamics on the structure and functioning of the health care system. Prereq: Passing score on self-assessment of basic accounting and economics; applied biostatistics course, or consent of instructor.

NUR 915 FOUNDATIONS OF EVIDENCE BASED PRACTICE AND PROGRAM PERSPECTIVE. (4) This course provides students with the knowledge and tools to develop and implement evidence based clinical and administrative programs in nursing and health care delivery systems. Students will explore the philosophies, theories, research and evidence-based clinical practices in nursing and related fields that have been used to define and resolve the population health problem in their areas of interest. Emphasis is on the broad strategic view of health care systems and on effective clinical program planning/implementation within integrated care delivery systems. Students evaluate program planning frameworks, study the evidence that supports them, and examine strategic ways of implementation. Prereq: Enrollment in DNP program, NUR 924 and NUR 925 or awarded MSN degree with graduate statistics course in past 3 years or consent of instructor.

NUR 916 EVALUATION FOR IMPROVEMENT OF CLINICAL PRACTICE AND OUTCOMES. (3) This course provides students with the tools to evaluate health care programs and for improvement of clinical outcomes. Students will learn how to use evidence for effective decision making. Emphasis is on the use of program evaluation for improvements in clinical outcomes, efficiency, resource allocation and cost reduction within integrated care delivery systems. Prereq: NUR 915 or consent of instructor.

NUR 917 TECHNOLOGY FOR TRANSFORMING NURSING AND HEALTHCARE. (3) This course focuses on information systems technology as applied to nursing and healthcare. Knowledge and skills necessary for utilizing information systems and technology for the advancement of practice and health services research are emphasized. The use of computer systems and technology will be explored. Course requires four hours per week clinical. Prereq: Admission to DNP program or consent of instructor.
Course Descriptions

NUR 918 PROTECTION OF HUMAN SUBJECTS. (1)
This course provides an overview of the institutional review board process. Included are scientific integrity and ethics in clinical scholarship. Prereq: Enrollment in Doctor of Nursing Practice program; prereq: NUR 916, NUR 919 and written capstone proposal approved by student’s DNP advisory committee or consent of instructor.

*NUR 919 QUALITY AND SAFETY IN NURSING AND HEALTHCARE. (3)
This course provides the foundation to improve health outcomes for patient populations. National strategies, theories and methods to improve health outcomes will be explored. Emphasis will be placed on the systematic analysis of systems of care to promote safe, timely, effective, efficient, equitable, patient-centered care. Students will learn how to optimize the translation of evidence into clinical practice to enhance quality and safety. Students will gain knowledge to lead quality improvement and patient safety initiatives in health care systems. Prereq or coreq: NUR 916 or consent of instructor.

NUR 920 ADVANCED NURSING PRACTICE IN DYNAMIC HEALTH CARE SYSTEMS (Subtitle required). (3)
This synthesis course focuses on evolving nursing interventions in advanced clinical and administrative practice. Based on student’s specialty/role, these interventions encompass direct care of individuals, management of individuals or populations, healthcare administration and health policy issues. Emphasis is on ways for expert nurse clinicians and administrators to solve problems and improve care in a dynamic healthcare system. This course requires eight hours per week clinical practice time. Prereq: NUR 914 and 917; coreq: 914 or consent of instructor.

NUR 921 PATHOPHYSIOLOGY. (3)
This course is designed to present an orientation to disease as disordered physiology. It is intended to enable the nurse practitioner to understand how and why symptoms and signs of various conditions appear. In approaching disease as disordered physiology, this course analyzes the mechanisms(s) of production of the symptoms and signs of different disease syndromes. In doing so, it recognizes the practitioner’s need to understand the mechanism(s) underlying the disease and its clinical manifestations so that rational therapies can be devised. Thus, appropriate screening and diagnostic laboratory evaluative methods will also be included. Prereq: Admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 653.)

*NUR 922 ADVANCED PHARMACOLOGY FOR ADVANCED PRACTICE NURSES. (3)
This course is designed to prepare advanced practice nurses to prescribe drugs within their scope of practice. Basic pharmacologic principles and the pharmacologic actions of the major drug classes will be discussed in relation to physiologic systems with emphasis on the application of these agents in practice. Prereq: Graduate level pathophysiology course, admission to DNP program, graduate programs in nursing or consent of instructor. Co-requisite: NUR 927.

NUR 923 APPLICATIONS OF ADVANCED HEALTH ASSESSMENT. (3)
This advanced health assessment course offers comprehensive assessment of the individual within the context of the family and community. It includes comprehensive (systematic) history, physical, and psychological assessment of signs and symptoms, pathophysiologic changes, and psychosocial variations of the individual patient. Assessments are performed within the context of developmental, physiological, psychological, cultural, and environmental parameters. Emphasis is placed on developing a thorough understanding of the individual patient and differentiating normal and abnormal findings to determine current health status. Course requires four hours per week clinical laboratory. Prereq: Admission to DNP program, graduate program in nursing or consent of instructor. Co-requisite: NUR 927.

NUR 924 CONCEPTS, THEORIES, AND MODELS FOR ADVANCED PRACTICE NURSING. (3)
Students will examine the processes underlying the development of models, theories and conceptual framework. Selected models, theories and conceptual frameworks from nursing and other disciplines will be evaluated for their utility in advanced nursing practice. All are discussed within the context of the nature of nursing knowledge and the expanding scientific basis for advanced practice nursing. This course serves as a foundation for clinical courses in which models, theories, and conceptual frameworks are used to develop and evaluate new approaches to the clinical practice of advanced nursing practice. Prereq: Admission to DNP program or consent of instructor.

NUR 925 RESEARCH METHODS IN ADVANCED PRACTICE NURSING. (3)
This course provides the knowledge and skills essential for using research to support clinical and organizational decision-making. The strengths and limitations of various research designs and methods will be reviewed for their utility in answering clinical questions, evaluating care delivery and patient outcomes, and making clinical decisions. Prereq: Graduate statistics course and NUR 924, admission to DNP program, graduate programs in nursing, or consent of instructor. (Same as NUR 602.)

NUR 926 SYSTEMS APPLICATION OF ADVANCED HEALTH ASSESSMENT. (3)
This systems level advanced health assessment course offers comprehensive assessment and skill development opportunities for Advanced Practice Public Health Nurses and Nurse Executives. It includes intensive work on the principles and techniques of performing a comprehensive systems health assessment in the context of aggregate, population, community, and organizational parameters. Aggregate, population, community, and organizational models are analyzed for use with diverse systems. Emphasis is placed on working with diverse stakeholders for achievement of aggregate, population, community or organizational health related goals. Prereq: Admission to DNP program or consent of instructor.

NUR 927 SPECIAL TOPICS IN PHARMACOLOGY: (Subtitle required). (1)
This course is designed to introduce the Advanced Practice Registered Nurse (APRN) student to the application of pharmacologic principles to special populations and specialized therapeutic areas. Students will enroll in section related to their nursing specialty: family—primary care, adult-gero primary care, pediatric—primary care, adult-gero acute care, or family psychiatric mental-health. Prereq: Graduate pathophysiology course, enrollment in the graduate program in Nursing, or consent of instructor. Required coreq: NUR 922.

NUR 930 PROBLEMS IN ADVANCED PRACTICE NURSING (Subtitle required). (1-5)
This course provides opportunity for study of clinical problems encountered in particular clinical areas of advanced nursing practice. Application of the scope and standards of specialty practice, application of evidence-based practices, and development of techniques for nursing interventions are emphasized. Course requires four hours per week clinical time for each credit hour enrolled. Prereq: Admission to DNP Program, and completion of second DNP specialty course with clinical experience (5 credit) or consent of instructor.

NUR 940 ADVANCED PRACTICE NURSING IN ACUTE CARE: THE ACUTE CARE NURSE PRACTITIONER. (3)
This course provides an overview of advanced practice nursing and the acute care nurse practitioner role. This course will focus on the acute care nurse practitioner’s contribution to patient care, health, wellness, and health promotion. Select physical, pathophysiological, social, mental, health, and behavioral concepts will be discussed as a basis for clinical decision-making. Issues and trends in healthcare at both state and national levels will be analyzed, as well as issues of professionalism. Emphasis will be on the role of the acute care nurse practitioner as a collaborative member of the health care team. Prereq: Graduate level health assessment, pharmacology, and pathophysiology, admission to DNP program or consent of instructor.

*NUR 941 THE ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER: ADVANCED PRACTICE NURSING IN ACUTE CARE OF ADULTS AND GERIATRIC PATIENTS WITH ACUTE ILLNESS. (5)
The didactic and clinical components of this course focus on the role of the acute care nurse practitioner in assessing, diagnosing, and managing acute and chronic health problems in the adult and geriatric patient population. The patient population of the Adult-Gerontology ACNP includes young adults (including late adolescents and emancipated minors), adults and older adults in all contexts of acute illness and complex chronic illness. Emphasis is placed on the use of research and biological, behavioral, and advanced practice nursing theories to facilitate the comprehensive care of patients and their significant others. Course requires 12 hours per week clinical time. Prereq: NUR 940, 921, 923, 922, and 927.

*NUR 942 THE ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER: CARE OF CRITICALLY ILL ADULT AND GERIATRIC PATIENTS. (5)
The didactic portion of this course focuses on the assessment, differential diagnosis and management of critically ill adult and geriatric patient populations. Emphasis is placed upon biological, behavioral and advanced nursing concepts and research in order to facilitate the management and evaluation of therapies for critically ill adults, geriatrics and their families. The clinical portion of this course focuses on students becoming collaborative members of the health care team, incorporating both medical and advanced practice nursing concepts in providing care to critically ill adult and geriatric patients. Course requires 12 hours per week clinical. Prereq: NUR 941, 921, 922, 923, 927.

NUR 945 THE ADULT-GERONTOLOGY CLINICAL NURSE SPECIALIST IN CONTEMPORARY HEALTH CARE SYSTEMS. (3)
This course deals with the roles of the Adult-Gerontology Clinical Nurse Specialist (CNS) in the advanced practice nursing care for patients with acute and chronic illnesses and their families. The patient population of the Adult-Gerontology CNS practice includes young adults (including late adolescents and emancipated minors), adults and older adults (including young-old, old, and old-old adults) in all contexts of care. Conditions that influence patients’ and family’s illness perceptions, responses to illnesses, adherence to therapeutic regimes and lifestyle changes are examined. Students will analyze the role of the Adult-Gerontology CNS in empowering clients and families during health transitions. Prereq: Graduate level pathophysiology; NUR 601 or NUR 924. Pre- or corequisite: NUR 922, NUR 925, NUR 923 and admission to DNP program, graduate nursing programs, or consent of instructor. (Same as NUR 704.)
NUR 946 ADVANCED NURSING INTERVENTIONS FOR ADULT GERONTOLOGY CLINICAL NURSE SPECIALISTS. (5) This course provides the advanced practice nursing care for adult and geriatric patients with acute and chronic illnesses and their families. The patient population includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults) in all contexts of care. Emphasis is on developing clinical expertise in a specialty area to interpret and manage symptoms and advanced clinical problems. Planning, directing, and evaluating the provision of evidence-based, research and practice guidelines will be integrated into the role of the PNP in the management of acute and chronic illnesses. Focus will be given to the synthesis of knowledge and practice guidelines will be integrated into the role of the PNP in the management of acute and chronic illnesses. In addition, students will focus on the use of practice evaluation methods to document patient/family outcomes within a specific agency. Course requires 12 hours per week clinical. Prereq: NUR 945, admission to DNP program or consent of instructor.

NUR 947 DATA COLLECTION, ANALYSIS, OUTCOME MEASUREMENT AND DOCUMENTATION OF NURSING PRACTICE. (5) This course provides the knowledge and skills essential for advanced practice nurses to valorize patient care and to pursue an evidence-based approach to collecting information related to nursing practice. Measurement, documenting and reporting patient, family and organizational outcomes will be addressed. Mechanisms for evaluating nursing practices with regard to available resources are also examined. Clinical experience provides opportunities to continue to work with adults with acute and chronic illnesses. In addition, students will focus on the use of practice evaluation methods to document patient/family outcomes within a specific agency. Course requires 12 hours per week clinical. Prereq: NUR 946, admission to DNP program or consent of instructor.

NUR 955 ADVANCED PARENT-CHILD SEMINAR. (3) The student will focus on evaluation of relevant beliefs, concepts, and theories related to maximizing the health of the family from pre-conception through adolescence. Using evidence-based literature, the student will explore physiologic, pathophysiologic, cognitive, behavioral, and psychosocial influences to the concept of growth and development, and its incorporation into the framework of advanced practice nursing. Developmental, pathophysiologic, cognitive, behavioral, and psychosocial concepts will be applied in assessing children of various ages (birth to 21 years) using a variety of modalities integrating clinical experiences, foundational competencies for advanced nursing practice will be addressed. Course requires 12 hours per week clinical. Prereq: NUR 924 and NUR 925 for students admitted to the DNP program; or consent of instructor. (Same as NUR 712.)

NUR 956 PNP-PRIMARY CARE: COMMON ACUTE ILLNESS MANAGEMENT. (5) This course allows the practice-doctorate pediatric nursing student to collaborate with other health care disciplines and incorporate clinical decision-making into the provision of care and management of the child with common acute minor illnesses seen in primary care. Current evidence and practice guidelines will be integrated into the role of the PNP in the management of acute minor illnesses commonly seen in children (birth to 21 years) and applied to health restoration strategies in various clinical settings. Focus will be given to the synthesis of knowledge obtained from nursing, medicine, pharmacology and the social/behavioral sciences and its incorporation into the framework of advanced practice nursing. Developmental, pathophysiologic, cognitive, behavioral, and psychosocial concepts will be applied in assessing children of various ages (birth to 21 years) using a variety of modalities integrating current research and evidence-based findings into clinical practice. This course includes 12 hours of clinical practice per week. Prereq: NUR 955, NUR 930 for students admitted to the DNP program; or consent of the instructor.

NUR 957 PNP-PRIMARY CARE: COMMON CHRONIC ILLNESS AND SPECIAL NEEDS MANAGEMENT. (5) This course allows the practice-doctorate pediatric nursing student the opportunity to examine the impact of children and adolescents (birth through 21 years) with special health care needs and those with complex, chronic, critical illnesses seen in the acute care setting. Current evidence and practice guidelines will be integrated into the role of the PNP in the management of acute illnesses commonly seen in children (birth to 21 years) and applied to health restoration strategies in various clinical settings. Focus will be given to the synthesis of knowledge obtained from nursing, medicine, pharmacology and the social/behavioral sciences and its incorporation into the framework of advanced practice nursing. Developmental, pathophysiologic, cognitive, behavioral, and psychosocial concepts will be applied in assessing children of various ages (birth to 21 years) using a variety of modalities integrating current research and evidence-based findings into clinical practice. This course includes 12 hours of clinical practice per week. Prereq: NUR 955, NUR 930 for students admitted to the DNP program; or consent of the instructor.

#NUR 959 PNP-ACUTE CARE: CHRONIC ILLNESS AND SPECIAL NEEDS MANAGEMENT. (5) This course allows the pediatric nursing student the opportunity to examine the impact of children and adolescents (birth through 21 years) with special health care needs and those with complex, critical, chronic health deviations on the pediatric client, their families, and the community. By incorporating the role of the PNP into the process of utilizing clinical decision-making skills, interprofessional collaboration, management and intervention strategies, and incorporating evidence-based, research and management guidelines will be analyzed using the synthesis of knowledge gained from collaborative sciences and applied to the framework of advanced practice nursing. Collaboration with the child, family, and interprofessional teams will be integrated throughout the course. Course includes 12 hours of clinical practice per week. Prereq: NUR 955 for students admitted to the DNP program; or consent of the instructor.

NUR 960 PRIMARY CARE NURSE PRACTITIONER SEMINAR I WITH PRACTICUM. (5) This course provides an overview of the primary care nurse practitioner’s role in the health care system. The nurse practitioner’s contributions to health promotion and disease prevention will be explored. Selected physical, pathophysiologic, social, mental, health, behavioral, cultural, and ethical concepts will be discussed as a basis for clinical decision-making. Issues of professionalism and trends in health and nursing at national and state levels will be analyzed. Emphasis will be on the role of the primary care nurse practitioner as a collaborative member of the health care team. Prereq: Pathophysiology, Pharmacology, and Health Assessment, admission to the DNP program, or consent of instructor.

NUR 961 PRIMARY CARE NURSE PRACTITIONER SEMINAR II WITH PRACTICUM. (5) This course focuses on the primary care nurse practitioner’s assessment, diagnosis and management of acute health problems of individuals across the lifespan. Emphasis will be on differentiating a variety of signs and symptoms and interpreting data to formulate differential diagnoses. The use of evidence-based clinical practice guidelines to assist in the development, implementation, and evaluation of the plan of care will be explored. The impact of acute health problems on the family as a whole will be analyzed. The clinical experience will focus on comprehensive patient assessment, diagnosis and management of acute health problems for individuals and their families. In addition, the nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Course requires 12 hours per week clinical. Prereq: NUR 960, admission to DNP program or consent of instructor.

NUR 962 PRIMARY CARE NURSE PRACTITIONER SEMINAR III WITH PRACTICUM. (5) This course focuses on the primary care nurse practitioner’s assessment, diagnosis and management of chronic health problems of individuals across the lifespan. Emphasis will be on differentiating a variety of signs and symptoms and interpreting data to formulate differential diagnoses. The use of evidence-based clinical practice guidelines to assist in the development, implementation, and evaluation of the plan of care will be explored. The impact of chronic health problems on the family as a whole will be analyzed. The clinical experience will focus on comprehensive patient assessment, diagnosis and management of chronic health problems for individuals and their families. In addition, the nurse practitioner’s role as a collaborative member of the health care team will be evaluated. Course requires 12 hours per week clinical. Prereq: NUR 961, admission to DNP program, or consent of instructor.

NUR 963 ROLE AND PRACTICE ISSUES FOR THE ADVANCED PRACTICE PSYCHIATRIC NURSE. (5) The focus of this course is on concepts, theories and research underlying advanced practice psychiatric nursing (APPN). The scope and standards of psychiatric mental health nursing practice are described in the framework of APPN. The APPN roles - psychotherapy, psychopharmacology, interventions, community interventions, case management activities and consultation-liaison activities. Epidemiology, definitions, and classification models for mental health and mental illness are explored as a base for ethical, clinical decision making in advanced psychiatric nursing practice. Psychological, biological, social and cultural influences on coping responses of individuals and families across the lifespan for groups and communities of people/populations at risk are explored. Intervention models including prevention are introduced. Prereq: Pathophysiology and Health Assessment, admission to DNP program, graduate programs in nursing or consent of instructor. (Same as NUR 722.)

NUR 966 DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC DISORDERS IN ADULTS AND ELDERLY. (5) This course provides the student with the opportunity to integrate and apply knowledge acquired in NUR 906. It focuses on the study of conceptual frameworks, theories, and research findings related to common psychiatric disorders among adults and elderly patients. Biological and pharmacologic theories, developmental issues of adults and elderly patients, psychotherapeutic modalities, primary prevention, and evaluation of treatment will be emphasized. During clinical experiences, foundational competencies for advanced practice nursing will be addressed and professional judgments will be based on comprehensive and systematic psychiatric assessments, diagnose common psychiatric illnesses, implement pharmacologic and psychosocial interventions, and evaluate treatment outcomes for adults and elderly patients with psychiatric disorders. A variety of settings across the healthcare continuum will be utilized. Multidisciplinary and interprofessional collaboration as functions of the Advanced Practice Psychiatric Nurse is incorporated into clinical work. Course requires 12 hours per week clinical time. Prereq: NUR 965; Admission to the DNP or Graduate Nursing Program, or consent of instructor; Pathophysiology and Health Assessment.
NUR 976 DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC DISORDERS IN CHILDREN, ADOLESCENTS, AND YOUNG ADULTS. (5)
This course provides advanced practice students with the knowledge and skills to effectively and safely manage patients with psychiatric and/or substance use disorders. It is designed so the student is able to apply content from NUR 975 through exploring, participating in, and providing leadership related to selected aspects of crisis, disaster, prevention, preparedness, response, and recovery whether human or natural, when nursing, organizational, and system responses are required. Prereq: NUR 974 and 975, or permission of instructor; corequisite: NUR 977.

NUR 977 POPULATIONS AND ORGANIZATIONAL SYSTEMS LEADERSHIP III SEMINAR: SYSTEMS AND COMMUNITY DIMENSION OF CRISIS AND DISASTER PREPAREDNESS. (3)
This course is a companion to NUR 976. It provides directed clinical/practicum experiences designed so the student is able to apply content from NUR 976 through exploring, participating in, and providing leadership related to selected aspects of crisis, disaster, prevention, preparedness, response, and recovery whether human or natural, when nursing, organizational, and system responses are required. Prereq: NUR 974 and 975, or permission of instructor; corequisite: NUR 977.

OBG Obstetrics and Gynecology

OBG 615 FIRST-YEAR ELECTIVE, OBSTETRICS AND GYNECOLOGY. (1-3)
With the approval and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Obstetrics and Gynecology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

OBG 625 SECOND-YEAR ELECTIVE, OBSTETRICS AND GYNECOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Obstetrics and Gynecology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

OBG 650-699 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth-year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
OBG 650 GYNECOLOGIC ONCOLOGY
OBG 650 OBSTETRICS AND GYNECOLOGY INDEPENDENT STUDY
OBG 654 CLINICAL CLERKSHIP IN OBSTETRICS
OBG 655 CLINICAL CLERKSHIP IN GYNECOLOGY
OBG 660 RESEARCH GYNECOLOGY
OBG 663 HIGH RISK OBSTETRICS (MFM)
OBG 690 OFF-SITE OBSTETRICS AND GYNECOLOGY

OBI Oral Biology

OBI 650 ORAL BIOLOGY FOR POSTGRADUATE DENTAL STUDENTS. (2)
This course provides a review of selected biological science topics. Emphasis is placed on the use of current literature for an in-depth study of those aspects of the subject particularly relevant to dental practice. Lecture: 32 hours. Prereq: Admission to an advanced education program of the College of Dentistry or consent of instructor.

OBI 651 ORAL BIOLOGY FOR POSTGRADUATE DENTAL STUDENTS. (2)
This course is a continuation of OBI 650. It is a seminar that uses the scientific literature to review selected biological science topics with emphasis on those especially relevant to dental practice. Lecture: 32 hours. Prereq: OBI 650 or consent of instructor.
OBI 720 MICROBIAL STRUCTURE AND FUNCTION. (3) Molecular basis of structure and function in unicellular microbes. Molecular genetic and structural approaches to the analysis of bacterial architecture, growth, division, and differentiation. Prereq. (to reflect appropriate IBS course). (Same as M 720 and BIO 720.)

OBI 812 DENTAL BIOCHEMISTRY. (6) This is a comprehensive course in biochemistry designed to fulfill the specific needs of student dentists. Course content is generally as outlined in the American Association of Dental Schools suggested curriculum guidelines for biochemistry. Part I acquaints students with the chemical constituents of prokaryotic and eukaryotic cells; topics include the chemistry of lipids, carbohydrates, proteins, vitamins and coenzymes, and the nature of enzyme action. Part II integrates the chemical principles learned from Part I with concepts of cell dynamics, structure, function, subcellular organization, and metabolism. Topics include intermediary metabolism, bioenergetics, DNA replication, protein synthesis, and cellular regulatory and control mechanisms. Course content, where possible, is related to current concepts concerning the etiology of oral diseases, their treatment, and prevention to assist student dentists in attaining institutional goals and objectives for clinical competency. Prereq. Admission to the College of Dentistry. (Same as BCH 812.)

OBI 813 NEUROPHYSIOLOGY. (1) The brain uses electrical signals to process all information it receives and analyzes. Individual neurons encode complex information into simple electrical signals; the meaning behind these signals is derived from the specific interconnections of neurons. The purpose of neurophysiology is to describe how the neuron produces electrical and chemical signals and to illustrate how these signals are involved in the functional organization of neural circuits. This course also describes how the central nervous system analyzes and integrates the various inputs, elicits command decisions that determine the motor and/or endocrine responses. Lecture: three hours per week for five weeks. Prereq. Admission to the College of Dentistry, or consent of the Course Director. (Same as PGY 813.)

OBI 814 DENTAL HUMAN FUNCTION. (5) This course provides in-depth instruction on the physiological mechanisms of body function from the single cell to the organism level. The course is team taught primarily by basic scientists. Teaching methodologies include didactic and Socratic lectures with some dental correlations. Prereq. Admission to the College of Dentistry. (Same as PGY 818.)

OBI 815 DENTAL GROSS ANATOMY AND EMBRYOLOGY. (6) Study of human gross and developmental anatomy with particular emphasis on functional anatomy of the head and neck. Lecture/laboratory course, with dissection being an essential component of the laboratory portion. 140 hours. Prereq. Admission to the College of Dentistry. (Same as ANA 534.)

OBI 817 DENTAL NEUROANATOMY. (2) Study of human dental neuroanatomy with emphasis on functional neuroanatomy of central nervous system, especially related to cranial nerves 5, 7, 9, and 10, pain, and trigeminal. Lecture, one hour per week. Prereq. Admission to the College of Dentistry. (Same as ANA 538.)

OBI 826 DENTAL PHARMACOLOGY AND THERAPEUTICS. (4) This course will provide students with a fundamental understanding of the pharmacology and therapeutic uses of drugs commonly used by their patients and in their practice. Prereq. OBI 812 and OBI 814. (Same as PHA 822.)

OBI 827 IMMUNITY, INFECTION AND DISEASE FOR THE STUDENT DENTIST. (6) The course provides basic concepts of immunology and bacterial, viral, fungal and protozoal biology. It focuses on mechanisms of human immunity, immunologically mediated disease, and pathogenesis in infectious disease. The material covered includes relevant pathology associated with both immunological and infectious diseases, and a summary of infectious diseases from a clinical perspective. Lecture: six hours per week. Prereq. Enrolled in the DMD curriculum.

OBI 829 ORAL BIOLOGY. (2) This course will enable the dental student to apply basic oral biology principles to the contemporary diagnosis and treatment of oral disease. Oral biology is the study of the biologic sciences and their clinical correlates that pertain to the mouth and the contiguous tissues in health and disease. Major oral systems are studied at the complete, cellular, and molecular levels with emphasis on important clinical problems affecting both hard and soft tissues. Lecture: 34 hours. Prereq. ANA 530, OBI 812, OBI 814, CDS 820 or consent of instructor.

OBI 836 DENTAL PHARMACOLOGY. (3) This course will provide students of dentistry with a fundamental understanding of the pharmacology and the therapeutic uses of drugs commonly used in their practice or by their patients. This course will reinforce topics discussed in CDS 821 (Local Anesthesia); in addition, the course will integrate with ODM 830 (Mgmt of Med Compromised Patient) and provide focused preparation for CDS 831 (Concise Sedation). Prereq. OBI 812 (Dent Biochem), OBI 814 (Dent Physio), and CDS 821 (Local Anesthesia).

OBI 840 CLINICAL DENTAL PHARMACOLOGY. (1) This course will reinforce to fourth year dental students the principles of basic and applied pharmacology enabling them to evaluate and manage patients with systemic and oral diseases. The course will be given before the Dental National Board Examination. This should help the students review for the pharmacology portion of the examination. Advances in drug therapy that have occurred since the basic pharmacology courses will be discussed. The course will be presented in both lecture and case presentation format to help the students understand and recognize the importance of pharmacological agents in the management of their patients. Lecture: 16 hours. Prereq. OBI 812, OBI 814, OBI 822, OBI 826, CDS 821 CDS 831, and ODM 831. (Same as PHA 840.)

ODM Oral Diagnosis and Oral Medicine

ODM 810 BASIC PRINCIPLES IN ORAL AND MAXILLOFACIAL RADIOLOGY. (2) This course presents the basic principles of oral and maxillofacial radiology, including radiation biology, radiography, and imaging techniques. Lecture, 20 hours; seminar, 4.5 hours. Prereq. Admission to the College of Dentistry.

ODM 820 ORAL AND MAXILLOFACIAL RADIOLOGY AND DIAGNOSTIC IMAGING. (2) This course presents the principles of radiographic anatomy, extra-oral projections (including panoramic, film and lateral skull film), radiology of caries and periodontal disease, digital radiology, advanced imaging techniques (including CBCT), and the process of radiographic interpretation. Lecture, 24 hours; seminar, 4.5 hours; practicum, 24 hours (three days). Prereq. ODM 810.

ODM 821 CLINICAL ORAL DIAGNOSIS. (1) This course consists of two components: 1) examination, diagnosis, and treatment planning for patients assigned to dental students in general clinics; and 2) emergency clinic assignment in which the students will diagnose and treat patients with acute oral problems. Clinic, 30 hours. Prereq. CDS 815; Coreq. CDS 824.

ODM 830 MANAGEMENT OF THE MEDICALLY COMPROMISED DENTAL PATIENT. (3) This course will provide students with the knowledge required to manage medically compromised patients in the outpatient dental office. Basic clinicopathological information about commonly occurring medical disorders, the impact medications that these patients take have, the oral problems they have, and their effects on dental health care will be presented. Critical thinking is encouraged so that the students can use their diagnostic skills in the appropriate manner to identify and manage patients with systemic disorders. Lecture: 43 hours; laboratory, 4 hours. Prereq. Approval of dean and/or his designee for academic affairs and the course director.

ODM 831 CLINICAL ORAL DIAGNOSIS II. (1) This course is a continuation of ODM 821 and also consists of two components: 1) examination, diagnosis and treatment planning for patients assigned to dental students in general clinics; and 2) emergency clinic assignment in which the students will diagnose and treat patients with acute oral problems. Clinic, 40 hours. Prereq. ODM 821; coreq. CDS 832.

ODM 841 CLINICAL ORAL DIAGNOSIS III. (1) This course is a continuation of ODM 831 and also consists of two components: 1) examination, diagnosis and treatment planning for patients assigned to dental students in general clinics; and 2) emergency clinic assignments in which the students will diagnose and treat patients with acute oral problems. Clinic, 40 hours. Prereq. ODM 830 and ODM 831.

OFP Orofacial Pain

OFP 634 CURRENT CONCEPTS IN TEMPOROMANDIBULAR DISORDERS. (3) This course provides the student with information on the anatomy, physiology and function of the masticatory system. The etiology, diagnosis and treatment of temporomandibular disorders will be emphasized. Lecture, 41 hours; laboratory, 15 hours per semester. Prereq. Acceptance into the College of Dentistry M.S. Program and/or consent of the College of Dentistry’s Director of Graduate Studies and the course director.

OFP 636 CLINICAL MANAGEMENT OF TEMPOROMANDIBULAR DISORDERS. (3) This course provides the student with clinical experience in the diagnosis and management of temporomandibular disorders. The student will provide treatment for patients referred to the Orofacial Pain Center under the supervision of the course director. Clinic, 144 hours. Prereq. Acceptance into the College of Dentistry M.S. Program and/or consent of the College’s Director of Graduate Studies and the course director.
Course Descriptions

OFP 700 OROFACIAL PAIN TREATMENT PLANNING SEMINAR. (2)
This course will provide the student with experience in diagnosing and treatment planning various orofacial pain patients. Lecture: 32 hours per year or 16 hours per semester. Prereq: Acceptance into the College of Dentistry. M.S. Program and/or consent of the College’s Director of Graduate Studies and the course director.

OFP 734 CURRENT CONCEPTS IN OROFACIAL PAIN. (3)
This course provides the students with information on non-mastatory orofacial pain problems. The etiology and differential diagnosis of head and neck pain will be emphasized. The student will learn the dentist’s role in the management and/or referral of complex facial pain problems. Prereq: OFP 634 and OFP 636.

OFP 736 CLINICAL MANAGEMENT OF OROFACIAL PAIN. (3)
This course provides the student with clinical experience in the diagnosis and management of complex orofacial pain problems. The student will provide treatment for patients referred to the Orofacial Pain Center under the supervision of the course director. Clinic, 144 hours. Prereq: OFP 634 and OFP 636.

OFP 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on a thesis. May be requested to a maximum of six (6) semesters. Prereq: All course work toward the degree must be completed.

OFP 768 RESIDENT'S CREDIT FOR MASTER’S DEGREE. (1-6)
May be repeated for a total of 12 hours. Prereq: Admission to the Orofacial Pain graduate program and consent of the Director of Graduate Studies.

OFP 790 RESEARCH IN OROFACIAL PAIN. (1-6)
This course provides credit hours for the graduate students’ independent research efforts. May be repeated to a maximum of 12 hours. Prereq: Admission to the Orofacial Pain Graduate Program and consent of the Director of Graduate Studies in the College of Dentistry.

OHP Oral Health Practice

OHP 850 INDEPENDENT WORK IN ORAL HEALTH PRACTICE. (1-3)
An elective course offered by the department of Oral Health Practice. Students may work on individual projects in one or more of the disciplines encompassed by this department under the direction of a faculty member. The work should involve independent laboratory or clinical research and include supporting literature searches. The end result should be either a table clinic presentation or a paper suitable for publication. The minimum number of hours to be spent on the project and the means of evaluation will be decided before beginning the project. May be repeated to a maximum of 12 credits. Prereq: Specific course prerequisites and year indental school will depend on the nature of the proposed project; consent of instructor.

OHS Oral Health Science

OHS 850 INDEPENDENT WORK IN ORAL HEALTH SCIENCE. (1-3)
An elective course offered by the department of Oral Health Science. Students may work on individual projects in one or more of the disciplines encompassed by this department under the direction of a faculty member. The work should involve independent laboratory or clinical research and include supporting literature searches. The end result should be either a table clinic presentation or a paper suitable for publication. The minimum number of hours to be spent on the project and the means of evaluation will be decided before beginning the project. May be repeated to a maximum of 12 credits. Prereq: Specific course prerequisites and year indental school will depend on the nature of the proposed project; consent of instructor.

OPH Ophthalmology

OPH 815 FIRST-YEAR ELECTIVE, OPHTHALMOLOGY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Ophthalmology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

OPH 825 SECOND-YEAR ELECTIVE, OPHTHALMOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Ophthalmology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

OPH 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
OPH 855 CLINICAL CLERKSHIP IN OPHTHALMOLOGY
OPH 851 RESEARCH IN OPHTHALMOLOGY
OPH 852 ADVANCED CLINICAL CLERKSHIP IN OPHTHALMOLOGY
OPH 890 OPHTHALMOLOGY OFF-SITE

OPT Oral Pathology

OPT 650 GRADUATE ORAL PATHOLOGY I. (2)
This is a seminar course in advanced oral pathology in which students study the microscopic, radiographic, and clinical features and the management of diseases that affect oral and perioral tissues. A case study format is used to discuss both common and rare conditions that illustrate all major disease categories and to provide a framework for developing a systematic approach to disease diagnosis. Lecture: 36 hours. Prereq: Dental degree and enrollment in a College of Dentistry postgraduate program, or consent of instructor.

OPT 651 GRADUATE ORAL PATHOLOGY II. (2)
This course is a continuation of OPT 650. It is a seminar in advanced oral pathology in which students study the microscopic, radiographic, and clinical features and the management of diseases that affect oral and perioral tissues. A case study format is used to discuss both common and rare conditions that illustrate all major disease categories and to provide a framework for developing a systematic approach to disease diagnosis. Lecture: 36 hours. Prereq: OPT 650 or consent of instructor.

OPT 820 GENERAL PATHOLOGY FOR STUDENT DENTISTS. (3)
This basic course covers general pathology, which will prepare the student dentist to concentrate on the specialized area of oral pathology. Emphasis is placed on cell damage, inflammation and repair, neoplasia and hemostasis, as well as the in-depth study of selected systemic diseases that may affect dental patient management. Prereq: Enrollment in the College of Dentistry and second year class standing, ANA 530, ANA 534, or consent of course director.

OPT 830 ORAL PATHOLOGY I. (3)
This is a comprehensive lecture course on oral and paroral diseases. The course deals mainly with the clinical aspects of oral disease, with emphasis on clinical and/or radiographic appearance, etiology, management and prognosis. Lecture, 41 hours, and 4 one-hour examinations. Prereq: OPT 820.

OPT 832 ORAL PATHOLOGY II. (1)
This course teaches the dental student an effective approach to patients with oral lesions. It stresses the following: development of a reasonable differential diagnosis list, procedures to be used in obtaining a definitive diagnosis, management of the patient after a diagnosis has been made, and treatment if indicated. Lecture/Seminar, 26 hours and 1 two-hour final exam. Prereq: OPT 830.

OPT 840 ORAL PATHOLOGY III. (1)
This is an advanced course in oral pathology in which various diseases and abnormal conditions of the head, neck, and oral cavity are presented. The pertinent information on several selected cases will be available online and posted in a display case for a week. Subsequently, an associated seminar will concentrate on the development of a differential diagnosis, establishment of a definitive diagnosis, and discussion of treatment and prognosis. Seminar, 19 hours and 12-hour exam. Prereq: OPT 832.

OPT 850 ORAL PATHOLOGY ELECTIVE. (1-10)
Elective courses offered by the Department of Oral Pathology provide opportunities for further study of or experience in various aspects of oral pathology. Topics may include principles of clinical and histologic diagnosis, the management of patients with oral disease, and discussions of specific oral diseases. Hours variable, ranging from a minimum of 16 hours lecture/discussion to a maximum of 10 weeks clinical experience. May be repeated to a maximum of 10 credits. Prereq: The minimum year in dental school and any course prerequisites will be announced for each topic.

OR Operations Research

OR 524 PROBABILITY. (3)
Sample space, random variables, distribution functions, conditional probability and independence, expectation, combinatorial analysis, generating functions, convergence of random variables, characteristic functions, laws of large numbers, central limit theorem and its applications. Prereq: MA 213 and MA 322. (Same as STA 524.)

OR 525 INTRODUCTORY STATISTICAL INFERENCE. (3)
Simple random sampling, statistics and their sampling distributions, sampling distributions for normal populations; concepts of loss and risk functions; Bayes and minimax inference procedures; point and interval estimation; hypothesis testing; introduction to nonparametric tests; regression and correlation. Prereq: STA 320 or STA 524 or consent of instructor. (Same as STA 525.)

OR 624 APPLIED STOCHASTIC PROCESSES. (3)
Definition and classification of stochastic processes, renewal theory and applications, Markov chains, continuous time Markov chains, queuing theory, epidemic processes, Gaussian processes. Prereq: STA 524 or STA 623 or consent of instructor. (Same as STA 624.)
ORT Orthodontics

ORT610 CRANIO-FACIAL FORM. (2)
This is a two credit-hour seminar course that introduces students to the basic concepts and principles of cephalometrics in orthodontic diagnosis and treatment. The course reviews historical literature as well as contemporary articles. Prereq: Admission to graduate dental programs; D.D.S. or D.M.D. degree.

ORT620 ORAL-PHARYNGEAL FUNCTION, PART I. (2)
Basic and applied physiology for graduate students in dentistry. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

ORT621 ORAL-PHARYNGEAL FUNCTION, PART II. (2)
A continuation of ORT 620, emphasizing speech physiology and language development. Lecture, two and one-half hours. Prereq: Admission to a graduate program of the College of Dentistry; D.D.S. or D.M.D. degree.

ORT660 ORTHODONTIC DIAGNOSIS. (2)
This is a two credit-hour seminar course offered at the graduate level within the specialty program in orthodontics. The course provides in-depth information concerning methods and rationale for gathering a comprehensive database for orthodontic patients. Analysis and interpretation of the database is approached by using the orthogonal analysis technique. The process of developing a treatment plan from the database will be thoroughly explored. Prereq: Admission to a postdoctoral program of the College of Dentistry.

ORT661 ORTHODONTIC SEMINAR-CLINIC. (3)
Seminar, laboratory and clinical instruction in orthodontic theory and practice. Lecture, three hours; laboratory, 15 hours. May be repeated to a maximum of 12 credits. Prereq: ORT 660.

ORT662 ORTHODONTIC TECHNIQUE. (2)
This is a two credit-hour graduate level course designed to introduce or reacquaint the student with some of the most commonly used techniques in orthodontic practice. It is closely related to the diagnosis and treatment planning course and to the course on mechanics. Prereq: Admission to a postdoctoral program of the College of Dentistry.

ORT664 BIOMECHANICS. (2)
This is a two-credit-hour seminar course. The purpose of the course is to introduce the foundational concepts for understanding both the laws of mechanics and the typical tissue responses to force systems used in orthodontic appliances. Students will learn theory-guided approaches to planning safe, predictable and efficient orthodontic treatment. Students will be expected to read and critique material in assigned textbooks and journal articles for seminar discussions. This course will supplement subject matter covered in the typodont course, ORT 662. Prereq: Admission to a postdoctoral program in the College of Dentistry.

ORT710 MANAGEMENT OF COMPLEX OROFACIAL DEFORMITIES. (1)
Seminar discussions of techniques in orthodontic problem solving and planning treatment for patients with orofacial deformities refractory to either orthodontic therapy or oral surgery but which are resolvable by utilizing combinations of orthodontic and oral surgical therapies. Lecture, one hour per week; laboratory, one hour per week. Prereq: ORT 660 or permission of instructor.

ORT748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

ORT768 RESIDENCE CREDIT FORMMASTER’S DEGREE. (1-6)
Maximum of nine weeks residence credit. Prereq: Admission to the graduate orthodontic program of the College of Dentistry or consent of instructor.

ORT770 ORTHODONTIC SEMINAR. (1)
Seminar in orthodontic theory and practice for advanced graduate and postdoctoral students in orthodontics. May be repeated to a maximum of six credits. Lecture, three hours. Prereq: Admission to the Orthodontics Graduate Program and consent of course director.

ORT770 RESEARCH IN ORTHODONTICS. (1-5)
Research in orthodontics. May be repeated to a maximum of five credits. Prereq: Admission to the orthodontic graduate program of the College of Dentistry; special permission.

ORT822 ORTHODONTICS. (3)
This course concerns the development of knowledge and skills needed to conduct a thorough orthodontic diagnosis and to plan orthodontic therapy. Lectures are oriented to data base collection, analysis and interpretation. Laboratory exercises provide opportunity to develop skills in analysis of facial proportions, analysis of diagnostic dental casts, cephalometric tracings, formulating a prioritized problem list and development of long-term and short-term treatment goals. A clinical experience is provided to collect records in a child patient. Seminar discussions are provided to discuss and review the data base. Lecture, 15 hours; laboratory, 12 hours; seminar, 22 hours. Prereq: Second year standing in College of Dentistry, CDS 812.

ORT830 ORTHODONTICS II. (2)
This course is concerned with the teaching of pre-clinical orthodontic technique and theory. The course is designed to give the student a basic understanding of the skills needed to fabricate fixed and removable appliances that are typically indicated for limited tooth movement and retention in interceptive orthodontics and adjunctive orthodontic treatment in a general setting. The role of the general dentist in the management of their patients’ orthodontic needs will be delineated. Special emphasis will be placed on coordination of treatment between the specialist and general practitioner and maintenance of occlusion over the life span of the patient. Lecture, 16 hours; laboratory, 16 hours. Prereq: CDS 812, ORT 822.

ORT841 CLINICAL ORTHODONTICS. (1)
This clinical course requires the students to analyze and diagnose the present and developing occlusal disharmonies in their assigned patients and to provide therapy for those patients who need tooth movements judged to be within the scope of the general practice of orthodontics. Clinic, 50 hours. Prereq: ORT 820 and consent of course director.

ORT850 ORTHODONTIC ELECTIVE. (1-10)
Elective courses offered by the Department of Orthodontics provide opportunities for further study of or experience in various aspects of orthodontics. Topics may include principles of orthodontic diagnosis and treatment, types of orthodontic appliances, and methods of correcting facial skeletal problems. Hours variable, ranging from a minimum of 16 hours lecture discussion to a maximum of 10 weeks clinical experience. May be repeated to a maximum of 10 credits. Prereq: Minimum year in dental school and any course prerequisites will be announced for each topic.

OSG Oral and Maxillofacial Surgery

OSG651 ANATOMICAL RELATIONSHIPS IN SURGERY. (1)
A seminar course for dental graduate students in areas other than surgery, emphasizing surgical anatomical and surgical principles applicable to all dental specialties. Prereq: Admission to graduate or post-doctoral programs of College of Dentistry; D.D.S. or D.M.D. degree.

OSG820 ORAL SURGERY. (1)
The general objectives of this course are to teach the student the significance of a history and physical examination, how to identify and use basic oral surgery instruments, how to perform basic oral surgical techniques including the removal of teeth and preparation of the mouth for dentures. Lecture, 20 hours. Prereq: CDS 811 or consent of course director.

OSG830 ORAL SURGERY II. (1)
This course is an overview of the specialty of oral surgery. The student is introduced to the surgical management of congenital and acquired abnormalities of the oral structures and associated parts. Management of odontogenic infection, cysts and tumors is presented, as well as the role of the dentist in the care of head and neck cancer patients. The diagnosis and management of facial fractures also are presented, particularly as they relate to the general practitioner. Lecture, 25 hours. Prereq: OSG 820 or consent of course director.

OSG831 ORAL SURGERY ROTATION I. (1)
This course teaches the management of the ambulatory oral surgical patient. It includes patient evaluation, control of pain and anxiety, performance of minor oral surgical procedures, treatment of acute and chronic oral infections and of complications associated with oral surgery, and the use of the problem-oriented record. Slide-text programs and reading assignments supplement the outpatient clinical experience. Clinic, 48 hours. Prereq: CDS 821 and OSG820 or consent of course director.

OSG841 ORAL SURGERY ROTATION II. (2)
In this course students learn the management of oral surgical patients in a hospital. It consists of a full-time rotation on the oral surgery hospital service, including standing in-hospital night call with the oral surgery house staff. Students assist in patient care and perform procedures such as exodontia and biopsy. Oral surgical management of comprehensive care patients in the outpatient clinic is also included. Clinic, two weeks. Prereq: OSG 830 and OSG 831.

OSG850 ORAL SURGERY ELECTIVE. (1-10)
Oral Surgery provide opportunities for further study of or experience in various aspects of oral surgery. Topics may include hospitalized and ambulatory patient management, emergency care, operating room experience, pain and anxiety control, and surgical technique. Hours variable, ranging from a minimum of 16 hours lecture/discussion to a maximum of 10 weeks clinical experience. May be repeated to a maximum of 10 credits. Prereq: Minimum year in dental school and any course prerequisites will be announced for each topic.

OTH Orthopedics

OTH856 ORTHOPEDICS FOR THE PRIMARY CARE PHYSICIAN. (4)
Students will spend time in sports medicine orthopedic clinic, two-and-a-half days a week, observing in the operating room a half day a week and half day a week working with physical therapists in the clinical setting or athletic trainers at the high school. Each student will have the opportunity to evaluate and treat patients under the supervision of the attending physician. Students will attend and participate in didactic interactive sessions at weekly sports medicine conferences and on campus at orthopedic conferences one afternoon per week. Prereq: Successful completion of all third year clerkships; priority will be given to those students not pursuing orthopedics training, or those already signed up for an orthopedics Al.
Course Descriptions

PA
Public Administration

PA 602 STRATEGIC PLANNING AND ORGANIZATIONAL CHANGE IN THE PUBLIC AND NONPROFIT SECTORS. (3)
This course focuses on the potential for change and future directions for public and nonprofit organizations. It reviews the basics of strategic planning for organizations providing public value and operating in a political context. It addresses such topics as environmental assessments, stakeholder analysis, identification of strategic issues, strategy formulation and implementation, performance measurement and evaluation, and key features of organizational change processes. Prereq: PA 621 and PA 651.

PA 621 QUANTITATIVE METHODS OF RESEARCH. (3)
A survey of behavioral science research methods for the public administrator. Emphasis is placed upon problem selection and identification, research design, and data analytic techniques. Lecture, two hours; laboratory, one hour per week. Prereq: MPA or MHA program status. (Same as HA 621.)

PA 622 PUBLIC PROGRAM EVALUATION. (3)
This course is designed to provide students with the conceptual and analytical tools to evaluate the effectiveness of public programs and policies. The focus will be on program monitoring and evaluation. Of particular concern will be program process and outcome measurement, quasi-experimental design; multiple regression analysis; and analysis of variance models. Prereq: PA 62.

PA 623 DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS. (3)
An introduction to organizational decision making under conditions of certainty, uncertainty, risk and multiple objectives. Concepts of analysis from the areas of economics, mathematics, probability, and statistics will be utilized in terms of administrative decision making in public administration. Course work includes use of various management information systems with a focus on how such systems can be used to support and inform decision making. Lecture, two hours; laboratory, one hour per week. Prereq: PA/HA 621, PUAD or HLAD program status or consent of instructor. (Same as HA 623.)

PA 624 GOVERNMENT INFORMATION SYSTEMS. (3)
Provides an overview of information strategies and management approaches to government functions and public policy programs and illustrates the interaction between information technology and information systems with management and policy decision in the public and non-profit sectors. Prereq: MPA program status.

PA 628 HUMAN RESOURCES MANAGEMENT IN HEALTHCARE. (3)
This course will present an overview of career development, human resource planning, staffing, and training in the health care sector. Prereq: MHA program status.

PA 631 PUBLIC FINANCIAL MANAGEMENT. (3)
An analysis of budget structure and process; revenue structure and administration; and public capital acquisition and debt management. This course emphasizes an applied focus and comparative analysis of alternative budget, revenue, and debt management structures and strategies. Prereq: PUAD or HLAD program status, or consent of instructor.

PA 632 PUBLIC FUNDS MANAGEMENT. (3)
A study of the management of public funds including the accumulation, management and investment of such funds and the accounting for those transactions. It will also include topics such as fund accounting, cash forecasting, cash management practices and public funds investment strategies. Prereq: MPA program status.

PA 633 MUNICIPAL SECURITIES. (3)
An analysis of the theoretical and operational issues associated with the municipal securities industry. Prereq: PA 632 or the equivalent and Ph.D. or M.P.A. program status or consent of instructor.

PA 636 HEALTH ECONOMICS. (3)
This course applies general theoretical principles of economics to the health care sector. The basic approach is to recognize the importance of scarcity and incentives, allowing for differences peculiar to health. The demand and supply of health and medical care are examined as they involve physicians, nurses and hospitals. The competitiveness of their markets, health insurance and the role of government are explored. Special topics include regulation and planning, benefit-cost analysis, and reform health plans. Prereq: The economics prerequisite can be met in three ways: (a) an undergraduate principles course in microeconomics and HA/ PA 652; (b) an undergraduate microeconomics principles course and a graduate course in managerial economics; or (c) an undergraduate microeconomics principles course and an intermediate microeconomics course. (Same as ECO 653/553.)

PA 637 HEALTH FINANCE. (3)
This course applies general principles of finance to the financial management of health care institutions. The major financial incentives which dictate how health care is delivered are studied, and proposals to change these incentives are explored. Prereq: MHA/MPA program status and HA 601, HA 621, PA 623, HA 635. (Same as HA 637.)

PA 642 PUBLIC ORGANIZATION THEORY AND BEHAVIOR. (3)
A course which examines the interaction of both external and internal resources and constraints upon the administrative decision processes in a number of public organizational settings. The objective is an understanding of the practice of administration in public organizations. Prereq: MPA/MHA program status. (Same as HA 642.)

PA 651 THE POLICY PROCESS. (3)
Broad-based course in public policy formulation and social planning. Emphasis is on the parameters of policy formulation as well as the social planning and impact variables. Both policy processes and relevant content areas will be stressed. Prereq: MPA program status.

PA 652 PUBLIC POLICY ECONOMICS. (3)
Principles and practices of economical resource management in the governmental sector: tax and expenditure types, intergovernmental fiscal cooperation, debt financing, budgeting and financial planning. Prereq: ECO 201 or equivalent and MPA or MPP program status or permission of department. (Same as ECO 652.)

PA 653 LOCAL ECONOMIC DEVELOPMENT. (3)
The course develops the capacity to employ the theories, practices and philosophies of economic development as applied to local areas. The primary geographic focus of the course is in the rural south-east of the United States, but examples will be drawn from rural areas in other developed countries. Prereq: Graduate status in agricultural economics, public administration, economics, or consent of instructor. (Same as AEC 653.)

PA 660 PUBLIC POLICY OF THE NONPROFIT SECTOR. (3)
This course offers an overview of practical, legal, ethical, and theoretical issues faced by the nonprofit sector and organizations that exist today and over time.

PA 661 FINANCIAL MANAGEMENT OF NONPROFIT ORGANIZATION. (3)
This course explores the techniques and principles of financial management including budgeting, finance, and investment decision making for non-profit organizations.

PA 662 NON-PROFIT MANAGEMENT. (3)
A graduate level management course focusing on the most significant tenets of management, including those that differentiate a non-profit organization from others. Theory and practice will be balanced. Students will select a non-profit organization to explore and evaluate specific management functions. Prereq: MPA program status or permission of the instructor.

PA 665 PUBLIC POLICY AND POLITICAL ECONOMY NATIONALLY AND INTERNATIONALLY. (3)
The goal of this course is to introduce students to policy analysis and political economy issues in an international setting. This will involve the study of particular aspects of economic policy in individual countries and regions, as well as the development of fundamental principles of economics and political economy which can be used to analyze the impacts of alternative policies and the processes by which policies are made. Prereq: PA 652 or equivalent or consent of the instructor.

PA 667 POLICY MAKING IN AN INTERNATIONAL CONTEXT: POLITICAL AND ORGANIZATIONAL DIMENSIONS. (3)
This class provides students with an understanding of the political systems of and the implementation of policy in nations around the world. We begin by comparing the political systems and the bureaucracies of the U.S. and Canada, which will serve as the backdrop for learning relevant concepts from modern political science and public administration. Having mastered these concepts, we will then use them to examine Mexico, Brazil, the People’s Republic of China, India, Japan, Nigeria, Russia, the United Kingdom, Germany, and finally, the European Union as an entity. In all cases, our country studies will focus on who decides on policies and how, and then on how policies are implemented. In selected class sections, the instructor will provide practical information on working in, and with professionals from the countries featured in this class. Prereq: PA 652 or their equivalents or permission of the instructor.

PA 671 OVERVIEW OF U.S. HEALTHCARE. (3)
An introduction to the health care delivery system in the United States, including its composition, functioning, the interrelationships of organizations and professional groups within the system in various settings, health care terminology, and major problems and issues in the delivery of health services. Prereq: MHA/MPA program status. (Same as HA 601.)

PA 673 HEALTH POLICY. (3)
An analysis of the development and implementation of health policy on a national, state, local and organizational level. The course will focus on issue and policy analysis, formal and informal processes of policy development and the issues, values, and political and community factors affecting policy development and program implementation. Prereq: HA 636, MHA program status or consent of instructor. (Same as HA 673.)

#PA 675 EDUCATION: ECONOMICS AND POLICY. (3)
This course will provide an overview of current policy issues in education. The course will cover basic education policy issues with a particular emphasis on the economics and policy analytic perspectives. Many of the issues will be examined both conceptually and empirically and will expose the student to policy evaluation tools and techniques. We will examine questions such as why schooling is provided publicly in the U.S., look at ways to evaluate the current quality of schooling, and think about reform alternatives. Prereq: PA 621 and PA 652 or their equivalents or permission of the instructor.

PA 680 BENEFIT-COST ANALYSIS. (3)
Principles, practices and applications of applied welfare analysis are the content of this course. The course is based on the theory of benefit-cost analysis and the relevance of implementation analysis in policy analysis is established. Prereq: PA 652. (Same as ECO 654.)
PA 681 CAPSTONE IN PUBLIC ADMINISTRATION. (3) This course provides an opportunity for students to integrate their studies with professional practice. Case studies and special projects require students to integrate knowledge from the core curriculum in the analysis of public management and policy problems. Prereq: MPA program status and completion of 33 credit hours.

PA 683 TAX POLICY. (3) Tax policy is analyzed from an economic perspective: efficiency and distributional effects of taxation, especially in state, local and international contexts. Prereq: PA 652 or equivalent; PUAD program status or permission of instructor.

PA 690 PUBLIC POLICY ANALYSIS OVERVIEW. (3) Economic and political foundations of policy analysis are considered in a survey fashion, followed by specific techniques used in the practice of policy analysis. Prereq: Graduate standing and MPA program status.

PA 691 ETHICS AND PUBLIC POLICY. (1) This course provides an introduction to ethical theory, explores the ethical dimensions of practice in the public sector, and examines ethics in connection with policy development. Prereq: Graduate standing and MPA program status.

PA 692 ECONOMETRICS FOR POLICY ANALYSTS. (3) Maximum likelihood estimation, ordinary least squares (OLS) regression, instrumental variables (IV) regression, heteroscedasticity-consistent regression, fixed and random effects models, probit, logit and tobit models, and identification and two-state least squares estimation of simultaneous equations models. Prereq: Any undergraduate statistics course. MPA, MPF, or PUAD program status for priority registration, other students with permission of instructor. (Same as ECO 692.)

PA 711 INTERNSHIP IN PUBLIC ADMINISTRATION. (3) Practical field experience in an administrative setting under the direction of an academic and a workplace supervisor. Prereq: MPA program status or consent of instructor.

PA 722 POLICY AND PROGRAM EVALUATION. (3) This is a doctoral course concerning policy and program evaluation. Major emphasis will be given to specifying the relationship between evaluation and management functions, evaluation concepts and processes and research methods applicable to evaluation systems and processes. Prereq: MKT 762 or PS 671, or equivalent and Ph.D. program status or consent of instructor.

PA 727 ENVIRONMENTAL ECONOMICS, REGULATION AND POLICY. (3) This course takes a balanced practitioner approach to the problems of the environment and environmental regulation. Efficiency aspects will be developed carefully, so as to provide a background for an extensive coverage of various available alternative policies. Prereq: PA 652 and MPA or economics program status or consent of instructor. (Same as ECO 721.)

PA 731 FISCAL AND BUDGETARY POLICY. (3) This course examines public budgeting and finance in the public sector. Included is an analysis of economic, managerial, and political approaches to public budgeting and finance. These approaches are then used to analyze several current topics in public finance. Prereq: PA 631 or equivalent, and Ph.D. program status or consent of instructor.

PA 742 THEORY OF PUBLIC ORGANIZATIONS. (3) This course provides doctoral students an in-depth knowledge of the various aspects of public organization theory. It will attempt to integrate the work on public organizations which is currently spread over the fields of organization theory and behavior, executive and bureaucratic politics and public choice economics. Prereq: PA 642 or equivalent, and Ph.D. program status or consent of instructor.

PA 750 INTRODUCTION TO ECONOMICS FOR PUBLIC POLICY. (3) Introduction to microeconomic theory and mathematical methods for policy analysis. Prereq: PUAD Master’s or Ph.D. program status or permission of the instructor.

PA 751 PUBLIC POLICY FORMULATION AND IMPLEMENTATION. (3) The major goals of this course are to examine how public issues become policy proposals, how various proposals are filtered into (or out of) the political process, shaped by political institutions and rules, and the process by which policy is implemented. Prereq: PA 651, or equivalent and Ph.D. program status or consent of instructor.

PA 752 THE ECONOMICS OF POLICY ANALYSIS. (3) This course examines economic approaches to policy analysis. Included is an analysis of the major concepts of economic analysis and their application to a number of policy problems. Prereq: PA 652 and PA 750 or equivalent and Ph.D. program status or consent of instructor.

PA 754 ADVANCED TOPICS IN PUBLIC FINANCE. (3) Principles of taxation and expenditure; applications to federal, state, and local policy; fiscal federalism; international public finance. Prereq: PA 752, ECO 701 or permission of the instructor. (Same as ECO 752.)

PA 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PA 775 SPECIAL TOPICS IN HEALTH ADMINISTRATION. (1-3) An analysis of selected issues with special significance for health administration. Prereq: MPA/MHA program status. (Same as HA 775.)

PA 785 INDEPENDENT STUDY IN HEALTH ADMINISTRATION. (1-3) Supervised individual research on a topic related to health administration selected by the student. May be repeated to a maximum of six credits. Prereq: Consent of instructor. (Same as HA 785.)

PA 795 SPECIAL TOPICS IN PUBLIC ADMINISTRATION. (1-3) Analysis of specialized topics in public administration of particular interest to practitioners. May be repeated to a maximum of six credits. Prereq: MPA program status or consent of instructor.

PA 796 INDEPENDENT STUDY IN PUBLIC ADMINISTRATION. (1-3) Tutorial course of directed readings, discussion, and analysis of special topics on public administration. May be repeated to a maximum of six credits. Prereq: MPA program status and consent of instructor.

PAS Physician Assistant Studies

PAS 500 INTEGRATIVE CARE FOR HEALTH SCIENCES. (1-3) Integrative care involves using the best possible treatments from both complementary/alternative and allopathic medicine, based on the patient’s individual needs and condition. The selection of health care providers should be based on good science and this course will introduce students to complementary and alternative health care providers and the practices and beliefs of these practices as well as the scientific evidence in support of these practices. The course integrates successes from both worlds and describes the safest, least invasive, most cost-effective approach while incorporating a holistic understanding of the individual. May be repeated to a maximum of 3 credits (1 credit didactic and up to two credits experiential/research). (Same as AT 500, HS 500, CLS 500, CNU 500, CD 500.)

PAS 610 RESEARCH METHODS AND EPIEMIOLOGY IN PAST STUDIES. (3) An introductory course designed to introduce students to research applicable to the health care sciences and the field of epidemiology. The course will include a description of the scientific method, research design, measurement techniques, and statistical analysis. Emphasis will be placed on both clinical research and population-based studies. Students will learn how to critically review literature and how to design a research protocol. Prereq: Completion of STA 570, admission to the Physician Assistant Program, or consent of instructor.

PAS 640 SURVEY OF GERIATRIC MEDICINE. (3) Overview of physician assistant practice with geriatric patients. Emphasis is placed on the practice of geriatric medicine including the anatomy and physiology of normal aging; pathology of aging; health care aspects of geriatric management; the diagnosis, treatment and prevention of geriatric problems; and research aspects of geriatric practice. Prereq: Admission to the Physician Assistant graduate program or consent of instructor.

PAS 645 MASTER’S PROJECT. (1) A 4-week course designed to introduce students to methods of identifying and analyzing a health care delivery issue that can be studied through a scientific literature search. The analysis of the topic and writing of a research paper will occur during the student’s clinical clerkships. Prereq: STA 570, PAS 610, completion of the first year of the Physician Assistant graduate program.

PAS 646 MASTER’S PROJECT 2. (2-6) This variable credit hour course is designed to allow PA students to complete a Master’s Project while under the guidance of a faculty advisor. Students will identify a health care issue topic, conduct appropriate library research on the topic, develop a research paper on the topic, and make an oral presentation of their project at the conclusion of the Master of Science in Physician Assistant Studies Program. Students will be responsible for developing appropriate audiovisuals, handouts, etc. for the oral presentation. Prereq: Admission to the Physician Assistant Program.

PAS 650 CLINICAL METHODS. (4) The PAS 650 course is designed to deliver content specific to the principles of obtaining medical histories as well as performing physical examinations. Further, students will be introduced to health care communication in both a lecture as well as laboratory format.

PAS 651 INTRODUCTION TO THE PA PROFESSION. (2) This course provides an overview of selected health care delivery issues affecting primary care physician assistants. The first half of the semester is devoted to examination of the history and evolution of the PA profession, current PA practice demographics and regulations, principles of quality assurance, risk management, and medical literature evaluation. The second half of the semester is devoted to the study of the ethical dimensions of PA practice. Topics include moral principles and ethical theories, as well as a series of seminar discussions on contemporary ethical issues confronting primary care providers in the 20th and 21st centuries. Prereq: Enrollment in the Physician Assistant Program.

PAS 653 INTRODUCTION TO HEALTH AND DISEASE. (3) An overview of the etiology, distribution, and prevention of basic disease processes. Prereq: Enrollment in Physician Assistant Program.
Course Descriptions

PAS 654 CLINICAL LECTURE SERIES I. (4)
A study of diseases and disorders seen in primary care physician assistant practice. Emphasis is placed on identifying the etiology, clinical presentation, laboratory and x-ray abnormalities, management, and prevention of diseases/disorders of the cardiovascular, pulmonary, renal, gastrointestinal, hematological, endocrine, and neurological systems. Research aspects of selected diseases is also presented. Prereq: Enrollment in the Physician Assistant Studies Program.

PAS 655 PSYCHOSOCIAL FACTORS IN PRIMARY HEALTH CARE. (3)
This course provides a broad overview of the role of psychosocial factors (behavioral, cultural, and environmental) in the nature, cause, course, distribution, prevention, and treatment of illness. It develops the student’s communication skills for clinical practice and presents psychosocial theories and research, and is organized into four areas: general behavioral concepts, communications skills, developmental issues, and psychopathology. Prereq: Enrollment in the Physician Assistant Program.

PAS 656 PATIENT EVALUATION AND MANAGEMENT. (3)
A combination of formal presentations, laboratory practice sessions, and supervised patient care experiences involving patient evaluation and management skills. Lecture, two hours; laboratory, three hours per week. Prereq: Enrollment in Physician Assistant Program or consent of instructor.

PAS 657 CLINICAL LABORATORY PROCEDURES. (3)
This is a survey laboratory course covering common laboratory procedures performed in the primary care clinical setting. Emphasis will be placed on performing and interpreting basic clinical tests. Lecture, two hours; laboratory, two hours per week. Prereq: Enrollment in the Physician Assistant Studies Program.

PAS 658 CLINICAL LECTURE SERIES II. (3)
A seminar in diseases and disorders seen by primary care physician assistants. Emphasis is placed on student research and presentation of selected diseases/disorders associated with orthopedics, dermatology, emergency medicine, pediatrics, and obstetrics and gynecology. Prereq: Enrollment in the Physician Assistant Program.

PAS 660 FAMILY MEDICINE CLERKSHIP. (3)
This is an eight-week clinical course designed to provide physician assistant students with experience in evaluation and treating common problems encountered in Family medicine. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical examination, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on clinical problems, performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the curriculum.

PAS 661 PEDIATRIC CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluation and treating common problems encountered in pediatrics. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a pediatric history and physical examination, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on pediatric problems, performing selected procedures, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 662 OBSTETRICS AND GYNECOLOGY CLERKSHIP. (3)
This is a four-week course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in obstetrics and gynecology. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a prenatal history and physical examination, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on clinical problems, performing selected procedures, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 663 SURGERY CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluating and treating surgical problems. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a surgical history and physical examination, assisting in surgery, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on surgical problems, and performing selected surgical procedures. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 664 GERIATRIC CLERKSHIP. (3)
A 4-week physician assistant clinical clerkship in geriatric medicine. Objectives involve the development of knowledge and skills in the evaluation, management, and prevention of common geriatric disorders and diseases. Principles of business management, evidence-based medicine, research, and use of ancillary resources and services are also covered. Prereq: Admission to the Physician Assistant graduate program, or consent of instructor.

PAS 665 CLINICAL PRACTICUM IN PHYSICIAN ASSISTANT STUDIES. (1-6)
This field assignment offers supervised clinical experience appropriate to the PA student’s chosen area of practice. May be repeated to a maximum of 12 credits; 40 hours per week. Prereq: Enrollment in Physician Assistant Program.

PAS 669 INTERNAL MEDICINE CLERKSHIP. (6)
This is an eight-week clinical course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in Internal Medicine. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical examination, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, conducting research on clinical problems, performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 670 EMERGENCY MEDICINE CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in emergency medicine. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical examination, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the curriculum.

PAS 671 PSYCHIATRIC CLERKSHIP. (3)
This is a four-week clinical course designed to provide physician assistant students with experience in evaluating and treating common problems encountered in psychiatry. Experience is provided at the level of a primary care physician assistant, and emphasis is placed on performing a history and physical examination, selecting and interpreting laboratory exams, establishing a logical differential diagnosis, and conducting research on clinical programs, performing selected studies, and establishing a tentative treatment plan. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 672 PHARMACOLOGY I. (3)
This course is designed to prepare students for the pharmacological requirements of practice as a primary care physician assistant. Emphasis is placed on a description of drug categories, prescription writing, drug abbreviations and equivalents, principles of drug research, and the laws on ethics of drug use in primary care medicine. Prereq: Enrollment in the Physician Assistant Program.

PAS 673 PHARMACOLOGY II. (3)
This course is designed to prepare students for the pharmacological requirements of practice as a primary care physician assistant. Emphasis is placed on utilizing specific drugs and drug combinations for specific diseases, and performing literature reviews on current pharmacological problems. A research paper and presentation is required addressing a specific pharmacological problem that occurs in primary care physician assistant practice. Prereq: Enrollment in the Physician Assistant Program.

PAS 678 HEALTH PROMOTION AND DISEASE PREVENTION. (2)
This course is designed to focus on health promotion and disease prevention in primary care medical practice. The course reflects concerns expressed in Healthy People 2010 which call for an increased emphasis on preventive medicine and reflects the need for additional disease education for physician assistant students. The course will address topics such as immunizations, genetic counseling, complementary and alternative medicine, and health and wellness. Prereq: Enrollment in the Physician Assistant Program.

PAS 680 SEMINAR IN PHYSICIAN ASSISTANT STUDIES. (2)
A study of selected topics and contemporary issues regarding physician assistant practice. Emphasis will be placed on review of selected clinical medicine topics, research in primary care, principles of managed care, job searches and interviewing skill. Prereq: Enrollment in the Physician Assistant Program and successful completion of the didactic portion of the PA curriculum.

PAS 690 PA CLERKSHIP. (3-6)
This variable credit, 1 to 2 month course is intended to allow MPAS students with a prior baccalaureate degree in PA studies to engage in clinical work relevant to their chosen areas of concentration. Course objectives will be developed to include acquiring knowledge in clinical knowledge and library research. It is expected that students will use this course to develop and implement their Master’s Project. Students will be responsible for developing appropriate audiovisuals, handouts, and other presentation materials. Prereq: Completion of PAS 645, admission to the Physician Assistant Program, or consent of instructor.

PAS 867 PRECEPTORSHIP I. (4)
Provides the PA student with the opportunity to integrate his previous year of didactic education and seven months of clinical course work into a functioning system. This course is a continuation of Preceptorship I. An assigned textbook and specified reading assignments will be required. In addition, students will be required to successfully pass practical as well as written examinations on course content. Prereq: Successful completion of the junior year and enrollment in the Physician Assistant Program.

PAS 868 PRECEPTORSHIP II. (4)
This course provides the student with the opportunity to integrate his previous year of didactic education and seven months of clinical course work into a functioning system. This course is a continuation of Preceptorship I. An assigned textbook and specified reading assignments will be required. In addition, students will be required to successfully pass practical as well as written examinations on course content. Prereq: Successful completion of the junior year and enrollment in the Physician Assistant Program.
University of Kentucky

Course Descriptions

**PAT Pathology**

**PAT 598 CLINICAL MICROBIOLOGY.** (3)
An introduction to the microbiology of clinical microbiology through a survey of the microbial diseases of man using an organ system approach. Prereq: BIO 208 and 209, BIO 476G recommended, CHE 230 or 236, or consent of instructor. (Same as MI 598.)

**PAT 815FIRST-YEAR ELECTIVE, PATHOLOGY.** (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Pathology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

**PAT 823 MECHANISMS OF DISEASE AND TREATMENT/PATHOLOGY.** (9)
This is a course in basic mechanisms of disease causation and specific diseases of the organ systems. It introduces fundamental disease processes and the pathophysiology of major diseases affecting each of the organ systems. It stresses how disease alters normal structure and function and is closely integrated with PAT 824. Various teaching methodologies utilized include lectures, small group discussions, workshops, case studies, and computer-assisted instruction. Lecture, 20 hours per week. Prereq: Admission to second year of medical curriculum.

**PAT 825SECOND-YEAR ELECTIVE, PATHOLOGY.** (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Pathology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

**PAT 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his or her knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

**Approved electives:**
- PAT 850 AUTOPSY PATHOLOGY
- PAT 851 SURGICAL PATHOLOGY
- PAT 852 LABORATORY MEDICINE
- PAT 853 NEUROPATHOLOGY
- PAT 855 RESEARCH IN PATHOLOGY
- PAT 856 FORENSIC PATHOLOGY

**PCE Peace Studies**

**#PCE 201 INTRODUCTION TO PEACE STUDIES.** (3)
The course reviews a wide range of theories exploring the nature and causes of conflict, the possibilities for conflict resolution, and the foundations of peace. It provides students with a set of tools for the analysis of contemporary conflicts and shows how evidence and theory can be effectively used to understand peace and conflict. The course draws on a wide range of disciplines, including sociology, anthropology, sociology, social psychology, economics, and political science. It also gives students a practical understanding of the strengths and weaknesses of current approaches to conflict resolution and peace-building.

**PDO Pediatric Dentistry**

**PDO 640 PEDIATRIC DENTISTRY SEMINAR II.** (2)
This seminar course is the third in a series of four such seminars that discuss essential aspects of clinical pediatric dentistry, with emphasis on the scientific evidence supporting contemporary practice. These four consecutive seminar courses over four semesters (two academic years) provide the pediatric dentistry graduate student with a conceptual basis for caring for the oral health of children. This third seminar in the series consists of sixteen two-hour sessions (32 hours) and addresses: deleterious oral habits, orthodontic correction of malocclusions, esthetic dentistry of the child, abnormal development of the dentition, and elements of managing a successful pediatric dental practice. Prereq: Enrollment in the College of Dentistry’s Master of Science degree program in the Pediatric Dentistry track, and completion of PDO 610 and 620.

**PDO 650 PEDIATRIC DENTISTRY SEMINAR III.** (2)
This seminar course is the fourth and last of a series of four such seminars that discuss essential aspects of clinical pediatric dentistry, with emphasis on the scientific evidence supporting contemporary practice. These four consecutive seminar courses over four semesters (two academic years) provide the pediatric dentistry graduate student with a conceptual basis for caring for the oral health of children. This fourth seminar in the series consists of sixteen two-hour sessions (32 hours) and addresses the required reading list of the American Board of Pediatric Dentistry. Subsequent to completing the graduate program the pediatric dentistry graduate student will take a written and clinical examination administered by the American Board of Pediatric Dentistry in order to be board-certified in the clinical specialty. The seminar is designed to ensure the graduate student is prepared to successfully complete the examination. Prereq: Enrollment in the College of Dentistry’s Master of Science degree program in the Pediatric Dentistry track, and completion of PDO 610, 620, and 630.

**PDO 790 RESEARCH IN PEDIATRIC DENTISTRY.** (1-6)
In this course in dentistry for children, emphasis will be placed on principles of oral surgical procedures, advanced restorative techniques, diagnosis and treatment of traumatic injuries, preventive dentistry and diagnosis and treatment of oral habits and cosmetic dentistry. Lecture, 26 hours; laboratory, 6 hours. Prereq: Second year standing in the College of Dentistry.

**PDO 831 CLINICAL PEDIATRIC DENTISTRY.** (2)
An introductory clinical course instructing student dentists in oral health care for children. Clinic, 75 hours. Pass/fail only. Prereq: PDO 822; coreq: PDO 834.

**PDO 834 PEDIATRIC DENTISTRY II.** (2)
This course is designed to introduce basic modern concepts in dentistry for children. Emphasis is placed on principles of child behavior management and basic restorative dentistry techniques. Lecture: 32 hours. Prereq: 2nd year standing in the College Dentistry.

**PDO 841 CLINICAL PEDIATRIC DENTISTRY II.** (4)
An advanced clinical course instructing student dentists in oral health care for children. Clinic, 75 hours. Pass/fail only. Prereq: PDO 822, 834, and 831.

**PED Pediatrics**

**PED 815FIRST-YEAR ELECTIVE, PEDIATRICS.** (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Pediatrics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

**PED 825SECOND-YEAR ELECTIVE, PEDIATRICS.** (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Pediatrics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

**PED 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS.** (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his or her knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

**Approved electives:**
- PED 850 PEDIATRIC NEONATAL INTENSIVE CARE
- PED 852 PEDIATRIC RENAL IMMUNOLOGY
- PED 853 INFECTIOUS DISEASE
- PED 854 GASTROENTEROLOGY
- PED 859 ACTING INTERNSHIP IN PEDIATRICS - UK
Course Descriptions

PER 626 ADVANCED CONCEPTS IN GENERAL DENTISTRY. (1)
This course presents, by seminar, lecture or continuing education courses, advanced concepts in general dentistry that are essential to the clinical practice of periodontics. It includes advanced instruction in orthodontics, periodontal prosthesis, prosthodontics and oral surgery. May be repeated to a maximum of four credits. Prereq: Admission to a postgraduate program of the College of Dentistry or consent of course director.

PER 661 MODERN CONCEPTS IN PERIODONTICS. (2)
A seminar course designed to present the present understanding of the etiology of periodontal disease and current techniques for treatment of periodontal problems. Prereq: Admission to graduate program of College of Dentistry; D.D.S. or D.M.D. degree.

PGY 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PGY 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated for a total of 12 hours. Prereq: Admission to the Periodontics postdoctoral program and consent of director of graduate studies.

PER 770 TREATMENT PLANNING SEMINAR. (2)
In this seminar course, graduate students present and discuss diagnosis, prognosis, ideal treatment plans and alternative treatment plans for patients with periodontal disease. Each student gives at least eight case presentations. May be repeated to a maximum of eight credits. Lecture, 40 hours. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

PER 772 PERIODONTAL BIOLOGY AND PATHOLOGY. (2)
Seminar discussions, review and evaluation of the literature covering periodontal anatomy, periodontal biology, the pathology of periodontal diseases and etiological factors in periodontal disease. The subject area will be covered in four semesters. May be repeated four times for a maximum of eight credits. Lecture, 40 hours. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

PER 774 PERIODONTOLOGY SURGICAL SEMINAR. (1)
In this seminar course participants present, discuss and critique surgical procedures that have been accomplished in the clinic. Reading assignments from the literature augment the clinical discussions and students are encouraged to use the literature to justify their procedures. Cases are presented on a rotating basis. May be repeated to a maximum of four credits. Prereq: Admission to Periodontics postdoctoral program or consent of course director.

PER 776 PERIODONTAL THERAPY SEMINAR. (1)
This is an advanced series of seminars on the clinical aspects of periodontal therapy. During the course, the students will learn about various modalities of periodontal therapy as presented in the periodontal literature, e.g., mucogingival therapy, implants and curative. May be repeated to a maximum of two credits. Prereq: Admission to the Periodontics postdoctoral program or consent of course director.

PER 790 RESEARCH IN PERIODONTICS. (1-3)
This course involves directed student participation in a research project. Projects and thesis are approved by the course director and may be laboratory, dental or related to dental education. Projects may include original or ongoing research within the Department of Periodontics or other departments of the Medical Center. May be repeated to a maximum of six credits. Prereq: Admission to the Periodontics postdoctoral program and consent of the department involved.

PER 810 PERIODONTICS I. (1)
This course is an introduction to periodontology. Emphasis is on recognition of healthy gingival characteristics and early disease progression. The student is also introduced to etiology, epidemiology and immunology related to periodontal assessments, and plaque control measures. Lecture, two hours; laboratory, nine hours per week. Prereq: CDS 815 or consent of instructor.

PER 820 PERIODONTICS II. (3)
This course presents the components of the first stages of periodontal therapy. Emphasis is on diagnosis, prognosis, treatment planning and non-surgical treatment of the periodontally involved patient. Lecture, 36 hours; laboratory, 24 hours. Prereq: PER 810 or consent of instructor.

PER 821 CLINICAL PERIODONTICS II. (2)
This is a course designed to provide the student with clinical experience so that he can obtain a minimal competence in the applications of periodontal procedures. Therapeutic procedures involving initial periodontal therapy will be performed by each student. Clinic, 50 hours. Prereq: PER 811, or consent of instructor.

PER 830 PERIODONTICS III. (2)
This is a surgically oriented course which presents information necessary for the diagnosis, treatment planning and treatment of surgical cases. The information gained is applied to planning treatment for actual surgical cases. Lecture, 27 hours; laboratory, 3 hours. Prereq: PER 820 or consent of course director.

PER 831 CLINICAL PERIODONTICS III. (2)
This is a clinical course which offers the student the opportunity to treat patients with more advanced periodontal disease. Therapeutic procedures will be performed by each student as his patients’ needs dictate. Clinic, 50hours. Prereq: PER 821; corequisite: PER 830; or consent of instructor.

PER 841 CLINICAL PERIODONTICS IV. (4)
This clinical course is a continuation of PER 831. The student receives further instruction and experience in diagnosing, planning treatment and treating patients with periodontitis and mucogingival problems. Prereq: PER 830 and PER 831, or consent of instructor.

PGY 206 ELEMENTARY PHYSIOLOGY. (3)
An introductory survey course in basic human physiology. Prereq: One semester of college biology.

PGY 207 CASE STUDIES IN PHYSIOLOGY. (1)
Group discussions of clinical cases and clinical applications relevant to human physiology. Prereq: PGY 206 or its equivalent. May be taken concurrently.

PGY 412 G PRINCIPLES OF HUMAN PHYSIOLOGY LECTURES. (4)
Intermediate level human physiology course emphasizing applied concepts. Prereq: One year biology or PGY 206.

PGY 417 GENOMICS AND EPIGENETICS. (2)
This advanced course is designed for students who desire to become research scientists in any area that makes use of molecular biology, molecular physiology, or molecular systems biology. It teaches the study of cell and tissue function by global analysis of gene expression and gene regulation. By incorporating both lecture and computer lab exercises, it emphasizes both the technical aspects of measuring gene expression and gene regulation and the conceptual basis for these global analyses. It also teaches experimental design and other statistical concepts necessary to perform genomic and epigenetic experiments. Prereq: At least one course in cell Biology or Molecular Biology.

PGY 502 PRINCIPLES OF SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (5)
Advanced survey of major mammalian physiological systems at the systems, cellular and molecular level; lectures, assigned reading, advanced texts or monographs, demonstrations and problem-oriented study questions. Prereq: One year each, physics, general chemistry; PGY 206 or its equivalent. (Same as BIO 502.)

PGY 504 INDEPENDENT WORK IN PHYSIOLOGY. (2-4)
A study of some advanced problems in physiology under the direct supervision of the instructor. Discussion period, one hour; laboratory, four hours. May be repeated to a maximum of eight credits. Prereq: Consent of instructor.

PGY 512 EVOLUTIONARY MEDICINE. (3)
This online course surveys the consequences of evolution on human function and disease. Lecture materials, online discussions, and reading and writing assignments will expand on examples of the repercussions of evolutionary processes on health. Prereq: BIO 150-153 or equivalent introductory biology sequence, BIO 315 or equivalent, and an introductory physiology course (PGY 206, BIO 350, or PGY 412G).

PGY 535 COMPARATIVE NEUROBIOLOGY AND BEHAVIOR. (3)
The course consists of an introduction to neurophysiology and study of the neural basis of sensory processing and motor patterns. A comparative analysis of the neurobiological basis of behavioral responses will be made, utilizing a broad range of vertebrates and invertebrates. Prereq: BIO 350 or consent of instructor. (Same as BIO 535.)

PGY 550 PATHOPHYSIOLOGY: INTEGRATIVE STUDY IN PHYSIOLOGY AND MEDICINE. (1)
This course aims at the development of an integrative conception of the human organism, and involves the study of medical case histories. The complex network of physiologic interactions which underlie disease states is investigated. The physiologic bases of health, illness, dying, and death are explored. May be repeated to a maximum of three credits. Prereq: PGY 412G, PGY 502 or consent of instructor.
Course Descriptions

PGY 590 CELLULAR AND MOLECULAR PHYSIOLOGY. (4)
This course will focus on the cellular and molecular physiology of inter-and intracellular communication. In particular, it will provide an overview of established and emerging intracellular signaling mechanisms which utilize i) cyclic nucleotides (cAMP; cGMP), ii) calcium (phosphatidylinositol metabolism: cyclic ADP-ribose), iii) transmembrane ion fluxes (voltage- and receptor-operated channels), iv) tyrosine kinases, and v) nuclear transcription factors. The material will be presented in a number of formats including didactic lecture and group discussions of selected readings. Prereq: PGY 412G, PGY 502 or consent of instructor. (Same as M 590.)

PGY 601 MAMMALIAN ENDOCRINOLOGY. (3)
An introduction to the basic anatomy, physiology and biochemistry of endocrine systems with emphasis on mechanisms of hormone synthesis, secretion and action. Lectures and reading assignments will focus on endocrine function in mammalian species, including laboratory animals, humans and livestock. Prereq: BCH 410G and BIO 350 or equivalents. (Same as ASC 601.)

PGY 602 READINGS IN SYSTEMS, CELLULAR AND MOLECULAR PHYSIOLOGY. (3)
A critical evaluation at the advanced level of the literature of the major mammalian physiological systems at the organ, cellular and molecular level. The course is intended to be taken with and to complement PGY 502. It includes a critical reading of the primary literature. Prereq: One year each of physics, general chemistry; PGY 206 or equivalent.

*PGY 603 DESIGN AND ANALYSIS. (3)
This is a course for students in the biomedical sciences interested in understanding the principles and pitfalls of experimental design and data analysis. The course focuses on why specific experimental design strategies are applied. Prereq: Consent of instructor. An introductory statistics course is recommended, e.g., STA 570 or STA 580.

PGY 604 ADVANCED CARDIOVASCULAR PHYSIOLOGY. (3)
The objective of this course is to examine in-depth the various functions of the cardiovascular system and their proposed mechanisms. Prereq: PGY 502 or consent of instructor.

PGY 605 NEUROBIOLOGY OF CNS INJURY AND REPAIR. (3)
The objective of the course will be to provide a general overview of the current state of knowledge concerning the pathophysiology and therapeutic approaches to central nervous system injury. The course will provide a strong working background concerning the issues, techniques and frontiers of neurotrauma therapeutic discovery research aimed at reducing acute post-traumatic neurodegeneration in the injured brain or spinal cord or enabling regeneration and repair. This course is a graduate level course intended for students who are in their second or subsequent years of graduate study and who are pursuing focused research training in neurotrauma research. No special prerequisites, other than graduate standing, are necessary. However, a background in neuroanatomy and neurophysiology is highly recommended. Prereq: Permission of instructor. (Same as ANA 605.)

PGY 608 ADVANCED RENAL PHYSIOLOGY. (3)
This course will examine in-depth the physiology and pathophysiology of the renal system, as well as provide an understanding of advanced renal physiological techniques. Prereq: PGY 412G, PGY 502 or consent of instructor.

PGY 609 ADVANCED RESPIRATORY PHYSIOLOGY. (3)
This course will examine in-depth the physiology and pathophysiology of the respiratory system. Prereq: PGY 412G, PGY 502 or consent of instructor.

PGY 611 ADVANCED MEDICAL PHYSIOLOGY. (6)
A comprehensive physiology course examining the systems, cellular and molecular basis of clinical physiology. Prereq: Second year graduate standing and completion of IBS 606.

PGY 612 BIOLOGY OF AGING. (3)
A multidisciplinary discussion of how the process of aging affects biological systems. Coverage will be quite broad and includes topics such as subcellular and cellular aging, genetics, immunology, anatomy and physiology, animal model of aging, etc. Prereq: Enrollment in the doctoral program in Gerontology or a biomedical science department or consent of instructor. (Same as A/GR/GRN 612.)

PGY 615 SEMINAR IN TEACHING MEDICAL SCIENCE (MEDSCIENCE TEACHING). (2)
A two (2) credit seminar course in which issues related to the theory and practice of life science education are discussed in a Socratic manner. May be repeated to a maximum of three credits. Prereq: Current enrollment in a life science graduate program. (Same as GRN 615.)

PGY 616 PRACTICUM IN TEACHING MEDICAL SCIENCE (MEDSCIENCE TEACHING). (2)
A two (2) credit experimental course in which students will directly participate in the teaching of Physiology under supervised conditions. May be repeated to a maximum of six credits. Prereq: PGY 615 may be taken concurrently.

PGY 617 PHYSIOLOGICAL GENOMICS. (2)
The study of function by global analysis of gene expression. Teaches the concepts, techniques, and functional significance of analyzing gene expression patterns. The technical emphasis is on the design and analysis of DNA microarray experiments. Examples of normal function or disease states in which gene expression profiling has had a significant impact are also taught. Prereq: IBS 604 and IBS 602 or equivalents. (Same as PHA 617.)

PGY 618 MOLECULAR NEUROBIOLOGY. (4)
This course provides knowledge base and analytical skills in the field of molecular neurobiology. An in-depth introduction to current technologies, their rationale and limitations, will be the focus to address normal brain function and neuropathological conditions. Prereq: BCH 501, 502, NEU 605, or consent of instructor. (Same as ANA/BIO/MI 618.)

PGY 625 MUSCLE FORUM. (1)
Muscle Forum is a course that will allow students to develop critical evaluatory skills for seminars and grant writing in the field of Muscle Biology. Prereq: Students need to be enrolled in the Rehabilitation Sciences doctoral program, one of the graduate programs of the Integrative Biomedical Sciences, or with permission of the course director. (Same as RHB 625.)

PGY 627 PROSEMINAR IN PHYSIOLOGICAL PSYCHOLOGY. (3)
An intensive examination of theories, methods of investigation, and current developments in the field of physiological psychology. Prereq: Graduate standing or consent of instructor. (Same as PSY 627.)

PGY 630 ADVANCED TOPICS IN PHYSIOLOGY. (1-3)
Contemporary topics in physiology. Course designed to utilize the special research interests of resident and visiting faculty. May be repeated to a maximum of six credits. Prereq: PGY 502 or consent of instructor.

PGY 632 DEVELOPMENTAL NEUROBIOLOGY. (3)
An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cellular biological and molecular approaches to cellular differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as ANA/BIO/PSY 638.)

PGY 650 ANIMAL PHYSIOLOGY LABORATORY. (2)
Hands-on laboratory exercises in animal physiology. Prereq: Previous or concurrent enrollment in BIO 550. (Same as ANA 650.)

PGY 660 BIOLOGY OF REPRODUCTION. (3)
Advanced study of current topics in reproductive biology. The course is comprised equally of student-led discussions and lectures given by faculty with research expertise in selected topics. Readings will be taken from current and classic literature. Topics covered include (but are not limited to) molecular and cellular endocrinology, hormone receptors and mechanisms of action, reproductive neuroendocrinology, reproductive behavior, gametogenesis, fertilization, sexual differentiation, puberty, menopause and environmental effects on reproduction. Emphasis will be placed on the analysis and understanding of the experimental basis for current concepts in reproductive biology. Prereq: ASC/PGY 601 and ASC 364 or BIO/PGY 502 or consent of instructor. (Same as ANA 660 and ASC 660.)

PGY 710 AGING OF THE NERVOUS SYSTEM. (3)
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurrent theme. The course will examine aging at several levels, including molecular, cellular, organ, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA/GRN/PHA 710.)

PGY 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PGY 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 resident credit following the successful completion of the qualifying exams.

PGY 766 TOPICAL SEMINAR IN BEHAVIORAL NEUROSCIENCE. (3)
A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the Psychology and Physiology graduate programs. (Same as PSY 766.)

PGY 767 TOPICAL SEMINAR IN BEHAVIORAL NEUROSCIENCE. (3)
A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the psychology and physiology graduate programs. (Same as PSY 767.)

PGY 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PGY 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.

PGY 771 PROSEMINAR IN CELL PHYSIOLOGY. (2)
A comprehensive discussion of topics in cellular physiology and biophysics using advanced texts and readings in the original literature. Includes such topics as biological membranes, transport mechanisms, effects of hormones on membranes. Prereq: Graduate student in physiology and biophysics or consent of Director of Graduate Study.
PGY774 GRADUATE SEMINAR IN PHYSIOLOGY. (1)

PGY791 RESEARCH IN PHYSIOLOGY. (1-15)

May be repeated to a maximum of 15 credits. Prereq: Consent of instructor.

PGY813 NEUROPHYSIOLOGY. (1)
The brain uses electrical signals to process all information it receives and analyzes. Individual neurons encode complex information into simple electrical signals; the meaning behind these signals is derived from the specific interconnections of neurons. The purpose of neurophysiology is to describe how the neuron produces electrical and chemical signals and illustrate how these signals are involved in the functional organization of neural circuits. This course also describes the central nervous system analyzes and integrates the various inputs, elicits command decisions that determine the motor and/or endocrine responses. Lecture: three hours per week for five weeks. Prereq: Admission to the College of Dentistry, or consent of the Course Director. (Same as OBI 813.)

PGY814 PRINCIPLES OF HUMAN PHYSIOLOGY FOR DENTAL STUDENTS. (4)
This course enables student dentists to understand the basic principles of human physiology, especially as it relates to the practice of dentistry. The introduction of the course presents the basic physiology of the cells, conducting and contacting tissues, lining and secretory tissues, and other special tissues. The course focuses on the major physiological systems and presents them at the system, cellular, and molecular levels; and emphasizes those aspects particularly relevant to dentistry - dentin sensitivity, dental and pulpal pain, muscle dysfunction, ischemic and, hypertensive heart disease, oral manifestations of endoderm abnormalities, temperature regulation, calcium-phosphate homeostasis, and the dental mineralized tissues. Upon successful completion of the course, student dentists will be able to rationally and scientifically apply basic cell, tissue, organ, and organ system function to clinical decision-making. Lectures with assigned reading: 68 hours. Prereq: OBI 812 or consent of the course director. (Same as OBI 814.)

PGY815 FIRST-YEAR ELECTIVE, PHYSIOLOGY. (1-3)
With the advice and approval of his or her faculty advisor, the first-year student may choose approved electives offered by the Department of Physiology and Biophysics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first-year, College of Medicine.

PGY818 HUMAN FUNCTION. (8)
This course provides in-depth instruction on the physiological mechanisms of body function from the single cell to the organism level. The course is taught by medical scientists and clinicians. Teaching methodologies include didactic and Socratic lectures, small group discussions, demonstrations and live model and computer simulated laboratories. Lecture, 20 hours per week. Prereq: Admission to medical school (first year). (Same as OBI 818.)

PGY825 SECOND-YEAR ELECTIVE, PHYSIOLOGY. (1-4)
With the advice and approval of his or her faculty advisor, the second-year student may choose approved electives offered by the Department of Physiology and Biophysics. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

PGY850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty advisor and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
PGY850 RESEARCH IN PHYSIOLOGY

PHA 8612 QUANTITATIVE PHARMACODYNAMICS: PHARMACOKINETICS.
Quantitative treatment of dynamics of drug absorption, distribution, metabolism and excretion, including development of both mathematical models and model-independent approaches for describing these processes. Prereq: MA 114 and consent of instructor. (Same as PHS 612.)

PHA 8616 BIOLOGY AND THERAPY OF CANCER.
Biology of cancer will be discussed at the molecular, cellular and organismic level. Emphasis will be placed on cellular signaling, apoptosis and cell cycle unique to cancer cells, which affects tumor cell behavior and its interactions with the host immune system. The biology of hematopoietic cells will also be included. Clinicians active in treatment and research of various types of cancer will be invited to participate in the lectures. Prereq: BCH 501, 502, BIO 685. (Same as MED/MI 616.)

PHA 8617 PHYSILOGICAL GENOMICS.
The study of function by global analysis of gene expression. Teaches the concepts, techniques, and functional significance of analyzing gene expression patterns. The technical emphasis is on the design and analysis of DNA microarray experiments. Examples of normal function or disease states in which gene expression profiling has had a significant impact are also taught. Prereq: IBS 604 and IBS 602 or equivalent. (Same as PGS 617.)

PHA 8621 PRINCIPLES OF DRUG ACTION.
The objective of this course is to familiarize graduate students with the principles and mechanisms of drug action in biochemical and physiological systems. Students will discuss quantitative approaches to assessing drug responses, metabolism and toxicity. Prereq: Consent of instructor.

PHA 8622 MOLECULAR DRUG TARGETS AND THERAPEUTICS.
PHA 622 is an advanced course designed to provide graduate students with state of the art information regarding drugs, drug action and targets for drug action. Emphasis will be placed on drugs that interact with the cardiovascular system (section 001), the central nervous system (section 002), the immune system (section 003), and other important drug classes such as nonsteroidal anti-inflammatory agents, steroid hormones, anti-diabetic agents and toxicology (section 004). Each section is designed to be a separate one hour course. Students may take any combination of sections from one to all four sections. For each agent, emphasis will be placed on the molecular mechanisms of action, the receptors or cellular targets at which they act, and their therapeutic issues and potential toxicities. This information is intended to be integrated with other disciplines, including anatomy, biochemistry, physiology, psychology and molecular biology. Prereq: IBS 601-609 and PHA 621.

PHA 8630 SPECIAL TOPICS IN PHARMACOLOGY.
Detailed examination of current, significant topics in pharmacology such as: contemporary neuroscience methodology, molecular and cellular pharmacodynamics, transmembrane signalization. Course is designed to offer flexibility to students in different tracks, different emphasis in a given year and to utilize the special research interests in resident and visiting investigators. May be repeated to a maximum of six credits. Prereq: Consent of course director.

PHA 8634 ADVANCED CARDIOVASCULAR PHARMACOLOGY.

PHA 8649 ADVANCED MOLECULAR PHARMACOLOGY.
This course will provide in-depth coverage of the molecular pharmacology of growth factors, transcription factors, receptors, and ion channels. Emphasis will be placed on both the normal functions of these cell-signaling molecules and perturbations that result in several prevalent human diseases, including cancer, Alzheimer’s, diabetes, osteoporosis, and inherited human illnesses. Students will be introduced to experimental approaches to diagnosing and treating these illnesses in the light of our evolving knowledge of molecular pharmacology. Prereq: IBS 601-606 or consent of instructor. (Same as PFR/TOX 649.)

PHA 8658 ADVANCED NEUROPHARMACOLOGY.
A study of the general theories of the mode of action of drugs upon nervous tissue and a review of the effects of analgetics, sedatives, hypnotics, anesthetics, tranquilizers, psychotomimetics, analeptics, antidepressants, anti-convulsants and drugs affecting motor dyskinesias upon neurons, synapses and functional components of the central nervous system. Prereq: PHA 522, IBS 601-606, or consent of instructor.

PHA 8670 CHEMICAL CARCINOGENESIS.
Lectures and discussion of the chemical and biochemical reactions of chemical carcinogens and their metabolites. Prereq: CHE 232, PHR 400; or BCH 501, 502. (Same as TOX 670.)

PHA 710 AGING OF THE NERVOUS SYSTEM.
This course will examine the alterations in the brain that occur with aging and in neurodegenerative disorders such as Alzheimer’s disease. The emphasis will be on human aging although the relevance of animal models to studies of human aging will be a recurring theme. The course will examine aging at several levels, including molecular, cellular, organismic, and behavioral. A strong background in the basic sciences is encouraged. (Same as ANA GRN/PHY 710.)

PHA 740 MASTER’S THESIS RESEARCH.
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.
PHI 749 DISSECTING RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769, the successful completion of the qualifying exams.

PHI 750 RESEARCH IN PHARMACOLOGY. (1-5)
May be repeated to a maximum of 15 credits.

PHI 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students must register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PHI 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PHI 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

PHI 770 SEMINAR IN PHARMACOLOGY. (1)
May be repeated indefinitely.

PHI 779 MEMBRANE SCIENCES COLOQUIUM. (1)
Outstanding membrane scientists present their current research on biological and/or synthetic membranes. Students read a pertinent paper by the speaker prior to his/her talk and write a short paper on the talk; especially important is relevance of the main points of the talk to membrane science in general and the student's own research in particular. May be repeated to a maximum of six credits. (Same as BCH 726, CHE/CME/PHR 779.)

PHI 815 FIRST-YEAR ELECTIVE, PHARMACOLOGY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Pharmacology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

PHI 822 DENTAL PHARMACOLOGY AND THERAPEUTICS. (4)
This course will provide students with a fundamental understanding of the pharmacology and therapeutic uses of drugs commonly used by their patients and in their practice. Prereq: OHI 812 and OHI 814. (Same as OBI 826.)

PHI 824 MECHANISMS OF DISEASE AND TREATMENT/PHARMACOLOGY. (7)
This course introduces the principal actions of substances which are used as drugs for treatment of diseases and suffering in humans. It will cover the general principles of drug action, how drugs alter the function of normal and pathologic tissues and organisms and how they influence the disease process. Drugs used in the treatment of disease processes will be integrated with discussion of those diseases in PAT 823. Lecture, 20 hours per week. Prereq: Admission to second year of medical curriculum.

PHI 825 SECOND-YEAR ELECTIVE, PHARMACOLOGY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Pharmacology. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

PHI 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-8)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

PHI 130 INTRODUCTION TO PHILOSOPHY: MORALITY AND SOCIETY. (3)
An introduction to philosophical studies with emphasis on a critical study of principles of moral action and social and political values.

PHI 251 PHILOSOPHY AND CLASSICAL PHYSICS. (3)
An historical introduction to the philosophical background of classical physics as the latter was developed by thinkers like Isaac Newton and James Clerk Maxwell. Concentrating on metaphysics and the philosophy of scientific method, this course includes a study of scientists and philosophers like Aristotle, Copernicus, Galileo, Leibniz, and Faraday. Prereq or concur: PHY 231 or consent of instructor.

PHI 260 HISTORY OF PHILOSOPHY II: FROM THE RENAISSANCE TO THE PRESENT ERA. (3)
An introductory study of the development of Western philosophy from early modern to recent times including systematic work in logic, metaphysics, epistemology and ethics by such philosophers as Plato, Aristotle, Augustine and Aquinas.

PHI 270 HISTORY OF PHILOSOPHY III: FROM GREEK BEGINNINGS TO THE MIDDLE AGES. (3)
An introductory study of the development of Western philosophy from ancient through late medieval times including systematic work in logic, metaphysics, epistemology and ethics by such philosophers as Oceam, Descartes, Hume and Kant.

PHI 300 SPECIAL TOPICS IN PHILOSOPHY (Subtitle required). (1-3)
Topics that cross traditional systematic or historical lines in philosophy or that relate philosophy to topics or periods in other disciplines. May be repeated under a different subtitle to a maximum of seven credits. Prereq: Determined by instructor.

PHI 305 HEALTH CARE ETHICS. (3)
A consideration of the ethical issues and difficult choices generated or made acute by advances in biology, technology, and medicine. Typical issues include: informed consent, healer-patient relationships, truth telling, confidentiality, problem of birth defects, abortion, placebo and health, allocation of scarce medical resources, genetic research and experimentation, cost containment in health care, accountability of health care professionals, care of the dying, and death.

PHI 310 PHILOSOPHY OF HUMAN NATURE. (3)
An introductory philosophy course for upper division students that analyzes various ways that philosophers have attempted to define the human individual. It pursues diverse methods of inquiry into questions such as these: Do human beings have a fixed and definable human nature? What differentiates the properly human from the nonhuman? Are human actions free or determined? How are human beings essentially related to history, culture, society and the natural environment?

PHI 315 PHILOSOPHY AND SCIENCE FICTION. (3)
An examination of fundamental questions in metaphysics and epistemology through a comparison of works of philosophy and science fiction. Questions will be discussed such as: Can there be time travel? Can computers think? Can there be non-human persons, and if so how would we identify them? Can there be ways of knowing that are radically different from our own, and what might they be like? How much can a person change while remaining the same person?

PHI 317 EXISTENTIAL THOUGHT AND LITERATURE. (3)
A survey of existentialism as a literary movement as well as a philosophical one, with emphasis upon their interaction and interaction. The course will trace the emergence of existentialist themes in modern thought and culture, and will analyze and assess the movements’ continuing significance.

PHI 320 SYMBOLIC LOGIC. (3)
A systematic study of sentential logic, elementary quantification, and the logic of identity. The student will acquire specific skills in symbolic methods of analysis which are necessary for further study in logic as well as useful for addressing complex issues in philosophy and other areas.

PHI 330 ETHICS. (3)
An examination of fundamental issues in ethics, such as duty, character, virtue and vice, evil, moral responsibility, free will, the good life, the emotions, skepticism, and rationality.

PHI 332 PROFESSIONAL ETHICS. (3)
A study of ethical issues related to professional roles, especially those of physicians and lawyers. Among the topics to be considered are the nature and justification of professional responsibilities and duties; obligations of professions to society; the professional-client relationship and its rights and obligations; and enforcement of codes of ethics.

PHI 334 BUSINESS ETHICS. (3)
An introduction to moral problems that arise in contemporary business practice and the ethical frameworks proposed to resolve them. Topics will include areas such as truth-telling and integrity; social responsibility; property rights and their limitations; and justice in personnel and labor practices.
Course Descriptions

PHI 335 THE INDIVIDUAL AND SOCIETY. (3)
An examination of several incompatible views concerning the relation between the individual and society, including radical individualism and collectivism, as well as more moderate theories. Attention will be given to contemporary as well as classical spokesmen for these views and emphasis will be placed upon relating these theories to contemporary social, cultural, and political issues.

PHI 336 ENVIRONMENTAL ETHICS. (3)
An introduction to moral problems that arise in human interaction with the natural environment. Topics to be addressed include questions such as: what is man's place in nature? Do nonhuman animals or ecosystems have intrinsic moral worth, and if so, how can it be respected? What problems and ambiguities arise in attempting to live in an environmentally responsible fashion? How can we adjudicate conflicts between social and environmental values?

PHI 337 INTRODUCTION TO LEGAL PHILOSOPHY. (3)
A general introduction to basic concepts, institutions, and mechanisms of law. Understanding of the legal system and its methods is promoted through discussion of topics which include: basic legal reasoning, the function of the legal process, fundamental legal concepts and categories (such as property, crime, and contract).

PHI 340 INTRODUCTION TO FEMINISM AND PHILOSOPHY. (3)
Introduction to basic feminist thought from a philosophical perspective. Emphasis on causes and solutions to the oppression of women. Topics may include philosophical perspectives and gender roles, images of women in society, violence against women, and reproductive choices.

PHI 343 ASIAN PHILOSOPHY. (3)
An introduction to the main concepts, assumptions, problems and texts of one or more Asian philosophical traditions, such as Hinduism, Buddhism, Taoism, and Confucianism.

PHI 350 METAPHYSICS AND EPISTEMOLOGY. (3)
An examination of fundamental issues in metaphysics and epistemology, such as causation, the nature of space and time, personal identity, free will, the existence of God, the nature and types of knowledge, the character of human existence, skepticism, and rationality.

PHI 361 BIOLOGY AND SOCIETY. (3)
A study of the implications of biology for understanding and changing society. Emphasis is on sociobiology and the view of viewing social behavior as a product of adaptive evolution by natural selection. Representative philosophical issues include biological constraints on human nature and society, genetic engineering, reductionism, the scientific method, and bioethics. Prereq: A college course in biology or consent of instructor.

PHI 380 DEATH, DYING AND THE QUALITY OF LIFE. (3)
A philosophical and interdisciplinary investigation of a cluster of prominent issues about the meaning of life and death, caring for dying persons, and the quality of life of the terminally ill. Among topics included are: death definitions and criteria; allowing to die vs. killing; euthanasia and suicide; life prolongation, efficacy of care of the terminally ill; and rights of the dying.

PHI 395 INDEPENDENT WORK. (3)
Open only to students who have distinguished themselves in philosophy or in allied subjects. May be repeated to a maximum of 12 credits. Prereq: Major and standing of f. 3.0 in department.

PHI 399 EXPERIENTIAL LEARNING. (1-6)
To provide the opportunity for students to earn credit for work-study experience. The student must work with a faculty member to describe the nature of the experience, the work to be performed, the accompanying philosophical reflection and study, appropriate course credit for the work, and criteria by which the work may be evaluated. This information must be written and filed in the Philosophy Department and the Office for Experiential Education prior to the student’s registration for the course. May be repeated to a maximum of 12 credits. Pass-fail only. Prereq: Consent of instructor and department chairperson; completion of a departmental learning agreement.

PHI 500 TOPICS IN PHILOSOPHY (Subtitle required). (1-3)
Topics that cross traditional systematic or historical lines in philosophy or that relate philosophy to topics or periods in other disciplines. May be repeated to a maximum of seven credits.

PHI 517 EXISTENTIALISM. (3)
A systematic study of the fundamental concepts and problems of existentialism. Readings may include works of thinkers such as Kierkegaard, Nietzsche, Sartre, Marcel, Heidegger, and Jaspers. Prereq: PHI 270 or the consent of the instructor.

PHI 520 SYMBOLIC LOGIC II. (3)
An intermediate course in symbolic logic which reviews sentential logic, develops further the logic of quantification, and introduces metalogical issues such as the construction, consistency, and completeness of deductive systems. Prereq: PHI 320 or consent of instructor.

GROUP A

PHI 503 TOPICS IN ANCIENT PHILOSOPHY. (3)
A study of representative texts and issues in Ancient Philosophy with special attention to historical continuity and the interrelations of thinkers and problems. Possible Topics: Pre-Socratic Philosophers, Plato, Aristotle, Stoicism, Epicureanism, Scepticism. May be repeated to a maximum of six credits. Prereq: PHI 260 or consent of the instructor.

PHI 504 ISLAMIC AND JEWISH PHILOSOPHY AND THE CLASSICAL TRADITION. (3)
A study of special topics and issues in Islamic and Jewish philosophy with special attention to the historical continuity with the Greek philosophical tradition and the interrelations of thinkers and problems. Possible topics: the commensurability of philosophy and (revealed) law, the creation or eternity of the world, the nature of prophecy, the human good, the nature of God and divine language. Prereq: PHI 260 or consent of instructor.

PHI 506 TOPICS IN MEDIEVAL PHILOSOPHY. (3)
An investigation of issues in Medieval Philosophy. Topics will be chosen which illustrate continuity both with Ancient Greek Sources and with problems in Modern Philosophy. Possible Topics: Neo-Platonism, Faith and Reason, Freedom and Determinism; Universals, the Existence of God, Renaissance reactions. May be repeated to a maximum of six credits. Prereq: PHI 260 or the consent of the instructor.

PHI 509 TOPICS IN THE HISTORY OF MODERN PHILOSOPHY. (3)
A selective study of representative issues and texts in modern philosophy, with special emphasis upon historical continuity and interrelation of thinkers and problems. Possible topics: British empiricism; Leibniz and Locke; Descartes and his critics; Hobbes and Rousseau; Hume and Kant; philosophy and the rise of modern science. May be repeated to a maximum of six credits. Prereq: PHI 270 or the consent of the instructor.

PHI 513 NINETEENTH CENTURY PHILOSOPHY. (3)
An examination of the major topics and trends in 19th century philosophy. Prereq: PHI 270 or consent of instructor.

PHI 514 AMERICAN PHILOSOPHY. (3)
A study of the development of philosophy in America from colonial to recent times with attention to religious, political, literary and scientific influences on American thought. The focus will be on the pragmatic spirit that was the moving force from 19th century idealism to 20th century naturalism, with emphasis on the works of such thinkers as Royce, Peirce, James and Dewey.

PHI 515 CONTEMPORARY PHILOSOPHY: THE ANALYTIC TURN. (3)
A survey of several 20th century philosophical movements, such as logical positivism and ordinary language philosophy, whose members agree that careful attention to language is one of the keys to the resolution of philosophical problems. The works of representative thinkers such as Moore, Russell, the Vienna Circle, Wittgenstein and Austin will be studied. Prereq: PHI 320 or 330 or the consent of the instructor.

PHI 516 CONTEMPORARY PHILOSOPHY: PHENOMENOLOGICAL DIRECTIONS. (3)
A study of 20th century philosophical movements represented by the works of thinkers such as Husserl and Heidegger, Gadamer and Ricoeur, Habermas and Apel. Generally based on a reflection on human experience, these philosophies undertake a radical criticism of common conceptions of human nature while variously emphasizing rationality, ontology, language, or social and historical context. Prereq: PHI 270 or consent of instructor.

PHI 517 EXISTENTIALISM. (3)
A systematic study of the fundamental concepts and problems of existentialism. Readings selected from such philosophers as Kierkegaard, Nietzsche, Sartre, Marcel, Heidegger, and Jaspers. Prereq: PHI 270 or the consent of the instructor.

GROUP B

PHI 519 CRITICAL SOCIAL THOUGHT. (3)
This course provides a pluralistic introduction to major 20th century paradigms of critical social thought. Critical social thought in philosophy comprises those authors and schools that take the philosophical methods and questions on the analysis of social conditions and/or focus sociocultural methods and questions on the study of philosophy. These include feminist philosophy, Marxist-influenced social theory, poststructuralism, critical race theory, and post-analytic philosophy. Prereq: For undergraduates, PHI 270, 335, or 340 or consent of instructor. For graduate students outside the philosophy department, permission of the instructor.

PHI 530 ETHICAL THEORY. (3)
A study of ethical theories by detailed examination of a few selected works. Theories considered may include naturalism, intuitionism, noncognitivism, utilitarianism, universalizability, and natural law. Prereq: PHI 130, 330, or 335 or the consent of the instructor.

PHI 531 ADVANCED TOPICS IN ETHICS (Subtitle required). (3)
A topical study in ethics, emphasizing, but not restricted to, contemporary issues. Topics may include the nature of practical reason, justification of moral theories, moral luck, amorality and immorality, moral language, and weakness of will. May be repeated to a maximum of six credits under different subtitles. Prereq: One of the following: PHI 130, 305, 330, or 530; or graduate standing.

PHI 535 SOCIAL AND POLITICAL PHILOSOPHY. (3)
A critical examination of some philosophical problems concerning the nature and evaluation of social and political organizations. For example, questions concerning the nature, justification, and limits of political power may be explored in connection with a study of important classical positions. Prereq: PHI 130, 330, or 335 or the consent of the instructor.
PHI 537 PHILOSOPHY OF LAW. (3)
Concept of law; relations between law and morals; nature of legal reasoning; analysis of legal concepts; justification of punishment. Pass/fail basis only for law students. Prereq: PHI 130, 330, or 335 or the consent of the instructor.

PHI 540 FEMINIST PHILOSOPHY. (3)
An introduction to feminist philosophical theory, including feminist treatments of various questions in metaphysics, epistemology, logic, and value theory, such as: the nature (if any) of the self; the role of perspectives in knowledge; the nature of reason and the criteria for justification in argumentation; feminist theories of morality and feminist theories of social justice.

PHI 545 PHILOSOPHY OF RELIGION. (3)
An analysis of the philosophical issues raised by religion, such as the problem of religious knowledge, the nature of religious language, science and religion, concepts of God, death, and evil. Prereq: PHI 100, 260, or 270 or the consent of the instructor.

PHI 592 AESTHETICS. (3)
Problems of method in aesthetics; major types of aesthetic theory. Aesthetic materials of the arts in literature, music, and the space arts. Form and types of form. Meaning in the arts. Interrelations of the arts. Lectures, discussions, reports. (Same as A-H 592.)

GROUP C

PHI 550 PHILOSOPHICAL PROBLEMS IN KNOWLEDGE AND REALITY. (3)
Critical examination of issues regarding the foundations of knowledge, the nature of reality and the relation between the two. Evidence, belief, certainty, perception and justification will be among problems considered. Understandings of truth, existence, causality, freedom, time, space and matter will also be attended to. Prereq: PHI 100, 260, 270, or 350 or the consent of the instructor.

PHI 560 PHILOSOPHY OF SCIENTIFIC METHOD. (3)
An examination of the logical and epistemological foundations of empirical science, including fundamentals of concept formation, criteria of cognitive significance, issues of explanation, interpretation, and prediction, and testing and confirmation of theories and laws. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

PHI 561 PHILOSOPHICAL PROBLEMS IN THE NATURAL SCIENCES (Subtitle required). (3)
A systematic examination of selected conceptual and/or metaphysical problems in the natural sciences. Possible topics include: reductionism, teleology, causality and determinism, the structure of space-time, and the "anthropic principle" in cosmology. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

PHI 562 PHILOSOPHICAL PROBLEMS IN THE SOCIAL AND BEHAVIORAL SCIENCES. (3)
An examination of various methodological issues and broader philosophical questions of special concern in the social sciences. Among the topics to be studied: the structure of theories and the roles of mathematics and experimentation in the social sciences, the possibility of an objective or value free social science, and the conceptions of human nature presupposed by different schools of social science. Prereq: PHI 100, 120, or 350 or the consent of the instructor.

PHI 565 PHILOSOPHY OF LANGUAGE. (3)
An investigation of problems current in the philosophy of language such as meaning and reference, the nature of analysis, linguistic relativity and the relation of linguistics to philosophy. Prereq: PHI 320 or 350 or the consent of the instructor.

PHI 570 PHILOSOPHY OF HISTORY. (3)
An examination of the theories and methods utilized by historians with special attention to the problems of laws and explanations in history, the nature of historical knowledge and narrative, and the roles of causal judgments and historical understanding. Attention will also be given to theoretical interpretations of history as offered by Marx, Hegel, Toynbee and others. Prereq: PHI 100, 260, or 270 or the consent of the instructor.

PHI 575 PHILOSOPHY OF MIND. (3)
An examination of problems current in the philosophy of mind, such as the concept of person, the relation of mind and body, the relation of minds and machines, knowledge of other minds, and the roles of dispositions and volitions in human action. Attention will be given to the philosophical analysis of such psychological categories as consciousness, feeling, emotion, perception, imagination, thinking and will. Prereq: PHI 100 or 350 or the consent of the instructor.

GRADUATE SEMINARS

PHI 630 SEMINAR IN VALUE THEORY. (3)
A specialized graduate course in value theory that treats the history of value theoretic issues and doctrines, or emphasizes contemporary methodological discussions, or examines the concrete societal implications of major theories, or combines these approaches. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PHI 650 SEMINAR IN METAPHYSICS AND EPISTEMOLOGY (Subtitle required). (3)
A specialized advanced study of topics in traditional areas of metaphysics and epistemology or of more contemporary topics, some of which may cut across or even challenge the framework of those traditional domains. Topics may include such issues as the nature of human action, problems of reference and modality, conceptions of time and space, and the sociology of knowledge. May be repeated to a maximum of nine credits under different subtitles. Prereq: Consent of instructor.

PHI 680 SPECIAL TOPICS IN PHILOSOPHY. (3)
Studies in philosophical problems which either cut across or lie outside the standard areas of philosophical inquiry. May be repeated to a maximum of six credits.

PHI 700 SEMINAR IN ANCIENT PHILOSOPHY. (3)
Intensive study of original works of such major classical philosophers as Plato and Aristotle. May be repeated to a maximum of six credits. Prereq: PHI 260 or equivalent.

PHI 705 SEMINAR IN MEDIEVAL PHILOSOPHY. (3)
An intensive study of the issues treated by one or more medieval philosophers, e.g., Augustine, Aquinas, Scotus or Ockham. May be repeated to a maximum of six credits. Prereq: PHI 506.

PHI 710 SEMINAR IN MODERN PHILOSOPHY. (3)
Intensive study in the major works of such prominent philosophers of modern times as Descartes, Locke, Hume, Kant, and Hegel. May be repeated to a maximum of six credits. Prereq: PHI 270 or equivalent.

PHI 715 SEMINAR IN RECENT PHILOSOPHY. (3)
Intensive study of major philosophers of the 20th Century such as Russell, Wittgenstein, J.L. Austin, and Merleau-Ponty. May be repeated to a maximum of six credits. Prereq: PHI 515 or equivalent.

PHI 740 PROSEMINAR IN TEACHING METHODS. (1)
An introduction to teaching methods for graduate students.

PHI 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PHI 755 TUTORIAL IN INTERDISCIPLINARY ISSUES. (1-6)
As a tutorial, this course is structured individually to a student's research and study projects. Topics and issues are to be chosen and pursued in work that integrates philosophical methods and ideas in other disciplinary areas. May be repeated to a maximum of nine credits. Prereq: Approval of the Student's Advisory Committee.

PHI 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PHI 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PHI 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

PHI 790 RESEARCH IN PHILOSOPHY. (3)
This course is primarily intended for advanced students who desire and are prepared to do research in philosophy. May be repeated to a maximum of 12 credits.

PHR 222 DRUGS, MEDICINES, AND SOCIETY. (3)
The course is designed to enable the university graduate to be sufficiently sophisticated in his understanding of the physiological and behavioral effects of medicines, environmental toxicants, and psychoactive chemicals so that he may make informed decisions regarding their use in his life, home and community. This course provides such information in the context of drug development, standardization, distribution, control, use and misuse in a modern society. (Note: It is felt that this course might be of particular interest to freshmen.)

PHR 776 SEMINAR IN PHARMACEUTICAL SCIENCES. (1)
Reports and discussion of pertinent research and literature in the pharmaceutical sciences. Required of all graduate students. Prereq: Graduate standing.

PHS 501 MODERN METHODS IN PHARMACEUTICAL ANALYSIS. (5)
A course which deals with the application of modern analytical methods, primarily instrumental methods, in the determination of the strength, purity, and quality of drugs and pharmaceuticals. Laboratory exercises include analysis of raw materials and finished dosage forms. Lecture, three hours; laboratory, four hours. Prereq: CHE 226.
PHS 530 RADIOPHARMACEUTICS. (3) Basics of radioactive decay and detection. Labelling of molecules and cells with radionuclides. Imaging systems and clinical aspects of radiopharmaceuticals. Radioanalytical applications in pharmaceutical sciences, including positron tomography and gamma scintigraphy. Development of new radiopharmaceuticals and absorbed dose calculations. The principles of radiation safety and radiobiology. Prereq: Consent of instructor.

PHS 545 STERILE PARENTERAL AND DEVICES. (2-3) The course will describe the fundamental concepts, principles and techniques involved in the characterization, development, evaluation and preparation of sterile products. Lecture, two credits; lecture with laboratory, three credits. Prereq: Consent of instructor.

PHS 612 QUANTITATIVE PHARMACODYNAMICS: PHARMACOKINETICS. (3) Quantitative treatment of dynamics of drug absorption, distribution, metabolism and excretion, including development of both mathematical models and model-independent approaches for describing these processes. Prereq: MA 214 and consent of instructor. (Same as PHA 612.)

PHS 622 ADVANCED BIOPHARMACEUTICS. (2) An advanced treatment of the factors affecting drug availability from dosage forms and the influence of the route of administration and the dosage regimen on drug availability. Prereq: PHR 612.

PHS 630 PHARMACEUTICAL RATE PROCESSES. (3) Kinetics of reactions of pharmaceutical interest; mechanisms of drug decomposition and theoretical approaches to stabilization and preservation; accelerated stability analysis. Prereq: MA 213, CHE 538, CHE 548 and PHS 631.

PHS 631 EQUILIBRIUM PHENOMENA IN PHARMACEUTICAL SYSTEMS. (3) An advanced study in special topics of a physical chemical nature which are applicable to pharmacy, with special emphasis on physical properties and molecular structure, solubility, complexation and equilibria in solution. Prereq: Physical chemistry.

PHS 632 THE PRACTICE OF DRUG METABOLISM. (3) The purpose of this course is to teach students about practical aspects of drug metabolism research. This includes addressing the function and purpose of drug metabolism studies, how those studies are carried out, why and how they are done, how metabolites are characterized, and some discussion of the limits and utility of the various approaches used in drug metabolism research.

PHS 647 INTRODUCTION TO MOLECULAR PHARMACOTHERAPEUTICS. (3) A discussion of the development of potential therapeutic entities using molecular biotechnology. Recent advances in the design and delivery of target-specific treatments such as small molecules, monoclonal antibodies and gene therapies will be the primary focus. Prereq: BCH 501 and 502, BCH 401 G or equivalent or consent of instructor.

PHS 649 ADVANCED MOLECULAR PHARMACOLOGY. (2) This course will provide an in-depth coverage of the molecular pharmacology of growth factors, transcription factors, receptors, and ion channels. Emphasis will be placed on both the normal functions of these cell-signaling molecules and perturbations that result in several prevalent human diseases, including cancer, Alzheimer’s, diabetes, osteoporosis, and inherited human illnesses. Students will be introduced to experimental approaches to diagnosing and treating these illnesses in the light of our evolving knowledge of molecular pharmacology. Prereq: IBS 601-606 or consent of instructor. (Same as PHA/TOX 649.)

PHS 660 BIOSYNTHESIS OF NATURAL PRODUCTS. (3) An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as BCH 620/PLS 642.)

PHS 662 BIOORGANIC MECHANISMS. (3) An in-depth discussion on the bioorganic chemistry aspects of the active sites of enzymes and drug receptors, the molecular basis of drug design, and principles of drug metabolism. Within these topics, the mode of action some of the major coenzymes and drugs will be discussed from a mechanistic chemistry point of view. Prereq: CHE 538, CHE 633, BCH 501 or consent of instructor.

PHS 663 MOLECULAR NEUROBIOLOGY OF ABUSED DRUGS. (3) This course is designed to review major topics, concepts and issues pertinent to the molecular neurobiology of drug abuse and dependence. The proposed course of study will provide a strong background in neuroscience and students will be informed about current trends in our understanding of the molecular neurobiology of drug abuse research. Prereq: IBS 601 or consent of instructor.

PHS 665 NEUROTOXICOLOGY. (2) Multidisciplinary discussions of the major sites and mechanisms of drug/chemical-induced nervous system toxicity. Presentations by faculty and graduate students. Prereq: BCH 501 and 502, PHYG 502 and PHA 522 or equivalent and consent of instructor. (Same as TOX 665.)

PHS 748 MASTER’S THESIS RESEARCH. (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PHS 749 DISSERTATION RESEARCH. (0) Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PHS 750 PHARMACEUTICAL SCIENCES JOURNAL CLUBS. (1) Discussion and presentations of foundation or current literature and emerging topics in pharmaceutical sciences. Topics vary by section. Prereq: Consent of instructor.

PHS 760 TOPICS IN PHARMACEUTICAL SCIENCES. (1-4) This course deals with emerging concepts in pharmaceutical sciences which are not being covered in other courses. May be repeated to a maximum of 10 hours. Prereq: Consent of instructor.

PHS 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PHS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6) May be repeated to a maximum of 12 hours. Prereq: Consent of instructor.

PHS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12) May be repeated indefinitely. Prereq: Consent of instructor.

PHS 777 SEMINAR IN PHARMACEUTICAL SCIENCES II. (1) Reports and discussion of pertinent research and literature in a disciplinary area of the pharmaceutical sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing.

PHS 780 SPECIAL PROBLEMS IN PHARMACEUTICAL SCIENCES. (1-6) Selected problems of laboratory or literature nature in which student pursues a topic of interest to him under the supervision of a faculty member particularly qualified in that area. May be repeated once. Prereq: Consent of instructor.

PHS 790 RESEARCH IN PHARMACEUTICAL SCIENCES. (1-12) Research work to be conducted in selected areas of pharmaceutical sciences. Prereq: Approval of student’s special committee and consent of instructor.

PHS 911 PHYSIOLOGICAL BASIS FOR THERAPEUTICS. (4) Integrated concepts of human organ system functions with particular emphasis on the physiology of the central and autonomic nervous system, the cellular and molecular mechanisms of neurotransmission and the response to target tissues. The course includes an introduction to the pathophysiology of each system and the pharmacodynamics of therapeutic agents as a framework for discussion. Variable mixtures of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 912 PHYSIOLOGICAL CHEMISTRY AND MOLECULAR BIOLOGY I. (3) The first of two course sequence covering integrated concepts of human biochemistry from a physiological viewpoint, functional group chemistry, essential to biology, key structural and functional relationships of the biomolecules in living systems, energy metabolism emphasizing interorgan relationships and an in depth discussion of information storage and transfer. The course includes an introduction to common metabolic diseases and the therapeutic agents used in those diseases as a framework for discussion. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 914 BASIC PRINCIPLES OF PHARMACEUTICAL SCIENCE: PHARMACEUTICS AND BIOPHARMACEUTICS. (3) The first of two course sequence in basic principles of Pharmaceutical Science concentrating on absorption, distribution, metabolism, excretion and bioavailability of drugs; and an introduction to dosage forms, oral drug delivery systems, drug solutions and drug solids, bioequivalence determinations and rankings, and official compendia. Variable mixtures of lectures, discussions and independent study. Prereq: Admission to the first year, College of Pharmacy.

PHS 921 PHYSIOLOGICAL BASIS FOR THERAPEUTICS II. (4) A continuation of PHS 911 covering integrated concepts of human organ system functions with particular emphasis on the physiology of the cardiovascular, renal, pulmonary and endocrine systems. The course includes an introduction to the pathophysiology of each system and the pharmacodynamics of prototype therapeutic agents as a framework for discussion. Variable mixture of lecture, group discussions and independent study. Prereq: PHS 911 and admission to the first year, College of Pharmacy.

PHS 922 PHYSIOLOGICAL CHEMISTRY AND MOLECULAR BIOLOGY II. (3) A continuation of PHS 912. Variable mixture of lectures, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy and PHS 912.

PHS 924 BASIC PRINCIPLES OF PHARMACEUTICAL SCIENCE: PHARMACEUTICS AND BIOPHARMACEUTICS. (3) The second of a two course sequence in the basic principles of Pharmaceutical Science concentrating on modified release oral dosage forms; modified release parenteral dosage forms; nasal, buccal, rectal, vaginal and ophthalmic delivery systems; aerosols and pulmonary delivery systems, and the drug development process. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.
# PHYS 152 - INTRODUCTION TO PHYSICS. (3)

This lecture and problems course covers the principles of geometrical optics, special relativity, quantum mechanics, and the interactions of electromagnetic waves with matter. It is assumed that all prerequisites include, in addition to any specific course listed, the phrase "or equivalent," or "consent of instructor." 

PHY 170 - BLACK HOLES AND TIME TRAVEL. (3)

This course will discuss basic concepts in physics prior to the 20th century and the backdrop to the emergence of the Special Theory of Relativity. Elements of Special and General Relativity will be discussed at a non-technical level. These concepts will be used to explain how very massive stars inevitably collapse to form black holes. Their observational signatures will be discussed. The work of Hawking leading to the prediction that black holes emit faint radiation will be explained. Finally, the possibility of existence of wormholes leading to time travel will be explored.

PHY 210 - SPECIAL LABORATORY FOR GENERAL PHYSICS. PHY 201. (1)

Special laboratory for students who have completed PHY 201 and later determine that they need an accompanying laboratory. Laboratory, two hours per week. Prereq: PHY 201.

PHY 211 - GENERAL PHYSICS. (5)

First part of a two-semester survey of classical and modern physics, focusing on the motion of solids and fluids as governed by Newton’s Laws and by the conservation laws of energy, momentum, and angular momentum. Lecture, two hours; recitation, two hours; laboratory, two hours. Credit is not given to students who already have credit for PHY 231 and 241. Prereq: A working knowledge of algebra as obtainable in MA 109 or MA 110 or MA 112, or an ACT math score of 25 or above, or a SAT math score of 590 or above.

PHY 212 - SPECIAL LABORATORY FOR GENERAL PHYSICS. PHY 203. (1)

Special laboratory for students who have completed PHY 203 and later determine that they need an accompanying laboratory. Laboratory, two hours per week. Prereq: PHY 203.

PHY 213 - GENERAL PHYSICS. (5)

Continuation of PHY 211, covering electrostatics, dc circuits, magnetism, Maxwell’s Equations, electromagnetic radiation, light and some modern physics. Lecture, two hours; recitation, two hours; laboratory, two hours. Credit is not given to students who already have credit for PHY 232 and 242. Prereq: PHY 211 or equivalent.

PHY 228 - OPTICS, RELATIVITY AND THERMAL PHYSICS. (3)

A lecture and problems course covering the principles of geometrical optics, special relativity, and thermal physics. Prereq or concur: MA 114.

PHY 231 - GENERAL UNIVERSITY PHYSICS. (4)

First part of a two-semester survey of classical physics. Consequences of the principles of mechanics are developed conceptually, analytically and quantitatively. Lecture, three hours; recitation, one hour per week. Prereq or concur: MA 113.

PHY 232 - GENERAL UNIVERSITY PHYSICS. (4)

A general course covering electricity, magnetism, electromagnetic waves and physical optics. Lecture, three hours; recitation, one hour per week. Prereq: PHY 231; concur: MA 213.

PHY 241 - GENERAL UNIVERSITY PHYSICS LABORATORY. (1)

A laboratory course offering experiments in mechanics and heat, framed in a small group environment that requires coordination and team work in the development of a well-written lab report. Prereq or concur: PHY 231.

PHY 242 - GENERAL UNIVERSITY PHYSICS LABORATORY. (1)

A laboratory course offering experiments in electricity, magnetism, and light, framed in a small group environment that requires coordination and team work in the development of a well-written lab report. Prereq: PHY 241; concur: PHY 232.

PHY 306 - THEORETICAL METHODS OF PHYSICS. (3)

A lecture and problems course in the applications of physics of vector calculus, Fourier series and transforms, special functions and asymptotic forms. Prereq or concur: MA 214.

PHY 335 - DATA ANALYSIS FOR PHYSICISTS. (1)

A computational methods course in the theory and techniques of data analysis and error propagation, with emphasis on applications common to the physical sciences; the treatment of statistical errors, the maximum-likelihood method, the chi-square distribution, and curve fitting. Students will be expected to use computer programs, but no previous programming experience is required. Concur: MA 213, PHY 242. (Same as STA 335.)

PHY 361 - PRINCIPLES OF MODERN PHYSICS. (3)

An introduction to the foundations of quantum mechanics and selected topics in atomic, nuclear, particle, solid state, and statistical physics. Prereq: MA 213; PHY 232; or, with consent of instructor, PHY 213.

PHY 395 - INDEPENDENT WORK IN PHYSICS. (1-3)

Students may select an approved topic for study under the direction of a faculty member. May be repeated to a maximum of 12 credits. Prereq: Major and a standing of 3.0 in the department.
Course Descriptions

PHY401G SPECIAL TOPICS IN PHYSICS AND ASTRONOMY FOR ELEMENTARY, MIDDLE SCHOOL AND HIGH SCHOOL TEACHERS. (1-4) 
Selected topics of physics and astronomy of special interest to teachers will be discussed. When the course is offered, a specific title with specific credits, the number of hours in lecture-discussion and laboratory will be announced. Lecture/discussion, two or four hours; laboratory, zero-four hours. May be repeated to a maximum of eight credits. Prereq: Open only to elementary, middle school and high school teachers.

PHY402G ELECTRONIC INSTRUMENTATION AND MEASUREMENTS. (3)
Elementary treatment of electronic circuits emphasizing laboratory work. Topics include AC circuits, filters, theory and operation of transistors and other semiconductor devices and a simple treatment of operational amplifiers. Lecture, two hours per week; laboratory, two hours per week. Prereq: PHY 242 or EE 305 or consent of instructor. (Same as EE 402G.)

PHY 404G MECHANICS.
A lecture and problem course covering the fundamental laws of mechanics. Topics include Newton’s Laws, Kepler’s Laws, oscillatory motion and an introduction to Lagrangian methods. Prereq: PHY 232, or with permission of Director of Undergraduate Studies, PHY 213; concur: MA 214.

PHY 416G ELECTRICITY AND MAGNETISM.
First of two lecture and problem courses covering: the theory of electrostatic fields in the presence of conductors and dielectric materials, magnetic fields due to steady currents in the presence of magnetic materials, electromagnetic induction, and electromagnetic fields due to time-varying currents. Prereq: PHY 306; MA 214 with a grade of C or better.

PHY 417G ELECTRICITY AND MAGNETISM.
Second of two lecture and problem courses covering: the theory of electrostatic fields in the presence of conductors and dielectric materials, magnetic fields due to steady currents in the presence of magnetic materials, electromagnetic induction, and electromagnetic fields due to time-varying currents. Prereq: PHY 416G.

PHY 422G COMPUTATIONAL PHYSICS LABORATORY.
An introductory laboratory and lecture course covering the application of numerical methods to the solution of problems encountered in classical mechanics and electrodynamics. Students will be expected to write computer programs, but no previous programming experience is required. Lecture, one hour; laboratory, four hours per week. Prereq: MA 214, PHY 404G.

PHY 435 INTERMEDIATE PHYSICS LABORATORY.
An intermediate-level laboratory course emphasizing quantum phenomena in atomic, solid state and nuclear systems. Laboratory techniques include optical spectroscopy, gamma-ray and particle detection, atomic and nuclear collisions, and interferometry. This course satisfies the Graduation Writing Requirement. Prereq: PHY 335, PHY 361.

#PHY 460G HANDS-ON PHYSICS FOR MIDDLE SCHOOL AND HIGH SCHOOL TEACHERS.
An exploration of classical and modern physics, in a laboratory setting. This course may be taken twice for credit. Prereq: PHY 228 and PHY 361.

PHY 472G INTERACTION OF RADIATION WITH MATTER.
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radioactivity, energetics of decay. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as RAS/ RM 472G.)

PHY 477 PHYSICS AND ASTRONOMY SEMINAR. (1)
Reports and discussion on student research projects and research topics from the literature of physics and astronomy. May be repeated to a maximum of two credits. Prereq: PHY 361, COM 199 or equivalent.

PHY 495 SENIOR THESIS.
With mentoring from faculty member(s), advanced undergraduate students propose and execute an independent research project. A final report will be written and a presentation will be made in a forum such as a professional meeting, a student group such as a regional or national Society of Physics Students meeting, or a small group of faculty. May be repeated to a maximum of six credits. Prereq: Advanced standing.

PHY 504 ADVANCED MECHANICS.

PHY 506 METHODS OF THEORETICAL PHYSICS.
The course and its sequel (MA/PHY 506 and 507) are included as a part of MA/PHY 506 and 507. Prereq: PHY 404G or equivalent. (Same as MA 506.)

PHY 507 METHODS OF THEORETICAL PHYSICS.
Continuation of MA/PHY 506. Fourier and Laplace Transforms, the special functions (Bessel, Elliptic, Gamma, etc.) are described. Work with Green’s functions, eigenvalues, matrices and the calculus of variations are included as a part of MA/PHY 506 and 507. Prereq: MA/PHY 506. (Same as MA 507.)
PHY 500 SELECTED TOPICS IN ADVANCED PHYSICS. (2-3)
An advanced seminar course on topics related to departmental research programs. Topics may include astrophysics, atomic physics, condensed matter physics, nuclear physics and particle physics. May be repeated to a maximum of nine hours. Prereq: Consent of instructor.

PHY 605 GRAVITY. (3)
An introduction to the general theory of relativity, covering tensor analysis, Einstein’s equations, experimental tests, black holes, and cosmology. Prereq: PHY 504 and PHY 417G, or permission of instructor.

PHY 611 ELECTROMAGNETIC THEORY I. (3)
A lecture and problem course treating electrostatics, boundary conditions, potential problems, energy in electric and magnetic fields, magnetic materials and Maxwell’s equations. Prereq: PHY 416G; MA 214.

PHY 613 ELECTROMAGNETIC THEORY II. (3)
Continuation and extension of PHY 611. Includes theory of electromagnetic waves and applications to optical phenomena and radiation. Special theory of relativity and the covariant treatment of Maxwell’s equations will be discussed. Prereq: PHY 611.

PHY 614 QUANTUM MECHANICS I. (3)
A lecture and problem course dealing with the description of quantum systems in the forms of wave mechanics, matrix mechanics and state vectors. Also includes angular momentum and its addition, and approximation methods for bound states. Prereq: PHY 520.

PHY 615 QUANTUM MECHANICS II. (3)
Continuation of PHY 614 covering time dependent perturbation theory, symmetry and invariance principles, and elementary scattering theory including the method of partial waves. Prereq: PHY 614.

PHY 616 QUANTUM FIELD THEORY I. (3)
An introduction to field theory and many-body theory. Topics include path integral quantization, second quantization, relativistic field theory of bosons and fermions, Green’s function and perturbation theory, field theories on the lattice, renormalization of scalar fields and applications to critical phenomena. Prereq: PHY 615, PHY 632.

PHY 624 CONDENSED MATTER THEORY. (3)

PHY 630 TOPICS IN NUCLEAR AND INTERMEDIATE ENERGY PHYSICS (Subtitle required). (3)
A course in nuclear physics, hadron physics and particle physics. Emphasis is placed on topics related to departmental research activities at Jefferson laboratory and elsewhere. Such topics include study of the structure and interactions of hadrons in terms of quarks and gluons. They also include low energy tests of Standard Model predictions. (PHY 630 may be repeated to a maximum of six hours when taken under different subtitles.) Prereq: PHY 629.

PHY 632 STATISTICAL MECHANICS. (3)
A lecture and problem course dealing with the thermal properties of matter from the standpoint of statistical mechanics. Topics include thermodynamic properties, perfect gases, and Fermi-Dirac statistics. Prereq: PHY 504, 520, 522.

PHY 639 PHYSICAL PROCESSES IN ASTROPHYSICS. (3)
A lecture and problem course covering the physical processes encountered in astrophysics. The topics covered will include micro-physical processes in stellar atmospheres and the interstellar medium, high-energy astrophysics, and basic hydrodynamics and shock waves. Prereq: PHY/AST 592 or consent of instructor. (Same as AST 639.)

PHY 716 QUANTUM FIELD THEORY II. (3)
A continuation of PHY 616. Topics include approximation methods in many body theory and applications to condensed matter and nuclear systems, quantum electrodynamics, radiative corrections, Higgs mechanism and applications to particle physics and superconductivity, introduction to non-Abelian gauge fields and the standard model. Prereq: PHY 616.

PHY 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PHY 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PHY 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.
PLS 332 HERBACEOUS HORTICULTURAL PLANTS I. (2)
The identification and cultural requirements of herbaceous plants. A designated number of
annuals, perennials, commercial cut flowers, flowering pot plants, bulbs, and foliage plants
readily available in the spring will be covered. Lecture, three hours; laboratory, two hours per
week for one half semester. Prereq: PLS 220.

PLS 352 NURSERY PRODUCTION. (3)
An introduction to the production practice of container and field grown nursery stock as they
relate to management and operation of a nursery business. A two to three-day field trip is
required. Lecture, two hours; laboratory, three hours per week. Prereq or concur: HOR 327
and PLS 465 or consent of instructor.

PLS 366 FUNDAMENTALS OF SOIL SCIENCE. (4)
Study of the physical, chemical and biological properties of soils and how these properties
relate to plant nutrient availability and plant growth, land-use planning and management issues,
and soil and water quality issues. Lecture, three hours; laboratory, three hours. Prereq: CHE 105.

PLS 386 PLANT PRODUCTION SYSTEMS. (4)
In-depth analysis of the underlying principles of plant production systems. Successful
strategies, based on application of the principles developed by lecture and laboratory activities,
will be discussed in either agronomic or horticultural contexts. Special attention will be given
in minimizing the environmental impact of the plant production techniques employed. Prereq:
PLS 210 and PLS 366 or concurrently or consent of instructor. (Same as SAG 386.)

#PLS 390 AGROECOLOGY. (3)
A general introduction to ecological principles and processes applied to agricultural ecosys-
tems, including interactions between plants, soils, and animals on population, community
and ecosystems scales. Course concepts will be applied to agricultural ecosystems that are of
economic importance and ecological significance to the state of Kentucky. Emphasis will be
placed on understanding how an ecological perspective can inform sustainable land manage-
ment, the ecological basis for best management practices, and the interdisciplinarity nature of
agroecosystem management. (Same as SAG 390.)

PLS 395 SPECIAL PROBLEMS IN PLANT AND SOIL SCIENCE. (1-4)
May be repeated for a maximum of nine credits. Prereq: Consent of appropriate instructor
before registration.

PLS 396 SOIL JUDGING. (1-2)
This course involves basic soil resource evaluation designed to provide the students with
essential field training needed to pursue careers as soil scientists, conservationists, planners,
agricultural chemical representatives and environmental assessors. It is also used to prepare
the UK soil judging team for regional college competition. May be repeated to a maximum of
five credit hours. Prereq: Consent of instructor.

PLS 399 EXPERIENTIAL LEARNING IN PLANT AND SOIL SCIENCE. (1-6)
A field-based learning experience in plant and soil science under the supervision of a faculty
member. May be repeated for a maximum of six credits. Pass/fail only. Prereq: Complete
learning contract before registration.

PLS 404 INTEGRATED WEED MANAGEMENT. (4)
A study of weed management concepts based on the integration of weed biology and ecology
data with cultural, biological, and herbicidal control. Lecture, three hours; laboratory, two
hours. Prereq: PLS 386.

PLS 406 ADVANCED SOIL JUDGING. (1)
A more advanced treatment of soil site evaluations under diverse climatic and physiographic
environments. Students will obtain expertise in assessing properties of contrasting soil types
and rating them for soil and management suitability. The course is also used for preparing
the UK soil judging team for national college competition. May be repeated to a maximum of
four credit hours. Prereq: PLS 396 and qualifying for national competition.

PLS 408 TOBACCO. (3)
History, botany, pathology, entomology, breeding, and culture of tobacco with special
emphasis on burley. Prereq: PLS 386 or consent of instructor.

PLS 440 PLANT PROPAGATION. (3)
A study of the principles and practices involved in producing plants by sexual and asexual
methods and to provide the basic skills necessary for using these methods. The interrelationship
of plant growth, structure and the environment as they affect the ability to propagate plants
by a specific method. Lecture: two hours; laboratory: three hours per week. Prereq: CHE 105,
PLS 386.

PLS 450 BIOGEOCHEMISTRY. (3)
A lecture and lab course emphasizing the role of microbial processes on elemental and pollutant
cycling in terrestrial soils and aquatic sediments. Soils and sediments from different ecosystems
are evaluated for microbial community composition and biogeochemical cycling of organic and
inorganic nutrients and pollutants using advanced molecular and laboratory techniques. Several
all day field trips and laboratory exercises required. Limited to eight students at the senior or
higher level standing. Lecture: CHE 105, 107, 111, 113. (Same as NRE 450.)

PLS 451 LANDSCAPE MANAGEMENT AND ARBORICULTURE. (3)
Discussion of the protection, training, repair, and care of plant material in landscape
plantings as well as the diagnosis of plant-related problems and the management principles of
landscape maintenance. Lecture, two hours; laboratory, three hours per week. Prereq: PLS 210,
PLS 386.

PLS 455G WETLAND DELINEATION. (3)
Basic concepts of natural wetland ecosystems, their importance, functions, and major features
related to their identification and classification. Application of basic hydrology, hydrophytic
vegetation and hydric soil indicators for identification of jurisdictional wetlands utilizing
documentation and analysis of field collected data. Three laboratory exercises and four short
field trips required. Prereq: PLS 366 or consent of instructor. (Same as NRE 455G.)

PLS 456G CONSTRUCTED WETLANDS. (3)
Important aspects of the functions of natural and constructed wetlands as water purifiers.
Principles and mechanisms of the purification process, design, construction, operation and
management criteria for efficient usage. Case studies and design problems of constructed
wetlands on mining, agricultural, industrial and municipal wastewater treatment applications.
Two all day field trips are required. Prereq: PLS 366 or consent of instructor. (Same as NRE 456G.)

PLS 465 GREENHOUSES AND CONTROLLED ENVIRONMENTS. (3)
A study of greenhouse structures, coverings, equipment, and the monitoring and regulation of
the environment including temperature, light, carbon dioxide, and relative humidity as these
factors relate to the commercial production of greenhouse crops. Other types of controlled
environments are also included. Lecture, two hours; laboratory, two hours per week. Prereq:
PLS 386.

PLS 468G SOIL USE AND MANAGEMENT. (3)
The application of principles related to soils and their management in planning the utilization
of land and associated resources. Lecture and discussion. Prereq: PLS 366 or consent of
instructor.

PLS 470G SOIL NUTRIENT MANAGEMENT. (3)
Soil reaction/cycling of elements essential for plant growth; rates, timing and placement
of nutrient sources in modern crop/soil management systems; plant and soil sampling and analysis
to diagnose plant nutrient stress. Prereq: CHE 105, PLS 366 and PLS 386 or consent of
instructor. (Same as NRE 470G.)

PLS 477G LAND TREATMENT OF WASTE. (3)
Resource management with emphasis on principles and methods of soil application of wastes
(agricultural, industrial, and municipal). Topics include chemical and biological systems; soil
and plant management; development, monitoring, and recordkeeping. Prereq: PLS 366. (Same
as NRE 477G.)

PLS 490 TOPICS IN PLANT AND SOIL SCIENCE. (3)
The capstone course for majors in Plant and Soil Science to be taken near the conclusion of
the student’s academic career. The course provides the student the opportunity to integrate
knowledge acquired in previous courses in the plant and soil science and support areas.
Emphasis will be placed on problem solving, synthesizing and integrating information, critical
thinking, group activities, and written and oral communication. Instructional methods may
include formal lectures, laboratories or supervised individual research. The specific nature of
the course depends upon the student’s Area of Emphasis within the Plant and Soil Science
major. All topics offered will be approved by the Undergraduate Education Committee in the

#PLS 501 RECLAMATION OF DISTURBED LAND. (3)
Study of the physical environment (radiation, temperature, precipitation, and evapotranspi-
ration) in which crops are grown and the effect of the environment on crop growth and yield.
Both micro- and macro-climatic relationships are considered.

PLS 510 FORAGE MANAGEMENT AND UTILIZATION. (3)
Critical study of grassland plants and the biological and physical factors operative in utilization
of natural and cultivated grasslands by domestic animals. Lecture, three hours. Prereq: PLS 386,
or consent of instructor.

*PLS 512 GRAINS AND OILSEEDS. (3)
Management and production of major grains and oilseeds in Kentucky. Prereq: PLS 366, PLS
386, or similar courses; senior or graduate student.

PLS 514 GRASS TAXONOMY AND IDENTIFICATION. (3)
Overview of the grass family, concentrating on taxonomic issues and identification skills for
~200 species (turf, forages, weeds, etc.). Lecture: two hours; laboratory: two hours per week.
Prereq: PLS 220 or permission from instructor.

PLS 515 TURF MANAGEMENT. (3)
A study of the selection, culture, and management of certain turf species used for home lawns,
golf courses, athletic fields, and highway slopes. Lecture, two hours; laboratory, two hours.
Prereq: PLS 210 and PLS 366.

PLS 520 FRUIT AND VEGETABLE PRODUCTION. (4)
Commercial production practices for major fruits and vegetables. Prereq: PLS 386.

PLS 525 GREENHOUSE FLORAL CROP MANAGEMENT. (3)
The study of methods of control of flowering and growth of selected flowering pot plants, cut
flowers and bedding plants produced commercially in greenhouses. Lecture, two hours;
laboratory, two hours. Prereq: PLS 440 and PLS 465.
PLS 531 FIELD SCHOOLS IN CROP PEST MANAGEMENT. (2)
A course for the Plant Pest Management option in Plant and Soil science to reinforce the concepts of pest management learned in previous courses. Emphasis will be placed on integrating information to develop pest management strategies. Instructional methods will include formal lectures and laboratories in the field. Prereq: ENT 300 or ENT 310 or ENT 320; PLS 404 and PPA 400G; or consent of instructor.

PLS 556 SEED PRODUCTION AND TECHNOLOGY. (3)
A study of seeds of improved cultivars as a delivery system for plant genetics. Principles of seed production, harvesting and conditioning for agronomic and horticultural crops within and outside of the region of adaptation. Seed multiplication systems, seed testing and the laws and regulations related to marketing high quality seed. Lecture, two hours; laboratory, four hours for 12 weeks. Prereq: PLS 386 or consent of instructor.

PLS 557 SEED VIGOR. (2)
Study of the concept of seed vigor, methods for seed vigor testing, and the relationship of seed vigor to seedling emergence and crop performance. Prereq: An introductory crop production or basic botany course.

PLS 566 SOIL MICROBIOLOGY. (3)
The nature and biochemical activities of soil microflora; their significance in soil genesis and structure and their role in soil fertility. Prereq: PLS 366 or an introductory microbiology course or consent of instructor.

PLS 567 METHODS IN SOIL MICROBIOLOGY. (1)
Methods in Soil Microbiology will be a laboratory course dedicated to introducing upper division students to the methods and techniques used by microbiologists and other soil scientists to examine organisms, interactions, and processes in soils systems. Laboratory, three hours per week. Prereq: PLS 366 or introductory microbiology course.

PLS 573 SOIL MORPHOLOGY AND CLASSIFICATION. (3)
Study of concepts of soil horizons, soil profiles and soilscape; morphological, physical, chemical and mineralogical parameters useful in their characterization. Soil forming factors and processes. Basic principles of soil classification. Characterization of selected Kentucky soils and their placement in the modern system; practical field problems in soil identification, characterization and classification. Lecture, two hours; laboratory, three hours per week. Prereq: PLS 366 and PLS 367 or consent of instructor.

PLS 575 SOIL PHYSICS. (3)
This course deals with the state and movement of matter, and with the fluxes and transformations of energy, in soil systems. Its objectives are to develop a basic theoretical understanding of soil physical properties and processes (with emphasis on the statics and dynamics of soil water), and to demonstrate how this understanding can be applied under field conditions to make sound management decisions concerning both agricultural and non-agricultural uses of soils. Prereq: MA 113 or MA 123, PHY 201 or PHY 211, PLS 366 or consent of instructor.

PLS 576 LABORATORY IN SOIL PHYSICS. (1)
This course consists of laboratory and field exercises designed to increase understanding of important soil physical properties and processes. Its objectives are to develop familiarity with standard methods of measuring soil physical parameters, and to instill scientific methods of data collection, analysis and interpretation. Prereq: PLS 367, concurrent enrollment in PLS 575, or consent of instructor.

PLS 581 CHEMICAL ANALYSIS OF SOILS AND PLANTS. (6)
Laboratory emphasis on instrumental methods and techniques used in quantitative and qualitative chemical analysis of soil and plant materials and relation of these analyses to physical, chemical and biological systems. Lecture, one hour; discussion, one hour; laboratory, four hours. Prereq: PLS 366 or equivalent, or consent of instructor.

PLS 597 SPECIAL TOPICS IN PLANT AND SOIL SCIENCE
(Subtitle required). (1-3)
Special topical or experimental courses in crop science, soil science or related areas of horticulture, or plant physiology for graduate and advanced undergraduate students. Special subtitle required and must be approved by the chair of Agronomy or Horticulture. A particular subtitle may be offered twice under PLS 597. Students may not repeat under the same subtitle. Prereq: Permission of instructor.

PLS 599 SPECIAL PROBLEMS IN PLANT AND SOIL SCIENCE. (1-4)
May be repeated for a maximum of nine credits. Prereq: Consent of instructor.

PLS 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BCH/BIO/MI/PPA 601.)

PLS 602 PRINCIPLES OF YIELD PHYSIOLOGY. (3)
Critical study of the physiological factors and processes involved in determining economic yield in grain crops. The focus will be on factors operating at the whole plant and plant community level as opposed to physiological processes at the cellular or subcellular level. A logical, analytical description of the process of economic yield production by grain crops will be developed and related to historical changes in crop yields and the potential for increasing yields in the future. Prereq: PLS 386 and BIO 430G or consent of instructor.

PLS 605 PHYSIOLOGICAL MECHANISMS INHORTICULTURAL PLANTS. (3)
A critical evaluation of the recent concepts in certain selected areas of horticulture science. Prereq: BIO 430G.

PLS 609 PLANT BIOCHEMISTRY. (3)
The course will consider the chemical constituents of plants (with emphasis on biochemically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or consent of instructor. (Same as BCH/PAA 609.)

PLS 615 ADVANCED PLANT GENETICS AND GENOMICS. (3)
Genomics is reshaping the life sciences, providing high-throughput tools to decipher function of individual genes and to characterize their regulation and interactions. This course will introduce graduate students to most recent advances in the area of plant genetics and genomics. The topics will include structural and functional analysis of plant genomes, genome evolution, identification of genomics tools to crop improvement, and basic concepts of bioinformatics. Prereq: Introductory courses in genetics and biochemistry.

PLS 620 PLANT MOLECULAR BIOLOGY. (3)
This course is intended to be a treatment of current concepts of plant molecular biology. It will be a literature-based course, supplemented by handouts and reading lists. The course will deal as much as is possible with topics that are unique to plants. Current aspects of molecular biology that are relevant to the course content will be covered in the first part of the course; however, the lectures will not be a review of topics that should have been retained from introductory genetics and biochemistry courses. Also, they will not be a substitute for a molecular biology course. Prereq: One semester of undergraduate genetics and biochemistry or consent of instructor. (Same as BIO 620.)

PLS 622 PHYSIOLOGY OF PLANTS I. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant-cell biology, ion transport, water and translocation, respiration and photosynthesis. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 607. (Same as BIO/FOR 622.)

PLS 623 PHYSIOLOGY OF PLANTS II. (3)
A physiological/biochemical treatment of central topics in modern plant physiology. Topics will include: plant hormones, an introduction to plant biotechnology, senescence and abscission, stress physiology, phytochrome-photomorphogenesis-phototropism nitrogen and sulfur metabolism. Prereq: BIO 430G or equivalent or consent of coordinator. Prereq or concur: BCH 6107. (Same as BIO/FOR 623.)

PLS 640 IDENTIFICATION OF PLANT DISEASES. (3)
Recognition and identification of plant diseases and their causes and development. The course is designed to give students practical experience in dealing with a wide array of plant diseases, symptom expressions, causal agents and interactions with environmental factors encountered in the difficult task of identifying plant diseases. May be repeated to a maximum of nine credits. Lecture, one hour; laboratory, six hours. Prereq: PPA 400G or equivalent or consent of instructor. (Same as PPA 640.)

PLS 642 BIOSYNTHESIS OF NATURAL PRODUCTS. (3)
An overview of the biochemical pathways leading to compounds called natural products/secondary metabolites. Prereq: Two semesters of organic chemistry. (Same as BCH/PHR 620.)

PLS 650 SOIL-PLANT RELATIONSHIPS. (3)
An advanced course on the relationships between media and the root systems of plants growing therein. Prereq: PLS 366, BIO 430G (or equivalent), or consent of instructor. (Same as BCH/PHR 620.)

PLS 655 SPATIAL AND TEMPORAL STATISTICS. (3)
Opportunities for spatial and temporal monitoring strategies, the diagnosis and analysis of spatial and temporal agricultural and ecosystem processes are taught. Methodology is based on Statistical Time Series Analysis and Geostatistics. Prereq: STA 570 or other prerequisite in agreement with the instructor.

PLS 657 SEED BIOLOGY. (3)
Structure, development and function during plant reproductive development and seed ontogeny, including fertilization, embryogeny and endosperm development, seed formation, maturation, germination, dormancy and deterioration. Prereq: ABT 366, BIO 430G or consent of instructor.

PLS 660 ADVANCED SOIL BIOLOGY. (2)
A critical evaluation of the current research status in selected aspects of soil biology. Prereq: PLS 566 or consent of instructor.

PLS 664 PLANT BREEDING I. (3)
The application of advanced genetic principles to plant improvement. An in-depth study of existing plant breeding procedures and their applications and consideration of new techniques that can be applied to plant breeding and crop improvement. Prereq: STA 570 or consent of instructor.

Course Descriptions
PLS 671 SOIL CHEMISTRY. (4)
A study of the chemical characteristics of the soil and of the more important chemical processes in the soil. Lecture and discussion, three hours; laboratory, two hours. Prereq: PLS 470G, 581; CHE 442G, or consent of instructor.

PLS 676 QUANTITATIVE INHERITANCE IN PLANT POPULATIONS. (3)
After a brief review of population genetics theory, the course is divided into two sections which cover methods of estimating genetic variances and selection methods in population improvement. The course will focus on handling and interpretation of actual data sets through data analysis and discussion of current literature. Prereq: STA 570, STA 671, and STA 672. (Same as STA 676.)

PLS 697 SPECIAL TOPICS IN PLANT AND SOIL SCIENCE (Subtitle required). (1-3)
Special topic or experimental course in cross science, horticulture, plant physiology or soil science for advanced graduate students. Special title required and must be approved by the chairpersons of the Departments of Agronomy and Horticulture. A particular title may be offered twice, at most, under PLS 697. Students may not repeat under the same title. May be repeated to a maximum of six hours. Prereq: Consent of appropriate instructor before registering.

PLS 712 ADVANCED SOIL FERTILITY. (4)
An integration of the effects of soil, climate, species and management on the nutrition and dry matter accumulation of plants. Lecture, three hours; laboratory, two hours per week. Prereq: PLS 470G or PLS 650 or consent of instructor.

PLS 741 ENVIRONMENTAL CLAY MINERALOGY. (3)
A comprehensive study of the crystal structures of clay minerals commonly found in soils and sediments. Lecture and discussion, two hours; laboratory, three hours. Prereq: GYL 360 or consent of instructor. (Same as EOS 741.)

PLS 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PLS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of qualifying exams.

PLS 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PLS 768 RESIDENCE CREDIT FOR MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PLS 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

PLS 772 SEMINAR IN PLANT AND SOIL SCIENCE (Subtitle required). (1)
Reports and discussion of problems and research in crops, soils, horticultural science and plant physiology. May be repeated three times for a maximum of four credits.

PLS 799 RESEARCH IN PLANT AND SOIL SCIENCE. (1-4)
May be repeated for a maximum of 12 credits. Prereq: Consent of instructor.

PM 602 OCCUPATIONAL AND ENVIRONMENTAL HEALTH. (4)
A continuation of topics in PM 601. Lecture, three hours; laboratory, two hours per week. Prereq: PM 601 or consent of instructor.

PM 621 ADVANCED EPIDEMIOLOGY. (3)
This course provides specialized epidemiologic content and method designed to meet the research and practice needs of health professionals. Practice-based problem sets and hands-on computer assignments will complement this seminar-oriented course, focusing on the role of epidemiology in the prevention of disease and injury. Prereq: SPH 605 or consent of instructor. (Same as SPH 611.)

PM 661 INDUSTRIAL HYGIENE SAMPLING. (3)
This course, using lectures and laboratory exercises, will cover sampling and analysis techniques for industrial hygiene assessment and monitoring. The laboratory experiments are intended to simulate typical industrial hygiene measurement situations and to provide a basis for selection of sampling techniques and critical evaluation of laboratory results. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of the instructor.

PM 663P PRACTICUM IN ADVANCED INDUSTRIAL HYGIENE. (1-3)
In this individual tutorial/internship course, the student will apply sampling and workplace health survey techniques to real-world problems. Evaluations of ventilation and engineering controls will be conducted and discussed, and special techniques for the evaluation of personal protective equipment and documentation of dermal exposures will be utilized. May be repeated to a maximum of six credits. Prereq: Completion of PM 601, 602, and 661.

PM 670 CLINICAL EPIDEMIOLOGY. (3)
The student will learn the fundamentals of designing clinical research studies of diagnostic tests, prognosis, and causation. Students will practice these skills through focused critiques of the medical literature and by designing clinical research studies. Prereq: PM 521 or consent of instructor. STA 570 or equivalent is recommended.

PM 675 RESEARCH DESIGN IN PUBLIC HEALTH. (4)
The techniques, strategies, and issues of conducting scientific investigations within the domain of public health and preventive medicine. Numerical theoretical and methodological approaches to public health problems will be addressed in a chronological manner that matches the sections of a peer-reviewed journal article, e.g., background, methods, results, and discussion. Prereq: PM 521 and STA 570 and/or permission of instructor.

PM 770 SEMINAR IN PREVENTIVE MEDICINE AND PUBLIC HEALTH. (1-3)
A special seminar focusing each semester on an important topic, such as health problems of special working groups, cancer control, and health policy issues. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PM 780 SPECIAL PROBLEMS IN PREVENTIVE MEDICINE AND PUBLIC HEALTH. (1-3)
Organized study or tutorial focused on special problems or issues. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PM 815 FIRST-YEAR ELECTIVE, PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Preventive Medicine and Environmental Health. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

PM 825 SECOND-YEAR ELECTIVE, PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Preventive Medicine and Environmental Health. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

PM 841 PREVENTIVE MEDICINE CLERKSHIP SELECTIVE. (1-6)
The medical student working singly or in small groups will, with Preventive Medicine faculty assistance, identify a question in the broadest sense in “medicine” which can best be answered by a population-based study. This could include comparison of therapeutic techniques, status of knowledge by health provider or consumer about certain conditions or costs of care, problems of organizing health services, ethical problems, or any other population-based question amenable to study. Building on the second year experience, the project will involve identification of a question, design and conduct of the study, appropriate analysis of data, and a written and oral presentation. Prereq: Admission to College of Medicine.

PM 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
PM 850 PREVENTIVE MEDICINE OFF-SITE ELECTIVE
PM 852 RESEARCH IN PREVENTIVE MEDICINE AND ENVIRONMENTAL HEALTH

PAA 395 INDEPENDENT STUDY IN PLANT PATHOLOGY. (1-4)
Independent study under the supervision of a faculty member. Prereq: Consent of appropriate instructor.

PAA 400G PRINCIPLES OF PLANT PATHOLOGY. (3)
To present students with the principles of plant pathology. The causes, effects, control and nature of plant diseases will be studied; the laboratory will expose students to common diseases and pathogens discussed in lecture. Emphasis will be given to diseases important in Kentucky. Lecture, two hours; laboratory, two hours. Prereq: One semester of botany (e.g., BIO 335) and microbiology (e.g., BIO 108/109) or consent of instructor.
PPA 500 PHYSIOLOGY OF PLANT HEALTH AND DISEASE. (3)
First-semester graduate students and upper class undergraduates will gain a basic understanding of physiology, structure and development of plants and their associated fungi, viruses, bacteria and nematodes, and to appreciate how interactions with symbionts and pathogens influence plant health and disease. Prereq: PPA 400G (can be concurrent).

PPA 600 CRITICAL METHODS IN PLANT-MICROBE INTERACTIONS. (2)
The course will provide instruction on experimental methods commonly used in Plant-Microbe Interaction and will train students in critical thinking, grant writing, scientific ethics and seminar presentation. Prereq: PPA 500.

PPA 601 SPECIAL TOPICS IN MOLECULAR AND CELLULAR GENETICS. (1)
Each semester five distinguished scientists visit the UK campus to deliver a series of three formal lectures each and participate in numerous informal contacts with graduate students. The emphasis is on the presentation of the most current advances (often unpublished) in selected topics in molecular and cellular genetics. May be repeated to a maximum of six credits. (Same as BIO/BCH/MI/PLS 601.)

PPA 609 PLANT BIOCHEMISTRY. (3)
The course will consider the chemical constituents of plants (with emphasis on biologically or nutritionally significant compounds unique to plants), their biosynthesis, contribution to key metabolic and defense processes and the regulation of their synthesis. Included will be discussions of photosynthesis, carbohydrates, lipids, isoprenoids and phenylpropanoids, nitrogen fixation, nitrogen and sulfur reduction and assimilation, alkaloids and additional secondary compounds, frontiers in plant biochemistry. Prereq: BCH 607 or equivalent or consent of instructor. (Same as BCH/L 609.)

PPA 640 IDENTIFICATION OF PLANT DISEASES. (3)
Recognition and identification of plant diseases and their causes and development. The course is designed to give students practical experience in dealing with a wide array of plant diseases, symptoms, expressions, causal agents and interactions with environmental factors encountered in the difficult task of identifying plant diseases. May be repeated to a maximum of nine credits. Lecture, one hour; laboratory, six hours. Prereq: PPA 400G or equivalent or consent of instructor. (Same as PLS 640.)

PPA 641 PLANT DISEASE, POPULATION BIOLOGY, AND BIOTECHNOLOGY. (1)
To understand implications of deployment of biotechnology and other disease management practices at the level of host and pathogen populations. Prereq: PPA 400G.

PPA 650 FUNGAL BIOLOGY. (3)
The Fungal Biology course introduces basic mycological concepts, including systematics, anatomy, cell biology, metabolism, developmental biology, ecology, population genetics, and reproduction. There is a focus on modern molecular approaches to these concepts. Students will also learn about the use of fungi in research and biotechnology. Prereq: Undergraduate courses in biology, genetics, and chemistry.

PPA 670 PLANT BACTERIOLOGY. (1)
Bacterial mechanisms underlying pathogenesis and virulence in interactions causing plant disease, and symbiotic compatibility in mutualisms. Prereq: PPA 400G, PPA 500, PPA 660, PPA 640 can be concurrent.

PPA 671 ADVANCED PLANT VIROLOGY. (2)

PPA 673 ADVANCED PLANT DISEASE RESISTANCE. (1)
Bacterial mechanisms underlying pathogenesis and virulence in interactions causing plant disease, and symbiotic compatibility in mutualisms. Prereq: PPA 400G, PPA 500, PPA 660.

PPA 700 PLANT PATHOLOGY LABORATORY VISITS. (1-3)
Semester-long rotations in Plant Pathology laboratories other than the students’ “home lab.” An opportunity will be provided to apply new approaches that are utilized in those labs to the students’ research problems. May be repeated to a maximum of six credit hours.

PPA 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PPA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two to five full-time semesters of 748 residency credit following the successful completion of the qualifying exams.

PPA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PPA 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PPA 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely.
Course Descriptions

PPS704 PHARMACY INFORMATICS. (2-3) This course explores the theory and methods of measuring the performance and quality of pharmaceutical health outcomes emphasizing evidence-based practice and quality improvement approaches. Particularly, the course focuses on the use of data and information systems to measure quality, performance, and outcomes. Topics covered include designing and testing outcome based measures, measuring and evaluating satisfaction, measuring and evaluating treatment, risk adjustment, survey methods, patient records, encounter data, administrative data, claims data, and an assessment of the current outcome based standard National Committee on Quality Assurance, HEDIS 2009. Prereq: Graduate standing and permission of instructor.

PPS706 INTERMEDIATE PHARMACOECONOMICS AND DECISION ANALYSIS. (3) This course is designed to equip students with a working knowledge and understanding of the application of pharmacoeconomic analysis with an emphasis on critical review of the literature. Prereq: Graduate standing and permission of instructor.

PPS750 PHARMACEUTICAL OUTCOMES AND POLICY JOURNAL CLUB. (1) Pharmaceutical Outcomes and Policy journal club is a weekly meeting scheduled for scholarly discussion and presentation of journal articles and relevant topics (new methodologies, current pharmaceutical policy drugs issues, etc.) pertaining to the fields of pharmaceutical policy and pharmaceutical outcomes.

PPS760 SPECIAL TOPICS IN PHARMACY PRACTICE AND SCIENCE. (1-4) This course deals with emerging concepts in Pharmacy Practice and Science which are not covered in other courses. May be repeated under a different subtitle to a maximum of twelve credits. Prereq: Graduate standing and permission of instructor.

PPS764 DRUG DEVELOPMENT REGULATION AND CLINICAL RESEARCH. (3) A study of the pharmaceutical development process and its regulation, including a detailed examination of clinical research methodologies. Students will demonstrate their competence by developing a clinical trial protocol. Prereq: Enrollment in the Pharmaceutical Sciences graduate program or consent of instructor.

PPS767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PPS778 SEMINARS IN PHARMACY PRACTICE AND SCIENCE. (1) Reports and discussion of pertinent research and literature in pharmaceutical outcomes and policy. Required of all graduate students. Prereq: Graduate standing and permission of instructor.

PPS790 RESEARCH IN PHARMACY PRACTICE AND SCIENCE—PREQUAL. (1-12) Research work to be conducted in selected areas of pharmacy practice and science. Prereq: Graduate standing and permission of instructor.

PPS811 COMPUTER APPLICATIONS IN PHARMACY. (2) A guide to the selection and use of computers in pharmaceutical practice. Descriptions of functions, cost-benefit considerations, hardware and software, capabilities of various systems, language, applications to patient profiles, inventory control and accounts are considered.

PPS813 GERIATRIC PHARMACY. (3) A course designed to educate students in the basic knowledge of attitudes and skills required to meet the pharmaceutical needs of the elderly. Topics include discussions of the aging process, physiological and psychological changes in the elderly, how these changes influence patient compliance, and the responses to drug and nondrug treatments, monitoring drug use in long-term care facilities, and special community services available to the elderly. Prereq: PPR 849, 852, 853, 854 and 856 or permission of instructor. (Same as GPN 513.)

PPS832 ADVANCED COMMUNITY PRACTICE MANAGEMENT. (2) A study of the principles and methods unique to the management of a community pharmacy, building on previous foundations and focusing on the entrepreneurial aspects of management. Prereq: PPR 831 and consent of instructor.

PPS833 ADVANCED INSTITUTIONAL PRACTICE MANAGEMENT. (2) Application of management principles to institutional and group practices. Emphasis is on the acquisition, distribution and control of drugs by pharmacists in the institutional practice settings and the justification, establishment and evaluation of clinical pharmacy services. Prereq: PPR 831, PPS 848.

PPS895 INDEPENDENT PROBLEMS IN CLINICAL PHARMACY. (1-3) Selected problems in patient care, drug information, pharmacy administration, and pharmaceutical technology as related to pharmaceutical services. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PPS896 INDEPENDENT PROBLEMS IN PHARMACY. (1-3) Selected problems pertaining to the various aspects of pharmacy which may include such problems as pharmacological procedures, pharmaceutical formulations, pharmaceutical history, and pharmaceutical economics. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PPS910 INTRODUCTION TO PHARMACY PRACTICE. (3) An introduction to the practice of pharmacy within the major practice settings. Includes an introduction to the profession and discussions of the pharmacist within the health care system, professional pharmacy organizations, models and sites of practice, postgraduate educational and career opportunities, an introduction to product compounding and administration, professional pharmacy organizations, and required community service experiences. Prereq: Admission to the first year, College of Pharmacy.

PPS913 PHARMACOLOGICAL BASIS OF THERAPEUTICS: ANTIBIOTICS. (3) A study of the pathophysiology and microbiology of infectious diseases concentrating on the pharmacology of the therapeutic agents (antibiotics) used to treat those diseases, including discussions of their rational use. Variable mixture of lectures, discussions and independent study. Prereq: Admission to the first year, College of Pharmacy.

PPS919 PATIENT CARE LABORATORYI. (1) An introductory practice experience designed to provide students a structured, supervised program of participation in the practice of pharmacy. Experiences may involve on-call and evening/weekend responsibilities. Offered on a pass/fail basis only. Laboratory, 40 or more hours per week. Prereq: Successful completion of required courses in the 920 series and consent of instructor.

PPS920 COMMUNICATION AND BEHAVIOR IN PHARMACY PRACTICE. (3) An introduction to the social and behavioral issues that impact health including their influence on the pharmacist-patient relationship and the ability of the pharmacist to provide patient care. Includes discussions of stress and stress coping, communication with patients and other health care professionals, cultural and religious influences on patient compliance and disease management, and required community service experiences. Prereq: PPS 910 and PPS 919.

PPS923 PHARMACOLOGICAL BASIS FOR THERAPEUTICS: NUTRITION, HEALTH PROMOTIONS. (3) Consideration of the role of the pharmacist in health promotion and disease prevention including both pharmacologic and non-pharmacologic methods. Major problems of nutrition and certain metabolic/chronic disorders for which nutrition plays a pivotal role will be addressed including hyper tension, cancer, and eating disorders. In addition the pharmacology of drugs affecting the gastrointestinal tract and drugs used to treat common gastrointestinal problems are discussed. Variable mixture of lecture, group discussion and independent study. Prereq: Admission to the first year, College of Pharmacy.

PPS925 PATIENT CARE LABORATORYII. (2) A continuation of PPS 919. Variable mixture of lecture, group discussions and independent study. Prereq: Admission to the first year, College of Pharmacy and PPS 916.

PPS928 INTRODUCTORY PHARMACY PRACTICE EXPERIENCEI. (4) An introductory practice experience designed to provide students a structured, supervised program of participation in the practice of pharmacy. Experiences may involve on-call and evening/weekend responsibilities. Offered on a pass/fail basis only. Laboratory, 40 or more hours per week. Prereq: Successful completion of required courses in the 920 series and consent of instructor.

PPS930 LEGAL, ETHICAL, AND ACCESS ISSUES IN PHARMACY. (4) The legal, ethical and access issues affecting the practice of pharmacy. Course includes community service experiences. Prereq: PPS 920.

PPS939 PATIENT CARE LABORATORYIII. (2) A continuation of PPS 929. Prereq: PPS 929. Coreq: All concurrent PHR 93X series courses.

PPS940 EVIDENCE BASE FOR PHARMACY PRACTICE. (4) A discussion of the evidence base for pharmacy practice including sources of drug information, drug study design, applied data analysis, and biostatistics in the interpretation and critical analysis of biomedical literature with the purpose of developing evidence based care recommendations for a given patient or patient population. The course is implemented using a variety of educational methods including lectures, structured reading of biomedical literature, and practice in developing protocols to address various health-related research questions. Course includes community service experiences. Prereq: PPS 930.

University of Kentucky 2013-2014 Undergraduate Bulletin
Course Descriptions

**PPS946 ADVANCED PHARMACOTHERAPY I.**
An advanced study of the pathology, pathophysiology and optimal treatment of common diseases. Through a series of case studies students will acquire and/or reinforce their skill at understanding diseases and developing and defending optimal treatment plans for successfully managing those diseases. The case studies utilized will integrate relevant pathophysiological, pharmacokinetic, pharmacoeconomic and pharmacological concepts with appropriate patient specific parameters. Students will be expected to communicate and defend their decisions, including the process followed in making those decisions, in understandable, appropriate written and verbal formats. Variable mixture of discussion, lecture, independent study and laboratory. Prereq: PHR 9X3 series courses; coreq: PHS 947 and PPS 949.

**PPS948 INTRODUCTORY PHARMACY PRACTICE EXPERIENCE.**
A continuation of PPS 928 – Introductory Pharmacy Practice Experience I. Prereq: Successful completion of required PHR 940 series courses and consent of instructor.

**PPS949 PATIENT CARE LABORATORY IV.**

**PPS500 PHARMACEUTICAL POLICY AND PUBLIC HEALTH.**
An introduction to policy and resource issues that affect the professional practice of pharmacy. Prerequisite: PPS 950.

**PPS953 CURRENT TOPICS IN PHARMACY SEMINAR.**
A seminar course dealing with some of the current clinical and nonclinical issues affecting health care and health care practitioners. Prereq: PPS 940.

**PPS957 ADVANCED PHARMACOTHERAPY II.**
A continuation of PPS 946. Variable mixture of discussion, lecture, independent study and laboratory. Taught part of term. Prereq: Admission to third year, College of Pharmacy; co-req: PPS 959.

**PPS959 PATIENT CARE LABORATORY V.**

**PPS600 PHARMACY PRACTICE MANAGEMENT.**
A discussion of pharmacy practice management in both community and health system practice settings including general business, human, financial, and operations management, and quality assurance risk management issues. Course includes community service experiences. Prereq: PPS 950.

**PPS966 ADVANCED PHARMACOTHERAPY III.**
A continuation of PPS 957. Variable mixture of discussion, lecture and independent study. Taught part of term. Prereq: Admission to the third year, College of Pharmacy; PPS 957, 959; co-req: PPS 969.

**PPS967 ADVANCED PHARMACOTHERAPY IV.**
A continuation of PPS 966. Variable mixture of discussion, lecture and independent study. Taught part of term. Prereq: Admission to third year College of Pharmacy; PPS 957, 959; co-req: PPS 969.

**PPS969 PATIENT CARE LABORATORY VI.**

**#PPS971 INTRODUCTION TO ANTICOAGULATION.**
The intent of this eight week, two credit hour, elective course is to provide students with a working knowledge of basic anticoagulation concepts sufficient to enhance their participation in anticoagulation services during fourth year advanced pharmacy practice experiences and in practice as a pharmacist. Students should expect to spend approximately four hours per week on class related activities. Prereq: Students must be enrolled for the summer session and have satisfactorily completed all requirements of the PY2 year. Students will be expected to employ knowledge and understanding of material from all previous and concurrent courses in the College of Pharmacy curriculum.

**PPS972 INTRODUCTION TO THE ADVANCED PHARMACOTHERAPY GATEWAY AND PHARMACY RESIDENCY TRAINING.**
This course introduces students to the concepts of the pharmacist’s involvement in research, education, post-graduate training, and to local sites of scholarly pharmacy practice. The course will provide information and tools for pursuing post-graduate training, including a curriculum vitae and foundational education on human subject protection and residency training. Prereq: Successful completion of the Preceptor Experience course.

**PPS973 INTRODUCTION TO CRITICAL CARE PHARMACY.**
An advanced, clinically-focused course building on critical care foundation provided in PHR 956/PPS 957. Prereq: Successful completion of PHR 956/PPS 957.

**PPS974 CLINICAL ASPECTS OF PRESCRIPTION MEDICATIONS.**
A discussion of the clinical aspects of prescription medications designed to supplement, integrate and enhance the material covered in the Patient Care Laboratory course series (PHR 919-969) and the Advanced Pharmacotherapy course sequence (PPS 946, PHR 956, PPS 957, PPS 966 and PPS 967). Emphasis is placed on 1) a critical analysis of the important difference between various drugs and drug classes, and 2) refining drug information and clinical communication skills through simulated written and oral case presentations. Prereq: PHR 956 and PPS 957. Coreq: PPS 960, 966, 967 and 969.

**PPS975 EMERGENCY MEDICINE.**
Emergency Medicine is an evolving and increasingly recognized practice area for clinical pharmacists. As interest and professional opportunities continue to expand in this therapeutic area, it imperative for students to become cognizant of the various aspects of this unique specialty. In addition, the practice of Emergency Medicine is a collection of various therapeutic areas, so this course will not only serve to expose the learner to many exciting topics but also serve as a refresher of many topics that are briefly covered in the regular curriculum with an added emphasis on the rapid treatment of the undifferentiated patient. Prereq: PY 3.

**PPS976 COMPUTER AND INFORMATION TECHNOLOGIES IN PHARMACY.**
A discussion and introduction to the use of computer and other information technologies, such as Personal Data Assistants (PDAs) and patient management software, as aids to providing more effective and efficient pharmaceutical care services. Lecture: 1 hour; laboratory, 2 hours per week. Prereq: Admission to the second or third year, College of Pharmacy.

**#PPS977 HERBS AND DIETARY SUPPLEMENTS.**
This Blackboard-based elective focuses on herbs and dietary supplements used for common conditions. The evidence-based course includes readings and week-long projects and sets of discussion questions. The course prepares pharmacy students to assist patients in the appropriate use of these products. Prereq: Admission to IPPE I, College of Pharmacy.

**#PPS78 PEDIATRIC PHARMACOTHERAPY.**
This course explores additional information relating to pediatric drug therapy and factors that build on the existing knowledge base of the student, to prepare students to address drug related problems in the pediatric patients and to demonstrate competency in evaluating patient drug therapy in at least two patients as well as numerous case scenarios. Since the class size is kept at about 15 students, a seminar and hands on approach to simulations will be done along with didactic teaching and group discussion. Materials will be provided to supplement classroom interaction; at least one laboratory experience is planned. Discussions will be provided to allow the interchange necessary to explain individual judgments. Active learning processes will be employed in order to facilitate inter-professional communication skills and to allow students’ exposure to a variety of pediatric pharmacy practitioners. The course is presented in a series of therapeutic modules facilitated with the use of Blackboard® technology. Prereq: Permission of instructor.

**PPS979 TOXICOLOGY IN CLINICAL PRACTICE.**
Potentially any substance can be considered a poison if enough of it is ingested, and patients who ingest chemicals, drugs and dietary supplements are commonly seen in clinical practice. This elective course will help develop the pharmacy student’s knowledge of the toxic effects of chemicals and drugs when humans are exposed to these agents in acute/toxic overdoses. In addition, the course will emphasize how to prevent exposures, and drug therapy associated with each type of ingestion. This elective is highly recommended for students interested in critical care and/or emergency medicine as clinical toxicology consultations are an element of practice in these areas. Coreq: PY 3 core courses.

**#PPS980 BEHAVIOR MODIFICATION COACHING.**
This elective course is a companion course to the Behavior Modification Project that is part of the PPD (Patient Protection and Development) Health and Wellness 1 course. Each student will serve as the coach for a group of 5-6 PY 1 students as they complete their semester long project. Coaches will conduct weekly meetings, review student record keeping, provide motivation and accountability to PY1 students, and serve as role models in behavior modification. Coaches also develop skills in human resource management. Prereq: Admission to PYS 2, College of Pharmacy.

**#PPS981 THINKING CREATIVELY FOR INNOVATION.**
This 2 credit course revolves around developing the creative and critical thinking skills necessary for innovation and change. This involves exercises and activities to help students develop original and creative solutions to problems. The objective of this course is to equip students with skills to think through, develop and present original, creative ideas that have the potential to contribute to improvement and/or innovation in the healthcare professions. Prereq: Advancement to PY 2 or PY 3 year in the College of Pharmacy.

**PPS988 ADVANCED PHARMACY PRACTICE EXPERIENCE.**
A clinical experience in the use of drugs in the diagnosis, treatment and management of diseases. Emphasis is placed on a rationale of drug therapy, the provision of contemporary pharmacotherapeutic care services and functioning as a member of an interdisciplinaty health care team. Experiences will be obtained in a variety of areas and may involve on-call and evening/weekend responsibilities. May be repeated to a maximum of 48 credits. Prereq: Admission to the year fourth, College of Pharmacy and permission of instructor.
Course Descriptions

PPS91 ADVANCED COMMUNITY PRACTICE. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in a community setting. Emphasis is placed on identifying and managing potential patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PPS92 ADVANCED COMMUNITY HOSPITAL. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in a community hospital setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PPS93 AMBULATORY CARE PRACTICE. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in an ambulatory setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PPS94 ACUTE CARE/PATIENT PRACTICE. (6)
This course is an advanced pharmacy practice experience (APPE) focused on the prevention, diagnosis, treatment and management of diseases in patients receiving care in an acute care/ inpatient setting. Emphasis is placed on choosing rational drug therapy, providing contemporary patient care services and functioning as a member of an interdisciplinary health care team. Experiences may include on call and evening/weekend responsibilities. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PPS95 PATIENT CARE PRACTICE ELECTIVE. (6)
This course is an advanced pharmacy practice experience (APPE) elective focused on the prevention, diagnosis, treatment and management of disease in patients receiving care in a variety of settings, including specialized clinics. Emphasis is placed on integrating knowledge of therapeutics and pathophysiology in the provision of care to patients, providing drug therapy management, delivering contemporary patient care services, and functioning as a member of an interdisciplinary health care team. Prereq: Admission to the fourth year, College of Pharmacy, and permission of instructor.

PPS96 NON-PATIENT CARE PRACTICE ELECTIVE. (6)
This course is an advanced pharmacy practice experience (APPE) that allows the student to sample pharmacy practice opportunities outside of the required experiences. An elective experience may be selected (but not limited to) in the following areas: Practice management, administration, pharmacy education, pharmacoeconomics, pharmacopidemiology, research, pharmaceutical industry, association management, governmental, and international experiences. Prereq: Admission to the fourth year, College of Pharmacy, and permission of the instructor.

PRO Prosthodontics

PRO 820 PRECLINICAL COMPLETE DENTURE PROSTHODONTICS (LECTURE). (2)
This preclinical lecture course provides an introduction to basic concepts of diagnosis and treatment planning, placement and maintenance of complete dentures, as well as the related biological and mechanical factors that must be incorporated for living tissue to be compatible with complete dentures. Prereq: Advancement to Second Year standing or consent of course director. Coreq: PRO 822.

PRO 821 CLINICAL COMPLETE DENTURE PROSTHODONTICS. (1)
The treatment of a patient with complete maxillary and mandibular dental needs is performed in the clinic by the student. The student will assist an upper level student in the examination of a complete denture and a removable partial denture recall patient. Clinic, 52 hours. Coreq: PRO 820.

PRO 822 PRECLINICAL COMPLETE DENTURE PROSTHODONTICS (LAB). (2)
This preclinical laboratory course provides an introduction to basic concepts of fabrication of complete dentures as well as the related biological and mechanical factors that must be incorporated for living tissue to be compatible with complete dentures. Prereq: Advancement to Second Year standing or consent of course director. Coreq: PRO 820.

PRO 824 REMOVABLE PARTIAL DENTURES. (2)
This course is designed to teach the student the basic principles and the practical procedures in providing a therapeutic and functional removable restoration. The course also presents the laws and effects of leverages as related to removable partial dentures as well as the considerations for support, occlusion, and health of all oral structures. Lecture, 19 hours; laboratory, 45 hours. Prereq: PRO 820.

PRO 830 ADVANCED REMOVABLE PROSTHODONTICS. (1)
This course is a continuation of PRO 820. It presents more advanced technique and treatment planning for complex prosthodontic needs. Subjects included are immediate dentures, overdentures and dental implants. Lecture, 21 hours. Prereq: PRO 820 and PRO 824.

PRO 831 CLINICAL REMOVABLE PROSTHODONTICS. (2)
A patient with complete denture needs is treated by the student clinically in the course. The student may opt to treat a patient with immediate, intermediate or overdenture needs. He may initiate and/or complete the treatment of two patients with removable partial denture needs. The student may also treat an optional, additional patient in need of a complete or removable partial denture. The student will recall a minimum of two removable prosthodontic patients and perform any treatment necessary for these patients. Clinic, 110 hours. Prereq: PRO 831; coreq: PRO 830.

PRO 834 PRECLINICAL RESTORATIVE DENTISTRY. (4)
This is a preclinical course with emphasis on dental hard tissue surgery and restorative procedures for anterior and posterior fixed prosthodontics. Contemporary principles of fixed prosthodontics, including the long term maintenance of dental health, are presented in lectures and applied in practice using manikins. Knowledge gained in previous restorative dentistry courses are applied to more extensive restorations. Lecture, 24 hours; laboratory, 84 hours. Prereq: RSD 822, 823, 824 and 826.

PRO 836 PRINCIPLES OF FIXED PROSTHODONTICS. (2)
This course is a lecture series concerning diagnosis and treatment planning for fixed prosthodontics care and the principles of providing that care. The relationship of tooth restoration and replacements to occlusion, periodontics, orthodontics and removable prosthodontics in both treatment planning and treatment is emphasized. Lecture, 30 hours. Prereq: RSD 823, RSD 821, RSD 822, RSD 824, and/or consent of course director.

PRO 841 ADVANCED CLINICAL REMOVABLE PROSTHODONTICS. (2)
This course covers basically the same area as PRO 831 with the exception that the student is to treat the patient with complete denture needs with less supervision from the instructors. If not done previously, the student must initiate and complete the treatment of two patients with removable partial denture needs. The student will recall three removable prosthodontic patients and will perform any treatment necessary for these patients. Clinic, 114 hours. Prereq: PRO 831.

PS Political Science

Note: It is assumed that all prerequisites include, in addition to any specific course listed, the phrase “or equivalent,” or “or consent of instructor.”

PS 101 AMERICAN GOVERNMENT. (3)
A survey of national government and the political process in the United States, with emphasis on the Constitution, the President, Congress, and the judicial system.

PS 210 INTRODUCTION TO COMPARATIVE POLITICS. (3)
A general introduction to the domestic politics of countries in the various regions of the world, with an emphasis on the concepts used to understand why political issues and processes differ across developed and developing nations. Students also learn how domestic politics are shaped by super-national institutions and by national integration into a global economy.

PS 212 CULTURE AND POLITICS IN THE THIRD WORLD. (3)
A study of the most significant problems of world politics, including the fundamental factors governing international relations, the techniques and instruments of power politics, and the conflicting interests in organizing world peace.

PS 240 INTRODUCTION TO POLITICAL THEORY. (3)
An introduction to modern political thought as it relates to debates over the meaning of democracy, citizenship, justice, authority, and identity. Readings and discussions center on the themes and ideologies dominant in Western political theory, but also will explore contemporary challenges to that tradition, such as feminism, political theory and the work of theorists concerned with what is popularly called globalization.

PS 360 POLITICS OF LAW AND COURTS. (3)
A survey of the actors in American government and society who shape the meaning of the law, focusing especially on the judiciary. The course will outline the structure of the judicial system including both state and federal courts as well as the judicial process followed within that system. Prepares students for advanced study in public law and judicial politics. Prereq: UN2 status.

PS 372 INTRODUCTION TO POLITICAL ANALYSIS. (3)
Introduction to the basic knowledge of research methodology in political science; a review of methods of data collection, historical, quantitative and comparative techniques of analysis. Prereq: UN2 status; PS majors only.

PS 391 SPECIAL TOPICS IN POLITICAL SCIENCE (Subtitle required). (3)
Course will focus on selected topics drawn from various areas of political science taught by faculty members with special interests and competence. May be repeated in courses of differing topics to a maximum of 12 credits. Prereq: UN2 status.
PS 395 INDEPENDENT WORK. (1-6)
Consent of instructor. May be repeated to a maximum of 12 credits. Prereq: A standing of 3.0 in political science courses.

PS 399 INTERNSHIP IN GOVERNMENT. (1-6)
This course is designed for students who are participating in a state, local or federal internship program with which the political science department is associated. The student must have approval of the department chairperson upon the recommendation of the Committee on Internship and Experiential Education to take the course, negotiate a learning contract with a departmental academic supervisor, and provide the department with a report or a paper on his internship. Pass/Fail only. May be repeated to a maximum of 12 credits.

PS 410 TOPICS IN REGIONAL POLITICS (Subtitle required). (3)
A survey of politics and government in one region of the world. The course will consider the region’s unique political character, but also explain how and why nations within the region differ from each other politically. Some sections will compare and contrast a region’s political systems in general, whereas others may be more specialized topically. May be repeated to a maximum of 12 credits under differing subtitles. Prereq: PS 210 or PS 212.

PS 415 COMPARATIVE JUDICIAL POLITICS. (3)
A comparison of the judicial institutions operating across a wide variety of political systems. Emphasis will be on topics such as why different nations or regions evolve different types of courts, how those courts gain legitimacy with the public, and what forces shape the behavior of judges serving in these various court systems. Prereq: PS 210, PS 212, or PS 360.

PS 417G SURVEY OF SUB-SAHARAN POLITICS. (3)
A survey of sub-Saharan government and politics intended to give the student broad knowledge about the setting of African politics, precocious African political systems, the political legacies of major European colonial powers, and problems of political development. Prereq: PS 210 or 212. (Same as AAS 417G.)

PS 419G THE GOVERNMENTS AND POLITICS OF EASTERN ASIA. (3)
A comparative analysis of the modern political experiences of China and Japan, exploring their responses to the West, the development of differing political elites in each country, and contemporary problems of the Chinese Communist and Japanese politics. Prereq: PS 210 or 212.

PS 420G GOVERNMENTS AND POLITICS OF SOUTH ASIA. (3)
A comparative analysis of contemporary political development in India, Pakistan, Bangladesh and Sri Lanka, with emphasis on political cultures, participation, institutions and the capabilities of these political systems. Prereq: PS 210 or 212.

PS 427G EAST EUROPEAN POLITICS. (3)
This course is meant to provide an opportunity for advanced undergraduates and graduate students to (1) understand the historical, socioeconomic and philosophical context of the communist party states in Eastern Europe, (2) to learn who governs in Eastern Europe and the structures through which they rule, (3) to assess the “dynamics” of communist politics, i.e., factors contributing to political change vis-a-vis political continuity. Prereq: Junior or senior standing and instructor’s written permission.

PS 428G LATIN AMERICAN GOVERNMENT AND POLITICS. (3)
A study of contemporary Latin American political institutions and of the dynamics of the Latin American political process. Prereq: PS 210 or 212.

PS 429G GOVERNMENT AND POLITICS IN RUSSIA AND THE POST-SOVIET STATES. (3)
Analysis of political development in the Soviet Union with emphasis on party–government relations, Communist ideology, and major approaches to the study of Soviet politics. Prereq: PS 210 or 212.

PS 430G THE CONDUCT OF AMERICAN FOREIGN RELATIONS. (3)
The formulation of American foreign policy from several analytic perspectives, with somewhat more emphasis on inputs and process than on substantive outputs. Prereq: PS 101 or consent of instructor.

PS 431G NATIONAL SECURITY POLICY. (3)
The organization and formulation of military policy; the theory and practice of deterrence, and the problems of disarmament and arms control. Prereq: PS 235 or consent of instructor.

PS 433G POLITICS OF INTERNATIONAL ECONOMIC RELATIONS. (3)
The course examines contending theoretical approaches to global political economy. These approaches are used to analyze various issues of global political economy, such as the international monetary system, multinational corporations, foreign aid, and trade. Prereq: PS 235.

PS 436G INTERNATIONAL ORGANIZATION. (3)
A study of the evolution of international organizations in the 20th Century. Examination of the increasing size, complexity, and diversity of contemporary global and regional international organizations. The role of international organizations in future world order.

PS 437G DYNAMICS OF INTERNATIONAL LAW. (3)
An examination of the politics of the development of international law and its operation in a multicultural world. Legal principles and international political processes are discussed through illustrative issue areas: management of conflict; distribution of territorial resources; environmental problems; and human rights. Prereq: PS 235 or PS 360.
Course Descriptions

PS 479 WOMEN AND POLITICS. (3)
A study of the role of women as political actors in the United States including the status of women in American society and the contribution of government policy to maintaining or changing that status. The political behavior of women at the mass and elite level will be examined.

PS 480G GOVERNMENT AND THE ECONOMY. (3)
This course analyzes the relationship between political and economic systems in the modern, democratic, capitalist state. While the focus is primarily upon the United States, other political/ economic systems as well as more general theoretical statements will be considered. Prereq: PS 101 and ECO 101 or equivalent.

PS 484G THE AMERICAN PRESIDENCY. (3)
A course in the American presidency, emphasizing institutional developments and the impact of recent presidents on the office, on other governmental institutions, on domestic and foreign policies, and including an examination of the broader context of the executive branch of government. Prereq: PS 101; UN2 status.

PS 489G THE ANALYSIS OF PUBLIC POLICY. (3)
A study of the development, implementation and impacts of government policies; and the sources of variation in policies adopted by differing governmental units. Prereq: PS 101; UN2 status.

PS 490 HONORS IN POLITICAL SCIENCE. (3)
This course will provide, in a seminar setting, the opportunity for students to concentrate on developing and implementing research projects on topics of their own choice. The course will allow discussion of various perspectives in political science as well as on problems encountered in the research process. Prereq: Senior standing with 3.25 overall GPA and 3.50 GPA in major.

PS 492 SEMINAR IN POLITICAL SCIENCE (Subtitle required) (1-3)
A topical seminar primarily for majors in political science and in related fields. May be repeated to a maximum of 12 credits in seminars of differing topics. Prereq: UN2, previous PS course.

PS 538 CONFLICT AND COOPERATION IN LATIN AMERICAN RELATIONS. (3)
An examination of (1) national development strategies as determinants of Latin American foreign policies, (2) the origins and political consequences of economic nationalism, (3) historical patterns of U.S. response to reformist and/or revolutionary change, (4) the role of extra-continental contenders for influence in the Americas, and (5) at least one contemporary foreign policy issue in inter-American relations. Prereq: PS 424G or permission of instructor.

PS 545 AMERICAN POLITICAL THOUGHT. (3)
This course explores the American tradition of political thought, its formation, and the ways it is involved in major problems of culture, political economy, ideology, and identity. Alternative ideas of work, power, political obligation, science and technology, and related issues are examined. Relationships of theory and practice, public and private, and government and society are analyzed. Prereq: UN3 status.

PS 557 KENTUCKY GOVERNMENT AND POLITICS. (3)
A study of current political issues and institutions in Kentucky.

PS 556 CONSTITUTIONAL INTERPRETATION. (3)
A study of the political and the philosophical origins of the U.S. Constitution and of the competing and overlapping philosophies about how it should be interpreted in modern times. Prereq: One of the following: PS 461G, PS 465G, or HIS 573.

PS 572 INTRODUCTION TO QUANTITATIVE POLITICAL METHODOLOGY. (3)
Introduction to quantitative research methods used by political scientists. The course introduces students to data sets and statistical software commonly used in political science, and basic analysis techniques used to analyze political data. Prereq: For undergraduates, completion of PS 372.

PS 580 THE BUDGETARY PROCESS. (3)
A study of the development of budgetary techniques in the United States, the uses to which budgets are put, the roles of the budgetary process in budgetary policies, and in the functioning of government, and the distribution of government resources through the budget.

PS 620 COMPARATIVE POLITICS: THEORY AND METHOD. (3)
A study of the evolution and development of comparative government and politics within the discipline with particular emphasis upon the formulation, application, and limitations of the theories, taxonomies and conceptual frameworks employed in comparative research.

PS 671 STATEGIES OF INQUIRY IN POLITICAL SCIENCE. (3)
Analysis of research paradigms for political science, and investigation into the foundations of scientific inquiry. Emphasis on topics such as explanation, concept formation, the construction and function of theory, data, and verification.

PS 672 INTRODUCTION TO TECHNIQUES OF POLITICAL RESEARCH. (3)
Basic techniques of data collection, coding, and processing applicable to political research are introduced. Various statistical techniques of data analysis are discussed and applied to political data. Prereq: PS 671, familiarity with appropriate statistical methods and consent of instructor.

PS 674 PROSEMINAR IN THEORIES OF INTERNATIONAL POLITICS. (3)
A survey of the major theoretical approaches to the study of international systems and processes.

PS 680 PROSEMINAR IN POLITICAL INSTITUTIONS AND PROCESS. (3)
A thorough survey of recent literature on political institutions and the political process, including political parties and the legislative and executive processes, at the national and sub-national levels.

PS 681 AMERICAN POLITICAL BEHAVIOR. (3)
A proseminar providing a survey of major theoretical approaches and empirical research in the field of American political behavior. Intended to explore various individual-level models of behavior and then apply them to specific forms of political behavior.

PS 684 PROSEMINAR IN POLICY STUDIES. (3)
A survey of the various approaches to the study and analysis of public policy impacts. Special emphasis will be given to the normative and ethical implications of alternative conceptualizations of the policy process and the role of the policy analyst.

PS 685 PROSOERMINAR IN PUBLIC ADMINISTRATION AND POLICY. (3)
A survey of recent literature on public administration and public policy, including organization theory, the political environment of administration, public budgeting, public personnel administration, public policy administration, and public management.

PS 690 PROSEMINAR IN CONTEMPORARY POLITICAL THEORY. (3)
An examination of contemporary political theories, especially their relationships to theoretical issues in policy analysis. Major problems such as inquiry and change, ideology and power, and knowledge and authority will be studied, particularly in the context of public policy.

PS 711 TOPICAL SEMINAR IN POLITICAL SCIENCE (Subtitle required). (3)
Topic and instructor will vary from semester to semester. Faculty member presents seminar on topic in which he has particular research competence or special expertise. May be repeated under different subtitle to a maximum of nine hours. Prereq: Two semesters of graduate work and consent of instructor.

PS 731 INTERNATIONAL SECURITY/CONFLICT ANALYSIS. (3)
The seminar examines international security affairs, with an emphasis on the sources and nature of conflict, and methods of conflict, the patterns of conflict, and methods of conflict resolution and regulation, both within states and among them. Prereq: Consent of instructor.

PS 732 COMPARATIVE FOREIGN POLICY (Subtitle required). (3)
This seminar will emphasize comparative analysis of foreign policy. It will compare the foreign policies of a number of countries in order to develop propositions and arrive at generalizations regarding foreign policy process and behavior. The comparative focus will vary. May be repeated to a maximum of six credits under different subtitles.

PS 733 INTERNATIONAL POLITICAL ECONOMY. (3)
The course examines the contending theoretical perspectives and substantive functional issues underlying the politics of international economic relations. Special attention is paid to international trade and money, the policies of North-South relations, and comparative foreign economic policies. Prereq: Consent of instructor.

PS 734 GREAT BOOKS OF WORLD POLITICS. (3)
Overview of classic texts on war and statecraft. Prereq: Consent of instructor. (Same as DIS 710.)

PS 735 DEMOCRACY AND INTERNATIONAL AFFAIRS. (3)
Discussion of the impact of the global spread of democracy on foreign policy and war. Prereq: Gradute status and consent of instructor. (Same as DIP 715.)

PS 737 TRANSNATIONAL ORGANIZATIONS AND PROCESSES. (3)
An analysis of approaches to the study of international, transnational and regional political and economic organizations and processes within the context of world politics. An examination of the impact of these activities and processes on contemporary problems of world order. Prereq: Graduate student status.

PS 748 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PS 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

PS 750 POLITICAL PARTIES AND ELECTIONS IN AMERICA. (3)
A study of the organization and functions of political parties, nominations and elections, and voting alignments. Prereq: An undergraduate political parties course or consent of instructor.

PS 756 REGIONAL POLITICS (Subtitle required). (3)
This seminar focuses on the domestic politics and international relations of countries within a specific geographic region (Latin America, the Commonwealth of Independent States, Western Europe, Africa, East Asia, etc.). Theoretical focus include political economy, policymaking, regional integration and national security, development, and political culture.

PS 760 SEMINAR IN JUDICIAL PROCESS. (3)
A thorough survey of literature in judicial process, focusing largely on judicial recruitment and decision-making, litigants’ strategies, the implementation and impact of judicial policies and relations between the courts and other power centers. May be repeated to a maximum of six credits.
**Course Descriptions**

**PSY 100 INTRODUCTION TO PSYCHOLOGY.**
An introduction to the study of behavior covering theories, methods, and findings of research in major areas of psychology. Topics covered will include the biological foundations of behavior; learning, perception, motivation, personality; developmental, abnormal, and social behavior; and methods of assessment. This course is a prerequisite to a significant number of courses in this and related areas of study. Lecture, three hours; laboratory/discussion, two hours.

**PSY 195 ORIENTATION TO PSYCHOLOGY.**
An orientation to educational issues and career planning for students who have declared psychology as a major. Topics include career paths and opportunities, professional resources and issues, and educational planning. Pass/Fail only. Prereq: Declared major in Psychology, or consent of instructor.

**PSY 215 EXPERIMENTAL PSYCHOLOGY.**
A study of the application of scientific methods to psychological research. Special emphasis is placed on the critical evaluation of contemporary research in experimental psychology. Particular attention is focused on the design, execution, and written report of laboratory research. Lecture, three hours; laboratory, two hours. Prereq: PSY 100 or equivalent and PSY major or major in one of the social sciences, or consent of instructor. Registration is open only to PSY majors during the priority registration window.

**PSY 216 APPLICATIONS OF STATISTICS IN PSYCHOLOGY.**
An introduction to statistical procedures used in making decisions based on psychological data. May not be used to satisfy the laboratory requirement in the College of Arts and Sciences. Lecture, three hours; laboratory, two hours. Prereq: PSY 100 or equivalent and PSY major, or consent of instructor.

**PSY 223 DEVELOPMENTAL PSYCHOLOGY.**
An introduction to the principles of developmental psychology as seen in human growth over the entire lifespan, with the primary focus on infancy through adolescence. Emphasis is placed on theory and data relating to the developmental aspects of cognition, language and personality. Prereq: PSY 100 or equivalent.

**PSY 302 PSYCHOLOGY IN BUSINESS AND INDUSTRY.**
Survey of the many applications of psychological principles and methods to problems in business and industry. Topics include consumer research and marketing, personnel selection, performance appraisal, employee training, motivation, leadership, dynamics of work groups, job stress, and person-machine interactions. Prereq: PSY 100 or equivalent and PSY 215.

**PSY 311 LEARNING AND COGNITION.**
Theory and experimental techniques in the study of learning and cognition. Emphasis on research in the biological basis of learning, perceptual processing, classical conditioning, instrumental conditioning, memory, and language. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or major in one of the social sciences, or consent of instructor. Registration is open only to PSY majors during the priority registration window.

**PSY 312 BRAIN AND BEHAVIOR.**
An introduction to structural and functional characteristics of the nervous system. The emphasis is on exploring the relationship between brain and behavior. Topics range from simple structures and behaviors to more complex functions. The biological basis of normal and abnormal behavior is explored from a multidisciplinary perspective. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

**PSY 313 PERSONALITY AND INDIVIDUAL DIFFERENCES.**
An introduction to the psychology of individual differences, theories of personality and personality development. Individual differences in cognitive ability and personality will be addressed. Differing theoretical approaches to personality will be covered. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

**PSY 314 SOCIAL PSYCHOLOGY AND CULTURAL PROCESSES.**
A selective survey of classic and contemporary theories and research in social psychology from a multicultural perspective. Topics will include social perception, the self, attitudes, aggression, prejudice, and group processes. Credit is not given to students who already have credit for PSY/SOC 344. Prereq: PSY 100 or equivalent and PSY 215 or 216 and PSY major or minor. Registration is open only to PSY majors during the priority registration window.

**PSY 331 THE PSYCHOLOGY OF ADJUSTMENT.**
The individual’s psychological adjustment to society is analyzed from a mental health perspective. The course provides a general orientation to the normal-abnormal continuum of behavior, including individual, social, and cultural determinants of behavior. Prereq: PSY 100 or equivalent.

**PSY 333 ABNORMAL PSYCHOLOGY.**
A study of the major mental disorders, such as anxiety, mood, substance use, personality, and psychotic disorders, and the biological, psychological, and sociological factors which contribute to their causation. Prereq: PSY 100 or equivalent and one of the following: PSY 215, 216 or 223.
University of Kentucky

will use a seminar format. Students will complete their thesis research, prepare a written report, and give both an oral and written presentation of their research proposal and project. Lecture/discussion, three hours per week; laboratory, two hours per week. Prereq: Senior status, research sponsor, approval of instructor.

PSY 495 SENIOR INTERNSHIP IN PSYCHOLOGY. (3)
Designed as a senior-capstone course for psychology majors to integrate classroom learning, research, and experiences in the context of research or field-based experience in psychology under the supervision of a psychology faculty member. Students spend nine hours weekly in the placement site and meet weekly as a group with the course instructor to discuss placements, readings, and writing assignments. Prereq: Declared major in Psychology, seniors only; consent of instructor; contract with department; faculty supervision; and completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 500 HISTORY AND SYSTEMS OF PSYCHOLOGY. (3)
The course reviews the historical context, influences, and individuals instrumental in the development of psychological research, theories, and systems. Readings and discussions of original sources and contemporary research are emphasized. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 534 CHILD PSYCHOPATHOLOGY. (3)
The course is designed to cover issues in the classification, assessment, and treatment of the major childhood behavior disorders, including attention deficit and conduct disorders, learning disabilities, depression, and child abuse. In addition, issues relating to parent-child relations, divorce, and children's contributions will be considered. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 535 PSYCHOLOGICAL TESTING. (3)
A general orientation to the field of psychological testing. Introduction to the principles and methods of psychological testing, and a survey of the various kinds of psychological tests. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 552 ANIMAL BEHAVIOR. (4)
Experimental techniques, principles, and theories applied to the field of animal behavior. Topics include comparative cognition, learning and memory, imitation, sexual selection, reproductive strategies, altruism, evolutionary psychology, and sociobiology. A required laboratory component consists of applications of techniques used to study animal behavior. Students will design and conduct experiments, organize and discuss results, and explore theoretical and applied implications. Prereq: Declared major in Psychology, PSY 215, 216, 311, or consent of instructor.

PSY 558 BIOLOGY OF MOTIVATION. (3)
An examination of the causes of human and nonhuman behavior from a biological perspective. Special attention is paid to the interaction between genetic inheritance, individual experience, and physiological state in the control of the appetitive and consummatory behaviors. Prereq: PSY 215 and BIO 103, or BIO 150 or equivalent.

PSY 561 ADVANCED TOPICS IN FOUNDATIONS OF CLINICAL PSYCHOLOGY (Subtitle required). (3)
Selected topics in clinical psychology such as health psychology and introduction to clinical psychology. Course topics will vary from year to year, providing students with a diversity of material in the area of clinical psychology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 562 ADVANCED TOPICS IN COGNITIVE PSYCHOLOGY (Subtitle required). (3)
A course is designed to provide in-depth study of a specialized topic within cognitive psychology. Topics will vary from year to year and may include: theories of memory; theories of reading; cognition and emotion; connectionist modeling; engineering and environmental psychology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 563 ADVANCED TOPICS IN DEVELOPMENTAL PSYCHOLOGY (Subtitle required). (3)
This course is designed to provide in-depth study of a specialized topic in developmental psychology. Topics will vary from year to year and may include: cognitive development; development of memory and attention; development of reasoning and problem solving; and media use and children’s development. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 564 ADVANCED TOPICS IN LEARNING (Subtitle required). (3)
The course will provide in-depth study of specialized topics in the area of higher learning in animals. Topics will vary from year to year and may include concept learning, memory, imitation, language, and cooperation. The course will also examine these processes from the perspective of sociobiology. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 565 ADVANCED TOPICS IN NEUROSCIENCE (Subtitle required). (3)
Advanced coverage of recent research within the field of behavioral neuroscience. The course will provide in-depth coverage of one topic, such as developmental psychology, neurobiology of learning and memory, or the biological basis of reward. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.
PSY 566 ADVANCED TOPICS IN SOCIAL PSYCHOLOGY. (Subtitle required.) (3) Selected topics exploring aspects of social psychology. The content of the course will vary from year to year, focusing on topics such as social cognition, the self, cross-cultural psychology, personal relationships, consumer and organizational psychology, and nonverbal communication. Class format will be determined by the instructor, with some years having a small seminar structure and other years having a more traditional lecture format. May be repeated to a maximum of six credits. Prereq: Completion of one of the following: PSY 427, 430, 440, 450, 456, 460, or 552.

PSY 603 PSYCHOPATHOLOGY. (3) An examination of the descriptive, theoretical, and research material relevant to the major classes of disturbed behavior. Special attention is devoted to the stylistic features of neurotic and psychotic communication and behavior. Prereq: Enrollment in the graduate program in clinical psychology.

PSY 610 PSYCHOMETRICS. (3) Analysis and interpretation of human measurements. The course deals with the application of basic inferential procedures to the analysis and interpretation of psychological data. Required of all graduate students in psychology. Prereq: A course in statistics.

PSY 611 PSYCHOLOGICAL RESEARCH. (3) The course deals with the design of psychological experiments. Emphasis is upon issues concerning choice of appropriate designs for psychological research. Both experimental and correlational research designs are studied. Required of all graduate students in psychology. Prereq: PSY 610 or permission of instructor.

PSY 616 RESEARCH DESIGN IN CLINICAL PSYCHOLOGY. (3) Concentrates on current methodologies utilized in clinical research and on the application of sophisticated techniques to traditional research problems.Students are expected to master critical skills for the evaluation of research designs and are encouraged to explore creative approaches to research in important clinical areas. Prereq: Enrollment in the graduate program in clinical psychology.

PSY 620 PROSEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY. (3) A study of the philosophical precursors and scientific traditions of psychology. The schools of 19th and 20th century psychology are surveyed as are the major theoretical positions and content areas of contemporary psychology. Prereq: Graduate standing in Department of Psychology or Department of Educational and Counseling Psychology. (Same as EDP 615.)

PSY 621 PROSEMINAR IN LEARNING. (3) An intensive treatment of concepts, methodology, and current developments in the field of learning.

PSY 622 PROSEMINAR IN PERSONALITY. (3) An intensive treatment of theories, methods of investigation and current developments in the area of personality. Prereq: Enrollment in graduate program in Psychology or consent of instructor.

PSY 623 PROSEMINAR IN SENSATION AND PERCEPTION. (3) An intensive examination of the facts, methods and concepts involved in the study of sensory and perceptual processes. Prereq: Consent of instructor.

PSY 624 PROSEMINAR IN SOCIAL PSYCHOLOGY. (3) An intensive examination of the methods and data of social psychology with emphasis on social attitudes. Prereq: PSY 344 or 314 or equivalent.

PSY 625 PROSEMINAR IN DEVELOPMENTAL PSYCHOLOGY. (3) An intensive treatment of theoretical and experimental literature, both classical and contemporary, in developmental psychology. Prereq: Admission to the graduate program in psychology or consent of instructor.

PSY 626 SURVEY OF HEALTH PSYCHOLOGY. (3) A survey of the field of health psychology. It will explore the ways in which social and psychological research contribute to an understanding of health and illness behavior. Prereq: Graduate or professional standing and consent of instructor. (Same as BSC 626.)

PSY 627 PROSEMINAR IN PHYSIOLOGICAL PSYCHOLOGY. (3) An intensive examination of theories, methods of investigation, and current developments in the field of physiological psychology. Prereq: Graduate standing or permission of instructor. (Same as PGY 627.)

PSY 628 PROSEMINAR IN COGNITIVE PROCESSES. (3) An intensive examination of theoretical and empirical evidence concerning mental processes in the adult human, including attention, memory, language, and problem-solving. Prereq: Graduate standing in psychology, or consent of instructor.

PSY 629 INTRODUCTION TO CLINICAL PSYCHOLOGY. (2) Offered conjointly by the clinical faculty; covers the broad perspectives of clinical psychology, methods, history, ethics, and professional issues. Prereq: Enrollment in the graduate program in psychology.

PSY 630 CLINICAL METHODOLOGY I. (2) An intensive survey and evaluation of tests of intelligence and objective methods of assessment of normal and abnormal personality. Special emphasis is given to major theoretical issues and relevant quantitative methods. Prereq: Enrollment in the graduate program in Clinical Psychology.

PSY 631 PRACTICUM IN CLINICAL METHODOLOGY. (2) Clinical interviewing and practice in writing reports on behavioral observations, content of verbalization, and case history data. Practice in administration, scoring and interpretation of intelligence tests and objective personality tests. Laboratory, four hours. Prereq: Enrollment in graduate program in Clinical Psychology and prior or concurrent enrollment in PSY 630.

PSY 632 CLINICAL METHODOLOGY II. (2) Theoretical issues, quantitative methods and research findings on the projective methods of assessment of normal and abnormal personality. Prereq: PSY 630, and enrollment in graduate program in psychology.

PSY 633 PRACTICUM IN CLINICAL METHODOLOGY II. (2) Practice in the administration and scoring of projective techniques and batteries of clinical tests. Laboratory, four hours. Prereq: PSY 630 and 631, and enrollment in graduate program in clinical psychology. Prereq or concur: PSY 632.

PSY 636 SYSTEMS OF PSYCHOTHERAPY. (3) An intensive examination of the major theoretical and research approaches to therapeutic behavior change. Prereq: PSY 632 and 633, and enrollment in graduate program in clinical psychology.

PSY 637 PRACTICUM IN PSYCHOLOGICAL ASSESSMENT AND INTERVENTION. (1-3) Supervised experience in the techniques of psychological assessment and intervention with adults, children, families, and groups. Laboratory, two to six hours per week. May be repeated up to sixteen hours. Prereq: PSY 636 and enrollment in graduate program in clinical psychology.

PSY 638 DEVELOPMENTAL NEUROBIOLOGY. (3) An explanation of the processes which contribute to the development of the nervous system. Neurophysiological, cell biological and molecular approaches to cell differentiation, neuronal pathfinding and synapse formation and stabilization will be explored and discussed. Examples will be drawn from both vertebrate and invertebrate preparations. Prereq: BIO 535 or consent of instructor. (Same as ANA/BIO/PGY 638.)

PSY 639 PRACTICUM IN PSYCHOLOGICAL ASSESSMENT AND INTERVENTION SUMMER WORK. (0) Supervised experience in the techniques of psychological assessment and intervention with adults, children, families, couples and/or groups that occurs during the summer, i.e., outside of the academic year (Fall/Spring semesters). This course does not fulfill one of the program requirements for group supervision but it does meet legal and ethical requirements for supervision during practicum training. May be repeated. Prereq: PSY 636 and enrollment in graduate program in clinical psychology.

PSY 708 INTERNSHIP IN CLINICAL PSYCHOLOGY. (0) Full time practice in an APA-accredited internship setting, with on-site supervision provided by the internship setting and with academic supervision provided by the Director of Clinical Training at the University of Kentucky. May be repeated twice. Prereq: All course work in doctoral program in clinical psychology, approved dissertation proposal, and consent of Director of Clinical Training.

PSY 710 TOPICAL SEMINAR IN CLINICAL PSYCHOLOGY. (3) A selected topics course designed to cover content areas which are not being met by the current faculty. May be taught by persons with special qualifications from the community or by existing faculty exploring new areas. The topics, which may be offered as the need arises, may include on a semester basis mental retardation, intensive psychosynthetic theory, psychopharmacology, etc. May be repeated to a maximum of six credits. Prereq: As specified by instructor.

PSY 748 MASTER'S THESIS RESEARCH. (1) PSY 749 DISSERTATION RESEARCH. (1) PSY 766 TOPICAL SEMINAR IN BEHAVIORAL NEUROSCIENCE. (3) A study of selected topics in behavioral neuroscience with emphasis on recent research and theory. May be repeated to a maximum of nine credits. Prereq: Consent of instructor. This course may be elected to fulfill requirements in the psychology and physiology graduate programs. (Same as PGY 767.)

PSY 767 DISSERTATION RESIDENCY CREDIT. (2) Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

PSY 768 RESIDENCY CREDIT FOR THE MASTER'S DEGREE. (3) The study of selected topics in the learning area with emphasis on recent experimental and theoretical literature. May be repeated to a maximum of six credits. Prereq: Consent of instructor.
PSY 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutionalized dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/SOC/BSC 776.)

PSY 778 TOPICAL SEMINAR IN DEVELOPMENTAL PSYCHOLOGY. (3)
An advanced seminar in selected topics in human development, including cognition, learning, language, personality, socialization, life span issues, and developmental aspects of psycho-pathology. Prereq: PSY 625 and enrollment in graduate psychology program, or consent of instructor. May be repeated a maximum of six credits.

PSY 779 TOPICAL SEMINAR IN SOCIAL PSYCHOLOGY. (3)
Each semester some topic in the field of social psychology, such as attitudes and beliefs, structures and function of social groups, social determinants of behavior, leadership, and morale will be studied intensively. May be repeated to a maximum of six credits. (Same as SOC 779.)

PSY 780 PROBLEMS IN PSYCHOLOGY. (1-3)
This number is used for topical seminars taught on an experimental basis or covering special material that may not be presented again. May be repeated to a maximum of six credits.

PSY 781 RESEARCH PARTICIPATION. (1)
Emphasis on the team approach to research. Designed primarily for first year graduate students. May be repeated to a maximum of four credits. Laboratory, two to four hours. Prereq: Enrollment in the graduate program in psychology.

PSY 790 RESEARCH IN PSYCHOLOGY. (1-12)
A minimum of three hours per credit a week is required on research conducted in consultation with the instructor. May be repeated as necessary with the approval of the Director of Graduate Studies.

PT Physical Therapy

PT 603 PHARMACOLOGY I. (1)
Fundamental concepts of pharmacology and their impact on the physical therapy management of patients. This course focuses on the integration of basic science, research, and clinical intervention. Prereq: Admission to the Physical Therapy Professional program and successful completion of the spring and summer semesters in the first year.

PT 604 PHARMACOLOGY II. (1)
This course will build on the material covered in PT 603, Pharmacology I. In Physical Therapy, focusing on how drug classes influence rehabilitation treatment strategies. Prereq: Successful completion of PT 603.

PT 605 WELLNESS AND SPORTS NUTRITION. (3)
Emphasis is directed toward nutrition as applied to prevention of disease through lifestyle management and the application of nutrition in exercise and sport. Targeted focus areas are: body composition and energy expenditure, the metabolic basis of weight management, nutrient needs throughout the lifecycle, the metabolic changes associated with obesity, behavioral management of obesity, nutrient metabolism and exercise, water and electrolyte balance during exercise, nutritional ergogenic aids, nutritional strength and performance enhancement. Prereq: PSY 412G, and BCH 401G or equivalent or consent of instructor. (Same as CNUNS 605.)

PT 610 ETHICS IN CLINICAL SCIENCES RESEARCH. (1)
Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data collection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as CD/CLS/CNU/RAS 610.)

PT 628 GERONTOLOGY FOR PHYSICAL THERAPY STUDENTS. (2)
PT 628 will utilize biological aspects of aging as the foundation, and integrate psycho-social-spiritual characteristics associated with aging, health and function through the use of lectures, discussions, case studies, service learning, panel discussions and clinical experience. Students will work closely with older adults in terms of PT management for those with functional limitations and in health care promotion and prevention. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first year.

PT 645 RESEARCH AND MEASUREMENT IN PHYSICAL THERAPY. (3)
An analysis of various procedures and measuring instruments used in clinical practice and research in physical therapy. Emphasis is placed on the theory, application, and interpretation of the measurements in the evaluation of published materials. Basic statistical techniques and their appropriate use will be presented. Prereq: Admission to the Physical Therapy professional program and to the Graduate School.

PT 650 DYSFUNCTION OF PERIPHERAL JOINTS. (3)
This course is an advanced approach to assessment and therapeutic management of musculoskeletal problems involving peripheral joints. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

PT 651 DYSFUNCTION OF VERTEBRAL JOINTS. (3)
This course concentrates on advanced theories and techniques of assessment and therapeutic management of musculoskeletal problems of the back. Lecture, two hours; laboratory, two hours per week. Prereq: Consent of instructor.

PT 652 PATHOMECHANICS. (3)
An application and research oriented investigation into the science of abnormal human movement. The course involves selected aspects of neural control, muscle contraction, assessment and motion analysis, joint mechanics, and noncontractile tissue as they relate to human movement and kinetics. Lecture, two hours; laboratory, two hours per week. Prereq: HPR 515 or consent of instructor.

PT 654 MOTOR CONTROL THEORY AND INTERVENTION. (4)
This course explores current knowledge regarding the neurophysiological mechanisms involved in motor control from birth to adulthood. The course also explore a variety of therapeutic interventions with motor control as a foundation. Prereq: Admission to the PT professional program or consent of the instructor.

PT 655 NEUROMOTOR DEVELOPMENT. (3)
This is an advanced course on normal neuromotor development and the deviations from normal with emphasis on the infant. Prereq: Consent of instructor.

PT 668 RESEARCH TOPICS IN PHYSICAL THERAPY: ANALYSIS. (1-3)
This course is intended to introduce the student to methods of analyzing data and problems of writing a scientific paper for publication. Students will analyze data they have collected as it relates to their research problems. Their written manuscripts will be due at the end of this course. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year or permission of the instructor.

PT 669 RESEARCH TOPICS IN PHYSICAL THERAPY: OUTCOMES. (1-3)
This course is intended to introduce students to the process of turning a finished research manuscript into an oral research presentation. Students will be responsible for audiovisuals, handouts, and any other methods used to make their presentations. In addition to faculty advisor input and grading, students will critique their own presentations and gain experience in critique of other professional research presentations. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy professional program and successful completion of the second year or permission of the instructor.

PT 676 ELECTROPHYSIOLOGICAL TESTING AND THERAPEUTICS. (1-3)
The student is introduced to the principles of electricity, how it affects the muscle and nerve, its use in physical therapy for patient assessment and management, and its safety aspects. Lectures and laboratory exercises are included. Students in the professional program will enroll for at least one credit in the first year of the professional program and at least one credit in the second year of the professional program. May be repeated to a maximum of three credits. Prereq: Admission to the Physical Therapy Professional program and successful completion of the first two semesters of the program.

PT 686 SPECIALTY ELECTIVES. (1-4)
Introduction to emerging specialty areas within the physical therapy profession. Students will select multiple specialty areas under faculty direction. May be repeated to a maximum of 3 credits. Prereq: Admission to the Physical Therapy Professional program and active enrollment in the first semester of the professional curriculum or beyond or consent of the instructor.

PT 695 INDEPENDENT STUDY IN PHYSICAL THERAPY. (1-3)
Independent work devoted to specific problems or area of interest in physical therapy. Work to be supervised by a graduate faculty member proficient in the area under study. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

PT 705 SKELETAL MUSCLE PHYSIOLOGY AND ADAPTABILITY. (3)
A course designed to present a broad series of topics central to the understanding of human skeletal muscle physiology and therapeutic interventions. Course emphases will include muscle physiology rather than anatomic factors enabling the clinical implications of the dynamic alterable nature of muscle to be central. Included in these implications are aging, disease and injury processes, and therapeutic interventions/strategies. Prereq: Admission to the graduate program in Physical Therapy, or the Rehabilitation Sciences Ph.D. program or consent of instructor.

PT 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

PT 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

PT 770 SEMINAR IN PHYSICAL THERAPY PUBLIC HEALTH AND WELLNESS ISSUES. (2)
Each semester a contemporary topic in the field of physical therapy will be studied intensively. Lecture, two to three hours per week; laboratory, zero to two hours per week. May be repeated to a maximum of nine credits.

PT 804 BEHAVIORAL FACTORS IN HEALTH AND DISEASE ACROSS THE LIFESPAN. (3)
This course studies human behavior relating to health and disease and the organization of health care as a social system. Selected psychological and social science concepts are presented in a biobehavioral frame of reference across the lifespan and are applied to the consideration of specific problems in physical therapy. Prereq: Admission into the Professional Physical Therapy program.
PT 805 NORMAL FUNCTIONAL ANATOMY. (3) A regional study of the normal functional aspects of the neuromusculoskeletal system, including the basic principles of biomechanics and human locomotion. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy professional program and successful completion of the spring semester (first year of the professional program).

PT 814 FOUNDATIONAL SKILLS. (2) A course that lays the foundation for specific physical therapy procedures, basic to the delivery of care and professional development. Prereq: Admission to the Physical Therapy education program and consent of the instructor.

PT 815 BASIC CLINIC SKILLS. (3) Theory, techniques, rationale, physiologic effects, and indications of basic physical therapeutic procedures of hydrotherapy, thermal therapy, cryotherapy, muscle testing and goniometry evaluations, gait analysis, muscle function are presented in lecture. Techniques are demonstrated and practiced in laboratory. Prereq: Admission to the Physical Therapy professional program and successful completion of the spring semester (first year of the professional program).

PT 821 MANAGEMENT OF VASCULAR AND INTEGUMENTARY DISORDERS. (2) The theoretic and clinical framework for physical therapy assessment and management of patients with disorders of the vascular and integumentary system, (i.e., open wounds, burns, etc.) are discussed. The student will utilize a problem solving approach to select, implement tests and measurements as well as therapeutic interventions. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 825 PROSTHETICS. (2) This course will prepare the student to perform physical therapy evaluation and provide patient management as part of a prosthetic team. Lecture, 18 hours; laboratory, 34 hours. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 826 ORTHOTICS. (2) This course will prepare the student to perform the physical therapy evaluation and provide patient management as part of a orthotic or orthotic team. Lecture, 18 hours; laboratory, 30 hours. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 827 SPINAL CORD INJURY. (2) This course will apply material and techniques from prior classes to the acute and chronic treatment of the spinal cord injured individual. Use of evaluation skills, body mechanics, knowledge of anatomy and physiology and program planning will play major roles in the course. In addition, you will be encouraged to view the patient as a whole. Experiences will include patient demonstrations, videotapes, and personal experiences that will help you appreciate the lifestyle change that is inevitable after a severe injury. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 830 DIAGNOSTIC IMAGING, SCREENING AND INSTRUMENTATION. (2) This course presents diagnostic screening processes utilized in PT. Included are the applications of results from specialized imaging instrumentation. Prereq: Successful completion of the two previous second year courses in physical therapy.

PT 831 CLINICAL NEUROPHYSIOLOGY. (2) The study of the regional organization of the brain and spinal cord, the ways in which they connect and how these connectivities influence human behavior with emphasis on motor behavior. The effect of disease states on normal brain and spinal cord function will be discussed. Prereq: Admission to the Physical Therapy professional program and successful completion of the spring and summer semesters in the first year.

PT 834 INTRODUCTION TO PHYSICAL THERAPY AND BIOETHICS. (3) An orientation to the profession of physical therapy including history, professional organization, roles in health care, elementary patient care skills, use of the medical library and professional documentation. Bioethics will be introduced in relationship to moral issues in health care. Prereq: Admission to the Physical Therapy professional program.

PT 835 PHYSICAL THERAPY CLERKSHIP I. (1) The student receives campus based clinical and classroom preparation for clinical experience. The student then observes patient treatment by experienced staff members and is supervised in the performance of elementary procedures involved in patient care. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two semesters of the professional program.

PT 836 PHYSICAL THERAPY CLERKSHIP II. (3) Students progress from performance of basic skills under close supervision to performance of those skills with more independence and adding more opportunities for evaluation and treatment experiences. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first three semesters of the professional program.

PT 837 PHYSICAL THERAPY INTERNSHIP I. (4) This course is the first clinical internship. Students remain under supervision of clinical therapists, but have increasing independence in evaluation, examination, treatment and discharge planning in a variety of clinical settings at selected sites. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first six semesters of the professional program.

PT 838 PHYSICAL THERAPY INTERNSHIP II. (6) This course is the second clinical internship. Structure is similar to PT 837 but students continue to increase their repertoire of clinical skills and meet higher passing standards while receiving two additional weeks of clinical experience. Students will continue to perform physical therapy evaluation, examination, treatment and discharge. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two years of the professional program.

PT 839 PHYSICAL THERAPY INTERNSHIP III. (6) This course is the third of three clinical internships. Structure is similar to PT 837 and PT 838 but students continue to increase their repertoire of clinical skills. Students are expected to perform as entry level physical therapists by the end of the internship. Students are placed in appropriate sites throughout the Commonwealth and the United States. International experiences are available for selected students. Offered on a pass/fail basis only. Prereq: Admission to the Physical Therapy professional program and successful completion of the first two years of the professional program.

PT 840 ADVANCED CAPSTONE INTERNSHIP IV. (8) This course consists of a 12 week internship in which the students are assigned to clinical facilities throughout Kentucky and beyond. Prereq: Course work preceding this in the professional program.

PT 846 MEDICAL AND PHYSICAL THERAPY MANAGEMENT OF ORTHOPEDIC PROBLEMS. (2) An introduction to medical procedures, including history, physical exam, laboratory data, radiographic film and medical and physical therapy management of orthopedic problems, including fractures, soft tissue injuries, scoliosis, joint replacements, muscle transplants and tendon repairs, will be presented. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 847 MANAGEMENT OF NEUROLOGICAL SYSTEMS. (3) Medical and physical therapy management of neurological problems, including the neurological examination, seizures, degenerative and neurological diseases, will be presented. Lecture/ laboratory, patient contact, and case study formats will be used. Lecture, two hours; laboratory, two hours. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT 850 ADVANCED MANUAL INTERVENTIONS. (3) A combined lecture and lab series focusing on advanced manual interventions, their indications, contraindication, anticipated goals and expected outcomes. Topics will include spinal mobilization and manipulation, manual lymph drainage, soft tissue, neural tissue and connective tissue mobilization along with current topics introduced through advancement of knowledge in the profession. Prereq: Admission to the PT program and successful completion of the second year or the consent of the instructor.

PT 854 PATHOLOGY AND CLINICAL APPLICATION. (4) PT 854 is a medical pathology course where major diseases and conditions of the body’s systems are presented in terms of definition, etiology, pathogenesis, clinical presentation, prognosis and intervention. Prereq: Admission to the Physical Therapy professional program.

PT 856 THERAPEUTIC EXERCISE. (2) This introductory course provides an overview of therapeutic exercise and its relation to patient management, and development of skill in basic therapeutic exercise approaches for improving muscle performance, relaxation and mobilization. Lecture and laboratory sessions are included. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy professional program and successful completion of the spring semester in the first year.

PT 860 DIAGNOSIS AND MANAGEMENT OF COMPLEX PATIENTS. (3) Lecture and case-based small group discussion of patients who have complex management needs in the biomedical, physical, psychosocial, and/or spiritual realms. Prereq: Successful completion of all prior course work in the PT program.

PT 867 RESEARCH TOPICS: DESIGN. (1) This course will focus on designing a hypothesis-driven and/or goal oriented research project in the area of Physical Therapy. This will include determining the research area and question, choosing the correct research design for the research question, assessing the feasibility of the proposed project, gaining knowledge and experience in writing a research proposal, and estimating the potential outcomes of a project. This course will re-emphasize, build upon, and apply knowledge and skills acquired in PT 645 (Research Design and Measurement). This course will also enable the student to write a comprehensive research or project proposal for implementation. While students are given flexibility (based on advisor input) to design a project, all projects are expected to incorporate outcomes measurements. Prereq: Admission to the Physical Therapy program, successful completion of PT 645 or permission of the course instructor.
PT877 Cardiopulmonary Physical Therapy. (3)
A combined lecture, laboratory series about the theoretical and practical foundations necessary for entry-level physical therapists to conduct examinations and interventions for individuals with primary or secondary cardiac or pulmonary dysfunction. Case studies, demonstrations, and laboratory experiences are used to help the student. Prereq: Students must have successfully completed the first year of program.

PT887 Introduction to Physical Therapy Management. (1)
An introduction to basic management techniques including purpose, goals and objectives; contracts, task statement and analysis; position descriptions; medical; quality assurance; placement services. This course runs during the entire 12-week summer term. Prereq: Admission to the Physical Therapy professional program and successful completion of the first year.

PT888 Advanced Physical Therapy Management. (3)
Emphasis is placed on operational aspects of physical therapy department including relationship to total facility operation, designing and equipping a department, contracts, salaries, fees, personnel policies, records, data processing, budget process, medical-legal implication, continuing education, and the consultative process. Prereq: PT 887 or consent of instructor.

PT890 Professional Seminar. (1)
This course will provide a framework for preparation and completion of the comprehensive examination upon fulfillment of all other requirements for graduation from the physical therapy doctoral program. Students will be guided toward information that will increase their effectiveness in preparing for the exam which in turn provides an effective foundation for completion of professional certification after graduation from this program. Prereq: Admission to the Physical Therapy program, completion of all course requirements in the program or permission of the course instructor.

PT901 Introduction to Evidence-Based Practice. (3)
This course is designed to provide the participant with knowledge and hands-on experience in the integration of an evidence-based approach into practice. Students will learn how to critically review the literature and will acquire skills to integrate evidence into practice. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional—entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist.

PT904 Health Promotion and Disease Prevention. (2)
This 2 credit course is designed to increase the depth and breadth of the practitioner’s knowledge regarding health promotion, wellness and disease prevention, particularly as it is appropriate within the scope of PT practice. Utilizing valid theoretical constructs for behavioral change, the course will focus on clinical application and program design for effective promotion of health, wellness, and disease prevention for the individual and for the community. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional—entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902.

PT906 Advanced Physical Therapy Diagnosis and Screening. (3)
This course is designed to provide the PT practitioner with increased expertise in analysis and interpretation of multidisciplinary tests, measures, and screens in order to enhance PT diagnostic and screening skills. Instrumentation related to imaging techniques such as radiology, magnetic resonance, PET scans, and ultrasound will be addressed. In addition, specific foci will include nerve conduction velocity examination, as well as the use of the computer enhanced equipment (e.g. Biodeck, Cybex, BTE, Neurocom) for assessing strength, endurance, balance and function. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional—entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902.

PT908 Clinical Decision Making for Patients with Complex Problems. (3)
This course is designed to enhance the diagnosis and management skills of PT practitioners in providing care to individuals with complex problems related to chronic illness and/or neuromuscular pathology. This includes deepening practitioners’ knowledge base regarding pathology and clinical application, as well as enhancing their understanding regarding biopsychosocial-spiritual aspects of coping and adaptation as experienced by patients with multiple diagnoses and problems. Foundational material related to pharmacology, reimbursement, care environments, and cardiopulmonary pathology and management will be presented. Prereq: Admission to transitional DPT track and completion of a CAPTE accredited professional—entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902.

PT910 Clinical Decision Making for Patients with Complex Problems II. (2)
This course is designed to enhance the diagnosis and management skills of PT practitioners in providing care to individuals with complex problems related to acute illness and/or neuromusculoskeletal pathology. This includes deepening practitioners’ knowledge base regarding pathology and clinical application, as well as enhancing their understanding regarding biopsychosocial-spiritual aspects of coping and adaptation as experienced by patients with multiple diagnoses and problems. Prerequisite to this course is PT 908. The two courses are linked, taught in modular format sequentially. Prereq: Admission to transitional DPT Track and completion of a CAPTE accredited professional—entry level physical therapy program and successful achievement of licensure. Applicants will be required to have completed a minimum of 9 months of clinical activity as a professional physical therapist and PT 902 and 908.

PT912 Advanced Electives. (2)
This course is designed to allow the student to select an area of special interest for focus and investigation. The course work is designed to allow acquisition of knowledge and skill at an advanced level. Students will choose one specialty area out of a selection of elective topics for their in-depth study. Topics for advanced electives may vary each year based on student interest and faculty expertise. Prereq: Admission to the transitional DPT track or permission of the instructor.

RAS Radiation Sciences

RAS472G Interaction of Radiation with Matter. (3)
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radioactivity, energies of decay. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as PHY/RM 472G.)

RAS545 Radiation Hazards and Protection. (3)
An analysis of common radiation hazards encountered in medicine, research, industry, and the environment. Regulations and procedures for the safe use of ionizing and nonionizing radiations. Lecture, two hours; laboratory, two and one-half hours. Prereq: PHY/RM 472G or consent of instructor. (Same as PHY/RM 545.)

RAS546 General Medical Radiological Physics. (3)
The uses and dosimetric aspects of radiation in medicine will be analyzed, including many basic applications in the fields of diagnostic radiology physics, therapy physics, and nuclear medical physics. Prereq or concur: RM PHY/RM 472G or consent of instructor. (Same as PHY/RM 546.)

RAS601 Advanced Radiation Dosimetry. (2)

RAS610 Ethnics in Clinical Sciences Research. (1)
Students will examine ethical issues in biomedical research using a case-study approach. Representative issues addressed may include data selection and retention, plagiarism, scientific review of grants and manuscripts, scientific misconduct, and informed consent. Prereq: Graduate student status. (Same as C/D/CLS/CNU/PT 610.)

RAS647 Physics of Diagnostic Imaging. (3)
Specialized and advanced topics in diagnostic imaging, including modulation transfer function analysis, image processing algorithms, acceptance testing, CT, NMR, ultrasound, etc. Prereq: PHY/RM/RAS 546 or consent of instructor. (Same as RM 647.)

RAS648 Physics of Diagnostic Imaging II. (3)
A continuation of RAS/RM 647. Specialized and advanced topics in nuclear medicine imaging physics, including positron emission tomographic procedures, emerging new modalities, and quality control. Prereq: RM/RAS 647 or consent of instructor. (Same as RM 648.)

RAS649 Physics of Radiation Therapy. (3)
Specialized external beam and brachytherapy treatment planning; advanced Bragg-Gray cavity applications, including Nasug and TG-21: calibration, acceptance testing, and quality control of therapy physics equipment. Prereq: RAS/RM/PHY 546 and RAS/RM 601, or consent of instructor. (Same as RM 649.)

RAS650 Physics of Radiation Therapy II: Brachytherapy Physics. (2)
A presentation of the full scope of use of implanted radiation sources for medical purposes. Topics include consideration of all aspects of brachytherapy dosimetry and treatment planning as well as modern and cutting-edge brachytherapy clinical procedure. Characteristics of intrastitial, intracavitary, and intraluminal implants, as well as remote afterloaders, are considered. Prereq: RAS/RM/PHY 546; RM/PHY 472G; RAS/RM 649 (may be co-requisite). (Same as RM 650.)
**RAS 651 ADVANCED LABORATORY INDIAGNOSTIC IMAGING PHYSICS.** (1-3)
Specialized experiments involving the use, calibration, and quality control of x-ray and other diagnostic imaging equipment, and the appropriate use of radiation detectors in diagnostic physics measurements. Laboratory, approximately 30 hours per credit. May be repeated to a maximum of three credits. Prereq: RM/PHY 472G, RAS/RM 546; and concurrent: RAS/RM 647, or equivalent, plus graduate standing in the radiation science program.

**RAS 695 RESEARCH IN THE HEALTH-RELATED RADIATION SCIENCES.** (1-4)
Independent directed research on theoretical and practical problems in the health-related radiation sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing in one of the radiation-related sciences, plus consent of instructor. (Same as RM 695.)

**RAT 710 RADIATION SCIENCE SEMINAR (Subtitle required).** (1)
Topics of current interest relating to radiation and its applications in the areas of radiological medical physics and health physics. May be repeated to a maximum of four credit hours with consent of instructor. Prereq: Graduate standing in a radiation-related science.

**RAS 849 RADIATION SCIENCES PRACTICUM.** (1-6)
Applied practicum experiences in the radiation sciences. Laboratory, 40 hours per week equals one credit hour. Prereq: Advanced graduate standing in the radiation sciences.

---

**RBM Physical Medicine and Rehabilitation**

**RBM 815 FIRST-YEAR ELECTIVE, PHYSICAL MEDICINE AND REHABILITATION.** (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Physical Medicine and Rehabilitation. The intent is to provide the student an opportunity for exploration and study in an area which complements and or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

**RBM 825 SECOND-YEAR ELECTIVE, REHABILITATION MEDICINE.** (1-4)
The student will be assigned to a faculty member and will attend inpatient rounds and staff conferences on the Spinal Cord Injury, Brain Injury or Stroke units at Cardinal Hill Hospital. Student will attend OT and PT Clinics with assigned patients; a brief discussion paper will be required on an assigned topic.

**RBM 850 ACTING INTERNSHIP IN REHABILITATION MEDICINE.** (1-6)
Acting internship in Rehabilitation Medicine. May be repeated to a maximum of eight credits. Prereq: Medicine and/or surgery clerkship.

**RBM 851 OUTPATIENT REHABILITATION (PHYSICAL MEDICINE).** (4)
An introduction to outpatient physical medicine and rehabilitation that encompasses primarily musculoskeletal disorders such as low back pain, chronic pain, sports medicine and amputee clinic. In addition, the medical student will be exposed to electrodiagnostic procedures and soft-tissue injection techniques. Students will be under direct supervision of a resident and an attending during clinic hours (8 a.m. - 5 p.m.) five days per week. Laboratory, 40 hours per week.

**RBM 852 PEDIATRIC ORTHOPAEDIC REHABILITATION.** (4)
An introduction to pediatric rehabilitation and pediatric orthopedies with emphasis on the total care of children with chronic neuromuscular or orthopedic diseases, including cerebral palsy, spina bifida, and juvenile rheumatoid arthritis. Other possibilities for clinical involvement include pediatric clinics in hip disease, foot and hand problems, spine disease and pediatric proctiatrics. Students will be under the direct supervision of attendings from Rehabilitation Medicine, Pediatrics, and Orthopaedic Surgery. Laboratory, 40 hours per week.

---

**RC Rehabilitation Counseling**

**RC 516 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES.** (3)
This course is designed to prepare rehabilitation counselors and social workers to become interpreters of medical information concerning major disabilities and to provide understanding of the psychosocial factors encountered by the disabled. Focus will be on how these factors affect adjustment to a disability, and on professional practice with the disabled. Topics include concepts of medical and psychosocial aspects of disability which relate to conditions that impair bodily systems and or structures due to illness or accident that result in permanent and/or chronic functional limitations. Prereq: College level courses in biology and psychology or consent of instructor. (Same as SW 516.)

---

**RHB Rehabilitation Sciences**

**RC 515 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES.** (3)
This course is designed to prepare rehabilitation counselors and social workers to become interpreters of medical information concerning major disabilities and to provide understanding of the psychosocial factors encountered by the disabled. Focus will be on how these factors affect adjustment to a disability, and on professional practice with the disabled. Topics include concepts of medical and psychosocial aspects of disability which relate to conditions that impair bodily systems and or structures due to illness or accident that result in permanent and/ or chronic functional limitations. Prereq: College level courses in biology and psychology or consent of instructor. (Same as SW 515.)
RC613 LEGAL AND PARENTAL ISSUES SCHOOL ADMINISTRATION. (3)
This course is designed as a required course for certification in the school administration program or elective in graduate or post baccalaureate degree. Essential course questions will emphasize the delivery of a free and appropriate public education for children with disabilities within a practical application format that is accessible and useful to educational professionals. In addition, the course will consider the implications of federal requirements in state and local policy. Particular attention will be given to leadership within an educational reform environment as we examine the cumulative impact of disability and related issues on the lives of children and their families. Finally, the course will model appropriate ways in which educational professionals working with families can maximize educational results for children with and without disabilities. Prereq: Be admitted to an Administrator preparation program, or received permission of instructor. (Same as EDS 613.)

RC620 VOCATIONAL EVALUATION AND WORK ADJUSTMENT. (3)
This course includes effective methods and techniques used in determining and enhancing the vocational potential of persons with disabilities. Content also includes exploring the ethical practice of assessment and evaluation. Test development, reliability, validity, and psychometrics, report writing, use of commercial evaluation systems, and the role of assessment in rehabilitation. Prereq: A vocational theories course and RC 520 or consent of instructor.

RC630 PLACEMENT SERVICES AND TECHNIQUES IN REHABILITATION COUNSELING. (3)
Development of skills for placement of persons with disabilities into a variety of settings—competitive employment, supported employment, independent living, philosophy of placement, preemployment analysis, client readiness techniques, job development, job engineering, employer attitudes, business rehabilitation, and social security disability. Occupation information and its use in the placement process. Labor market analysis and procedures for analyzing client residual and transferable work skills. Procedures for employability skills development. Prereq: A vocational theories course, RC 520 and 620 or consent of instructor.

RC640 REHABILITATION IN BUSINESS AND INDUSTRY. (3)
This course is designed to provide students with a comprehensive knowledge of rehabilitation in business and industry and the development of professional working relationships between the rehabilitation professional, employers, the insurance industry, and other professionals will be taught. A thorough overview of worker compensation, related legislation, and other insurance will be presented. The roles and functions of the rehabilitation professional in business rehabilitation counseling will be discussed. Prereq: Twelve hours of study in rehabilitation counseling or consent of instructor.

RC650 REHABILITATION COUNSELING THEORY AND PRACTICE. I. (3)
This is a two-semester sequence. This sequence is designed to provide an overview of theories of counseling and how they can be applied in a rehabilitation counseling context with regard to persons with disabilities. A goal of this course is to acquire knowledge about theoretical orientations and to integrate theory with practice. Emphasis will be on helping students clarify beliefs, values, and personal style, and connecting those to the beliefs and values of the various theories. Emphasis will be on helping to recognize culture, class, and gender components, as well as identifying commonalties across theories as these relate to rehabilitation counseling. A goal is to develop rehabilitation counselors who function as reflective decision makers. Prereq: Admission to the rehabilitation counseling program or consent of instructor.

RC660 REHABILITATION COUNSELING THEORY AND PRACTICE. II. (3)
This is a two-semester sequence. This sequence is designed to provide an integration of techniques of counseling which are derived from theories of counseling and how they can be applied in a rehabilitation counseling context with regard to persons with disabilities. A goal of this course is to integrate theory with practice. The emphasis in this second course will be on the application of counseling theory to rehabilitation counseling practice with persons who have disabilities. Counseling techniques will be taught in the context of rehabilitation settings. A primary objective is to develop rehabilitation counselors who function as reflective decision makers. Prereq: RC 650 or consent of instructor.

RC670 GROUP AND FAMILY COUNSELING IN REHABILITATION COUNSELING. (3)
The course will prepare rehabilitation counselors and other human service providers to become knowledgeable in group and family techniques and practices related to disability. Prereq: Admissions to the rehabilitation counseling or other human services program, and have counseling theories and techniques course, and consent of instructor.

RC680 MENTAL HEALTH DIAGNOSIS AND TREATMENT PLANNING FOR COUNSELORS. (3)
This course is designed to provide students with a broad spectrum of psychological disorders that are encountered by rehabilitation counselors and other mental health professionals in various treatment settings. Specific attention is given to the etiology, prevalence, symptoms, and treatment of these disorders. Students will develop a better understanding of the multi-axial diagnostic system of the DSM-IV and the International Classification of Functioning. This course incorporates both national and global perspectives of psychological disorders. Prereq: A knowledge-base of theories and techniques of counseling is preferred by not required.

RC701 SEMINAR FOR SPECIAL EDUCATION LEADERSHIP PERSONNEL. (1-3)
Study of issues and topics affecting the preparation of special education personnel and of research issues involving persons with disabilities and educational programs. May be repeated to a maximum of six credits. Lecture, two hours per week. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 701.)

RC710 PRACTICUM IN REHABILITATION COUNSELING. (3)
Learning experiences under faculty supervision in a community-based or state rehabilitation agency. Application of counseling methods, techniques, and vocational knowledge in working with persons with disabilities. Lecture, two hours; laboratory, 14 hours per week. May be repeated to a maximum of six credits with consent of instructor. Prereq: A minimum of 12 graduate hours in rehabilitation counseling and consent of instructor.

RC711 SEMINAR IN ADVANCED REHABILITATION PRACTICES AND PROCEDURES. (3)
Advanced study of issues related to rehabilitation counseling, theory, research and practice including problem identification and assessment, program alternatives, services delivery models, theoretical and conceptual frameworks, the translation of theory and research into practice. Prereq. Admission to the doctoral program in Special Education and Rehabilitation Counseling.

RC712 SEMINAR IN SPECIAL EDUCATION PROFESSIONAL SERVICES. (3)
Study of procedures for providing special education professional services including consultation, technical assistance, continuing education programs, professional organization development, committee and advisory board involvement, professional writing and editing, leadership development, and funding proposal development. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 712.)

RC715 ADVANCED SEMINAR IN PSYCHOSOCIAL ASPECTS OF CHRONIC ILLNESS AND DISABILITY. (3)
This course is a doctoral seminar designed to provide advanced knowledge and understanding of psychosocial aspects of chronic illness and disability (CID), including theoretical, practice, and research approaches to the processes of adaptation to CID, coping, self-management and healthy decision making, historical and sociological perspectives on disability and cultural and global perspectives, responses, and attitudes about disability, developmental and lifespan issues, and evidence-based practice in professional rehabilitation counseling practice, policy, and education. Students will engage in advanced analysis and synthesis of relevant theories and their application, and develop knowledge, skill, and experience in the application of research findings to practice. Prereq: Admission to Ph.D. program in rehabilitation counseling, research, policy, and practice. Prereq: Admission to the Ph.D. program in Special Education and Rehabilitation Counseling or permission of instructor.

RC721 PRACTICUM IN SPECIAL EDUCATION PERSONNEL PREPARATION. (1-9)
Supervised practicum experiences related to the preparation of special education teachers, including practice in delivering lectures, conducting class discussions, leading seminars, and directing independent studies, guiding student research projects, demonstrating instructional methods and materials, supervising special education student teachers and advising. Laboratory, three-nine hours. May be repeated to a maximum of nine credits. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 721.)

RC730 INTERNSHIP IN REHABILITATION COUNSELING. (3,6,9)
Advanced learning experiences in a rehabilitation setting or agency. Lecture, two hours; laboratory, 14, 28 or 42 hours per week. May be repeated once for a maximum of nine credits. Prereq: A minimum of successful completion of one year in the Rehabilitation Counseling Program and RC 710 and consent of instructor.

RC735 ADVANCED METHODS FOR TEACHING AND CONDUCTING RESEARCH IN REHABILITATION COUNSELING: FROM THEORY TO PRACTICE. (3)
Advanced study of issues related to developing a theoretical framework for conducting and teaching rehabilitation counseling research. The course will incorporate rehabilitation counseling theory into researchable paradigms. The focus will be on understanding issues related to disability, developing a theoretical framework for rehabilitation research, and applying research findings to teaching, practice, policy, and research evaluation. Prereq: Admission to the Ph.D. program in special education and rehabilitation counseling.

RC740 ADMINISTRATION, SUPERVISION AND PROGRAM EVALUATION IN REHABILITATION COUNSELING. (3)
Administrative and supervisory aspects of rehabilitation service delivery. Administration, clinical and technical supervision, staffing, and organizational structure(s) of the rehabilitation service delivery system (state, local, and federal). Research, program evaluation, political and ethical aspects of rehabilitation administration and supervision are overviewed. Prereq: Admission to Ph.D. program in Special Education or Rehabilitation Counseling or consent of instructor.

RC750 REHABILITATION RESEARCH AND PROGRAM EVALUATION. (3)
Introduces students to research methodology, rehabilitation counseling research, and program evaluation. Provides a comprehensive introduction to rehabilitation research, research design, ethical issues in research, hypothesis testing, research proposal development, research utilization in practice, and program evaluation methods. This is not a statistics course, however, students will be introduced to basic statistics concepts and terms. Prereq: A basic research course and RC 520 or consent of instructor.

RC760 CONTEMPORARY PRACTICES IN REHABILITATION. (1-3)
Contemporary practices including supported employment, independent living, engineering and technology, family matters, client rights, ethical practices, cultural diversity, aging, and present and future trends in the field of rehabilitation. Analysis of legislation, value systems, political and economic fluctuations and research. Prereq: A minimum of 12 graduate hours in rehabilitation counseling or consent of instructor.
RC 767 DISSEMINATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for the course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended. Prereq: Admission to Ed.S., EDS, RC, or IEC Ph.D. Programs. (Same as EDS/IEC 767.)

#RC 770 ADVANCED SEMINAR IN REHABILITATION COUNSELING THEORY, PRACTICE, AND EDUCATION. (3)
This course is a seminar designed to provide advanced knowledge and understanding of personality and counseling theories and techniques and their application in professional rehabilitation counseling practice and education, rehabilitation counseling process and outcome research, and the application of counseling theory across diverse populations and settings. Students will engage in advanced analysis and synthesis of counseling theories and their application, and develop knowledge, skill, and experience in the application and teaching of related content in rehabilitation counseling education, research, and practice. Prereq: Admission to the Ph.D. program in Special Education and Rehabilitation Counseling.

RC 782 DIRECTED INDEPENDENT STUDY. (3)
Study of an individually selected topic relevant to a student’s academic development. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

RM Radiation Medicine
RM 472 INTERACTION OF RADIATION WITH MATTER. (3)
Basic aspects of the interaction of ionizing radiation with matter. Bohr atom, atomic spectra, radioactivity, energetics of decay. Sources of radiation, penetration of charged particles, electromagnetic radiation, and neutrons through matter; excitation and ionization processes; selected nuclear reactions; basic radiation detection and dosimetry. Prereq: PHY 213 or 232; MA 114 (may be taken concurrently); or equivalent. (Same as PHY/RAS 472.)

RM 545 RADIATION HAZARDS AND PROTECTION. (3)
An analysis of common radiation hazards encountered in medicine, research, industry, and the environment. Regulations and procedures for the safe use of ionizing and nonionizing radiations. Lecture, two hours; laboratory, two and one-half hours. Prereq: PHY/RM 472G or consent of instructor. (Same as PHY/RAS 545.)

RM 546 GENERAL MEDICAL RADIOPHYSICAL SCIENCE. (3)
The uses and dosimetric aspects of radiation in medicine will be analyzed, including many basic applications in the fields of diagnostic radiology physics, therapy physics, and nuclear medical physics. Prereq: Consent of instructor. (Same as PHY/RM 546.)

RM 601 ADVANCED RADIATION DOSIMETRY. (2)

RM 647 PHYSICS OF DIAGNOSTIC IMAGING I. (3)
Specialized and advanced topics in diagnostic imaging, including modulation transfer function analysis, image processing algorithms, acceptance testing, CT, NMR, ultrasound, etc. Prereq: PHY/RM/RAS 472G or consent of instructor. (Same as RM 647.)

RM 649 PHYSICS OF DIAGNOSTIC IMAGING II. (3)
A continuation of RAS/RM 647. Specialized and advanced topics in nuclear medicine imaging physics, including positron emission tomographic procedures, emerging new modalities, and quality control. Prereq: RM/RAS 647 or consent of instructor. (Same as RM 649.)

RM 649 PHYSICS OF RADIATION THERAPY. (3)
Specialized external beam and brachytherapy treatment planning; advanced Bragg-Gray cavity applications, including Ngs and TG-21; calibration, acceptance testing, and quality control of therapy physics equipment. Prereq: RAS/RM/RM 546 and RM/RM 601, or consent of instructor. (Same as RM 649.)

RM 650 PHYSICS OF RADIATION THERAPY II: BRACHYTHERAPY PHYSICS. (2)
A presentation of the full scope of use of implanted radiation sources for medical purposes. The course includes consideration of all aspects of brachytherapy dosimetry and treatment planning as well as modern and cutting-edge brachytherapy clinical practice. Characteristics of interstitial, intracavitary, and intraluminal implants, as well as remote afterloaders, are considered. Prereq: RAS/RM/RM 546; RM/RM 472G; RAS/RM 649 (may be co-reqquisite). (Same as RM 650.)

RM 660 GRADUATE PRACTICUM IN RADIATION MEDICINE. (1-6)
Applied field work at the graduate level in the sciences relating to radiation medicine. May be repeated to a maximum of six credits. Prereq: Graduate standing in the bionradiation or medical sciences, plus consent of instructor.

RM 695 RESEARCH IN THE HEALTH-RELATED RADIATION SCIENCES. (1-4)
Independent directed research on theoretical and practical problems in the health-related radiation sciences. May be repeated to a maximum of eight credits. Prereq: Graduate standing in one of the radiation-related sciences, plus consent of instructor. (Same as RAS 695.)

RM 740 MAMMALIAN RADIATION BIOLOGY. (2)
The physical and biological sequelae of radiation effects will be discussed emphasizing human and mammalian responses and radiation health. Emphasis will be for health and medical workers. Prereq: Consent of instructor; BIO/RM 540 or RM 546 or equivalent background. (Same as BIO 740.)

RM 815 FIRST-YEAR ELECTIVE, RADIATION MEDICINE. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Radiation Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required core work in the first-year curriculum. Pass-fail only. Prereq: Admission to first-year, College of Medicine.

RM 825 SECOND-YEAR ELECTIVE, RADIATION MEDICINE. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Radiation Medicine. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required core work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

RM 842 RADIATION ONCOLOGY. (1)
Use of radiation therapy in clinical treatment of malignancy. Staging, histology, spread, treatment techniques, acute and late effects of radiation therapy. Prereq: RM 740 and an introductory anatomy course, or equivalent, and consent of instructor.

RM 848 PRACTICUM IN BRACHYTHERAPY PHYSICS. (1-3)
This course offers practicum training in the clinical use of therapy physics and health physics in brachytherapy. May be repeated to a maximum of three credits. Laboratory: 40 hours per week. Prereq: RM/HRS 649, or equivalent, and consent of instructional staff.

RM 849 PRACTICUM IN EXTERNAL BEAM THERAPY PHYSICS. (1-6)
This course offers practicum training in the professional use of therapy physics in external beam radiation therapy. May be repeated to a maximum of six credits. Laboratory: 40 hours per week. Prereq: RM/HRS 649, or equivalent, and consent of instructor.

RM 850-899 FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth-year, College of Medicine and or permission of the Student Progress and Promotions Committee.

Approved electives:
RM 850 RADIATION ONCOLOGY.
RM 852 RESEARCH IN RADIATION MEDICINE.

RS Religious Studies
RS 130 INTRODUCTION TO COMPARATIVE RELIGION. (3)
Comparative study of major world and selected regional religions with emphasis on analysis of belief, ritual, artistic expression and social organization. Eastern and Western religions are considered. (Same as ANT 130.)

RSC Reproductive Sciences
RSC 700 MAMMALIAN REPRODUCTION. (3)
The course will introduce students to the mammalian reproductive system and its function. The objective is to provide students with knowledge on the anatomy, endocrine regulation and physiology of reproduction. Comparison of reproductive function will be made among species and the scientific research methods used to investigate these systems will be introduced. Prereq: BIO 150 and BIO 152 or consent of the Course Director.

RSC 701 ADVANCED REPRODUCTIVE IMMUNOLOGY. (3)
Immune mechanisms involved during pregnancy will be covered with a focus on the interactions between the placenta and the material immune system. The role of the immune system on defects during pregnancy will be discussed, including the role in pre-term labor, implantation, and preeclampsia. The role of the normal immune system on the developing fetus will be covered. Prereq: Admission into the Ph.D. in Reproductive Sciences program or consent of instructor.

RSC 702 MOLECULAR REPRODUCTION. (3)
The in-depth structure and function of the mammalian reproductive system will be studied as it relates to the understanding of human reproduction at the molecular level. Both male and female reproductive organs and associated hormones and behaviors will be studied. Experts in relevant fields will give lectures and students will be involved in discussions with the lecturers. Prereq: Admission into the Reproductive Sciences Ph.D. program or permission of the course director and/or HIS 601.
RSD 703 BIOLOGY AND THERAPY OF REPRODUCTIVE CANCERS. (3)
The course will introduce students to the fundamentals of biological and molecular events related to disease progression, and to current therapeutic modalities for the treatment of reproductive cancers. The course will include lectures for each topic area. In addition, there will be discussions and student presentations on related topics. Prereq: Admission to the Ph.D. program in Reproductive Sciences, or consent of the instructor. Courses in cell biology, molecular biology and cancer therapy are helpful prerequisites.

RSC 767 REPRODUCTIVE SCIENCES POST-QUALIFYING RESEARCH. (2)
Research in Reproductive Sciences following successful completion of the qualifying examination. Research initiated in RSC 790 will be expanded to answer a proposed research question or questions. Following acceptable collection of data the student will write a dissertation and defend the dissertation at an oral defense. In addition the student must submit his/her findings to a peer-reviewed scientific publication journal. Prereq: Successful completion of the qualifying examination.

RSC 790 REPRODUCTIVE SCIENCES PRE-QUALIFYING RESEARCH. (1-5)
Research in Reproduction Sciences prior to the pre-qualifying examination. Students will identify a research problem, develop research skills, apply research methods and write a research proposal. Prereq: Successful completion of years 1 and 2 of the RSC Ph.D. curriculum, including rotations in a minimum of 3 different research laboratories.

RSD 810 FUNDAMENTALS OF OPERATIVE DENTISTRY. (2)
This lecture course in operative dentistry is designed to provide a beginning student with basic knowledge about cavity preparation and restorative techniques for amalgam and resin composite. This course, together with a complementary laboratory course, RSD 814, is directed at preparing the student with knowledge and skills in the diagnosis and treatment of carious lesions necessary for patient care in operative dentistry. Prereq: RSD 812, or consent of course director; coreq: RSD 814.

RSD 811 PRINCIPLES OF DENTAL ANATOMY, MORPHOLOGY AND OCCLUSION. (3)
This introductory lecture course is designed to provide the dental student with necessary knowledge of dental anatomy, dental morphology and basic dental occlusion for all succeeding courses in preclinical and clinical dentistry. This includes a detailed description and study of individual teeth, relationship of dentofacial and mandibular movement and occlusion to muscles of mastication. Lectures related to biomaterials are added as needed. Prereq: Admission to the college or consent of the course director. Coreq: RSD 812.

RSD 812 PRINCIPLES OF DENTAL ANATOMY, MORPHOLOGY AND OCCLUSION (LABORATORY). (3)
This introductory laboratory course is designed to provide the beginning dental student with skills manipulating wax to successfully replicate the dental anatomy of individual teeth as well as learning the relationships of form and function within the context of mandibular movement. These skills are learned by use of the dentoform as well as dental articulator. Laboratory experiences relating to dental biomaterials are introduced as needed. Prereq: Admission to the college or consent of course director. Coreq: RSD 811.

RSD 814 PRECLINICAL OPERATIVE DENTISTRY. (2)
This first-year preclinical laboratory course in operative dentistry is designed to provide a beginning student with basic skills for cavity preparation and restorative techniques for amalgam and resin composite. This course, together with the complementary lecture series course RSD 810 is directed at preparing the student with the knowledge and skill necessary for patient care in operative dentistry. Laboratory 69 hours. Prereq: RSD 812, RSD 810 as corequisite, or consent of instructor.

RSD 816 ESTHETIC DENTISTRY. (1)
This lecture course is designed to provide a beginning student the basic principles of cavity preparation and restoration with esthetic dental materials. Materials include resin composite, resin ionomer and glass ionomer. This course, together with the complementary laboratory course, RSD 818, is directed at preparing the student with knowledge and skills in the diagnosis and treatment of esthetic tooth structure associated with esthetic dentistry. Prereq: RSD 812, RSD 810, RSD 814 or the consent of the course director.

RSD 818 PRECLINICAL ESTHETIC DENTISTRY. (1)
This first-year preclinical course in esthetic dentistry is designed to provide a beginning student with the basic skills for cavity preparation and restorative techniques for using tooth-colored restorative materials. This course, together with the complementary lecture series course, RSD 816, is directed at preparing the student for patient care in esthetic dentistry. Prereq: RSD 812, RSD 810, RSD 814 or consent of the course director.

RSD 821 CLINICAL RESTORATIVE DENTISTRY. (3)
This course emphasizes clinical application of principles taught in preclinical courses. Concepts of diagnostic and therapeutic procedures as well as preventive measures are applied in the clinic with emphasis on the demonstration of competency in rendering primary care type treatment procedures. Prereq: RSD 814; coreq: RSD 824.

RSD 822 PRINCIPLES OF DENTAL OCCLUSION AND ARTICULATION. (3)
This didactic course with emphasis on the basic knowledge required for tooth preparation and indirect single tooth dental restoration. The materials science and correct manipulation of dental stones, alloys and luting agents are emphasized. Prereq: RSD 812, RSD 810, RSD 814, RSD 816, or consent of instructor.

RSD 823 PRECLINICAL RESTORATIVE DENTISTRY I. (1)
This course is a continuation of RSD 823 with emphasis on single tooth indirect intracoronal restorations and restorations of the endodontically treated tooth. Prereq: RSD 823.

RSD 835 ADVANCED AESTHETICS IN RESTORATIVE DENTISTRY. (2)
This course is designed to introduce current concepts in esthetic restorative dentistry to undergraduate dental students in their third year. The techniques presented will be based upon previously developed restorative didactic and clinical knowledge, but incorporate additional dental techniques and materials developed specifically for esthetic dentistry. Current dental materials being used by this discipline will be discussed as they apply to specific topics. Lecture, 16 hours; laboratory, 27 hours. Prereq: RSD 821 and RSD 824, or consent of course director.

RSD 841 CLINICAL RESTORATIVE DENTISTRY III. (3)
As the final phase in the undergraduate clinical curriculum, this course continues to emphasize primary care concepts and proficiency. In addition, more complicated restorative and occlusal dysfunction problems are encountered by the student under faculty supervision. Lecture, 16 hours; laboratory, 27 hours. Prereq: RSD 810, RSD 814, RSD 816, RSD 821, RSD 823, RSD 825, RSD 826, and RSD 827.

RSD 845 CLINICAL RESTORATIVE DENTISTRY II. (2)
This course is directed toward the examination, diagnosis, treatment planning, and treatment of various occlusal problems. The student will learn the skills needed to analyze the dental occlusion of patients and to plan successful occlusal treatment including restorative procedures and fixed prosthetic treatment. The course will concentrate on developing technical skills and learning assessment criteria related to mounted study casts, occlusal examination and analysis, such as occlusal adjustment, diagnosis, bite-waxing and planning, and the fabrication of a muscle relaxation occlusal splint. Lecture, 23 hours; laboratory, 27 hours; clinic, 27 hours. Prereq: CDS 815, RSD 812, or with approval of the course director.

RSD 846 PRECLINICAL RESTORATIVE DENTISTRY II. (2)
This preclinical course places emphasis on oral hard tissue surgery and on their restoration to meet the biological needs of the patient. Tooth preparation and extracoronal restorations are performed on manikins and extracted teeth. Prereq: RSD 823, RSD 824, or consent of course instructor. Coreq: RSD 825.

RSD 853 ADVANCED AESTHETICS IN RESTORATIVE DENTISTRY. (2)
This course is designed to introduce current concepts in esthetic restorative dentistry to undergraduate dental students in their third year. The techniques presented will be based upon previously developed restorative didactic and clinical knowledge, but incorporate additional dental techniques and materials developed specifically for esthetic dentistry. Current dental materials being used by this discipline will be discussed as they apply to specific topics. Lecture, 16 hours; laboratory, 27 hours. Prereq: RSD 821, RSD 824, coreq: RSD 830 and RSD 834.

RSD 880 COMPACTED GOLD RESTORATIONS. (1)
This course introduces the student to the use of compacted gold as a restorative material. The restoration of Class II and Class V lesions is performed in the laboratory. Students are required to purchase gold they use in the course. Note: scheduling for this course will be outside of regularly scheduled clinic/class time. Prereq: RSD 824, third year standing.

RSD 882 ESTHETIC DENTISTRY ELECTIVE. (1)
This course is designed to introduce current concepts in esthetic restorative dentistry to undergraduate dental students in their fourth academic year. The techniques presented will be based upon previously developed restorative didactic and clinical knowledge, but incorporate additional dental techniques and materials developed specifically for esthetic dentistry. Current dental materials being used by this discipline will be discussed as they apply to specific topics. Lecture, nine hours. Note: scheduling for this course will be outside of regularly scheduled clinic/class time. Prereq: RSD 810, RSD 814, RSD 816, RSD 821, RSD 822, RSD 823, RSD 824, RSD 825, RSD 826, RSD 827 or consent of course director.
RUS 883 INTRODUCTION TO SPORTS DENTISTRY. (1) Introduction to Sports Dentistry is an elective course designed to educate about the opportunities available to become involved with sports teams in your community. The course topics will include: Types of dental injuries related to athletics, prevention of injuries, role of team dentist, types of sports guards and methods of fabrication of sports guards. Lecture: 10 hours; laboratory 0 hours, per course. Prereq: 4th-year dental student in good standing; consent of course director. Note: Scheduling of this course will be outside the regularly scheduled clinic class time.

RUS Russian

RUS 101 ELEMENTARY RUSSIAN. (4) The students are introduced to the language through grammatical explanations, recitation practice, and oral as well as written exercises. The emphasis is on the spoken language of everyday use, reading of graded Russian texts, vocabulary building and accurate pronunciation. Extensive work with tape recordings. Lecture, three hours; supervised recitation, one hour per week. Prereq: Russian Placement Exam. All students who have had two or more years of high school Russian as a native speaker of Russian and are enrolling in college-level Russian for the first time must take the Russian Placement Exam.

RUS 102 ELEMENTARY RUSSIAN. (4) A continuation of RUS 101. Lecture, three hours; supervised recitation, one hour per week. Prereq: RUS 101 or RAE 101, Russian Placement Exam or equivalent.

RUS 125 MAPPING RUSSIA (Subtitle required) (3) This course explores how the sense of place can define socio-cultural identity. It studies how places become living, breathing entities that take on a life of their own. They shape the people who live within them and the history of their nation. Places resonate in the art and literature produced in them and play a profound role in the variety of artistic expressions themselves. Possible topics include: Saint Petersburg, Siberia, Moscow, Vladimir/Suzdal, Vladivostock.

RUS 201 INTERMEDIATE RUSSIAN. (4) Systematic study of grammar. Introduction through simplified texts to the life and culture of Tsarist and Soviet Russia. Dictation, composition, conversation, and extensive oral practice. Lecture, three hours; recitation, one hour per week. Prereq: RUS 102 or RAE 102, Russian Placement Exam or the equivalent. (Required.)

RUS 202 INTERMEDIATE RUSSIAN. (4) A continuation of RUS 201. Lecture, three hours; recitation, one hour per week. Prereq: RUS 201 or RAE 201, Russian Placement Exam or equivalent. (Required.)

RUS 261 INTRODUCTION TO RUSSIAN STUDIES. (3) A study of Russian literature from its beginning to the present using selected major works of prose, poetry and drama. No knowledge of Russian is required.

RUS 270 RUSSIAN CULTURE 900-1000. (3) An introduction to and survey of Russian culture from its origins until the 20th century that acquaints students with the roots of Russian religion, the arts, architecture, music, folklore, and everyday life. Taught in English.

RUS 271 RUSSIAN CULTURE 1900-PRESENT. (3) An introduction to and survey of Russian culture since 1900 that acquaints students with the development of Russian and Soviet culture as manifested in the arts, architecture, music, folklore, religion, and everyday life. Taught in English.

RUS 301 ADVANCED INTERMEDIATE RUSSIAN I. (3) A course designed to increase students’ skills in the areas of listening, speaking, reading, and culture. More complex grammatical forms introduced; focus on control of basic grammar. Development of students’ lexicon through more advanced reading, conversation, watching films, listening to tapes, etc. Prereq: RUS 202 or equivalent.

RUS 302 ADVANCED INTERMEDIATE RUSSIAN II. (3) A course designed to increase students’ skills in the areas of listening, speaking, reading, and culture. More complex grammatical forms introduced; focus on control of basic grammar. Development of students’ lexicon through more advanced reading, conversation, watching films, listening to tapes, etc. Prereq: RUS 301 or equivalent.

RUS 370 RUSSIAN FOLKLORE (in English). (3) Central issues of Russian folk culture, particularly related to ritual, material culture, and oral lore; patterns and functions of folk architecture, clothing, and crafts in 19th C. peasant life.

RUS 375 SEMINAR IN RUSSIAN FILM. (3) This seminar will focus on the major films and film makers of the Soviet Union and Russia. Assumptions are made about the major artistic, political, cultural, and social influences and movements that shaped and produced Russian and Soviet film. Students will view not only masterpieces of Russian film literature, but also the best documentary films and animation that cinematographers and animators have produced over the last 90 years. In addition, students will explore how the history and products of Russian and Soviet film are woven into the larger context of world cinema history and practice. At the seminar’s conclusion students will understand not only the influence of Russian/Soviet cinema on the world stage, but also the components of the films themselves that contribute to their notoriety and lasting appeal.

RUS 380 NINETEENTH CENTURY RUSSIAN LITERATURE (in English). (3) A survey of Russian literature of the 19th Century. Emphasis is on the development of romanticism, the rise of realism, and end-of-century decadence. All readings, lectures, and discussions are in English. Students taking the course for Russian major credit are expected to do outside work in Russian.

RUS 381 RUSSIAN LITERATURE 1900-PRESENT (in English). (3) An in-depth examination of Russian literature since 1900, with special attention given to modernist trends, Socialist Realism, non-conformism, Russian literature abroad. Students taking the course for Russian major credit will be assigned readings in Russian.

RUS 395 INDEPENDENT WORK IN RUSSIAN. (1-3) Students who have the proper qualifications may undertake a special problem in reading and research. May be repeated to a maximum of six credits. (Recommended.)

RUS 400G RUSSIAN CULTURAL STUDIES (Subtitle required). (3) An in-depth exploration of a particular literary, cultural, cinematic topic in Russian cultural history. There will be a session for Russian speakers who will be expected to conduct part of their research using Russian materials. May be repeated to a maximum of six credits under a different subtitle.

RUS 403 ADVANCED RUSSIAN I. (3) Detailed study of complex grammatical forms. Continued emphasis on speaking, reading, listening, and writing on the advanced level. Prereq: RUS 302 or equivalent, consent of instructor.

RUS 404 ADVANCED RUSSIAN II. (3) Detailed study of complex grammatical forms. Continued emphasis on speaking, reading, listening, and writing on the advanced level. Prereq: RUS 403 or consent of instructor.

RUS 460G RUSSIAN LITERATURE 1900-PRESENT (in English). (3) A survey of Russian literature of the 19th Century. Emphasis is on the development of romanticism, the rise of realism, and end-of-century decadence. All readings, lectures, and discussions are in English. Students taking the course for Russian major credit are expected to do outside work in Russian. May be repeated under different subtitles to a maximum of six credits.

RUS 463 RUSSIAN FILM AND THEATER (Subtitle required). (3) Reading of selected major Russian plays as a basis for perfection of language skills, involving class discussions, compositions, and translation practice. May be repeated under different subtitles to a maximum of six credits. Prereq: Third-year knowledge of Russian or consent of instructor.

RUS 495G ADVANCED INDEPENDENT WORK IN RUSSIAN STUDIES. (1-3) Independent research in Russian Studies on an advanced level for undergraduates and for graduate students outside the discipline. Students will be required to establish a written contract with the relevant faculty member describing the tasks to be completed in the course. May be repeated to a maximum of six credits, or a total of six credits of RUS 395 and 495G. Prereq: Consent of instructor.

RUS 499G RUSSIAN STUDIES CAPSTONE SEMINAR (Subtitle required). (3) This interdisciplinary seminar on a topic in Russian Studies serves as a capstone course for Russian Studies majors. As such majors are required to write a substantive research paper in which they demonstrate their command of the depth and breadth of Russian studies across disciplines, as well as their ability to interpret and use sources in Russian. Prereq: Junior standing.

RUS 501 STRUCTURE OF RUSSIAN. (3) An in-depth study of the history and structure of Russian in a variety of textual contexts. Historical changes that have led to significant contemporary features will be emphasized. Taught in Russian. Prereq: RUS 404 or consent of instructor.

RUS 502 STRUCTURE OF RUSSIAN. (3) An overview of the sound system, morphological system and syntax of contemporary Russian. Prereq: RUS 501 or permission of instructor.

RUS 520 RUSSIAN TRANSLATION. (3) Translation of un-adapted texts from Russian to English, theory of translation, practice translation of various Russian texts, both technical and literary, focus on specific stylistic requirements, translation of short texts from English to Russian, introduction to oral interpretation. Prereq: RUS 302 or consent of instructor.

RUS 530 BUSINESS RUSSIAN. (3) Development of written and oral skills in Russian needed to conduct business activities in Russian-speaking areas of the former Soviet Union using various materials from banking, advertising, law, economics, and industry. Prereq: Third-year knowledge of Russian or consent of instructor.

RUS 670 TOPICS IN RUSSIAN CULTURE AND FOLKLORE (Subtitle required). (3) An investigation of Russian culture from the 1800’s to the present, with emphasis on specific topics. May be repeated up to nine credits under different subtitles.
SAG Sustainable Agriculture

SAG 101 INTRODUCTION TO SUSTAINABLE AGRICULTURE. (3)
Broad introduction to the environmental, economic and cultural components of sustainable food production and marketing. The definition, emergence, and growth of sustainable agriculture are discussed along with pertinent soil, crop and livestock management practices. Relationships between environmental stewardship, producer profitability, and community-based food systems are emphasized.

SAG 201 CULTURAL PERSPECTIVES ON SUSTAINABILITY. (3)
Examines cultural dimensions within the concept of sustainability through a close reading of texts addressing the relationship between people and nature. The application of cultural constructs used by individuals and societies in experiencing, interpreting and impacting the natural world are studied. Insights and observations of noted writers on environmental issues are discussed in relation to the interdependence between individuals, civilizations, and nature.

SAG 386 PLANT PRODUCTION SYSTEMS. (4)
In-depth analysis of the underlying principles of plant production systems. Successful strategies, based on application of the principles developed by lecture and laboratory activities, will be discussed in either agronomic or horticultural contexts. Special attention will be given to minimizing the environmental impact of the plant production techniques employed. Prereq: PLS 210 and PLS 360 or concurrently or consent of instructor. (Same as PLS 386.)

SAG 390 AGROECOLOGY. (3)
A general introduction to ecological principles and processes applied to agricultural ecosystems, including interactions between plants, soils, and animals on population, community and ecosystems scales. Course concepts will be applied to agricultural ecosystems that are of economic importance and ecological significance to the state of Kentucky. Emphasis will be placed on understanding how an ecological perspective can inform sustainable land management, the ecological basis for best management practices, and the interdisciplinary nature of agroecosystem management. (Same as PLS 390.)

SAG 395 RESEARCH IN SUSTAINABLE AGRICULTURE. (1-6)
Independent research related to some aspect of sustainable agriculture under the direction of a research mentor. The research may be conducted in the College of Agriculture, some other university unit on campus, or at an approved off-campus entity. Projects can include, but are not limited to, laboratory experiments, field-based research, and studies involving sociology, economics, anthropology, or related disciplines. There is a clear expectation that quantitative data collection and analysis will be an integral part of the research project. Prereq: Consent of instructor and approval of Learning Contract.

SAG 397 APPRENTICESHIP IN SUSTAINABLE AGRICULTURE. (3)
Provides students with hands-on experience operating an organic community supported agriculture produce farm and marketing its harvest in the local community. Students receive training across the full range of production and marketing activities under the guidance of the Course Coordinator and the professional staff of the farm management team. Prereq: SAG 101 and SAG 201, or consent of instructor.

SAG 490 INTEGRATION OF SUSTAINABLE AGRICULTURE PRINCIPLES. (3)
Examination of the complex scientific and social issues involving sustainable agriculture systems. Intensive experience in critical analysis of both quantitative and qualitative data will be provided, and students will consider substantive ethical issues and global themes. Students will evaluate the sustainability of different world agricultural systems and consider the potential implications. Prereq: Senior standing in College of Agriculture, SAG 201, 397.

SCIENCE

SCI 101 SCIENTIFIC REASONING. (3)
A lecture/recitation course that stresses quantitative and logical reasoning skills that form the basis of science courses. The course will emphasize how to take verbally presented problems, recognize the mathematical patterns within them, and solve them. Lecture, one hour; recitation, four hours per week. Prereq: Math ACT greater than or equal to 18, or MA 108R, or Math Placement Test.

SEM Science, Technology, Engineering, and Mathematics

SEM 110 INTRODUCTION TO STEM EDUCATION. (2)
Prepares school-based educators to learn how to engage adolescents in learning mathematics, science, computer science, and engineering. This course will introduce the foundations of STEM Education, learning environments, curriculum and instruction, standards and assessment, as well as contemporary issues related to the field. The roles, responsibilities and daily life of teachers, schools and students will be examined. This course includes 30 hours of experience in the field.

SEM 328 TEACHING SCIENCE IN THE ELEMENTARY SCHOOL. (3)
A critical analysis of a variety of objectives, instructional materials and evaluation techniques for teaching elementary school science. Use special emphasis on grades K-4. Consideration will be given to addressing the individual needs of a diverse student population. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and 12 hours of science. Coreq: EDC 322.

SEM 337 TEACHING MATHEMATICS IN ELEMENTARY SCHOOLS. (3)

SEM 345 TEACHING MATHEMATICS IN THE MIDDLE SCHOOL. (3)
A study of theoretical models and methodological strategies for teaching arithmetic, informal geometry, and introductory algebra at the middle school level. The course will include a critical analysis of a variety of objectives, instructional materials and strategies and evaluation techniques. Consideration will be given to addressing the individual needs of a diverse student population. Twenty hours of field experience are required in conjunction with EDC 322. Prereq: Admission to TEP and MA 202. Coreq: EDC 322.

SEM 348 METHODS OF TEACHING MIDDLE SCHOOL SCIENCE. (3)
A study of theoretical models and methodological strategies for teaching science at the middle school level. This course will include a critical analysis of a variety of objectives, instructional materials and strategies, and evaluation techniques for middle school science. Special needs of individuals in a diverse middle school population are emphasized. This course is in conjunction with a four-week field experience, consisting of two-week placements in the candidate’s areas of content concentration. Prereq: Admission to Teacher Education, 12 hours in science, or permission of instructor.

SEM 421 STEM EDUCATION METHODS. (3)
This course is intended to help future STEM Education teachers build a theoretical background and develop the practical skills needed to begin to develop themselves as effective teachers in the secondary classroom. Students will be introduced to, and gain hands-on experience with a variety of instructional materials appropriate for teaching STEM Education at the secondary level. Students are encouraged to be creative and reflective in developing, implementing, and evaluating practices associated with teaching STEM concepts and skills. A strong emphasis is placed upon helping students to develop an understanding of the processes of inquiry teaching, the processes of science and mathematics, as well as a deep conceptual understanding of their respective content area(s). This is part II of a two course sequence. This course requires a minimum of 100 hours of observation. Prereq: EDP 202, SEM 110, Admission into STEM PLUS Program.

SEM 422 STEM EDUCATION METHODS II. (3)
This course, the second in a two course series, is intended to further develop the practical skills needed to develop effective STEM Education teachers in the secondary classroom. Students will build upon the knowledge and experience they gained in SEM 421 by delving deeper into students’ content area(s) through field experiences, implementation of a variety of instructional materials, and development of curricula appropriate for teaching STEM Education at the secondary level. Students are encouraged to become creative and reflective in developing, implementing, and evaluating practices associated with teaching STEM concepts and skills. A strong emphasis is placed upon helping students to develop an understanding of the processes of inquiry teaching, the processes of science and mathematics, and a deep conceptual understanding of their respective content area(s). This is part II of a two course sequence. This course requires a minimum of 100 hours of observation. Prereq: SEM 421 and admission into the STEM PLUS Program.
SEM 423 ASSESSMENT IN STEM EDUCATION. (2)
The work in this course will help prepare future STEM teachers to create, examine, analyze, and critically utilize a variety of assessments found in K-12 education. Specific focus will be given to present day assessment issues and will also include the following interconnected components in relation to assessment: equity (high expectations and strong support for all students); curriculum (coherent, focused, comprehensive, and culturally inclusive); teaching (focus on understanding what students know and need to learn); learning (active construction of new knowledge) and technology (incorporation of technological influences in the teaching-learning process). Prereq: Admission into STEM PLUS Program. Taken concurrently will SEM 435.

SEM 435 STEM STUDENT TEACHING IN THE SECONDARY SCHOOL. (10)
SEM 435 is a ten credit hour course taken concurrently with student teaching. The purpose of student teaching is to help student teachers continue to develop their knowledge, strategies, and the skills necessary in order to become successful and productive secondary teachers capable of being a leader in the profession. With the support of cooperating teachers in area schools, the course instructor, and university field supervisors, student teachers will apply the theories, methods, and techniques they have learned in the past in addition to what they will learn during their concurrent student teaching experiences. Prereq: Consent of Program Advisor and admission into STEM PLUS Program.

SEM 445 APPLICATIONS OF TEACHING MIDDLE LEVEL MATHEMATICS. (3)
A study of theoretical models and methodological strategies for teaching mathematics at the middle school level. The course will include a critical analysis of equity issues in middle school mathematics. Lectures, using manipulatives across the curriculum, and strategies for promoting adolescents' curiosity in mathematics. This course is in conjunction with an eight-week field experience, consisting of approximately 2.5 weeks at the start of the semester and 5.5 weeks during the middle of the semester. Candidates will also attend their field placement at other times (e.g., district pre-planning, flexible Fridays) during the semester. Prereq: SEM 345 or permission of instructor.

SEM 448 APPLICATIONS OF TEACHING MIDDLE LEVEL SCIENCE. (3)
A study of applied models and methodological strategies for teaching science at the middle school level. This course will include applications such as project based learning, engineering design-based science, interdisciplinary science, and other innovative methods for applying national and state science standards to real world contexts. Special emphasis will be given to lesson study and peer teaching and evaluation. This course is in conjunction with an eight-week field experience, consisting of approximately 2.5 weeks at the start of the semester and 5.5 weeks during the middle of the semester. Candidates will also attend their field placement at other times (e.g., district pre-planning, flexible Fridays) during the semester. Prereq: SEM 348 or permission of instructor.

SEM 575 SEE BLUE MATHEMATICS CLINIC. (3)
This course focuses on clinical techniques for working with K-12 students who are struggling and/or have disabilities in learning mathematics. It is a course designed to develop both theoretical understandings and operational skills in working with students who struggle in mathematics. Classroom applications of the techniques are discussed. This course is a combination of lecture and application with a student client.

SEM 603 CURRICULUM AND INSTRUCTION IN STEM EDUCATION. (3)
This course introduces the fundamental issues related to curriculum and instruction in STEM programs. Major topics addressed will include (but will not be limited to), defining STEM education, its curricula, purposes, and past and present social and political influences affecting the development and focus of STEM education. Additional discussion will address the stakeholders of STEM education that participate in the development, testing, implementation, and assessment of STEM curricula. A major focus of the course will be on the viewing of selected STEM curricular programs that reflect research-based “best practices” in STEM education.

SEM 604 HISTORY OF STEM EDUCATION. (3)
The history of STEM Education course will begin with researching the background and development of each individual component of STEM (i.e., Science, Technology, Engineering, and Mathematics) education. This will follow with a historical comparison of these components highlighting their similarities as well as their differences. The course will conclude with a study of the entity, STEM Education, from the early 19th century America to the present focusing on reports and documents that have connected the Science, Technology, Engineering, and Mathematics disciplines and shaped current research and reform efforts.

SEM 610 TEACHER LEADERSHIP IN STEM EDUCATION. (3)
This course introduces fundamental issues related to classroom research, especially through the lens of action research, and what it means to be a teacher leader in the areas of STEM. Practical applications will be the primary focus simultaneously with learning and learning to lead. Collaboration and group work is a hallmark of action research; students in this course will demonstrate their abilities to design, diagnose, plan, implement, observe, and reflect in cooperation with classmates. The various roles and skills necessary to be an effective researcher will be discussed, as well as important issues related to empowerment, contextualization, ethical considerations, and validity. In addition, students will examine action research through the lens of innovation and their role as a future teacher leader.

SEM 613 EFFECTIVE USE OF TECHNOLOGY FOR MODELING-BASED INQUIRY IN STEM EDUCATION. (3)
This course is designed to help STEM educators explore educational technologies towards engagement in modeling-based inquiry in STEM Education. Students will learn the key components of facilitating modeling-based inquiry through their own building of accurate conceptual models of explanations of key STEM theories and underlying concepts. Utilizing technologies implemented in authentic STEM practice, students will learn how to facilitate pupils’ use of technologies to allow them to control observations, analyze data, recognize patterns, propose and revise their models of explanation, and communicate their models to their peers. Prereq: EDC 317 and/or EDC 607 or its equivalent or permission of instructor.

SEM 620 EQUITY IN STEM EDUCATION. (3)
This course is a seminar designed to study equity issues in the teaching and learning of STEM disciplines in P-20 education. A primary focus will be on enhancing teachers’ ability to use research and reflection for learning and leading. Throughout the course the relationship between theory and practice will be emphasized in an attempt to understand some of the complexities and challenges in addressing issues of equity in mathematics learning and teaching. Prereq: Graduate standing.

SEM 631 MATHEMATICS PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning mathematics and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

SEM 634 SCIENCE PEDAGOGY IN THE SECONDARY SCHOOL. (0-3)
Through campus and school-based experiences, students will learn how to engage young people in learning science and how to make decisions about planning instruction and develop assessment based on a sound knowledge base for applying content, materials, and methods (including educational technology) appropriate for high school students. May be repeated to maximum of three credits. Lecture, 1-3 hours; laboratory, 3-6 hours per week. Prereq: Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education).

SEM 670 ADVANCED STUDY IN THE TEACHING OF ELEMENTARY SCHOOL MATHEMATICS. (3)
New developments in modern elementary mathematics for teachers in the elementary school will be reviewed. Special emphasis will be given to a study of new teaching methods, application of published research, techniques and trends in mathematics in the elementary school. Prereq: Graduate standing.

SEM 674 ADVANCED STUDIES IN TEACHING ELEMENTARY SCHOOL SCIENCE. (3)
An advanced course for classroom teachers that focuses on implementation of instructional strategies and assessments for teaching elementary science. A review of contemporary research in teaching and learning science will be closely related to classroom instruction. Specific focus will be given to technology integration, assessment, and addressing the needs of diverse student populations. Prereq: Graduate standing.

SEM 675 THEORETICAL FOUNDATIONS OF MATHEMATICS EDUCATION. (3)
A survey of constructivism, cognitive science, and sociological and anthropological perspectives as fundamental theories for mathematical learning, and an overview of research context where these theories guide inquiries. Prereq: EDP 610 (Theories of Learning) or consent of instructor. Many concepts and theories in SEM 702 are related to learning theories. Past students felt better prepared for SEM 702 after taking EDP 610.

SEM 701 HISTORY OF MATHEMATICS EDUCATION. (3)
A study of mathematics education from early 19th century America to the present focusing on forces that connected mathematics, psychology, psychometrics, sociology, and technology. Prereq: EPE 651 or permission of the instructor.

SEM 702 THEORETICAL FOUNDATIONS OF MATHEMATICS EDUCATION. (3)
A survey of constructivism, cognitive science, and sociological and anthropological perspectives as fundamental theories for mathematical learning, and an overview of research context where these theories guide inquiries. Prereq: EDP 610 (Theories of Learning) or consent of instructor. Many concepts and theories in SEM 702 are related to learning theories. Past students felt better prepared for SEM 702 after taking EDP 610.

SEM 703 ADVANCED RESEARCH IN MATHEMATICS EDUCATION. (3)
An advanced seminar focusing on current critical research issues in mathematics education, the way research impacts education policies and practices, various methodological pursuits of researchers, and theory building.

SEM 704 DESIGNING PROJECT-BASED ENVIRONMENTS IN STEM EDUCATION. (3)
SEM 704 will give students the opportunity to explore STEM contents, technologies, instructional strategies, and assessments necessary in designing and developing a research-based, interdisciplinary, project-enhanced environment. In SEM 704 students will experience, evaluate, and design interdisciplinary, project-enhanced environments within STEM classrooms. Prereq: SEM 603 or permission of instructor.

SEM 706 RESEARCH IN STEM EDUCATION. (3)
Students will have the opportunity to learn about the research paradigms guiding STEM education research throughout history with critical analysis of those most utilized across the modern STEM education research communities. Students will acquire knowledge and skills that allow them to develop a research proposal with explicit discussion of their research assumptions and that targets meaningful and timely research questions in STEM education. Prereq: EDL 651, or EDP/EPE 557 and EPE 570, or EDP/EPE 660 or permission of instructor.
Course Descriptions

SEM 708 ENGINEERING IN STEM EDUCATION. (3)
SEM 708 will introduce students to the field of engineering and give them the opportunity to explore engineering concepts, engineering design, different fields of engineering, and engineering curricular materials for K-12 students. Research on including engineering in K-12 education and assessments necessary in designing and developing research-based, interdisciplinary, engineering-design curricula for K-12 students and teachers. In SEM 708 students will experience, evaluate, and design interdisciplinary engineering design-based curricula to be used within STEM classrooms. Prereq: EDC 707 or permission of instructor.

SEM 746 SUBJECT AREA INSTRUCTION IN THE SECONDARY SCHOOL. (0-9)
Students will teach in their subject areas in the schools full-time, meet regularly to discuss teaching effectiveness and strategies for improvement and develop their professional portfolios. May be repeated to a maximum of nine credits. Lecture, 3-9 hours; laboratory, 6-18 hours per week. Prereq: The appropriate methods course in the subject area (SOC 631, EDC 632, EDC 633, SEM 634 or EDC 635). Admission to the M.A./M.S. in Education (Initial Certification Option-Secondary Education). (Same as EDC 746.)

SEM 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

SEM 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

*SEM 770 SPECIAL TOPICS IN STEM EDUCATION (Subtitle required). (1-4)
This course is a seminar of topical offerings with variable topics in the study of philosophy, principles, trends and research associate with STEM Education. This seminar is designed to cover topical issues around current research and strategies in STEM Education as they relate to P-20 implementation. STEM Education is transdisciplinary and constantly changing. This course will address content specific and transdisciplinary issues within the context of new directives and initiatives. May be repeated to a maximum of twelve credits. Prereq: SEM 603 and/or SEM 706 or permission of instructor.

SEM 781 INDEPENDENT STUDY IN STEM EDUCATION. (1-3)
An independent study course for graduate students. May be repeated to a maximum of nine credits. Prereq: Consent of the Director of Graduate Studies and Program Advisor.

SOC Sociology

SOC 101 INTRODUCTION TO SOCIOLOGY. (3)
Introduction to the concepts and methods of sociology. Topics shall include socialization; group processes, social inequalities; social institutions; and social change. This course or its equivalent (RSO 102) serves as a prerequisite to all other Sociology courses. Students may not receive credit for both this course and RSO 102.

SOC 180 GLOBAL SOCIETIES IN COMPARATIVE PERSPECTIVE. (3)
A sociological study of the effects of globalization processes on contemporary societies. Particular emphasis is given to economic, political, and cultural globalization in relationship to two non-US societies (to be identified each semester by the instructor) as well as the Appalachian region of the United States.

SOC 235 INEQUALITIES IN SOCIETY. (3)
This course seeks to promote an understanding of inequalities in American society and how they are created by considering them in the context of the social origins, development, and persistence of inequalities in the United States and other societies. Bases of inequality that may be considered include race/ethnicity, class/status, gender/sexuality, age, political and regional differences as these relate to politics, social justice, community engagement, and/or public policy. Prereq: SOC 101 or CLD 102. (Same as AS 235.)

*SOC 299 INTRODUCTORY TOPICS IN SOCIOLOGY (Subtitle required). (3)
An introductory study of a selected topic in sociology.

SOC 302 SOCIOLOGICAL RESEARCH METHODS. (3)
A focus on issues of social and behavioral research design, covering such topics as the relationship between theory and research, the ethics of social science research, units of analysis, identification of variables and statement of hypotheses, sampling, measurement, and modes of social observation. Required for majors. Prereq: Sociology majors and minors only.

SOC 303 QUANTITATIVE SOCIOLOGICAL ANALYSIS. (3)
This course focuses on the use of quantitative analysis techniques and software in social and behavioral research, covering such topics as univariate and bivariate analysis, parameter estimation, and hypothesis testing. Required for majors. Prereq: SOC 302 or PSY 215.

*SOC 304 CLASSICAL SOCIOLOGICAL THEORY. (3)
A survey and analysis of theories of human social interaction and society from the nineteenth and early twentieth centuries. Works of theorists, such as Marx, Weber, Durkheim, Simmel, and Mead will be considered. Emphasis is on the development of sociology as a discipline. Required for majors.

SOC 305 CONTEMPORARY SOCIOLOGICAL THEORY. (3)
A survey and analysis of the major schools of contemporary sociological theory. Works of major theorists are included. Emphasis is on the conceptual structure of the different theories and the way in which they are applied in contemporary sociological analysis. Prereq: SOC 304.

SOC 334 SOCIOLOGY OF FAMILIES. (3)
A sociological study of the concepts, theories, issues, and research findings on families and the dynamics of family life, with an emphasis on the social context and diversity of families. Prereq: SOC 101 or CLD 102.

SOC 335 SOCIOLOGY OF GENDER. (3)
A sociological study of gender as a socially and culturally constructed phenomenon. Topics shall include the intersection of gender and race/ethnicity and class; sexualities; gender and social movements; sociological theories concerning gender; feminist theory; and research on the relevance of gender to various subfields of sociology. Prereq: SOC 101 or CLD 102.

SOC 339 INTRODUCTION TO CRIME, LAW AND DEVIANC. (3)
A sociological study of the extent and nature of crime, delinquency, and more general deviant behavior. Topics may include the relationship between crime, deviance and law; measurement of crime and deviance; sociological theories of crime and deviance; and crime/deviance typologies. Students may not receive credit for both this course and either SOC 436 or SOC 437. Prereq: SOC 101 or CLD 102.

SOC 340 COMMUNITY Interaction. (3)
Examines community effects on group and individual behavior from the perspective of sociological social psychology. By focusing on individuals, individuals in groups, and groups, special emphasis is given to how community context shapes the attributes, beliefs, and actions of individuals as well as their interactions with others. Prereq: CLD 102 or SOC 101 or consent of instructor. Primary registration access limited to SOC and CLD majors and remaining seats open during secondary registration. (Same as CLD 340.)

SOC 342 ORGANIZATIONS AND WORK IN SOCIETY. (3)
A sociological study of the roles of formal organizations and workplaces in society, including consideration of their structures and processes. Topics may include contemporary issues in the sociology of organizations and work, including bureaucratic and alternative structures; opportunities for worker participation; the role of leadership and decision-making; and the exercise of power in organizations. Prereq: SOC 101 or CLD 102.

SOC 343 POLITICAL SOCIOLOGY. (3)
A sociological study of the causes and consequences of the distribution of power in society. Topics may include the means by which social movements challenge power; the political institutions in which power is exercised; and the relationship of the political arena to other social institutions and policies. Prereq: SOC 101 or CLD 102.

#SOC 345 GLOBAL DIVISIONS OF LABOR: WORK AND ORGANIZATIONS IN THE WORLD ECONOMY. (3)
This course examines employment processes, unemployment in the global economy, and theories of the division of labor beginning with Marx, Durkheim, and Weber. This is followed by an analysis of jobs in the current global economy. First, it examines the processes by which jobs are created and destroyed through investment and various processes such as outsourcing and offshoring. Second, it looks at lean production and evidence-based medicine as forms of rationalization that emerged from scientific management and other processes. Third, it looks at the Internet and robotics are transforming work. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 347 INTERNATIONAL MIGRATION IN GLOBAL PERSPECTIVE. (3)
This course examines migration in a global perspective. It looks at immigration, emigration, and naturalization. It includes both legal and illegal immigration. All the major regions of the world are considered in a broad perspective, and then more specific forms of migration in specific countries are considered. Integration and naturalization processes are an important part of the mix. Both qualitative and quantitative evidence will be considered.

SOC 349 ECONOMIC SOCIOLOGY: CONSUMPTION, PRODUCTION AND THE SOCIAL CONSTRUCTION OF MARKETS. (3)
This course examines the field of economic sociology. It looks at consumption and production behavior in a variety of industries. It examines the labor market and how people are trained and find jobs. It looks at how people establish businesses and use investment to socially construct production. It looks at how markets are socially constructed and how market failures occur. Finally, it looks at the constructive role that government can play in controlling and promoting markets. Prereq: SOC 101 or CLD 102 or consent of instructor.

*SOC 350 TOPICS IN SOCIOLOGY (Subtitle required). (3)
Current research and conceptual developments in a selected topic or subfield of sociology. May be repeated to a maximum of six credits under different subtitles.

*SOC 351 GLOBAL SOCIOLOGICAL TOPICS (Subtitle required). (3)
Current research and conceptual developments in a selected topic or subfield of sociology related to international issues or globalization. Topics will facilitate an understanding of the relationship between local and global processes. May be repeated to a maximum of six credits under different subtitles. Prereq: SOC 101 or CLD 102 or consent of instructor.
SOC 360 ENVIRONMENTAL SOCIOLOGY. (3) A sociological study of the inter-relationship between human societies and the natural environment. Topics may include population growth; food systems; energy; climate change; risk perception; disasters; sustainability; social movements; and environmental justice. Prereq: SOC 101 or CLD 102. (Same as CLD 360.)

#SOC 363 ENVIRONMENTAL JUSTICE. (3) This course focuses on environmental injustices and movements for social justice both within the United States and abroad. It examines the extent to which disadvantaged groups, including people of color, low-income communities, and people of the Global South, bear a disproportionate share of environmental toxins and hazards in the world. It also examines the emergence and characteristics of environmental justice movements grassroots and community-based efforts to deal with environmental threats. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 380 GLOBALIZATION: A CROSS-CULTURAL PERSPECTIVE. (3) A sociological study of how globalization processes affect development in various countries and world regions. Topics shall include development theory; comparative development processes and outcomes; and development policy options. (Same as CLD 380.)

SOC 395 INDEPENDENT WORK. (1-3) Independent study of special topic under the supervision of faculty. Students must identify both a project topic and a sociology faculty mentor who has agreed to supervise this project. Students taking this course must be Sociology majors or minors and must have a 3.0 GPA in the department. A learning contract must be filed in the department in order to receive a grade for this course. May be repeated to a maximum of six credits. Prereq: SOC 101 or CLD 102, SOC major or minor, GPA of 3.0 or above in the department, consent of faculty mentor and learning contract.

SOC 399 PRACTICUM IN SOCIOLOGY. (1-12) A service learning or internship experience in sociology under the supervision of a faculty member or instructor. May be repeated to a maximum of 12 credits. Maximum of six hours of SOC 399 will count toward Sociology Major requirements; maximum of three hours of SOC 399 will count toward Sociology Minor requirements. Pass/fail only. Prereq: SOC 101 or CLD 102, SOC major or minor, consent of instructor and learning contract.

SOC 420 SOCIOLOGY OF COMMUNITIES. (3) A sociological study of issues relevant to communities. Topics may include: conceptual approaches to community; organizational and institutional linkages within and beyond the community; social inequality and social processes within communities such as social networks, social capital, power and decision-making, and social change. Prereq: SOC 101 or RSO 102 or CLD 102, and one of the following: SOC 302 or 304 or CLD 405; or consent of instructor. (Same as CLD 420.)

SOC 432 RACE AND ETHNIC RELATIONS. (3) Analysis of relationships between racial and ethnic groups and the behavioral products thereof. Sources and consequences of prejudice and discrimination. Situation and prospects of minorities. Strategies of change and tension reduction. Prereq: Six hours of social science or consent of instructor. (Same as AAS 432.)

SOC 435 TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3) A sociological study of topics relevant to social inequalities and stratification. May be repeated under different subtitles to a maximum of six credits. Prereq: SOC 101 or CLD 102; SOC 235; and either SOC 302 or 304. (Same as AAS 433.)

#SOC 438 CROSS-NATIONAL CRIME. (3) The purpose of this course is to teach students how to describe and explain geographic and historical variations in the amounts and types of crime across countries and to understand contemporary transnational crime problems. Students will critically examine the data, methods, and theories used to measure and explain crime across nations and over time. They will learn how to make informed comparisons across a broad range of countries and world regions. Additionally, students will be introduced to the complexities of studying large-scale international and transnational crimes, like genocide. Prereq: SOC 101 or CLD 102 or consent of instructor.

SOC 439 TOPICS IN CRIME, LAW AND DEVIANC (Subtitle required). (3) A sociological study of a special topic relevant to the scientific study of crime, law, or deviance. May include such topics as deviant subcultures; substance use; social control of crime; sociology of law; and philosophies of punishment. May be repeated to a maximum of six credits under different subtitles. Prereq: SOC 101 or CLD 102; SOC 339; and either SOC 302 or 304.

SOC 440 COMMUNITY PROCESSES AND COMMUNICATION. (3) This course examines the relationship between community organization and change and the media. Special emphasis is given to the place of media organizations in community structure, the effects of media on community processes, and how community members use the media. Prereq: CLD 102 or SOC 101 and CLD/SOC 340 or consent of instructor. Primary registration access limited to majors and remaining seats opening during secondary registration. (Same as CLD 440.)

SOC 442 TOPICS IN WORK, ORGANIZATIONS AND ECONOMY (Subtitle required). (3) A sociological study of selected topics related to organizations and work. Topics may include decision-making and leadership in organizations; environmental impacts of organizations; the future of unions and workplace democracy; and changes in labor markets. May be repeated to a maximum of six credits under different subtitles. Prereq: SOC 101 or CLD 102; SOC 342; and either SOC 302 or SOC 304.

SOC 444 TOPICS IN POLITICAL SOCIOLOGY (Subtitle required). (3) A sociological study of topics related to politics and government. Topics may include national and supra national government; citizenship; political parties; interest groups; social movements; and globalization. May be repeated to a maximum of six credits under different subtitles. Prereq: SOC 101 or CLD 102; SOC 343; and either SOC 302 or 304.

SOC 445 PUBLIC SOCIOLOGY. (3) This course explores strategies for using sociological research tools to make a tangible impact on real-world social problems. It focuses on “Public Sociology” as a “brand” of sociology in which scholars seek to engage with the wider public by addressing social issues and seeking to share the results of their research with individuals and organizations who can utilize it for the solution of social problems. Students will be involved in a public sociology project as they fulfill course requirements. Prereq: SOC 302 or consent of instructor.

SOC 506 SOCIOLOGICAL INQUIRY. (3) This course is an introduction to the methods used in various approaches to discourse and textual analysis. The approaches examined include Speech Act Theory, Conversation Analysis, Ethnographic Discourse Analysis, Discourse Pragmatics, Interactional Sociolinguistics, Variation Analysis, and Critical Discourse Analysis. Special attention is given to practical experience analyzing both spoken and written discourse. Prereq: LIN/ENG 211 or consent of instructor. (Same as AAS 506.)

SOC 517 RURAL SOCIOLOGY. (3) A sociological study of the issues relevant to rural communities. Topics may include transformations in rural communities; the agrifood system; and the natural environment in the U.S. and the world. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as CLD 517.)

SOC 534 SOCIOLOGY OF APPALACHIA. (3) A sociological study of selected social issues facing Appalachian communities, with an emphasis on placing regional political economy, society and culture in a global context. Prereq: Sociology, Anthropology or CLD senior major or minor; Appalachian Studies minor; graduate student status; or consent of instructor. (Same as ANT/CLD 534.)

SOC 535 ADVANCED TOPICS IN SOCIAL INEQUALITIES (Subtitle required). (3) A sociological study of topics relevant to social inequalities and stratification. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only. (Same as AAS 535.)

SOC 539 ADVANCED TOPICS IN CRIME, LAW AND DEVIANCE (Subtitle required). (3) A sociological study of a special topic central to the scientific study of crime, law or deviance. Topics may include deviant subcultures; substance use; social control of crime; sociology of law; and philosophies of punishment. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only.

SOC 541 ADVANCED TOPICS IN WORK, ORGANIZATIONS, AND ECONOMY (Subtitle required). (3) A sociological study of selected topics related to work, organizations, and the economy. Topics may include economic sociology; sociology of occupations and professions; and sociology of organizational administration. Prereq: Graduate student status; undergraduates with consent of instructor only.

SOC 543 ADVANCED TOPICS IN POLITICAL SOCIOLOGY (Subtitle required). (3) A sociological study of selected topics related to politics and government. Topics may include national and supra national government; citizenship; contestation; political parties, social movements; strategic protests; ideology; identity; and globalization. Prereq: Graduate student status; undergraduates with consent of instructor only.

SOC 550 ADVANCED TOPICS IN SOCIOLOGY (Subtitle required). (3) A sociological study of topics, theories, or research findings from selected sociological subfield. May be repeated to a maximum of six credits under different subtitles. Prereq: Graduate student status; undergraduates with consent of instructor only.

Course Descriptions

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 565</td>
<td>INDEPENDENT WORK.</td>
<td>1-3</td>
<td>Independent sociological study of a topic under the supervision of faculty. Students must identify both a topic and a sociology faculty mentor who has agreed to supervise this project. A learning contract must be filed in the department in order to receive a grade for this course. May be repeated to a maximum of six credits. Prereq: Graduate student status; undergraduates with consent of instructor only.</td>
</tr>
<tr>
<td>SOC 603</td>
<td>SEMINAR IN TEACHING SOCIOLOGY.</td>
<td>3</td>
<td>The purpose of this course is to aid the development of student’s teaching styles and strategies. Topics for class readings and discussions include philosophies and theories of teaching as well as specific teaching strategies and techniques. Seminar members each design a course they someday hope to teach, constructing a course syllabus, choosing readings and designating assignments, exercises, and examinations. In addition, seminar members prepare and deliver presentations to the seminar as well as ongoing undergraduate classes. Prereq: Graduate standing in sociology, or consent of instructor.</td>
</tr>
<tr>
<td>SOC 610</td>
<td>PROSEMINAR IN COMPLEX ORGANIZATION.</td>
<td>3</td>
<td>A systematic examination of the sociological concepts, literature and current developments in the field of complex organizations. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>SOC 622</td>
<td>TOPICS AND METHODS OF EVALUATION.</td>
<td>3</td>
<td>An examination of a subset of evaluation methods, topics, and problems. An introductory course in the area with minimal emphasis on quantitative methods. The course is designed to provide a perspective from which evaluation studies may be viewed; and, to provide experiences for those who will learn from or conduct evaluations. Prereq: Consent of instructor, and a basic course in statistics or research. (Same as ANT/EDP/EPE 620.)</td>
</tr>
<tr>
<td>SOC 630</td>
<td>PROSEMINAR IN DEVIANT BEHAVIOR.</td>
<td>3</td>
<td>A systematic examination of the sociological concepts, literature, and current developments in the field of deviant behavior. Prereq: Graduate standing; SOC 436 or equivalent.</td>
</tr>
<tr>
<td>SOC 635</td>
<td>SEMINAR IN SOCIAL INEQUALITIES.</td>
<td>3</td>
<td>This course provides a graduate-level introduction to sociological theory and research on social inequalities and stratification. It includes both classic and contemporary works on topics such as political economy, the state, domination, democracy, work, poverty, welfare, resistance, class, race, ethnicities, and gender. The course serves as a foundational course for graduate students with interests in social inequalities, and is required for Sociology graduate students seeking a specialization in this area. Prereq: SOC 650 or SOC 651 or consent of instructor. (Same as AAS 635.)</td>
</tr>
<tr>
<td>SOC 636</td>
<td>STRATIFICATION AND MOBILITY.</td>
<td>3</td>
<td>Examination of the major areas of research in social stratification and mobility. The course is centered primarily around the core readings and mobility research. Topics include educational and occupational attainment, occupational status and prestige, inter- and intra-generational occupational mobility, classes, the consequences of stratification, and the role of labor markets, gender, ethnicity, and race in stratification and mobility. A familiarity with sociology or research survey research is strongly recommended. Prereq: SOC 635 or consent of instructor.</td>
</tr>
<tr>
<td>SOC 637</td>
<td>SOCIOCULTURAL DIMENSIONS OF ECONOMIC DEVELOPMENT.</td>
<td>3</td>
<td>Examination of social, cultural and economic conditions in lesser developed countries. Discussion of the various socioeconomic and cultural theories of change and development, and alternative policies for the world of the future. Considers the possible roles for social scientists in policy formulation and application. Prereq: Six graduate credits in social sciences or consent of instructor. (Same as ANT 637.)</td>
</tr>
<tr>
<td>SOC 640</td>
<td>SCIENCE, AGRICULTURE, AND DEVELOPMENT.</td>
<td>3</td>
<td>An in-depth examination of the interrelations between science, agriculture, and development. Both domestic and international issues are explored. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT/CLD 640.)</td>
</tr>
<tr>
<td>SOC 641</td>
<td>GENDER ISSUES IN DEVELOPMENT.</td>
<td>3</td>
<td>An examination of gender issues in domestic and international development. Prereq: Graduate standing in the social or agricultural sciences or permission of the instructor. (Same as ANT 641.)</td>
</tr>
<tr>
<td>SOC 642</td>
<td>THE SOCIOLOGY OF WORK, OCCUPATIONS AND LABORMARKETS.</td>
<td>3</td>
<td>This course examines the theories of work and occupations; the industrial structure of the labor force, the nature of mental and manual labor; the structure of labor markets including unemployment, underemployment, and segmentation; occupational mobility and status attainment; worker resistance and informal groups; worker participation and teamwork; labor and management relations; and state and national legislation regarding work, conflict, safety, and discrimination. Prereq: Graduate standing in sociology or other graduate department.</td>
</tr>
<tr>
<td>SOC 645</td>
<td>TOPICS IN POLITICAL SOCIOLOGY.</td>
<td>3</td>
<td>This course examines how states, capital, and other relevant social groups interact to produce new or stabilize old frameworks for work or other aspects of society. Its topics may include many different areas including: employee representation; health and safety issues; race and gender discrimination; corporate relocation and the international division of labor. No matter what topic chosen for the course, the basic aspects of political sociology including pluralist, elite, neo-corporatist, and citizenship theories will be covered. Prereq: Graduate standing in sociology or other graduate department.</td>
</tr>
<tr>
<td>SOC 646</td>
<td>SOCIAL MOVEMENTS AND SOCIAL CHANGE.</td>
<td>3</td>
<td>This seminar focuses on literature pertaining to collective, extra-institutional efforts to form new or maintain old forms of social order in the United States and other countries. While specific content might vary in response to instructors’ interests and department demands, attention will be given to such issues as movement emergence, maintenance, and transformation, labor and resource mobilization, social networks, organization cultures, movement identities and ideologies, social problems construction, strategies and tactics development, as well as the relative success of social movement activities. The seminar can include illustrative material from a variety of social movements and counter-movements (e.g., political, lifestyle, religious, etc.) Prereq: Graduate standing in sociology or other graduate department.</td>
</tr>
<tr>
<td>SOC 650</td>
<td>CONCEPTS AND THEORIES IN SOCIOLOGY.</td>
<td>3</td>
<td>Consideration of both conceptual issues underlying the construction of various sociological theories and their explanatory frameworks. A systematic exploration of the development and application of central conceptual frameworks of the discipline. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td>SOC 651</td>
<td>SOCIOLOGICAL THEORY IN TRANSITION.</td>
<td>3</td>
<td>Intensive examination of the ideas and continuing significance of leading twentieth century sociological theorists. The work of Marx, Weber, Durkheim, and Simmel is given particular attention. Discussion concerns the contents of their writings, the sociological context in which they were developed, and their applicability to contemporary society. Prereq: SOC 650 or consent of instructor.</td>
</tr>
<tr>
<td>SOC 653</td>
<td>FAMILY THEORY.</td>
<td>3</td>
<td>A survey and critical evaluation of family macro and micro theories. The course will include (a) a historical perspective on the development of family theory; (b) the prevalent macro theories/conceptual frameworks in use in the field; and (c) current trends in the development of micro, or middle-range, family theories. Prereq: FAM 652. (Same as FAM 653.)</td>
</tr>
<tr>
<td>SOC 661</td>
<td>SOCIOLOGY OF EDUCATION.</td>
<td>3</td>
<td>A study of schooling and education using basic analytic paradigms of sociology. Emphasis on schools as formal organizations, education in a changing, technologically oriented and stratified society. Prereq: SOC 101 or equivalent. (Same as EPE 661.)</td>
</tr>
<tr>
<td>SOC 665</td>
<td>PROGRAM DEVELOPMENT AND EVALUATION.</td>
<td>3</td>
<td>Course is designed to help students design, implement, and evaluate educational and social programs using a logic-based framework. (Same as CLD 665.)</td>
</tr>
<tr>
<td>SOC 667</td>
<td>THEORETICAL FOUNDATIONS OF COMMUNICATION AND COMMUNITY.</td>
<td>3</td>
<td>This course is designed to explore the dynamics of community development and leadership communication within both geographic-bounded communities and communities of taste. (Same as CLD 675.)</td>
</tr>
<tr>
<td>SOC 680</td>
<td>METHODS OF SOCIAL INVESTIGATION.</td>
<td>4</td>
<td>An overview of the various methods and techniques, both quantitative and qualitative, used by sociologists, including experience in the use of various methods. Lecture, three hours; laboratory, two hours per week. Prereq: Six graduate hours in sociology or consent of instructor.</td>
</tr>
<tr>
<td>SOC 681</td>
<td>RESEARCH DESIGN AND ANALYSIS.</td>
<td>3</td>
<td>Problem definition and delimitation, design appropriate to problem and data, and selection of appropriate analysis techniques; critical examination of representative research studies. Prereq: Elementary statistics.</td>
</tr>
<tr>
<td>SOC 682</td>
<td>SPECIAL TOPICS IN ADVANCED SOCIOLOGICAL METHODS.</td>
<td>1-3</td>
<td>A focused treatment of one or more issues, topics, or problems in sociological methods such as time-series analysis, causal analysis, participant observation, conduct of experiments, sociostatistical methods, scale construction, etc. May be repeated to a maximum of nine credits. Prereq: SOC 681 or equivalent.</td>
</tr>
<tr>
<td>SOC 684</td>
<td>FARMING SYSTEMS RESEARCH METHODS.</td>
<td>3</td>
<td>A critical analysis of the concepts, methods, and practices of farming systems research. Design and carry out an FSR project. Prereq: Graduate standing in the social or agricultural sciences. (Same as ANT 684.)</td>
</tr>
<tr>
<td>SOC 685</td>
<td>COMMUNITY DEVELOPMENT THEORY AND PRACTICE.</td>
<td>3</td>
<td>This course examines the application of our conceptual understanding of community and organizational dynamics to community development that builds upon assets and encourages local involvement. (Same as CLD 685.)</td>
</tr>
<tr>
<td>SOC 691</td>
<td>STRUCTURE OF U.S. AGRICULTURE.</td>
<td>3</td>
<td>This seminar will analyze the structural transformation of U.S. agriculture in the 19th and 20th centuries in the context of sociological theory. Emphasis is given to key historical transitions, changing social relations of production and state policy. Such emphases provide a framework for understanding the historical roots and future prospects for the socioeconomic problems confronting contemporary U.S. agriculture. Prereq: Graduate standing in sociology, agricultural economics or CLD or consent of instructor. (Same as AEC/CLD 691.)</td>
</tr>
<tr>
<td>SOC 730</td>
<td>SPECIAL TOPICS IN DEVIANT BEHAVIOR.</td>
<td>1-3</td>
<td>A focused treatment of one or more issues, topics, or problems in the field of deviant behavior such as delinquency, sociology of law, criminal justice and corrections, radical criminology, or methodological issues in deviance research. May be repeated to a maximum of nine credits. Prereq: SOC 630 or equivalent or consent of instructor.</td>
</tr>
</tbody>
</table>
Course Descriptions

SOC 735 TOPICAL SEMINAR IN SOCIAL INEQUALITIES. (3)
Advanced study of topics of current importance in the study of social inequalities and stratification. May be repeated under different subtitles to a maximum of 12 credits. Prereq: SOC 635 or consent of instructor.

SOC 737 CULTURE, ENVIRONMENT AND DEVELOPMENT. (3)
This seminar explores the interrelationships between social processes, development and the environment. It provides the graduate student with the necessary theoretical and analytical tools to examine the social and cultural processes of environmental degradation and change. Topics include political ecology, health impacts of development, deforestation, resource tenure systems, environmental grassroots movements and large-scale development organizations. Prereq: Consent of instructor. (Same as BSC 736.)

SOC 748 MASTER'S THESIS RESEARCH. (0-9)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

SOC 749 DISSERTATION RESEARCH. (0-9)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

SOC 751 SEMINAR IN SOCIOLOGICAL THEORY. (3)
A survey of major theoretical perspectives in modern sociology, focusing on twentieth century developments in European and American sociological theory. The principal contributions of selected theorists are considered and their role in the establishment of contemporary sociology is assessed. Prereq: SOC 650 or consent of instructor.

SOC 752 SEMINAR IN FAMILY THEORY CONSTRUCTION. (3)
An advanced seminar focusing on the definition, evaluation and construction of family theory. Inductive and deductive theory construction strategies are surveyed, evaluated and applied. Prereq: FAM 652.

SOC 766 CONCEPTS IN MEDICAL SOCIOLOGY. (3)
A review of sociological concepts and methods which have been applied to the study of health and medicine; the contributions of medical sociology to general sociological theory and to concepts and research on health-related problems of society. Prereq: Consent of instructor. (Same as BSC 766.)

SOC 767 DISSEMINATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

SOC 768 RESIDENCE CREDIT FOR THE MASTER'S DEGREE. (1-6)
May be repeated to a maximum of 12 hours.

SOC 769 RESIDENCE CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely.

SOC 772 TOPICAL SEMINAR IN SOCIOLOGY. (1-3)
Advanced study of topics of current importance in sociology, such as structural strain and social change, game theory, decision processes, communication and power structure. May be repeated under different subtitles to a maximum of 12 credits. Prereq: At least nine hours in the social sciences, preferably in sociology.

SOC 773 TOPICAL SEMINAR. (3)
Analysis of topics of scientific interest in rural sociology, selected from such fields as the following: criticism of research; sociological factors in land use; migration; rural social ecology of the South; highland societies. May be repeated to a maximum of six credits.

SOC 776 SEMINAR IN DEPENDENCY BEHAVIOR. (3)
The course is designed to explore theories of dependency behavior by examining the concept of dependency as it can be applied to the study of various phenomena including alcohol use and abuse; dependence on other psychoactive substances; institutional dependency; dependency in work settings; and poverty and welfare. Prereq: Consent of instructor. (Same as ANT/PSY/BSC 776.)

SOC 777 SEMINAR IN MENTAL ILLNESS CONCEPTS, RESEARCH AND POLICY. (3)
Advanced study of contemporary concepts of mental health and mental illness, and their historical development; major forms of response to mental illness. Prereq: Consent of instructor. (Same as BSC 777.)

SOC 779 TOPICAL SEMINAR IN SOCIAL PSYCHOLOGY. (3)
Each semester some topic in the field of social psychology such as attitudes and beliefs, structure and function of social groups, social determinants of behavior, leadership, and morale will be studied intensively. May be repeated to a maximum of six credits. (Same as PSY 779.)

SOC 780 SPECIAL PROBLEMS IN SOCIOLOGY. (1-6)
May be repeated to a maximum of 10 credits.

SOC 785 COMPARATIVE HEALTHCARE SYSTEMS. (3)
This seminar will focus on concepts, issues, and research pertaining to health care systems in comparative perspective. It will deal with the following questions: (1) What are the core analytical dimensions of a health care system? (2) How do health care systems connect with the other institutional domains of a society, with its value-system, and with its major cultural and historical trends? and (3) Within the health care system, how are the main constituents of modern medicine related to each other? Prereq: Consent of instructor. (Same as BSC 785.)

SOC 790 RESEARCH IN RURAL SOCIOLOGY. (1-3)
Individual graduate research with correlated study of rural social research types and methods. May be repeated for a maximum of six credits.

SOC 792 RESEARCH IN SOCIOLOGY. (1-6)
Individual research and reading in particular fields of sociology, under staff supervision. Open to advanced students who are prepared for intensive study beyond that offered in regular classes in each field. May be repeated to a maximum of 10 hours.

SOC 797 COMMUNITY DEVELOPMENT PRACTICUM. (1-9)
Supervised experiences in the application of sociological concepts and techniques to problems of program development in a community or state agency, organization, or department. Learning contract required. May be repeated to a maximum of 9 credits. Prereq: Approval of the Director of the Community Development Program.

SPA Hispanic Studies

SPA 011 SPANISH READING FOR GRADUATE STUDENTS. (3)
Designed for those graduate students who wish to acquire a rapid reading knowledge of Spanish. Emphasis on rapid vocabulary building, the Spanish idiom, and the verb systems. Lecture, three hours.

SPA 101 ELEMENTARY SPANISH I (spoken approach). (4)
This course is designed to introduce basic modes of communication in Spanish. The emphasis is on everyday language which the students will learn by applying essential grammatical structures to vocabulary. Both listening and reading comprehension are stressed. The textbook provides instructional assignments and self-correctional exercises. Not open to students who have credit for SPA 141.

SPA 102 ELEMENTARY SPANISH II (spoken approach). (4)
A continuation of SPA 101. Not open to students who have credit for SPA 142. Prereq: SPA 101 or consent of the department and placement test.

SPA 103 HIGH BEGINNER SPANISH. (3)
This course is designed to expand upon the students' already existing knowledge of Spanish in order to prepare them for intermediate level courses. The textbook and supplementary material will develop students' abilities in the four basic skills of language learning (speaking, listening, reading and writing). Prereq: Placement exam. Contact department office at (859) 257-1565 to make appointment for placement test.

SPA 141 ELEMENTARY SPANISH I (reading approach). (3)
The study of the basic principles of the language through grammar, with emphasis on rapid development of reading and comprehension skills. Offered by correspondence only. Not open to students who have credit for SPA 101.

SPA 142 ELEMENTARY SPANISH II (reading approach). (3)
A continuation of SPA 141. Selected readings. Offered by correspondence only. Not open to students who have credit for SPA 102. Prereq: SPA 141 or consent of department and placement test.

SPA 151 SPANISH FOR HEALTH PROFESSIONALS. (3)
The course will teach Spanish terminology and basic grammar related to medical patients, including vocabulary for diagnosis and treatment. Prereq: Prior college or high school Spanish or other experience with the Spanish language roughly equivalent to one semester of college study.

SPA 201 INTERMEDIATE SPANISH III (spoken approach). (3)
Review and reinforcement of grammatical and phonological patterns. Emphasis will be given to developing reading, listening and speaking skills based on contemporary texts. Not open to students who have credit for SPA 241. Prereq: SPA 102 or consent of department and placement test.

SPA 202 INTERMEDIATE SPANISH IV (spoken approach). (3)
Continuation of SPA 201. Not open to students who have credit for SPA 242. Prereq: SPA 201 or consent of department and placement test.

SPA 203 HIGH INTERMEDIATE SPANISH. (3)
This course is designed to advance students' knowledge of Spanish at the intermediate level by fine-tuning the skills of reading, speaking, listening, and writing. The goal of the course will be to focus on useful vocabulary, to practice functional grammar, to further explore cross-cultural analysis and to develop students' communicative competence in Spanish. Not open to Students from SPA 102 or 103. This course is designed for students transferring directly from high school Spanish to second-year college Spanish. Prereq: Placement exam. Contact department office at (859) 257-1565 to make appointment for placement test.
Course Descriptions

SPA 205 SPANISH FOR BILINGUAL STUDENTS. (3)
This course is the entry level for the ‘Spanish for Bilingual Students’ track. It will cater to the specific academic and communicative needs of two types of students: those described as ‘heritage speakers/learners’ and those who are ‘advanced non-native speaker of Spanish’. This course is exclusively designed for these students and its purpose is to build on the students’ existence competence of the native language and to further develop oral, written, reading, and cultural competence for use in different communicative situations. Prereq: Placement exam and oral interview.

SPA 208 U.S. LATINO CULTURE AND POLITICS. (3)
This course studies U.S. Latino history and culture, with an emphasis on the evolution of the politics of Immigration and the use of Spanish in the U.S. These broader issues will be studied with the express intent of determining what they mean for central Kentucky.

SPA 210 SPANISH GRAMMAR AND SYNTAX. (3)
Introduction to advanced Spanish grammar and syntax and development of Spanish vocabulary and writing skills. Concurrent enrollment in SPA 211 is encouraged. Prereq: SPA 202, SPA 203 or equivalent.

SPA 211 INTERMEDIATE SPANISH CONVERSATION. (3)
Oral-aural practice in the spoken language. Special emphasis placed on the acquisition of idioms and vocabulary. Prereq.: SPA 202, 203 or equivalent or consent of chair.

SPA 215 WRITTEN SPANISH FOR BILINGUAL STUDENTS. (3)
This course builds upon the pedagogical basis of SPA 205. It is exclusively designed for bilingual speakers and its purpose is to further refine reading, lexical, and grammatical skills through intensive writing practice in contexts that are meaningful to these speakers. This course will be taught entirely in Spanish. SPA 215 is the equivalent of 210 and 211 and fulfills the pre-major course requirements. Students taking 203 should refrain from taking this course. Prereq: Approve SPA 205 with a grade of B or higher (or placement exam and oral interview).

SPA 241 INTERMEDIATE SPANISH III (reading approach). (3)
Readings of selected Spanish and Spanish American works and rapid review of principles of grammar. Emphasis on reading comprehension. Not open to students who have credit for SPA 201. Prereq: SPA 142 or consent of department and placement test.

SPA 242 INTERMEDIATE SPANISH IV (reading approach). (3)
A continuation of SPA 241. Several options will be offered, including culture, literature and contemporary problems. Topics for each section will be announced in the Schedule of Classes. Not open to students who have credit for SPA 202. Prereq: SPA 241 or consent of department and placement test.

*SPA 262 HISPANIC LITERATURES IN TRANSITION (Subtitle required). (3)
This course examines particular authors, periods, regions, cultural events, or movements from Spain and Latin America. Special attention will be paid to links between literature and culture, politics and society through reading, discussion, and writing assignments to be conducted in English. Course may be repeated under different titles for a maximum of six credits. Prereq: WRD 110 and WRD 111 or CIS 110 and CIS 111.

SPA 300 CONTACT ZONES: CULTIVATING INTERCULTURAL COMPETENCE. (3)
This course aims to help students acquire skills and knowledge needed to promote understanding of individuals/groups from diverse backgrounds, without reinforcing stereotypes in the name of “cultural difference.” Toward this end, this course will (1) utilize, as a guide/lead, the concept of the “contact zone” as an area of exchange that divides but simultaneously connect “us” and “them”; and (2) have each student conduct a semester-long ethnographic project concerning the contact zone. (Same as MCL 300.)

*SPA 302 SPANISH FOR BUSINESS PROFESSIONALS. (3)
This course prepares business and Spanish minors/majors for successful communication in the Hispanic commercial world by building upon their existing knowledge and emphasizing practical, real-life use of oral and written Spanish. This course is designed to introduce students to essential business terminology and language situations in common business contexts, reinforcing previous learning and promoting reading, interpreting, and responding to new information. This course also helps the student to be alert to the importance of cultural awareness in doing business in Spanish-speaking countries or with Hispanics in the United States. Prereq: SPA 210 and 211, or 215.

SPA 310 SPANISH COMPOSITION THROUGH TEXTUAL ANALYSIS. (3)
Critical readings and interpretation of texts in Spanish. Text may include literary, political, sociological, and cultural documents. Emphasis on mastery of written Spanish. This course is required of all majors. Prereq: SPA 210 and 211, or 215 with a B or better or consent of the instructor.

SPA 312 CIVILIZATION OF SPAIN. (3)
This course is designed to acquaint students with Spain’s intellectual, cultural and historical development. Conducted primarily in Spanish. Prereq: SPA 210 and 211, or 215, or consent of instructor.

SPA 313 ADVANCED SPANISH LANGUAGE. (3)
A course designed to practice language skills at an advanced level. Preparation of oral and written presentations in Spanish. Selected readings will be treated for their language content. Conducted primarily in Spanish. Prereq: SPA 210 and 211, or 215, and a 300-level Spanish course.

SPA 314 CIVILIZATION OF SPANISH AMERICA. (3)
This course is designed to acquaint students with Spanish America’s intellectual, cultural and historical development. Conducted primarily in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 315 INTRODUCTION TO HISPANIC LITERATURE. (3)
This course provides students with a basic background for reading Hispanic literature and focuses on the development of a method for reading critically. Students will identify and discuss themes, plots and structure and poetic tropes such as symbols, metaphors, and allegory. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 320 LITERATURE, LIFE AND THOUGHT OF SPAIN. (3)
A study of the literature that reflects the life and thought of Spain from the Middle Ages to the present. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 322 LITERATURE, LIFE AND THOUGHT OF SPANISH AMERICA. (3)
A study of the literature that reflects the life and thought of Spanish America from the Colonial period to the present. Lecture and discussion in Spanish. Prereq: SPA 210 and 211, or 215, or consent of the instructor.

SPA 323 INTRODUCTION TO SPANISH TRANSLATION. (3)
Allows students to deepen their understanding of Spanish and English as they consider how best to translate structures, words, text, and discourse styles unique to each respective language while simultaneously acquiring a valuable and highly marketable skill. Translation tasks will be primarily from Spanish to English. Prereq: SPA 310 completed (no concurrent enrollment).

SPA 324 THE THEATRE IN SPAIN AND SPANISH AMERICA. (3)

#SPA 332 SPANISH AND LATIN AMERICAN BUSINESS ENVIRONMENTS. (3)
This course presents a balanced analysis of the economic, social, and political events in the past years that have shaped the business and investment climate in Spain and Latin America. The goal is to increase student awareness of and familiarity with the role played by the incorporation of Spain in the European Union, and the implementation of Free Trade in current Latin American economies. The student who successfully completes this course will not only better understand these socio-economic phenomena but will also hone their communicative and argumentative skills in Spanish. Prereq: SPA 310 and another 300-level course completed (no concurrent enrollment).

#SPA 350 HISPANIC CITIES (Subtitle required). (3)
This course is designed to provide students with a basic knowledge of the historical, cultural, and social development of modern Hispanic cities. Contemporary aspects of cities such as their rise to prominence, their role in nation formation, and their representation in a variety of cultural forms are some of the topics to be explored. Prereq: SPA 210 and 211, or consent of instructor.

SPA 361 LATIN AMERICAN LITERATURE IN TRANSLATION (Subtitle required). (3)
This course examines particular authors, periods, regions, cultural events, or movements from Latin America. Special attention will be paid to links between literature and culture, politics and society through reading, discussion, and writing assignments to be conducted in English. Course may be repeated under different titles for a maximum of six credits. (Same as LAS 361.)

SPA 371 LATIN AMERICAN CINEMA: (Subtitle required). (3)
An introduction to the analysis and interpretation of cinema in general and Latin American cinema in particular. Open to majors and non-majors. The course will focus on films from the Latin American schools of cinema which will be studied in their social, political, and cultural context and introduce students to basic critical vocabulary. Viewing of films (with English subtitles) outside of class is required. Class lectures in English, sections in English or Spanish depending on the language ability of student. Course cannot be repeated.

SPA 372 SPANISH CINEMA: (Subtitle required). (3)
An introduction to the analysis and interpretation of cinema in general and Spanish cinema in particular. Open to majors and non-majors. The course will focus on films from the Spanish schools of cinema which will be studied in their social, political, and cultural context and introduce students to basic critical vocabulary. Viewing of films (with English subtitles) outside of class is required. Class lectures in English, sections in English or Spanish depending on the language ability of student. Course cannot be repeated.

SPA 397 INDEPENDENT WORK IN SPANISH. (3)
May be repeated once. Prereq: Major and standing of 3.0 in the department.

SPA 399 FIELD BASED/COMMUNITY BASED EDUCATION. (1-15)
A community–or field-based experience in Spanish under the supervision of a faculty member. Approval of the Arts and Sciences dean required for credits above six per semester. May be repeated to a maximum of 15 credits. Pass–fail only. Prereq: Permission of the instructor and departmental chairperson; completion of departmental learning agreement.
SPA 400 SPECIAL TOPICS IN HISPANIC LITERATURES AND LANGUAGES (Subtitle required). (3)
Detailed investigation of a given topic, author, or theme. Topics announced the preceding semester. Conducted in Spanish. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: One 300-level Spanish literature course.

SPA 410 ADVANCED SPANISH GRAMMAR. (3)
The purpose of this course is to discuss from a theoretical and practical perspective the most relevant grammatical aspects of contemporary Spanish, such as: sentence structure, most frequently used verbal tenses and aspects, syllable structure, agreement (subject-verb; noun and noun modifiers), etc. This course is aimed to develop in the students interest and skills for research in Spanish grammar through searching and compiling digital linguistic corpora. Prereq: SPA 310 and other 300 level course.

SPA 413 SPANISH PHONETICS. (3)
This course is designed to emphasize early attention to pronunciation and oral fluency by introducing students to Spanish phonetics. It provides intensive practice in oral Spanish so that students increase and maintain oral fluency in Spanish by emphasizing refinement of intonation and pronunciation. The class will be conducted entirely in Spanish. Prereq: SPA 310 and other 300 level course.

SPA 420 SPANISH IN THE WORLD. (3)
Offers a diachronic overview of the importance of the Spanish language. Connects historical and cultural facts to the development of Spanish to a world language. Investigates the role of Spanish in the international organizations and in media. Prereq: SPA 310 and one more 300 level course.

SPA 423 ADVANCED SPANISH TRANSLATION. (3)
As a follow-up to SPA 323, students will perform translations from English to Spanish and will also engage in interpretation. Students will deepen their understanding of basic translation theory and will receive orientation as to professional certifications and employment opportunities. Prereq: SPA 323; no concurrent enrollment.

SPA 424 MEDIEVAL AND EARLY MODERN SPANISH STUDIES (Subtitle required). (3)
Readings and analysis of texts from and about Medieval and Early Modern Spain, with emphasis on cultural production within social and historical contexts. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive B or better in SPA 310.

SPA 430 INTRODUCTION TO SPANISH LINGUISTICS. (3)
Offers an introduction to Spanish linguistics; establishes the basis for future application of linguistic principles. Provides students with a level of knowledge that enables them to make connections between the structure of Spanish and relevant issues in contemporary Hispanic linguistics. Prereq: SPA 310 and one more 300 level course.

SPA 432 18TH AND 19TH CENTURY SPANISH STUDIES (Subtitle required). (3)
Reading and analysis of Spanish literary and cultural works from the 18th and 19th century. The course may cover multiple genres, authors, periods, regions, or topics. Course may be repeated under different titles to a maximum of six credits. Prereq: SPA 310; one 300-level Spanish literature course.

SPA 434 SPANISH LITERATURE OF THE 20TH CENTURY. (3)
A study of the works of the Generation of 1898 and representative works of recent writers. Conducted in Spanish. Prereq: One 300-level Spanish literature course.

SPA 436 LITERATURE OF SOCIAL PROTEST IN SPANISH AMERICA. (3)
Analysis and study of the use of sociopolitical elements in selected works by Spanish-American poets, novelists and dramatists. Conducted in Spanish. Prereq: One 300-level Spanish literature course.

SPA 444 20TH AND 21ST CENTURY SPANISH STUDIES (Subtitle required). (3)
Reading and analysis of Spanish literary and cultural works from the 20th and 21st century. The course may cover multiple genres, authors, periods, regions, or topics. Course may be repeated under different titles to a maximum of six credits. Prereq: SPA 310. Permission of instructor for students who did not receive B or better in SPA 310.

SPA 454 COLONIALISM AND 19TH CENTURY SPANISH-AMERICAN STUDIES (Subtitle required). (3)
A topics course in Latin American literature and culture from the colonial period through the 19th century. Special emphasis on the interaction between literature, historical and social developments. Taught in Spanish. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive B or better in SPA 310.

SPA 464 CONTEMPORARY SPANISH-AMERICAN STUDIES (Subtitle required). (3)
A topics course in 20th century Latin American literature and culture. Special emphasis on the interaction between literature, historical and social developments and popular culture. Taught in Spanish. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive B or better in SPA 310.

SPA 474 TOPICS IN HISPANIC STUDIES (Subtitle required). (3)
Reading and analysis of Hispanic literature and culture organized by topics. May cover multiple genres, authors, periods, regions or topics. May be repeated to a maximum of 6 credits with topic change. Prereq: SPA 310. Permission of instructor for students who did not receive a B or better in SPA 310.

SPA 480 HISPANIC KENTUCKY. (3)
The study of U.S. Latino history, with primary emphasis on the evolution of the politics of immigration and Spanish in the U.S. These issues will be studied with the primary intent of determining what they mean to Central Kentucky. This course is conducted in Spanish and incorporates a service learning component which is finalized the first week of the semester. Prereq: SPA 310 or consent of instructor.

SPA 491 HISPANIC STUDIES HONORS THESIS. (3)
An independent research course leading to an undergraduate thesis in Hispanic Studies (research thesis, technology-based project, translation project) for majors in the Department of Hispanic Studies to be supervised by one/two faculty member(s) on topics dealing with Spanish and/or Latin American studies (literature, culture, civilization, visual studies), Hispanic Linguistics, or the teaching of Spanish. Prereq: 15/18 hours of Spanish courses at the 300+ level.

SPA 501 SPANISH PHONETICS, PRONUNCIATION AND PHONEMICS. (3)
Introduction to Spanish descriptive linguistics with intensive study of variant speech sounds and established norms in the major cultural areas of the Hispanic world with discussions of the theory and isolation of phonemes. Prereq: SPA 210 and SPA 211, and a 300-500 level Spanish course.

SPA 506 INTRODUCTION TO COMPARATIVE SPANISH, PORTUGUESE, AND ITALIAN LINGUISTICS. (3)
An introduction to the historical development of Spanish, Portuguese and Italian from a common source, with an emphasis on the comparison of related lexical, phonological and morphological items. Prereq: Reading knowledge of Spanish or Italian (fourth semester of course work).

SPA 510 THEMES IN MEDIEVAL AND EARLY MODERN SPANISH LITERATURE AND CULTURE (Subtitle required). (3)
This course is a topics course in Medieval and Early Modern Spanish Literature and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different subtitles. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 520 THEMES IN MODERN AND CONTEMPORARY SPANISH LITERATURE, CULTURE AND FILM (Subtitle required). (3)
This course is a topics course in Modern and Contemporary Spanish Literature, Film and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different topic. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 539 THEMES IN LATIN AMERICAN LITERATURE, CULTURE AND FILM (Subtitle required). (3)
This course is a topics course in Modern and Contemporary Latin American Literature, Film and Culture. Appropriate for advanced undergraduates and MA level graduate students. May be repeated to a maximum of six credits under different topic. Prereq: For undergraduates: SPA 400 or permission of instructor.

SPA 553 TEACHING OF SPANISH. (3)
The course is designed for teachers and prospective teachers of modern foreign languages, with emphasis on Spanish. Modern methodology, theory and practice of language pedagogy. Prereq: Permission of instructor required.

SPA 600 HISTORY OF THE SPANISH LANGUAGE. (3)
Introduction to the historical development of the Spanish language. The central focus of this course will be the dialectic and dialectic processes that gave rise the historical, cultural, phonological, morphological and lexical transformations of the Castilian languages, with particular emphasis on the changes that Castilian underwent as it evolved from Latin into modern Castilian.

SPA 601 STUDIES IN SPANISH PEDAGOGY: (Subtitle required). (1)
A one credit course that may or may not run concurrently with the 553 course on Spanish Pedagogy. Seminar topics may include an overview of second language acquisition theories as applicable to English learners of Spanish: contemporary teaching methodologies for instructors of Spanish language, integration of technology into curriculum; issues in testing and assessment. May be repeated to a maximum of 3 credits when taught under different subtitles.

SPA 602 STUDIES IN SPANISH LINGUISTICS: (Subtitle required). (3)
Readings and discussion of issues in Spanish linguistics and the teaching of Spanish. May be repeated to a maximum of 9 credits taught under different subtitles.

SPA 603 SPANISH APPLIED LINGUISTICS. (3)
A survey of the many sub-disciplines that constitute Applied Linguistics, a field dedicated to the study of language-based problems. This class will expose students to issues in the Spanish-language context and will equip them with the tools necessary to critically analyze these “problems”. Prereq: Introduction to Hispanic Linguistics.
**Course Descriptions**

**SPA 604 SOCIOLINGUISTICS OF THE SPANISH-SPEAKING WORLD.** (3)
An introduction to sociolinguistic theory and its application to issues related to Spanish in Spain, Latin America, and the United States. It will focus on both quantitative and qualitative research on language variation and language contact in the Spanish-speaking world. Prereq: Introduction to Hispanic Linguistics.

**SPA 605 HISTORY OF THE SPANISH LANGUAGE.** (3)
Offers an overview of the diachronic evolution of Spanish from spoken Latin. Topics covered include the following: Vulgar Latin and Proto-Romance, the Old Spanish phonological system, morpho-syntactic changes from Latin to Spanish. Prereq: Introduction to Hispanic Linguistics.

**SPA 606 INTRODUCTION TO CRITICAL THEORY AND CULTURAL STUDIES.** (3)
Survey of major trends in critical and cultural theory since the early 20th century, from Formalism and New Criticism through Cultural Studies. Required of all new graduate students.

**SPA 607 SPECIAL TOPICS IN CRITICAL THEORY AND CULTURAL STUDIES.** (Subtopic required). (1)
Readings and discussion of special topics in critical theory and cultural studies. May be taught in English or Spanish. May be repeated to a maximum of 3 credits when taught under different subtitles.

**SPA 608 SPECIAL TOPICS IN SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Readings and discussion in essay, film and cultural production of Spain and Spanish America. May be taught in English or Spanish. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 609 SPECIAL TOPICS IN LATE SPANISH AND U.S. HISPANIC LITERATURE AND CULTURE.** (Subtitle required). (3)
Intensive study of an author, genre, period, or movement of Latin American or U.S. Hispanic literature, or an aspect of Latin American or U.S. Hispanic linguistics or culture. Taught in English. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 610 STUDIES IN MEDIEVAL SPANISH LITERATURE.** (Subtitle required). (3)
Readings and discussion of Spanish literature from the 13th century through the 15th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 620 STUDIES IN EARLY MODERN AND BAROQUE SPANISH LITERATURE.** (Subtitle required). (3)
Readings and discussion of Spanish literature and culture from the 16th and 17th centuries. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 630 STUDIES IN 18TH AND 19TH CENTURY SPANISH LITERATURE.** (Subtitle required). (3)
Readings and discussion of Spanish literature and culture from the 18th and 19th centuries. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 640 STUDIES IN 20TH AND 21ST CENTURY SPANISH LITERATURE.** (Subtitle required). (3)
Readings and discussion of contemporary Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 650 STUDIES IN COLONIAL LATIN AMERICAN LITERATURE.** (Subtitle required). (3)
Readings and discussion of Colonial Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 652 STUDIES IN SPANISH PEDAGOGY.** (Subtitle required). (3)
Offers students a theoretical and practical overview of L2 Spanish pedagogy as a means to empower them as language instructors who can intelligently select and evaluate pedagogical theories and practices. Students will have the opportunity for hands-on implementation of theory in their own classroom practice. Prereq: SPA 605.

**SPA 654 SPANISH DIALECTOLOGY.** (3)
Explores current linguistic research on Spanish dialects through the discussion and the analysis of their theoretical and empirical frameworks. Prereq: SPA 604.

**SPA 655 COMPARATIVE HISTORICAL ROMANCE LINGUISTICS.** (3)
Analyzes the complex interaction of structural, social, and cultural factors in the evolution of Romance Languages. Provides insights into which language features can be considered typically Romance, and how far languages can diverge from these typical patterns and still be considered of the same language type. Prereq: SPA 605.

**SPA 660 STUDIES IN 19TH CENTURY LATIN AMERICAN LITERATURE.** (Subtitle required). (3)
Readings and discussion of 19th century Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 680 STUDIES IN 20TH CENTURY LATIN AMERICAN LITERATURE 1900-1950’S.** (Subtitle required). (3)
Readings and discussion of Latin American literature and culture through the first half of the 20th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 681 STUDIES IN CONTEMPORARY LATIN AMERICAN LITERATURE 1960’S TO PRESENT.** (Subtitle required). (3)
Readings and discussion of contemporary Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 685 STUDIES IN U.S. HISPANIC LITERATURE AND CULTURE.** (Subtitle required). (3)
Readings and discussion of U.S. Latino literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 690 STUDIES IN SPANISH AND/OR LATIN AMERICAN FILM.** (Subtitle required). (3)
Viewings and discussion of Spanish or Latin American film, emphasizing its political, social, economics, and cultural contexts of the Hispanic world. Viewing of films (in Spanish) outside class is required. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 703 SEMINAR IN SLA THEORY IN SPANISH L2 LEARNING.** (3)
Offers a closer look at the primary concepts of Second Language Acquisition (interlanguage, learner variables, SLA theory, input, output, etc.) with a particular focus on the Spanish language. The acquisition of specific Spanish L2 structures and phenomena will be directly addressed, e.g., tense-aspect, mood, clitics, etc. Prereq: SPA 603.

**SPA 704 SEMINAR IN LINGUISTIC ANALYSIS OF SPANISH DISCOURSE.** (Subtitle required). (3)
Analysis from a sociolinguistic and discourse analytic perspective of the relationship between language and power in the Spanish-speaking world. It would imply the discussion of a theoretical framework and its application to non-canonical texts produced in Spanish. Prereq: SPA 604.

**SPA 705 SEMINAR IN HISTORICAL LANGUAGE CONTACT IN THE SPANISH SPEAKING WORLD.** (3)
Offers a study of language contact in the Spanish-speaking world including not only the study of bilingualism, but also explorations into subfields like geolinguistics and language planning. Prereq: SPA 605.

**SPA 706 ADVANCED READINGS IN CRITICAL THEORY AND CULTURAL STUDIES.** (Subtitle required). (3)
Advanced readings and discussion of contemporary issues in critical theory and cultural studies. Taught in Spanish or English. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 707 CRITICAL PERSPECTIVES ON SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Advanced readings and discussion of Spanish literature and culture: open topic with preference for cross-disciplinary or trans-historical subjects. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 708 CRITICAL PERSPECTIVES ON LATIN AMERICAN LITERATURE AND CULTURE.** (Subtitle required). (3)
Advanced readings and discussion of Latin American and U.S. Hispanic literature or culture. May deal with a single author’s work, a genre or a cultural phenomenon: open topic with preference for cross-disciplinary or trans-historical subjects. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 709 CRITICAL PERSPECTIVES ON LATIN AMERICAN AND U.S. HISPANIC LITERATURE AND CULTURE.** (Subtitle required). (3)
Advanced readings and discussion of Latin American and U.S. Hispanic literature or culture. May deal with a single author’s work, a genre or a cultural phenomenon: open topic with preference for cross-disciplinary or trans-historical subjects. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 710 SEMINAR IN MEDIEVAL SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Special and intensive study of selected topics in Spanish literature and culture from the 13th through the 15th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 720 SEMINAR IN EARLY MODERN AND BAROQUE SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Special and intensive study of selected topics in Spanish literature and culture of the 15th and 16th centuries. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 730 SEMINAR IN 18TH AND 19TH CENTURY SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Special and intensive study of selected topics in contemporary Spanish literature and culture from the 13th through the 15th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 740 SEMINAR IN 20-21ST CENTURY SPANISH LITERATURE AND CULTURE.** (Subtitle required). (3)
Special and intensive study of selected topics in contemporary Spanish literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

**SPA 748 MASTER’S THESIS RESEARCH.** (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**SPA 749 DISSERTATION RESEARCH.** (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 709 residency credit following the successful completion of the qualifying exams.
STA 210 MAKING SENSE OF UNCERTAINTY: AN INTRODUCTION TO STATISTICAL REASONING. (3)
This course is designed to give new and continuing M.A. and Ph.D. students an overview of and introduction to graduate studies and the profession of Hispanicism. Prereq: Graduate standing. May be repeated to a maximum of 12 credits.

ST 690 TRANSDISCIPLINARY PERSPECTIVES IN SOCIAL THEORY. (3)
An advanced seminar in transdisciplinary social theory, taught jointly by a faculty member representing the humanities and the social sciences, respectively. Social Theory encompasses the theoretical study of social life and the substantive knowledge informed by such theory. Transdisciplinary Social Theory seminars may focus on such topics as Space and Representation, Frankfurt School and Contemporary Critical Theory, or The University in Theory and in a Global Context. In each case, the seminar substantially and theoretically links the articulation of that particular topic as has occurred within both the social sciences and humanities. Prereq: Successful completion of ST 500 or ST 600 or permission of the instructors.

ST 750 SEMINAR IN COLONIAL LATIN AMERICAN LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in Colonial Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

ST 760 SEMINAR IN 19TH CENTURY LATIN AMERICAN LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of selected topics in 19th century Latin American literature and culture. May be repeated to a maximum of 9 credits when taught under different subtitles.

ST 767 DISSERTATION RESIDENCE CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

ST 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE. (1-6)
May be repeated to a maximum of 12 hours. Prereq: Graduate standing.

ST 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Graduate standing.

#STA 770 INTRODUCTION TO HISPANIC STUDIES. (3)
This course is designed to give new and continuing M.A. and Ph.D. students an overview of and introduction to graduate studies and the profession of Hispanicism. May be repeated to a maximum of 6 credits. Prereq: Graduate standing. May be repeated to a maximum of 9 credits when taught under different subtitles.

STA 781 SEMINAR IN CONTEMPORARY LATIN AMERICAN LITERATURE AND CULTURE 1960’S TO PRESENT: (Subtitle required). (3)
Special and intensive study of selected topics in Latin American literature and culture of the first half of the 20th century. May be repeated to a maximum of 9 credits when taught under different subtitles.

STA 782 SPECIAL STUDIES IN SPANISH. (1-3)
Selected studies and investigations in the Spanish language and Hispanic literature, permitting the student to work in areas of special interest and providing opportunity for original endeavors. May be repeated to a maximum of six credits. Prereq: Graduate standing.

STA 785 SEMINAR IN U.S. HISPANIC AND BORDER LITERATURE AND CULTURE: (Subtitle required). (3)
Special and intensive study of related topics in U.S. Hispanic and Border literature and culture. May be taught in Spanish or English. May be repeated to a maximum of 9 credits when taught under different subtitles.

ST 500 INTRODUCTION TO SOCIAL THEORY. (3)
Multidisciplinary introduction to social theory for advanced undergraduate and graduate students. Overall goal is to substantiate the idea that social theory comprises a set of ontological and epistemological issues about human existence which are non-disciplinary-specific. The course will (1) examine what different social fields take as their central theoretical issues and concerns, and (2) conduct multidisciplinary explorations of key problem areas in contemporary social thought such as the nature of objectivity, the construction of gender, the role of space and time in social life, and modernity and postmodernity. Prereq: Either a prior theory course in any social discipline or a prior course in such a discipline that discussed theoretical issues. Exceptions will be permitted only after consultation with the instructor.

ST 600 MULTIDISCIPLINARY PERSPECTIVES IN SOCIAL THEORY (Subtitle required). (3)
An advanced multidisciplinary seminar in social theory for graduate students taught by a team of faculty members. Topics change from year to year; examples include: individual and society, the social construction of gender, modernity and postmodernity, space and time in social life, objectivity and its other, etc. Focus is on the cross-disciplinary investigation of such issues in the social sciences and humanities. May be repeated to a maximum of nine credits under different subtitles. Prereq: ST 500 or permission of instructors.

ST 610 DISCLOSURE EDITORIAL COLLECTIVE. (1)
Course provides editorial experience in the production of DisClosure, a multidisciplinary social theory journal operated by students. Activities include: soliciting manuscripts, overseeing the external review process, communicating with authors, accepting and rejecting manuscripts, producing and distributing a single issue. May be repeated to a maximum of three credits. Lecture, two hours per week. Prereq: ST 500 or permission of instructor.

STA 200 STATISTICS: A FORCE IN HUMAN JUDGMENT. (3)
This course is concerned with the interaction of the science and art of statistics with our everyday lives emphasizing examples from the social and behavioral sciences. The student will not be required to learn mathematical formulas. Topics include the nature of statistics, uses and misuses of statistics, the scope and limitations of statistics, criteria by which published statistics may be judged, interpretation of probability and the art of decision making. Prereq: Completion of the mathematics basic skills requirement.

STA 210 MAKING SENSE OF UNCERTAINTY: AN INTRODUCTION TO STATISTICAL REASONING. (3)
The goal of this course is to help students develop or refine their statistical literacy skills. Both the informal activity of human inference arising from statistical constructs, as well as the more formal perspectives on statistical inference found in confidence intervals and hypothesis tests are studied. Throughout, the emphasis is on understanding what distinguishes good and bad inferential reasoning in the practical world around us.

STA 281 PROBABILITY AND STATISTICS USING INTERACTIVE COMPUTER TECHNIQUES. (3)
The role of chance in experimental outcomes. Simple discrete and continuous probability distributions; combinatorics; moments and expectations; normal and binomial distributions; computer simulation and simple Monte Carlo methods. Descriptive statistics, charts, and graphs, and elements of statistical inference using interactive statistical packages (e.g., SCSS and/or MINITAB). Prereq: CS 150, CS 102, or CS 221; coreq: MA 114 or 132.

STA 291 STATISTICAL METHODS. (3)
Theoretical distributions, statistical estimation, and hypothesis testing. Introduction to simple linear regression and correlation. Introduction to categorical data analysis and ANOVA. Prereq: MA 113, MA 123, MA 137 or equivalent.

STA 292 DESCRIPTIVE STATISTICS. (1)
Graphical and tabular description of data; measures of central tendency and variation, scattergrams, correlation and best-fitting lines; index numbers. Prereq: MA 113, MA 123, or equivalent.

STA 293 PROBABILITY. (1)
Experiments and sample spaces; elementary and conditional probability; counting principles; random variables; distribution and expectation; normal and binomial distributions. Prereq: STA 292.

STA 294 SAMPLING AND INFERENCE. (1)
Sampling; sampling behavior of X and S; confidence intervals and tests of hypotheses about the mean and variance of a normal population: the X2 and t- distributions. Prereq: STA 292 and 293.

STA 295 THE ART AND PRACTICE OF PROBABILITY. (3)
Introduction to the structure and techniques that are the foundations of probability. Emphasis on applications to real world problems and case studies, possibly involving DNA matching, sports statistics, forecasting, lotteries and epidemics. Interface of probability and inference. Prereq: MA 113 or MA 123.

STA 320 INTRODUCTORY PROBABILITY. (3)
Set theory; fundamental concepts of probability, including conditional and marginal probability; random variables and probability distributions (discrete and continuous); expected values and moments; moment-generating and characteristic functions; random experiments; distributions of random variables and functions of random variables; limit theorems. Prereq: MA 213 or equivalent. (Same as MA 320.)

STA 321 BASIC STATISTICAL THEORY. (3)
Simple random sampling; point and interval estimation; hypothesis testing. Prereq: STA/MA 320.

STA 322 STATISTICAL METHODS IN NONPARAMETRIC INFERENCE AND SURVEY SAMPLING. (4)
Introduction to statistical methodology appropriate for data that fail to meet the assumptions of parametric inference. Familiarity with classical sampling techniques as well as modern sampling practice. Emphasis on applications to real-world problems and case studies, possibly involving questionnaire construction, random digit dialing, response bias, use of modern sampling software, categorical regression, and skewed data. Prereq: STA 291 and STA 295; or STA 321.
**Course Descriptions**

**STA 335 DATA ANALYSIS FOR PHYSICISTS.** (1)
A computational methods course in the theory and techniques of data analysis and error propagation, with emphasis on applications common to the physical sciences: the treatment of statistical errors, the maximum-likelihood method, the chi-square distribution, and curve fitting. Students will be expected to use computer programs, but no previous programming experience is required. Concur: MA 213, PHY 242. (Same as PHY 335.)

**STA 381 ENGINEERING STATISTICS–A CONCEPTUAL APPROACH.** (3)
Data collection, description, and factor “association” versus causal relationship; “Confidence” – statistical versus practical; and Hypothesis testing – All of these covered in a conceptual approach while relying heavily on the mathematical language of probability (e.g., population and sample distributions, sampling; regression on one variable) and use of simulated and real data. Prereq: MA 213.

**STA 417G PRINCIPLES OF OPERATIONS RESEARCH.** (3)
A continuation of MA 416 with topics selected from stochastic models, decision making under uncertainty, inventory models with random demand, waiting time models and decision problems. Prereq: CS/MA 416G and MA/STA 320, or consent of instructor. (Same as MA 417G.)

**STA 422G BASIC STATISTICAL THEORY II.** (4)
Theory of least squares; regression; analysis of variance and covariance; experimental design models; factorial experiments; variance component models. Lecture, three hours; laboratory, two hours per week. Prereq: STA 291 and STA 295; or STA 321.

**STA 505 LINEAR AND COMBINATORIAL OPTIMIZATION.** (3)
Mathematical and computational aspects of linear programming and combinatorial optimization. Linear optimization is introduced by presenting solution techniques (primal and dual simplex) and studying geometric properties and duality for linear systems of inequalities. Aspects of combinatorial optimization, including trees, paths, flows, matchings, and matroids, and the corresponding algorithms are presented. Prereq: A course in linear algebra or consent of instructor. (Same as MA 505.)

**STA 504 PROBABILITY.** (3)
Sample space, random variables, distribution functions, conditional probability and independence, expectation, combinational analysis, generating functions, convergence of random variables, characteristic functions, laws of large numbers, central limit theorem and its applications. Prereq: MA 213 and MA 322. (Same as OR 504.)

**STA 525 INTRODUCTORY STATISTICAL INFERENCE.** (3)
Simple random sampling, statistics and their sampling distributions, sampling distributions for normal populations; concepts of loss and risk functions; Bayes and minimax inference procedures; point and interval estimation; hypothesis testing; introduction to nonparametric tests; regression and correlation. Prereq: STA 320 or STA 524 or consent of instructor. (Same as OR 525.)

**STA 569 APPLIED STATISTICAL METHODS.** (4)
This course is an introduction to research statistics. Topics include exploratory data analysis, random variables (binomial and normal distributions), estimation of proportions and means, correlation, regression, chi-squared tests, and ANOVA. Examples will be consistently drawn from biomedical or professional applications with analysis illustrated in software common to data analysis (SPSS and Excel). Prereq: MA 213. MA 109.

**STA 507 BASIC STATISTICAL ANALYSIS.** (3)
Primarily in biological, behavioral and social sciences. Introduction to methods of analyzing data from experiments and surveys; the role of statistics in research, statistical concepts and models; probability and distribution functions; estimation; hypothesis testing; regression and correlation; analysis of single and multiple classification models; analysis of categorical data. Lecture, three hours; laboratory, two hours. Prereq: MA 109 or equivalent. For graduate students; undergraduates must have consent of instructor.

**STA 580 BIOSTATISTICS.** (3)
Descriptive statistics, hypothesis testing, paired and unpaired tests, ANOVA, contingency tables, log rank test, and regression with biostatistics applications. Prereq: MA 109 or equivalent.

**STA 600 COMMUNICATING IN STATISTICS.** (0)
Pedagogical skills for teaching assistants in undergraduate statistics courses and effective communication skills for professional statisticians. Topics include: basic teaching techniques, use of writing assignments to increase understanding of statistical concepts, writing and grading effective exams, and recording and analyzing grades with the aid of software. Videotaped sessions will be conducted and critiqued. May be repeated a maximum of three times. Prereq: STAT major.

**STA 602 INTRODUCTION TO STATISTICAL METHODS.** (4)
Sampling distributions, statistical models, point estimates and confidence intervals, significance testing. Experimental Design (randomized blocks, nested/hierarchical models, Latin Squares), ANOVA (one, two, and multiway factorials, fixed and random effects), multiple comparison procedures, rank-based analyses, linear and nonlinear regression, power and sample size calculations, professional presentation of results. Lecture, three hours; laboratory, two hours per week. Prereq: Graduate Standing in Statistics.

**STA 603 INTRODUCTION TO LINEAR MODELS AND EXPERIMENTAL DESIGN.** (4)
Multivariate normal distributions, linear models in matrix notation, multiple linear regressions (distributional results, categorical predictors, interactions, connection to ANOVA, sums of squares, diagnostics, nongaussian and nonparametric regression). Generalized linear models (binomial, poisson, and gamma regression), overdispersion, mixed models, diagnostics, professional presentation of results. Prereq: STA 602; coreq: STA 606.

**STA 605 COMPUTATIONAL INFERENCE.** (3)
Statistical Packages, numerical methods in maximization and integration, bootstrapping, simulation methods, multivariate normal distribution. Prereq: Graduate Standing in Statistics.

**STA 606 THEORY OF STATISTICAL INFERENCE I.** (3)

**STA 607 THEORY OF STATISTICAL INFERENCE II.** (3)

**STA 612 SEQUENTIAL ANALYSIS.** (3)

**STA 616 DESIGN AND ANALYSIS OF SAMPLE SURVEYS.** (3)
Sampling from finite populations; estimation of sample size; stratification; ratio and regression estimators; systematic sampling; cluster sampling; multistage sampling (selection of sampling units with probability proportional to size); double sampling; response errors. Prereq: STA 606.

**STA 621 NONPARAMETRIC INFERENCE.** (3)
Estimation and testing when the functional form of the population distribution is unknown; rank and sign tests; tests based on permutations of observations; power of nonparametric tests; optimum nonparametric tests and estimators. Prereq: STA 606.

**STA 623 THEORY OF PROBABILITY.** (3)
Axioms of Probability, conditional probability, distribution functions, density and moment generating functions, expected values, discrete and continuous distributions, joint, marginal, and conditional distributions, transformations, covariance and correlation, inequalities, properties of sums from a random sample. Prereq: Graduate Standing in Statistics.

**STA 624 APPLIED STOCHASTIC PROCESSES.** (3)
Definition and classification of stochastic processes, renewal theory and applications, Markov chains, continuous time Markov chains, queueing theory, epidemic processes, Gaussian processes. Prereq: STA 524 or STA 623 or consent of instructor. (Same as OR 624.)

**STA 626 TIME SERIES ANALYSIS.** (3)
Time series and stochastic processes, auto-correlation functions and spectral properties of stationary processes; linear models for stationary processes, moving average, auto-regressive and mixed autoregressive-moving average processes, linear nonstationary models, minimum mean square error forecasts and the property of model identification, estimation and diagnostic checking. Prereq: STA 422G or equivalent. (Same as ECO 626.)

**STA 629 BAYESIAN INFERENCE.** (3)
Likelihood principles, sufficiency, natural conjugate and hierarchical priors, empirical Bayesian analysis for estimation and testing. Prereq: STA 606.

**STA 632 LONGITUDINAL DATA ANALYSIS.** (3)
This course presents statistical techniques for analyzing longitudinal studies and repeated measures experiments that occur frequently in public health, clinical trials, and outcomes research. This course will cover linear mixed models, generalized linear mixed models and an introduction to non-linear models. Students apply to the analysis of correlated data. Prereq: BST 682 and BST 767 or equivalent. (Same as BST 762.)

**STA 635 SURVIVAL ANALYSIS.** (3)

**STA 643 ADVANCED EXPERIMENTAL DESIGN.** (3)
Linear Model interpretation in vector spaces and projections, use of generalized inverses, identifiability and estimability of contrasts, normal equations, Gauss-Markov Theorem, MVUE, distribution theory for quadratic forms, complex designs such as crossover, split-plot and repeated measures, asymptotics for general linear models, familiarity with nonparametric regression models. Prereq: STA 603.
STA 644 ADVANCED LINEAR AND NONLINEAR MODELS. (3)

STA 653 CLINICAL TRIALS. (3)
Design and analysis of Phase I-III clinical trials, interim monitoring of trials, sample size, power, crossover trials, bioequivalence, mixed models, and meta analysis. Coreq: STA 603. (Same as BST 713.)

STA 655 INTRODUCTION TO STATISTICAL GENETICS. (3)
BST 655 presents an introduction to the statistical methodologies used today to investigate genetic susceptibility to complex diseases. The course focuses on linkage and association analysis with applications to real-world data. Commonly used (and freely available) software will be presented and used throughout. Because the field is constantly evolving, a focus of the material for this course will be recent statistical genetics literature. Prereq: STA 580 or equivalent. (Same as BST 655.)

STA 661 MULTIVARIATE ANALYSIS. (3)
Characterization and properties of the multivariate normal distribution, random samples from this distribution; multivariate analysis of variance, related distribution theory; factor analysis. Prereq: STA 603.

STA 662 RESAMPLING AND RELATED METHODS. (3)
Theory and application of the bootstrap, jackknife and other resampling methods. Prereq: STA 605 and STA 606.

STA 665 ANALYSIS OF CATEGORICAL DATA. (3)
Multinomial and product-multinomial models; large-sample theory of estimation and testing, Pearson chi-square and modified chi-square statistics, Pearson-Fisher-Theorem, Wald Statistics and generalized least squares technique; applications to problems of symmetry, association and hypotheses of no interaction in multi-dimensional contingency tables. Prereq: STA 603 and STA 606. (Same as BST 763.)

STA 671 REGRESSION AND CORRELATION. (2)
Simple linear regression, elementary matrix algebra and its application to simple linear regression; general linear model, multiple regression, analysis of variance tables, testing of subhypotheses, nonlinear regression, step-wise regression; partial and multiple correlation. Emphasis upon use of computer library routines; other special topics according to the interests of the class. Lecture, three hours per week; laboratory, two hours per week for seven and one half weeks. Offered the first or second half of each semester. Prereq: STA 570 or STA 580.

STA 672 DESIGN AND ANALYSIS OF EXPERIMENTS. (2)
Review of one-way analysis of variance; planned and unplanned individual comparisons, including contrasts and orthogonal polynomials; factorial experiments; completely randomized, randomized block, Latin square, and split-plot designs: relative efficiency, expected mean squares; multiple regression analysis for balanced and unbalanced experiments, analysis of covariance. Lecture, three hours per week; laboratory, two hours per week for seven and one half weeks. Offered the first or second half of each semester. Prereq: STA 671.

STA 673 DISTRIBUTION-FREE STATISTICAL INFERENCE AND ANALYSIS OF CATEGORICAL DATA. (2)
Inference for population quantiles, sign tests, Wilcoxon tests, Kruskal-Wallis and Friedman tests, Kendall and Spearman rank correlation. Goodness-of-fit tests for completely and partially specified contingency tables, McNemar and Cochran's tests for matched proportions; three dimensional tables and tests of partial and multiple associations. Lecture, three hours per week; laboratory, two hours per week for seven and one half weeks. Offered the first or second half of each semester. Prereq: STA 570 or STA 580.

STA 675 SURVEY SAMPLING. (2)
Simple random sampling and stratified random sampling, ratio and regression estimators, cluster sampling, systemic sampling, and multi-stage sampling. Specific problems associated with running a survey: non-response, call-backs, questionnaire construction, mail questionnaires, and area sampling. Lecture, three hours per week; laboratory, two hours per week for seven and a half weeks. Offered the first or second half of each semester. Prereq: STA 570 or STA 580.

STA 676 QUANTITATIVE INHERITANCE IN PLANT POPULATIONS. (3)
After a brief review of population genetics theory, the course is divided into two sections which cover methods of estimating genetic variances and selection methods in population improvement. The course will focus on handling and interpretation of actual data sets through data analysis and discussion of current literature. Prereq: STA 570, STA 671, and STA 672. (Same as PL 5676.)

STA 677 APPLIED MULTIVARIATE METHODS. (3)
Survey of multivariate statistical techniques. The multivariate normal distribution; the general linear model; general procedures for parameter estimation and hypothesis testing in the multivariate case; Hotelling's $T^2$, multivariate analysis of variance and covariance; structural models for the covariance matrix; utilization of existing computer programs. Prereq: STA 671 and 672.

STA 679 DESIGN AND ANALYSIS OF EXPERIMENTS II. (3)

STA 681 BIOSTATISTICS II. (3)
Students will learn statistical methods used in public health studies. This includes receiver operator curves, multiple regression logistic regression, confounding and stratification, the Mantel-Haenzel procedure, and the Cox proportional hazard model. Lecture, two hours; laboratory, two hours per week. Prereq: STA 580 or equivalent. (Same as SPH 630.)

STA 690 SEMINAR IN STATISTICS. (1-2)
May be repeated to a maximum of three credits.

STA 692 STATISTICAL CONSULTING. (3)
Basic principles of statistical consulting including how to manage a consulting session, how to formulate and solve problems and how to express results both orally and in writing. Students will be expected to analyze data from a current consulting project. Lecture, two hours; laboratory, two hours per week. Coreq: STA 643 or 644 or consent of instructor.

STA 693 BIOSTATISTICAL PRACTICUM. (1-2)
This course will involve students in small consulting projects intended to illustrate practical biostatistical problems. Prereq: STA 603.

STA 695 SPECIAL TOPICS IN STATISTICAL THEORY (Subtitle required). (1-3)
To be selected by staff. May be repeated to a maximum of nine credits. Prereq: STA 601.

STA 700 FOUNDATIONS OF PROBABILITY AND INFERENC. (3)
Measures on the real line and probability spaces, Lebesgue measure, properties of distribution functions and random variables, integrals and expectations. Prereq: MA 417G.

STA 701 ADVANCED STATISTICAL INFERENCE. (3)
Basic concepts of decision theory, sufficiency and completeness, completeness of multivariate exponential families; unbiasedness and invariance of decision rules; Bayes, minimax and invariant estimators; testing of hypotheses and optimality properties. Prereq: STA 607 and STA 700.

STA 702 ADVANCED STATISTICAL INFERENCE. (3)
UMP and UMP unbiased tests for multiparametric exponential families; locally best tests; invariance and permutation tests, UMP invariant tests for linear hypotheses; asymptotic aspects of classical statistics, ML estimation and concepts of efficiency; sequential probability ratio test; confidence set, UMA unbiased and invariance confidence sets. Prereq: STA 701.

STA 703 ADVANCED PROBABILITY. (3)
Probability spaces, extension theorem, random variables; independence, conditional probability, conditional expectation; laws of large numbers, law of the iterated logarithm; convergence in distribution; characteristic functions, central limit theorems, martingales. Prereq: STA 700 and STA 532.

STA 704 ADVANCED PROBABILITY-STOCHASTIC PROCESSES. (3)
Random functions; jump Markov processes; processes with independent increments; stationary stochastic processes; diffusion processes; limit theorems; applications of stochastic processes. Prereq: STA 703.

STA 705 ADVANCED COMPUTATIONAL INFERENCE. (3)

STA 707 ADVANCED DATA ANALYSIS. (3)
Theory and data analysis involving likelihood functions, mixed models, missing responses. Prereq: STA 643.

STA 709 ADVANCED SURVIVAL ANALYSIS. (3)

STA 715 READINGS IN STATISTICS AND PROBABILITY (Subtitle required). (1-6)
Supervised reading and discussion of a selected research topic. May be repeated to a maximum of nine credits. Prereq: STA 701 and STA 703 and consent of instructor.

STA 740 MASTER'S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

STA 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

STA 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.
SUR851FIRST-YEAR ELECTIVE, SURGERY. (1-3)
With the advice and approval of his or her faculty adviser, the first-year student may choose approved electives offered by the Department of Surgery. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the first-year curriculum. Pass-fail only. Prereq: Admission to first year, College of Medicine.

SUR852SECOND-YEAR ELECTIVE, SURGERY. (1-4)
With the advice and approval of his or her faculty adviser, the second-year student may choose approved electives offered by the Department of Surgery. The intent is to provide the student an opportunity for exploration and study in an area which supplements and/or complements required course work in the second-year curriculum. Pass-fail only. Prereq: Admission to second-year medical curriculum and approval of adviser.

SUR850-899FOURTH-YEAR ELECTIVE FOR MEDICAL STUDENTS. (1-6)
With the advice and approval of the faculty adviser and the Student Progress and Promotions Committee, the fourth-year student may choose approved electives offered by the various departments in the College of Medicine. The intent is to provide the student an opportunity to develop his fund of knowledge and clinical competence. Prereq: Admission to the fourth year, College of Medicine and/or permission of the Student Progress and Promotions Committee.

Approved electives:
SUR851ACTING INTERNSHIP IN ORTHOPEDIC SURGERY
SUR852ACTING INTERNSHIP IN PEDIATRIC SURGERY
SUR853ACTING INTERNSHIP IN OTOLARYNGOLOGY-HEAD AND NECK SURGERY
SUR854ACTING INTERNSHIP IN UROLOGY
SUR855ACTING INTERNSHIP IN PLASTIC SURGERY
SUR857ACTING INTERNSHIP IN TRANSPLANTATION SURGERY
SUR862ACTING INTERNSHIP IN GENERAL SURGERY
SUR863ACTING INTERNSHIP IN CARDIOThoracic SURGERY
SUR865ACTING INTERNSHIP IN SURGICAL INTENSIVE CARE
SUR866RESEARCH IN SURGERY
SUR869ACTING INTERNSHIP IN TRAUMA SURGERY
SUR870ELECTIVE IN HEARING, SPEECH AND LANGUAGE
SUR871FOURTH YEAR CLERKSHIP IN SURGERY
SUR872OUTPATIENT MANAGEMENT IN SURGICAL SPECIALTIES
SUR873HAND/UPPER EXTREMITY SURGERY
SUR875MAXILLAROFACIAL DISEASE FOR THE HEALTHCARE PROFESSIONAL
SUR880SURGERY OFF-SITE

SW Social Work

SW124INTRODUCTION TO SOCIAL SERVICES. (3)
Introduction to social welfare concepts and philosophies. Examination of the profession of social work and its philosophy and value commitments within social welfare. Public and private service delivery systems will be studied. Required of social work majors and recommended to be taken the first year.

SW222DEVELOPMENT OF SOCIAL WELFARE. (3)
Study of the cultural traditions, value orientations, and political and economic forces which have contributed to the emergence of present social welfare policies and systems in the United States. Required of social work majors and open to all others.

SW300SOCIAL WORK PRACTICE I. (5)
An introduction to generalist social work practice theory, a study of skills in professional practice with individuals and families, and an examination of social work functions in the direct delivery of social services. Special attention is paid to the NASW Code of Ethics and to the social worker's obligations towards populations-at-risk. Class includes four hours per week of laboratory in health or welfare settings, and three lecture hours. Prereq: SW 124. Open only to social work majors.

SW320GLOBAL POVERTY: RESPONSES ACROSS CULTURES. (3)
An examination of poverty in various non-Western cultures. The course will cover the nature, scope, and distribution of poverty, definitions of poverty, common characteristics of the poor, as well as cultural traditions and folkways which contribute to the problem. Social welfare responses and humanitarian efforts which address the problem are examined.

SW322SOCIAL WORK AND SOCIAL WELFARE. (4)
Designed for transfer students of junior rank. Study of social welfare development, social work philosophy and value commitment and with an examination of social service agencies and programs. Option of agency visitation, group experiences, social service. Not open to those having SW 124 or 222.

SW350SOCIAL WORK PRACTICE II: SURVEY OF GROUPS. (3)
This course introduces students to the place of group work in professional social work practice. Emphasizes the importance of group work to social work practice, specific roles, strategies, and skills when working with groups of vulnerable populations. This course assists students in recognizing the efficacy of practice with groups of different types that fulfill diverse populations are conducted in a variety of community and organizational settings. It introduces students to group dynamics, development, and techniques needed to be a successful group leader. Prereq: Open to Social Work Majors, SW 300, SW 421.

SW354THE FAMILY IN CROSS-CULTURAL PERSPECTIVE. (3)
Approaches the study of the family from a comparative perspective, emphasizing cross-cultural variability in the structure and function of family. Kinship, household formation, sex roles, and socialization are examined in the context of the family, as well as patterns of interaction, personality formation, and family pathology. Prereq: Declared majors or minors in Dept. of Family Sciences or SW. (Same as FAM 354.)

SW395INDEPENDENT WORK. (1-4)
Organized study research and/or tutorial work focused on special issues or problems. May be repeated to a maximum of four credits. Prereq: Major, standing of 3.0 or overall GPA, or consent of dean, and consent of adviser and instructor.

SW400SOCIAL WORK PRACTICE III. (4)
Emphasizing an ecological and systems framework, the course explores theories and practice approaches appropriate for work with groups, organizations, and community systems. The impact of discrimination and oppression on populations-at-risk is discussed, along with problem-solving and intervention strategies. The ethical and legal strategies of the generalist practitioner are studied. Prereq: Open only to social work majors, SW 300, SW 444, SW 455.

SW401PRACTICE WITH CHILDREN AND FAMILIES. (3)
The critical examination of social work practice with children and families with emphasis on social service interventions to strengthen family life. Prereq: SW 354.

SW421HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I. (3)
This foundation course is the first of two to part social work major course sequence that utilizes life course perspective and other theories as tools for understanding human behavior and its development across the lifespan. A “person in the environment” focus is utilized as students explore the interrelatedness of biological, social, psychological, and environmental factors in human behavior and its ongoing development. Particular attention will be given to exploring the impact of racism, sexism, ethnocentrism, classism, and homophobia on human behavior across the life journey. Prereq: Open to Social Work Majors; SW 124 and SW 222 or SW 322.

SW422HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II. (3)
This foundation course is the second in the sequence of two social work courses that focuses on theory as a tool for understanding human behavior on multiple interacting levels, including: individual, family, small group, organization, community and society. The course will explore the interrelatedness of biological, social, cultural, psychological and environmental factors in human behavior and development. Particular attention will be given to exploring the impact of racism, sexism, ethnocentrism, classism and homophobia on human behavior at each level.

SW430SOCIAL WELFARE POLICY: THEORY AND IMPLEMENTATION. (3)
The study and demonstration of different analytic models utilized in analysis of social welfare policy. The course also introduces content in the areas of organizational theory, management tools necessary to the understanding of implementation and evaluations of social welfare policy. Prereq: Open only to social work majors, SW 222 or SW 322, PS 101 or equivalent PS course.

SW435FOUNDATIONS OF PROFESSIONAL ETHICS IN SOCIAL WORK. (3)
This course introduces students to the fundamentals of ethical decision making in generalist professional social work practice. The major philosophical formulations that underlie ethics and relevant concepts derived from these formulations are highlighted as in the development of ethical reasoning and decision-making skills in dealing with moral problems and dilemmas that arise in entry-level social work practice. Prereq: Open to social work majors; completion of SW 300, SW 421.

SW444EDUCATIONAL PRACTICUM. (5)
This course is an introduction to social work field education under faculty direction in the Teaching-Learning Center. Students will begin to apply knowledge from prerequisite courses in experiences which utilize social work practice skills with emphasis on individuals, families and small groups, toward goals of prevention, restoration and enhancement of social functioning. This course includes 18 hours per week of seminar and experiential learning. Prereq: Open only to social work majors, SW 300, SW 420, SW 430.

SW445EDUCATIONAL PRACTICUM II. (8)
This course continues the process of social work practicum under faculty direction in a Teaching-Learning Center. Students will continue to apply knowledge from prerequisite and concurrent courses in experiences which utilize social work practice skills with individuals, families, and small groups as well as with organizations and communities toward the goals of prevention, restoration, and enhancement of social functioning. Includes 24 hours per week of seminar and experiential learning. Prereq: Open only to social work majors, SW 400, SW 444, SW 450.
SW 450 SOCIAL WORK RESEARCH. (4)
An introductory study and application of the processes of research in building social work knowledge and developing effective social work practice. Prereq: Open only to social work majors, basic statistics course, SW 444, SW 435.

SW 460 UNDERSTANDING BEHAVIOR FROM A SOCIOCULTURAL PERSPECTIVE: THEORIES OF PSYCHOPATHOLOGY. (4)
Problematic behavior is discussed employing a social work perspective. Students are introduced to a bio-psycho-socio-cultural assessment model and the DSMIV-TR criteria for mental health disorders. Students learn to respect the person in his or her environment and not to categorize them by their problems or diagnosis. Risk/resilience and strengths perspectives are utilized to understand mental disorders within a socio-cultural context. Emphasis is placed on understanding how theoretical models explain psychopathology and inform interventions in social work practice. Prereq: Open to Social Work Majors; SW 350, SW 422, SW 444.

SW 470 SENIOR SEMINAR. (3)
An integrative professional seminar for senior majors in social work, usually taken in the last semester of core work. Social work issues of an educational, professional and practice nature are examined. Prereq: Open only to social work majors, completion of all core social work courses, but SW 445 prerequisite or concurrent.

SW 505 CHILD WELFARE SERVICES. (2-3)
This course provides a comprehensive introduction to child abuse and neglect, including historical perspectives, indicators of maltreatment, theories about its etiology, and effective interventions on the micro and macro levels. Students will learn about child protective policies and services, and the social worker’s roles and responsibilities.

SW 510 MENTAL HEALTH KNOWLEDGE FOR THE SOCIAL PROFESSIONS. (2-3)
An analysis of personality development, behavior patterns, and social structural factors with special reference to mental health, its service delivery system, and implications for practice in the social professions.

SW 511 GENOCIDE: INTERVENTION WITH SURVIVORS AND GLOBAL PREVENTION. (3)
This course will examine the psychological, cultural, and societal roots of human cruelty, mass violence, and genocide. It explores what enables individuals collectively, and individually to perpetrate mass cruelty/genocide or to stand by and watch such horrors. The course will cover key concepts, perpetrator psychology, biopsychosocial effects on and intervention with survivors. Prereq: Open to students with a minimum of sophomore status and an introductory social science course, or consent of instructor.

SW 512 SOCIAL WORK IN THE CRIMINAL JUSTICE SYSTEM. (3)
Criminal justice processes are studied and evaluated. Factors influencing criminality are examined, as well as consequences and costs to offenders and to society of current policies to control and prevent crime. Traditional and innovative community and institutional programs for adult and juvenile offenders are emphasized to prepare those wanting to work with this population. Prereq: Junior standing or consent of instructor.

SW 514 ALCOHOLISM AND PROBLEM DRINKING. (2-3)
This course will examine traditional and emerging concepts of alcoholism and problem drinking with special attention to problems in definition. The contributions of recent research to our understanding of risk factors associated with various populations will be reviewed. Selected strategies for identification of and intervention into alcoholism and problem drinking will be discussed with particular attention to the unique problems and needs of racial minorities, youth, female, and other populations.

SW 515 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES. (3)
This course is designed to prepare rehabilitation counselors and social workers to become interpreters of medical information concerning major disabilities and to provide an understanding of the psychosocial factors encountered by the disabled. Focus will be on how these factors affect adjustment to a disability, and on professional practice with the disabled. Topics include concepts of medical and psychosocial aspects of disability which relate to conditions that impair bodily systems and/or structures due to illness or accident that result in permanent and/or chronic functional limitations. Prereq: College level courses in biology, psychology, or consent of instructor. (Same as RC 515.)

SW 516 MEDICAL AND PSYCHOSOCIAL ASPECTS OF DISABILITIES II. (3)
This course is designed to prepare rehabilitation counselors and social workers to become interpreters of medical information concerning major disabilities and to provide an understanding of the psychosocial factors encountered by the disabled. Focus will be on how these factors affect adjustment to a disability, and on professional practice with the disabled. Topics include concepts of medical and psychosocial aspects of disability which relate to conditions that impair bodily systems and/or structures due to illness or accident that result in permanent and/or chronic functional limitations. Prereq: College level courses in biology, psychology, or consent of instructor. (Same as RC 516.)

SW 523 SOCIAL PERSPECTIVES ON RACISM AND ETHNIC PREJUDICES IN AMERICA. (2-3)
The course is designed to provide the knowledge needed in understanding the dynamics of institutional racism from a broader perspective of five specific ethnic minorities in rural and urban America. Particular emphasis is placed upon planned community change and strategies pertinent to minority group communities. Students who wish to make a special, in-depth study of one of the specified content areas may take this course for one additional credit. Prereq: Consent of instructor. (Same as AAS 523.)

SW 571 SOCIAL WORK AND THE LAW. (3)
The course examines the lawyer’s methods and the legal system; the organization and ethics of the practicing bar; the impact of legal decision-making and lawyers on society in such selected situations as civil rights, juvenile and criminal justice and consumer debtor-creditor relationships; and working relationships between social workers and lawyers.

SW 580 TOPICAL SEMINAR IN SOCIAL WORK. (1-4)
Study of issues of current and special significance for social work practice. Issues selected in accordance with the needs and interests of students enrolled. May be repeated to a maximum of eight credits. Prereq: Open to the student of social work or consent of instructor.

SW 595 COOPERATIVE SOCIAL WORK EDUCATION. (0)
A course designed for social work students who, through the cooperative education office, take positions, such as field educators, under the supervision of a sponsoring employer. Enrollment in the course constitutes full-time status. Course may be taken on a pass-fail basis only and repeated with the permission of the cooperation education office. Prereq: Approval of the Cooperative Education Coordinator.

SW 600 THEORY-INFORMED PRACTICE WITH INDIVIDUALS. (3)
This course introduces students to the history and philosophy of the social work profession and social work practice theory. It enhances analytical thinking that underlies engagement, assessment, intervention, and evaluation with individuals, and focuses on mastering social work skills for professional practice with individuals. Special attention is paid to the NASW Code of Ethics and to the social worker’s obligations toward populations-at-risk. Prereq: Acceptance into the MSW program.

SW 601 THEORY-INFORMED PRACTICE WITH FAMILIES. (3)
This course introduces students to family social work and the theoretical perspectives and concepts that underlie social work with families. The course emphasizes the development and application of skills and techniques for conducting family assessments and for conceptualizing theory-based and research-informed intervention plans for families in need. The course addresses diverse family forms, cultural competence, and multi-problem families within the contexts of neighborhoods, schools, and communities. Prereq: SW 600 or concurrent.

SW 602 THEORY-INFORMED PRACTICE WITH GROUPS. (3)
This course introduces students to the place of group work in professional social work practice, the theoretical and philosophical formulations that underlie group work and the concepts and techniques derived from these formulations. The course emphasizes group dynamics, group development, and techniques needed to be a successful group leader. Prereq: Admission into the MSW program, SW 600, SW 601, SW 635.

SW 602 SOCIAL WORK PRACTICE WITH CHILDREN AND YOUTH. (2-3)
Study and analysis of developmental crises and problems of children and youth. Emphasis upon social work strategies of intervention for prevention, amelioration or resolution. Prereq: SW 600 or 601 or consent of instructor.

SW 606 SEMINAR IN CRIMINAL JUSTICE PROCESSES. (2)
Criminal justice processes are studied and evaluated emphasizing system aims, theories of criminality and societal reaction, the consequences and costs to offenders and to society of current policies to control and prevent crime. Traditional and innovative community and institutional programs for adult and juvenile offenders will be examined.

SW 611 SOCIAL WORK PRACTICE IN MENTAL HEALTH. (2-3)
Description, analysis, and evaluation of social work practice in the mental health delivery system, with particular emphasis on social work interventions and roles.

SW 612 SEMINAR ON SOCIAL WORK PRACTICE WITH WOMEN. (2-3)
This seminar focuses on the special problems and practice strategies relevant to selected groups of women served by social work.

SW 613 URBAN ECOCULTURE AND AGING. (2 or 3)
Effects of an urban environment upon the aging population, including community design, city planning, housing, transportation, relocation, and mobility. The impact of technological advances will be examined from the point of view of theory, current research, and the process of man-environmental relationships.

SW 616 SOCIAL WORK PRACTICE IN SCHOOL SETTINGS. (2-3)
A presentation and examination of social work practice in the mental health service delivery system, with particular emphasis on social work interventions and roles.

SW 617 FAMILY VIOLENCE: SOCIAL WORK INTERVENTIONS. (2-3)
The development of a knowledge based framework for understanding, preventing and intervening in family violence as seen in child, spouse and elder abuse.
**Course Descriptions**

**SW618 SOCIAL WORK PRACTICE WITH GAY AND LESBIAN PEOPLE.**

This course is designed to expand the knowledge and understanding of students about the theory and dynamics of homophobia, heterosexism, and homonegativity. The effects of living with prejudice and discrimination among the gay and lesbian support systems available. Micro and macro social work intervention strategies will be studied as they relate to overall themes. Prereq: SW 600 or 601 or consent of instructor.

**SW623 SOCIAL WORK PRACTICE WITH GROUPS.**

This course critically analyzes approaches to group practice in social work emphasizing socialization and resocialization purposes and leader activities. Research and practice issues are examined. Prereq: SW 600 or 601 or consent of instructor.

**SW624 PERSPECTIVES ON HUMAN SEXUALITY.**

An examination and study of historical and current perspectives of sexuality as it relates to behavioral patterns, cultural attitudes, social policy, and practice. Prereq: Knowledge of human behavior and personality theory highly recommended. (Same as FAM 624.)

**SW626 FORENSIC MENTAL HEALTH: EVALUATION AND TREATMENT.**

An intensive analysis and study of forensic mental health including court evaluation, courtroom testimony and treatment of the victim. Students who wish to take this course for three credits will be expected to complete a depth study of a specific content area. Lecture, two hours; laboratory (only for those taking the course for three hours), two hours per week. Prereq: Knowledge of behavior and personality theory is highly recommended.

**SW627 COLLABORATIVE PRACTICE: SUBSTANCE ABUSE, MENTAL HEALTH AND SOCIAL SERVICE.**

This course provides students with critical knowledge about substance abuse and mental health problems experienced by families. A variety of subjects related to substance use disorders and mental health problems will be discussed such as screening, assessment, case management, and referral services. Collaborative practice with substance abuse, mental health service providers, social services, and other providers is addressed. Prereq: Completion of a baccalaureate degree.

**SW630 INTRODUCTION TO SOCIAL WELFARE POLICY AND SERVICES.**

This course reviews the history of the social welfare system and emphasizes the analysis of social programs and policies and of the policy-making process. An important focus of the course is to identify and understand the impact of a wide range of social policies on social work clients and the human service delivery system within a social justice framework. The course content reflects the interdisciplinary efforts of the social, political, legal, economic, and administrative processes which are vital to policy making at all levels. Prereq: Acceptance into the MSW program.

**SW635 INTRODUCTION TO PROFESSIONAL ETHICS IN SOCIAL WORK.**

This course introduces students to the place of ethics in professional social work practice, the philosophical formulations that underlie the ethics and relevant concepts derived from these formulations. The course emphasizes the development of ethical reasoning and decision-making. Prereq: SW 600 or concurrent.

**SW640 FOUNDATION PRACTICUM.**

Students in this course engage in a generalist social work field placement under the direction of a faculty field professor and an agency field instructor. Through field education seminars students integrate knowledge, skills, and behaviors from prerequisite and concurrent courses, to demonstrate foundation social work practice with individuals, families, small groups, organizations, and communities. The focus includes attention to context, policy, ethical considerations, the application of theory, and the use of research-informed interventions. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 600, 601, 602, 630, 635, 650 or concurrent.

**SW642 PSYCHOLOGICAL ASPECTS OF HUMAN AGING.**

Description and explanation of behavior, socialization and personality differentiation during the post-maturation developmental period: emotional aspects of aging: perception; intelligence; learning; motivation; normal and abnormal behavior; sexuality; life style. Prereq: SW 620 or equivalent, or consent of instructor.

**SW650 RESEARCH METHODS IN SOCIAL WORK.**

Introduction to systematic approaches to scientific thinking necessary for building knowledge and evaluating one’s own practice. Includes ethical use of scientific inquiry, critical appreciation of quantitative and qualitative methodologies, and use of research for program evaluation. Prereq: Open only to students admitted to the graduate Social Work program.

**SW680 SPECIAL PROBLEMS IN SOCIAL WORK PRACTICE.**

Current issues that have special significance for social work practice. Selected problems in accordance with the needs and interests of the students registered for the course. May be repeated to a maximum of six credits. Prereq. Consent of instructor.

**SW701 ASSET-BASED AND SUSTAINABLE COMMUNITY ASSESSMENT AND DEVELOPMENT.**

This course is a practicum course focusing on assessment and intervention in the Social and Community Development Concentration. The course examines the community context of social work practice with an emphasis on neighborhoods, communities, and larger social systems that influence the quality of life. Models of community practice are presented to assess and intervene in social problems and social injustice that constrain opportunities and limit access to resources for individuals and families. Particular attention is given to the concept of asset-based development for building community capacity and empowering individuals and groups. Prereq: SW 721.

**SW702 SUBSTANCE MISUSE, VIOLENCE AND RISK MANAGEMENT.**

This course is designed to enhance students’ clinical judgment and decision making with populations at high risk for victimization or perpetration of violence and substance misuse. It provides contemporary scientific and clinical knowledge and explores the associations of violence, child abuse, and mental disorders with substance misuse. Theories of addiction are explored with attention to genetic, familial, gender, geographical, and cultural contributions. Neurochemical and neuroanatomical correlates of addiction are explored. Assessment approaches and major interventions are analyzed and applied in practice sessions. Prereq: Completion of SW 600, SW 601, and SW 635, or admission to the MSW program with advanced standing, or permission of instructor.

**SW711 ADVANCED LEADERSHIP ROLES IN SOCIAL WORK.**

Advanced study and analysis of leadership roles in social work practice with emphasis upon administration and supervision. Some attention is given to consultation, staff development and teaching, and review of theories of adult learning. Prereq: SW 701 or consent of instructor.

**SW718 CLINICAL DECISION-MAKING AND JUDGMENT FOR SOCIAL WORK.**

This course provides the foundation for decision and judgment processes necessary for effective clinical social work practice, and is usually taken concurrently with the Psychopathology II course. Prereq: Admission to the Clinical Social Work concentration.

**SW720 SOCIAL WORK PERSPECTIVES ON HUMAN AND CULTURAL DIVERSITY.**

This second required course in the human behavior and social environment sequence builds upon the foundation course. The focus of this course is upon the effects of discrimination and oppression experienced by diverse population groups with special attention to the effects of racism, sexism, ageism, classism and geography upon vulnerable groups; and upon institutionalized societal and cultural themes in diversity; with implications for social work practice. Prereq: SW 620 or advanced standing in the MSW program. (Same as AAS 720.)

**SW721 POVERTY AND INEQUALITY.**

Poverty and inequality are among the most pervasive social problems of our time. According to the NASW code of ethics, tackling poverty is a primary goal for social workers. The course aims to unmask the complexities of poverty and inequality by introducing students to the nature and characteristics of poverty, examining the predominant explanations of poverty and inequality, exploring the consequences of poverty and inequality, and surveying historical and contemporary approaches to poverty reduction. Diverse perspectives will be presented throughout the course. Special attention will be given to issues related to values and ethics including social justice, human rights and well-being. Prereq: Admission to the Community and Social Development Concentration.

**SW722 PSYCHOPATHOLOGY FOR SOCIAL WORK PRACTICE.**

This course offers a survey of the major mental disorders typically encountered by social workers in clinical practice, protective services, family services, and other practice areas. It is designed to increase the social worker’s working familiarity with diagnostic classifications, decision making and natural histories of disorders and social work treatments of disorders. Prereq: Admission into the MSW program with advanced standing or completion of SW 600, SW 601, and SW 635.

**SW724 ASSESSMENT AND TREATMENT PLANNING IN SOCIAL WORK.**

This course is designed to prepare the social worker to conduct structured, semi-structured and observational clinical assessments of adults, children, families and groups. Special attention will be paid to diagnostic assessments, substance use evaluations, lethality assessments, motivational interviewing, and other evidence-based and evidence-informed approaches. This course is designed to be taken after or concurrently with the clinical decision making course. Prereq: Admission to the clinical social work concentration, SW 718, SW 726 or concurrent.

**SW726 PSYCHOPATHOLOGY FOR CLINICAL SOCIAL WORK.**

This course provides the Master’s level social worker student an opportunity for advanced study of differential diagnostic assessment using the current edition of the Diagnostic and Statistical Manual of Mental Disorders. The course also provides an opportunity for more detailed study of the more common mental disorders seen in social work practice. In conjunction with the diagnostic assessment course it provides an opportunity for advanced study of clinical decision making as it pertains to current mental health assessment. Prereq: SW 722, SW 702, admission to the Clinical Social Work concentration, SW 718 or concurrent.
Course Descriptions

SW728 COMPARATIVE TREATMENT MODALITIES. (3)
This course builds on previous content related to clinical decision-making, psychopathology and clinical assessment, and is designed to (1) apply a range of intervention theories to children, adults, families, and groups, (2) facilitate the student’s capacity to conduct a comparative analysis of the approaches across common, conceptual, clinical, cultural and ethical domains, and to provide the forum for a critique of each approach using the latest empirical evidence on efficacy and effectiveness. Prereq: SW 718, SW 724, SW 726.

SW730 EVIDENCE-BASED PRACTICE FOR SOCIAL WORKERS. (3)
This course offers an intensive study of three evidence-based practices one for adult, one for children and one group intervention. It is designed to increase the social worker’s familiarity with evidence-based practices for social work treatment of mental health disorders. Prereq: SW 718, SW 724, and Psychopathology II.

SW731 ADVANCED SOCIAL WELFARE POLICY AND ANALYSIS. (3)
This course builds on the social justice tradition and the policy analysis framework provided in SW 630 to prepare students to engage in the policy-making processes that impact and are impacted by the family and community service delivery system. Controversial issues within the child welfare, school social work, aging, and community development policy arenas are examined. Prereq SW 721, SW 737.

SW733 COMMUNITY-INFORMED ORGANIZATIONAL INTERVENTIONS. (3)
This course is an advanced Master’s level class designed to explore the organizational context for creating change in communities. Students will be introduced to practice behaviors related to designing programs that respond to changing community demographics and needs and that promote inclusion of diverse community constituencies. The course emphasizes using community-based data and assessments and reflexive learning models to evaluate programming and design program modifications and innovations that will benefit the community. Prereq: SW 721, SW 737, SW 701 or concurrent.

SW734 CLINICAL SOCIAL WORK INTEGRATIVE SEMINAR. (3)
This seminar is taken by MSW students in their last semester to prepare for the comprehensive examination. Foundation level and concentration course content and practice behaviors will be reviewed to assist students to integrate their course of study. Prereq: SW 724 or concurrent.

SW735 COMMUNITY AND SOCIAL DEVELOPMENT INTEGRATIVE SEMINAR. (3)
This seminar is taken by MSW students in their last semester to prepare for the comprehensive examination. Foundation level and concentration course content and practice behaviors will be reviewed to assist students to integrate their course of study. Prereq: SW 743 or concurrent.

SW737 NON-PROFIT MANAGEMENT IN HUMAN SERVICE ORGANIZATIONS. (3)
This course focuses on social work management practices and leadership skills required in the development and management of non-profit organizations. With a particular focus on the human services delivery system, this course emphasizes achievement of human service goals and objectives through management control processes such as strategic planning, human resource management, program development and evaluation, finance, and advisory board governance. Prereq: SW 721 or concurrent.

SW740 CLINICAL SOCIAL WORK PRACTICUM. (3)
Students in this course engage in learning that prepares them to practice as clinical social workers at the advanced level. Students work in public and private agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and groups. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSW concentration courses in field settings that provide opportunities to practice advanced social work in an area of concentration. Students will perform a variety of tasks including assessment, case management, psycho-education, as well as individual, family, and/or community-based interventions. Placement in a human service agency and experiential learning of 300 hours including weekly seminars. Prereq: SW 640 or advanced standing.

SW741 CSD PRACTICUM. (3)
Students in this course engage in learning that prepares them to practice as social workers at the advanced level in an area of concentration. Students perform a variety of tasks including assessment, case management, psycho-education, as well as individual, family, and/or community-based interventions. Placement in a human service agency and experiential learning of 300 hours including weekly seminars. Prereq: SW 721, 737 or concurrent. This class is to be taken concurrently with the SW 751 research course.

SW741A FAMILY AND COMMUNITY CONCENTRATION PRACTICUM. (4)
This field-based course prepares students to practice as social workers at the advanced level in an area of concentration. Students perform a variety of tasks including assessment at the individual and community level, case-management, and individual, family, and community-based interventions. Placement in a human service agency and experiential learning of 300 hours including weekly seminars. Prereq: SW 721, 737 or concurrent. This class is to be taken concurrently with the SW 751 research course.

SW742 CLINICAL SOCIAL WORK PRACTICUM II. (3)
This course builds on the experiences and activities of SW 740. Students in this course engage in learning that prepares them to practice as social workers at the advanced level in public and private settings. Students work in government and non-profit community based agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and communities. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSW concentration courses and will be engaged in work that provides opportunities to become competent social work practitioners at the organizational and macro levels. Students will perform a variety of tasks including organizational and community assessment, advocacy, development and promotion of policy, research and evaluation, and development of community based interventions. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 740, SW 750, SW 778, SW 730 or concurrent.

SW743 COMMUNITY AND SOCIAL DEVELOPMENT PRACTICUM. (3)
This course builds on the experiences and activities of SW 741. Students in this course engage in learning that prepares them to practice as social workers at the advanced level in public and private settings. Students work in government and non-profit community based agencies that provide services to a wide range of individuals (e.g., children, the elderly, persons with disabilities, etc.), families, and communities. Students will integrate knowledge, skills and behaviors from prerequisite and concurrent CSD concentration courses and will be engaged in work that provides opportunities to become competent social work practitioners at the organizational and community level. Includes 300 hours per semester of seminar and experiential learning. Prereq: SW 741, SW 751, SW 701, SW 731, and SW 733 or concurrent.

SW749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

SW750 CLINICAL SOCIAL WORK RESEARCH. (3)
This course builds on the introductory research class designed to study the processes of research in enhancing social work knowledge and developing effective social work practice. This course helps students develop the skills necessary to become sophisticated consumers of clinical research; execute single subject designs in clinical practice to assess and monitor progress, and participate in clinical intervention studies to test the efficacy and effectiveness of interventions. Prereq: SW 650 or advanced standing. This course is designed to be taken concurrently with SW 740.

SW751 RESEARCH SKILLS FOR COMMUNITY AND SOCIAL DEVELOPMENT. (3)
This is an intermediate research course with an emphasis on program evaluation. The course will provide instruction in research methodology as well as research design. In addition, there is an emphasis on developing competencies and skills that will allow students to work with multicourse research teams in diverse settings. Prereq: SW 650 or advanced standing. This course is designed to be taken concurrently with SW 741.

SW767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

SW769 RESIDENCY CREDIT FOR THE DOCTOR'S DEGREE. (0-12)
May be repeated indefinitely. Prereq: Successful completion of qualifying exam.

SW770 DOCTORAL RESEARCH. (3)
This course focuses on the role of research in the profession, the logic of research, the major strategies and techniques for conducting research in social work settings, and preparation of a research proposal. This is the first of a two-course sequence with a primary focus on qualitative methods. Prereq: Admission into the Social Work doctoral program.

SW771 DOCTORAL RESEARCH. (3)
In this second of two required research methods courses, students will conduct and report on the quantitative research project proposed in the first semester. They will also conduct a meta-analysis, test a research instrument’s reliability and validity, conduct an exercise using qualitative methodology, and explore large public databases. Prereq: SW 770.

SW773 DOCTORAL STATISTICS II. (3)
This social work course aims to help students understand and apply multivariate techniques in the fields of social welfare and social work research. Topics covered will include multivariate regression, factor analysis, path analysis, event history analysis, as well as logit and probit analysis. Prereq: STA 570 or other graduate level statistics course.
SW774 MENTAL HEALTH RESEARCH METHODS. (3)
This course will explore the principles and procedures that govern mental health research by examining the different ways researchers study mental health phenomenon. In this course, students will learn the skills to engage in the scientific investigation of significant mental health problems, and dissemination strategies utilized to transfer empirical findings into mental health practice and policy development. This course emphasizes aspects of methodological design essential for conducting meta-analysis, treatment, prevention and epidemiological research that may be outside the scope of a general research course. Prereq: SW 770 and SW 771 (SW 771 may be taken concurrently).

SW780 INDEPENDENT WORK. (1-6)
Organized study, research and/or tutorial focused on special issues or problems. May be repeated to a maximum of six credits. Prereq: Major, graduate standing of 3.0 overall GPA, or consent of dean, and consent of adviser and instructor.

SW781 THEORY DEVELOPMENT IN THE SOCIAL WORK PROFESSION. (3)
Explores the nature of knowledge, how it is generated and acquired. Students will distinguish explanatory from practice theory, understand paradigms as bases for ideas, recognize and formulate concepts, understand relational statements, theoretical statements, and how these relate to theory and data. Strategies for building knowledge will be discussed. Students will analyze theories into their components, construct mini-theories, and propose how they can be tested in social work practice. Prereq: Admission into the doctoral program or consent of the program director.

SW782 ADVANCED ANALYSIS OF SOCIAL PROBLEMS, POLICY AND PRACTICE. (3)
This course provides students with the theoretical and conceptual framework for understanding social problems and their implications for macro social work practice. Critical perspectives related to social science theory will be identified, assumptions assessed, values examined, and empirical evidence analyzed. Theories covered will be drawn from sociological, socio-cultural, political, economic, historical and other perspectives. Students will be expected to develop their abilities to analyze and critique social problems and macro social work practice. Prereq: Admission into the doctoral program.

SW783 HUMAN BEHAVIOR AND CHANGE THEORIES IN SOCIAL WORK PRACTICE. (3)
A critical analysis of theories which seek to explain human behavior and serve as foundations for current clinical change interventions; includes an examination of the empirical support for and efficacy of major treatment modalities used in social work practice. Prereq: Admission to the doctoral program.

SW784 ETHICS, SOCIAL WORK AND SOCIETY. (3)
This course will identify and articulate the philosophical formulations of relevant ethical traditions and their implications for social work. Students will examine approaches to ethical analysis as well as major ethical problems facing contemporary social work. The course will emphasize the development of advanced ethical reasoning and decision-making skills. Prereq: Admission to the doctoral program and SW 781.

SW785 PROSEMINAR IN SOCIAL WORK RESEARCH. (1)
This seminar introduces beginning doctoral students to the research activities of social work faculty and advanced students. Presentations will familiarize students with practical issues in the conduct of current research. May be repeated to a maximum of two credits. Prereq: Admission into the doctoral program.

SW786 DOCTORAL RESEARCH PRACTICUM. (3-6)
Provides the doctoral student opportunity to conduct social work research under the supervision of a chosen faculty member. This experience is expected to result in one or more reports suitable for submission to a scholarly journal at conclusion of the practicum. Prereq: Completion of first year of doctoral study.

SW787 DOCTORAL TEACHING PRACTICUM. (3-6)
Supervised teaching and other classroom experiences designed to prepare doctoral students to be social work educators. Prereq: Completion of first year of doctoral study.

SW788 RESEARCH IN SOCIAL WORK SEMINAR. (3)
This course is designed to facilitate the student’s completion of the dissertation prospectus and the dissertation itself. Students will make formal presentations on their research plans and will address available literature, measurement and methodological issues, analysis of data, limitations, and importance of the investigation. Prereq: Six hours doctoral level research.

SW790 SEMINAR IN TEACHING AND LEARNING. (3)
Students will facilitate seminar sessions drawing upon educational theory and relevant literature, create syllabi, observe each other teaching, and develop papers elucidating their grading practices and philosophy of teaching. Prereq: Admission into the doctoral program or consent of instructor.

SW795 ADVANCED DOCTORAL SEMINAR IN SOCIAL WORK (Subtitle required). (3)
Topics of current importance in Social Work research and practice, including philosophic, theoretical, ethical, and technical considerations. May be repeated to a maximum of twelve credits under different subtitles. Prereq: Admission to the joint Ph.D. program.
TA 271 WORLD THEATRE II.  (3)
A multicultural and transnational examination of the history, theory, dramatic literature, and practices of theatre from 1500 - 1800. The second of four courses in a four semester sequence of World Theatre.

TA 274 WORLD THEATRE IV.  (3)
A multicultural and transnational examination of the history, theory, dramatic literature and practices of theatre from 1950 to the present. The fourth of four courses in a four semester sequence of World Theatre.

TA275 STAGE MANAGEMENT.  (3)
This lecture-studio course explores the role and responsibilities of the stage manager in academic, community, regional, and professional theatre settings. Prereq: TA 115 and TA 260.

TA 286 SOCIAL ACTION THEATRE.  (3)
This course will explore applications of theatre practice and performance as they contribute to various cultures and/or community groups.

TA 300 SPECIAL PROJECTS IN THEATRE (Subtitle required).  (1-3)
Reading, research, lecture and experimentation in a particular area of theatre history, theory, design and/or performance. This course will enable the student to link theory and practice to develop a role, or performances study for the stage. May be repeated to a maximum of twelve credits. Prereq: By audition or permission of instructor.

#TA 311 AUDITION TECHNIQUES.  (3)
This course is an introduction to basic audition techniques. Prereq: TA 115 and TA 215 or equivalent.

TA 315 THEATRE STUDIO III.  (3)
This course is an advanced study focused on three classical western acting styles from ancient Greece, Elizabethan England, Restoration England, or Neo-classic France. Prereq: TA 115 and TA 215 or equivalent.

TA 326 ADVANCED ACTING (Subtitle required).  (3)
A course of advanced study focused on a significant acting style or performance tradition. Repeatable up to six credit hours. Prereq: TA 115, TA 215 and TA 315 or consent of instructor.

TA 330 THEATRE DIRECTING I.  (3)
Discussion and practice of the director’s basic techniques, methods and responsibilities. Study of movement, interpretation of line, use of stage areas, use of levels, script analysis, and understanding dramatic action. Lecture, two hours; laboratory, two hours per week. Prereq: Major or consent of instructor.

#TA 336 ADVANCED ACTING: CLASSICAL STYLES.  (3)
A course of advanced study focused on three classical western acting styles from ancient Greece, Elizabethan England, Restoration England, or Neo-classic France. Prereq: TA 115 and TA 215 or equivalent.

#TA 348 MUSICAL THEATRE TECHNIQUE.  (3)
Musical Theatre Technique will provide students with a basic understanding of the specialized acting technique required to perform in the genre of musical theatre. Utilizing the literature of Musical Theatre, students will learn to coordinate dialogue, melody, lyrics, and staging for performance. Students will be exposed to a basic framework of musical theatre history including notable directors, innovations, styles, and productions.

TA 350-352 TOPICS IN THEATRE.  (3)
Reading, research, lecture and/or discussion in various areas of theatre history, technology and practice. May be repeated three times for a maximum of 12 hours when identified by different course subtitles. Prereq: Major or consent of instructor.

TA 361 GRAPHICS FOR THEATRE.  (3)
A studio course to develop the graphic skills in relation to theatrical design and technology. Sketching, rendering, mechanical drafting, pattern drafting, CAD, and relative computer programs are explored. May be repeated to a maximum of six hours. Prereq: TA 115 or TA 150 or consent of instructor.

TA 365 COSTUME DESIGN.  (3)
A lecture/studio course to teach basic skills in costume design through analysis, collaboration, research, and rendering. Lecture, one hour; studio, four hours per week. Prereq: TA 115 or TA 150 or consent of instructor.

TA 367 LIGHTING DESIGN.  (3)
Theory, practice and design of lighting for the theatre. Examination of the practical and aesthetic requirements of lighting through research and analysis. Application of theory to light in a variety of contexts including theatre, opera, musicals and concerts. Lecture, three hours; laboratory, three hours per week. Prereq: TA 115 or TA 150 or TA 267 or consent of instructor.

TA 368 VISUAL STORYTELLING.  (3)
Explore communicating a story through non-text based means using the visual medium of puppet and mask theatre and its associated techniques. May be repeated to a maximum of six hours.

TA 370 STAGING HISTORY.  (3)
A one-semester course dedicated to the research, development and creation of a “Docu-Drama” or Documentary Play based on a local, regional or nationalistic historical event, era or site.

TA 374 SCENE DESIGN.  (3)
Process of evolving a scenic design through play analysis, research, metaphysical association and the assimilation of theatrical art forms against practical prescribed limitations. Practice in developing floor plans, elevations and simple sketching techniques. Lecture, two hours; laboratory, two hours. Prereq: TA 115 or TA 150 or consent of instructor.

#TA 383 PLAY ANALYSIS.  (3)
Student actors, designers, directors, playwrights and dramaturgs will be introduced to critical methodologies that can be applied to in-depth analysis of a variety of styles and genres of dramatic literature and performance.

TA 384 BLACK THEATRE WORKSHOP.  (3)
A workshop that explores the history, literature and performance of theater artists of the African diaspora. (Same as AAS 384.)

*TA 385 WORLD THEATRE I.  (3)
A multicultural and intercontinental exploration of the history, theory, dramatic literature, and practices of theatre from its earliest origins to 1800 c.e.

*TA 386 WORLD THEATRE II.  (3)
A multicultural and transnational examination of the history, theory, dramatic literature, and practices of theatre from 1800 to the present day. The second of two courses in a two semester sequence of World Theatre.

TA 387 SEMINAR IN DRAMATIC LITERATURE (Subtitle required).  (3)
Advanced reading and discussion in theatre literature, theory and criticism. May be repeated to a maximum of 12 credits when identified by different course subtitles. Prereq: Major or permission of instructor.

TA 390 THEATRE PRACTICUM.  (1)
The study and practice of production, performance, or directing techniques through rehearsal and performance. May be repeated to a maximum of eight credit hours. At least four hours production related activities per week. Pass/fail only. Prereq: Consent of instructor and filing of prospectus.

TA 395 INDEPENDENT WORK.  (1-3)
For undergraduate majors in theatre arts. Pursue independent work under the guidance of a staff member. Write a paper embodying the results of his research study and take an examination. May be repeated to a maximum of 12 credits. Prereq: Major, filing of prospectus at time of registration, and consent of chairperson.

TA 396 SUMMER THEATRE.  (3)
Concentrated practical experience in the UK Summer Theatre program. May be repeated to a maximum of six credits. Eight hours laboratory per week. Prereq: Consent of department by audition or interview.

TA 399 FIELD-BASED/COMMUNITY BASED EDUCATION.  (1-15)
A community-based or field-based experience in theatre, under the supervision of a faculty member. May be repeated to a maximum of 15 credits. Prereq: Consent of instructor and department chairperson; completion of departmental learning agreement. (Approval of Dean of Fine Arts required for more than six credits per semester.)

TA 470 ADVANCED PROJECT IN DESIGN.  (3)
A continuation of course work in a student’s chosen area of design and production (scenery, costumes, or lighting). The first half of the course will focus on the design, and the second half on the production of design. Lecture, one hour; studio, four hours per week. May be repeated to a maximum of six credits. Prereq: TA 260, TA 265, TA 267, and one of the following: TA 365, TA 367, TA 374; and consent of the instructor.

TA 485 FRENCH THEATRE: CULTURE, TEXT AND PERFORMANCE.  (3)
This course will focus on a particular period or playwright’s work from the cannon of French Dramatic Literature, and explore the social and cultural world of the period and playwright. Course work will include a public performance, using both English and French languages. May be repeated to a maximum of six hours. Prereq: Premajor requirements must be completed, or consent of instructor. Some knowledge of French is helpful.

*TA 490 SENIOR CAPSTONE.  (1)
A capstone course in theatre. This course measures, through a comprehensive examination and rigorous exercises, the theatre student’s retention of knowledge from the undergraduate experience and their preparedness for further education or the profession. Prereq: Senior standing, completion of core curriculum.

TA 499 PROFESSIONAL THEATRE INTERNSHIP.  (1-12)
A professional theatre internship, which provides students with experiential learning in the area of theatre arts. The internship is identified and conducted under supervision of a Theatre Department faculty member. Students must file a learning contract with the College of Fine Arts. May be repeated to a maximum of 12 credits. Prereq: Overall GPA 2.5, upper division standing in major, or consent of instructor.

TA 516 PLAYWRITING.  (3)
A course designed for students interested in creative drama. The completion of at least one play is required. May be repeated to a maximum of six credits. Prereq: Consent of instructor.

<tbody>
<tr>
<td><strong>TA 526 PLAYWRITING II.</strong> (3) An advanced workshop in the art and craft of playwriting. Prereq: TA 516.</td>
</tr>
<tr>
<td><strong>TA 530 EXPERIMENT IN DIRECTING.</strong> (3) This course exposes students to the directing styles of leading avant-garde 20th and 21st century stage directors from around the world. Each student will select a particular director to research, to observe, and to re-create the selected individual’s directing style as an applied exercise. A student may repeat this three credit course selecting both a different time period and director to study; therefore, this course may be taken for up to six credit hours. Prereq: TA 330.</td>
</tr>
<tr>
<td><strong>TA 584 ASIAN THEATRE.</strong> (3) An in-depth study of the major forms and styles of traditional and contemporary theatre and dance performances in India, China, Japan, and southeast Asia. Prereq: Junior, senior, or graduate standing, or permission of instructor.</td>
</tr>
<tr>
<td><strong>TA 587 GENDER AND PERFORMANCE (Subtitle required).</strong> (3) An examination of the ways in which gender is performed, according to various theoretical constructs. Topics may include feminist performance of gender, queer theories of gender, and masculinist theory in relationship to performance. Prereq: Junior status.</td>
</tr>
<tr>
<td><strong>TA 600 ADVANCED STUDIES IN SCRIPT ANALYSIS.</strong> (3) An advanced study of dramatic literature in its context as a basis for theatrical production. Textual interpretation is considered from the viewpoint of all members of the artistic team. The course requires practical application of analytical theories. Prereq: Graduate standing.</td>
</tr>
<tr>
<td><strong>TA 610 CRITICAL THEORIES AND PERFORMANCE.</strong> (3) This class introduces students to critical theories of performance and production and to the various issues raised by the professional production of selected plays. May be repeated to a maximum of six credits.</td>
</tr>
<tr>
<td><strong>TA 620 APPLIED RESEARCH IN THEATRE (Subtitle required).</strong> (3) This course focuses on the application of performance/production research to the actual production of a dramatic text. Students will investigate the work of a selected writer, examine critical and historical materials relative to that writer, and then apply this research to the production of one play. The play will be produced as a part of the department’s Studio Season. May be repeated to a maximum of six credits.</td>
</tr>
<tr>
<td><strong>TA 625 ADVANCED STYLES OF ACTING.</strong> (3) The rehearsal and performance of scenes and class exercises in improvisation to develop creative imagination as a basis for acting. Lecture, three hours; laboratory, two hours. May be repeated to a maximum of six credits. Prereq: Consent of instructor.</td>
</tr>
<tr>
<td><strong>TA 630 DRAMATURGY.</strong> (3) Study of conceptual collaboration while working within the production environment. Prereq: TA 600.</td>
</tr>
<tr>
<td><strong>TA 650 TOPICS IN AMERICAN THEATRE (Subtitle required).</strong> (3) Selected topics in contemporary and historical American Theatre. May be repeated to a maximum of six credits.</td>
</tr>
<tr>
<td><strong>TA 660 ADVANCED STUDIES IN DESIGN/TECHNOLOGY (Subtitle required).</strong> (3) Advanced problems in design and technology. Subtitle required. Course may be repeated to a maximum of twelve hours when identified under different subtitles. Prereq: Graduate standing in Theatre.</td>
</tr>
<tr>
<td><strong>TA 690 PRODUCTION PRACTICUM.</strong> (1) The study and practice of production techniques through rehearsal and performance. May be repeated to a maximum of two credits. Prereq: Consent of instructor and filing of prospectus.</td>
</tr>
<tr>
<td><strong>TA 691 PERFORMANCE PRACTICUM.</strong> (1) The study and practice of acting and directing through rehearsal and performance. May be repeated to a maximum of two credits. Prereq: Consent of instructor and filing of prospectus.</td>
</tr>
<tr>
<td><strong>TA 692 DIRECTING/DRAMATURGY PRACTICUM.</strong> (1-3) The practice of directing or dramaturgy for a selected play script through rehearsal and performance phases. May be repeated to a maximum of six credits. Prereq: TA 730, consent of instructor and filing of prospectus.</td>
</tr>
<tr>
<td><strong>TA 725 SPECIAL PROBLEMS IN ACTING (Subtitle required).</strong> (3) Advanced practice and research in acting theory and technique for the director or dramaturg. May be repeated to a maximum of six credits when identified by a different subtitle. Lecture: 3 hours; laboratory: 2 hours per week. Prereq: Graduate Standing in Theatre.</td>
</tr>
<tr>
<td><strong>TA 730 ADVANCED STUDIES IN DIRECTING (Subtitle required).</strong> (3) Seminar and research in the aesthetics, history, style, and directional techniques required for theatrical production. May be repeated to a maximum of six credits when identified by a different subtitle. Lecture: 3 hours; laboratory: 2 hours per week. Prereq: TA 600.</td>
</tr>
<tr>
<td><strong>TA 739 INTERNSHIP IN THEATRE.</strong> (3-6) A field based learning experience in the student’s area of expertise conducted at a nationally recognized theatre venue. The internship appointment is secured by the student with the consent and supervision of a faculty advisor. May be repeated to a maximum of 12 hours. Prereq: Completion of course requirements in Ph.D. program, consent of instructor, and filing of prospectus.</td>
</tr>
<tr>
<td><strong>TA 748 MASTER’S THESIS RESEARCH.</strong> (0) Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.</td>
</tr>
<tr>
<td><strong>TA 749 DISSERTATION RESEARCH.</strong> (0) Half-time to full-time work on dissertation. May be repeated to a maximum of 6 semesters. Prereq: Registration for 2 full-time semesters of TA 769 following successful completion of qualifying examination.</td>
</tr>
<tr>
<td><strong>TA 760 THEATRE PRACTICE: EFFECTIVE ARTISTIC COMMUNICATION.</strong> (3) This course is designed to foster collaboration among members of the artistic team, examine each member’s role, and develop communication skills through practical application. Prereq: Graduate standing in Theatre.</td>
</tr>
<tr>
<td><strong>TA 768 RESIDENCE CREDIT FOR MASTER’S DEGREE.</strong> (1-6) May be repeated to a maximum of 12 credits.</td>
</tr>
<tr>
<td><strong>TA 769 RESIDENCE CREDIT.</strong> (0-12) Residence Credit for the Doctoral Degree. May be repeated indefinitely.</td>
</tr>
<tr>
<td><strong>TA 770 SEMINAR IN THEATRE: (Subtitle required).</strong> (3) Intensive study in a designated area of theatre. Subtitle required. May be repeated to a maximum of nine hours when identified under different subtitles. Prereq: Graduate standing in Theatre.</td>
</tr>
<tr>
<td><strong>TA 771 ADVANCED STUDIES IN THEATRE HISTORY: (Subtitle required).</strong> (3) Seminar designed to provide extensive reading and research over historical issues relating to dramatic literature and theatre practices of a designated period. May be repeated to a maximum of six credits when identified by different subtitles. Prereq: Graduate standing in Theatre.</td>
</tr>
<tr>
<td><strong>TA 780 INDEPENDENT STUDY IN THEATRE.</strong> (1-3) Study and research on specific topics and problems according to the interests and needs of individual students. Normally offered as an independent work course. May be repeated to a maximum of six credits.</td>
</tr>
<tr>
<td><strong>TA 790 RESEARCH SYMPOSIUM.</strong> (0-1) This course is for doctoral students to present current research projects. Students in the M.A. program may register for 0 credit. May be repeated to a maximum of three credits. Prereq: Graduate Standing in Theatre.</td>
</tr>
</tbody>
</table>

**Dance**

| *TAD 140 INTRODUCTION TO DANCE.** (3) This course will provide students with an introduction to the history, theory and principles of dance as a cultural and aesthetic form of expression. The class will provide students with fundamentals of movement while providing an opportunity to express themselves creatively through the use of improvisation, composition, and choreography. Creative results of these explorations will be shown as part of a public performance at the end of the semester. |
| **TAD 141 MODERN DANCE.** (2) Foundations course in basic movement concepts of time, space, and energy, emphasizing technical development and creative exploration. |
| **TAD 142 BALLET I.** (2) Fundamentals of ballet technique designed to acquaint students with the dance form’s basic principles, through exercises at the barre, center work, and movement combinations. Students will learn to observe, analyze, and perform classical ballet movements and acquire fundamental understanding of vocabulary, theory, and aesthetics of the art form. |
| **TAD 143 JAZZ DANCE.** (2) Theory and practice of jazz dance from early 20th century to present. |
| **TAD 147 BEGINNING MUSICAL THEATRE DANCE.** (2) Beginning Musical Theatre Dance will provide students with a basic understanding of theatre dance fundamentals, styles and history. Students will gain a basic knowledge of fundamental dance technique. Utilizing vocabulary from ballet to jazz styles, students will hone basic dance skills and be exposed to a variety of theatre dance styles and “period” dances (relating to specific eras in dance history), and gain understanding of the basic framework of theatre dance history, including notable choreographers, innovations, styles and shows. |
| **TAD 241 MODERN DANCE II.** (2) A continuation of Modern Dance I. Expands technique and theory through increasingly complex combinations and movement analysis, and introduces new technical vocabulary, style, and presentation. Prereq: TAD 141. |
| **TAD 242 BALLET II.** (2) A continuation of Ballet I, with extended technical and artistic ballet skills and the use of increasingly complex combinations, technical vocabulary, and emphasis on style and presentation. Prereq: TAD 142. |
| **TAD 243 JAZZ DANCE II.** (2) Intermediate jazz dance emphasizing contemporary techniques and styles. Prereq: TAD 143 and permission of instructor. |
TOX 508 RESEARCH METHODS IN TOXICOLOGY. (1-3)
The course provides students with ‘hands on’ experience in research methods used to solve toxicological problems. Students will be under the direction of a GCT faculty member, who will supervise the student’s efforts on a research project. The student will be trained not only in the ‘hands on’ techniques but also in how to independently design and interpret research experiments. Students will prepare a final report on their research project, which will be submitted for publication. The course is designed to give students an understanding of the scientific method and how to work independently in research settings. Emphasis will be placed on the development of critical thinking skills and the ability to communicate research findings effectively. Prereq: TOX 509 or consent of instructor.

TOX 509 BIOCHEMICAL AND ENVIRONMENTAL TOXICOLOGY. (3)
Presentation of basic and advanced concepts to provide an integrated description of toxicology, its scope, the unique application of principles that characterize it as a science, and its professional practice. Emphasis will include the influence of federal regulations on the practice of toxicology. Prereq: BCH 501 and PHA 522 or equivalents or consent of instructor.

TOX 560 ENVIRONMENTAL PHYSIOLOGY AND TOXICOLOGY. (4)
Emphasis will be placed on the physiological and toxicological effects of chemicals on natural biota, including considerations at cellular, organismal, population, and community levels. This will include assimilation and metabolism of pollutants by animal species, with emphasis upon biochemical and physiological mechanisms involved in stress-induced responses and stress reduction. Additional areas of concern will include the transport, fate, and effects of chemical stressors on structure and function of biotic communities and will include introductions to ecotoxicology and environmental regulatory strategies. Lecture, three hours; recitation, two hours per week. Prereq: BCH 530 or PHA 502 or equivalent or consent of instructor. (Same as BIO 560.)

TOX 600 ETHICS IN SCIENTIFIC RESEARCH. (1-2)
The course will commence with an overview of good laboratory practices and present them as the basis of good scientific research, along with an overview of quality assurance and appropriate practices in data analysis and data interpretation. The course will then move to the ethics of human and animal experimentation and discuss the concepts of data and intellectual property, their ownership and access to them. The problems of reviewing other workers’ intellectual property such as grant applications, research papers and other intellectual property will be addressed. Prereq: Research experiences; consent of instructor. (Same as VS 600.)

TOX 649 ADVANCED MOLECULAR PharMACOLOGY. (2)
This course will provide in-depth coverage of the molecular pharmacology of growth factors, transcription factors, receptors, and ion channels. Emphasis will be placed on both the normal functions of these cell-signaling molecules and perturbations that result in several prevalent human diseases, including cancer, Alzheimer’s, diabetes, osteoporosis, and inherited human illnesses. Students will be introduced to experimental approaches to diagnosing and treating these illnesses in the light of our evolving knowledge of molecular pharmacology. Prereq: IBS 601-606 or consent of instructor. (Same as PHA/PHR 649.)

TOX 670 CHEMICAL CARCINOGENESIS. (3)
Lectures and discussion of the chemical and biochemical reactions of chemical carcinogens and their metabolites. Prereq: CHE 232; PHR 400; or BCH 501, 502. (Same as PHA 670.)

TOX 680 MOLECULAR MECHANISMS IN TOXICOLOGY. (5)
An intensive examination of the chemistry and action of substances which adversely affect living systems, and considerations of means of lessening their impact on man and the environment. Prereq: TOX 509 or consent of Director of Graduate Studies.

TOX 690 PRACTICAL ANALYTICAL TOXICOLOGY. (3)
An evaluation of techniques for the isolation, identification, and quantitation of drugs, pesticides and other toxicants in biological samples. Concepts and theory will be presented in the lecture portion, while the laboratory will be devoted to actual sample analysis by the students. Lecture, 1 hour; laboratory, six hours. Prereq: Consent of the instructor and graduate standing in toxicology. (Same as VS 690.)

TOX 748 MASTER’S THESIS RESEARCH. (0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

TOX 749 DISSERTATION RESEARCH. (0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

TOX 767 DISSERTATION RESIDENCY CREDIT. (2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

TOX 770 TOXICOLOGY SEMINAR. (0-2)
A specialized seminar focusing on current topics of toxicological significance. Registration each fall and spring semester required of all toxicology majors until residency requirements for the degree have been completed. May be repeated to a maximum of three times during a semester and for a maximum number of two credits during entire graduate course work.

TOX 780 SPECIAL PROBLEMS IN TOXICOLOGY. (2)
Exposure to and actual research experience in an area of toxicology other than that encountered by students in their thesis and dissertation research. May be repeated to a maximum of six credits. Prereq: Consent of graduate adviser.

TOX 790 RESEARCH IN TOXICOLOGY. (1-12)

TSL Teaching English as a Second Language

TSL 560 LITERACY DEVELOPMENT IN THE ESL CLASSROOM. (3)
This course is designed to introduce students to theory, research and teaching applications of second language literacy development in the ESL classroom. This is a field-based course and students will study current teaching methods of literacy instruction and apply those ideas in a practicum ESL classroom.

TSL 597 ESL TEACHING PRACTICUM. (3)
This course provides students with a supervised ESL teaching experience of 45 hours, and an additional 15 hours of course meetings with the supervisor to explore instructional strategies, classroom management issues and reflect upon their own development as teachers. The course is designed as the culmination of the TESL Graduate Certificate, and can be taken in the fall, spring or summer terms. ESL teaching placements must be approved by the course instructor. Prereq: Students must be enrolled in the TESL Graduate Certificate course of study.

TSL 675 ENGLISH GRAMMAR: ANALYSIS AND PEDAGOGY. (3)
This course is designed to deepen students’ explicit understanding of English grammar, with particular attention paid to grammatical structures most challenging for English language learners. The course explores the development of learning language, with a primary focus on the development of English grammatical competence. Issues in the teaching of English grammar are studied and applied to ESL teaching techniques and curriculum.
**Course Descriptions**

**TSL 697 ESL INTERNSHIP.**
This course provides TESL MA students with a supervised ESL teaching experience of 90 hours, and an additional 15 hours of course meetings with the supervisor to explore instructional strategies, classroom management issues and reflection upon their development as ESL teachers. The course is designed as the culmination of the TESL MA program, and can be taken in the fall, spring or summer terms. ESL teaching placements must be approved by the course instructor. Prereq: Student must be in good standing in the TESL MA program.

**UK University Wide**

**UK 90 DEVELOPMENTAL UNIVERSITY COURSE**
*(Title to be assigned).*
(1-3)
This course allows offering of developmental topics to assist students to reach proficiency in an academic area prior to taking credit-bearing courses. This course is not available for degree credit towards a bachelor’s degree. Each proposal must be approved by the Associate Provost for Undergraduate Education. A particular title may be offered no more than twice, after which a permanent course should be developed. Prereq: To be determined by the instructor.

**UK 100 UNIVERSITY COURSE**
*(Title to be assigned).*
(1-3)
This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Associate Provost for Undergraduate Education. A particular title may be offered at most twice under the UK 100 number. Students may not repeat under the same title. Prereq: Will be set by instructor.

**UK 101 ACADEMIC ORIENTATION.**
(1-2)
This course is designed to assist undergraduates in adjusting to the academic life of the University. Through lectures, discussions, exercises, and out-of-class assignments, UK 101 helps first-year students: articulate the purpose and nature of a college education at a research university; articulate UK’s expectations of its students; gain an appreciation of the University’s mission, history, and traditions; develop skills for achieving academic success such as study strategies and library research skills; increase awareness and use of campus resources; reflect on personal and social issues that first-year students often face in a college environment; become involved in the total life of the University; and form beneficial relationships with students, faculty, and staff.

**UK 110 PASS/FAIL UNIVERSITY COURSE**
*(Title to be assigned).*
(1-3)
This course permits the offering at the introductory level of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Associate Provost for Undergraduate Education. A particular title may be offered at most twice under the UK 100 number. Students may not repeat under the same title. Prereq: Will be set by instructor.

**UK 201 ACADEMIC ORIENTATION FOR TRANSFERS.**
(1)
This course is designed to assist transfer students in adjusting to the academic life at the University of Kentucky. Through lectures, discussions, exercises and out-of-class assignments, transfer students will gain an appreciation of the University’s mission, history, and traditions; develop skills for achieving academic success such as study strategies and library research skills; increase awareness and use of campus resources; reflect on personal and social issues that transfer students often face in a college environment; become involved in the total life of the University; and form beneficial relationships with students, faculty, and staff.

**UK 300 UNIVERSITY COURSE**
*(Title to be assigned).*
(1-3)
This course permits the offering of special courses of an interdisciplinary, topical, or experimental nature. Each proposal must be approved by the Associate Provost for Undergraduate Education. A particular title may be offered at most twice under the UK 300 number. Students may not repeat under the same title. Prereq: Will be set by instructor.

**UK 301 CROSS-CULTURAL STUDIES**
*(Subtitle required).*
(3)
A study of a non-Western or Third World culture (or cultures) through an examination of its cultural, artistic, social, political, economic or religious traditions. The particular culture(s) to be studied and the approach to be adopted will be determined by the instructor. Each course proposal must be approved by the Associate Provost for Undergraduate Education and students may not repeat the course under the same subtitle. May be repeated to a maximum of nine credits.

**USP University Studies Program**

**USP 100-109 NATURAL SCIENCES**
*(Subtitle required).*
(3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the natural science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP natural science requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

**USP 110-119 SOCIAL SCIENCES**
*(Subtitle required).*
(3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the social science requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP social science requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

**USP 120-149 HUMANITIES**
*(Subtitle required).*
(3)
An introductory course of an interdisciplinary, topical, or experimental nature which may be used toward partial fulfillment of the humanities requirement in the University Studies Program. Each proposal must include the discipline in which the course is being offered and the options available to the student to complete the USP humanities requirement. Each proposal must be approved by the Associate Provost for Undergraduate Education.

**VS Veterinary Science**

**VS 350 INTRODUCTION TO ANATOMY, PHYSIOLOGY, AND ANIMAL HYGIENE.**
(3)
A study of anatomy and physiology as related to courses in livestock production, judging, nutrition, meats and diseases, and introduction to the basic mechanism of animal disease and the relationship of animal hygiene.

**VS 351 PRINCIPLES OF ANIMAL HYGIENE AND DISEASE CONTROL.**
(3)
A study of animal sanitation and disease control management. The course will acquaint students with the more important infectious, toxic, metabolic and parasitic diseases of domestic animals and will emphasize preventive concepts.

**VS 395 SPECIAL PROBLEMS IN VETERINARY SCIENCE.**
(1-4)
Prereq: VS 350, 351, and consent of instructor. May be repeated to a maximum of six credits.

**VS 600 ETHICS IN SCIENTIFIC RESEARCH.**
(1-2)
The course will commence with an overview of good laboratory practices and present them as the basis of good scientific research, along with an overview of quality assurance and appropriate practices in data analysis and data interpretation. The course will then move to the ethics of human and animal experimentation and discuss the concepts of data and intellectual property, their ownership and access to them. The problems of reviewing other workers’ intellectual property such as grant applications, research papers and other intellectual property will be addressed. Prereq: Research experiences; consent of instructor. (Same as TOX 600.)

**VS 690 PRACTICAL ANATOMICAL TOXICOLOGY.**
(3)
An evaluation of techniques for the isolation, identification, and quantitation of drugs, pesticides and other toxicants in biological samples. Concepts and theory will be presented in the lecture portion, while the laboratory will be devoted to actual sample analysis by the students. Lecture, 1 hour; laboratory, six hours. Prereq: Consent of the instructor and graduate standing in toxicology. (Same as TOX 690.)

**VS 748 MASTER’S THESIS RESEARCH.**
(0)
Half-time to full-time work on thesis. May be repeated to a maximum of six semesters. Prereq: All course work toward the degree must be completed.

**VS 749 DISSERTATION RESEARCH.**
(0)
Half-time to full-time work on dissertation. May be repeated to a maximum of six semesters. Prereq: Registration for two full-time semesters of 769 residence credit following the successful completion of the qualifying exams.

**VS 767 DISSERTATION RESIDENCY CREDIT.**
(2)
Residency credit for dissertation research after the qualifying examination. Students may register for this course in the semester of the qualifying examination. A minimum of two semesters are required as well as continuous enrollment (Fall and Spring) until the dissertation is completed and defended.

**VS 768 RESIDENCE CREDIT FOR THE MASTER’S DEGREE.**
(1-6)
Residency credit while completing research and writing thesis. Prereq: Completion of course requirements for the MS. May be repeated to a maximum of 12 hours.

**VS 769 RESIDENCE CREDIT FOR THE DOCTOR’S DEGREE.**
(0-12)
May be repeated indefinitely.

**VS 770 VETERINARY SCIENCE SEMINAR.**
(1)
Required of graduate students in veterinary science. May be repeated to a maximum of six credits. Prereq: Consent of staff.

**VS 781 CORRELATIVE PATHOLOGY.**
(1-3)
Supervised experience in the use of clinical, gross and histopathological techniques in the differential and definitive diagnosis of diseases. May be repeated to a maximum of nine credits. Prereq: Pathology in D.V.M. curriculum or equivalent and consent of staff.

**VS 782 ADVANCED VIROLOGY.**
(3)
Current trends in virology. Typical topics include DNA tumor viruses, RNA tumor viruses, persistent virus infections, and interference. Emphases of molecular mechanisms. Prereq: BIO 582. Adequate biochemistry and genetics strongly recommended, or consent of instructor. (Same as BIO 782.)

**VS 785 ADVANCED VETERINARY PARASITOLOGY.**
(3)
Experimental methodology and host-parasite relationships of the protozoan and helminth parasites of domestic animals. Prereq: Parasitology in D.V.M. curriculum or equivalent and approval of staff.
WRD Writing, Rhetoric and Digital Media

WRD 110 COMPOSITION AND COMMUNICATION I. (3)
Composition and Communication I is the introductory course in a two-semester sequence designed to engage students in composing and communicating ideas using speech, writing, and visuals. Students will develop interpersonal communication, critical thinking, and information literacy skills by exploring what it means to be engaged, twenty-first century citizens. Students will practice composing, critiquing, and revising ideas based on personal experience, observation, and fieldwork in the community, culminating in several discrete projects using oral, written, and visual modalities.

WRD 111 COMPOSITION AND COMMUNICATION II. (3)
Composition and Communication II is the second of two general education courses focused on integrated oral, written, and visual communication skill development emphasizing critical inquiry and research. In this course, students will explore issues of public concern using rhetorical analysis, engage in deliberation over those issues, and ultimately propose solutions based on well-developed arguments. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and work effectively in groups (dyads and small groups). A significant component of the class will consist of learning to use visual and digital resources, first to enhance written and oral presentations and later to communicate mass mediated messages to various public audiences. Over the course of the semester, class members can expect to work independently, with a partner, and in a small group (team) to investigate, share findings, and compose and deliver presentations, as well as to practice and evaluate interpersonal and team dynamics in action. Prereq: CIS 110 or WRD 110.

WRD 112 ACCELERATED COMPOSITION AND COMMUNICATION II (WRD). (3)
WRD 112 is an accelerated version of the Composition & Communication II UK Core requirement. WRD 112 focuses on integrated oral, written, and visual communication skill development emphasizing critical inquiry and research. In this course, students will explore issues of public concern using rhetorical analysis, engage in deliberation over those issues, and ultimately propose solutions based on well-developed arguments. Students will sharpen their ability to conduct research; compose and communicate in written, oral, and visual modalities; and use interpersonal skills to work effectively in groups. Prereq: AP English Composition score of 4 or 5, an ACT English score of 32 or higher, an SAT verbal score of 720 or higher, or acceptance into the University’s Honors Program.

WRD 130 INTRODUCTORY WORKSHOP (Subtitle required). (1-3)
Flexible course hours that supplement an existing course or provide introductory training in a particular area of writing, rhetoric, or digital studies. This workshop class focuses on the visual aspect of digital communication skills. Students will create visuals to explore identities, tell stories, and interpret information. May be taken a maximum of 6 credit hours under different subtitles.

WRD 203 BUSINESS WRITING. (3)
Instruction and experience in writing for business, industry, and government. Emphasis on clarity, conciseness, and effectiveness in preparing letters, memos, and reports for specific audiences. Prereq: Completion of University Writing requirement or new general education Communication(s) (6 hour) sequence.

WRD 204 TECHNICAL WRITING. (3)
Instruction and experience in writing for science and technology. Emphasis on clarity, conciseness, and effectiveness in preparing letters, memos, and reports for specific audiences. Prereq: Completion of University Writing requirement.

*WRD 205 WRITING AND RHETORIC (Subtitle required). (3)
An open topics writing course focused on rhetorical analysis of issues of academic, political, social, or cultural significance. Students will interpret, analyze, and evaluate rhetorical strategies employed in print and digital texts. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 208 MULTIMEDIA WRITING. (3)
This course develops a practical understanding of writing and rhetoric through multimedia platforms and artifacts. Students will produce and publish to the web in a range of media such as digital video and photography, blogs, wikis, podcasts, and comics. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 210 SOCIAL MEDIA: THEORY, CULTURE, POLITICS, PRACTICE. (3)
The course examines how social media and the writing practices we employ influence notions of what it means to participate in community, society, and public discourse. Students will compose across different social media platforms and explore theoretical literature to examine the ways these tools are evolving. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 300 INTRODUCTION TO WRITING, RHETORIC, AND DIGITAL STUDIES. (3)
This course introduces students to the theory of rhetoric and composition. Students may examine the theoretical, ethical, and stylistic issues connected to writing in various rhetorical situations, including digital environments. The course forms a theoretical foundation for all other WRD courses and is required for all WRD majors. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 301 STYLE FOR WRITERS. (3)
This course is designed for those who wish to improve their own writing style or the style of others. While the course may include some account of historical changes in prose style and require some stylistic analysis of literary texts, the emphasis is on editing contemporary prose, both in exercises and in the students’ own writing. Students will learn and practice principles such as economy, coordination, subordination, precision, parallelism, balance, coherence, rhythm, clarity, and grace. Prereq: Completion of Composition and Communication requirement and consent of instructor. (Same as ENG 301.)

#WRD 302 THE ESSAY. (3)
Intensive writing and reading in the genre of the essay. The course will explore the conventions of the essay and may analyze historical changes in the genre or survey well-known essayists such as Montaigne and Woolf. Students will write essays and analyze the stylistic choices of professional essayists in order to inform their own writing in the genre. Prereq: Completion of Composition and Communication requirement and consent of instructor.

*WRD 306 INTRODUCTION TO PROFESSIONS IN WRITING. (3)
This course offers an introduction to and preparation for careers in the teaching of writing, professional writing, publishing, and editing. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 308 VISUAL RHETORIC. (3)
This course introduces visual rhetoric, covering its history, current practice, and possible futures. Utilizing the disciplinary tools of rhetoric, students will compose in textual and visual modes, learning a variety of methods with which to create and critique visuals. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 311 HISTORY OF THE DOCUMENTARY. (3)
This course is designed to trace the evolution of the documentary film. Although the emphasis will be on the development of the American documentary, students will also be looking into contributions from across the world. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 312 INTRODUCTION TO DOCUMENTARY. (3)
This course is dedicated to critical examination of approaches to the documentary, and the construction of a documentary of one’s own. Students will examine different strategies, structures, and topics, with an eye to production. Prereq: Completion of Composition and Communication requirement and consent of instructor.

#WRD 320 RHETORICAL THEORY AND HISTORY. (3)
This course introduces students to the scholarly study of rhetoric by exploring the interrelations of theory, criticism, and practice within a particular historical context. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 322 RHETORIC AND ARGUMENT. (3)
This course examines theories of rhetorical argument. Students read rhetorical theorists who speculate about what makes certain speech persuasive, as well as contemporary rhetoricians who are actually creating persuasive written and oral texts. Students use these theories to analyze and construct original arguments. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 324 WRITING CENTER PEER TUTORING. (3)
An undergraduate seminar that prepares qualified undergraduate students to become engaged and effective peer consultants in the UK Writing Center. Students in the course are actively involved in reading, writing, listening, observing, speaking, researching, and presenting as they become immersed in the theory and practice of Writing Center consulting. Prereq: Completion of Composition and Communication requirement and consent of instructor.

#WRD 395 INDEPENDENT STUDY. (1-3)
For undergraduate majors in WRD with a standing of 3.0 in the major and permission of the Director of Undergraduate Studies. Each student pursues a course independently under the guidance of a faculty member and produces at least one major project. Prereq: Standing of 3.0 in the major and permission of the Director of Undergraduate Studies.
#WRD 399 INTERNSHIP. (1-6)
Internship in the community that brings together the student’s critical and practical knowledge of writing, rhetoric, or digital media. In addition to evaluation by the internship supervisor for the course grade, the students will produce a reflective research project that may be presented in an annual public research forum. Repeatable up to 6 hours. Prereq: Completion of Composition and Communication requirement and consent of Internship Supervisor.

#WRD 401 SPECIAL TOPICS IN WRITING (Subtitle required). (3)
Studies of special topics in writing, in areas such as literary nonfiction (essays), responding to literature, cultural critique, and composing law and justice. Topics announced the preceding semester. May be repeated under different subtitles to a maximum of six credits. Prereq: Completion of UK Core Composition and Communication I-II requirement and consent of instructor. (Same as ENG 401.)

#WRD 402 AUTOBIOGRAPHICAL COMPOSITION (Subtitle required). (3)
A special topics course which examines a particular medium of autobiographical composition (textual, digital, or performative) and/or the ways autobiographical composing is used in particular contexts or communities. Students study and produce autobiographical composition. Mode of composing (print, digital, performance, or a combination) is at the discretion of the instructor. Repeatable up to 6 hours under different subtitles. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 405 EDITING ENGLISH PROSE. (3)
This course is designed for students interested in the basics of editing and publishing and offers instruction and extensive practice in editing and revising both the student’s own writing and the prose works of others. In addition to learning techniques of revision, verification of sources, and preparation of manuscripts, students will be expected to learn about the editing profession generally and to follow trends in editing and publishing. Not for students with writing deficiencies. Prereq: WRD 301, or WRD 306, or consent of instructor. (Same as ENG 405.)

#WRD 406 TOPICS IN PROFESSIONAL WRITING (Subtitle required). (3)
This course addresses contemporary genres of professional writing, including professional correspondence, reports, and social media most often found in business, technical, and scientific communities. The course also addresses the common tools and technologies of professional writing production and practice. Prereq: WRD 204 or WRD 306 or consent of instructor.

#WRD 408 DIGITAL COMPOSING. (3)
This course provides grounding in the analysis and theory of digital composition, which will inform personal, professional, or community-based projects. Projects will encourage students to work flexibly across various digital platforms. Prereq: WRD 308 or consent of instructor.

#WRD 412 INTERMEDIATE DOCUMENTARY PRODUCTION. (3)
This course explores a range of documentary approaches and styles, after which workshop and production of students’ own documentaries will be emphasized. Students will focus on particular approaches and subjects to develop their individual signatures and styles. Prereq: Completion of WRD 312 or consent of the instructor.

#WRD 420 RHETORICAL TRADITIONS (Subtitle required). (3)
This course offers a detailed examination of the history and theory of a specific rhetorical tradition or group of traditions. Students will gain familiarity with key concepts and terms in a rhetorical tradition, compare and contrast culturally situated definitions of rhetoric, and better understand the way rhetorical historiography influences how rhetorical traditions are defined and taught. Repeatable up to 6 hours. Prereq: Completion of WRD 320 or consent of instructor.

#WRD 422 PUBLIC ADVOCACY (Subtitle required). (3)
This course examines the work that writing does in the world by connecting the study of persuasion in specific social movements, campaigns, and genres with opportunities for students to create texts and campaigns. This course may offer a historical or contemporary focus, and may examine local, regional, national, or transnational movements. Prereq: Completion of WRD 320 or WRD 322 or consent of the instructor.

#WRD 425 ENVIRONMENTAL WRITING. (3)
Students will consider the ways writers address environmental issues by exploring various forms of environmental writing, from personal narrative to literary nonfiction to advocacy. Prereq: Completion of Composition and Communication requirement or consent of instructor.

#WRD 430 ADVANCED WORKSHOP (Subtitle required). (3)
Flexible course hours that supplement an existing course or provide advanced training in a particular area of writing, rhetoric, or digital studies. Prereq: Completion of Composition and Communication requirement or consent of instructor.
