NEW CLASS ROLLS FEATURES

- Automatically lists the classes a faculty is teaching on their homescreen and does not require them to search for their course.
- Performance- has the ability to pull back large class rolls without issues
- A new cleaner user interface stylized similar to the other portal applications such as catalog, GPS etc
- Student pictures are included, along with classification, degree and major. (this is when you click on a student)
- The Ferpa privacy flag, if set for a student, will show the student name in red with a red padlock beside the name, and if you hover over the lock a tooltip will say "FERPA Privacy"
- Waitlist and export to excel features same as before
- Enhanced print features includes 3 modes:

  - Default
    - Print-out will reflect your screen
  - Detailed
    - Will print with all student details expanded
  - Table Format
    - Legacy format with all information in a table

- Ability to issue alert on student (open new alert application). Any notification about alerts will also show on the homescreen of the faculty.
- Specified pronoun and preferred name fields, when data is available, is included for display. Preferred name is displayed when it is available and different from first name. Preferred name shows in parentheses
Faculty can submit an alert by clicking on the "Issue Alert" link next to the student in their Class Roll list. This will open a submission form and automatically fill in the student's information. The new, streamlined submission form is now broken into smaller steps and populates only the questions needed for the selected alert type(s).
Faculty have been able to submit alerts from the class roll for some time but now they will be able to manage those alerts and receive updates using the Alerts icon in the top right of their class roll.

The icon will display the number of alerts that have updated information. Once you click on the icon, you will open your ACT Faculty inbox view in a new window.

In the inbox, alerts are grouped in order from newest (unread) to oldest (read). You may filter the list using the column headers.

Clicking on the alert will open the alert detail page. This will show you the important information associated with the alert:

- The information you submitted from the submission form
- The student’s advisor
- A discussion area to correspond with the student’s assigned advisor

To start a new discussion, click the “Start New Discussion” button.
### Academic Alerts

#### My Alerts / Alert #28640

<table>
<thead>
<tr>
<th>Status</th>

</thead>
<tbody>
<tr>
<td>Missed Classes</td>
<td>1. How many classes? - 1 to 3</td>
</tr>
</tbody>
</table>

#### Comments from issuer

- TEST The information for this student alert is based on attendance and performance in MA 114 Section 001 Recitation that meets on Tuesday and Thursday at 8am. I do not know if the student has been participating in the full MA 114 lecture on Monday, Wednesday, Friday. TEST

#### Additional Comments

- TEST I’ve talked with Ethan in passing and he assured me he would try and get to class. Unfortunately, this has not been the case. TEST
