

Relationship between planting spacing and quadratic median dbh over time for (a) loblolly and (b) slash pine.

Relationship between planting spacing and crown ratio over time for slash pine.

Relationship between stocking and Girard form class and stem taper for loblolly pine.

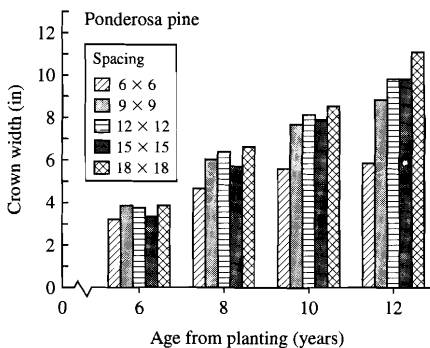

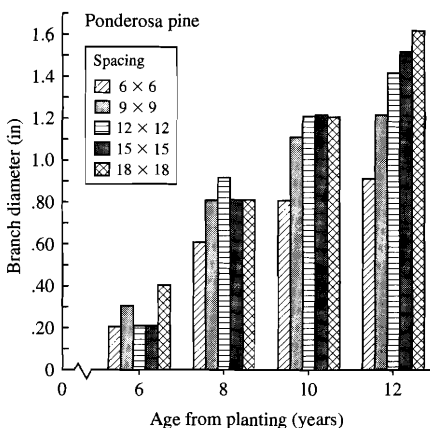

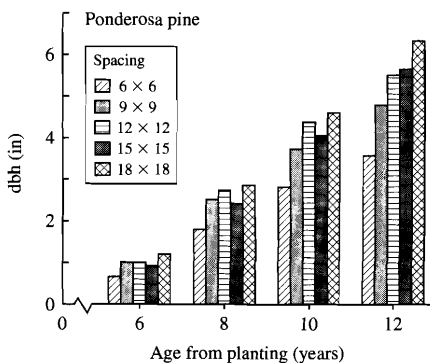

FIGURE 6-6

Intertree spacing will influence several individual tree attributes, such as these for loblolly and slash pine (from Smith and Strub 1991), ponderosa pine (from Oliver 1979), and Douglas-fir (from Reukema 1979).
