### Annotated Bibliography

Ayers, Edward L. All Over the Map: Rethinking American Regions. 1996.

This analysis will help in my paper because it discusses southern various view points which will help in my understanding of where the southern men stood on issues regarding their lives.

Boles, John B. The South Through Time: A History of an American Region. New Jersey: Prentice Hall, 1999.

John Boles provides great insight as to what kinds of thoughts and actions were taking place in the south. Again, from this information the lives of the southern male come out and lead to my understanding of the southern male and where religion stood in his life.

Clinton, Catherine and Nina Silber. Divided House: Gender and the Civil War. Oxford: Oxford University Press, 1992

This book discusses the ways in which females and males were different and the different roles that they played during the Civil War. The women were seen as the good women of society while it was the men that caused all the problems. Men were the ones out drinking and causing public disturbances and they were also not present in church all the time as I had thought them to be.

Genovese, Eugene D. The Southern Tradition. Cambridge, Massachusetts: Harvard University Press, 1994.

Genovese has been quite interesting to read this semester and I have to incorporate him into my paper in some way. His views, although at times outlandish, are valid points and need to be considered. He talks about prominent southern men and from his discussion on Calhoun and Randolph I hope to use these men in my paper as well.

Hill, Samuel S. Religion in the Southern States: A Historical Study. Macon, Georgia: Mercer University Press, 1983.

This book brought to my attention that the men did not heavily rely on religion in their lives, that it was not as important as once thought, so it provides some new light to the men of the south.

The South and the North in American Religion. Athens, Georgia: The University of Georgia Press, 1980.

The comparison of the North and the South and religion is important to my paper because it provides some sort of base to look upon and see what other people in the United States were doing about religion and how it played out, especially during the Civil War.

Ownby, Ted. Subduing Satan. Chapel Hill: The University of North Carolina Press, 1990.

This book by far is my favorite for information regarding males in the south. It has been quite helpful in providing information about daily and weekend activities of the southern male and then what the churches thought about these activities.

Preston, William. "Letter from William Preston to his son Robert Wickliffe Preston." Nov. 28, 1861 Box 54, Wickliffe-Preston Family Papers. [www.uky.edu/~dolp/HIS316](http://www.uky.edu/~dolp/HIS316).

The letter written by this soldier helps to show the bond between family in the south and will help to emphasize this point in my paper.

Wilson, Charles Reagan. Religion in the South. Jackson: University Press of Mississippi, 1985.

Again, this is another book that offers information about the South and their religion and how it affected the lives of the people that lived there. All of this helps to form a base to build off of when reading the primary sources.
