| Example: PSY100-001  
The activity type on the course section defaults to the 1st one on the course record, usually LEC.  
There is a maximum of 1 activity type on this record.  
There is no filler left.  
There is one delivery mode on a course section. | Shows the day, time and room at the section level.  
3 characters filler left.  
Would like to add activity type (LEC, LAB, etc.) to this record and screen.  
May be problem with location of the field on the screen.  
Voice reads this screen to pick up meeting pattern – changes may affect Voice. | Shows the % of credit hours for each instructor.  
Would like to add activity type (LEC, LAB, etc.) to this record and screen.  
7 characters of filler left –  
use 3 characters for activity type  
use 2 characters for instructor role  
Not prohibited from entering a TA at 0% to track that they are in class but not getting credit for instruction.  
Primary instructor receives largest percentage for the course. |

**Plan 1:** Tie instructors to activity type, and meeting pattern to activity type.  
**Plan 2:** Add Instructor Role (filler) (teacher, grader, recitation, oversight, etc.) to instructor record.

**ACTION:** Jayna will ask Connie about the percentage on the Instructor Record and if percent of credit hours is correct.

**DATA NEED:** Table of instructor roles.

**DATA QUALITY:** Activity types for the meeting pattern and instructor record need to be verified against those offered at the course level, not the section level.

**EXTRACTION LOGIC:** Activity type needs to reflect what is on the course at the meeting pattern level, not at the section level (IARRCRC record level).
