Degree Planner (APEX)

The University of Kentucky offers a degree audit reporting system for students and advisors known as Degree Planner (APEX). Degree Planner (APEX) compares a student’s academic work at any point in the student’s academic career with the requirements of UK’s academic majors and minors and prepares a comprehensive report detailing the progress toward meeting those requirements. The system also provides the flexibility for students and advisors to run “what-if” audits so that students can review the requirements if they are interested in changing their major or adding a minor. Students and advisors can access Degree Planner (APEX) and view tutorials on how it operates and its functions through myUK.

More detailed information on how to manually add exceptions, processing exceptions through the APEX Team, and many other helpful tips can be found at http://www.uky.edu/degreeaudit/
