Instructions to update Internet Explorer to IE9

1. Login to the UK Portal – you will be routed to the ecrt Welcome Page. Click **Continue**.

![Image of the UK Portal](image1)

2. In the upper right corner of the page, Select the **Tools** icon.

![Image of Tools icon](image2)

3. Click **F12 Developers Tools**.

4. At the bottom of the page, select the Emulation tab.

5. On the left side of the Emulation tab, find the Document Mode drop down.

6. Select 9 from the Document Mode drop down menu.

7. Your page will then refresh. This may take a few moments.

8. You will then be viewing your browser in the IE 9 format.
9. To remain in Document Mode 9, leave this window open OR unpin and minimize the window:

a. Leave the window open but shrink the size:

You can shrink the size of the window by lining up your cursor with the top of the box and dragging it towards the bottom of the screen.

b. Click the Unpin icon. A new pop up box will generate. Minimize the pop up box.

Note: Once you exit ecrt OR click out of the F12 Developer window, you will be returned to the default version of Internet Explorer.
