This map was produced using the digital line graph (DLG) base map (1:100,000 scale, universal transverse Mercator, zone 16) available from the U.S. Geological Survey. 1:100,000-scale map accuracy standards. Digital oil and gas well location and completion data and copies of well records are available at the Kentucky Geological Survey, Letcher, KY 40952. This map is subject to all limitations and restrictions of the U.S. Geological Survey DLG data base. Scale 1:500,000

GENERALIZED DISTRIBUTION OF PRODUCTION
Excluding Mississippian Carbonate and Devonian Shale Wells

OIL AND GAS MAP OF THE HAZARD
30 x 60 MINUTE QUADRANGLE, KENTUCKY
Brandon C. Nuttall

EXPLANATION
1 Oil well
2 Abandoned oil well
3 Combined oil and gas well
4 Abandoned gas well
5 Fractured zone well
6 Dry and abandoned well
7 Rig site
8 Workover project location
9 Secondary recovery or injection well
10 Abandoned service well
11 Strataligraphic study well

HAZARD-SENSITIVE
LOCATION MAP

Mississippian carbonate
Devonian or shale
